The undersigned, while owning the property/project described in the preceding paragraph, shall be responsible for the implementation of this WQMP and will ensure that this WQMP is amended as appropriate to reflect up-to-date conditions on the site. This WQMP will be reviewed with the facility operator, facility supervisors, employees, tenants, maintenance and service contractors, or any other party (or parties) having responsibility for implementing portions of this WQMP. At least one copy of this WQMP will be maintained at the project site or project office in perpetuity.

The undersigned is authorized to certify and to approve implementation of this WQMP. The undersigned is aware that implementation of this WQMP is enforceable under City of Palm Springs Water Quality Ordinance (Municipal Code Section Title 8, Chapter 8.70).

If the undersigned transfers its interest in the subject property/project, the undersigned shall notify the successor in interest of its responsibility to implement this WQMP.

"I, the undersigned, certify under penalty of law that I am the owner of the property that is the subject of this WQMP, and that the provisions of this WQMP have been reviewed and accepted and that the WQMP will be transferred to future successors in interest."

I. Project Description

Project Owner: O & M HR, LLC
1 MacArthur Place, Suite 300 South
Santa Ana, CA 92707
Telephone: (714) 546-5600

WQMP Preparer: Marcos Padilla, Civil Engineer
2552 White Road, Suite B
Irvine, CA 92614
Telephone: (949) 660-0110

Project Site Address:	700-600 East Tahquitz Canyon Way, Palm Springs, CA 92262
Planning Area/ Community Name/ Development Name:	Section 14 Aberdeen Residential
APN Number(s):	508-055-003, 006, 007, 008 & 009
Thomas Bros. Map:	PG 786, Grid E2 (2008 Edition)
Project Watershed:	Whitewater River
Sub-watershed:	Tahquitz Creek
Project Site Size:	8.74 acres

Standard Industrial Classification (SIC) Code: 8322, 5311

Formation of Home Owners' Association (HOA) or Property Owners Association (POA): Y ☒ N ☐

Additional Permits/Approvals required for the Project:

AGENCY	Permit required
State Department of Fish and Game, 1601 Streambed Alteration Agreement	Y ☐ N ☒
State Water Resources Control Board, Clean Water Act (CWA) Section 401 Water Quality Certification	Y ☐ N ☒
US Army Corps of Engineers, CWA Section 404 permit	Y ☐ N ☒
US Fish and Wildlife, Endangered Species Act Section 7 biological opinion	Y ☐ N ☒
Other *(please list in the space below as required)*	

The project is located at the northeast corner of Tahquitz Canyon Way and Calle El Segundo in the City of Palm Springs, California. The site is bounded on the north by Andreas Road, on the south by Tahquitz Canyon Way, on the east by the Renaissance Hotel, and on the west by Calle El Segundo.

The project proposes to construct ninety-seven (97) single family lots with 3-story family homes, Live/Work lofts and a retail pad on the approximate 8.74 acre site. Project features will consist of asphalt/concrete pavement, hardscape and landscaping. Four (4) driveway accesses will be provided within the development. Calle Alvarado will be extended along the easterly boundary and run parallel with Calle El Segundo in a north/south direction connecting to E. Andreas Road to the north and Tahquitz Canyon Way to the south. New planting will be provided throughout the site. The northerly portion of the site will be designated for single family townhomes, while the southerly portion designated for the retail buildings and Live/Work lofts. There will be no loading docks for any of the new buildings. Deliveries will take place via the front reception loading areas along Tahquitz Canyon Way. All storage facilities are going to be kept in an enclosure. Activities to be routinely conducted outdoors are vehicular and foot traffic into the lot driveways and retail buildings. There will be no activities within the area of the building associated with equipment or vehicle maintenance and repair, including washing or cleaning. There will be no service bays, fueling islands, or fuel pumps. Wastes generated from project activities include trash and debris from foot traffic and access roads.

Appendix A of this project-specific WQMP includes a complete copy of the final Conditions of Approval. Appendix B of this project-specific WQMP includes:

a. A Vicinity Map identifying the project site and surrounding planning areas in sufficient detail to allow the project site to be plotted on Permittee base mapping; and

b. A Site Plan for the project. The Site Plan included as part of Appendix B depicts the following project features:

- Location and identification of all structural BMPs, including Treatment Control BMPs.
- Landscaped areas.
- Paved areas and intended uses (i.e., parking, outdoor work area, outdoor material storage area, sidewalks, patios, tennis courts, etc.).
- Number and type of structures and intended uses (i.e., buildings, tenant spaces, dwelling units, community facilities such as pools, recreation facilities, tot lots, etc.).
- Infrastructure (i.e., streets, storm drains, etc.) that will revert to public agency ownership and operation.
- Location of existing and proposed public and private storm drainage facilities (i.e., storm drains, channels, basins, etc.), including catch basins and other inlets/outlet structures. Existing and proposed drainage facilities should be clearly differentiated.
- Location(s) of Receiving Waters to which the project directly or indirectly discharges.
- Location of points where onsite (or tributary offsite) flows exit the property/project site.
- Proposed drainage area boundaries, including tributary offsite areas, for each location where flows exit the property/project site. Each tributary area should be clearly denoted.
- Pre- and post-project topography.

Appendix I to the SWMP is a one page form that summarizes pertinent information relative to this project-specific WQMP.

II. Site Characterization

Land Use Designation or Zoning: Resort Overlay, Open Land Zone, Indian Land

Current Property Use: Vacant undeveloped

Proposed Property Use: Residential, Retail

Availability of Soils Report: Y ☐ N ☒ *Note: A soils report is required if infiltration BMPs are utilized. Attach report in Appendix E.*

Phase 1 Site Assessment: Y ☐ N ☒ *Note: If prepared, attached remediation summary and use restrictions in Appendix H.*

Receiving Waters for Urban Runoff from Site

Receiving Waters	303(d) List Impairments	Designated Beneficial Uses	Proximity to RARE Beneficial Use
Tahquitz Creek	None	MUN, GWR, REC I, REC II, COLD, WILD	Not Applicable
Whitewater River	None	MUN, AGR, GWR, REC I, REC II, COLD, WILD, POW	Not Applicable
Coachella Valley Channel	Pathogens, Toxaphene, DDT, Dieldrin & PCB's	FRSH, REC I, REC II, WARM, WILD, RARE	18 miles distance of project to RARE

III. Pollutants of Concern

Proximate Receiving Waters:

719.40 Coachella Hydrologic Subunit:

Impaired for: Pathogens, Toxaphene, DDT, Dieldrin & PCB's

Coachella Valley Storm Water Channel

Hub No. 719.40

Impaired for: Pathogens, Toxaphene, DDT, Dieldrin & PCB's

Table 1. Pollutant of Concern Summary

Pollutant Category	Potential for Project	Causing Receiving Water Impairment
Bacteria/Virus (Pathogens)	X	X
Heavy Metals	X	
Nutrients	X	
Pesticides (Toxaphen, DDT, Dieldrin)	X	X
Organic Compounds (PCB's)	X	X
Sediments	X	
Trash & Debris	X	
Oxygen Demanding Substances	X	
Oil & Grease	X	

IV. Hydrologic Conditions of Concern

Local Jurisdiction Requires On-Site Retention of Urban Runoff:

Yes ☒ The project will be required to retain urban runoff onsite in conformance with local ordinance (See Table 6, Permittees Requiring Onsite Retention of Stormwater, of the Whitewater River Region WQMP). This section does not need to be completed.

No ☐ This section must be completed.

This Project meets the following condition:

☐ **Condition A**: Runoff from the Project is discharged directly to a publicly-owned, operated and maintained MS4; the discharge is in full compliance with Permittee requirements for connections and discharges to the MS4 (including both quality and quantity requirements); the discharge would not significantly impact stream habitat in proximate Receiving Waters; and the discharge is authorized by the Permittee.

☐ **Condition B**: The project disturbs less than 1 acre and is not part of a larger common plan of development that exceeds 1 acre of disturbance. The disturbed area calculation must include all disturbances associated with larger plans of development.

☒ **Condition C**: The project's runoff flow rate, volume, velocity and duration for the post-development condition do not exceed the pre-development condition for the 2-year, 24-hour and 10-year 24-hour rainfall events. This condition can be achieved by minimizing impervious area on a site and incorporating other site-design concepts that mimic pre-development conditions. This condition must be substantiated by hydrologic modeling methods acceptable to the Permittee.

☐ **None**

Refer to Section 3.4 of the Whitewater River Region WQMP for additional requirements.

Supporting engineering studies, calculations, and reports are included in Appendix C.

	2 year – 24 hour		10 year – 24 hour	
	Precondition	**Post-condition**	**Precondition**	**Post-condition**
Discharge (cfs)	1.75	1.06	3.33	2.02
Velocity (fps)	-	-	-	-
Volume (cubic feet)	46,612	29,348	89,088	56,074
Duration (minutes)	12.6	17.3	12.4	16.9

V. Best Management Practices

This project implements Best Management Practices (BMPs) to address the Pollutants of Concern that may potentially be generated from the use of the project site. These BMPs have been selected and implemented to comply with the Section 3.5 of the WQMP and consist of Site Design, Source Control and, if/where necessary, Treatment Control BMPs as described herein.

V.1 Site Design and Treatment Control BMPs

Local Jurisdiction Requires On-Site Retention of Urban Runoff:

Yes ☒ The project will be required to retain urban runoff onsite in conformance with local ordinance (See Table 6, Permittees Requiring Onsite Retention of Stormwater, of the Whitewater River Region WQMP). Section V.1 does not need to be completed.

No ☐ Section V.1 must be completed.

This section of the Project-Specific WQMP documents the Site Design BMPs and, if/where necessary the Treatment Control BMPs that will be implemented on the Project to meet the requirements within Section 3.5.1 of the WQMP. Section 3.5.1, includes requirements to implement Site Design Concepts and BMPs, and includes requirements to address the project's Pollutants of Concern with BMPs. Further sub-section 3.5.1.1 specifically requires that the projects Pollutants of Concern be addressed with Site Design BMPs to the extent feasible.

This project incorporates Site Design BMPs to fully address the Pollutants of Concern where and to the extent feasible. If and where it has been acceptably demonstrated to the Permittee that it is infeasible to fully meet this requirement with Site Design BMPs, this section includes a description of the conventional Treatment Control BMPs that will be substituted to meet the same requirements.

In addressing pollutants of concern, BMPs are selected using Table 2 below.

Table 2. BMP Selection Matrix Based Upon Pollutant Removal Efficiency [1]

(Excerpted, with minor revision, from the Orange County Water Quality Management Plan dated September 26, 2003 and the San Bernardino Water Quality Management Plan dated April 14, 2004)

Pollutant of Concern	Biofilters [2]	Detention Basins [3]	Infiltration BMPs [4]	Wet Ponds or Wetlands [5]	Filtration Systems [6]	Water Quality Inlets	Hydrodynamic Separator Systems [7]	Manufactured or Proprietary Devices [8]
Sediment/Turbidity	H/M	M	H/M	H/M	H/M	L	H/M (L for Turbidity)	U
Nutrients	L	M	H/M	H/M	L/M	L	L	U
Organic Compounds	U	U	U	U	H/M	L	L	U
Trash & Debris	L	M	U	U	H/M	M	H/M	U
Oxygen Demanding Substances	L	M	H/M	H/M	H/M	L	L	U
Bacteria & Viruses	U	U	H/M	U	H/M	L	L	U
Oil & Grease	H/M	M	U	U	H/M	M	L/M	U
Pesticides (non-soil bound)	U	U	U	U	U	L	L	U
Metals	H/M	M	H	H	H	L	L	U

Abbreviations:

L: Low removal efficiency H/M: High or medium removal efficiency U: Unknown removal efficiency

Notes:

(1) Periodic performance assessment and updating of the guidance provided by this table may be necessary.

(2) Includes grass swales, grass strips, wetland vegetation swales, and bioretention.

(3) Includes extended/dry detention basins with grass lining and extended/dry detention basins with impervious lining. Effectiveness based upon minimum 36-48-hour drawdown time.

(4) Includes infiltration basins, infiltration trenches, and porous pavements.

(5) Includes permanent pool wet ponds and constructed wetlands.

(6) Includes sand filters and media filters.

(7) Also known as hydrodynamic devices, baffle boxes, swirl concentrators, or cyclone separators.

(8) Includes proprietary stormwater treatment devices as listed in the CASQA Stormwater Best Management Practices Handbooks, other stormwater treatment BMPs not specifically listed in the WQMP, or newly developed/emerging stormwater treatment technologies.

V.1.A Site Design BMPs

This section documents the Site Design BMPs that will be implemented on this project to comply with the requirements in Section 3.5.1 of the WQMP.

- Table 3 herein documents the implementation of the Site Design Concepts described in sub-sections 3.5.1.3 and 3.5.1.4.
- Table 4 herein documents the extent to which this project has implemented the goals described in sub-section 3.5.1.1.

Table 3. Implementation of Site Design Concepts

Design Concept	Technique	Specific BMP	Included			Brief Reason for BMPs Indicated as No or N/A
			Yes	No	N/A	
Site Design Concept 1	**Minimize Urban Runoff, Minimize Impervious Footprint, and Conserve Natural Areas** **(See WQMP Section 3.5.1.3)**	Conserve natural areas by concentrating or cluster development on the lease environmentally sensitive portions of a site while leaving the remaining land in a natural, undisturbed condition.	☐	☐	☒	No natural areas to conserve.
		Conserve natural areas by incorporating the goals of the Multi-Species Habitat Conservation Plan or other natural resource plans.	☐	☐	☒	No natural areas provided.
		Preserve natural drainage features and natural depressional storage areas on the site.	☐	☐	☒	No existing drainage system.
		Maximize canopy interception and water conservation by preserving existing native trees and shrubs, and planting additional native or drought tolerant trees and large shrubs.	☒	☐	☐	
		Use natural drainage systems.	☐	☐	☒	No existing drainage system.
		Increase the building floor area ratio (i.e., number of stories above or below ground).	☒	☐	☐	
		Construct streets, sidewalks and parking lot aisles to minimum widths necessary, provided that public safety and a walkable environment for pedestrians is not compromised.	☒	☐	☐	
		Reduce widths of streets where off-street parking is available.	☐	☐	☒	No off-street parking provided.
		Design driveways with shared access, flared (single lane at street), or wheel strips (paving only under the tires).	☐	☒	☐	Driveways need to be double lane.
		Minimize the use of impervious surfaces, such as decorative concrete, in the landscape design.	☐	☒	☐	Decorative concrete used but not permeable.
		Other comparable and equally effective Site Design BMP (or BMPs) as approved by the Permittee (Note: Additional narrative required to describe BMP and how it addresses site design concept).	☐	☐	☒	No other Site Design BMP provided.

Table 3. Site Design BMPs (continued)

Design Concept	Technique	Specific BMP	Included: Yes	Included: No	Included: N/A	Brief Reason for Each BMP Indicated as No or N/A
Site Design Concept 2	Minimize Directly Connected Impervious Area (See WQMP Section 3.5.1.4)	Residential and commercial sites must be designed to contain and infiltrate roof runoff, or direct roof runoff to vegetative swales or buffer areas.	☒	☐	☐	
		Drain impervious sidewalks, walkways, trails, and patios into adjacent landscaping.	☐	☒	☐	Minor portion of patios and walkways in the center of the building drain into landscaped areas
		Incorporate landscaped buffer areas between sidewalks and streets.	☒	☐	☐	
		Uncovered temporary or guest parking on residential lots paved with a permeable surface, or designed to drain into landscaping.	☐	☐	☒	Not a residential lot.
		Rural swale system: street sheet flows to vegetated swale or gravel shoulder, curbs used at street corners, and culverts used under driveways and street crossings.	☐	☐	☒	No Street sheet flows.
		Urban curb/swale system: street slopes to curb; periodic swale inlets drain to vegetated swale or biofilter.	☐	☐	☒	Sub-surface infiltration pit provided.
		Dual drainage system: first flush captured in street catch basins and discharged to adjacent vegetated swale or gravel shoulder; high flows connect directly to MS4s.	☐	☐	☒	Higher flow to be infiltrated.
		Maximize the permeable area by constructing walkways, trails, patios, overflow parking, alleys, driveways, low-traffic streets, and other low-traffic areas with open-jointed paving materials or permeable surfaces such as pervious concrete, porous asphalt, unit pavers, and granular materials.	☐	☒	☐	No permeable area needed. Decorative pavement not permeable.
		Use vegetated drainage swales in lieu of underground piping or imperviously lined swales.	☐	☒	☐	No area for functional swales.
		Incorporate parking area landscaping into the drainage design.	☐	☒	☐	Parking areas drain to infiltration system.
		Where soil conditions are suitable, use perforated pipe or gravel filtration pits for low flow infiltration.	☒	☐	☐	
		Construct onsite infiltration BMPs such as dry wells, infiltration trenches, and infiltration basins consistent with vector control objectives.	☒	☐	☐	
		Construct onsite ponding areas or detention facilities to increase opportunities for infiltration consistent with vector control objectives.	☐	☒	☐	Sub-surface infiltration pit provided.

Table 3. Site Design BMPs (continued)

Design Concept	Technique	Specific BMP	Included			Brief Reason for Each BMP Indicated as No or N/A
			Yes	No	N/A	
Site Design Concept 2 (cont'd)	Minimize Directly Connected Impervious Area (See WQMP Section 3.5.1.4)	Direct roof runoff into cisterns or rain barrels for reuse.	☐	☒	☐	Runoff to infiltrate.
		Use vegetated drainage swales in lieu of underground piping or imperviously lined swales.	☐	☒	☐	No area for functional swales.
		Incorporate tree well filters, flow-through planters, and/or bioretention areas into landscaping and drainage plans.	☐	☒	☐	Sub-surface infiltration pit provided.
		Other comparable and equally effective Site Design BMP (or BMPs) as approved by the Permittee (Note: Additional narrative required describing BMP and how it addresses site design concept).	☐	☒	☐	No other Site Design BMP provided.

Project Site Design BMPs:

An Infiltration system with perforated pipes are proposed in the parking lot to capture 100% of the urban runoff for the 10-year-24 hr storm event. The following BMPs are also identified in the project specific WQMP.

BMP	Type of Maintenance	Startup Date	Inspection and Maintenance Frequency	Responsible Party
Conserve natural areas by concentrating or cluster development on the lease environmentally sensitive portions of a site while leaving the remaining land in a natural, undisturbed condition.	THIS BMP IS NOT APPLICABLE No natural areas to conserve.	N/A	N/A	N/A
Conserve natural areas by incorporating the goals of the Multi-Species Habitat Conservation Plan or other natural resource plans.	THIS BMP IS NOT APPLICABLE No natural areas provided.	N/A	N/A	N/A
Preserve natural drainage features and natural depressional storage areas on the site.	THIS BMP IS NOT APPLICABLE No existing drainage system.	N/A	N/A	N/A
Maximize canopy interception and water conservation by preserving existing native trees and shrubs, and planting additional native or drought tolerant trees and large shrubs.	THIS BMP IS USED Landscaping will include canopy trees to be implemented	After Grading Plan	Weekly	O &M HR, LLC
Use natural drainage systems.	THIS BMP IS NOT APPLICABLE No existing drainage system.	N/A	N/A	N/A
Increase the building floor area ratio (i.e., number of stories above or below ground).	THIS BMP IS USED Multi-story Senior Living Center	After Grading Plan	Daily	O & M HR, LLC
Construct streets, sidewalks and parking lot aisles to minimum widths necessary, provided that public safety and a walkable environment for pedestrians is not compromised.	THIS BMP IS USED Site is designed to planning standards with accessible pathway to each building.	After Building is constructed	Daily	O & M HR LLC
Reduce widths of streets where off-street parking is available.	THIS BMP IS NOT APPLICABLE No off-street parking provided.	N/A	N/A	N/A
Design driveways with shared access, flared (single lane at street), or wheel strips (paving only under the tires).	THIS BMP IS NOT APPLICABLE Driveways need to be double lane.	N/A	N/A	N/A

Minimize the use of impervious surfaces, such as decorative concrete, in the landscape design.	THIS BMP IS NOT APPLICABLE Decorative concrete used but not permeable.	N/A	N/A	N/A
Other comparable and equally effective Site Design BMP (or BMPs) as approved by the Permittee (Note: Additional narrative required to describe BMP and how it addresses site design concept).	THIS BMP IS NOT APPLICABLE No other Site Design BMP provided.	N/A	N/A	N/A
Residential and commercial sites must be designed to contain and infiltrate roof runoff, or direct roof runoff to vegetative swales or buffer areas.	THIS BMP IS USED Infiltration sub-surface to contain and infiltrate roof runoff	After Grading and storm drain is functional	Daily	O & M HR LLC
Drain impervious sidewalks, walkways, trails, and patios into adjacent landscaping.	THIS BMP IS NOT APPLICABLE Minor portion of patios and walkways in the center of the building drain into landscaped areas	N/A	N/A	N/A
Incorporate landscaped buffer areas between sidewalks and streets.	THIS BMP IS USED Landscape buffers are provided between the right-of-way and street sidewalk.	After landscape has been completed	Weekly	O & M HR LLC
Uncovered temporary or guest parking on residential lots paved with a permeable surface, or designed to drain into landscaping.	THIS BMP IS NOT APPLICABLE Not a residential lot or drainage into landscaping. Drainage to infiltration system	N/A	N/A	N/A
Rural swale system: street sheet flows to vegetated swale or gravel shoulder, curbs used at street corners, and culverts used under driveways and street crossings.	THIS BMP IS NOT APPLICABLE No Street sheet flows.	N/A	N/A	N/A
Urban curb/swale system: street slopes to curb; periodic swale inlets drain to vegetated swale or biofilter.	THIS BMP IS NOT APPLICABLE Sub-surface infiltration pit provided.	N/A	N/A	N/A
Dual drainage system: first flush captured in street catch basins and discharged to adjacent vegetated swale or gravel shoulder; high flows connect directly to MS4s.	THIS BMP IS NOT APPLICABLE Higher flow to be infiltrated.	N/A	N/A	N/A

Maximize the permeable area by constructing walkways, trails, patios, overflow parking, alleys, driveways, low-traffic streets, and other low-traffic areas with open-jointed paving materials or permeable surfaces such as pervious concrete, porous asphalt, unit pavers, and granular materials.	THIS BMP IS NOT APPLICABLE No permeable area needed. Decorative pavement not permeable.	N/A	N/A	N/A
Use vegetated drainage swales in lieu of underground piping or imperviously lined swales.	THIS BMP IS NOT APPLICABLE No area for functional swales. Drainage swales in frontage to capture nuisance runoff.	N/A	N/A	N/A
Incorporate parking area landscaping into the drainage design.	THIS BMP IS NOT APPLICABLE Parking areas drain to infiltration system.	N/A	N/A	N/A
Where soil conditions are suitable, use perforated pipe or gravel filtration pits for low flow infiltration.	THIS BMP IS USED Infiltration sub-surface pit provided	After Grading and storm drain is functional	Monthly, Prior and after major storm event	O & M HR LLC
Construct onsite infiltration BMPs such as dry wells, infiltration trenches, and infiltration basins consistent with vector control objectives.	THIS BMP IS USED Infiltration sub-surface pit provided	After Grading and storm drain is functional	Monthly, Prior and after major storm event	O & M HR LLC
Construct onsite ponding areas or detention facilities to increase opportunities for infiltration consistent with vector control objectives.	THIS BMP IS NOT APPLICABLE Sub-surface infiltration pit provided.	N/A	N/A	N/A
Direct roof runoff into cisterns or rain barrels for reuse.	THIS BMP IS NOT APPLICABLE Runoff to infiltrate.	N/A	N/A	N/A
Use vegetated drainage swales in lieu of underground piping or imperviously lined swales.	THIS BMP IS NOT APPLICABLE No area for functional swales.	N/A	N/A	N/A
Incorporate tree well filters, flow-through planters, and/or bioretention areas into landscaping and drainage plans.	THIS BMP IS NOT APPLICABLE Sub-surface infiltration pit provided.	N/A	N/A	N/A
Other comparable and equally effective Site Design BMP (or BMPs) as approved by the Permittee (Note: Additional narrative required describing BMP and how it addresses site design concept).	THIS BMP IS NOT APPLICABLE No other Site Design BMP provided.	N/A	N/A	N/A

Alternative Project Site Design BMPs:

			TOTAL AREA TREATED WITH SITE DESIGN BMPS (NEAREST 0.1 ACRE)**		7.92

* Site Design BMPs included in this table are those that completely address the Treatment Requirements for their tributary area.

Justification of infeasibility for sub-areas not addressed with effective Site Design BMPs in Table 4:

Not Applicable

V.1.B Treatment Control BMPs

Conventional Treatment Control BMPs shall be implemented to address the project's Pollutants of Concern as required in WQMP Section 3.5.1 where, and to the extent that, Section V.1.A has demonstrated that it is infeasible to meet these requirements through implementation of Site Design BMPs.

☐ The Site Design BMPs described in Section V.1.A of this project-specific WQMP completely address the Pollutants of Concern for the entire project site as required in Section 3.5.1.1 of the WQMP. Supporting documentation for the sizing of these Site Design BMPs is included in Appendix F. *Section V.1.B **need not** be completed.

☒ The Site Design BMPs described in Section V.1.A of this project-specific WQMP do **NOT** completely address the Pollutants of Concern for the entire project site as required in Section 3.5.1.1 of the WQMP. *Section V.1.B **must** be completed.

The Treatment Control BMPs identified in this section are selected, sized and implemented to address the Pollutants of Concern for all project sub-areas where these pollutants were not fully addressed with Site Design BMPs. Supporting documentation for the sizing of these Treatment Control BMPs is included in Appendix F.

The VortSentry HS is a compact, below grade stormwater treatment system that employs helical flow technology to enhance gravitational separation of floating and settling pollutants from stormwater flows.

Contech VORTSENTRY HS 96 O&M:

INSPECTION	INSPECTION FREQUENCY	MAINTENANCE INDICATOR	MAINTENANCE ACTIVITY
Visually inspect for sedimentation, trash, and debris	Monthly. **Important Note:** Notwithstanding the schedule above, the BMP shall be inspected prior to and after each major storm event	Presence of sufficient sediment, trash or debris that hinder filter performance or flow of filtration device	1. Remove and properly dispose of trash. 2. Use vacuum to remove sediment and debris from basket and/or all liners

Project Source Control BMPs:

Non-Structural Source Control BMPs

- **Activity Restrictions:** Activity restrictions, such as prohibiting vehicle maintenance, prohibiting discharge of fertilizer, pesticides, or animal wastes to streets or storm drains as well as any other activities that may potentially contribute to water pollution will be developed.
- **Education for property owners, tenants, employees**: Practical information materials will be provided on general housekeeping practices that contribute to the protection of storm water. The tenant will be provided the material included in Appendix D.
- **Irrigation systems and landscape maintenance** will be the Owners representative's responsibility to ensure the following:
  A. Broken sprinklers and lines fixed immediately
  B. Group plants to reduce excess water runoff
  C. Minimize the use of fertilizer or pesticides
  D. Minimize sediment runoff.
  - The Owners representative will monitor weekly to ensure the landscape areas are maintained.
- **Common area litter control** shall be maintained weekly by the Owner or the Owner's representative. In order to reduce pollution of drainage water the Owner will contract with a landscape maintenance contractor to provide this litter patrol.
- **Street sweeping in the parking areas** will be provided by the Owner or the Owner's representative prior to October 1st (storm season). The Owner's street sweeping program shall be responsible to implement this BMP yearly.
- **Drainage facility inspection and maintenance** will be provided by the Owner or the Owner's representative on an annual basis.

Structural Source Control BMPs

- **Landscape and irrigation system design** shall be monitored by the Owner or the Owner's representative on a monthly basis in order to minimize this runoff of excess irrigation water.
- **MS4 Stenciling and Signage** shall be repainted twice a year or when signage begins to fade, whichever comes first.
- **Trash storage areas** (dumpster enclosures) shall be inspected on a monthly basis by the owner or his representative for trash or debris that has not been disposed in a trash bin. The Owner or the Owner's representative shall clean out debris and trash that has been properly dumped.
- **Protection of slopes and channels** shall be addressed by the Owner or the Owner's representative prior to and after any rainfall event. In addition, irrigation systems shall be monitored on a monthly basis to ensure no erosion has occurred in channels and swales within the project.
- **Community Car Wash Racks will not be provided per this site.**
- **Fueling Areas will not be provided per this site.**
- **Air/Water supply will not be provided per this site.**
- **Loading Docks will not be provided per this site.**
- **Maintenance Bays will not be provided per this site.**

- **Vehicle and Equipment wash areas will not be provided per this site.**
- **Outdoor material storage areas will not be provided per this site.**
- **Outdoor work or processing areas will not be provided per this site.**

Appendix D includes copies of the educational materials that will be used in implementing this project-specific WQMP.

V.4 Regionally-Based Treatment Control BMPs

Not applicable

VI. Operation and Maintenance Responsibility for BMPs

Appendix G of this project-specific WQMP includes copies of CC&Rs, Covenant and Agreements, and/or other mechanisms used to ensure the ongoing operation, maintenance, funding, transfer and implementation of the project-specific WQMP requirements.

Infiltration Systems O&M:

INSPECTION	INSPECTION FREQUENCY	MAINTENANCE INDICATOR	MAINTENANCE ACTIVITY
1. Monitor water levels in access risers provided; 2. Inspect perforated pipe for sedimentation and debris	Monthly. **Important Note**: Notwithstanding the schedule above, the BMP shall be inspected prior to and after each major storm event	Presence of sufficient sediment or debris that hinders performance; Draindown time lasts longer than 72 hours	Vacuum out perforated pipe to remove sediment; If clogging still occurs remains flush out to suspend sediments then vacuum

Contech VORTSENTRY HS 96 O&M:

INSPECTION	INSPECTION FREQUENCY	MAINTENANCE INDICATOR	MAINTENANCE ACTIVITY
Visually inspect for sedimentation, trash, and debris	Monthly. **Important Note**: Notwithstanding the schedule above, the BMP shall be inspected prior to and after each major storm event	Presence of sufficient sediment, trash or debris that hinder filter performance or flow of filtration device	1. Remove and properly dispose of trash. 2. Use vacuum to remove sediment and debris from basket and/or all liners

See BMP Maintenance Program hereafter for remaining BMP's

VII. Funding

Insert text identifying the funding source or sources for the operation and maintenance of each Treatment Control BMP included in the project.

By certifying the project-specific WQMP, the Project applicant is certifying that the funding responsibilities have been addressed and will be transferred to future owners. The specific structural Stormwater treatment devices are as follow: One (1) Vortsentry HS unit, one (1) Sub-surface infiltration pit. All per approved plans.

			Maintenance Responsibility				Funding Mechanism for Maintenance			Maintenance Costs	
BMP	Used	Not Used	Owner	City	County	Flood District	Owner	Developer	Public	1-year ($)	2-year ($)
Hydro seeding & Mulching		X									
Landscape Private	X		X				X			-	-
Landscape Public		X									
Lawns		X									
Impervious permanent cover (concrete/asphalt) Private		X									
Impervious permanent cover (concrete/asphalt) Public		X									
Pervious permanent cover (gravel)	X		X				X			$5,000	$5,000
Down drains		X									
Ribbon Gutter Public		X									
Ribbon Gutter Private		X									
Curb & Gutter Public		X									
Curb & Gutter Private	X		X				X			-	-
Storm Drain	X		X				X			$1,000	$1,000
Detention Basin	X		X				X			$5,000	$5,000
Education Materials	X		X				X			-	-
Vehicle Wash Area		X									

* Provide annual costs (1-year and 2-year) for all publicly maintained BMPs. Specifically include the costs for all public landscaping and treatment control that are responsibility of the City or the Landscape Maintenance District.
** Maintenance funding contact information for each privately maintained (by owner, POA or HOA) BMP must be included.

The funding sources for each treatment control shall be:

DISCUSSION

PURPOSE:
This report is to be used for the design of a drainage system, which will provide the desired conveyance and the required storm protection according to the standards of the City of Palm Springs.

PROJECT DESCRIPTION:
The project is located at the northeast corner of Tahquitz Canyon Way and Calle El Segundo in the City of Palm Springs, California. The site is bounded on the north by Andreas Road, on the south by Tahquitz Canyon Way, on the west by Calle El Segundo, and on the east by the Renaissance Hotel.

The project proposes to construct ninety-seven (97) single family lots with 3-story family homes, Live /Work lots and a retail pad on the approximate 8.7 acre site. Project features will consist of asphalt/concrete pavement, hardscape and landscaping. Four (4) driveway accesses will be provided within the development. Calle Alvarado will be extended along the easterly boundary and run parallel with Calle El Segundo in a north/south direction connecting to E. Andreas Road to the north and Tahquitz Canyon Way to the south. This report has been prepared showing the ultimate condition of the project.

DESCRIPTION OF WATERSHED:
The project site is currently developed and is surface draining in three directions. The existing parking lot to the north is surface draining southeasterly into two private catch basins. This runoff is conveyed and directed north to the existing catch basin along E. Andreas Road. In addition, a small portion of the parking lot to the north is also draining westerly onto Calle El Segundo right-of-way. The two existing buildings to the south surface drain in a southeasterly direction onto Tahquitz Canyon right-of-way. Lastly, a portion along the easterly property line surface drains into the adjacent property. The post-project condition runoff will be collected by a private storm drain system and be retained with a proposed underground retention system.

METHODOLOGY:
The Hydrology and Unit Hydrograph studies were performed using the rational Hydrology Method program by CivilCADD / Civil Design Engineering software based on the Riverside County Hydrology Manual. The soil has been identified from the Hydrologic Soils Group Map, accompanying the Riverside County Flood Control Hydrology Manual (Section 3) as being soil group A.

The rational method was used to calculate the design discharge for the local drainage areas. Hydrologic calculations to determine the 2-year, 10-year and 100-year discharges at critical locations throughout the project were performed using the rational Hydrology method. The pre-project and post-project condition hydrology analysis that considered the overall on-site flood volume tributary to the project was completed using the unit hydrograph method for the 1, 3, 6 and 24-hour durations for the 2-year, 10-year and 100-year storm events (See Table B).

Q (CFS)	5.98	15.29	17.47	32.59	3.98	11.25	13.33	23.89

SUMMARY:

Plans for which this report has been prepared will meet all standards of rainstorm protection as adopted by the City of Palm Springs. Positive overflow is available throughout the development for protection of habitable areas against a 100-year storm event with all inlets clogged and there will be no adverse impact to the existing system.

Site Design and Treatment Control BMP Sizing Calculations
and Design Details

Volume Based BMPs

General

The largest concentrations of pollutants are found in runoff from small volume storms and from the first flush of larger storms. Therefore, volume based BMPs should be sized to capture and treat the initial and more frequent runoff surges that convey the greatest concentration of pollutants. To maximize treatment and avoid health hazards, volume-based BMPs must retain and release the runoff between a 24 and 72 hour period. This handbook typically recommends a draw down time of 48 hours, as recommended by the California BMP Handbook. The drawdown time refers to the minimum amount of time the design volume must be retained.

In order to meet RWQCB requirements, Volume-based Treatment Control BMPs in the Whitewater River Region of Riverside County shall be designed to infiltrate or treat the volume of runoff, V_{BMP} calculated using the following procedure, developed using the CASQA Methodology referenced in Section F.1.c.v.4.a.ii of the Permit.

BMP Design Volume Calculations

Following is a step-by-step procedure for determining design volume for BMPs using Worksheet 1.

1. **Determine the BMP Tributary Area (A_{trib})** that drains to the proposed BMP. This includes all areas that will contribute runoff to the proposed BMP, including both pervious and impervious areas, and runoff from off-site areas that commingle with site runoff, whether or not they are directly or indirectly connected to the BMP. Measure this area in acres.
2. **Determine the impervious area ratio (i)** within the tributary area defined above.

   $$i = A_{imp}/A_{trib}, \text{ where}$$

   A_{imp} = the impervious area within A_{trib}, measured in acres.
3. **Calculate the composite Runoff Coefficient (C)** for the BMP Tributary Area using Figure 1 below or the following equation based on the WEF/ASCE Method:

   $$C = 0.858i^3 - 0.78i^2 + 0.774i + 0.04, \text{ where}$$

   i = the impervious area ratio defined above.
4. **Determine the Unit Storage Volume (V_u)** using the following equation derived from the Palm Springs Thermal Airport gauge data in Appendix D of the CASQA BMP Handbook:

   $$V_u = 0.40 \times C, \text{ where}$$

   V_u = the unit storage volume (acre-in/acre), and C is the composite runoff coefficient calculated in the previous step.

5. **Calculate the required capture volume of the BMP (V_{BMP})** using the following equation:

$$V_{BMP} = V_u \cdot A_{trib}, \text{ where}$$

V_{BMP} is the design volume for the BMP (Acre-in), and V_u and A_{trib} are as described above.

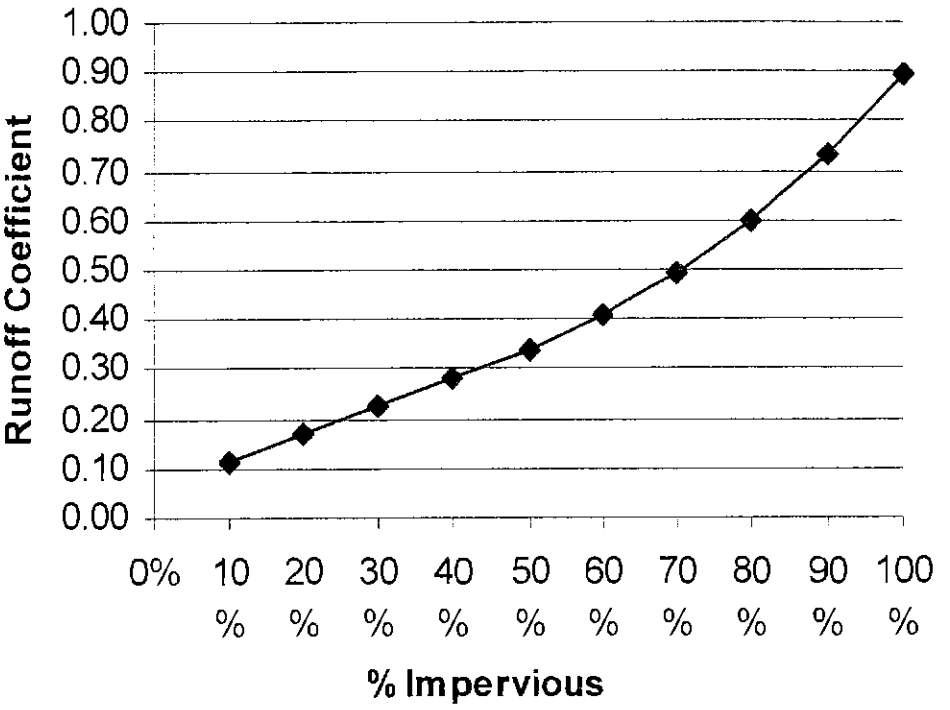

Figure 1. Impervious – Coefficient Curve (WEF/ASCE Method[1])

[1] Imperviousness is the decimal fraction of the total catchment covered by the sum of roads, parking lots, sidewalks, rooftops, and other impermeable surfaces of an urban landscape.

Worksheet 1

Design Procedure for BMP Design Volume

Designer: _____
Company: _____
Date: _____
Project: _____
Location: _____

1. Determine the Tributary Area to the BMP (A_{trib})	A_{trib} = 8.74 acres *(1)*
2. Determine the impervious area ratio (*i*)	
a. Determine impervious area within (A_{trib})	A_{imp} = 6.82 acres *(2)*
b. Calculate *i* = **(2)** / **(1)**	*i* = 0.78 acres / acre *(3)*
3. Determine Runoff Coefficient (C) $C = 0.858 \cdot i^3 - 0.78 \cdot i^2 + 0.774 \cdot i + 0.04$ $C = 0.858 \cdot (3)^3 - 0.78 \cdot (3)^2 + 0.774 \cdot (3) + 0.04$	C = 0.58 *(4)*
4. Determine Unit Storage Volume (V_u) $V_u = 0.40 \cdot C$ $V_u = 0.40 \cdot (4)$	V_u = 0.23 acre-in / acre *(5)*
5. Determine Design Storage Volume	
a. V_{BMP} = ***(5)*** x ***(1)*** [acre-in]	V_{BMP} = 2.03 acre-in *(6)*
b. V_{BMP} = ***(6)*** / 12 [acre-ft]	V_{BMP} = 0.17 acre-ft *(7)*
c. V_{BMP} = ***(7)*** x 43560 [ft^3]	V_{BMP} = 7405 ft^3 *(8)*

Notes: 78% Imperviousness

Flow Based BMPs

General

Flow based BMPs are sized to treat flows up to the design flow rate, which will remove pollutants to the MEP. This handbook bases the design flow rate on a uniform rainfall intensity of 0.2 inches per hour, as recommended by the California BMP Handbook. The flow rate is also dependent on the type of soil and percentage of impervious area in the development.

Uniform Intensity Approach

The Uniform Intensity Approach is where the Design Rainfall Intensity, I is specified as:

$$I = 0.2\ ^{in}/_{hr}$$

That Intensity is then plugged into the Rational Equation to find the BMP design flow rate (Q).

$$Q_{BMP} = CIA$$

Where A = Tributary Area to the BMP
C = Runoff Coefficient, based upon a Rainfall Intensity = 0.2 $^{in}/_{hr}$
I = Design Rainfall intensity, 0.2 $^{in}/_{hr}$

A step-by-step procedure for calculating the design flow rate is presented on Worksheet 2. Table 4 shows runoff coefficient values pertaining to the type of soils and percent imperviousness.

Table 4. Runoff Coefficients for an Intensity = 0.2 $^{in}/_{hr}$ for Urban Soil Types*

Impervious %	A Soil RI =32	B Soil RI =56	C Soil RI =69	D Soil RI =75
0 (Natural)	0.06	0.14	0.23	0.28
5	0.10	0.18	0.26	0.31

5. Determine BMP Design flow		
a. Q_{BMP} = C x I x A = *(11)* x 0.2 x *(1)*	Q_{BMP} = 1.24 $\frac{ft^3}{s}$	*(12)*

Infiltration Trenches

General

An infiltration trench is an excavated trench that has been refilled with a gravel and sand bed capable of holding the design volume of stormwater runoff. The runoff is stored in the trench over a period of time (48 hours) during which it slowly infiltrates back into the naturally pervious surrounding soil. This infiltration process effectively removes soluble and particulate pollutants; however it is not intended to trap course sediments. It is recommended that an upstream control measure such as a grass swale or filter strip be combined with an infiltration trench to remove sediments that might clog the trench. These trenches also include a bypass system for volumes greater than the design capture volume, and a perforated pipe as an observation well to monitor water depth. An infiltration trench can typically treat developments up to 10 acres.

Infiltration Trench Design Criteria

Design Parameter	Unit	Design Criteria
Design Volume	ft^3	V_{BMP}
Drawdown time	hrs	48 hrs [3]
Maximum Tributary Area	acre	10 acres [2 & 3]
Minimum Infiltration Rate of Soil	in/hr	0.27 in/hr [4]
Trench bottom elevation	ft	5 feet or more above seasonally high groundwater table [1]
Maximum Trench depth (Dm)	ft	8.0 ft [1]
Gravel bed material	ft	Clean, washed aggregate 1 to 3 inches in diameter [1]
Trench lining material	-	Geotextile fabric [1] or 6" layer of sand [4]
Setbacks	ft	100 feet from wells, tanks, fields, or springs [1] 20 feet down slope or 100 feet up slope from foundations [1] Do not locate under tree drip-lines [1]

1 Ventura County's Technical Guidance Manual for Stormwater Quality Control Measures
2 City of Modesto's Guidance Manual for New Development Stormwater Quality Control Measures
3 CA Stormwater BMP Handbook for New Development and Significant Redevelopment
4 Riverside County DAMP Supplement A Attachment

Infiltration Trench Design Procedure

1. Design Storage Volume
   Use Worksheet 1- Design Procedure Form for Design Storage Volume, V_{BMP}.

2. Trench Water Depth
   Calculate the maximum allowable depth of water in the trench, D_m, in feet. Maximum depth should not exceed 8 feet:

   $$D_m = [(t) \times (I)] / (12s)$$

   Where I = site infiltration rate (in/hr)
   s = safety factor
   t = minimum drawdown time (48 hours)

   In the formula for maximum allowable depth, the safety factor accounts for the possibility of inaccuracy in the infiltration rate measurement. The less certain the infiltration rate, the higher the safety factor should be. Minimum safety factors shall be as follows:
   - Without site-specific borings and percolation tests, use s = 10
   - With borings (but no percolation test), use s = 6
   - With percolation test (but no borings), use s = 5
   - With borings and percolation test, use s = 3

3. Trench Surface Area
   Calculate the minimum surface area of the trench bottom:

   $$A_m = V_{BMP} / D_m$$

   Where A_m = minimum area required (ft^2)
   V_{BMP} = Detention Volume (ft^3)
   D_m = maximum allowable depth (ft)

4. Observation Well
   Provide a vertical section of perforated PVC pipe, 4 to 6 inches in diameter, installed flush with top of trench on a foot-plate and with a locking, removable cap.

5. Bypass
   Provide for bypass or overflow of runoff volumes in excess of the SQDV by means of a screened overflow pipe connected to downstream storm drainage or grated overflow outlet.

Calle El Segundo

Existing roadway widths are generally wider than is needed for vehicle travel. This roadway is designated as a collector roadway, but has the street width and right-of-way width of a Secondary Thoroughfare. This width is likely to remain, creating an opportunity to add diagonal on-street parking. The existing Class III bikeways can be enhanced with signage and sharrows, and a conversion to diagonal parking would simultaneously narrow the space assigned to vehicular through-travel, and increase the available on-street parking supply to accommodate future growth and additional development. Sidewalks should be a minimum of 5' wide and located adjacent to a 4' wide landscaped parkway. As an alternative to diagonal on-street parking, 5' Class II bike lanes could be installed with 12' travel lanes, 9' parallel on-street parking areas, and a 12' turn lane.

AGENDA

Monday, January 12, 2015		3:00 PM Regular Meeting

William Fauber, Chair
Gary Fredricks, Vice-Chair
Kenny Cassady
Michael Hirschbein
Randy Purnel
Susan Secoy-Jensen
Maria Song

Flinn Fagg, AICP
Director of Planning Services

Glenn Mlaker, AICP
Assistant Planner

David A. Newell
Associate Planner

Pursuant to the Government Code Section 54957.5(b)(2) the designated office for inspection of public records in connection with the meeting is the Planning Department, City Hall, 3200 E. Tahquitz Canyon Way. Complete Agenda Packets are available for public inspection at: City Hall, Planning Department. Agenda and staff reports are available on the City's website: www.palmspringsca.gov. If you would like additional information on any item appearing on this agenda, please contact the Planning Department at (760) 323-8245.

It is the intention of the City of Palm Springs to comply with the Americans with Disabilities Act (ADA) in all respects. If, as an attendee or a participant at this meeting, or in meetings on a regular basis, you will need special assistance beyond what is normally provided, the City will attempt to accommodate you in every reasonable manner. Please contact the Planning Department, (760) 323-8245, at least 48 hours prior to the meeting, to inform us of your particular needs and to determine if accommodation is feasible.

CALL TO ORDER:

ROLL CALL:

REPORT OF THE POSTING OF AGENDA: Agenda is available for public access at the City Hall bulletin board (west side of Council Chamber) and the Planning Department counter by 4:00 pm on Wednesday, January 7, 2015.

ACCEPTANCE OF THE AGENDA: The Architectural Advisory Committee will discuss the order of the agenda, may amend the order, note abstentions and request Consent Calendar items be removed from the consent calendar for discussion.

PUBLIC COMMENTS: This time has been set aside for members of the public to address the Architectural Advisory Committee on the Consent Calendar and other agenda items; and items of general interest within the subject matter jurisdiction of the Board. Although the Architectural Advisory Committee values your comments, pursuant to the Brown Act, it generally cannot take any action on items not listed on the posted Agenda. Three (3) minutes assigned for each speaker.

CONSENT CALENDAR:
The following routine matters may be acted upon by one motion. Individual items may be removed by the Board for separate discussion at this time or under Approval of the Agenda.

1. **APPROVAL OF MINUTES: DECEMBER 22, 2014**

UNFINISHED BUSINESS:

2. **JOHN HALDERMAN, OWNER OF CANYON CLUB RESORT FOR A BUILDING REPAINT AND FAÇADE REPAIRS AT 960 N. PALM CANYON DRIVE, ZONE C-1 (CASE 3.2753 MAA). (GM)**

NEW BUSINESS:

3. **O & M HR, LLC (NEXUS DEVELOPMENT CORP.) FOR THE DEMOLITION OF AN EXISTING DEVELOPMENT AND PARKING AREA TO CONSTRUCT "ABERDEEN"; A MIXED-USE PROJECT CONSISTING OF (74) ATTACHED AND DETACHED RESIDENTIAL DWELLINGS, (17) LIVE-WORK UNITS AND APPROXIMATELY 3,000-SQUARE FEET OF RETAIL ON 8.05-ACRES LOCATED AT THE NORTHEAST CORNER OF TAHQUITZ CANYON WAY AND CALLE EL SEGUNDO, ZONE REO AND RA (CASE NOS. 5.1361 PD-375, 3.3820 MAJ AND TTM 36876). (DN)**

COMMITTEE MEMBER COMMENTS:

STAFF MEMBER COMMENTS:

ADJOURNMENT: The Architectural Advisory Committee of the City of Palm Springs will adjourn to the next regular meeting at 3:00 pm on January 26, 2015, Council Chamber, City Hall, 3200 East Tahquitz Canyon Way, Palm Springs.

COMMERCIAL

Tourist Resort Commercial (0.35 FAR for stand-alone commercial uses; 43 hotel rooms per net acre; 86 rooms per net acre on Indian Land). This land use designation provides for large-scale resort hotels and timeshares including a broad range of convenience, fitness, spa, retail, and entertainment uses principally serving resort clientele. Commercial recreation and entertainment facilities, such as convention centers, museums, indoor and outdoor theatres, and water parks are included in this designation, but should be designed to be compatible with neighboring development. Tourist Resort Commercial facilities are most appropriate in the Palm Canyon Drive and Tahquitz Canyon Drive corridors. It is intended that the primary use in any Tourist Resott Commercial area shall be hotel/tourist-related uses; if residential uses are proposed within the Tourist Commercial Designation (timeshares, condominiums, etc.) they shall be a secondary use ancillary to the proposed hotel uses and shall not exceed a maximum of 30 dwelling units per acre. Permanent residential uses and commercial activities are allowed subject to approval of a planned development district.

Tourist Resort Commercial

Small Hotel Resort Commercial (15 hotel rooms per net acre; 10 dwelling units per acre). This designation applies to areas with smaller-scale, boutique type hotels that are typically found in the Warm Sands and Tennis Club neighborhoods. It is intended that the tourist resort character of these neighborhoods be preserved; as a result, new residential uses or conversion of small hotels to residential uses are permitted as long as they comply with the conversion requirements outlined within the City's Zoning Code. Stand-alone retail and commercial uses are not permitted in this land use designation. Ancillary commercial uses such as a gift shop associated with a small hotel use are allowed.

Neighborhood/Community Commercial (0.35 FAR). Areas designated as Neighborhood/Community Commercial provide an opportunity for convenience commercial uses that serve adjacent residential neighborhoods. The commercial opportunities created under this designation are intended to be an integrated element of the neighborhood, providing to nearby residents services such as dry cleaners, grocery stores, bakeries, bank and post office branches, bookstores, drugstores, and smaller-scale restaurants. Harmonious relationships between these commercial uses and adjacent residential uses shall be achieved through compatibility of site design, building scale, pathways and circulation design, and architectural treatment of structures.

Regional Commercial (0.50 FAR). Regional Commercial areas are intended to provide for large-scale commercial uses that serve an area larger than the City boundaries. Allowable uses include department stores, theatres, and restaurants. Uses such as automobile dealerships that have a regional draw are

Re: PDD Application Package – Aberdeen, a proposed mixed-use project located at the Northeast corner of Calle El Segundo and Tahquitz Canyon Way

Dear Flinn:

Please find enclosed an application and submittal package for a proposed Planned Development District (PDD) and Tentative Tract Map (TTM), which consists of a mixed-use project on approximately 8.05 acres of land located at the northeast corner of Calle El Segundo and Tahquitz Canyon Way. Per Section 14, we are proposing a consolidated project and requesting certain benefits identified within Section 14 as the Project is over 5 acres in size and currently consists of 5 land parcels. The Project, referred to as Aberdeen, proposes 17 live/work lofts, 74 residential units, and a small retail building.

Each residential unit will have a 2 car garage with long driveways for guest parking and will boast its own backyard with private dipping pool (spool). The live/work lofts will also have 2 car garages and will have access to the common area located at the south of the Project, which will include such amenities as a large common pool area, jacuzzi, fitness center, clubhouse, BBQ area, and other outdoor recreational facilities.

Per Section 14, the south 1/3 of the site is zoned REO and the north 2/3 of the site is zoned RA. We believe that the proposed Project fits within the current zoning on the site as the live/work lofts and retail portion of the Project is located on the south 1/3 and the residential is located on the north 2/3 of the site. Furthermore, we believe that a PDD is warranted given the numerous parcels that were assembled over the past 9 years in order to bring together such a large scale project. Additionally, certain public benefits are included in the proposed Project such as the creation of a new street called Calle Alvarado. Currently the front door to the convention center is hidden behind Andreas Road, however with the creation of Calle Alvarado, visitors (both pedestrian and vehicular) will be able to easily drive from Tahquitz Canyon Way directly north to the convention center by utilizing Calle Alvarado. We are decreasing the overall size of the Project from 9.8 acres to 8.05 acres in order to accommodate the new street. Another great public benefit will be the creation of an art walk plaza located in the center of the

NEXUS Development Corporation Central Division

south portion of the project accessed by Tahquitz Canyon Way. Numerous other public benefits will also occur by way of the Project itself being constructed.

In the interest of time, we are proposing a preliminary and final PDD review with this application. We look forward to working with staff and having the opportunity to present this exciting Project to the Architectural Advisory Committee, Planning Commission, and City Council at the earliest available dates. As always, if you should have any questions or concerns, please do not hesitate to contact myself or Rich Meaney.

Sincerely,

Robert W. Eres
Nexus Development Corporation/Central Division
Vice President of Development

Re: PDD Application Package – Aberdeen, a proposed mixed-use project located at the Northeast corner of Calle El Segundo and Tahquitz Canyon Way

Dear Flinn:

Please find enclosed an application and submittal package for a proposed Planned Development District (PDD) and Tentative Tract Map (TTM), which consists of a mixed-use project on approximately 8.05 acres of land located at the northeast corner of Calle El Segundo and Tahquitz Canyon Way. Per Section 14, we are proposing a consolidated project and requesting certain benefits identified within Section 14 as the Project is over 5 acres in size and currently consists of 5 land parcels. The Project, referred to as Aberdeen, proposes 17 live/work lofts, 74 residential units, and a small retail building.

Each residential unit will have a 2 car garage with long driveways for guest parking and will boast its own backyard with private dipping pool (spool). The live/work lofts will also have 2 car garages and will have access to the common area located at the south of the Project, which will include such amenities as a large common pool area, jacuzzi, fitness center, clubhouse, BBQ area, and other outdoor recreational facilities.

Per Section 14, the south 1/3 of the site is zoned REO and the north 2/3 of the site is zoned RA. We believe that the proposed Project fits within the current zoning on the site as the live/work lofts and retail portion of the Project is located on the south 1/3 and the residential is located on the north 2/3 of the site. Furthermore, we believe that a PDD is warranted given the numerous parcels that were assembled over the past 9 years in order to bring together such a large scale project. Additionally, certain public benefits are included in the proposed Project such as the creation of a new street called Calle Alvarado. Currently the front door to the convention center is hidden behind Andreas Road, however with the creation of Calle Alvarado, visitors (both pedestrian and vehicular) will be able to easily drive from Tahquitz Canyon Way directly north to the convention center by utilizing Calle Alvarado. We are decreasing the overall size of the Project from 9.8 acres to 8.05 acres in order to accommodate the new street. Another great public benefit will be the creation of an art walk plaza located in the center of the

south portion of the project accessed by Tahquitz Canyon Way. Numerous other public benefits will also occur by way of the Project itself being constructed.

In the interest of time, we are proposing a preliminary and final PDD review with this application. We look forward to working with staff and having the opportunity to present this exciting Project to the Architectural Advisory Committee, Planning Commission, and City Council at the earliest available dates. As always, if you should have any questions or concerns, please do not hesitate to contact myself or Rich Meaney.

Sincerely,

Robert W. Eres

Re: PDD Application Package – Aberdeen, a proposed mixed-use project located at the Northeast corner of Calle El Segundo and Tahquitz Canyon Way

Dear Flinn:

Please find enclosed an application and submittal package for a proposed Planned Development District (PDD) and Tentative Tract Map (TTM), which consists of a mixed-use project on approximately 8.05 acres of land located at the northeast corner of Calle El Segundo and Tahquitz Canyon Way. Per Section 14, we are proposing a consolidated project and requesting certain benefits identified within Section 14 as the Project is over 5 acres in size and currently consists of 5 land parcels. The Project, referred to as Aberdeen, proposes 17 live/work lofts, 74 residential units, and a small retail building.

Each residential unit will have a 2 car garage with long driveways for guest parking and will boast its own backyard with private dipping pool (spool). The live/work lofts will also have 2 car garages and will have access to the common area located at the south of the Project, which will include such amenities as a large common pool area, jacuzzi, fitness center, clubhouse, BBQ area, and other outdoor recreational facilities.

Per Section 14, the south 1/3 of the site is zoned REO and the north 2/3 of the site is zoned RA. We believe that the proposed Project fits within the current zoning on the site as the live/work lofts and retail portion of the Project is located on the south 1/3 and the residential is located on the north 2/3 of the site. Furthermore, we believe that a PDD is warranted given the numerous parcels that were assembled over the past 9 years in order to bring together such a large scale project. Additionally, certain public benefits are included in the proposed Project such as the creation of a new street called Calle Alvarado. Currently the front door to the convention center is hidden behind Andreas Road, however with the creation of Calle Alvarado, visitors (both pedestrian and vehicular) will be able to easily drive from Tahquitz Canyon Way directly north to the convention center by utilizing Calle Alvarado. We are decreasing the overall size of the Project from 9.8 acres to 8.05 acres in order to accommodate the new street. Another great public benefit will be the creation of an art walk plaza located in the center of the

south portion of the project accessed by Tahquitz Canyon Way. Numerous other public benefits will also occur by way of the Project itself being constructed.

In the interest of time, we are proposing a preliminary and final PDD review with this application. We look forward to working with staff and having the opportunity to present this exciting Project to the Architectural Advisory Committee, Planning Commission, and City Council at the earliest available dates. As always, if you should have any questions or concerns, please do not hesitate to contact myself or Rich Meaney.

VIA E-MAIL [CITYCLERK@PALMSPRINGS-CA.GOV]

Honorable Mayor Steve Pougnet and Members of the City Council
City of Palm Springs
3200 East Tahquitz Canyon Way
Palm Springs, CA 92262

Re: Agenda Item 1.C: Aberdeen Project

Dear Honorable Councilmembers:

This firm represents NDC Equities Downtown PS, LLC ("Nexus") in connection with its application to construct a mixed-use project at the northeast corner of Tahquitz Canyon Way and Calle El Segundo ("Aberdeen Project," Agenda Item 1.C on the April 15, 2015 City Council agenda). This letter responds to allegations and arguments raised by members of the public in connection with the Aberdeen Project, specifically the letters submitted by Chatten-Brown & Carstens, LLP (on behalf of the Palm Springs Modern Committee), the National Trust for Historic Preservation, the California Office of Historic Preservation, Docomomo US, and Alan Hess alleging that the environmental analysis and conclusions contained in the Initial Study/Mitigated Negative Declaration prepared for the Aberdeen Project ("Aberdeen MND") are flawed.

As demonstrated below, none of the commenters have raised a fair argument that the Aberdeen Project requires preparation of an Environmental Impact Report, nor have they presented any evidence that would undermine a finding by this City Council that the existing structures on the Aberdeen Project ("Tahquitz Plaza") site are *not* historic. We specifically highlight the following facts for your consideration:

- Building Age - Tahquitz Plaza was not built in 1971. Rather, the building permits on file with the City show that the structures at 600 and 650 Tahquitz Canyon Way were completed in *1974*, while the structures at 700 Tahquitz Canyon Way were completed in *1977*. (Exhibit A.)

- Ongoing City Historic Survey - The City's historic resource consultant, Historic Resources Group, confirmed in an April 9, 2015 letter that Tahquitz Plaza is ***not*** with the scope of the ongoing citywide historic resources survey. (Exhibit B.) That survey (which remains in draft form) only includes properties constructed

Santa Ana, CA 92707

RE: Case Nos. 5.1361 PD-375, 3.3820 MAJ & TTM 36876 – "Aberdeen" Mixed Use Project

Mr. Eres,

On March 25, 2015, the Planning Commission considered the subject applications for a mixed-use project consisting of (73) attached and detached residential dwellings, (13) live-work units and approximately 7,811-square feet of existing commercial space on approx. 8.05-acres located at the northeast corner of Calle El Segundo and Tahquitz Canyon Way. At this meeting the Planning Commission voted 4-3 to deny the project based on the following:

- The project does not conform to the development standards of the Section 14 Specific Plan;
- The project does not conform to the development standards of the City's High-Rise Building regulations, and general concerns about building heights in excess of 35 feet;
- Scale of residential buildings with respect to separation and height;
- Concerns regarding the design, parking, setbacks, and viability of the live/work spaces on Tahquitz Canyon Way;
- Inadequacy of the perimeter landscaping;
- Failure to address concerns noted by the Planning Commission at the February 25, 2015 meeting, including but not limited to increased building separation, increased street widths, and unencumbered pedestrian access; and
- Further analysis needed on the historical value of existing Kaptur buildings, and preference to retain two of the four existing buildings.

In accordance with section 2.05.040 of the Palm Springs Municipal Code, you may appeal the decision of the Planning Commission to the City Council within ten days of the date of this letter. The appeal request must be in writing and presented to the City Clerk with a fee of $546.00 (excludes notification fee, which was previously paid) by 6:00 p.m. on Monday, April 6, 2015.

If you have any questions about this letter, please contact me at (760) 323-8245.

Sincerely,

David Newell
Associate Planner

The Vision to Develop and the Commitment to Deliver

March 31, 2015

Mr. Flynn Fagg
Director of Planning Services
City of Palm Springs
3200 E. Tahquitz Canyon Way
Palm Springs, CA 92262

Re: Formal Appeal of Planning Commission Decision on March 25th, 2015 for Case No. 5.1361 –PD-375, 3.3820 MAJ & TTM 36876 – "Aberdeen" Mixed-Use Project (the "Project")

Dear Flynn:

We are aware of the Planning Commission's action taken on March 25, 2015 to deny approval of the Aberdeen Palm Springs Mixed-Use project (as identified above, the "Project") located at the northeast corner of Tahquitz Canyon Way and Calle El Segundo. We would like this letter to act as our formal appeal of that decision and ask that the Project be considered by the City Council at their next regularly scheduled meeting on April 15, 2015.

The Planning Commission had many mixed comments regarding the architecture and uses within the Project. In some cases, comments provided by commissioners on the February 25, 2015 meeting were contradicted by themselves on March 25, 2015. As the applicant, it was very difficult to clearly understand what would satisfy the Planning Commission given the amount of modifications that were made to the Project as a direct result of comments provided on February 25, 2015. Regardless of the inconsistent comments received between the two (2) planning commission meetings and two (2) architectural advisory committee meetings that we participated in, we believe that the Project has the potential to be a catalyst for employment, community outreach, and economic development within the City.

We feel that this location is ideally suited for a mixed-use project consisting of live/work lofts, restaurant/retail, office, and high-density residential as proposed in the plans presented to the Planning Commission on March 25, 2015. The proposed project ties together the surrounding uses of commercial/movie theater, hospitality (including high-rise), residential, and casino that already exist and are similarly identified as REO/RA areas of the Section 14 Specific Plan. We also believe that the Project provides substantial public benefit given how much developable land is being sacrificed in order to provide a new street, Calle Alvarado, which will allow for new pedestrian and vehicular access to the

NEXUS Companies
1 MacArthur Place, Suite 300, Santa Ana, CA 92707 ph 714.546.5600 fx 714.546.5660 www.nexusd.com

convention center from Tahquitz Canyon Way. Additional public benefit is provided by a large art plaza in the center of the southern portion of the project. Finally, the plans presented on March 25, 2015 Planning Commission meeting incorporated one (1) existing building and converted it into office and retail/restaurant space for the Project.

We are excited to present the Project in further detail to the City Council and greatly appreciate your assistance with this request to appeal the Planning Commission's decision. Please do not hesitate to contact myself or Rich Meaney if you should have any questions.

Sincerely,

Rob W. Eres

Re: Case 5.1361 PD-375, TTM 36876 and 3.3820 MAJ "Aberdeen" at Northeast Corner of Tahquitz Canyon Way and Calle El Segundo in Palm Springs Notice of Incomplete Applications

Dear Mr. Eres,

Thank you for submitting the above referenced application to the City of Palm Springs. Staff has conducted a preliminary review of the proposal, and it has been determined that additional information is required in order to proceed with the review process. The information needed to complete the application is listed below, and must be supplied before the application can be deemed complete, and processing can commence. Please address and submit the following:

Fees:

1. Application fee of $6,434.00 for change of zone. The current zoning on the site is "CU" (Civic Uses). The proposed uses are not permitted within the existing zoning; thus, a PD-in-lieu of zone change is required.
2. Environmental processing fees. These fees will be determined once a consultant has been procured to provide services for preparation of an Initial Study as required under the California Environmental Quality Act (CEQA).
3. Additional fees as determined by the Engineering and Public Works Department for review of studies and reports. Such reports may include Preliminary Hydrology Study, Preliminary Water Quality Management Plan (WQMP), Traffic Study, etc. Please contact the City Engineering and Public Works Department for specific requirements and fees.

Planning:

1. Provide verification of ownership of APNs: 508-055-007, 508-055-008 and 508-055-009.

2. Correct commercial building square footage in justification letter. Plans indicate 1,568-square feet and letter states 3,000-square feet.
3. Provide ADA handicap parking as required.
4. Specify location of HVAC and pool equipment.
5. Indicate location of trash enclosure(s) for commercial space and define how trash is handled for residential and live/work units.
6. Sheet A1.00 Site Plan – Correct scale and clearly delineate all4 property lines.
7. Third floor clearance from floor to ceiling is 7'-0" in Townhome Types 1, 3 (001) and 3 (002). If incorrect, adjust as appropriate.

Engineering:

1. Submit a scoping analysis letter by a traffic engineer to determine impacts and mitigation of proposed development. A traffic study may be required, depending on the results of the analysis.
2. Preliminary Hydrology Study
3. Preliminary WQMP

Please feel free to contact me should you have the need to discuss some of the required changes and issues identified above. If not, a timely submittal of the requested materials/revisions will be highly appreciated in order to process your application as soon as possible. I look forward to continuing to work with you on this project.

Sincerely,

David A. Newell
Associate Planner

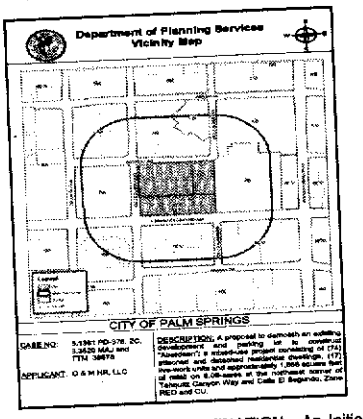
NOTICE OF PUBLIC HEARING
PLANNING COMMISSION
CITY OF PALM SPRINGS

CASE: 5.1361 PDD 375 / 3.3820-MAJ & TTM 36876
O & M HR, LLC / NEXUS DEVELOPMENT CORP. FOR "ABERDEEN"
8.05-ACRES AT NORTHEAST CORNER OF TAHQUITZ CANYON WAY AND CALLE EL SEGUNDO

NOTICE IS HEREBY GIVEN that the Planning Commission of the City of Palm Springs, California, will hold a public hearing at its meeting of February 25, 2015. The Planning Commission meeting begins at 1:30 p.m., in the Council Chamber at City Hall, 3200 East Tahquitz Canyon Way, Palm Springs.

The purpose of this hearing is to consider a proposal to demolish existing buildings and parking areas for the construction of a mixed-use project consisting of seventy-four (74) attached and detached residential dwellings, seventeen (17) live-work units and approximately 1,568 square feet of commercial-retail space on approximately 8.05-acres located at the northeast corner of Tahquitz Canyon Way and Calle El Segundo, zone REO and CU. The applications include a PDD in lieu of zone change (Case 5.1361 PDD 375) to establish the project site plan, permitted uses and development standards; Major Architectural Application (Case 3.3820 MAJ) to review proposed architectural designs; and Tentative Tract Map (Case TTM 36876) to subdivide approximately 8.05-acres into ninety-three (93) lots with common area streets and open space.



ENVIRONMENTAL DETERMINATION: An Initial Study was prepared for the project and it determined that the project would have less than significant impact with the incorporation of mitigation measures. Members of the public may view this document at the Planning Services Department, City Hall, 3200 East Tahquitz Canyon Way, Palm Springs, and submit written comments at, or prior to, the Commission hearing.

REVIEW OF PROJECT INFORMATION: The staff report and other supporting documents regarding this project are also available for public review at City Hall between the hours of 8:00 a.m. and 6:00 p.m. Monday through Thursday. Please contact the Office of the City Clerk at (760) 323-8204 if you would like to schedule an appointment to review these documents.

COMMENT ON THIS APPLICATION: Response to this notice may be made verbally at the Public Hearing and/or in writing before the hearing. Written comments may be made to the Planning Commission by letter (for mail or hand delivery) to:

James Thompson, City Clerk
3200 E. Tahquitz Canyon Way
Palm Springs, CA 92262

Any challenge of the proposed project in court may be limited to raising only those issues raised at the public hearing described in this notice, or in written correspondence delivered to the City Clerk at, or prior to, the public hearing. (Government Code Section 65009(b)[2]).

An opportunity will be given at said hearing for all interested persons to be heard. Questions regarding this case may be directed to David Newell, Associate Planner, at (760) 323-8245.

Si necesita ayuda con esta carta, porfavor llame a la Ciudad de Palm Springs y puede hablar con Felipe Primera telefono (760) 323-8253.

James Thompson, City Clerk

No 0235

NOTICE OF INTENT TO ADOPT A MITIGATED NEGATIVE DECLARATION
Case Nos. 5.1361 PDD 375, TTM 36876 and 3.3820 MAJ

LEAD AGENCY :
City of Palm Springs
3200 East Tahquitz Canyon Way
Palm Springs, CA 92262
CONTACT PERSON: David Newell, Associate Planner (760) 323-8245
PROJECT TITLE : Aberdeen - Case Nos. 5.1361 PDD-375 / 3.3820 MAJ / TTM 36876
PROJECT LOCATION : Northeast corner of Tahquitz Canyon Way and Calle El Segundo, Palm Springs, California, Riverside County, Assessor's Parcel No. 508-005-003, 006, 007, 008, and 009
PROJECT DESCRIPTION : The project proposes the construction of an 8.05-acre mixed-use development comprised of seventy-four (74) attached and detached residential dwellings, and seventeen (17) live-work units with approximately 1,568-sqaure feet of retail space. The project will require the demolition of 33,500 square feet of existing office buildings and associated parking lot. The proposed project requires the following applications:

A Planned Development District (#375) in lieu of a Change of Zone;
A Tentative Tract Map (36876)
A Major Architectural Review for the architectural and landscape design.

FINDINGS / DETERMINATION: The City has reviewed and considered the proposed project and has determined that any potentially significant impacts can be mitigated to a less than significant level. The City hereby prepares and proposes to adopt a Mitigated Negative Declaration for this project.
PUBLIC REVIEW PERIOD : A 20-day public review period for the Draft Mitigated Negative Declaration will commence at 8:00 a.m. on February 20, 2015 and end on March 11, 2015 at 5:00 p.m. for interested individuals and public agencies to submit written comments on the document. Any written comments on the Mitigated Negative Declaration must be received at the above address within the public review period. In addition, you may email comments to the following address: David.Newell@palmsprings-ca.gov. Copies of the Mitigated Negative Declaration and Initial Study are available for review at the above address and at the City library.
PUBLIC MEETING : This matter has been set for public hearing before the Planning Commission on February 25, 2015. City Council consideration is expected at a public hearing on March 18, 2015, but please confirm the date with the City Clerk's office

NOTICE OF INTENT
TO ADOPT A MITIGATED NEGATIVE DECLARATION
Case Nos. 5.1361 PDD 375, TTM 36876 and 3.3820 MAJ

LEAD AGENCY: **City of Palm Springs**
3200 East Tahquitz Canyon Way
Palm Springs, CA 92262

CONTACT PERSON: David Newell, Associate Planner (760) 323-8245

PROJECT TITLE: Aberdeen - Case Nos. 5.1361 PDD-375 / 3.3820 MAJ / TTM 36876

PROJECT LOCATION: Northeast corner of Tahquitz Canyon Way and Calle El Segundo, Palm Springs, California, Riverside County.
Assessor's Parcel No. 508-055-003, 006, 007, 008, and 009

PROJECT DESCRIPTION: The project proposes the construction of an 8.05-acre mixed-use development comprised of seventy-four (74) attached and detached residential dwellings, and seventeen (17) live-work units with approximately 1,568-sqaure feet of retail space. The project will require the demolition of 33,500 square feet of existing office buildings and associated parking lot. The proposed project requires the following applications:

- A Planned Development District (#375) in lieu of a Change of Zone;
- A Tentative Tract Map (36876)
- A Major Architectural Review for the architectural and landscape design.

FINDINGS / DETERMINATION: The City has reviewed and considered the proposed project and has determined that any potentially significant impacts can be mitigated to a less than significant level. The City hereby prepares and proposes to adopt a Mitigated Negative Declaration for this project.

PUBLIC REVIEW PERIOD: A 20-day public review period for the Draft Mitigated Negative Declaration will commence at 8:00 a.m. on February 20, 2015 and end on March 11, 2015 at 5:00 p.m. for interested individuals and public agencies to submit written comments on the document. Any written comments on the Mitigated Negative Declaration must be received at the above address within the public review period. In addition, you may email comments to the following address:

David.Newell@palmsprings-ca.gov. Copies of the Mitigated Negative Declaration and Initial Study are available for review at the above address and at the City library.

PUBLIC MEETING: This matter has been set for public hearing before the Planning Commission on February 25, 2015. City Council consideration is expected at a public hearing on March 18, 2015, but please confirm the date with the City Clerk's office.

Date Prepared	February 13, 2015	

Description of the Project

The project proposes the construction of an 8.05-acre mixed-use development comprised of seventy-four (74) attached and detached residential dwellings, and seventeen (17) live-work units with approximately 1,568-sqaure feet of retail space. The project is located on the northeast corner of Tahquitz Canyon Way and Calle El Segundo in Palm Springs, California. The project will require the demolition of 33,500 square feet of existing office buildings, currently fronting Tahquitz Canyan Way, and associated parking and a neighboring parking lot currently used as a public parking lot. The proposed project requires the following applications:

- A Planned Development District (#375) in lieu of a Change of Zone;
- A Tentative Tract Map (36876)
- A Major Architectural Review for the architectural and landscape design.

Access to the project will be provided at the following locations:

- Andreas Road (main entrance)
- Calle El Segundo (secondary access)
- Calle Alvarado (secondary access)

Environmental Setting and Surrounding Land Uses

North: Andreas Road, Plaza Villas (multi-family residential)
South: Tahquitz Canyon Way, commercial land use
East: Renaissance Palm Springs Hotel
West: Calle El Segundo, Elements Spa Hilton

Other public agencies whose approval is required
None.

Environmental Factors Potentially Affected:

The environmental factors checked below would be potentially affected by this project, as indicated by the checklist and corresponding discussion on the following pages.

☐ Aesthetics	☐ Agricultural Resources	☐ Air Quality
☐ Biological Resources	☐ Cultural Resources	☐ Geology/Soils
☐ Hazards & Hazardous Materials	☐ Hydrology/Water Quality	☐ Land Use/Planning
☐ Mineral Resources	☐ Noise	☐ Population/Housing
☐ Public Services	☐ Recreation	☐ Transportation/ Traffic
☐ Utilities/Service Systems	☐ Mandatory Findings of Significance	

DETERMINATION: The City of Palm Springs Planning Department

On the basis of this initial evaluation:

☐ I find that the proposed project COULD NOT have a significant effect on the environment, and a NEGATIVE DECLARATION will be prepared.

☒ I find that although the proposed project could have a significant effect on the environment there will not be a significant effect in this case because revisions in the project have been made by or agreed to by the project proponent. A MITIGATED NEGATIVE DECLARATION will be prepared.

☐ I find that the proposed project MAY have a significant effect on the environment, and an ENVIRONMENTAL IMPACT REPORT is required.

☐ I find that the proposed project MAY have a "potentially significant impact" or "potentially significant unless mitigated" impact on the environment, but at least one effect 1) has been adequately analyzed in an earlier document pursuant to applicable legal standards, and 2) has been addressed by mitigation measures based on the earlier analysis as described on attached sheets. An ENVIRONMENTAL IMPACT REPORT is required, but it must analyze only the effects that remain to be addressed.

☐ I find that although the proposed project could have a significant effect on the environment, because all potentially significant effects (a) have been analyzed adequately in an earlier EIR or NEGATIVE DECLARATION pursuant to applicable standards, and (b) have been avoided or mitigated pursuant to that earlier EIR or NEGATIVE DECLARATION, including revisions or mitigation measures that are imposed upon the proposed project, nothing further is required.

Associate Planner

February 13, 2015

Date

PURPOSE OF THIS INITIAL STUDY

This Initial Study has been prepared consistent with CEQA Guidelines Section 15063, to determine if the project, as proposed, may have a significant effect upon the environment. Based upon the findings contained within this report, the Initial Study will be used in support of the preparation of a Mitigated Negative Declaration.

EVALUATION OF ENVIRONMENTAL IMPACTS

1) A brief explanation is required for all answers except "No Impact" answers that are adequately supported by the information sources a lead agency cites in the parentheses following each question. A "No Impact" answer is adequately supported if the referenced information sources show that the impact simply does not apply to projects like the one involved (e.g., the project falls outside a fault rupture zone). A "No Impact" answer should be explained where it is based on project-specific factors as well as general standards (e.g., the project will not expose sensitive receptors to pollutants, based on project-specific screening analysis).

2) All answers must take into account the whole action involved, including offsite as well as onsite, cumulative as well as project-level, indirect as well as direct, and construction as well as operational impacts.

3) Once the lead agency has determined that a particular physical impact may occur, then the checklist answers must indicate whether the impact is potentially significant, less than significant with mitigation, or less than significant. "Potentially Significant Impact" is appropriate if there is substantial evidence that an effect may be significant. If there are one or more "Potentially Significant Impact" entries when the determination is made, an EIR is required.

4) "Negative Declaration: Less Than Significant With Mitigation Incorporated" applies where the incorporation of mitigation measures has reduced an effect from "Potentially Significant Impact" to a "Less Than Significant Impact." The lead agency must describe the mitigation measures, and briefly explain how they reduce the effect to a less than significant level mitigation measures from Section XVII, "Earlier Analyses," may be cross-referenced).

5) Earlier analyses may be used where, pursuant to the tiering, program EIR, or other CEQA process, an effect has been adequately analyzed in an earlier EIR or negative declaration. Section 15063(c)(3)(D). In this case, a brief discussion should identify the following:

    a) Earlier Analysis Used. Identify and state where they are available for review.

    b) Impacts Adequately Addressed. Identify which effects from the above checklist were within the scope of and adequately analyzed in an earlier document pursuant to applicable legal standards, and state whether such effects were addressed by mitigation measures based on the earlier analysis.

    c) Mitigation Measures. For effects that are "Less than Significant with Mitigation Measures Incorporated," describe the mitigation measures, which were incorporated or refined from the earlier document and the extent to which they address site-specific conditions for the project.

6) Lead agencies are encouraged to incorporate into the checklist references to information sources for potential impacts (e.g., general plans, zoning ordinances). Reference to a previously prepared or outside document should, where appropriate, include a reference to the page or pages where the statement is substantiated.

7) Supporting Information Sources: A source list should be attached, and other sources used or individuals contacted should be cited in the discussion.

8) The explanation of each issue should identify:

   a) The significance criteria or threshold, if any, used to evaluate each question; and

   b) The mitigation measure identified, if any, to reduce the impacts to less than significance.

I. AESTHETICS Would the project:	Potentially Significant Impact	Less Than Significant With Mitigation Incorporated	Less Than Significant Impact	No Impact
a) Have a substantial adverse effect on a scenic vista?	☐	☒	☐	☐
b) Substantially damage scenic resources, including, but not limited to, trees, rock outcroppings, and historic buildings within a state scenic highway?	☐	☐	☐	☒
c) Substantially degrade the existing visual character or quality of the site and its surroundings?	☐	☐	☒	☐
d) Create a new source of substantial light or glare, which would adversely affect day or nighttime views in the area?	☐	☐	☒	☐

(Sources: Palm Springs Architectural Advisory Committee Staff Memorandum, January 12, 2015; Section 14 Specific Plan, City of Palm Springs, July 2014)

Discussion of Impacts

a) **Less Than Significant Impact with Mitigation Incorporated.** The foothills and peaks of the San Jacinto Mountains extend along the westerly and southerly portions of the City and constitute a scenic vista for much of the region. Given their significant rise over the low-lying valley, they are visible from most locations in the upper Coachella Valley, including the subject property.

From the project site, scenic views of the San Jacinto Mountains are to the west and southwest. The site is completely surrounded by urban development, including two-story condominiums to the north, the five-story Renaissance Hotel to the east, two-story commercial and office development to the south, and the three-story Hilton Hotel to the west.

The proposed project will result in demolition of existing parking lots and four office buildings. The project will result in development of residential, recreational, and commercial components. The total project area will consist of 31% building space, 22% paving (including streets or drives), and 47% landscaping/open space/recreation. It includes internal streets, desert landscaping, and a perimeter block wall. Primary vehicular access will be provided from Andreas Road. Additional access is provided from Calle El Segundo and Calle Alvarado.

The residential component of the project includes 74 three- and four-story, attached and detached townhome units with roof decks on the top story. Heights range from 33 feet to 46 feet 2 inches (to the top of roof deck parapet). Each residential unit includes a two-car garage, parking driveway, and private yard space with a small dipping pool, enclosed with a concrete block wall.

An additional 17 live/work units are proposed along Tahquitz Canyon Way. Units consist of a single-story (with roof deck) work space fronting on Tahquitz Canyon Way connected by a walkway to a three- to four-story (including roof deck) living space to the north. Maximum heights are approximately 44 feet 8 inches (to the top of roof deck parapet). Each unit includes a two-car garage and parking driveway.

The project's recreational and open space area is located on the southern portion of the property and consists of a single-story gym, two swimming pools, one spa, outdoor seating, and a pool utility space with covered patio. Building height is 14 feet. A commercial building, located in the southwest corner of the site, consists of a 1,998-square foot, single-story structure 18 feet high, with outdoor seating.

The architectural character of the project is modern, with cantilever roof extensions, modern metals, and large expanses of glass, which are consistent with the Design Guidelines of the Section 14 Specific Plan. Proposed building materials, including stucco walls, aluminum panels, and steel cables, and stepped/terraced building components, are also consistent with the Specific Plan.

The project will impact scenic views from surrounding properties, but views will remain urban in nature and consistent with existing development. Immediate views of the existing parking lot and more distant views of the San Jacinto Mountains from westerly facing hotel rooms at the Renaissance Hotel will be replaced with views of townhomes along Calle Alvarado. Southerly views of the parking lot and San Jacinto Mountains from existing condos north of Andreas Road will also be replaced by views of the townhomes. No scenic viewsheds occur to the east or north, and no significant mountain views will be lost.

Project site plans, architectural renderings, and landscape plans were reviewed by the Palm Springs Architectural Advisory Committee on January 12, 2015. It was determined that proposed building heights exceed the HR development standards of the Section 14 Specific Plan. The maximum permitted height is 35 feet, except when developed as high-rise, and the project proposes heights up to 46 feet 2 inches. The project will be required to abide by Section 14 high-rise development standards, including set backs and landscaping requirments.

The project's landscape design includes a formal pattern along Tahquitz Canyon Way, which is inconsistent with the Specific Plan's required streetscape of palm trees every 60 feet and shade trees between palms and landscape buffers, where feasible. Internal streets do not include sidewalks, and the sidewalk along Tahquitz Canyon should include pedestrian amenities, such as street furniture and banners. The Architectural Advisory Committee recommended that the project proponent revise the site plan to address these and other issues. Visual impacts will be less than significant with implementation of the following mitigation measure.

Mitigation Measure:

MM I – 1 Project site plans, architectural renderings, and landscape plans shall be revised to address inconsistencies with the development standards and other design requirements of the Section 14 Specific Plan, as determined by the City Council.

b) **No Impact.** The property is not located along a state scenic highway. There are no significant trees, rock outcroppings, historic buildings or other significant aesthetic resources on the subject property. The site is fully developed with paved parking lots, office buildings, and limited urban landscaping. No impacts to scenic resources will occur.

c) **Less Than Significant Impact.** The project site is located in the City's urban core and within the Section 14 Specific Plan boundary. It is currently developed with paved parking lots and office buildings, and surrounded by residential, hotel, commercial, and office development. The proposed project is consistent with the long-term development vision of the Specific Plan for urban uses in this area. It will not substantially degrade the existing visual character of the site and its surroundings.

d) **Less Than Significant Impact.** The project site is currently used as an office complex and parking lot. Light is emitted from the office buildings and parking lots, particularly the northerly parking lot which is used during the evening for convention center and casino activities. The proposed project will continue to emit light in a manner consistent with a residential neighborhood. Light sources will include indoor lights, outdoor security lighting, landscape lighting, and vehicle headlights. Lighting levels are not expected to exceed typical lighting within an urbanized environment.

All lighting proposed within the project will be required to comply with the outdoor lighting standards established in the City Zoning Ordinance Section 93.21.00 to assure lighting is directed away from adjacent properties. These standards will assure that project light and glare impacts will be less than significant.

II. AGRICULTURAL RESOURCES

Would the project:	Potentially Significant Impact	Less Than Significant With Mitigation Incorporated	Less Than Significant Impact	No Impact
a) Convert Prime Farmland, Unique Farmland, or Farmland of Statewide Importance (Farmland), as shown on the maps prepared pursuant to the Farmland Mapping and Monitoring Program of the California Resources Agency, to non-agricultural use?	☐	☐	☐	☒
b) Conflict with existing zoning for agricultural use, or a Williamson Act contract?	☐	☐	☐	☒
c) Involve other changes in the existing environment which, due to their location or nature, could result in conversion of Farmland, to non-agricultural use?	☐	☐	☐	☒

(Sources: "Riverside County Important Farmland 2010 Map," California Department of Conservation; 2007 Palm Springs General Plan)

Discussion of Impacts

a-c) ***No Impact.*** The subject property is located in an urban area and surrounded by roadways and resort, commercial, and residential development. The site is developed and contains a paved parking lot and single-story office buildings. It is not designated as Prime Farmland, Unique Farmland, or Farmland of Statewide Importance pursuant to the Farmland Mapping and Monitoring Program, nor is it subject to a Williamson Act contract. No agricultural lands are located in the vicinity of the property. The project will have no impact on agricultural lands and will not result in the conversion of farmland to non-agricultural uses.

III. AIR QUALITY

Would the project:	Potentially Significant Impact	Less Than Significant With Mitigation Incorporated	Less Than Significant Impact	No Impact
a) Conflict with or obstruct implementation of the applicable air quality plan?	☐	☐	☐	☒
b) Violate any air quality standard or contribute substantially to an existing or projected air quality violation?	☐	☐	☒	☐
c) Result in a cumulatively considerable net increase of any criteria pollutant for which the project region is non-attainment under an applicable federal or state ambient air quality standard (including releasing emissions which exceed quantitative thresholds for ozone precursors)?	☐	☐	☒	☐
d) Expose sensitive receptors to substantial pollutant concentrations?	☐	☐	☒	☐
e) Create objectionable odors affecting a substantial number of people?	☐	☐	☒	☐

(Sources: "Final 2012 Air Quality Management Plan," prepared by South Coast Air Quality Management District, December 2012; "Final Localized Significance Threshold Methodology," prepared by the South Coast Air Quality Management District, Revised, July 2008; "2003 Coachella Valley PM10 State Implementation Plan," August 1, 2003; CalEEMod Version 2013.2.2)

Setting

The Coachella Valley, including the City of Palm Springs and project site, is located within the Salton Sea Air Basin (SSAB), which is under the jurisdiction of the South Coast Air Quality Management District (SCAQMD). All development within the SSAB is subject to SCAQMD's 2012 Air Quality Management Plan (2012 AQMP) and the 2003 Coachella Valley PM_{10} State Implementation Plan (2003 CV PM10 SIP). The SCAQMD operates and maintains regional air quality monitoring stations at numerous locations throughout its jurisdiction. The proposed site is located within Source Receptor Area (SRA) 30, which includes monitoring stations in Palm Springs and Indio. The Indio site has been operational since 1985 and the Palm Springs site since 1987.

Criteria air pollutants are contaminants for which the state and federal air quality standards have been established. Currently, the Coachella Valley is classified as being in non-attainment for both ozone (O_3) and PM_{10}. State and federal ambient air quality standards are show in Table III-1 and described in detail below.

Table III- 1
State and Federal Ambient Air Quality Standards

	State Standards		Federal Standards	
Pollutant	**Averaging Time**	**Concentration**	**Averaging Time**	**Concentration**
Ozone	1 hour 8 hour	0.09 ppm 0.07 ppm	1 hour 8 hour	--- 0.075 ppm
Carbon Monoxide	1 hour 8 hours	20.0 ppm 9.0 ppm	1 hour 8 hours	35.0 ppm 9.0 ppm
Nitrogen Dioxide (NO_2)	1 hour AAM	0.18 ppm 0.030 ppm	1 hour AAM	0.10 ppm 0.053 ppm
Sulfur Dioxide (SO_2)	1 hour 24 hours	0.25 ppm 0.04 ppm	1 hour 24 hours	0.075ppm 0.14 ppm
Particulate Matter (PM_{10})	24 hours AAM	50 µg/m³ 20 µg/m³	24 hours AAM	150 µg/m³ ---
Particulate Matter ($PM_{2.5}$)	AAM 24 hours	12 µg/m³ ---	AAM 24 hours	12 µg/m³ 35 µg/m³
Lead	30 day Avg.	1.5 µg/m³	3 month Avg.	0.15 µg/m³
Visibility Reducing Particles	8 hour		No federal Standard	No federal Standard
Sulfates	24 hour	25µg/m³	No federal Standard	No federal Standard
Hydrogen Sulfide	1 hour	0.03 ppm	No federal Standard	No federal Standard
Vinyl Chloride	24 hour	0.01 ppm	No federal Standard	No federal Standard

Notes: ppm = parts per million; ppb= parts per billion; µg/ m³ = micrograms per cubic meter of air;
AAM = Annual Arithmetic Mean;
Source: California Air Resources Board, 6/04/2013.

Ozone (O_3) is the most prevalent of a class of photochemical oxidants formed in the urban atmosphere. The creation of ozone is a result of complex chemical reactions between hydrocarbons and oxides of nitrogen in the presence of sunshine. Unlike other pollutants, ozone is not released directly into the atmosphere from any sources. The major sources of oxides of nitrogen and reactive hydrocarbons, known as ozone precursors, are combustion sources such as factories and automobiles, and evaporation of solvents and fuels. The health effects of ozone are eye irritation and damage to lung tissues.

Carbon Monoxide (CO) is a colorless, odorless, toxic gas formed by incomplete combustion of fossil fuels. CO concentrations are generally higher in the winter, when meteorological conditions favor the build-up of directly emitted contaminants. CO health warning and emergency episodes occur almost entirely during the winter. The most significant source of carbon monoxide is gasoline-powered automobiles, as a result of inefficient fuel usage in internal combustion engines. Various industrial processes also emit carbon monoxide.

Nitrogen Oxides (NO_x) the primary receptors of ultraviolet light initiating the photochemical reactions to produce smog. Nitric oxide combines with oxygen in the presence of reactive hydrocarbons and sunlight to form nitrogen dioxide and ozone. Oxides of nitrogen are contributors to other air pollution problems including: high levels of fine particulate matter, poor visibility and acid deposition.

Sulfur Dioxide (SO_2) results from the combustion of high sulfur content fuels. Fuel combustion is the major source of SO_2, while chemical plants, sulfur recovery plants, and metal processing are minor contributors. Sulfates result from a relation of sulfur dioxide and oxygen in the presence of sunlight. SO_2 levels are generally higher in the winter than in the summer (when sunlight is plentiful and sulfate is more readily formed).

Particulate Matter (PM_{10} and $PM_{2.5}$) consists of particles in the atmosphere as a by-product of fuel combustion, through abrasion such as tire wear, and through soil erosion by wind. Particulates can also be formed through photochemical reactions in the atmosphere. PM_{10} refers to finely divided solids or liquids such as soot, dust, and aerosols which are 10 microns or less in diameter and can enter the lungs. Fine particles are those less than 2.5 micrometers in diameter and are also referred to as $PM_{2.5}$.

Lead is found in old paints and coatings, plumbing and a variety of other materials. Once in the blood stream, lead can cause damage to the brain, nervous system, and other body systems. Children are most susceptible to the effects of lead. The South County Air Basin and riverside County portion of the Salton Sea Air Basin are in attainment for the federal and State standards for lead.

Discussion of Impacts

a) ***No Impact.*** The project will be developed in accordance with all applicable air quality management plans. The subject property is located within the Salton Sea Air Basin (SSAB), which is governed by the South Coast Air Quality Management District (SCAQMD). SCAQMD is responsible for monitoring criteria air pollutant concentrations and establishing management policies for the SSAB. All development within the Salton Sea Air Basin, including the proposed project, is subject to the current AQMP and SIP.

The AQMP is a comprehensive plan that establishes control strategies and guidance on regional emission reductions for air pollutants. It was based, in part, on the land use plans of the jurisdictions in the region. The proposed project is consistent with the City of Palm Springs land use designations assigned to the subject property. Therefore, the proposed project is consistent with the intent of the AQMP. No impacts associated with compliance with applicable management plans are expected.

b, c) ***Less Than Significant Impact.*** Development of the proposed project will result in the release of criteria air pollutants. The California Emissions Estimator Model (CalEEMod) Version 2013.2.2 was used to determine air quality emissions that will be generated by construction and operation of the proposed project. Table III-2 summarizes the short-term construction-related emissions, and Table III-3 summarizes the ongoing emissions that will be generated at operation.

Construction Emissions

The construction period includes demolition, site preparation, grading, building construction, paving, and architectural coating associated with the proposed project. For analysis purposes, it is assumed that construction will occur over a 1-year period extending from March 1, 2015 to March 1, 2016. The demolition period includes the removal of 33,500 square feet of existing buildings. The grading period includes hauling emissions associated with the projected 12,000 cubic yards of cut, and 2,000 cubic yards of fill.

As shown in Table III-2, emissions generated by construction activities will not exceed SCAQMD thresholds of significance for criteria air pollutants. The data reflect average daily emissions over the 1-year construction period, including both summer and winter weather conditions. It should be mentioned that the Table below shows the projected unmitigated emissions. Implementation of minimization measures during construction will further reduce emission levels. Applicable minimization measures include, but are not limited to, the implementation of dust control practices in conformance with SCQAMD Rule 403, and proper maintenance and limited idling of heavy equipment. Impacts to air quality from construction of the proposed project for criteria pollutants, therefore, are expected to be less than significant.

Table III-2
Construction-Related Emissions Summary
(pounds per day)

Construction Emissions[1]	CO	NO_x	ROG	SO_2	PM_{10}	$PM_{2.5}$
2015	44.59	56.92	71.09	0.07	14.00	8.37
2016	2.99	2.48	71.04	0.00	0.35	0.24
SCAQMD Thresholds	550.00	100.00	75.00	150.00	150.00	55.00
Exceeds Threshold?	NO	NO	NO	NO	NO	NO

Average of winter and summer emissions, unmitigated.
Source: CalEEMod model, version 2013.2.2.
See Appendix A for detailed calculations.

Operational Emissions

Operational emissions are ongoing emissions that will occur over the life of the project. Operational emissions include area source emissions, emissions from energy (electric and natural gas) demand, and mobile source (vehicle) emissions. As shown in the table below, operational emissions will not exceed SCAQMD thresholds of significance for any criteria pollutants. Impacts will be less than significant.

Table III-3
Operational Emissions Summary
(pounds per day)

	CO	NO_x	ROG	SO_2	PM_{10}	$PM_{2.5}$
Operation Emissions[1]	47.25	10.28	13.54	0.06	4.09	1.33
SCAQMD Thresholds	550.00	100.00	75.00	150.00	150.00	55.00
Exceeds Threshold?	NO	NO	NO	NO	NO	NO

Average of winter and summer emissions, unmitigated.
Source: CalEEMod model, version 2013.2.2.
See Appendix A

Non-Attainment

Historically, the Coachella Valley, which includes the proposed project site, has been classified as a "non-attainment" area for PM10. The proposed project will contribute to an incremental increase in regional ozone and PM_{10} emissions. However, this impact is not expected to be cumulatively considerable. Project construction and operation emissions will not exceed SCAQMD thresholds for PM_{10} or ozone precursors, and appropriate minimization measures will be implemented that will further reduce emissions. The project will not conflict with any attainment plans and will result in less than significant impacts.

d) ***Less than Significant Impact.*** To determine if the proposed project has the potential to generate significant adverse localized air quality impacts, the 5-acre mass rate LST Look-Up Table for SRA 30 (Coachella Valley) was utilized. The nearest sensitive receptor is a multi-family residential development (Plaza Villas) located 30 meters north of the project site boundary. Therefore, LSTs are summarized in the table below for sensitive receptors located approximately 25 meters from the emission source. Emission estimates reflect all phases of construction. As shown in Table III-4 below, LST thresholds will not be exceeded during construction of the project. Impacts to sensitive receptors will be less than significant.

Table III-4
Localized Significance Thresholds
(pounds per day)

	CO	NO_x	PM_{10}	$PM_{2.5}$
Project Emissions	44.59	56.92	6.66	4.33
LST	2,292	304	14	8
Exceeds Threshold?	NO	NO	NO	NO

Source: CalEEMod Version 2013.2.2
Emissions shown are the maximum daily emission during all phases of construction, unmitigated, with the exception of PM_{10} and $PM_{2.5}$, which show emissions after enforcement of standard dust control measures. The highest daily emissions are expected to occur in 2015.
See Appendix A

e) ***Less than Significant.*** The proposed project is not expected to generate objectionable odors at project buildout. The proposed project has the potential to result in short term odors associated with asphalt paving and heavy equipment; however, any such odors would be quickly dispersed below detectable thresholds as distance from the construction site increases. Therefore, impacts from objectionable odors are expected to be less than significant.

Standard Air Quality Regulations

The project will adhere to all established air quality standards and regulations including the following:

1. SCAQMD Rule 403 (403.1 specific to the Coachella Valley): A dust control Plan shall be prepared and implemented during all construction activities, include ground disturbance, grubbing, grading, and soil export. Said plan shall include but not be limited to the following best management practices:
    - Chemically treat soil where activity will cease for at least four consecutive days;
    - All construction grading operations and earth moving operations shall cease when winds exceed 25 miles per hour;
    - Water site and equipment morning and evening and during all earth-moving operations;
    - Operate street-sweepers on paved roads adjacent to site;
    - Establish and strictly enforce limits of grading for each phase of development; and/or

- Stabilize and re-vegetate areas of temporary disturbance needed to accomplish each phase of development.
- Wash off trucks as they leave the project site as necessary to control fugitive dust emissions.
- Cover all transported loads of soils, wet materials prior to transport, provide adequate freeboard (space from the top of the material to the top of the truck) to reduce PM10 and deposition of particulate matter during transportation.
- Use track-out reduction measures such as gravel pads at project access points to minimize dust and mud deposits on roads affected by construction traffic.

2. SCAQMD Rule 402: The project shall adhere to nuisance odor requirement.

3. SCAQMD Rule 1113: The project shall use low VOC content architectural coatings and paints per the requirements of this Rule.

Recommended Control Measures

Although project related air emissions are expected to be less than significant, the following control measures are recommended to further limit air quality emissions:

1. To reduce particulate matter and NOx emissions construction equipment should utilize aqueous diesel fuels, diesel particulate filters and diesel oxidation catalyst during all construction activities.

2. All construction equipment should be properly serviced and maintained in optimal operating condition.

3. Construction equipment should not be left idling for more than five minutes.

4. Diesel-powered construction equipment shall utilize aqueous diesel fuels, and be equipped with diesel oxidation catalysts.

5. Onsite landscaping, if any, should be equipped with efficient irrigation and a low water demanding plant pallet to minimize water use onsite, which also reduces onsite energy expenditures and any air quality emissions associated with the production of energy.

6. Onsite lighting should utilize energy efficient technology such as sensors, timers, and LED to minimize energy demand from lighting.

7. As feasible, construction waste should be recycling to reroute waste from landfills and minimize the project's contribution to the landfill.

8. The contractor shall notify the City of the start and end of grading and construction activities in conformance and within the time frames established in the 2003 PM_{10} State Implementation Plan.

9. Construction staging and management plans shall be reviewed and conditioned to require the application of all reasonably available methods and technologies to assure the minimal emissions of pollutants from the development. The City Engineer shall review grading plan

applications to ensure compliance with the mitigation measures set forth in this document and as otherwise conditioned by the City.

10. As part of the construction staging and management plans, the contractor shall concurrently submit a dust control plan consistent with the City's Air Quality Management Plan. Mitigation measures to be implemented through this plan include but are not limited to the use of water trucks and temporary irrigation systems, post-grading soil stabilization, phased roadway preparation and paving, as well as other measures which will effectively limit fugitive dust and other emissions.

11. Construction equipment and materials shall be sited as far away from residential and park uses as practicable.

IV. BIOLOGICAL RESOURCES **Would the project:**	Potentially Significant Impact	Less Than Significant With Mitigation Incorporated	Less Than Significant Impact	No Impact
a) Have a substantial adverse effect, either directly or through habitat modifications, on any species identified as a candidate, sensitive, or special status species in local or regional plans, policies, or regulations, or by the California Department of Fish and Game or U.S. Fish and Wildlife Service?	☐	☐	☐	☒
b) Have a substantial adverse effect on any riparian habitat or other sensitive natural community identified in local or regional plans, policies, or regulations or by the California Department of Fish and Game or US Fish and Wildlife Service?	☐	☐	☐	☒
c) Have a substantial adverse effect on federally protected wetlands as defined by Section 404 of the Clean Water Act (including, but not limited to, marsh, vernal pool, coastal, etc.) through direct removal, filling, hydrological interruption, or other means?	☐	☐	☐	☒
d) Interfere substantially with the movement of any native resident or migratory fish or wildlife species or with established native resident or migratory wildlife corridors, or impede the use of native wildlife nursery sites?	☐	☐	☐	☒
e) Conflict with any local policies or ordinances protecting biological resources, such as a tree preservation policy or ordinance?	☐	☐	☐	☒
f) Conflict with the provisions of an adopted Habitat Conservation Plan, Natural Community Conservation Plan, or other approved local, regional, or state habitat conservation plan?	☐	☐	☐	☒

(Sources: "Agua Caliente Tribal Habitat Conservation Plan," August 2010; "Coachella Valley Multiple Species Habitat Conservation Plan," 2007)

Discussion of Impacts

a-f) No Impact. The subject site is located in an urban area and surrounded on all sides by paved roads and resort, commercial, and residential development. It is entirely developed with paved parking lots and office buildings. Biological resources are limited to ornamental vegetation along the site perimeter, within parking lots, and adjacent to the office buildings.

The site is not known to contain sensitive or special-status species. It does not contain any streams, riparian habitat, marshes, protected wetlands, or other waters or related habitat. It is completely surrounded by urban development and has no potential to serve as a migratory wildlife corridor or nursery site. It does not contain any trees or other biological features that are protected by local policies or ordinances, and the proposed project will not conflict with any such policies.

The project will not conflict with the policies or intent of a habitat conservation plan or natural community conservation plan. The site is located within the boundaries of the Tribal Habitat Conservation Plan (HCP) of the Agua Caliente Band of Cahuilla Indians. It is within the HCP's Valley Floor Planning Area (VFPA) and, therefore, will be required to pay the VFPA Fee.

The property is also located within the boundaries of the Coachella Valley Multiple Species Habitat Conservation Plan (CV MSHCP). However, because the project will be required to pay Tribal Habitat Conservation Plan VFPA Fee, it will not be subject to payment of any fees associated with the CV MSHCP. No additional mitigation is required.

V. CULTURAL RESOURCES Would the project:	Potentially Significant Impact	Less Than Significant With Mitigation Incorporated	Less Than Significant Impact	No Impact
a) Cause a substantial adverse change in the significance of a historical resource as defined in 15064.5?	☐	☐	☐	☒
b) Cause a substantial adverse change in the significance of an archaeological resource pursuant to 15064.5?	☐	☒	☐	☐
c) Directly or indirectly destroy a unique paleontological resource or site or unique geologic feature?	☐	☐	☐	☒
d) Disturb any human remains, including those interred outside of formal cemeteries?	☐	☐	☒	☐

(Sources: City of Palm Springs General Plan, 2007; Section 14 Specific Plan, City of Palm Springs, July 2014.)

Setting

The City is located in the traditional territory of the Desert Cahuilla, with a history dating back to 1,000 BC. Evidence of Cahuilla occupation in the Coachella Valley dates to over 500 years ago, when the Tribe settled around ancient Lake Cahuilla, in the area of present day La Quinta and Indio. The canyons surrounding Palm Springs also have yielded evidence of use by the Tribe, which took advantage of water sources, food sources from plants and animals, and rock for tool-making.

The City's modern history began in the early 1870s, when John Guthrie McCallum purchased land in the area, and later subdivided it. Rapid expansion in the area began in the 1920s, with the City's spreading reputation as a health resort, and the increased interest from the Hollywood movie community. Until the end of World War II, architecture in the City consisted primarily of Mission Revival and Spanish Colonial Revival structures. Development was centered around Palm Canyon Drive, as hotels and shops were constructed.

The City occurs well outside the boundary of ancient Lake Cahuilla, an area where paleontological resources have occurred. Further, soils in the City are generally post-Pleistocene age alluvium from the surrounding mountains, too new in the context of paleontology to yield fossilized remains.

Discussion of Impacts

a) ***No Impact.*** The project site is fully developed with a parking lot and 1971 vintage office buildings. The existing buildings do not qualify or meet the criteria of a historical resource as defined in Section 15064.5. The existing buildings are not listed as a state historical resource of significance, nor are the buildings locally listed with the City of Palm Springs. No impacts to historic resources are expected to occur as a result of build out of the proposed project.

b) ***Less than Significant Impact with Mitigation.*** The project site occurs within the boundaries of the Section 14 Master Plan. The EIR prepared for that project identified the potential for buried resources throughout the area, including the project site. However, the site has been previously developed, and the potential for buried remains to be unearthed is considered low. Nonetheless, the following mitigation measure shall be implemented.

MM V-1 As there is always a possibility of buried cultural and paleontological resources in a project area, a Native American Monitor(s) shall be present during all ground disturbing activities including clearing and grubbing, excavation, burial of utilities, planting of rooted plants, etc., The Agua Caliente Band of Cahuilla Indian Cultural Office shall be contacted for additional information on the use and availability of Cultural Resource Monitors. Should buried cultural deposits be encountered, the Monitor shall contact the Director of Planning Services. Following consultation, the Director shall have the authority to halt destructive construction and shall notify a qualified archaeologist to investigate the find. If necessary, the qualified archaeologist shall prepare a treatment plan for submission to the State Historic Preservation Officer and Agua Caliente Cultural Resource Coordinator for approval. Human remains discovered shall be handled consistent with state law provisions.

c) ***No Impact.*** The City and project site are outside the shoreline of ancient Lake Cahuilla. The site is underlain by alluvium which is post-Pleistocene, and not suitable for paleontological resources. Development of the project site will have no impact on paleontological resources.

d) ***Less than Significant Impact.*** No known burial ground or cemetery occurs on the project site. Excavation for existing development on the site would likely have identified such remains. Excavation for the parking structure, however, is likely to occur to a greater depth than has been excavated in the past. Should human remains be discovered during construction of the proposed project, the project contractor would be subject to State law regarding the discovery and disturbance of human remains. In that circumstance, the project contractor is required to immediately notify law enforcement, and allow the coroner to determine the nature of the remains (historic or pre-historic, human or not). The coroner is also responsible for the proper removal and potential re-burial of the remains, and consultation with Tribal officials, if the remains are determined to be Native American. As a result of these State requirements, impacts to human remains are expected to be less than significant.

VI. GEOLOGY AND SOILS Would the project:	Potentially Significant Impact	Less Than Significant With Mitigation Incorporated	Less Than Significant Impact	No Impact
a) Expose people or structures to potential substantial adverse effects, including the risk of loss, injury, or death involving:				
i) Rupture of a known earthquake fault, as delineated on the most recent Alquist-Priolo Earthquake Fault Zoning Map issued by the State Geologist for the area or based on other substantial evidence of a known fault? Refer to Division of Mines and Geology Special Publication 42.	☐	☐	☐	☒
ii) Strong seismic ground shaking?	☐	☐	☒	☐
iii) Seismic-related ground failure, including liquefaction?	☐	☐	☐	☒
iv) Landslides?	☐	☐	☐	☒
b) Result in substantial soil erosion or the loss of topsoil?	☐	☐	☒	☐
c) Be located on a geologic unit or soil that is unstable, or that would become unstable as a result of the project, and potentially result in on- or off-site landslide, lateral spreading, subsidence, liquefaction or collapse?	☐	☐	☐	☒
d) Be located on expansive soil, as defined in Table 18-1-B of the Uniform Building Code (1994), creating substantial risks to life or property?	☐	☐	☐	☒
e) Have soils incapable of adequately supporting the use of septic tanks or alternative wastewater disposal systems where sewers are not available for the disposal of wastewater?	☐	☐	☐	☒

(Sources: Figures 6-1, 6-2, 6-3, and 6-4, 2007 Palm Springs General Plan; "Soil Survey of Riverside County, California, Coachella Valley Area," U.S. Department of Agriculture Soil Conservation Service, 1980; "Preliminary Water Quality Management Plan: Aberdeen Residential," Walden and Associates, January 19, 2015; "Preliminary Drainage Study for Prairie Schooner," Walden and Associates, December 2014)

Discussion of Impacts

a.i) **No Impact.** The subject property is not located within or adjacent to an Alquist-Priolo Earthquake Fault Zone, and no impacts associated with fault rupture will occur onsite. The nearest fault zones are located along the Banning Pass Fault, approximately 5 miles northeast of the site, and the San Jacinto Fault System approximately 5 miles to the south.

a.ii) **Less Than Significant Impact.** Numerous active faults are located in the Coachella Valley. During a significant seismic event, the City will be subjected to significant ground acceleration, and onsite structures could sustain damage. To reduce impacts from seismic ground shaking and provide collapse-resistant design, the City requires that all structures be constructed to Uniform Building Code (UBC) requirements for Seismic Zone 4. The proposed project will be required to conform to these standards and, therefore, impacts are expected to be less than significant.

a.iii) **No Impact.** Liquefaction is the loss of soil cohesion due to exposure to shallow groundwater or a seismic event. Liquefied soils cannot support structures and can cause structural failures. For liquefaction to occur, groundwater levels must be within 50 feet of the ground surface.

The subject property is located on the valley floor in an area with low liquefaction susceptibility. Its near surface soils consist of fine to gravelly sand and older alluvial sediments. Onsite groundwater depths are estimated to be greater than 50 feet below the ground surface. No project-related impacts associated with liquefaction will occur.

a.iv) **No Impact.** The proposed project site is on the valley floor. It consists of, and is surrounded by, relatively flat terrain. The nearest hillsides and mountainous slopes are approximately ½ mile west of the property. No impacts associated with landslides will occur.

b) **Less Than Significant Impact.** The subject site is located on the valley floor and is susceptible to wind erosion. The proposed project will require demolition of existing structures and parking lots, grading, paving, and other ground disturbance by heavy machinery, which will contribute to temporary wind erosion impacts. Water erosion could occur as a result of site watering during the development process and post-construction operations.

However, the site has been graded and developed in the past, and the terrain is largely flat. The project will not require substantial grading. The mitigation measures provided in the Air Quality section of this Initial Study will reduce impacts associated with wind erosion to less than significant levels. The project will be required to comply with the requirements of the National Pollutant Discharge Elimination Systems (NPDES) and the Best Management Practices (BMP) set forth in the project-specific Water Quality Management Plan (WQMP) to assure that water erosion is reduced to less than significant levels. Post-construction water runoff will be collected by a private storm drain system and retained via an underground retention system.

c) **No Impact.** The subject site does not contain unstable soils or geologic units. As described in VI.a, above, the site is not susceptible to liquefaction due to its soil composition and depth to groundwater. It is not susceptible to landslide due to distance from mountainous slopes and foothills. The site was previously graded to accommodate

construction of the existing facilities, and grading was conducted in compliance with City standards.

The City will require additional project-specific geotechnical and structural engineering analysis, as necessary, to determine whether additional soil remediation or compaction is required.

d) **No Impact.** Onsite soils consist of Carsitas gravelly sand (0 to 9 percent slopes) and Myoma fine sand (0 to 5 percent slopes), which have a low shrink-swell potential. No impacts associated with expansive soils will occur.

e) **No Impact.** The project will connect to the City's existing sewer system. No septic tanks or alternative wastewater disposal systems are proposed. No adverse impacts will occur.

VII. GREENHOUSE GAS EMISSIONS Would the project:	Potentially Significant Impact	Potentially Significant Unless Mitigation Incorporated	Less Than Significant Impact	No Impact
a) Generate greenhouse gas emissions, either directly or indirectly, that may have significant impact on the environment?	☐	☐	☒	☐
b) Conflict with an applicable plan, policy or regulation adopted for the purpose of reducing the emissions of greenhouse gases?	☐	☐	☒	☐

(Sources: CalEEMod Version 2013.2.2)

a, b) ***Less than Significant Impact.*** The proposed project will generate greenhouse gas (GHG) emissions during both construction and operation. As mentioned in Section III.A (Construction Emissions), CalEEMod was used to quantify air quality emission projections, including greenhouse gas emissions. Construction related greenhouse gas emissions will be temporary and will end once the project is completed. Operation of the proposed project will create on-going greenhouse gases through area source emissions such as landscaping and off-gassing from the pavement. Table VII-1 provides projected short-term and annual GHG generation associated with Aberdeen.

Table VII-1
Projected GHG Emissions Summary
(Metric Tons)

Phase	CO2e
Construction (1 year)	417.75
Operational 2016 (Annually)	1,116.47

Source: CalEEMod Version 2013.2.2.
See Appendix A

There are currently no adopted thresholds of significance for GHG emissions for construction or operation of projects of this nature. It is recognized that GHG impacts are intrinsically cumulative. As such, project construction will be conducted in a manner that is consistent with applicable rules and regulation pertaining to the release and generation of GHG's. The proposed project will have a less than significant impact on the environment from the emission of GHG's and will not conflict with any applicable GHG plans, policies or regulations.

VII. HAZARDS AND HAZARDOUS MATERIALS **Would the project:**	Potentially Significant Impact	Less Than Significant With Mitigation Incorporated	Less Than Significant Impact	No Impact
a) Create a significant hazard to the public or the environment through the routine transport, use, or disposal of hazardous materials?	☐	☒	☐	☐
b) Create a significant hazard to the public or the environment through reasonably foreseeable upset and accident conditions involving the release of hazardous materials into the environment?	☐	☒	☐	☐
c) Emit hazardous emissions or handle hazardous or acutely hazardous materials, substances, or waste within one-quarter mile of an existing or proposed school?	☐	☐	☐	☒
d) Be located on a site which is included on a list of hazardous materials sites compiled pursuant to Government Code Section 65962.5 and, as a result, would it create a significant hazard to the public or the environment?	☐	☐	☐	☒
e) For a project located within an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport, would the project result in a safety hazard for people residing or working in the project area?	☐	☐	☐	☒
f) For a project within the vicinity of a private airstrip, would the project result in a safety hazard for people residing or working in the project area?	☐	☐	☐	☒
g) Impair implementation of or physically interfere with an adopted emergency response plan or emergency evacuation plan?	☐	☐	☐	☒
h) Expose people or structures to a significant risk of loss, injury or death involving wildland fires, including where wildlands are adjacent to urbanized areas or where residences are intermixed with wildlands?	☐	☐	☐	☒

(Sources: "Preliminary Environmental Site Assessment – Phase I, City Parking Lot, APN 508-055-007 and -008," California Environmental, January 2006; "Preliminary Environmental Site Assessment – Phase I, Commercial Property APN 508-055-006," California Environmental, December 2006; "Environmental Site Assessment – Phase I, Commercial Property APN 508-055-003," California

Environmental, April 2007; Envirostor map database, California Department of Toxic Substances Control, accessed February 5, 2015; "Riverside County Airport Land Use Compatibility Plan Policy Document," March 2005).

Discussion of Impacts

Three project-specific Phase I Environmental Site Assessments were prepared for the project including "Preliminary Environmental Site Assessment – Phase I, City Parking Lot, APN 508-055-007 and -008," California Environmental, January 2006; "Preliminary Environmental Site Assessment – Phase I, Commercial Property APN 508-055-006," California Environmental, December 2006; and "Environmental Site Assessment – Phase I, Commercial Property APN 508-055-003," California Environmental, April 2007.

a-b) Less Than Significant Impact with Mitigation Incorporated.

The proposed project will result in the construction of townhomes, live/work units, a community gym, and a commercial building. Limited quantities of paints, solvents, architectural coatings, and similar agents will be transported to and used onsite during the construction process. A vehicle staging area will be used during the construction phase of the project to minimize potential fuel or oil spills and the risk of explosion or accidental chemical release. The project will be required to adhere to applicable local, State, and federal laws pertaining to occupational safety and disposal of hazardous waste.

Over the long-term, residents can be expected to store and use various chemicals for routine household and landscaping purposes. Similar cleansers and chemicals will be stored and used at the commercial site. Chlorine and related chemicals will be stored and used for swimming pool/spa operation and maintenance. None of these will be used in sufficient quantities as to pose a threat to humans or cause a foreseeable chemical release into the environment.

Phase I Site Assessments

Three (3) Phase I Environmental Site Assessments were conducted on the subject property to evaluate the potential for hazardous materials impacts to soil and groundwater beneath the site. One report addressed the existing parking lot, one addressed the two westernmost office buildings, and one addressed the two easternmost buildings.

No evidence of the use, storage, disposal or generation of hazardous substances was observed onsite, and there is no evidence of aboveground or underground storage tanks, grease interceptors, or sumps onsite. No further research or subsurface assessment activities were recommended.

Two of the existing office buildings were built in 1973 and two were built in 1976. Therefore, there is the potential for asbestos containing materials (ACM) and lead based paint to have been used in their construction. Suspect ACM was observed in the form of ceiling tiles and linoleum. During demolition, the proper handling, transport, and disposal of such materials must be assured. In order to assure that impacts associated with asbestos are mitigated to less than significant levels, the following mitigation measure shall be implemented.

Mitigation Measure

MM VII-1: Prior to the issuance of demolition permits, an asbestos and lead survey shall be conducted by a certified asbestos and lead consultant, and a report shall be provided to the City Building Official. Should asbestos- and/or lead-containing materials be found, the project proponent shall submit to the Building Official a remediation and disposal plan to be conducted by a qualified, licensed specialist in the disposal of hazardous materials. The plan shall include specifics regarding the method of removal, transport, and disposal for all such materials.

c) **No Impact.** No schools are located or planned within one quarter mile of the project site. There will be no impact to schools.

d) **No Impact.** The proposed project site is not included on a list compiled pursuant to Government Code Section 65962.5. The proposed project will not create a significant hazard to the public or environment.

e-f) **No Impact.** The Palm Springs International Airport is located approximately 1½ miles east of the subject property. The property is not located within the boundaries of the airport's land use compatibility plan. The property is not located in the vicinity of a private airstrip. The project will not result in safety hazards for people living or working in the area.

g) **No Impact.** The proposed project will be accessible from East Andreas Road, Calle Alvarado, and Calle El Segundo, all of which are built out streets. The project will not alter the existing circulation pattern in the project area or adversely impact evacuation plans for those streets. The internal circulation plan will be reviewed by the Fire Department to assure that roads and driveways are adequate for emergency vehicles. A construction traffic plan will be required to assure that the project does not interfere with emergency access during the construction phase.

h) **No Impact.** The subject property is located in an urban area and surrounded on all sides by development. The nearest wildlands are the foothills of the San Jacinto Mountains, approximately ½ mile to the west. The property is not susceptible to wildfire hazards, and the proposed project will not expose people or structures to significant risks associated with wildland fires.

VIII. HYDROLOGY AND WATER QUALITY **Would the project:**	Potentially Significant Impact	Less Than Significant With Mitigation Incorporated	Less Than Significant Impact	No Impact
a) Violate any water quality standards or waste discharge requirements?	☐	☐	☒	☐
b) Substantially deplete groundwater supplies or interfere substantially with groundwater recharge such that there would be a net deficit in aquifer volume or a lowering of the local groundwater table level (e.g., the production rate of pre-existing nearby wells would drop to a level which would not support existing land uses or planned uses for which permits have been granted)?	☐	☐	☒	☐
c) Substantially alter the existing drainage pattern of the site or area, including through the alteration of the course of a stream or river, in a manner which would result in substantial erosion or siltation on- or off-site?	☐	☐	☒	☐
d) Substantially alter the existing drainage pattern of the site or area, including through the alteration of the course of a stream or river, or substantially increase the rate or amount of surface runoff in a manner which would result in flooding on- or off-site?	☐	☐	☒	☐
e) Create or contribute runoff water which would exceed the capacity of existing or planned stormwater drainage systems or provide substantial additional sources of polluted runoff?	☐	☐	☒	☐
f) Otherwise substantially degrade water quality?	☐	☐	☐	☒
g) Place housing within a 100-year flood hazard area as mapped on a federal Flood Hazard Boundary or Flood Insurance Rate Map or other flood hazard delineation map? (Source:	☐	☐	☐	☒
h) Place within a 100-year flood hazard area structures which would impede or redirect flood flows?	☐	☐	☐	☒

VIII. HYDROLOGY AND WATER QUALITY **Would the project:**	Potentially Significant Impact	Less Than Significant With Mitigation Incorporated	Less Than Significant Impact	No Impact
i) Expose people or structures to a significant risk of loss, injury or death involving flooding, including flooding as a result of the failure of a levee or dam?	☐	☐	☒	☐
j) Inundation by seiche, tsunami, or mudflow?	☐	☐	☐	☒

(Sources: "Preliminary Drainage Study for Prairie Schooner in the City of Palm Springs, CA," Walden & Associates, December 2014; "Preliminary Water Quality Management Plan for Aberdeen Residential," Walden & Associates, January 19, 2015; "City of Palm Springs Local Hazard Mitigation Plan," August 2012; Figure 6-5, Palm Springs General Plan, 2007; Flood Insurance Rate Map #06065C1558G, Federal Emergency Management Agency, August 28, 2008.)

Discussion of Impacts

A project-specific Preliminary Drainage Study and Preliminary Water Quality Management Plan was prepared for the project ("Preliminary Drainage Study for Prairie Schooner in the City of Palm Springs, CA," Walden & Associates, December 2014 and Preliminary Water Quality Management Plan for Aberdeen Residential," Walden & Associates, January 19, 2015).

a) **Less Than Significant Impact.** The proposed project will comply with all applicable local, State, and federal water quality standards and wastewater discharge requirements. The project will be connected to existing water and sewer lines, and wastewater will be transported to and processed at the City's Wastewater Treatment Plant (WTP). The WTP complies with the requirements of the Regional Water Quality Control Board pertaining to water quality standards and waste discharge. Project-generated runoff will be collected by a private storm drain system and retained with a proposed underground retention system.

The City will require compliance with the National Pollutant Discharge Elimination System (NPDES). The project-specific Preliminary Water Quality Management Plan (WQMP) identifies a wide range of Best Management Practices (BMPs) that will be incorporated into the project to minimize the pollutant load associated with urban runoff and assure the project complies with the requirements of the City and Regional Water Quality Control Board. As a result of these measures, the impacts associated with water quality will be less than significant.

b) **Less Than Significant Impact.** The proposed project will increase the demand for water supplies and services, but will not substantially deplete water supplies or interfere with groundwater recharge. In the short-term, water will be required for site grading. At buildout, the project will include dwelling units, live/work units, a commercial site, two swimming pools, and a spa that will require water supplies and services. The project will connect to existing water lines, and no new wells or additional off-site water infrastructure are proposed.

The Desert Water Agency (DWA) provides domestic water to the project area. Its primary source of water is groundwater extracted by deep wells, which is replenished with Colorado River water. A lesser amount of water comes from regional mountain streams. DWA is a participant in the Coachella Valley Regional Water Management Group that prepared an Integrated Regional Water Management Plan (draft WMP, November 2013). The WMP indicates that long-term regional demand for potable water is expected to increase; however, with continued conservation measures and replenishment of groundwater, sufficient supplies will be available to meet demand. The proposed project will be required to comply with DWA's and the City's water-efficiency requirements, including the use of drought-tolerant planting landscape materials and limited irrigation for landscaping. Implementation of City and DWA conservation requirements will assure that project-related impacts to water supplies will be less than significant.

c-e) **Less Than Significant Impact.** The project is not expected to result in erosion, siltation, or flooding on or off-site, or generate runoff that exceeds the capacity of planned or existing drainage facilities. The subject property is relatively flat and fully developed with office buildings and paved parking lots. No streams or rivers are located onsite. Project features will include asphalt/concrete pavement, hardscape, and landscape. The project proposes a system of onsite storm drains and pipes which will be connected to existing public storm drain facilities located in Calle El Segundo. No vehicle maintenance, repair, washing or cleaning facilities are proposed.

The project drainage study evaluated existing and post-construction stormwater generation for various storm events and durations. It determined that stormwater flows from the proposed project will be less than existing flows generated onsite. Specifically, existing onsite development generates a volume of 3.56 acre-feet during a 24-hour duration 100-year flood, whereas the proposed project would generate a volume of 2.22 acre-feet. This represents a reduction of 1.34 acre-feet (37%) over existing conditions. The WQMP determined also that the project's post-development runoff flow rate, volume, velocity, and duration will be less than existing conditions for the 2-year 24-hour and 10-year 24-hour rainfall events. Best Management Practices will be incorporated into the site design, including minimizing impervious surfaces and footprints and minimizing areas directly connected to impervious surfaces.

f) **No Impact.** As described in VIII.a, above, the project will be required to comply with all applicable water quality standards. It will incorporate a subsurface storm drain system and a range of Best Management Practices (BMPs) to minimize potential water quality degradation. All project components will be required to comply with City standards for the preservation of groundwater quality. No other water quality issues are expected to result from implementation of the proposed project.

g-h) **No Impact.** The subject property is not located in the 100-year floodplain. The northerly portion of the site is designated "Zone X," which represents "areas determined to be outside the 0.2% annual chance floodplain." The southerly portion of the site is designated "Zone X: Other Flood Areas," which represents "areas of 0.2% annual chance flood; areas of 1% annual chance flood with average depths of less than 1 foot or with drainage areas less than 1 square mile; and areas protected by levees from 1% annual chance flood."

i) **Less Than Significant Impact.** The project site is within the Dam Failure Inundation Pathway of the Tachevah Creek Detention Reservoir. The reservoir is located

approximately 1,200 feet downstream from the mouth of Tachevah Canyon in the San Jacinto Mountains west of the project site. It controls storm runoff and debris from a 3.2 square mile drainage area and protects the central part of the City from flooding. It is required by the California State Water Code to be monitored for structural safety. Potential risks and planned responses are addressed in the Palm Springs Local Hazard Mitigation Plan. Impacts to the subject property will be less than significant.

j) **No Impact.** No other hazards associated with sieche, tsunami, or mudflow will occur onsite. The site is not located in the vicinity of any other bodies of water which could be subject to seiche. Given its distance from the Pacific Ocean, the property is not subject to tsunamis.

IX. LAND USE AND PLANNING Would the project:	Potentially Significant Impact	Less Than Significant With Mitigation Incorporated	Less Than Significant Impact	No Impact
a) Physically divide an established community?	☐	☐	☐	☒
b) Conflict with any applicable land use plan, policy, or regulation of an agency with jurisdiction over the project (including, but not limited to the general plan, specific plan, local coastal program, or zoning ordinance) adopted for the purpose of avoiding or mitigating an environmental effect?	☐	☐	☐	☒
c) Conflict with any applicable habitat conservation plan or natural community conservation plan?	☐	☐	☐	☒

(Source: Section 14 Specific Plan, City of Palm Springs, July 2014; Palm Springs General Plan 2007)

Setting

The project site is governed by the policies and land use designations of the Section 14 Master Plan. The project site is designated Retail/Entertainment/Office (REO) and Resort Attraction (RA) on the Section 14 Master Plan land use map.

The City of Palm Springs participates in the Coachella Valley Multiple Species Habitat Conservation Plan (CVMSHCP) and the Agua Caliente Tribal Habitat Conservation Plan, as discussed above under Biological Resources.

Discussion of Impacts

a) ***No Impact.*** The project site is fully developed in office and parking lot land uses. A self-contained condominium community occurs immediately north of the project site. The development of the proposed project will not divide that community. No impacts are expected.

b) ***No Impact.*** The REO and RA designations in the Section 14 Master Plan allow multi-family residential and live-work developments. In the REO and RA designations, the multi-family land use will require approval of a conditional use permit. The live-work units will require approval of a land use permit for the REO designation, and a conditional use permit for the RA designation. The project will be required to adhere to Section 14 development standards and requirements. The proposed project is therefore consistent with the Master Plan. There will be no impact to land use plans as a result of the proposed project.

c) ***No Impact.*** As described in Section IV, Biological Resources, the City of Palm Springs participates in the Coachella Valley Multiple Species Habitat Conservation Plan (CVMSHCP) and the Agua Caliente Tribal Habitat Conservation Plan. The property is within the boundaries of the both Plans, and therefore, the project proponent will be required to pay a mitigation fee as mitigation for any potential impacts to sensitive biological species. The proposed project will not conflict with the provisions of either Plan.

X. MINERAL RESOURCES **Would the project:**	Potentially Significant Impact	Less Than Significant With Mitigation Incorporated	Less Than Significant Impact	No Impact
a) Result in the loss of availability of a known mineral resource that would be of value to the region and the residents of the state?	☐	☐	☐	☒
b) Result in the loss of availability of a locally important mineral resource recovery site delineated on a local general plan, specific plan or other land use plan?	☐	☐	☐	☒

(Sources: Palms Springs General Plan 2007)

Discussion of Impacts

a,b) **No Impact.** As shown in the Mineral Land Classification Map for the project area, the project site is located in Mineral Zone MRZ-3, which indicates an area containing mineral deposits; however the significance of these deposits cannot be evaluated from available data. The project site occurs in an urban setting and is not designated for mineral resource land uses. The proposed project would result in no impacts to mineral resources.

XI. NOISE Would the project result in:	Potentially Significant Impact	Less Than Significant With Mitigation Incorporated	Less Than Significant Impact	No Impact
a) Exposure of persons to or generation of noise levels in excess of standards established in the local general plan or noise ordinance, or applicable standards of other agencies?	☐	☐	☒	☐
b) Exposure of persons to or generation of excessive groundborne vibration or groundborne noise levels?	☐	☐	☒	☐
c) A substantial permanent increase in ambient noise levels in the project vicinity above levels existing without the project?	☐	☐	☒	☐
d) A substantial temporary or periodic increase in ambient noise levels in the project vicinity above levels existing without the project?	☐	☒	☐	☐
e) For a project located within an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport, would the project expose people residing or working in the project area to excessive noise levels?	☐	☐	☐	☒
f) For a project within the vicinity of a private airstrip, would the project expose people residing or working in the project area to excessive noise levels?	☐	☐	☐	☒

(Sources: Palm Springs General Plan 2007)

Discussion of Impacts

a) **Less than Significant Impact.** The main source of off-site exterior noise impacting the project will be generated from traffic along surrounding roadways, including Tahquitz Canyon Way, Calle El Segundo, Calle Alvarado, and Andreas Road. According to the General Plan (Exhibit 8-5), future noise levels along project specific portions of these roadways are projected to range from 65-70 CNEL.

Development of the site will also result in short term impacts associated with construction noise. These impacts are temporary and will cease when in operation. Construction noise is regulated by the Municipal Code and required to occur during the noisier daytime hours, which helps to lower the potential impacts.

Permanent increases in ambient noise levels will be less than significant during long-term operation of the project. The City will require compliance with Building Code standards

for interior noise levels, including the preparation of noise analyses to demonstrate that interior noise levels will meet these requirements.

Noise levels generated by project activities will be consistent with a medium-density residential neighborhood and commercial/retail facility, and permanent noise sources will be limited to typical household appliances, landscape maintenance equipment, and vehicles accessing the property. Long-term noise impacts are expected to be less than significant.

b) **Less than Significant Impact.** Temporary and periodic ground borne vibration may occur during demolition and construction of the project, particularly as heavy equipment grades the site, but these will cease once in operation. In addition, the proposed project will be required to comply with construction hours provided in the Municipal Code. Construction hours are limited to the less sensitive daytime hours, further reducing potential impacts associated with groundborne noise and vibration. Impacts are therefore expected to be less than significant.

c) **Less than Significant Impact.** The proposed project's contribution to area noise levels will primarily be from vehicles on area roadways. As described above, noise levels in the area of the proposed project in the long term will range from 65 to 70 dBA CNEL with or without the project. Permanent increases in ambient noise levels will be less than significant during operation of the project. The City will require compliance with Building Code standards for interior noise levels, including the preparation of noise analyses to demonstrate that interior noise levels will meet City requirements. Noise levels generated by project activities will be consistent with the surrounding residential and commercial/retail uses, and permanent noise sources will be limited to typical household appliances, landscape maintenance equipment, and vehicles accessing the property. Long-term noise impacts are expected to be less than significant.

d) **Less than Significant Impact with Mitigation.** Demolition of existing structures and construction of the proposed project will result in elevated noise levels. The peak noise level for most of the equipment that would be used during construction on the project site ranges from 70 to 95 dBA at a distance of 50 feet. The construction activities on the project site will cause temporary increases in noise levels above the City's standards, but these increases will be temporary and periodic. Construction noise is regulated by the Municipal Code to occur during the noisier day time hours, which helps to lower the potential impacts.

Should heavy equipment be stored or maintained along the northern boundary of the proposed project site, however, the noise levels could potentially be sustained, which would result in a potentially significant impact, which requires mitigation.

Mitigation Measures

MM XI-1 Demolition and construction activities on-site shall occur only between 7:00 a.m. and 7:00 p.m., Monday-Friday, and 8:00 a.m. and 5:00 p.m. on Saturdays, and shall be prohibited on Sundays and holidays, as specified by the Palm Springs Municipal Code.

MM XI-2. All construction equipment, fixed or mobile, shall be equipped with properly operating and maintained mufflers and the engines shall be equipped with shrouds.

MM XI-3. Stationary equipment shall be placed such that emitted noise is directed away from Andreas Road and Calle El Segundo.

MM XI-4. Stockpiling and vehicle staging areas shall be located as far as practical from Andreas Road and Calle El Segundo.

MM XI-5. Delivery hours should be limited to 7 a.m. to 7 p.m. daily to minimize the potential for adverse impacts on the adjacent Plaza Villas.

e,f) **No Impact.** The proposed project is not located within noise contour boundaries of the Palm Springs International Airport (Figure 8-6 General Plan) and therefore will not expose future residents to excessive airport related noise levels. There are no private airstrips in Palm Springs so the project will not expose people living or working in the area to excessive noise levels.

XII. POPULATION AND HOUSING Would the project:	Potentially Significant Impact	Less Than Significant With Mitigation Incorporated	Less Than Significant Impact	No Impact
a) Induce substantial population growth in an area, either directly (for example, by proposing new homes and businesses) or indirectly (for example, through extension of roads or other infrastructure)?	☐	☐	☒	☐
b) Displace substantial numbers of existing housing, necessitating the construction of replacement housing elsewhere?	☐	☐	☐	☒
c) Displace substantial numbers of people, necessitating the construction of replacement housing elsewhere?	☐	☐	☐	☒

(Source: Palm Springs General Plan 2007; CA Department of Finance Table E-5 Population and Housing Estimates, May 1, 2014)

Discussion of Impacts

a) ***Less Than Significant Impact.*** The project will not induce substantial population growth, either directly or indirectly. The project proposes the development of 74 multi-family dwelling units and 17 live-work units. Based on the City's average household size of 1.98 persons (2014 CA Department of Finance), the project will have a population of approximately 180 residents at buildout. This represents less than one percent of the City's total population (46,135 persons, 2014 CA Department of Finance). Further, the project will be required to comply with the City's adopted policies and procedures regarding Community Facility Districts for development projects, as required by City Council Resolution 20304. This increase in population can be expected to be consistent with natural growth in the City, and will not induce growth either directly or indirectly.

No major infrastructure extensions will be required. Access will be taken from existing roads (Andreas Road, Calle El Segundo, and Calle Alvarado), and the project will connect to existing utility infrastructure located immediately adjacent to the project site.

b-c) ***No Impact.*** The subject property is currently occupied by office space and a parking lot, and no demolition of existing housing will occur. No residents will be displaced, and no replacement housing will be required elsewhere.

XIII. PUBLIC SERVICES **Would the project result in:**	Potentially Significant Impact	Less Than Significant With Mitigation Incorporated	Less Than Significant Impact	No Impact
Substantial adverse physical impacts associated with the provision of new or physically altered governmental facilities, need for new or physically altered governmental facilities, the construction of which could cause significant environmental impacts, in order to maintain acceptable service ratios, response times or other performance objectives for any of the public services:				
a) Fire protection?	☐	☐	☒	☐
b) Police protection?	☐	☐	☒	☐
c) Schools?	☐	☐	☒	☐
d) Parks?	☐	☐	☒	☐
e) Other public facilities?	☐	☐	☒	☐

(Sources: Palm Springs Fire Department; "Palm Springs Fire Department Service Report, 2013": Tables 5-1 and 5-3, Palm Springs General Plan, 2007; "Palm Springs Parks and Recreation Master Plan Draft," March 2014.)

Discussion of Impacts

a-e) Less Than Significant Impact. The proposed project will generate an estimated buildout population of approximately 180 residents, which represents an increase of 0.04% to the City population (46,134 persons in 2014). The project will increase the demand for public services. However, given the relatively limited population increase, impacts will not be substantial. No new or expanded public facilities will be required as a result of the project.

Fire Protection

The Palm Springs Fire Department will provide fire protection services to the proposed project. The nearest fire station to the subject property is Station 1 (441) at 277 N. Indian Canyon Drive, approximately 1/3 mile to the northwest. It is equipped with one engine staffed with 3 personnel per shift, and one reserve ladder truck and one quick attack truck which are staffed as needed. Fire personnel will be able to reach the site within the target five-minute response time. Project plans will be reviewed by the Fire Department to ensure they meet applicable fire standards and regulations.

Police Protection

The Palm Springs Police Department provides law enforcement services within the City limits. The Department is located at 200 S. Civic Drive, approximately ½ mile east of the project site. It is authorized to have 92 sworn officers and strives to meet a 5-minute

emergency response time. Police will be able to access the project, and the project will be required to comply with all Police Department regulations and procedures.

Schools

The Palm Springs Unified School District (PSUSD) provides public school services and facilities in the project area. The nearest schools to the project site are Palm Springs High School at 2401 E. Baristo Road, and Ramon Alternative Center at 2248 E. Ramon Road, both of which are approximately one mile to the southeast. Given the relatively limited population anticipated at buildout, the number of students generated by the project is not expected to result in the need for additional schools or facilities. The project will be required to pay State-mandated school fees to mitigate impacts to public schools.

Parks

The City currently has approximately 160 acres of developed park land, 305 acres of golf courses, and over 2,630 acres of city-owned open space lands. The project will increase the use of these facilities; however, given the relatively limited population anticipated at project buildout, the increase is not expected to be substantial or result in the need for new or expanded facilities. The project proposes 2 swimming pools, a spa, and an exercise gym, which will provide onsite recreational opportunities for community residents.

The City implements Quimby Act requirements for parklands. The proposed project will be subject to the Quimby Act, including payment of fees and/or providing parkland as required. Payment of such fees will reduce impacts to parks to less than significant levels.

Other Public Facilities

The project will be accessed from existing roads (E. Andreas Road, Calle Alvarado, and Calle Segundo) and will connect to existing utility infrastructure. No new public roads or public transportation facilities will be required.

XIV. RECREATION Would the project:	Potentially Significant Impact	Less Than Significant With Mitigation Incorporated	Less Than Significant Impact	No Impact
a) Increase the use of existing neighborhood and regional parks or other recreational facilities such that substantial physical deterioration of the facility would occur or be accelerated?	☐	☐	☒	☐
b) Does the project include recreational facilities or require the construction or expansion of recreational facilities, which might have an adverse physical effect on the environment?	☐	☐	☒	☐

Discussion of Impacts

a-b) Less Than Significant Impact. At buildout, the proposed project will include an estimated population of 180 residents. Increased usage of local and regional parks and recreational facilities is anticipated; however, it is not expected to cause substantial deterioration of existing facilities or the need for new or expanded facilities. Residents will have the opportunity to use proposed onsite recreational facilities, including two swimming pools, a spa, and a gym/fitness center.

To offset potential impacts to public parks and recreational facilities, the project will be required to pay City parkland impact fees.

XV. TRANSPORTATION/TRAFFIC **Would the project:**	Potentially Significant Impact	Less Than Significant With Mitigation Incorporated	Less Than Significant Impact	No Impact
a) Cause an increase in traffic which is substantial in relation to the existing traffic load and capacity of the street system (i.e., result in a substantial increase in either the number of vehicle trips, the volume to capacity ratio on roads, or congestion at intersections)?	☐	☐	☒	☐
b) Exceed, either individually or cumulatively, a level of service standard established by the county congestion management agency for designated roads or highways?	☐	☐	☒	☐
c) Result in a change in air traffic patterns, including either an increase in traffic levels or a change in location that results in substantial safety risks?	☐	☐	☐	☒
d) Substantially increase hazards due to a design feature (e.g., sharp curves or dangerous intersections) or incompatible uses (e.g., farm equipment)?	☐	☐	☐	☒
e) Result in inadequate emergency access?	☐	☐	☐	☒
f) Conflict with adopted policies, plans, or programs regarding public transit, bicycle, or pedestrian facilities, or otherwise decrease the performance or safety of such facilities?	☐	☐	☐	☒

(Sources: "Hard Rock Hotel – Palm Springs Traffic Impact Study," prepared by Endo Engineering, July 2007; "Aberdeen Mixed-Use Development Trip Generation," Prepared by Endo Engineering, January 20, 2015.)

Setting

The proposed project is located in the City's urban core and is surrounded by existing streets, including Tahquitz Canyon Way, Calle El Segundo, and Andreas Road. The proposed project includes a primary access drive on Andreas Road, and a secondary access point from Calle El Segundo.

Project access from Calle Alvarado is yet to be determined. The final design for Calle Alvarado is yet to be approved by the City Engineer and may be improved to accommodate two-way traffic, one-way traffic or a pedestrian paseo with emergency vehicle access only. The Section 14 Specific Plan allows all three alternatives. According to the City Engineer, fair-share payment or installation of a traffic signal at the Tahquitz Canyon Way / Calle Alvarado intersection may be required.

A traffic impact study was prepared for the previously proposed project[1] in 2007, The Hard Rock Hotel. A Traffic Letter was prepared in January 2015 to provide further analysis and supplemental trip generation information for the proposed Aberdeen mixed-use development. The analysis and results of the study are the basis of the discussion below.

Discussion of Impacts

a-b) ***Less than Significant Impact.*** The original traffic analysis (2007) studied seven area intersections, 5 of which are currently unsignalized, and two of which are currently signalized, including:

Calle El Segundo/Amado Road (4 way stop)
Avenida Caballeros/Amado Road (4 way stop)
Calle El Segundo/Andreas Road (4 way stop)
Calle Alvarado/Amado Road (2 way stop)
Calle Alvarado/Tahquitz Canyon Way (2 way stop)
Calle El Segundo/Tahquitz Canyon Way (signalized)
Avenida Caballeros/Tahquitz Canyon Way (signalized)

The 2007 analysis found that all intersections, both signalized and unsignalized, operated at Level of Service C (LOS C) or better during both the mid-day and evening peak hours in 2007, and the previously proposed buildout year of 2009. Although the 2007 study found that opening year traffic operations with the addition of the proposed project will result in acceptable levels of service, the long term traffic impacts of the proposed project, cumulative projects and ambient traffic growth will result in a long term need for improvements, in order to assure that levels of service on local streets remain at acceptable levels.

The 2015 Traffic Letter provided updated trip generation information to compare traffic impacts associated with the previously approved the Hard Rock Hotel, the proposed Aberdeen mixed-use development, and four (4) other development scenarios. The trip generation summary is provided in Table XV-1.

Table XV-1
Trip Generation Summary

Development Scenario	Land Use Quantity	Midday Peak Hour (Total)	PM Peak Hour (Total)	Daily 2-Way
Existing Land Uses	Offices	161	190	1,550
Approved Hard Rock Hotel Traffic Study	Hotel 482 Rooms	322	402	5,070
Initial Study/Mitigated Negative Declaration	Hotel 499 Rooms	324	495	6,030
Section 14 Specific Plan Maximum Permitted	5.7 Ac. RA, 3.4 AC. REO	576	686	7,660
Max. Residential Alt.	273 DU	116	137	1,540
Aberdeen Mixed-Use Development	91 DU, 8,334 SF Commercial	121	108	1,070

Source: "Aberdeen Mixed-Use Development Trip Generation," Prepared by Endo Engineering, January 20, 2015.

[1] "Hard Rock Hotel – Palm Springs Traffic Impact Study," prepared by Endo Engineering, July 2007.

As shown in the summary table above, the proposed Aberdeen development would result in substantially fewer trips than the Hard Rock Hotel. The Aberdeen Mixed-Use Development would result in the lowest future trip generation of the scenarios evaluated and less than that of the existing land uses on days when the convention center parking fully utilizes the parking lot on the project site. Therefore, the proposed project is expected to have less than significant impacts on traffic flows and Level of Service ratings.

c) ***No Impact.*** The project will have no impact on the facilities or operations of regional airports, and will not result in a change in air traffic patterns, including an increase in traffic levels. The project is located more than 1½ miles west of the Palm Springs International Airport. The proposed development will not affect the operations of these airports nor create a substantial safety risks.

d) **No *Impact.*** The project will be developed in accordance with City design guidelines and will not create a substantial increase in hazards due to a design feature. The project's access point will be located with adequate sight distances, and sharp curves have been avoided. Project-generated traffic will be consistent with existing traffic in the area.

e) **No *Impact.*** Access to the planning area is via major arterials, secondary arterials, Interstate-10 and a variety of local roads. Emergency access will be provided and preserved onsite. Both the Fire Department and Police Department will review project plans to ensure safety measures are addressed, including emergency access. The proposed project will not result in inadequate emergency access.

f) ***No Impact.*** SunLine Transit operates bus routes on Tahquitz Canyon Drive and will provide public transit access to the proposed project. SunLine has adequate capacity in its system to accommodate the proposed project. The project design will not conflict with adopted policies, plans, or programs regarding public transit, bicycle, or pedestrian facilities, or otherwise decrease the performance or safety of such facilities.

XVI. UTILITIES AND SERVICE SYSTEMS Would the project:	Potentially Significant Impact	Less Than Significant With Mitigation Incorporated	Less Than Significant Impact	No Impact
a) Exceed wastewater treatment requirements of the applicable Regional Water Quality Control Board?	☐	☐	☒	☐
b) Require or result in the construction of new water or wastewater treatment facilities or expansion of existing facilities, the construction of which could cause significant environmental effects?	☐	☐	☒	☐
c) Require or result in the construction of new storm water drainage facilities or expansion of existing facilities, the construction of which could cause significant environmental effects?	☐	☐	☒	☐
d) Have sufficient water supplies available to serve the project from existing entitlements and resources, or are new or expanded entitlements needed?	☐	☐	☒	☐
e) Result in a determination by the wastewater treatment provider which serves or may serve the project that it has adequate capacity to serve the project's projected demand in addition to the provider's existing commitments?	☐	☐	☒	☐
f) Be served by a landfill with sufficient permitted capacity to accommodate the project's solid waste disposal needs?	☐	☐	☒	☐
g) Comply with federal, state, and local statutes and regulations related to solid waste?	☐	☐	☒	☐

Discussion of Impacts

a-e) Less Than Significant Impact.

Wastewater Treatment

The project will require construction of onsite sewer infrastructure that will be connected to existing sewer lines, and wastewater will be transported to the City's Wastewater Treatment Plant (WTP). The WTP has a capacity of 10.9 million gallons per day (mgd) and treats approximately 6 mgd; therefore, it has available capacity to serve new development.

The WTP implements all applicable requirements of the Colorado River Basin Regional Water Quality Control Board, and no exceedances of wastewater treatment requirements are anticipated. Project-related impacts to wastewater facilities will be less than significant.

Domestic Water

Desert Water Agency (DWA) provides domestic water services to the subject property and vicinity. In 2013, the Coachella Valley Regional Water Management Group, of which DWA is a part, prepared a draft Integrated Regional Water Management Plan (IRWMP), an analysis and long-range plan addressing the region's domestic water needs and supplies. The IRWMP indicates that long-term demand for potable water is expected to increase throughout the region; however, conservation measures and groundwater replenishment programs will make it possible to meet increasing demand.

The proposed project will include construction of onsite domestic water lines that serve dwelling units, the commercial site, community pools and spa, and irrigation systems. These improvements will connect to existing DWA water lines. No new wells or additional water infrastructure or entitlements will be required. Construction will occur in accordance with DWA and City requirements. Impacts are expected to be less than significant.

Stormwater Management

Project-related impacts to stormwater management facilities will be less than significant. The project proposes construction of an onsite subsurface storm drain system to capture and convey onsite stormwater flows, which will connect to existing storm drains beneath Calle el Segundo. The project-specific drainage study evaluated existing and post-construction stormwater generation for various storm events and durations. It determined that stormwater flows from the proposed project will be less than existing flows generated onsite.

f-g) **Less Than Significant Impact.** Palm Springs Disposal Services (PSDS) provides solid waste collection and disposal services to the City and will serve the proposed project. Solid waste is transported to Edom Hill Transfer Station in northern Cathedral City and disposed at several regional landfills, including Lamb Canyon in Beaumont, El Sobrante in Corona, and Badlands in Moreno Valley. Each of these landfills has sufficient available capacity to serve the project. Facility operators, including PSDS, Burrtec, and Riverside County, are required to meet all local, regional, state, and federal standards for solid waste disposal. Onsite source reduction and recycling programs will contribute to additional solid waste reductions. Impacts will be less than significant.

XVII. MANDATORY FINDINGS OF SIGNIFICANCE

NOTE: If there are significant environmental impacts which cannot be mitigated and no feasible project alternatives are available, then complete the mandatory findings of significance and attach to this initial study as an appendix. This is the first step for starting the environmental impact report (EIR) process.

Does the project:	Potentially Significant Impact	Less Than Significant With Mitigation Incorporated	Less Than Significant Impact	No Impact
a) Have the potential to degrade the quality of the environment, substantially reduce the habitat of a fish or wildlife species, cause a fish or wildlife population to drop below self-sustaining levels, threaten to eliminate a plant or animal community, reduce the number or restrict the range of a rare or endangered plant or animal or eliminate important examples of the major periods of California history or prehistory?	☐	☒	☐	☐
b) Have impacts that are individually limited, but cumulatively considerable? ("Cumulatively considerable" means that the incremental effects of a project are considerable when viewed in connection with the effects of past projects, the effects of other current projects, and the effects of probable future projects)?	☐	☐	☒	☐
c) Have environmental effects which will cause substantial adverse effects on human beings, either directly or indirectly?	☐	☐	☒	☐

a) Impacts associated with biological resources are considered negligible and mitigation measures are not required. Impacts associated with Cultural resources have been identified in this Initial Study and mitigated to less than significant levels (See Section V).

b) Development of the Aberdeen project is consistent with the General Plan and Section 14 Specific Plan and will not have any additional cumulatively considerable impacts beyond build out of the General Plan.

c) The project's potential environmental effects have been mitigated to a less than significant level by the measures outlined in the Initial Study and development requirements of the City of Palm Springs. Further, the proposed the project will not cause substantial adverse effects on human beings, as all potential impacts have been mitigated.

NOTICE OF PUBLIC HEARING
PLANNING COMMISSION
CITY OF PALM SPRINGS

CASE 5.1361 PDD 375 / 3.3820-MAJ & TTM 36876
O & M HR, LLC / NEXUS DEVELOPMENT CORP. FOR "ABERDEEN"
8.05-ACRES AT NORTHEAST CORNER OF TAHQUITZ CANYON WAY AND CALLE EL SEGUNDO

NOTICE IS HEREBY GIVEN that the Planning Commission of the City of Palm Springs, California, will hold a public hearing at its meeting of March 25, 2015. The Planning Commission meeting begins at 1:30 p.m., in the Council Chamber at City Hall, 3200 East Tahquitz Canyon Way, Palm Springs.

The purpose of this hearing is to consider a proposal to demolish existing buildings and parking areas for the construction of a mixed-use project consisting of 74 attached and detached residential dwellings, 17 live-work units, and approximately 1,568 square feet of commercial-retail space on approximately 8.05-acres located at the northeast corner of Tahquitz Canyon Way and Calle El Segundo, zones REO and CU. The applications include a PDD in lieu of zone change (Case 5.1361 PDD 375) to establish the project site plan, permitted uses and development standards; Major Architectural Application (Case 3.3820 MAJ) to review proposed architectural designs; and Tentative Tract Map (TTM 36876) to subdivide approximately 8.05-acres into 93 lots with common area streets and open space.

ENVIRONMENTAL DETERMINATION: An Initial Study was prepared for the project and it determined that the project would have less than significant impact with the incorporation of mitigation measures. Members of the public may view this document at the Planning Services Department, City Hall, 3200 East Tahquitz Canyon Way, Palm Springs.

REVIEW OF PROJECT INFORMATION: The staff report and other supporting documents regarding this project are also available for public review at City Hall between the hours of 8:00 a.m. and 6:00 p.m., Monday through Thursday. Please contact the Office of the City Clerk at (760) 323-8204 if you would like to schedule an appointment to review these documents.

COMMENT ON THIS APPLICATION: Response to this notice may be made verbally at the Public Hearing and/or in writing before the hearing. Written comments may be made to the Planning Commission by letter (for mail or hand delivery) to:

James Thompson, City Clerk
3200 E. Tahquitz Canyon Way
Palm Springs, CA 92262

Any challenge of the proposed project in court may be limited to raising only those issues raised at the public hearing described in this notice, or in written correspondence delivered to the City Clerk at, or prior, to the public hearing. (Government Code Section 65009[b][2]).

An opportunity will be given at said hearing for all interested persons to be heard. Questions regarding this case may be directed to David Newell, Associate Planner, at (760) 323-8245.

Si necesita ayuda con esta carta, porfavor llame a la Ciudad de Palm Springs y puede hablar con Felipe Primera telefono (760) 323-8253.

NOTICE OF PUBLIC HEARING
PLANNING COMMISSION
CITY OF PALM SPRINGS

CASE: 5.1361 PDD 375 / 3.3820-MAJ & TTM 36876
O & M HR, LLC / NEXUS DEVELOPMENT CORP. FOR "ABERDEEN"
8.05-ACRES AT NORTHEAST CORNER OF TAHQUITZ CANYON WAY AND CALLE EL SEGUNDO

NOTICE IS HEREBY GIVEN that the Planning Commission of the City of Palm Springs, California, will hold a public hearing at its meeting of February 25, 2015. The Planning Commission meeting begins at 1:30 p.m., in the Council Chamber at City Hall, 3200 East Tahquitz Canyon Way, Palm Springs.

The purpose of this hearing is to consider a proposal to demolish existing buildings and parking areas for the construction of a mixed-use project consisting of seventy-four (74) attached and detached residential dwellings, seventeen (17) live-work units and approximately 1,568 square feet of commercial-retail space on approximately 8.05-acres located at the northeast corner of Tahquitz Canyon Way and Calle El Segundo, zone REO and CU. The applications include a PDD in lieu of zone change (Case 5.1361 PDD 375) to establish the project site plan, permitted uses and development standards; Major Architectural Application (Case 3.3820 MAJ) to review proposed architectural designs; and Tentative Tract Map (Case TTM 36876) to subdivide approximately 8.05-acres into ninety-three (93) lots with common area streets and open space.

ENVIRONMENTAL DETERMINATION: An Initial Study was prepared for the project and it determined that the project would have less than significant impact with the incorporation of mitigation measures. Members of the public may view this document at the Planning Services Department, City Hall, 3200 East Tahquitz Canyon Way, Palm Springs, and submit written comments at, or prior to, the Commission hearing.

REVIEW OF PROJECT INFORMATION: The staff report and other supporting documents regarding this project are also available for public review at City Hall between the hours of 8:00 a.m. and 6:00 p.m. Monday through Thursday. Please contact the Office of the City Clerk at (760) 323-8204 if you would like to schedule an appointment to review these documents.

COMMENT ON THIS APPLICATION: Response to this notice may be made verbally at the Public Hearing and/or in writing before the hearing. Written comments may be made to the Planning Commission by letter (for mail or hand delivery) to:

James Thompson, City Clerk
3200 E. Tahquitz Canyon Way
Palm Springs, CA 92262

Any challenge of the proposed project in court may be limited to raising only those issues raised at the public hearing described in this notice, or in written correspondence delivered to the City Clerk at, or prior to, the public hearing. (Government Code Section 65009[b][2]).

An opportunity will be given at said hearing for all interested persons to be heard. Questions regarding this case may be directed to David Newell, Associate Planner, at (760) 323-8245.

Si necesita ayuda con esta carta, porfavor llame a la Ciudad de Palm Springs y puede hablar con Felipe Primera telefono (760) 323-8253.

CITY OF PALM SPRINGS

CASE NO: 5.1361 PD-375, ZC, 3.3820 MAJ and TTM 36876

APPLICANT: O & M HR, LLC

DESCRIPTION: A proposal to demolish an existing development and parking lot to construct "Aberdeen"; a mixed-use project consisting of (74) attached and detached residential dwellings, (17) live-work units and approximately 1,568 square feet of retail on 8.05-acres at the northeast corner of Tahquitz Canyon Way and Calle El Segundo, Zone REO and CU.

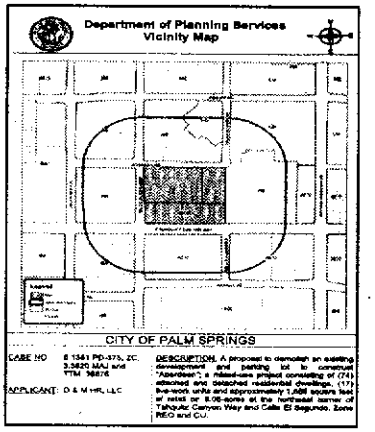
No 0211

NOTICE OF PUBLIC HEARING
PLANNING COMMISSION
CITY OF PALM SPRINGS

CASE: 5.1361 PDD 375 / 3.3820-MAJ & TTM 36876
O & M HR, LLC / NEXUS DEVELOPMENT CORP. FOR "ABERDEEN"
8.05-ACRES AT NORTHEAST CORNER OF TAHQUITZ CANYON WAY AND CALLE EL SEGUNDO

NOTICE IS HEREBY GIVEN that the Planning Commission of the City of Palm Springs, California, will hold a public hearing at its meeting of February 25, 2015. The Planning Commission meeting begins at 1:30 p.m., in the Council Chamber at City Hall, 3200 East Tahquitz Canyon Way, Palm Springs.

The purpose of this hearing is to consider a proposal to demolish existing buildings and parking areas for the construction of a mixed-use project consisting of seventy-four (74) attached and detached residential dwellings, seventeen (17) live-work units and approximately 1,568 square feet of commercial-retail space on approximately 8.05-acres located at the northeast corner of Tahquitz Canyon Way and Calle El Segundo, zone REO and CU. The applications include a PDD in lieu of zone change (Case 5.1361 PDD 375) to establish the project site plan, permitted uses and development standards; Major Architectural Application (Case 3.3820 MAJ) to review proposed architectural designs; and Tentative Tract Map (Case TTM 36876) to subdivide approximately 8.05-acres into ninety-three (93) lots with common area streets and open space.



ENVIRONMENTAL DETERMINATION: An Initial Study was prepared for the project and it determined that the project would have less than significant impact with the incorporation of mitigation measures. Members of the public may view this document at the Planning Services Department, City Hall, 3200 East Tahquitz Canyon Way, Palm Springs, and submit written comments at, or prior to, the Commission hearing.

REVIEW OF PROJECT INFORMATION: The staff report and other supporting documents regarding this project are also available for public review at City Hall between the hours of 8:00 a.m. and 8:00 p.m. Monday through Thursday. Please contact the Office of the City Clerk at (760) 323-8204 if you would like to schedule an appointment to review these documents.

COMMENT ON THIS APPLICATION: Response to this notice may be made verbally at the Public Hearing and/or in writing before the hearing. Written comments may be made to the Planning Commission by letter (for mail or hand delivery) to:

James Thompson, City Clerk
3200 E. Tahquitz Canyon Way
Palm Springs, CA 92262

Any challenge of the proposed project in court may be limited to raising only those issues raised at the public hearing described in this notice, or in written correspondence delivered to the City Clerk at, or prior to, the public hearing. (Government Code Section 65009[b][2]).

An opportunity will be given at said hearing for all interested persons to be heard. Questions regarding this case may be directed to David Newell, Associate Planner, at (760) 323-8245.

Si necesita ayuda con esta carta, porfavor llame a la Ciudad de Palm Springs y puede hablar con Felipe Primera telefono (760) 323-8253.

James Thompson, City Clerk

MEMORANDUM

Date: February 12, 2015

To: Brenda Diaz
Bureau of Indian Affairs

Fax: (760) 416-2687

From: Joanne Bruggemans
Senior Secretary

Subject: Allotment Numbers for Public Hearing Notice
Case 5.1361 PDD 375 - Aberdeen

Here are neighborhood courtesy notices that need to be sent to the appropriate Indian landowners within the 500' radius of the project location showing the allotment numbers as requested:

The allotment numbers corresponding with the APN numbers are as follows :

APN	Allotment Number	APN	Allotment Number
508-042-006		508-082-074	
508-042-009		508-084-004	
508-051-005 through 508-051-051		508-084-007 through 508-084-008	
508-561-055 through 508-051-088			
508-054-003			
508-056-017 through 508-056-018			
508-057-001 through 508-057-025			
508-082-003			
508-082-007			

I have enclosed these notices for distribution and your file but should you require more notices, please let me know.

Thank you for your continuous help and cooperation.

NOTICE OF BUREAU OF INDIAN AFFAIR OWNED PARCELS

While conducting a radius search around the subject property(s) we found multiple records of parcels registered to the Bureau of Indian Affairs (BIA). These parcels may not have owner or site information publicly available.

As recommended by the Bureau of Indian Affairs' office we have added the following mailing label for noticing information to be sent to:

BIA PALM SPRINGS AGENCY
SUPERINTENDENT
PO BOX 2245
PALM SPRINGS, CA 92263

In addition to the above noticing label we have added a list of all the BIA properties for easy reference. If needed the provided list can be sent directly to the BIA PALM SPRINGS AGENCY for noticing purposes.

January 20, 2015

Mr. Robert W. Eres
NEXUS Development Corporation/Central Division and O&M HR, LLC
1 MacArthur Place, Suite 300
Santa Ana, California 92707

Subject: Aberdeen Mixed-Use Development Trip Generation (Case Nos. 5.1361 PD-375, 3.3820 MAJ and TTM 36876)

Dear Mr. Eres;

Endo Engineering has reviewed your application for a Planned Development District (PDD) and Tentative Tract Map (TTM) for the Aberdeen Mixed-Use Development proposed on 9.1 gross acres (8.05 net acre) within the Section 14 Specific Plan, in the City of Palm Springs. The project site is located north of Tahquitz Canyon Way and south of Andreas Road, between Calle El Segundo and Calle Alvarado. The proposed project would include 74 townhomes and 17 live/work units as well as a small specialty retail building with approximately 1,568 square feet (S.F.) of gross floor area that is expected to accommodate a café or similar use.

The project site could be developed in a variety of different ways. Pursuant to your request, Endo Engineering has developed supplemental trip generation information for use by the City of Palm Springs in determining the significance of potential traffic impacts associated with the currently proposed Aberdeen Mixed-Use Development. The information provided below includes trip generation forecasts for the following scenarios.

1) the existing land uses;
2) the approved *Hard Rock Hotel – Palm Springs Traffic Impact Study* (July 2007);
3) the existing entitlements for the site based on the Initial Study/Mitigated Negative Declaration (August 2007) for Case Nos. 5.1156, PD 339; TTM 35600; and an Amendment to the Section 14 Master Plan/Specific Plan and Development Agreement;
4) the maximum development potential of the site per the Section 14 Specific Plan; and
5) the maximum residential development potential of the site (30 multi-family dwelling units per acre); and
6) the proposed Aberdeen Mixed-Use Development.

Summary of Trip Generation Findings

Table 1 provides a summary of the trip generation associated with each of the six development scenarios outlined above to facilitate comparison. A detailed description of the trip generation forecast made to reflect the existing on-site land uses is provided as Attachment A. Details regarding the trip generation forecast previously made in the approved *Hard Rock Hotel – Palm Springs Traffic Impact Study* (Endo Engineering; July 2007) are provided as Attachment B. That forecast was based upon older trip generation data published by the ITE in *Trip Generation* (7th Edition; December, 2003). A new trip generation forecast was developed for scenarios 3 through 6 (identified above) using the regression equations in the 9th Edition of the ITE *Trip Generation Manual (2012)*, as shown in Attachments C through F, respectively, and summarized in Table 1.

Table 1
Trip Generation Summary[a]

Development Scenario	Land Use Quantity[b]	Midday Peak Hour In	Out	Total	PM Peak Hour In	Out	Total	Daily 2-Way
Existing Land Uses	Offices	97	64	161	27	163	190	1,550
Approved Hard Rock Hotel Traffic Study	Hotel 482 Rooms	174	148	322	224	178	402	5,070
Initial Study/Mitigated Negative Declaration	Hotel 499 Rooms	197	127	324	279	216	495	6,030
Section 14 Specific Plan Maximum Permitted	5.7 Ac. RA 3.4 Ac. REO	330	240	576	331	355	686	7,660
Max. Residential Alt.	273 DU	22	94	116	92	45	137	1,540
Aberdeen Mixed-Use Development								
Townhomes	74 DU	8	32	40	31	15	46	490
Single-Family Dwellings	17 DU	6	18	24	13	8	21	210
Commercial/Work Space	8,334 SF	27	30	57	23	18	41	370
Total		41	80	121	67	41	108	1,070

a. Refer to Attachment A through Attachment E for a detailed trip generation forecast and related assumptions by development scenario. Each of the proposed live/work units was assumed to generate trips similar to a detached single-family dwelling unit in addition to the associated work space, which was treated as specialty retail/commercial floor area. In addition, 1,568 square feet of specialty retail commercial space was assumed for the northeast corner of Calle El Segundo at Tahquitz Canyon Way.

b. Existing uses include general office buildings and a parking lot. RA=Resort Attraction designation. REO=Specialty Retail/Entertainment/Office designation. The maximum residential intensity assumed was 30 multi-family dwelling units per acre. DU=Dwelling Units. SF=Square feet of building floor area.

The trip generation of a development is one of many factors to be considered in determining the magnitude of future project-related traffic impacts. It can be seen from Table 1 that the proposed Aberdeen Mixed-Use Development would result in substantially fewer trips than development per the Mitigated Negative Declaration approved in the year 2007. The Aberdeen Mixed-Use Development would result in the lowest future trip generation of the scenarios evaluated and less than that of the existing land uses on days when the convention center parking fully utilizes the parking lot on the project site.

We trust that the information provided herein will be of value to you and the City of Palm Springs in their review of the proposed Aberdeen Mixed-Use Development. Should questions or comments arise regarding the supplemental information provided herein, please do not hesitate to contact me.

Cordially,

Attachment A

Existing Land Use Trip Generation

The project site is fully developed and commonly known as the former Prairie Schooner site. Four single-story general office buildings are located along the frontage on Tahquitz Canyon Way, on the parcels within the southern one-third of the project site. These buildings provide a combined total of approximately 32,000 S.F. of gross floor area. The parcels within the northern two-thirds of the project site (5.7 gross acres) are developed as a paved parking lot with approximately 500 off-street parking spaces. This parking lot primarily serves as an overflow parking area for the Convention Center (located to the northeast) and the Spa Resort Casino (located to the northwest).

The trip generation associated with the existing office uses on the project site was estimated by utilizing the regression equations for general office buildings published by the ITE in *Trip Generation Manual* (9th Edition, 2012). The midday trip generation for the existing office uses was based on the AM peak hour rate provided by the ITE. Data for general office buildings is provided by the ITE in terms of a single trip-generation regression equation representing both the AM peak hour of the adjacent street traffic (between 7 am and 9 am) and the AM peak hour of the generator. Similarly, the PM peak hour trip generation regression equation provided by the ITE reflects both the PM peak hour of the adjacent street and the PM peak hour of the generator.

As shown in Table A, the offices on-site generate approximately 550 daily trip-ends, with 77 trips during the **midday peak hour** (68 inbound and 9 outbound). During the evening peak hour, the office buildings generate approximately 114 trip-ends (19 inbound and 95 outbound trips). For office uses, the trip generation for the AM and PM peak hours of the generator typically coincides with the peak hours of the adjacent street traffic.

Table A
Existing Land Use Trip Generation Forecast[a]

Land Use Category	Land Use Quantity[b]	Midday Peak Hour In	Out	Total	PM Peak Hour In	Out	Total	Daily 2-Way
General Office Bldg.	32,000 SF	68	9	77	19	95	114	550
Parking Lot[c]	500 Spaces	29	55	84	8	68	76	1,000
Total		97	64	161	27	163	190	1,550

a. Based upon trip generation data published by the ITE in *Trip Generation Manual* (9th Edition; 2012) for Land Use Code 710 (General Office Building). The office trip generation was estimated using the ITE trip generation regression equations. A single regression equation is provided by the ITE for general office buildings reflecting both the a.m. peak hour of the generator and the a.m. peak hour of the adjacent street. This regression equation was utilized to estimate the midday peak hour trip generation of the office uses.

b. SF= Square feet of building floor area. Spaces=Off-street parking spaces.

c. To estimate the 1,000 daily trips, it was assumed that each parking space was utilized once per day therefore, the number of daily trips would be twice the number of parking spaces. The inbound and outbound percentages of the peak hour trips was determined from the traffic counts made on June 7, 2006 at the parking lot access points.

The existing parking lot, which occupies the northern two-thirds of the site, does not generate traffic per se, but does attract motorists who are looking for a convenient place to park their vehicles while visiting surrounding land uses. This parking lot is centrally located for motorists who enter the area to visit the Palm Springs Convention Center, the Spa Resort Casino, the Plaza Villas (the condominium complex on the north side of Andreas Road) or other nearby development.

Traffic counts were made at the two driveways associated with the parking lot occupying the northern two-thirds of the site on June 7, 2006. At that time, the parking lot had a parking accumulation totaling less than ten percent of the available spaces. Based on a visual inspection of the drivers of the vehicles entering and leaving the parking lot, it appeared that primarily employees destined to/from the Spa Resort Casino were parking on-site on the count day. No significant convention center activities appeared to be scheduled on the weekday when the entering and exiting vehicle counts were made and the number of occupied parking spaces within the lot were counted.

To address the trip generation of the parking lot when filled by convention center traffic, each parking space is assumed to be occupied only once during a typical weekday. As shown in Table A, the existing parking lot on the northern two-thirds of the project site would generate approximately 1,000 trip-ends per weekday. The in/out distribution during the peak hours shown in Table A was developed from the driveway entering/exiting volume counts made at the parking lot on June 7, 2006.

Attachment B

Trip Generation Evaluated In The Approved *Hard Rock Hotel – Palm Springs Traffic Impact Study*

Endo Engineering prepared the *Hard Rock Hotel-Palm Springs Traffic Impact Study* (dated July 6, 2007) for NEXUS Development evaluating the development of a resort hotel on this site. That development included a 482-room resort hotel, with a 6,000 square-foot night club, and two 7,500 square foot signature restaurants. The resort hotel would have provided a mix of studios and one-bedroom units with lock-off rooms with a total of 449 keys. There would have been 14 penthouse suites for sale (1,500 S.F. each) and 19 pool-side suites (840 S.F. each) available for corporate and special events. Ancillary facilities proposed on-site as part of the resort hotel complex included: a ballroom and banquet/multi-function meeting space (with a total of 35,000 square feet) to accommodate special events and convention center business, an in-house 24-hour restaurant (3,600 S.F./180-seats) for hotel guests, a lobby bar, a spa/fitness center (25,000 square feet), and a small private recording studio.

The two signature restaurants and night club were expected to operate only during the evening hours and accommodate both hotel guests and non-hotel patrons. The outdoor patio areas near the two signature restaurants were not dining areas per se, but rather waiting areas for customers where barside service would be permitted during the day time. The project applicant expected 75 percent of the patrons of the night club and signature restaurant facilities to be hotel guests. To assure a conservative analysis, it was assumed that only 50 percent of the night club and signature restaurant patrons would be hotel guests.

The trip generation associated with the Hard Rock Hotel development on-site was previously determined from the regression equations included in the Institute of Transportation Engineers publication entitled *Trip Generation* (Seventh Edition; December, 2003). Table B provides the peak hour and daily trip generation forecast associated with the Hard Rock Hotel development. As shown in Table B, the Hard Rock Hotel development was estimated to generate 5,070 daily trip-ends. During the mid-day peak hour, approximately 322 trip-ends would be generated (174 inbound and 148 outbound) by the development. During the evening peak hour, it was estimated that 402 trip-ends would be generated (224 inbound and 178 outbound) by the project.

Table B
Approved 2007 Hard Rock Hotel Traffic Impact Study
Trip Generation Forecast[a]

Land Use Category	Land Use Quantity[b]	Midday Peak Hour In	Out	Total	PM Peak Hour In	Out	Total	Daily 2-Way
Hotel	482 Rms	121	99	220	151	134	285	3,940
Restaurant	15,000 SF	106	97	203	100	64	164	1,910
Bar/Lounge	6,000 SF	0	0	0	46	24	70	340
Ancillary Subtotal		106	97	203	146	88	234	2,250
External Trip Gen.	50 Percent	53	49	102	73	44	117	1,130
Total		174	148	322	224	178	402	5,070

a. Based upon trip generation data published by the ITE in *Trip Generation* (7th Edition; December, 2003). The spa/fitness center (25,000 square feet), and small private recording studio were assumed to served only hotel guests.
b. Rms=Hotel Rooms. SF=Square feet of building floor area.

Attachment C

Trip Generation of Development Per the Approved Initial Study/Mitigated Negative Declaration

An Initial Study/Mitigated Negative Declaration for Case Nos. 5.1156, PD 339; TTM 35600; and an Amendment to the Section 14 Master Plan/Specific Plan and Development Agreement was submitted to the City of Palm Springs in August, 2007 and approved. The project consisted of a Hard Rock Hotel with up to 499 rooms and associated support facilities including: 36,500 S.F. of restaurant, bar and nightclub space; a 25,000 S.F. spa facility; 31,600 S.F. of ballroom and meeting space; and a 517-space parking structure.

The trip generation associated with the land uses in the approved Initial Study/Mitigated Negative Declaration is shown in Table C. With one exception, the assumptions previously used in the *Hard Rock Hotel-Palm Springs Traffic Impact Study* (dated July 6, 2007) prepared by Endo Engineering regarding internal trip capture were also used for this development scenario. The clientele served by the spa/fitness center was assumed to be only 50 percent hotel guests in Table C. This represented a worst-case assumption, as no information was provided indicating that only hotel guests would be allowed to use this facility. The trip generation in Table C exceeds that previously shown in Table B as a result of the increase in the number of hotel rooms, the increase in the floor area associated with restaurant, bar, and nightclub space, and the addition of external spa/fitness center trips.

Table C
Mitigated Negative Declaration
Trip Generation Forecast[a]

Land Use Category	Land Use Quantity[b]	Midday Peak Hour			PM Peak Hour			Daily
		In	Out	Total	In	Out	Total	2-Way
Hotel (310)	499 Rms	120	102	222	153	147	300	4,090
Restaurant	30,000 SF	137	30	167	151	74	225	2,700
Bar/Lounge	6,500 SF	0	0	0	49	25	74	360
Spa	25,000 SF	17	19	36	51	38	89	820
Ancillary Subtotal		154	49	203	251	137	388	3,880
External Trip Gen.	50 Percent	77	25	102	126	69	195	1,940
Total		197	127	324	279	216	495	6,030

a. Based upon trip generation data published by the ITE in *Trip Generation Manual* (9th Edition; 2012).
b. Rms=Hotel Rooms. SF=Square feet of building floor area.

Attachment D

Section 14 Specific Plan
Maximum Development Potential Trip Generation

The proposed project is located within Section 14, where the Section 14 Specific Plan establishes the land use designations and development standards. The project site is identified as a catalyst development within Section 14. The northern two-thirds of the project site is designated Resort/Attraction (RA). The southern one-third of the site (the area occupied by the office buildings) is designated in the Section 14 Specific Plan as Specialty Retail/Entertainment/Office (REO). Hotels are a permitted use under the RA land use designation. Hotels and resort hotels are permitted uses under the REO designation with a Conditional Use Permit, consistent with the standards of Resort-Attraction.

Endo Engineering prepared the Traffic Impact Study addressing Section 14 Master Development Plan/Specific Plan dated January 8, 1998. The Section 14 Master Development Plan/Specific Plan EIR/EIS (January 2002) used the following land use assumptions for the RA and REO land use designations in developing the Section 14 Specific Plan maximum development potential. For land designated RA 50 percent of the gross acreage was assumed to be Commercial at 0.38 FAR and 50 percent was assumed to be Hotel use at an intensity of 43 rooms per acre. For land designated REO the gross acreage was assumed to be Commercial land uses with a 0.38 FAR. Table D provides a trip generation forecast for the 9.1 gross acre project site as shown in Table D.

Table D
Section 14 Specific Plan Maximum Development Trip Generation Forecast[a]

Land Use Category	Land Use Quantity[b]	Midday Peak Hour In	Midday Peak Hour Out	Midday Peak Hour Total	PM Peak Hour In	PM Peak Hour Out	PM Peak Hour Total	Daily 2-Way
RA Designation	5.7 Acres							
- Hotel (43 Rms/Acre)	122 Rms	36	31	67	37	36	73	720
- Commercial (.38 FAR)	47,175 SF	134	98	232	134	145	279	3,160
Subtotal		170	129	299	171	181	352	3,880
REO Designation	3.4 Acres							
- Commercial (.38 FAR)	56,280 SF	160	117	277	160	174	334	3,780
Total for Project Site	9.1 Acres	330	240	576	331	355	686	7,660

a. Based upon trip generation data published by the ITE in *Trip Generation Manual* (9th Edition; 2012). RA=Resort Attraction Designation. REO=Retail/Entertainment/Office. FAR=Floor Area Ratio.
b. Rms=Hotel Rooms. SF=Square feet of building floor area.

Attachment E

Maximum Potential Residential Development
Trip Generation

The maximum potential residential development of the 9.1 gross acre project site, based upon a maximum permitted density of 30 multiple-family attached dwelling units per acre per the Section 14 Specific Plan (2004) would be 273 dwelling units. Table shows the trip generation that would be expected if the site were developed with 273 multiple-family attached dwelling units.

Table E
Maximum Potential Residential Development Trip Generation Forecast[a]

Land Use Category	Land Use Quantity[b]	Midday Peak Hour In	Midday Peak Hour Out	Midday Peak Hour Total	PM Peak Hour In	PM Peak Hour Out	PM Peak Hour Total	Daily 2-Way
273 MFA Alternative								
Residential-MFA (310)	273 DU	22	94	116	92	45	137	1,540

a. Based upon trip generation data published by the ITE in *Trip Generation Manual* (9th Edition; 2012). The regression equations for Land Use Category 230 (Residential Condominium/Townhouse) were used which reflect the AM peak hour of the generator and the PM peak hour of the adjacent streets.
b. DU=Multiple-family attached dwelling units.

Attachment F

Potential Trip Generation
With the Proposed Aberdeen Mixed-Use Development

The proposed project would include 74 townhomes and 17 live/work units as well as a small specialty retail building with approximately 1,568 square feet (S.F.) of gross floor area that is expected to accommodate a café or similar use. Table F shows the trip generation forecast associated with the proposed Aberdeen Mixed-Use Development. Each of the proposed live/work units was assumed to generate trips similar to a detached single-family dwelling unit in addition to the 398 SF of associated work space per unit, which was treated as specialty retail/commercial floor area. A total of 1,568 square feet of specialty retail commercial space was assumed for the northeast corner of Calle El Segundo at Tahquitz Canyon Way.

Table F
Proposed Aberdeen Mixed-Use Development
Trip Generation Forecast[a]

Land Use Category	Land Use Quantity[b]	Midday Peak Hour In	Midday Peak Hour Out	Midday Peak Hour Total	PM Peak Hour In	PM Peak Hour Out	PM Peak Hour Total	Daily 2-Way
Aberdeen Project								
Townhomes	74 DU	8	32	40	31	15	46	490

Total		41	80	121	67	41	108	1,070

a. Based upon trip generation data published by the ITE in *Trip Generation Manual* (9th Edition; 2012).
b. DU=Dwelling Units. SF=Square feet of building floor area. The work space assumed in the 17 live/work units was 398 SF per unit.

January 20, 2015

Mr. Robert W. Eres
NEXUS Development Corporation/Central Division and O&M HR, LLC
1 MacArthur Place, Suite 300
Santa Ana, California 92707

Subject: Aberdeen Mixed-Use Development Trip Generation (Case Nos. 5.1361 PD-375, 3.3820 MAJ and TTM 36876)

Dear Mr. Eres;

Endo Engineering has reviewed your application for a Planned Development District (PDD) and Tentative Tract Map (TTM) for the Aberdeen Mixed-Use Development proposed on 9.1 gross acres (8.05 net acre) within the Section 14 Specific Plan, in the City of Palm Springs. The project site is located north of Tahquitz Canyon Way and south of Andreas Road, between Calle El Segundo and Calle Alvarado. The proposed project would include 74 townhomes and 17 live/work units as well as a small specialty retail building with approximately 1,568 square feet (S.F.) of gross floor area that is expected to accommodate a café or similar use.

The project site could be developed in a variety of different ways. Pursuant to your request, Endo Engineering has developed supplemental trip generation information for use by the City of Palm Springs in determining the significance of potential traffic impacts associated with the currently proposed Aberdeen Mixed-Use Development. The information provided below includes trip generation forecasts for the following scenarios.

1) the existing land uses;
2) the approved *Hard Rock Hotel – Palm Springs Traffic Impact Study* (July 2007);
3) the existing entitlements for the site based on the Initial Study/Mitigated Negative Declaration (August 2007) for Case Nos. 5.1156, PD 339; TTM 35600; and an Amendment to the Section 14 Master Plan/Specific Plan and Development Agreement;
4) the maximum development potential of the site per the Section 14 Specific Plan; and
5) the maximum residential development potential of the site (30 multi-family dwelling units per acre); and
6) the proposed Aberdeen Mixed-Use Development.

Summary of Trip Generation Findings

Table 1 provides a summary of the trip generation associated with each of the six development scenarios outlined above to facilitate comparison. A detailed description of the trip generation forecast made to reflect the existing on-site land uses is provided as Attachment A. Details regarding the trip generation forecast previously made in the approved *Hard Rock Hotel – Palm Springs Traffic Impact Study* (Endo Engineering; July 2007) are provided as Attachment B. That forecast was based upon older trip generation data published by the ITE in *Trip Generation* (7th Edition; December, 2003). A new trip generation forecast was developed for scenarios 3 through 6 (identified above) using the regression equations in the 9th Edition of the ITE *Trip Generation Manual (2012)*, as shown in Attachments C through F, respectively, and summarized in Table 1.

Table 1
Trip Generation Summary[a]

Development Scenario	Land Use Quantity[b]	Midday Peak Hour In	Midday Peak Hour Out	Midday Peak Hour Total	PM Peak Hour In	PM Peak Hour Out	PM Peak Hour Total	Daily 2-Way
Existing Land Uses	Offices	97	64	161	27	163	190	1,550
Approved Hard Rock Hotel Traffic Study	Hotel 482 Rooms	174	148	322	224	178	402	5,070
Initial Study/Mitigated Negative Declaration	Hotel 499 Rooms	197	127	324	279	216	495	6,030
Section 14 Specific Plan Maximum Permitted	5.7 Ac. RA 3.4 Ac. REO	330	240	576	331	355	686	7,660
Max. Residential Alt.	273 DU	22	94	116	92	45	137	1,540
Aberdeen Mixed-Use Development								
Townhomes	74 DU	8	32	40	31	15	46	490
Single-Family Dwellings	17 DU	6	18	24	13	8	21	210
Commercial/Work Space	8,334 SF	27	30	57	23	18	41	370
Total		41	80	121	67	41	108	1,070

a. Refer to Attachment A through Attachment E for a detailed trip generation forecast and related assumptions by development scenario. Each of the proposed live/work units was assumed to generate trips similar to a detached single-family dwelling unit in addition to the associated work space, which was treated as specialty retail/commercial floor area. In addition, 1,568 square feet of specialty retail commercial space was assumed for the northeast corner of Calle El Segundo at Tahquitz Canyon Way.

b. Existing uses include general office buildings and a parking lot. RA=Resort Attraction designation. REO=Specialty Retail/Entertainment/Office designation. The maximum residential intensity assumed was 30 multi-family dwelling units per acre. DU=Dwelling Units. SF=Square feet of building floor area.

The trip generation of a development is one of many factors to be considered in determining the magnitude of future project-related traffic impacts. It can be seen from Table 1 that the proposed Aberdeen Mixed-Use Development would result in substantially fewer trips than development per the Mitigated Negative Declaration approved in the year 2007. The Aberdeen Mixed-Use Development would result in the lowest future trip generation of the scenarios evaluated and less than that of the existing land uses on days when the convention center parking fully utilizes the parking lot on the project site.

NOTICE OF INTENT
TO ADOPT A MITIGATED NEGATIVE DECLARATION
Case Nos. 5.1361 PDD 375, TTM 36876 and 3.3820 MAJ

LEAD AGENCY: **City of Palm Springs**
3200 East Tahquitz Canyon Way
Palm Springs, CA 92262

CONTACT PERSON: David Newell, Associate Planner (760) 323-8245

PROJECT TITLE: Aberdeen - Case Nos. 5.1361 PDD-375 / 3.3820 MAJ / TTM 36876

PROJECT LOCATION: Northeast corner of Tahquitz Canyon Way and Calle El Segundo, Palm Springs, California, Riverside County.
Assessor's Parcel No. 508-055-003, 006, 007, 008, and 009

PROJECT DESCRIPTION: The project proposes the construction of an 8.05-acre mixed-use development comprised of seventy-four (74) attached and detached residential dwellings, and seventeen (17) live-work units with approximately 1,568-sqaure feet of retail space. The project will require the demolition of 33,500 square feet of existing office buildings and associated parking lot. The proposed project requires the following applications:

- A Planned Development District (#375) in lieu of a Change of Zone;
- A Tentative Tract Map (36876)
- A Major Architectural Review for the architectural and landscape design.

FINDINGS / DETERMINATION: The City has reviewed and considered the proposed project and has determined that any potentially significant impacts can be mitigated to a less than significant level. The City hereby prepares and proposes to adopt a Mitigated Negative Declaration for this project.

PUBLIC REVIEW PERIOD: A 20-day public review period for the Draft Mitigated Negative Declaration will commence at 8:00 a.m. on February 20, 2015 and end on March 11, 2015 at 5:00 p.m. for interested individuals and public agencies to submit written comments on the document. Any written comments on the Mitigated Negative Declaration must be received at the above address within the public review period. In addition, you may email comments to the following address:

David.Newell@palmsprings-ca.gov. Copies of the Mitigated Negative Declaration and Initial Study are available for review at the above address and at the City library.

PUBLIC MEETING: This matter has been set for public hearing before the Planning Commission on February 25, 2015. City Council consideration is expected at a public hearing on March 18, 2015, but please confirm the date with the City Clerk's office.

Description of the Project

The project proposes the construction of an 8.05-acre mixed-use development comprised of seventy-four (74) attached and detached residential dwellings, and seventeen (17) live-work units with approximately 1,568-sqaure feet of retail space. The project is located on the northeast corner of Tahquitz Canyon Way and Calle El Segundo in Palm Springs, California. The project will require the demolition of 33,500 square feet of existing office buildings, currently fronting Tahquitz Canyan Way, and associated parking and a neighboring parking lot currently used as a public parking lot. The proposed project requires the following applications:

- A Planned Development District (#375) in lieu of a Change of Zone;
- A Tentative Tract Map (36876)
- A Major Architectural Review for the architectural and landscape design.

Access to the project will be provided at the following locations:

- Andreas Road (main entrance)
- Calle El Segundo (secondary access)
- Calle Alvarado (secondary access)

Environmental Setting and Surrounding Land Uses

North: Andreas Road, Plaza Villas (multi-family residential)
South: Tahquitz Canyon Way, commercial land use
East: Renaissance Palm Springs Hotel
West: Calle El Segundo, Elements Spa Hilton

Other public agencies whose approval is required
None.

Environmental Factors Potentially Affected:

The environmental factors checked below would be potentially affected by this project, as indicated by the checklist and corresponding discussion on the following pages.

☐ Aesthetics	☐ Agricultural Resources	☐ Air Quality
☐ Biological Resources	☐ Cultural Resources	☐ Geology/Soils
☐ Hazards & Hazardous Materials	☐ Hydrology/Water Quality	☐ Land Use/Planning
☐ Mineral Resources	☐ Noise	☐ Population/Housing
☐ Public Services	☐ Recreation	☐ Transportation/ Traffic
☐ Utilities/Service Systems	☐ Mandatory Findings of Significance	

DETERMINATION: The City of Palm Springs Planning Department

On the basis of this initial evaluation:

☐ I find that the proposed project COULD NOT have a significant effect on the environment, and a NEGATIVE DECLARATION will be prepared.

☒ I find that although the proposed project could have a significant effect on the environment there will not be a significant effect in this case because revisions in the project have been made by or agreed to by the project proponent. A MITIGATED NEGATIVE DECLARATION will be prepared.

☐ I find that the proposed project MAY have a significant effect on the environment, and an ENVIRONMENTAL IMPACT REPORT is required.

☐ I find that the proposed project MAY have a "potentially significant impact" or "potentially significant unless mitigated" impact on the environment, but at least one effect 1) has been adequately analyzed in an earlier document pursuant to applicable legal standards, and 2) has been addressed by mitigation measures based on the earlier analysis as described on attached sheets. An ENVIRONMENTAL IMPACT REPORT is required, but it must analyze only the effects that remain to be addressed.

☐ I find that although the proposed project could have a significant effect on the environment, because all potentially significant effects (a) have been analyzed adequately in an earlier EIR or NEGATIVE DECLARATION pursuant to applicable standards, and (b) have been avoided or mitigated pursuant to that earlier EIR or NEGATIVE DECLARATION, including revisions or mitigation measures that are imposed upon the proposed project, nothing further is required.

David Newell

February 13, 2015
Date

PURPOSE OF THIS INITIAL STUDY

This Initial Study has been prepared consistent with CEQA Guidelines Section 15063, to determine if the project, as proposed, may have a significant effect upon the environment. Based upon the findings contained within this report, the Initial Study will be used in support of the preparation of a Mitigated Negative Declaration.

EVALUATION OF ENVIRONMENTAL IMPACTS

1) A brief explanation is required for all answers except "No Impact" answers that are adequately supported by the information sources a lead agency cites in the parentheses following each question. A "No Impact" answer is adequately supported if the referenced information sources show that the impact simply does not apply to projects like the one involved (e.g., the project falls outside a fault rupture zone). A "No Impact" answer should be explained where it is based on project-specific factors as well as general standards (e.g., the project will not expose sensitive receptors to pollutants, based on project-specific screening analysis).

2) All answers must take into account the whole action involved, including offsite as well as onsite, cumulative as well as project-level, indirect as well as direct, and construction as well as operational impacts.

3) Once the lead agency has determined that a particular physical impact may occur, then the checklist answers must indicate whether the impact is potentially significant, less than significant with mitigation, or less than significant. "Potentially Significant Impact" is appropriate if there is substantial evidence that an effect may be significant. If there are one or more "Potentially Significant Impact" entries when the determination is made, an EIR is required.

4) "Negative Declaration: Less Than Significant With Mitigation Incorporated" applies where the incorporation of mitigation measures has reduced an effect from "Potentially Significant Impact" to a "Less Than Significant Impact." The lead agency must describe the mitigation measures, and briefly explain how they reduce the effect to a less than significant level mitigation measures from Section XVII, "Earlier Analyses," may be cross-referenced).

5) Earlier analyses may be used where, pursuant to the tiering, program EIR, or other CEQA process, an effect has been adequately analyzed in an earlier EIR or negative declaration. Section 15063(c)(3)(D). In this case, a brief discussion should identify the following:

    a) Earlier Analysis Used. Identify and state where they are available for review.

    b) Impacts Adequately Addressed. Identify which effects from the above checklist were within the scope of and adequately analyzed in an earlier document pursuant to applicable legal standards, and state whether such effects were addressed by mitigation measures based on the earlier analysis.

    c) Mitigation Measures. For effects that are "Less than Significant with Mitigation Measures Incorporated," describe the mitigation measures, which were incorporated or refined from the earlier document and the extent to which they address site-specific conditions for the project.

6) Lead agencies are encouraged to incorporate into the checklist references to information sources for potential impacts (e.g., general plans, zoning ordinances). Reference to a previously prepared or outside document should, where appropriate, include a reference to the page or pages where the statement is substantiated.

7) Supporting Information Sources: A source list should be attached, and other sources used or individuals contacted should be cited in the discussion.

8) The explanation of each issue should identify:

   a) The significance criteria or threshold, if any, used to evaluate each question; and

   b) The mitigation measure identified, if any, to reduce the impacts to less than significance.

I. AESTHETICS Would the project:	Potentially Significant Impact	Less Than Significant With Mitigation Incorporated	Less Than Significant Impact	No Impact
a) Have a substantial adverse effect on a scenic vista?	☐	☒	☐	☐
b) Substantially damage scenic resources, including, but not limited to, trees, rock outcroppings, and historic buildings within a state scenic highway?	☐	☐	☐	☒
c) Substantially degrade the existing visual character or quality of the site and its surroundings?	☐	☐	☒	☐
d) Create a new source of substantial light or glare, which would adversely affect day or nighttime views in the area?	☐	☐	☒	☐

(Sources: Palm Springs Architectural Advisory Committee Staff Memorandum, January 12, 2015; Section 14 Specific Plan, City of Palm Springs, July 2014)

Discussion of Impacts

a) **Less Than Significant Impact with Mitigation Incorporated.** The foothills and peaks of the San Jacinto Mountains extend along the westerly and southerly portions of the City and constitute a scenic vista for much of the region. Given their significant rise over the low-lying valley, they are visible from most locations in the upper Coachella Valley, including the subject property.

From the project site, scenic views of the San Jacinto Mountains are to the west and southwest. The site is completely surrounded by urban development, including two-story condominiums to the north, the five-story Renaissance Hotel to the east, two-story commercial and office development to the south, and the three-story Hilton Hotel to the west.

The proposed project will result in demolition of existing parking lots and four office buildings. The project will result in development of residential, recreational, and commercial components. The total project area will consist of 31% building space, 22% paving (including streets or drives), and 47% landscaping/open space/recreation. It includes internal streets, desert landscaping, and a perimeter block wall. Primary vehicular access will be provided from Andreas Road. Additional access is provided from Calle El Segundo and Calle Alvarado.

The residential component of the project includes 74 three- and four-story, attached and detached townhome units with roof decks on the top story. Heights range from 33 feet to 46 feet 2 inches (to the top of roof deck parapet). Each residential unit includes a two-car garage, parking driveway, and private yard space with a small dipping pool, enclosed with a concrete block wall.

An additional 17 live/work units are proposed along Tahquitz Canyon Way. Units consist of a single-story (with roof deck) work space fronting on Tahquitz Canyon Way connected by a walkway to a three- to four-story (including roof deck) living space to the north. Maximum heights are approximately 44 feet 8 inches (to the top of roof deck parapet). Each unit includes a two-car garage and parking driveway.

The project's recreational and open space area is located on the southern portion of the property and consists of a single-story gym, two swimming pools, one spa, outdoor seating, and a pool utility space with covered patio. Building height is 14 feet. A commercial building, located in the southwest corner of the site, consists of a 1,998-square foot, single-story structure 18 feet high, with outdoor seating.

The architectural character of the project is modern, with cantilever roof extensions, modern metals, and large expanses of glass, which are consistent with the Design Guidelines of the Section 14 Specific Plan. Proposed building materials, including stucco walls, aluminum panels, and steel cables, and stepped/terraced building components, are also consistent with the Specific Plan.

The project will impact scenic views from surrounding properties, but views will remain urban in nature and consistent with existing development. Immediate views of the existing parking lot and more distant views of the San Jacinto Mountains from westerly facing hotel rooms at the Renaissance Hotel will be replaced with views of townhomes along Calle Alvarado. Southerly views of the parking lot and San Jacinto Mountains from existing condos north of Andreas Road will also be replaced by views of the townhomes. No scenic viewsheds occur to the east or north, and no significant mountain views will be lost.

Project site plans, architectural renderings, and landscape plans were reviewed by the Palm Springs Architectural Advisory Committee on January 12, 2015. It was determined that proposed building heights exceed the HR development standards of the Section 14 Specific Plan. The maximum permitted height is 35 feet, except when developed as high-rise, and the project proposes heights up to 46 feet 2 inches. The project will be required to abide by Section 14 high-rise development standards, including set backs and landscaping requirments.

The project's landscape design includes a formal pattern along Tahquitz Canyon Way, which is inconsistent with the Specific Plan's required streetscape of palm trees every 60 feet and shade trees between palms and landscape buffers, where feasible. Internal streets do not include sidewalks, and the sidewalk along Tahquitz Canyon should include pedestrian amenities, such as street furniture and banners. The Architectural Advisory Committee recommended that the project proponent revise the site plan to address these and other issues. Visual impacts will be less than significant with implementation of the following mitigation measure.

Mitigation Measure:

MM I – 1 Project site plans, architectural renderings, and landscape plans shall be revised to address inconsistencies with the development standards and other design requirements of the Section 14 Specific Plan, as determined by the City Council.

b) **No Impact.** The property is not located along a state scenic highway. There are no significant trees, rock outcroppings, historic buildings or other significant aesthetic resources on the subject property. The site is fully developed with paved parking lots, office buildings, and limited urban landscaping. No impacts to scenic resources will occur.

c) **Less Than Significant Impact.** The project site is located in the City's urban core and within the Section 14 Specific Plan boundary. It is currently developed with paved parking lots and office buildings, and surrounded by residential, hotel, commercial, and office development. The proposed project is consistent with the long-term development vision of the Specific Plan for urban uses in this area. It will not substantially degrade the existing visual character of the site and its surroundings.

d) **Less Than Significant Impact.** The project site is currently used as an office complex and parking lot. Light is emitted from the office buildings and parking lots, particularly the northerly parking lot which is used during the evening for convention center and casino activities. The proposed project will continue to emit light in a manner consistent with a residential neighborhood. Light sources will include indoor lights, outdoor security lighting, landscape lighting, and vehicle headlights. Lighting levels are not expected to exceed typical lighting within an urbanized environment.

All lighting proposed within the project will be required to comply with the outdoor lighting standards established in the City Zoning Ordinance Section 93.21.00 to assure lighting is directed away from adjacent properties. These standards will assure that project light and glare impacts will be less than significant.

II. AGRICULTURAL RESOURCES

Would the project:	Potentially Significant Impact	Less Than Significant With Mitigation Incorporated	Less Than Significant Impact	No Impact
a) Convert Prime Farmland, Unique Farmland, or Farmland of Statewide Importance (Farmland), as shown on the maps prepared pursuant to the Farmland Mapping and Monitoring Program of the California Resources Agency, to non-agricultural use?	☐	☐	☐	☒
b) Conflict with existing zoning for agricultural use, or a Williamson Act contract?	☐	☐	☐	☒
c) Involve other changes in the existing environment which, due to their location or nature, could result in conversion of Farmland, to non-agricultural use?	☐	☐	☐	☒

(Sources: "Riverside County Important Farmland 2010 Map," California Department of Conservation; 2007 Palm Springs General Plan)

Discussion of Impacts

a-c) ***No Impact.*** The subject property is located in an urban area and surrounded by roadways and resort, commercial, and residential development. The site is developed and contains a paved parking lot and single-story office buildings. It is not designated as Prime Farmland, Unique Farmland, or Farmland of Statewide Importance pursuant to the Farmland Mapping and Monitoring Program, nor is it subject to a Williamson Act contract. No agricultural lands are located in the vicinity of the property. The project will have no impact on agricultural lands and will not result in the conversion of farmland to non-agricultural uses.

III. AIR QUALITY

Would the project:	Potentially Significant Impact	Less Than Significant With Mitigation Incorporated	Less Than Significant Impact	No Impact
a) Conflict with or obstruct implementation of the applicable air quality plan?	☐	☐	☐	☒
b) Violate any air quality standard or contribute substantially to an existing or projected air quality violation?	☐	☐	☒	☐
c) Result in a cumulatively considerable net increase of any criteria pollutant for which the project region is non-attainment under an applicable federal or state ambient air quality standard (including releasing emissions which exceed quantitative thresholds for ozone precursors)?	☐	☐	☒	☐
d) Expose sensitive receptors to substantial pollutant concentrations?	☐	☐	☒	☐
e) Create objectionable odors affecting a substantial number of people?	☐	☐	☒	☐

(Sources: "Final 2012 Air Quality Management Plan," prepared by South Coast Air Quality Management District, December 2012; "Final Localized Significance Threshold Methodology," prepared by the South Coast Air Quality Management District, Revised, July 2008; "2003 Coachella Valley PM10 State Implementation Plan," August 1, 2003; CalEEMod Version 2013.2.2)

Setting

The Coachella Valley, including the City of Palm Springs and project site, is located within the Salton Sea Air Basin (SSAB), which is under the jurisdiction of the South Coast Air Quality Management District (SCAQMD). All development within the SSAB is subject to SCAQMD's 2012 Air Quality Management Plan (2012 AQMP) and the 2003 Coachella Valley PM_{10} State Implementation Plan (2003 CV PM10 SIP). The SCAQMD operates and maintains regional air quality monitoring stations at numerous locations throughout its jurisdiction. The proposed site is located within Source Receptor Area (SRA) 30, which includes monitoring stations in Palm Springs and Indio. The Indio site has been operational since 1985 and the Palm Springs site since 1987.

Criteria air pollutants are contaminants for which the state and federal air quality standards have been established. Currently, the Coachella Valley is classified as being in non-attainment for both ozone (O_3) and PM_{10}. State and federal ambient air quality standards are show in Table III-1 and described in detail below.

Table III- 1
State and Federal Ambient Air Quality Standards

	State Standards		Federal Standards	
Pollutant	**Averaging Time**	**Concentration**	**Averaging Time**	**Concentration**
Ozone	1 hour 8 hour	0.09 ppm 0.07 ppm	1 hour 8 hour	--- 0.075 ppm
Carbon Monoxide	1 hour 8 hours	20.0 ppm 9.0 ppm	1 hour 8 hours	35.0 ppm 9.0 ppm
Nitrogen Dioxide (NO_2)	1 hour AAM	0.18 ppm 0.030 ppm	1 hour AAM	0.10 ppm 0.053 ppm
Sulfur Dioxide (SO_2)	1 hour 24 hours	0.25 ppm 0.04 ppm	1 hour 24 hours	0.075ppm 0.14 ppm
Particulate Matter (PM_{10})	24 hours AAM	50 $\mu g/m^3$ 20 $\mu g/m^3$	24 hours AAM	150 $\mu g/m^3$ ---
Particulate Matter ($PM_{2.5}$)	AAM 24 hours	12 $\mu g/m^3$ ---	AAM 24 hours	12 $\mu g/m^3$ 35 $\mu g/m^3$
Lead	30 day Avg.	1.5 $\mu g/m^3$	3 month Avg.	0.15 $\mu g/m^3$
Visibility Reducing Particles	8 hour		No federal Standard	No federal Standard
Sulfates	24 hour	25$\mu g/m^3$	No federal Standard	No federal Standard
Hydrogen Sulfide	1 hour	0.03 ppm	No federal Standard	No federal Standard
Vinyl Chloride	24 hour	0.01 ppm	No federal Standard	No federal Standard

Notes: ppm = parts per million; ppb= parts per billion; $\mu g/ m^3$ = micrograms per cubic meter of air;
AAM = Annual Arithmetic Mean;
Source: California Air Resources Board, 6/04/2013.

Ozone (O_3) is the most prevalent of a class of photochemical oxidants formed in the urban atmosphere. The creation of ozone is a result of complex chemical reactions between hydrocarbons and oxides of nitrogen in the presence of sunshine. Unlike other pollutants, ozone is not released directly into the atmosphere from any sources. The major sources of oxides of nitrogen and reactive hydrocarbons, known as ozone precursors, are combustion sources such as factories and automobiles, and evaporation of solvents and fuels. The health effects of ozone are eye irritation and damage to lung tissues.

Carbon Monoxide (CO) is a colorless, odorless, toxic gas formed by incomplete combustion of fossil fuels. CO concentrations are generally higher in the winter, when meteorological conditions favor the build-up of directly emitted contaminants. CO health warning and emergency episodes occur almost entirely during the winter. The most significant source of carbon monoxide is gasoline-powered automobiles, as a result of inefficient fuel usage in internal combustion engines. Various industrial processes also emit carbon monoxide.

Nitrogen Oxides (NO_x) the primary receptors of ultraviolet light initiating the photochemical reactions to produce smog. Nitric oxide combines with oxygen in the presence of reactive hydrocarbons and sunlight to form nitrogen dioxide and ozone. Oxides of nitrogen are contributors to other air pollution problems including: high levels of fine particulate matter, poor visibility and acid deposition.

Sulfur Dioxide (SO_2) results from the combustion of high sulfur content fuels. Fuel combustion is the major source of SO_2, while chemical plants, sulfur recovery plants, and metal processing are minor contributors. Sulfates result from a relation of sulfur dioxide and oxygen in the presence of sunlight. SO_2 levels are generally higher in the winter than in the summer (when sunlight is plentiful and sulfate is more readily formed).

Particulate Matter (PM_{10} and $PM_{2.5}$) consists of particles in the atmosphere as a by-product of fuel combustion, through abrasion such as tire wear, and through soil erosion by wind. Particulates can also be formed through photochemical reactions in the atmosphere. PM_{10} refers to finely divided solids or liquids such as soot, dust, and aerosols which are 10 microns or less in diameter and can enter the lungs. Fine particles are those less than 2.5 micrometers in diameter and are also referred to as $PM_{2.5}$.

Lead is found in old paints and coatings, plumbing and a variety of other materials. Once in the blood stream, lead can cause damage to the brain, nervous system, and other body systems. Children are most susceptible to the effects of lead. The South County Air Basin and riverside County portion of the Salton Sea Air Basin are in attainment for the federal and State standards for lead.

Discussion of Impacts

a) ***No Impact.*** The project will be developed in accordance with all applicable air quality management plans. The subject property is located within the Salton Sea Air Basin (SSAB), which is governed by the South Coast Air Quality Management District (SCAQMD). SCAQMD is responsible for monitoring criteria air pollutant concentrations and establishing management policies for the SSAB. All development within the Salton Sea Air Basin, including the proposed project, is subject to the current AQMP and SIP.

The AQMP is a comprehensive plan that establishes control strategies and guidance on regional emission reductions for air pollutants. It was based, in part, on the land use plans of the jurisdictions in the region. The proposed project is consistent with the City of Palm Springs land use designations assigned to the subject property. Therefore, the proposed project is consistent with the intent of the AQMP. No impacts associated with compliance with applicable management plans are expected.

b, c) ***Less Than Significant Impact.*** Development of the proposed project will result in the release of criteria air pollutants. The California Emissions Estimator Model (CalEEMod) Version 2013.2.2 was used to determine air quality emissions that will be generated by construction and operation of the proposed project. Table III-2 summarizes the short-term construction-related emissions, and Table III-3 summarizes the ongoing emissions that will be generated at operation.

Construction Emissions

The construction period includes demolition, site preparation, grading, building construction, paving, and architectural coating associated with the proposed project. For analysis purposes, it is assumed that construction will occur over a 1-year period extending from March 1, 2015 to March 1, 2016. The demolition period includes the removal of 33,500 square feet of existing buildings. The grading period includes hauling emissions associated with the projected 12,000 cubic yards of cut, and 2,000 cubic yards of fill.

As shown in Table III-2, emissions generated by construction activities will not exceed SCAQMD thresholds of significance for criteria air pollutants. The data reflect average daily emissions over the 1-year construction period, including both summer and winter weather conditions. It should be mentioned that the Table below shows the projected unmitigated emissions. Implementation of minimization measures during construction will further reduce emission levels. Applicable minimization measures include, but are not limited to, the implementation of dust control practices in conformance with SCQAMD Rule 403, and proper maintenance and limited idling of heavy equipment. Impacts to air quality from construction of the proposed project for criteria pollutants, therefore, are expected to be less than significant.

Table III-2
Construction-Related Emissions Summary
(pounds per day)

Construction Emissions[1]	CO	NO_x	ROG	SO_2	PM_{10}	$PM_{2.5}$
2015	44.59	56.92	71.09	0.07	14.00	8.37
2016	2.99	2.48	71.04	0.00	0.35	0.24
SCAQMD Thresholds	550.00	100.00	75.00	150.00	150.00	55.00
Exceeds Threshold?	NO	NO	NO	NO	NO	NO

Average of winter and summer emissions, unmitigated.
Source: CalEEMod model, version 2013.2.2.
See Appendix A for detailed calculations.

Operational Emissions

Operational emissions are ongoing emissions that will occur over the life of the project. Operational emissions include area source emissions, emissions from energy (electric and natural gas) demand, and mobile source (vehicle) emissions. As shown in the table below, operational emissions will not exceed SCAQMD thresholds of significance for any criteria pollutants. Impacts will be less than significant.

Table III-3
Operational Emissions Summary
(pounds per day)

	CO	NO_x	ROG	SO_2	PM_{10}	$PM_{2.5}$
Operation Emissions[1]	47.25	10.28	13.54	0.06	4.09	1.33
SCAQMD Thresholds	550.00	100.00	75.00	150.00	150.00	55.00
Exceeds Threshold?	NO	NO	NO	NO	NO	NO

Average of winter and summer emissions, unmitigated.
Source: CalEEMod model, version 2013.2.2.
See Appendix A

Non-Attainment

Historically, the Coachella Valley, which includes the proposed project site, has been classified as a "non-attainment" area for PM10. The proposed project will contribute to an incremental increase in regional ozone and PM_{10} emissions. However, this impact is not expected to be cumulatively considerable. Project construction and operation emissions will not exceed SCAQMD thresholds for PM_{10} or ozone precursors, and appropriate minimization measures will be implemented that will further reduce emissions. The project will not conflict with any attainment plans and will result in less than significant impacts.

d) ***Less than Significant Impact.*** To determine if the proposed project has the potential to generate significant adverse localized air quality impacts, the 5-acre mass rate LST Look-Up Table for SRA 30 (Coachella Valley) was utilized. The nearest sensitive receptor is a multi-family residential development (Plaza Villas) located 30 meters north of the project site boundary. Therefore, LSTs are summarized in the table below for sensitive receptors located approximately 25 meters from the emission source. Emission estimates reflect all phases of construction. As shown in Table III-4 below, LST thresholds will not be exceeded during construction of the project. Impacts to sensitive receptors will be less than significant.

Table III-4
Localized Significance Thresholds
(pounds per day)

	CO	NO_x	PM_{10}	$PM_{2.5}$
Project Emissions	44.59	56.92	6.66	4.33
LST	2,292	304	14	8
Exceeds Threshold?	NO	NO	NO	NO

Source: CalEEMod Version 2013.2.2
Emissions shown are the maximum daily emission during all phases of construction, unmitigated, with the exception of PM_{10} and $PM_{2.5}$, which show emissions after enforcement of standard dust control measures. The highest daily emissions are expected to occur in 2015.
See Appendix A

e) ***Less than Significant.*** The proposed project is not expected to generate objectionable odors at project buildout. The proposed project has the potential to result in short term odors associated with asphalt paving and heavy equipment; however, any such odors would be quickly dispersed below detectable thresholds as distance from the construction site increases. Therefore, impacts from objectionable odors are expected to be less than significant.

Standard Air Quality Regulations

The project will adhere to all established air quality standards and regulations including the following:

1. SCAQMD Rule 403 (403.1 specific to the Coachella Valley): A dust control Plan shall be prepared and implemented during all construction activities, include ground disturbance, grubbing, grading, and soil export. Said plan shall include but not be limited to the following best management practices:
    - Chemically treat soil where activity will cease for at least four consecutive days;
    - All construction grading operations and earth moving operations shall cease when winds exceed 25 miles per hour;
    - Water site and equipment morning and evening and during all earth-moving operations;
    - Operate street-sweepers on paved roads adjacent to site;
    - Establish and strictly enforce limits of grading for each phase of development; and/or

- Stabilize and re-vegetate areas of temporary disturbance needed to accomplish each phase of development.
- Wash off trucks as they leave the project site as necessary to control fugitive dust emissions.
- Cover all transported loads of soils, wet materials prior to transport, provide adequate freeboard (space from the top of the material to the top of the truck) to reduce PM10 and deposition of particulate matter during transportation.
- Use track-out reduction measures such as gravel pads at project access points to minimize dust and mud deposits on roads affected by construction traffic.

2. SCAQMD Rule 402: The project shall adhere to nuisance odor requirement.

3. SCAQMD Rule 1113: The project shall use low VOC content architectural coatings and paints per the requirements of this Rule.

Recommended Control Measures

Although project related air emissions are expected to be less than significant, the following control measures are recommended to further limit air quality emissions:

1. To reduce particulate matter and NOx emissions construction equipment should utilize aqueous diesel fuels, diesel particulate filters and diesel oxidation catalyst during all construction activities.

2. All construction equipment should be properly serviced and maintained in optimal operating condition.

3. Construction equipment should not be left idling for more than five minutes.

4. Diesel-powered construction equipment shall utilize aqueous diesel fuels, and be equipped with diesel oxidation catalysts.

5. Onsite landscaping, if any, should be equipped with efficient irrigation and a low water demanding plant pallet to minimize water use onsite, which also reduces onsite energy expenditures and any air quality emissions associated with the production of energy.

6. Onsite lighting should utilize energy efficient technology such as sensors, timers, and LED to minimize energy demand from lighting.

7. As feasible, construction waste should be recycling to reroute waste from landfills and minimize the project's contribution to the landfill.

8. The contractor shall notify the City of the start and end of grading and construction activities in conformance and within the time frames established in the 2003 PM_{10} State Implementation Plan.

9. Construction staging and management plans shall be reviewed and conditioned to require the application of all reasonably available methods and technologies to assure the minimal emissions of pollutants from the development. The City Engineer shall review grading plan

applications to ensure compliance with the mitigation measures set forth in this document and as otherwise conditioned by the City.

10. As part of the construction staging and management plans, the contractor shall concurrently submit a dust control plan consistent with the City's Air Quality Management Plan. Mitigation measures to be implemented through this plan include but are not limited to the use of water trucks and temporary irrigation systems, post-grading soil stabilization, phased roadway preparation and paving, as well as other measures which will effectively limit fugitive dust and other emissions.

11. Construction equipment and materials shall be sited as far away from residential and park uses as practicable.

IV. BIOLOGICAL RESOURCES **Would the project:**	Potentially Significant Impact	Less Than Significant With Mitigation Incorporated	Less Than Significant Impact	No Impact
a) Have a substantial adverse effect, either directly or through habitat modifications, on any species identified as a candidate, sensitive, or special status species in local or regional plans, policies, or regulations, or by the California Department of Fish and Game or U.S. Fish and Wildlife Service?	☐	☐	☐	☒
b) Have a substantial adverse effect on any riparian habitat or other sensitive natural community identified in local or regional plans, policies, or regulations or by the California Department of Fish and Game or US Fish and Wildlife Service?	☐	☐	☐	☒
c) Have a substantial adverse effect on federally protected wetlands as defined by Section 404 of the Clean Water Act (including, but not limited to, marsh, vernal pool, coastal, etc.) through direct removal, filling, hydrological interruption, or other means?	☐	☐	☐	☒
d) Interfere substantially with the movement of any native resident or migratory fish or wildlife species or with established native resident or migratory wildlife corridors, or impede the use of native wildlife nursery sites?	☐	☐	☐	☒
e) Conflict with any local policies or ordinances protecting biological resources, such as a tree preservation policy or ordinance?	☐	☐	☐	☒
f) Conflict with the provisions of an adopted Habitat Conservation Plan, Natural Community Conservation Plan, or other approved local, regional, or state habitat conservation plan?	☐	☐	☐	☒

(Sources: "Agua Caliente Tribal Habitat Conservation Plan," August 2010; "Coachella Valley Multiple Species Habitat Conservation Plan," 2007)

Discussion of Impacts

a-f) **No Impact.** The subject site is located in an urban area and surrounded on all sides by paved roads and resort, commercial, and residential development. It is entirely developed with paved parking lots and office buildings. Biological resources are limited to ornamental vegetation along the site perimeter, within parking lots, and adjacent to the office buildings.

The site is not known to contain sensitive or special-status species. It does not contain any streams, riparian habitat, marshes, protected wetlands, or other waters or related habitat. It is completely surrounded by urban development and has no potential to serve as a migratory wildlife corridor or nursery site. It does not contain any trees or other biological features that are protected by local policies or ordinances, and the proposed project will not conflict with any such policies.

The project will not conflict with the policies or intent of a habitat conservation plan or natural community conservation plan. The site is located within the boundaries of the Tribal Habitat Conservation Plan (HCP) of the Agua Caliente Band of Cahuilla Indians. It is within the HCP's Valley Floor Planning Area (VFPA) and, therefore, will be required to pay the VFPA Fee.

The property is also located within the boundaries of the Coachella Valley Multiple Species Habitat Conservation Plan (CV MSHCP). However, because the project will be required to pay Tribal Habitat Conservation Plan VFPA Fee, it will not be subject to payment of any fees associated with the CV MSHCP. No additional mitigation is required.

V. CULTURAL RESOURCES Would the project:	Potentially Significant Impact	Less Than Significant With Mitigation Incorporated	Less Than Significant Impact	No Impact
a) Cause a substantial adverse change in the significance of a historical resource as defined in 15064.5?	☐	☐	☐	☒
b) Cause a substantial adverse change in the significance of an archaeological resource pursuant to 15064.5?	☐	☒	☐	☐
c) Directly or indirectly destroy a unique paleontological resource or site or unique geologic feature?	☐	☐	☐	☒
d) Disturb any human remains, including those interred outside of formal cemeteries?	☐	☐	☒	☐

(Sources: City of Palm Springs General Plan, 2007; Section 14 Specific Plan, City of Palm Springs, July 2014.)

Setting

The City is located in the traditional territory of the Desert Cahuilla, with a history dating back to 1,000 BC. Evidence of Cahuilla occupation in the Coachella Valley dates to over 500 years ago, when the Tribe settled around ancient Lake Cahuilla, in the area of present day La Quinta and Indio. The canyons surrounding Palm Springs also have yielded evidence of use by the Tribe, which took advantage of water sources, food sources from plants and animals, and rock for tool-making.

The City's modern history began in the early 1870s, when John Guthrie McCallum purchased land in the area, and later subdivided it. Rapid expansion in the area began in the 1920s, with the City's spreading reputation as a health resort, and the increased interest from the Hollywood movie community. Until the end of World War II, architecture in the City consisted primarily of Mission Revival and Spanish Colonial Revival structures. Development was centered around Palm Canyon Drive, as hotels and shops were constructed.

The City occurs well outside the boundary of ancient Lake Cahuilla, an area where paleontological resources have occurred. Further, soils in the City are generally post-Pleistocene age alluvium from the surrounding mountains, too new in the context of paleontology to yield fossilized remains.

Discussion of Impacts

a) ***No Impact.*** The project site is fully developed with a parking lot and 1971 vintage office buildings. The existing buildings do not qualify or meet the criteria of a historical resource as defined in Section 15064.5. The existing buildings are not listed as a state historical resource of significance, nor are the buildings locally listed with the City of Palm Springs. No impacts to historic resources are expected to occur as a result of build out of the proposed project.

b) ***Less than Significant Impact with Mitigation.*** The project site occurs within the boundaries of the Section 14 Master Plan. The EIR prepared for that project identified the potential for buried resources throughout the area, including the project site. However, the site has been previously developed, and the potential for buried remains to be unearthed is considered low. Nonetheless, the following mitigation measure shall be implemented.

MM V-1 As there is always a possibility of buried cultural and paleontological resources in a project area, a Native American Monitor(s) shall be present during all ground disturbing activities including clearing and grubbing, excavation, burial of utilities, planting of rooted plants, etc., The Agua Caliente Band of Cahuilla Indian Cultural Office shall be contacted for additional information on the use and availability of Cultural Resource Monitors. Should buried cultural deposits be encountered, the Monitor shall contact the Director of Planning Services. Following consultation, the Director shall have the authority to halt destructive construction and shall notify a qualified archaeologist to investigate the find. If necessary, the qualified archaeologist shall prepare a treatment plan for submission to the State Historic Preservation Officer and Agua Caliente Cultural Resource Coordinator for approval. Human remains discovered shall be handled consistent with state law provisions.

c) ***No Impact.*** The City and project site are outside the shoreline of ancient Lake Cahuilla. The site is underlain by alluvium which is post-Pleistocene, and not suitable for paleontological resources. Development of the project site will have no impact on paleontological resources.

d) ***Less than Significant Impact.*** No known burial ground or cemetery occurs on the project site. Excavation for existing development on the site would likely have identified such remains. Excavation for the parking structure, however, is likely to occur to a greater depth than has been excavated in the past. Should human remains be discovered during construction of the proposed project, the project contractor would be subject to State law regarding the discovery and disturbance of human remains. In that circumstance, the project contractor is required to immediately notify law enforcement, and allow the coroner to determine the nature of the remains (historic or pre-historic, human or not). The coroner is also responsible for the proper removal and potential re-burial of the remains, and consultation with Tribal officials, if the remains are determined to be Native American. As a result of these State requirements, impacts to human remains are expected to be less than significant.

VI. GEOLOGY AND SOILS **Would the project:**	Potentially Significant Impact	Less Than Significant With Mitigation Incorporated	Less Than Significant Impact	No Impact
a) Expose people or structures to potential substantial adverse effects, including the risk of loss, injury, or death involving:				
i) Rupture of a known earthquake fault, as delineated on the most recent Alquist-Priolo Earthquake Fault Zoning Map issued by the State Geologist for the area or based on other substantial evidence of a known fault? Refer to Division of Mines and Geology Special Publication 42.	☐	☐	☐	☒
ii) Strong seismic ground shaking?	☐	☐	☒	☐
iii) Seismic-related ground failure, including liquefaction?	☐	☐	☐	☒
iv) Landslides?	☐	☐	☐	☒
b) Result in substantial soil erosion or the loss of topsoil?	☐	☐	☒	☐
c) Be located on a geologic unit or soil that is unstable, or that would become unstable as a result of the project, and potentially result in on- or off-site landslide, lateral spreading, subsidence, liquefaction or collapse?	☐	☐	☐	☒
d) Be located on expansive soil, as defined in Table 18-1-B of the Uniform Building Code (1994), creating substantial risks to life or property?	☐	☐	☐	☒
e) Have soils incapable of adequately supporting the use of septic tanks or alternative wastewater disposal systems where sewers are not available for the disposal of wastewater?	☐	☐	☐	☒

(Sources: Figures 6-1, 6-2, 6-3, and 6-4, 2007 Palm Springs General Plan; "Soil Survey of Riverside County, California, Coachella Valley Area," U.S. Department of Agriculture Soil Conservation Service, 1980; "Preliminary Water Quality Management Plan: Aberdeen Residential," Walden and Associates, January 19, 2015; "Preliminary Drainage Study for Prairie Schooner," Walden and Associates, December 2014)

Discussion of Impacts

a.i) **No Impact.** The subject property is not located within or adjacent to an Alquist-Priolo Earthquake Fault Zone, and no impacts associated with fault rupture will occur onsite. The nearest fault zones are located along the Banning Pass Fault, approximately 5 miles northeast of the site, and the San Jacinto Fault System approximately 5 miles to the south.

a.ii) **Less Than Significant Impact.** Numerous active faults are located in the Coachella Valley. During a significant seismic event, the City will be subjected to significant ground acceleration, and onsite structures could sustain damage. To reduce impacts from seismic ground shaking and provide collapse-resistant design, the City requires that all structures be constructed to Uniform Building Code (UBC) requirements for Seismic Zone 4. The proposed project will be required to conform to these standards and, therefore, impacts are expected to be less than significant.

a.iii) **No Impact.** Liquefaction is the loss of soil cohesion due to exposure to shallow groundwater or a seismic event. Liquefied soils cannot support structures and can cause structural failures. For liquefaction to occur, groundwater levels must be within 50 feet of the ground surface.

The subject property is located on the valley floor in an area with low liquefaction susceptibility. Its near surface soils consist of fine to gravelly sand and older alluvial sediments. Onsite groundwater depths are estimated to be greater than 50 feet below the ground surface. No project-related impacts associated with liquefaction will occur.

a.iv) **No Impact.** The proposed project site is on the valley floor. It consists of, and is surrounded by, relatively flat terrain. The nearest hillsides and mountainous slopes are approximately ½ mile west of the property. No impacts associated with landslides will occur.

b) **Less Than Significant Impact.** The subject site is located on the valley floor and is susceptible to wind erosion. The proposed project will require demolition of existing structures and parking lots, grading, paving, and other ground disturbance by heavy machinery, which will contribute to temporary wind erosion impacts. Water erosion could occur as a result of site watering during the development process and post-construction operations.

However, the site has been graded and developed in the past, and the terrain is largely flat. The project will not require substantial grading. The mitigation measures provided in the Air Quality section of this Initial Study will reduce impacts associated with wind erosion to less than significant levels. The project will be required to comply with the requirements of the National Pollutant Discharge Elimination Systems (NPDES) and the Best Management Practices (BMP) set forth in the project-specific Water Quality Management Plan (WQMP) to assure that water erosion is reduced to less than significant levels. Post-construction water runoff will be collected by a private storm drain system and retained via an underground retention system.

c) **No Impact.** The subject site does not contain unstable soils or geologic units. As described in VI.a, above, the site is not susceptible to liquefaction due to its soil composition and depth to groundwater. It is not susceptible to landslide due to distance from mountainous slopes and foothills. The site was previously graded to accommodate

construction of the existing facilities, and grading was conducted in compliance with City standards.

The City will require additional project-specific geotechnical and structural engineering analysis, as necessary, to determine whether additional soil remediation or compaction is required.

d) **No Impact.** Onsite soils consist of Carsitas gravelly sand (0 to 9 percent slopes) and Myoma fine sand (0 to 5 percent slopes), which have a low shrink-swell potential. No impacts associated with expansive soils will occur.

e) **No Impact.** The project will connect to the City's existing sewer system. No septic tanks or alternative wastewater disposal systems are proposed. No adverse impacts will occur.

VII. GREENHOUSE GAS EMISSIONS Would the project:	Potentially Significant Impact	Potentially Significant Unless Mitigation Incorporated	Less Than Significant Impact	No Impact
a) Generate greenhouse gas emissions, either directly or indirectly, that may have significant impact on the environment?	☐	☐	☒	☐
b) Conflict with an applicable plan, policy or regulation adopted for the purpose of reducing the emissions of greenhouse gases?	☐	☐	☒	☐

(Sources: CalEEMod Version 2013.2.2)

a, b) ***Less than Significant Impact.*** The proposed project will generate greenhouse gas (GHG) emissions during both construction and operation. As mentioned in Section III.A (Construction Emissions), CalEEMod was used to quantify air quality emission projections, including greenhouse gas emissions. Construction related greenhouse gas emissions will be temporary and will end once the project is completed. Operation of the proposed project will create on-going greenhouse gases through area source emissions such as landscaping and off-gassing from the pavement. Table VII-1 provides projected short-term and annual GHG generation associated with Aberdeen.

Table VII-1
Projected GHG Emissions Summary
(Metric Tons)

Phase	CO2e
Construction (1 year)	417.75
Operational 2016 (Annually)	1,116.47

Source: CalEEMod Version 2013.2.2.
See Appendix A

There are currently no adopted thresholds of significance for GHG emissions for construction or operation of projects of this nature. It is recognized that GHG impacts are intrinsically cumulative. As such, project construction will be conducted in a manner that is consistent with applicable rules and regulation pertaining to the release and generation of GHG's. The proposed project will have a less than significant impact on the environment from the emission of GHG's and will not conflict with any applicable GHG plans, policies or regulations.

VII. HAZARDS AND HAZARDOUS MATERIALS **Would the project:**	Potentially Significant Impact	Less Than Significant With Mitigation Incorporated	Less Than Significant Impact	No Impact
a) Create a significant hazard to the public or the environment through the routine transport, use, or disposal of hazardous materials?	☐	☒	☐	☐
b) Create a significant hazard to the public or the environment through reasonably foreseeable upset and accident conditions involving the release of hazardous materials into the environment?	☐	☒	☐	☐
c) Emit hazardous emissions or handle hazardous or acutely hazardous materials, substances, or waste within one-quarter mile of an existing or proposed school?	☐	☐	☐	☒
d) Be located on a site which is included on a list of hazardous materials sites compiled pursuant to Government Code Section 65962.5 and, as a result, would it create a significant hazard to the public or the environment?	☐	☐	☐	☒
e) For a project located within an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport, would the project result in a safety hazard for people residing or working in the project area?	☐	☐	☐	☒
f) For a project within the vicinity of a private airstrip, would the project result in a safety hazard for people residing or working in the project area?	☐	☐	☐	☒
g) Impair implementation of or physically interfere with an adopted emergency response plan or emergency evacuation plan?	☐	☐	☐	☒
h) Expose people or structures to a significant risk of loss, injury or death involving wildland fires, including where wildlands are adjacent to urbanized areas or where residences are intermixed with wildlands?	☐	☐	☐	☒

(Sources: "Preliminary Environmental Site Assessment – Phase I, City Parking Lot, APN 508-055-007 and -008," California Environmental, January 2006; "Preliminary Environmental Site Assessment – Phase I, Commercial Property APN 508-055-006," California Environmental, December 2006; "Environmental Site Assessment – Phase I, Commercial Property APN 508-055-003," California

Environmental, April 2007; Envirostor map database, California Department of Toxic Substances Control, accessed February 5, 2015; "Riverside County Airport Land Use Compatibility Plan Policy Document," March 2005).

Discussion of Impacts

Three project-specific Phase I Environmental Site Assessments were prepared for the project including "Preliminary Environmental Site Assessment – Phase I, City Parking Lot, APN 508-055-007 and -008," California Environmental, January 2006; "Preliminary Environmental Site Assessment – Phase I, Commercial Property APN 508-055-006," California Environmental, December 2006; and "Environmental Site Assessment – Phase I, Commercial Property APN 508-055-003," California Environmental, April 2007.

a-b) Less Than Significant Impact with Mitigation Incorporated.

The proposed project will result in the construction of townhomes, live/work units, a community gym, and a commercial building. Limited quantities of paints, solvents, architectural coatings, and similar agents will be transported to and used onsite during the construction process. A vehicle staging area will be used during the construction phase of the project to minimize potential fuel or oil spills and the risk of explosion or accidental chemical release. The project will be required to adhere to applicable local, State, and federal laws pertaining to occupational safety and disposal of hazardous waste.

Over the long-term, residents can be expected to store and use various chemicals for routine household and landscaping purposes. Similar cleansers and chemicals will be stored and used at the commercial site. Chlorine and related chemicals will be stored and used for swimming pool/spa operation and maintenance. None of these will be used in sufficient quantities as to pose a threat to humans or cause a foreseeable chemical release into the environment.

Phase I Site Assessments

Three (3) Phase I Environmental Site Assessments were conducted on the subject property to evaluate the potential for hazardous materials impacts to soil and groundwater beneath the site. One report addressed the existing parking lot, one addressed the two westernmost office buildings, and one addressed the two easternmost buildings.

No evidence of the use, storage, disposal or generation of hazardous substances was observed onsite, and there is no evidence of aboveground or underground storage tanks, grease interceptors, or sumps onsite. No further research or subsurface assessment activities were recommended.

Two of the existing office buildings were built in 1973 and two were built in 1976. Therefore, there is the potential for asbestos containing materials (ACM) and lead based paint to have been used in their construction. Suspect ACM was observed in the form of ceiling tiles and linoleum. During demolition, the proper handling, transport, and disposal of such materials must be assured. In order to assure that impacts associated with asbestos are mitigated to less than significant levels, the following mitigation measure shall be implemented.

Mitigation Measure

MM VII-1: Prior to the issuance of demolition permits, an asbestos and lead survey shall be conducted by a certified asbestos and lead consultant, and a report shall be provided to the City Building Official. Should asbestos- and/or lead-containing materials be found, the project proponent shall submit to the Building Official a remediation and disposal plan to be conducted by a qualified, licensed specialist in the disposal of hazardous materials. The plan shall include specifics regarding the method of removal, transport, and disposal for all such materials.

c) **No Impact.** No schools are located or planned within one quarter mile of the project site. There will be no impact to schools.

d) **No Impact.** The proposed project site is not included on a list compiled pursuant to Government Code Section 65962.5. The proposed project will not create a significant hazard to the public or environment.

e-f) **No Impact.** The Palm Springs International Airport is located approximately 1½ miles east of the subject property. The property is not located within the boundaries of the airport's land use compatibility plan. The property is not located in the vicinity of a private airstrip. The project will not result in safety hazards for people living or working in the area.

g) **No Impact.** The proposed project will be accessible from East Andreas Road, Calle Alvarado, and Calle El Segundo, all of which are built out streets. The project will not alter the existing circulation pattern in the project area or adversely impact evacuation plans for those streets. The internal circulation plan will be reviewed by the Fire Department to assure that roads and driveways are adequate for emergency vehicles. A construction traffic plan will be required to assure that the project does not interfere with emergency access during the construction phase.

h) **No Impact.** The subject property is located in an urban area and surrounded on all sides by development. The nearest wildlands are the foothills of the San Jacinto Mountains, approximately ½ mile to the west. The property is not susceptible to wildfire hazards, and the proposed project will not expose people or structures to significant risks associated with wildland fires.

VIII. HYDROLOGY AND WATER QUALITY **Would the project:**	Potentially Significant Impact	Less Than Significant With Mitigation Incorporated	Less Than Significant Impact	No Impact
a) Violate any water quality standards or waste discharge requirements?	☐	☐	☒	☐
b) Substantially deplete groundwater supplies or interfere substantially with groundwater recharge such that there would be a net deficit in aquifer volume or a lowering of the local groundwater table level (e.g., the production rate of pre-existing nearby wells would drop to a level which would not support existing land uses or planned uses for which permits have been granted)?	☐	☐	☒	☐
c) Substantially alter the existing drainage pattern of the site or area, including through the alteration of the course of a stream or river, in a manner which would result in substantial erosion or siltation on- or off-site?	☐	☐	☒	☐
d) Substantially alter the existing drainage pattern of the site or area, including through the alteration of the course of a stream or river, or substantially increase the rate or amount of surface runoff in a manner which would result in flooding on- or off-site?	☐	☐	☒	☐
e) Create or contribute runoff water which would exceed the capacity of existing or planned stormwater drainage systems or provide substantial additional sources of polluted runoff?	☐	☐	☒	☐
f) Otherwise substantially degrade water quality?	☐	☐	☐	☒
g) Place housing within a 100-year flood hazard area as mapped on a federal Flood Hazard Boundary or Flood Insurance Rate Map or other flood hazard delineation map? (Source:	☐	☐	☐	☒
h) Place within a 100-year flood hazard area structures which would impede or redirect flood flows?	☐	☐	☐	☒

VIII. HYDROLOGY AND WATER QUALITY **Would the project:**	Potentially Significant Impact	Less Than Significant With Mitigation Incorporated	Less Than Significant Impact	No Impact
i) Expose people or structures to a significant risk of loss, injury or death involving flooding, including flooding as a result of the failure of a levee or dam?	☐	☐	☒	☐
j) Inundation by seiche, tsunami, or mudflow?	☐	☐	☐	☒

(Sources: "Preliminary Drainage Study for Prairie Schooner in the City of Palm Springs, CA," Walden & Associates, December 2014; "Preliminary Water Quality Management Plan for Aberdeen Residential," Walden & Associates, January 19, 2015; "City of Palm Springs Local Hazard Mitigation Plan," August 2012; Figure 6-5, Palm Springs General Plan, 2007; Flood Insurance Rate Map #06065C1558G, Federal Emergency Management Agency, August 28, 2008.)

Discussion of Impacts

A project-specific Preliminary Drainage Study and Preliminary Water Quality Management Plan was prepared for the project ("Preliminary Drainage Study for Prairie Schooner in the City of Palm Springs, CA," Walden & Associates, December 2014 and Preliminary Water Quality Management Plan for Aberdeen Residential," Walden & Associates, January 19, 2015).

a) **Less Than Significant Impact.** The proposed project will comply with all applicable local, State, and federal water quality standards and wastewater discharge requirements. The project will be connected to existing water and sewer lines, and wastewater will be transported to and processed at the City's Wastewater Treatment Plant (WTP). The WTP complies with the requirements of the Regional Water Quality Control Board pertaining to water quality standards and waste discharge. Project-generated runoff will be collected by a private storm drain system and retained with a proposed underground retention system.

The City will require compliance with the National Pollutant Discharge Elimination System (NPDES). The project-specific Preliminary Water Quality Management Plan (WQMP) identifies a wide range of Best Management Practices (BMPs) that will be incorporated into the project to minimize the pollutant load associated with urban runoff and assure the project complies with the requirements of the City and Regional Water Quality Control Board. As a result of these measures, the impacts associated with water quality will be less than significant.

b) **Less Than Significant Impact.** The proposed project will increase the demand for water supplies and services, but will not substantially deplete water supplies or interfere with groundwater recharge. In the short-term, water will be required for site grading. At buildout, the project will include dwelling units, live/work units, a commercial site, two swimming pools, and a spa that will require water supplies and services. The project will connect to existing water lines, and no new wells or additional off-site water infrastructure are proposed.

The Desert Water Agency (DWA) provides domestic water to the project area. Its primary source of water is groundwater extracted by deep wells, which is replenished with Colorado River water. A lesser amount of water comes from regional mountain streams. DWA is a participant in the Coachella Valley Regional Water Management Group that prepared an Integrated Regional Water Management Plan (draft WMP, November 2013). The WMP indicates that long-term regional demand for potable water is expected to increase; however, with continued conservation measures and replenishment of groundwater, sufficient supplies will be available to meet demand. The proposed project will be required to comply with DWA's and the City's water-efficiency requirements, including the use of drought-tolerant planting landscape materials and limited irrigation for landscaping. Implementation of City and DWA conservation requirements will assure that project-related impacts to water supplies will be less than significant.

c-e) **Less Than Significant Impact.** The project is not expected to result in erosion, siltation, or flooding on or off-site, or generate runoff that exceeds the capacity of planned or existing drainage facilities. The subject property is relatively flat and fully developed with office buildings and paved parking lots. No streams or rivers are located onsite. Project features will include asphalt/concrete pavement, hardscape, and landscape. The project proposes a system of onsite storm drains and pipes which will be connected to existing public storm drain facilities located in Calle El Segundo. No vehicle maintenance, repair, washing or cleaning facilities are proposed.

The project drainage study evaluated existing and post-construction stormwater generation for various storm events and durations. It determined that stormwater flows from the proposed project will be less than existing flows generated onsite. Specifically, existing onsite development generates a volume of 3.56 acre-feet during a 24-hour duration 100-year flood, whereas the proposed project would generate a volume of 2.22 acre-feet. This represents a reduction of 1.34 acre-feet (37%) over existing conditions. The WQMP determined also that the project's post-development runoff flow rate, volume, velocity, and duration will be less than existing conditions for the 2-year 24-hour and 10-year 24-hour rainfall events. Best Management Practices will be incorporated into the site design, including minimizing impervious surfaces and footprints and minimizing areas directly connected to impervious surfaces.

f) **No Impact.** As described in VIII.a, above, the project will be required to comply with all applicable water quality standards. It will incorporate a subsurface storm drain system and a range of Best Management Practices (BMPs) to minimize potential water quality degradation. All project components will be required to comply with City standards for the preservation of groundwater quality. No other water quality issues are expected to result from implementation of the proposed project.

g-h) **No Impact.** The subject property is not located in the 100-year floodplain. The northerly portion of the site is designated "Zone X," which represents "areas determined to be outside the 0.2% annual chance floodplain." The southerly portion of the site is designated "Zone X: Other Flood Areas," which represents "areas of 0.2% annual chance flood; areas of 1% annual chance flood with average depths of less than 1 foot or with drainage areas less than 1 square mile; and areas protected by levees from 1% annual chance flood."

i) **Less Than Significant Impact.** The project site is within the Dam Failure Inundation Pathway of the Tachevah Creek Detention Reservoir. The reservoir is located

approximately 1,200 feet downstream from the mouth of Tachevah Canyon in the San Jacinto Mountains west of the project site. It controls storm runoff and debris from a 3.2 square mile drainage area and protects the central part of the City from flooding. It is required by the California State Water Code to be monitored for structural safety. Potential risks and planned responses are addressed in the Palm Springs Local Hazard Mitigation Plan. Impacts to the subject property will be less than significant.

j) **No Impact.** No other hazards associated with sieche, tsunami, or mudflow will occur onsite. The site is not located in the vicinity of any other bodies of water which could be subject to seiche. Given its distance from the Pacific Ocean, the property is not subject to tsunamis.

IX. LAND USE AND PLANNING Would the project:	Potentially Significant Impact	Less Than Significant With Mitigation Incorporated	Less Than Significant Impact	No Impact
a) Physically divide an established community?	☐	☐	☐	☒
b) Conflict with any applicable land use plan, policy, or regulation of an agency with jurisdiction over the project (including, but not limited to the general plan, specific plan, local coastal program, or zoning ordinance) adopted for the purpose of avoiding or mitigating an environmental effect?	☐	☐	☐	☒
c) Conflict with any applicable habitat conservation plan or natural community conservation plan?	☐	☐	☐	☒

(Source: Section 14 Specific Plan, City of Palm Springs, July 2014; Palm Springs General Plan 2007)

Setting

The project site is governed by the policies and land use designations of the Section 14 Master Plan. The project site is designated Retail/Entertainment/Office (REO) and Resort Attraction (RA) on the Section 14 Master Plan land use map.

The City of Palm Springs participates in the Coachella Valley Multiple Species Habitat Conservation Plan (CVMSHCP) and the Agua Caliente Tribal Habitat Conservation Plan, as discussed above under Biological Resources.

Discussion of Impacts

a) ***No Impact.*** The project site is fully developed in office and parking lot land uses. A self-contained condominium community occurs immediately north of the project site. The development of the proposed project will not divide that community. No impacts are expected.

b) ***No Impact.*** The REO and RA designations in the Section 14 Master Plan allow multi-family residential and live-work developments. In the REO and RA designations, the multi-family land use will require approval of a conditional use permit. The live-work units will require approval of a land use permit for the REO designation, and a conditional use permit for the RA designation. The project will be required to adhere to Section 14 development standards and requirements. The proposed project is therefore consistent with the Master Plan. There will be no impact to land use plans as a result of the proposed project.

c) ***No Impact.*** As described in Section IV, Biological Resources, the City of Palm Springs participates in the Coachella Valley Multiple Species Habitat Conservation Plan (CVMSHCP) and the Agua Caliente Tribal Habitat Conservation Plan. The property is within the boundaries of the both Plans, and therefore, the project proponent will be required to pay a mitigation fee as mitigation for any potential impacts to sensitive biological species. The proposed project will not conflict with the provisions of either Plan.

X. MINERAL RESOURCES **Would the project:**	Potentially Significant Impact	Less Than Significant With Mitigation Incorporated	Less Than Significant Impact	No Impact
a) Result in the loss of availability of a known mineral resource that would be of value to the region and the residents of the state?	☐	☐	☐	☒
b) Result in the loss of availability of a locally important mineral resource recovery site delineated on a local general plan, specific plan or other land use plan?	☐	☐	☐	☒

(Sources: Palms Springs General Plan 2007)

Discussion of Impacts

a,b) **No Impact.** As shown in the Mineral Land Classification Map for the project area, the project site is located in Mineral Zone MRZ-3, which indicates an area containing mineral deposits; however the significance of these deposits cannot be evaluated from available data. The project site occurs in an urban setting and is not designated for mineral resource land uses. The proposed project would result in no impacts to mineral resources.

XI. NOISE Would the project result in:	Potentially Significant Impact	Less Than Significant With Mitigation Incorporated	Less Than Significant Impact	No Impact
a) Exposure of persons to or generation of noise levels in excess of standards established in the local general plan or noise ordinance, or applicable standards of other agencies?	☐	☐	☒	☐
b) Exposure of persons to or generation of excessive groundborne vibration or groundborne noise levels?	☐	☐	☒	☐
c) A substantial permanent increase in ambient noise levels in the project vicinity above levels existing without the project?	☐	☐	☒	☐
d) A substantial temporary or periodic increase in ambient noise levels in the project vicinity above levels existing without the project?	☐	☒	☐	☐
e) For a project located within an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport, would the project expose people residing or working in the project area to excessive noise levels?	☐	☐	☐	☒
f) For a project within the vicinity of a private airstrip, would the project expose people residing or working in the project area to excessive noise levels?	☐	☐	☐	☒

(Sources: Palm Springs General Plan 2007)

Discussion of Impacts

a) **Less than Significant Impact**. The main source of off-site exterior noise impacting the project will be generated from traffic along surrounding roadways, including Tahquitz Canyon Way, Calle El Segundo, Calle Alvarado, and Andreas Road. According to the General Plan (Exhibit 8-5), future noise levels along project specific portions of these roadways are projected to range from 65-70 CNEL.

Development of the site will also result in short term impacts associated with construction noise. These impacts are temporary and will cease when in operation. Construction noise is regulated by the Municipal Code and required to occur during the noisier daytime hours, which helps to lower the potential impacts.

Permanent increases in ambient noise levels will be less than significant during long-term operation of the project. The City will require compliance with Building Code standards

for interior noise levels, including the preparation of noise analyses to demonstrate that interior noise levels will meet these requirements.

Noise levels generated by project activities will be consistent with a medium-density residential neighborhood and commercial/retail facility, and permanent noise sources will be limited to typical household appliances, landscape maintenance equipment, and vehicles accessing the property. Long-term noise impacts are expected to be less than significant.

b) **Less than Significant Impact.** Temporary and periodic ground borne vibration may occur during demolition and construction of the project, particularly as heavy equipment grades the site, but these will cease once in operation. In addition, the proposed project will be required to comply with construction hours provided in the Municipal Code. Construction hours are limited to the less sensitive daytime hours, further reducing potential impacts associated with groundborne noise and vibration. Impacts are therefore expected to be less than significant.

c) **Less than Significant Impact.** The proposed project's contribution to area noise levels will primarily be from vehicles on area roadways. As described above, noise levels in the area of the proposed project in the long term will range from 65 to 70 dBA CNEL with or without the project. Permanent increases in ambient noise levels will be less than significant during operation of the project. The City will require compliance with Building Code standards for interior noise levels, including the preparation of noise analyses to demonstrate that interior noise levels will meet City requirements. Noise levels generated by project activities will be consistent with the surrounding residential and commercial/retail uses, and permanent noise sources will be limited to typical household appliances, landscape maintenance equipment, and vehicles accessing the property. Long-term noise impacts are expected to be less than significant.

d) **Less than Significant Impact with Mitigation.** Demolition of existing structures and construction of the proposed project will result in elevated noise levels. The peak noise level for most of the equipment that would be used during construction on the project site ranges from 70 to 95 dBA at a distance of 50 feet. The construction activities on the project site will cause temporary increases in noise levels above the City's standards, but these increases will be temporary and periodic. Construction noise is regulated by the Municipal Code to occur during the noisier day time hours, which helps to lower the potential impacts.

Should heavy equipment be stored or maintained along the northern boundary of the proposed project site, however, the noise levels could potentially be sustained, which would result in a potentially significant impact, which requires mitigation.

Mitigation Measures

MM XI-1 Demolition and construction activities on-site shall occur only between 7:00 a.m. and 7:00 p.m., Monday-Friday, and 8:00 a.m. and 5:00 p.m. on Saturdays, and shall be prohibited on Sundays and holidays, as specified by the Palm Springs Municipal Code.

MM XI-2. All construction equipment, fixed or mobile, shall be equipped with properly operating and maintained mufflers and the engines shall be equipped with shrouds.

MM XI-3. Stationary equipment shall be placed such that emitted noise is directed away from Andreas Road and Calle El Segundo.

MM XI-4. Stockpiling and vehicle staging areas shall be located as far as practical from Andreas Road and Calle El Segundo.

MM XI-5. Delivery hours should be limited to 7 a.m. to 7 p.m. daily to minimize the potential for adverse impacts on the adjacent Plaza Villas.

e,f) **No Impact.** The proposed project is not located within noise contour boundaries of the Palm Springs International Airport (Figure 8-6 General Plan) and therefore will not expose future residents to excessive airport related noise levels. There are no private airstrips in Palm Springs so the project will not expose people living or working in the area to excessive noise levels.

XII. POPULATION AND HOUSING Would the project:	Potentially Significant Impact	Less Than Significant With Mitigation Incorporated	Less Than Significant Impact	No Impact
a) Induce substantial population growth in an area, either directly (for example, by proposing new homes and businesses) or indirectly (for example, through extension of roads or other infrastructure)?	☐	☐	☒	☐
b) Displace substantial numbers of existing housing, necessitating the construction of replacement housing elsewhere?	☐	☐	☐	☒
c) Displace substantial numbers of people, necessitating the construction of replacement housing elsewhere?	☐	☐	☐	☒

(Source: Palm Springs General Plan 2007; CA Department of Finance Table E-5 Population and Housing Estimates, May 1, 2014)

Discussion of Impacts

a) ***Less Than Significant Impact.*** The project will not induce substantial population growth, either directly or indirectly. The project proposes the development of 74 multi-family dwelling units and 17 live-work units. Based on the City's average household size of 1.98 persons (2014 CA Department of Finance), the project will have a population of approximately 180 residents at buildout. This represents less than one percent of the City's total population (46,135 persons, 2014 CA Department of Finance). Further, the project will be required to comply with the City's adopted policies and procedures regarding Community Facility Districts for development projects, as required by City Council Resolution 20304. This increase in population can be expected to be consistent with natural growth in the City, and will not induce growth either directly or indirectly.

No major infrastructure extensions will be required. Access will be taken from existing roads (Andreas Road, Calle El Segundo, and Calle Alvarado), and the project will connect to existing utility infrastructure located immediately adjacent to the project site.

b-c) ***No Impact.*** The subject property is currently occupied by office space and a parking lot, and no demolition of existing housing will occur. No residents will be displaced, and no replacement housing will be required elsewhere.

XIII. PUBLIC SERVICES **Would the project result in:**	Potentially Significant Impact	Less Than Significant With Mitigation Incorporated	Less Than Significant Impact	No Impact
Substantial adverse physical impacts associated with the provision of new or physically altered governmental facilities, need for new or physically altered governmental facilities, the construction of which could cause significant environmental impacts, in order to maintain acceptable service ratios, response times or other performance objectives for any of the public services:				
a) Fire protection?	☐	☐	☒	☐
b) Police protection?	☐	☐	☒	☐
c) Schools?	☐	☐	☒	☐
d) Parks?	☐	☐	☒	☐
e) Other public facilities?	☐	☐	☒	☐

(Sources: Palm Springs Fire Department; "Palm Springs Fire Department Service Report, 2013": Tables 5-1 and 5-3, Palm Springs General Plan, 2007; "Palm Springs Parks and Recreation Master Plan Draft," March 2014.)

Discussion of Impacts

a-e) Less Than Significant Impact. The proposed project will generate an estimated buildout population of approximately 180 residents, which represents an increase of 0.04% to the City population (46,134 persons in 2014). The project will increase the demand for public services. However, given the relatively limited population increase, impacts will not be substantial. No new or expanded public facilities will be required as a result of the project.

Fire Protection

The Palm Springs Fire Department will provide fire protection services to the proposed project. The nearest fire station to the subject property is Station 1 (441) at 277 N. Indian Canyon Drive, approximately 1/3 mile to the northwest. It is equipped with one engine staffed with 3 personnel per shift, and one reserve ladder truck and one quick attack truck which are staffed as needed. Fire personnel will be able to reach the site within the target five-minute response time. Project plans will be reviewed by the Fire Department to ensure they meet applicable fire standards and regulations.

Police Protection

The Palm Springs Police Department provides law enforcement services within the City limits. The Department is located at 200 S. Civic Drive, approximately ½ mile east of the project site. It is authorized to have 92 sworn officers and strives to meet a 5-minute

emergency response time. Police will be able to access the project, and the project will be required to comply with all Police Department regulations and procedures.

Schools

The Palm Springs Unified School District (PSUSD) provides public school services and facilities in the project area. The nearest schools to the project site are Palm Springs High School at 2401 E. Baristo Road, and Ramon Alternative Center at 2248 E. Ramon Road, both of which are approximately one mile to the southeast. Given the relatively limited population anticipated at buildout, the number of students generated by the project is not expected to result in the need for additional schools or facilities. The project will be required to pay State-mandated school fees to mitigate impacts to public schools.

Parks

The City currently has approximately 160 acres of developed park land, 305 acres of golf courses, and over 2,630 acres of city-owned open space lands. The project will increase the use of these facilities; however, given the relatively limited population anticipated at project buildout, the increase is not expected to be substantial or result in the need for new or expanded facilities. The project proposes 2 swimming pools, a spa, and an exercise gym, which will provide onsite recreational opportunities for community residents.

The City implements Quimby Act requirements for parklands. The proposed project will be subject to the Quimby Act, including payment of fees and/or providing parkland as required. Payment of such fees will reduce impacts to parks to less than significant levels.

Other Public Facilities

The project will be accessed from existing roads (E. Andreas Road, Calle Alvarado, and Calle Segundo) and will connect to existing utility infrastructure. No new public roads or public transportation facilities will be required.

XIV. RECREATION **Would the project:**	Potentially Significant Impact	Less Than Significant With Mitigation Incorporated	Less Than Significant Impact	No Impact
a) Increase the use of existing neighborhood and regional parks or other recreational facilities such that substantial physical deterioration of the facility would occur or be accelerated?	☐	☐	☒	☐
b) Does the project include recreational facilities or require the construction or expansion of recreational facilities, which might have an adverse physical effect on the environment?	☐	☐	☒	☐

Discussion of Impacts

a-b) Less Than Significant Impact. At buildout, the proposed project will include an estimated population of 180 residents. Increased usage of local and regional parks and recreational facilities is anticipated; however, it is not expected to cause substantial deterioration of existing facilities or the need for new or expanded facilities. Residents will have the opportunity to use proposed onsite recreational facilities, including two swimming pools, a spa, and a gym/fitness center.

To offset potential impacts to public parks and recreational facilities, the project will be required to pay City parkland impact fees.

XV. TRANSPORTATION/TRAFFIC **Would the project:**	Potentially Significant Impact	Less Than Significant With Mitigation Incorporated	Less Than Significant Impact	No Impact
a) Cause an increase in traffic which is substantial in relation to the existing traffic load and capacity of the street system (i.e., result in a substantial increase in either the number of vehicle trips, the volume to capacity ratio on roads, or congestion at intersections)?	☐	☐	☒	☐
b) Exceed, either individually or cumulatively, a level of service standard established by the county congestion management agency for designated roads or highways?	☐	☐	☒	☐
c) Result in a change in air traffic patterns, including either an increase in traffic levels or a change in location that results in substantial safety risks?	☐	☐	☐	☒
d) Substantially increase hazards due to a design feature (e.g., sharp curves or dangerous intersections) or incompatible uses (e.g., farm equipment)?	☐	☐	☐	☒
e) Result in inadequate emergency access?	☐	☐	☐	☒
f) Conflict with adopted policies, plans, or programs regarding public transit, bicycle, or pedestrian facilities, or otherwise decrease the performance or safety of such facilities?	☐	☐	☐	☒

(Sources: "Hard Rock Hotel – Palm Springs Traffic Impact Study," prepared by Endo Engineering, July 2007; "Aberdeen Mixed-Use Development Trip Generation," Prepared by Endo Engineering, January 20, 2015.)

Setting

The proposed project is located in the City's urban core and is surrounded by existing streets, including Tahquitz Canyon Way, Calle El Segundo, and Andreas Road. The proposed project includes a primary access drive on Andreas Road, and a secondary access point from Calle El Segundo.

Project access from Calle Alvarado is yet to be determined. The final design for Calle Alvarado is yet to be approved by the City Engineer and may be improved to accommodate two-way traffic, one-way traffic or a pedestrian paseo with emergency vehicle access only. The Section 14 Specific Plan allows all three alternatives. According to the City Engineer, fair-share payment or installation of a traffic signal at the Tahquitz Canyon Way / Calle Alvarado intersection may be required.

A traffic impact study was prepared for the previously proposed project[1] in 2007, The Hard Rock Hotel. A Traffic Letter was prepared in January 2015 to provide further analysis and supplemental trip generation information for the proposed Aberdeen mixed-use development. The analysis and results of the study are the basis of the discussion below.

Discussion of Impacts

a-b) ***Less than Significant Impact.*** The original traffic analysis (2007) studied seven area intersections, 5 of which are currently unsignalized, and two of which are currently signalized, including:

Calle El Segundo/Amado Road (4 way stop)
Avenida Caballeros/Amado Road (4 way stop)
Calle El Segundo/Andreas Road (4 way stop)
Calle Alvarado/Amado Road (2 way stop)
Calle Alvarado/Tahquitz Canyon Way (2 way stop)
Calle El Segundo/Tahquitz Canyon Way (signalized)
Avenida Caballeros/Tahquitz Canyon Way (signalized)

The 2007 analysis found that all intersections, both signalized and unsignalized, operated at Level of Service C (LOS C) or better during both the mid-day and evening peak hours in 2007, and the previously proposed buildout year of 2009. Although the 2007 study found that opening year traffic operations with the addition of the proposed project will result in acceptable levels of service, the long term traffic impacts of the proposed project, cumulative projects and ambient traffic growth will result in a long term need for improvements, in order to assure that levels of service on local streets remain at acceptable levels.

The 2015 Traffic Letter provided updated trip generation information to compare traffic impacts associated with the previously approved the Hard Rock Hotel, the proposed Aberdeen mixed-use development, and four (4) other development scenarios. The trip generation summary is provided in Table XV-1.

Table XV-1
Trip Generation Summary

Development Scenario	Land Use Quantity	Midday Peak Hour (Total)	PM Peak Hour (Total)	Daily 2-Way
Existing Land Uses	Offices	161	190	1,550
Approved Hard Rock Hotel Traffic Study	Hotel 482 Rooms	322	402	5,070
Initial Study/Mitigated Negative Declaration	Hotel 499 Rooms	324	495	6,030
Section 14 Specific Plan Maximum Permitted	5.7 Ac. RA, 3.4 AC. REO	576	686	7,660
Max. Residential Alt.	273 DU	116	137	1,540
Aberdeen Mixed-Use Development	91 DU, 8,334 SF Commercial	121	108	1,070

Source: "Aberdeen Mixed-Use Development Trip Generation," Prepared by Endo Engineering, January 20, 2015.

[1] "Hard Rock Hotel – Palm Springs Traffic Impact Study," prepared by Endo Engineering, July 2007.

As shown in the summary table above, the proposed Aberdeen development would result in substantially fewer trips than the Hard Rock Hotel. The Aberdeen Mixed-Use Development would result in the lowest future trip generation of the scenarios evaluated and less than that of the existing land uses on days when the convention center parking fully utilizes the parking lot on the project site. Therefore, the proposed project is expected to have less than significant impacts on traffic flows and Level of Service ratings.

c) ***No Impact.*** The project will have no impact on the facilities or operations of regional airports, and will not result in a change in air traffic patterns, including an increase in traffic levels. The project is located more than 1½ miles west of the Palm Springs International Airport. The proposed development will not affect the operations of these airports nor create a substantial safety risks.

d) **No *Impact.*** The project will be developed in accordance with City design guidelines and will not create a substantial increase in hazards due to a design feature. The project's access point will be located with adequate sight distances, and sharp curves have been avoided. Project-generated traffic will be consistent with existing traffic in the area.

e) **No *Impact.*** Access to the planning area is via major arterials, secondary arterials, Interstate-10 and a variety of local roads. Emergency access will be provided and preserved onsite. Both the Fire Department and Police Department will review project plans to ensure safety measures are addressed, including emergency access. The proposed project will not result in inadequate emergency access.

f) ***No Impact.*** SunLine Transit operates bus routes on Tahquitz Canyon Drive and will provide public transit access to the proposed project. SunLine has adequate capacity in its system to accommodate the proposed project. The project design will not conflict with adopted policies, plans, or programs regarding public transit, bicycle, or pedestrian facilities, or otherwise decrease the performance or safety of such facilities.

XVI. UTILITIES AND SERVICE SYSTEMS **Would the project:**	Potentially Significant Impact	Less Than Significant With Mitigation Incorporated	Less Than Significant Impact	No Impact
a) Exceed wastewater treatment requirements of the applicable Regional Water Quality Control Board?	☐	☐	☒	☐
b) Require or result in the construction of new water or wastewater treatment facilities or expansion of existing facilities, the construction of which could cause significant environmental effects?	☐	☐	☒	☐
c) Require or result in the construction of new storm water drainage facilities or expansion of existing facilities, the construction of which could cause significant environmental effects?	☐	☐	☒	☐
d) Have sufficient water supplies available to serve the project from existing entitlements and resources, or are new or expanded entitlements needed?	☐	☐	☒	☐
e) Result in a determination by the wastewater treatment provider which serves or may serve the project that it has adequate capacity to serve the project's projected demand in addition to the provider's existing commitments?	☐	☐	☒	☐
f) Be served by a landfill with sufficient permitted capacity to accommodate the project's solid waste disposal needs?	☐	☐	☒	☐
g) Comply with federal, state, and local statutes and regulations related to solid waste?	☐	☐	☒	☐

Discussion of Impacts

a-e) Less Than Significant Impact.

Wastewater Treatment

The project will require construction of onsite sewer infrastructure that will be connected to existing sewer lines, and wastewater will be transported to the City's Wastewater Treatment Plant (WTP). The WTP has a capacity of 10.9 million gallons per day (mgd) and treats approximately 6 mgd; therefore, it has available capacity to serve new development.

The WTP implements all applicable requirements of the Colorado River Basin Regional Water Quality Control Board, and no exceedances of wastewater treatment requirements are anticipated. Project-related impacts to wastewater facilities will be less than significant.

Domestic Water

Desert Water Agency (DWA) provides domestic water services to the subject property and vicinity. In 2013, the Coachella Valley Regional Water Management Group, of which DWA is a part, prepared a draft Integrated Regional Water Management Plan (IRWMP), an analysis and long-range plan addressing the region's domestic water needs and supplies. The IRWMP indicates that long-term demand for potable water is expected to increase throughout the region; however, conservation measures and groundwater replenishment programs will make it possible to meet increasing demand.

The proposed project will include construction of onsite domestic water lines that serve dwelling units, the commercial site, community pools and spa, and irrigation systems. These improvements will connect to existing DWA water lines. No new wells or additional water infrastructure or entitlements will be required. Construction will occur in accordance with DWA and City requirements. Impacts are expected to be less than significant.

Stormwater Management

Project-related impacts to stormwater management facilities will be less than significant. The project proposes construction of an onsite subsurface storm drain system to capture and convey onsite stormwater flows, which will connect to existing storm drains beneath Calle el Segundo. The project-specific drainage study evaluated existing and post-construction stormwater generation for various storm events and durations. It determined that stormwater flows from the proposed project will be less than existing flows generated onsite.

f-g) **Less Than Significant Impact.** Palm Springs Disposal Services (PSDS) provides solid waste collection and disposal services to the City and will serve the proposed project. Solid waste is transported to Edom Hill Transfer Station in northern Cathedral City and disposed at several regional landfills, including Lamb Canyon in Beaumont, El Sobrante in Corona, and Badlands in Moreno Valley. Each of these landfills has sufficient available capacity to serve the project. Facility operators, including PSDS, Burrtec, and Riverside County, are required to meet all local, regional, state, and federal standards for solid waste disposal. Onsite source reduction and recycling programs will contribute to additional solid waste reductions. Impacts will be less than significant.

XVII. MANDATORY FINDINGS OF SIGNIFICANCE

NOTE: If there are significant environmental impacts which cannot be mitigated and no feasible project alternatives are available, then complete the mandatory findings of significance and attach to this initial study as an appendix. This is the first step for starting the environmental impact report (EIR) process.

Does the project:	Potentially Significant Impact	Less Than Significant With Mitigation Incorporated	Less Than Significant Impact	No Impact
a) Have the potential to degrade the quality of the environment, substantially reduce the habitat of a fish or wildlife species, cause a fish or wildlife population to drop below self-sustaining levels, threaten to eliminate a plant or animal community, reduce the number or restrict the range of a rare or endangered plant or animal or eliminate important examples of the major periods of California history or prehistory?	☐	☒	☐	☐
b) Have impacts that are individually limited, but cumulatively considerable? ("Cumulatively considerable" means that the incremental effects of a project are considerable when viewed in connection with the effects of past projects, the effects of other current projects, and the effects of probable future projects)?	☐	☐	☒	☐
c) Have environmental effects which will cause substantial adverse effects on human beings, either directly or indirectly?	☐	☐	☒	☐

a) Impacts associated with biological resources are considered negligible and mitigation measures are not required. Impacts associated with Cultural resources have been identified in this Initial Study and mitigated to less than significant levels (See Section V).

b) Development of the Aberdeen project is consistent with the General Plan and Section 14 Specific Plan and will not have any additional cumulatively considerable impacts beyond build out of the General Plan.

c) The project's potential environmental effects have been mitigated to a less than significant level by the measures outlined in the Initial Study and development requirements of the City of Palm Springs. Further, the proposed the project will not cause substantial adverse effects on human beings, as all potential impacts have been mitigated.

CITY OF PALM SPRINGS
PLANNING COMMISSION MINUTES
March 25, 2015
Council Chamber, City Hall
3200 East Tahquitz Canyon Way
Palm Springs, CA 92262

CALL TO ORDER:

Chair Hudson called the meeting to order at 1:30 pm.

ROLL CALL:

Present: Commissioner Calerdine, Commissioner Lowe, Commissioner Middleton, Commissioner Roberts, Commissioner Weremiuk, Vice-Chair Klatchko and Chair Hudson

Staff Present: City Attorney Daudt, Director Fagg, Planning Administrative Coordinator Hintz, Assistant Director of Public Works Khamphou, Associate Planner Lyon, Assistant Planner Mlaker and Associate Planner Newell

*Commissioner Weremiuk arrived at 1:34 pm.

REPORT OF POSTING OF AGENDA:

The agenda was posted for public access at the City Hall exterior bulletin board (west side of Council Chamber) and the Planning Services counter by 4:00 pm on Thursday, March 19, 2015.

ACCEPTANCE OF THE AGENDA:

Vice-Chair Hudson reported that Item 3A would be continued to April 8, 2015.

Vice-Chair Klatchko noted his abstention on both sets of minutes due to his absence.

ACTION: Accept the agenda, as amended.

Motion: Commissioner Roberts, seconded by Commissioner Middleton and unanimously carried on a roll call vote.

AYES: Commissioner Calerdine, Commissioner Lowe, Commissioner Middleton, Commissioner Roberts, Commissioner Weremiuk, Vice-Chair Klatchko, Chair Hudson

PUBLIC COMMENTS:

Chair Hudson opened public comments:

The following persons spoke in opposition of Item 2A:

ERIK ROSENOW, Palm Springs Preservation Foundation, president, requested denial of the proposed plan or a continuance for the plan to incorporate the entire Kaptur buildings.

BARBARA MARSHALL, suggested as a public benefit - real space should be dedicated to the art community.

JUDY DEERTRACK, commented that this project should have gone for review to the Historic Preservation Board with an environmental study.

JOANNE HARRIS, requested a plan to include all of the Kaptur buildings.

GARY JOHNS, urged the Commission to demand something unique.

CHRIS MENRAD, Palm Springs Modern Committee, president, said that the Board requested to keep the entire 650 building and integrate it into a much larger project.

ROBERT IMBER, PS Modern Tours, urged the Commission to reconsider something that is appropriate for this city.

RON MARSHALL, suggested that a true compromise is to retain the entire buildings and build the new project behind it.

FRANK TYSEN, expressed concern with the water consumption that will be used to prepare the land.

There being no further speakers public comments was closed.

1. CONSENT CALENDAR:

ACTION: Approve Items 1A and 1B as part of the Consent Calendar.

Motion: Commissioner Roberts, seconded by Commissioner Weremiuk and unanimously carried 7-0 on a roll call vote.

AYES: Commissioner Calerdine, Commissioner Lowe, Commissioner Middleton, Commissioner Roberts, Commissioner Weremiuk, Vice-Chair Klatchko and Chair Hudson

1A. APPROVAL OF MINUTES: MARCH 11, 2015 STUDY SESSION AND REGULAR MEETING MINUTES

Approved, as submitted. (Vice-Chair Klatchko abstained on the study session and regular minutes.)

1B. PALM SPRINGS PROMENADE, LLC FOR A PARCEL MAP WAIVER TO SUBDIVIDE ONE LOT INTO TWO PARCELS FOR THE PROPERTY LOCATED AT THE NORTHWEST CORNER OF NORTH PALM CANYON DRIVE AND ANDREAS ROAD, ZONE CBD (CASE NO. TPM 36909). (DN)

Approved, as submitted.

1C. BARBARA FOSTER HENDERSON, OWNER REQUESTING A MAJOR ARCHITECTURE APPLICATION FOR THE CONSTRUCTION OF A 4,879-SQUARE FOOT HOUSE ON A HILLSIDE LOT AND AN ADMINISTRATIVE MINOR MODIFICATION REQUESTING AN INCREASE IN BUILDING HEIGHT LOCATED AT 888 LA MIRADA CIRCLE. (CASE 3.3834 MAJ; 7.1455 AMM). (GM)

Assistant Mlaker described the screen wall structure and noted that no objections were received.

JAMES CIOFFI, Cioffi Architect, said his client has a concern with the Cypress trees and requested a condition to return at staff level to replace them.

ACTION: Approve with conditions as amended:

- Allow the applicant to come back with the change in trees at staff level.

Motion: Commissioner Lowe, seconded by Commissioner Weremiuk and unanimously carried on a roll call vote.

AYES: Commissioner Calerdine, Commissioner Lowe, Commissioner Middleton, Commissioner Roberts, Commissioner Weremiuk, Vice-Chair Klatchko and Chair Hudson

2. PUBLIC HEARINGS:

2A. O & M HR, LLC. (NEXUS DEVELOPMENT CORP.) FOR THE DEMOLITION OF AN EXISTING DEVELOPMENT AND PARKING AREA TO CONSTRUCT "ABERDEEN"; A MIXED-USE PROJECT CONSISTING OF (74) ATTACHED AND DETACHED RESIDENTIAL DWELLINGS, (17) LIVE-WORK UNITS AND APPROXIMATELY 1,568-SQUARE FEET OF RETAIL ON 8.05-ACRES LOCATED AT THE NORTHEAST CORNER OF TAHQUITZ CANYON WAY AND CALLE EL

SEGUNDO, ZONE REO AND CU (CASE NOS. 5.1361 PD-375, 3.3820 MAJ AND TTM 36876). (DN)

Associate Planner Newell noted that the description of the project in the agenda has changed and provided an overview of the modifications made to the proposed development.

Technical Questions:

The Commission questioned and/or commented on the following items:

1. Public testimony regarding consideration of the buildings as a historic resource.
2. Parking in the front of the live/work units.
3. Does ordinance allow for Historic designation of buildings? What is the process?
4. Points of access on the east/west street to the live/work units on Palm Canyon?
5. Distance between the buildings.
6. Internal street width requirements.
7. Modification of Calle Alvarado extension.
8. Installation of a traffic signal for two-way access.
9. Setbacks and building height for the townhouses and live/work units

Commissioner Calerdine commented that it would not be fair to the developer to put in all the traffic signals. He suggested the possibility of restricting the access to right turn in / right turn out.

ROB ERES, Nexus Development, applicant, stated that they tried to accomodated as many of the Commission comments as possible. Mr. Eres described the modifications made to the development including incorporating the entire western building into the project. He provided details relating to the setbacks, parking count, pre-wired for solar, Calle Alvarado street width and the public benefit for the community. Mr. Eres requested Condition PSP. 1 be removed in reference to the internal streets and requested an action be taken today.

Commissioner Calerdine noted that the first issue that needs to be addressed is the historic preservation of the building and his first inclination is to deny the project to get a decision from the City Council. He has questions regarding the parking for the live/work units; however, he likes the project and thinks the density is a good idea.

Commissioner Roberts disclosed that he met with the applicant on several occasions. He applauds the applicant's willingness to keep one of the Kaptur buildings given their financial viability.

Commissioner Weremiuk a motion for denial.

Commission comments were made:

Vice-Chair Hudson stated that this project is very problematic and not just because of the Kaptur buildings (retention versus demotion). He continues to have problems with gated communities for high-end townhomes that are private courts. This is a very central location in the city and these projects need to be more porous and welcoming. The parking has been handled better because of the driveways and is a more realistic scenario. The streetscape has one unit type around three sides of the project because of the change that has been made to retain one of the Kaptur buildings and the meandering sidewalk along Andreas was lost. Chair Hudson said the live/work spaces are so close to the sidewalk and noted the specific standards for Section 14. He said they may work on North Palm Canyon but does not think this will be a vibrant artist colony. There are a lot of missed opportunities to treat the Tahquitz frontage in a much more realistic manner. He said these the two buildings are a pair with a breezeway in the middle and recommended to Council to retain at least 50% - one of the buildings. He encouraged Council to demand more diversity in terms of housing types and affordability.

Commissioner Lowe said he agreed with many of the comments and appreciates that 1/4 of the Kaptur building will be preserved. He said preserving 50% of the historic buildings is essential in retaining the original architecture of the project. He commented that Tahquitz is a not a walking street but rather a driving street for the live/work units.

Vice-Chair Klatchko said he has many other concerns such as losing the landscaping on Andreas and perspective drawings were just received today. He noted on the west elevation next to the residential there is only a wall and virtually no landscaping. He said Alvarado Street as a two-way access and inclusion of the Kaptur buildings are significant public benefits. He indicated that the applicant has tried to address the issues.

Commissioner Middleton was very complimentary to Palm Springs Modern for their responsiveness and timeliness in trying to work with the developer on this project. Ms. Middleton said this has been a difficult project and thanked the applicant for being very responsive to what was asked of them. She still has concerns with the viability of the live/work units on Tahquitz Canyon. She said she appreciates more sidewalk space on Tahquitz Canyon and thinks the integration of the remaining Kaptur building is very esthetically pleasing. She spoke in support of the project.

Commissioner Roberts expressed concern about sending mixed messages to the applicant. He said the Commission did not specify which building was to be retained. And in regards to Calle Alvarado, a big area of parking space behind the live/work was created. He can't say if the live/work will be a success - and many conditions could be placed so that it will not be used as storage space. He feels strongly that the applicant has come a long way and made significant changes and sacrifices for this project.

Commissioner Calerdine said there is no real analysis on the historic significance of the buildings. He does not have a concern with the density and the separation of the buildings. He likes the urban style. However, he does not think the parking layout will function for the live/work units.

ACTION: Deny the project based on the following:

- The project does not conform to the development standards of the Section 14 Specific Plan;
- The project does not conform to the development standards of the City's High-Rise Building regulations, and general concerns about building heights in excess of 35 feet;
- Scale of residential buildings with respect to separation and height;
- Concerns regarding the design, parking, setbacks and viability of the live/work space on Tahquitz Canyon Way;
- Inadequacy of the perimeter landscaping;
- Failure to address concerns noted by the Planning Commission at the February 25, 2015 meeting, including but not limited to increased building separation, increased street widths, and unencumbered pedestrian access; and
- Further analysis needed on the historical value of existing Kaptur buildings, and preference to retain two of the four existing buildings.

Motion: Commissioner Weremiuk, seconded by Commissioner Calerdine and carried 4-3-0 on a roll call vote.

AYES: Commissioner Calerdine, Commissioner Lowe, Commissioner Weremiuk, Chair Hudson
NOES: Commissioner Middleton, Commissioner Roberts, Vice-Chair Klatchko

2B. CITY OF PALM SPRINGS TO AMEND THE PALM SPRINGS ZONING CODE (PSZC) SECTIONS 93.20.07 AND 93.20.08 REGARDING REAL ESTATE AND OTHER TEMPORARY SIGNS (CASE 5.1338 ZTA). (FF)

Director Fagg provided an overview on the proposed zone text amendment relative to real estate signs.

The Commission discussed and/or commented on the following items:

1. The original approval was for real estate signs only.
2. Prior discussion on signs is allowed in the public right-a-way.
3. Realtor's concerns for sign coverage.
4. Staff to review Planning Commission video on previous action.

Chair Hudson opened the public hearing and with no speakers coming forward the public hearing was closed.

Vice-Chair Klatchko said that if signs will be allowed in the public right-a-way (not only if it doesn't block the traffic) much more consideration should be given. This has been a problematic issue in the CBD district and suggested further review of the language by the City Attorney.

Commissioner Roberts expressed concern with allowing signs in the public right-a-way (medians) which would create safety issues and enforcement problems.

Commissioner Calerdine said signs should be excluded from any median or within 50 - 100 feet of an intersection or over any part of the sidewalk. However, allowing them in large setback areas that cause no safety issues would be allowed.

ACTION: Continue to a date uncertain and refer to the City Attorney for review.

Motion: Commissioner Weremiuk, seconded by Commissioner Calerdine and unanimously carried on a roll call vote.

AYES: Commissioner Calerdine, Commissioner Lowe, Commissioner Middleton, Commissioner Roberts, Commissioner Weremiuk, Vice-Chair Klatchko, Chair Hudson

3. UNFINISHED BUSINESS:

3A. CONT'D - A MAJOR ARCHITECTURAL APPLICATION BY DENLAR LLC FOR A SINGLE-FAMILY RESIDENCE ON A HILLSIDE LOT LOCATED AT 2110 NORTH LEONARD, ZONE R-1-B (CASE 3.3817 MAJ). (KL)

Table to the next meeting.

PLANNING COMMISSION REPORTS, REQUESTS AND COMMENTS: None.

PLANNING DIRECTOR'S REPORT:

Director Fagg provided an update on the PPD subcommittee.

ADJOURNMENT:

The Planning Commission adjourned at 3:32 pm to Wednesday, April 8, 2015, at 1:30 pm, at the City Hall, Council Chamber, 3200 East Tahquitz Canyon Way.

Flinn Fagg, AICP
Director of Planning Services

ACCEPTANCE OF THE AGENDA:

City Clerk Thompson requested Item 2.J. be withdrawn from the Agenda at the request of Staff.

ACTION: Accept the Agenda as amended. **Motion Mayor Pro Tem Lewin, seconded by Councilmember Foat and unanimously carried 3-0 on a roll call vote.**

AYES: Councilmember Foat, Mayor Pro Tem Lewin, and Mayor Pougnet.
NOES: None.
ABSENT: Councilmember Hutcheson and Councilmember Mills.

1. PUBLIC HEARINGS:

1.A. AMENDMENT TO THE PALM SPRINGS ZONING CODE RELATING TO ACCESSORY SECOND DWELLING UNITS (CASE 5.1341 ZTA):
ACTION: 1) Table the public hearing with no public testimony at this time; 2) Continue the Public Hearing to May 6, 2015; and 3) Direct the City Clerk to post a Notice of Continued Public Hearing pursuant to law. **Motion Mayor Pro Tem Lewin, seconded by Councilmember Foat and unanimously carried 3-0 on a roll call vote.**

AYES: Councilmember Foat, Mayor Pro Tem Lewin, and Mayor Pougnet.
NOES: None.
ABSENT: Councilmember Hutcheson and Councilmember Mills.

1.B. 750 LOFTS, LLC MIXED-USE HOTEL DEVELOPMENT ON A 1.13 ACRE PARCEL LOCATED AT 750 NORTH PALM CANYON DRIVE, ZONE C-1 / R-3 / PD 104 / RESORT COMBINING ZONE /LAS PALMAS BUSINESS HISTORIC DISTRICT, CEQA MITIGATED NEGATIVE DECLARATION AND REPEALING RESOLUTION NO. 23757 REGARDING THE PREVIOUS APPROVAL OF THE HISTORIC SITE CERTIFICATE OF APPROVAL (HD-1) (CASE 5.1350 PDD 374 / GPA):

Councilmember Foat stated she has a property related conflict of interest. No action taken due to a lack of quorum. City Clerk to re-notice the public hearing as required by law.

1.C. O & M HR, LLC (NEXUS DEVELOPMENT CORP.) APPEALING THE MARCH 25, 2015, DECISION OF THE PLANNING COMMISSION TO DENY DEMOLITION OF EXISTING DEVELOPMENT AND PARKING AREA TO CONSTRUCT "ABERDEEN," A MIXED-USE PROJECT CONSISTING OF 74 ATTACHED AND DETACHED RESIDENTIAL DWELLINGS, 17 LIVE-WORK UNITS AND APPROXIMATELY 1,568-

SQUARE FEET OF RETAIL ON 8.05-ACRES LOCATED AT THE NORTHEAST CORNER OF TAHQUITZ CANYON WAY AND CALLE EL SEGUNDO AND MAKE A CEQA DETERMINATION (ZONE REO AND CU) (CASE NOS. 5.1361 PD-375, CUP, 3.3820 MAJ AND TTM 36876):

City Clerk Thompson stated Mayor Pougnet has a business related conflict of interest with respect to Public Hearing Item 1.C., as such there is not a quorum of the City Council to hear the Item, and the City Clerk's Office will re-notice the public hearing.

No action taken due to a lack of quorum. City Clerk to re-notice the public hearing as required by law.

PUBLIC COMMENT:

KATHY WEREMIUK, Palm Springs, commented on the current water emergency in the State of California.

JERI BARRY, Palm Springs, commented on the impacts of CVLink to the Four Seasons community and the City of Palm Springs.

NIKOHL VANDEL, Palm Springs, commented on Item 2.N. regarding discrimination and the water shortage.

DOTTIE WILDER, commented on the lack of parking on Civic Drive, and requested the City Council allow parking in the City Yard.

DONNA CHABAN-DELMAS, Palm Springs, commented on developers in the City and the need for developers to work with surrounding neighborhoods.

MARK DAVIS, commented on Item 2.L. and requested the City Council not consider low income and homeless services at that location.

CATHERINE MEYLER, commented on Item 2.L. and requested the City Council not consider low income and homeless services at that location.

JOY BROWN MEREDITH, provided an update on the activities of MainStreet, and stated her support for Item 2.I. approving VillageFest restrooms.

COUNCILMEMBER COMMENTS:

Councilmember Foat commented on the current status and process on the CVLink project and commented on the purchase of property on Indian Canyon.

CITY MANAGER'S REPORT: None.

Re: Proposed Demolition of Kaptur Designed Buildings as Part of Aberdeen Project; Case Nos. 5.1361 PD-375, 3.3820 MAJ and TTM 36876.

Dear Mr. Fagg and Mr. Zicaro:

On behalf of the Palm Springs Modern Committee, we write regarding the proposed demolition of two mid-century modern office buildings designed by noted Palm Springs' architect Hugh Kaptur ("Kaptur buildings") as part of the proposed Aberdeen mixed use project ("Project"), which is planned for the northeast corner of Tahquitz Canyon Way and Calle El Segundo. We would like to confirm that the City will not issue demolition permits for the Kaptur buildings prior to the completion of environmental review for the entire Aberdeen Project and final approval of this Project by the City Council.

The applicant's plans and the Architectural Advisory Committee's January 12 and 26, 2015 staff memorandums regarding the Project make clear that demolition of the Kaptur buildings is a necessary first step to developing the Project as proposed by the applicant. Because the demolition would be part of the Aberdeen Project, it is subject to the same environmental review under the California Environmental Quality Act ("CEQA") as the rest of the Project. (CEQA Guidelines § 15378(a).) This is true even though demolition permits on their own may be considered ministerial. "Where a project

nature of the existing buildings;
- Prefers the site not be gated;
- Would like to see Calle Alvarado developed in a pedestrian-friendly manner;
- Questions the viability of live/work units.

Member Secoy-Jensen made the following comments:

- Likes the connection of Calle Alvardo;
- Struggling with regularity/monotony of Tahquitz elevation;
- Thinks office buildings could be re-used;
- This project is not characteristic of Palm Springs.

Member Cassady said the project lacks connectivity. He likes the design; however, questioned if this is the right place for it. He would prefer to see the Hugh Kaptur buildings saved.

Chair Fauber made the following comments:

- Concerned with the density and height of the 3 story building;
- Concerned with live/work units;
- Parking is not functional;
- The building is beautiful but not the right location for it;
- Should be non-gated (using St. Baristo as an example).

Member Song said she has three issues with this project: the gates, parking and re-use of existing office buildings.

Chair Fauber said Calle Alvarado street section needs to be increased.

M/S/C (Secoy-Jensen/Fauber, 6-0-1) Table with direction to the applicant to modify the following:

1. Architecture along Tahquitz is too monotonous, lacks interest and out of scale and context;
2. Parking needs further evaluation for commercial and live-work;
3. Circulation – Increase pedestrian amenities (i.e. landscaping, wider sidewalk, etc.) along extension of Calle Alvarado;
4. Connectivity – Eliminate gates and improve connectivity of project within existing community;
5. Adaptive re-use of existing commercial buildings should be considered in redesign.

COMMITTEE MEMBER COMMENTS:

ROB ERES AND CHRIS PARDO, applicants, responded that that existing building is about 32,000 square feet; and objects to conditions #1 and #2 in the staff report.

Public Comment:

JOHN WESSMAN, Wessman Development, commented that he knows the Hugh Kaptur buildings, and they were not developed to full potential.

BARBARA MARSHALL, commented that the demolition of the buildings injures the city. This project is not what Palm Springs wants or needs; let's find a way to adequately re-use this property.

GARY JOHNS, commented that Hugh Kaptur will have a voice in this matter at a later time.

RON MARSHALL, commented that the buildings qualify for preservation because they are the work of a master architect.

Questions:

Member Hirschbein asked how would uses be regulated (live/work space - per underlying zoning) and where is parking for coffee shop?

Member Cassady asked if there will be gates at the south end of interior streets.

Member Song made the following comments:

- Why gated? Why not open it up and allow it to flow?
- Expressed concern about the setbacks of the live/work units.
- Why not put art garden and café together (enliven the space)
- Do townhouse units share a sidewalk?
- How will the live/work signage be addressed?
- Open up pool area to pedestrian path.

Member Hirschbein asked if the workspace can be rented separately. How many parking spaces are required by code? And was the adaptive re-use of the existing buildings looked at?

Member Secoy-Jensen questioned why not re-use the buildings?

Member Hirschbein made the following comments:

- Appreciates that the community is bringing information forward on the historic

Chair Fauber proposed a subcommittee review the project. Staff level review was preferred.

M/S/C (Secoy-Jensen/Song, 6-0-1) To approve with conditions:

- Awnings be replaced on both Palm Canyon and Indian Canyon in the existing locations and evaluate condition of the awning frames; paint to match color sample #2.
- Building painted color sample #1.
- Windows will be in-filled with stucco to match adjacent wall surface leaving a 1" - 2" recessed back panel with the reveal between the in-filled openings.

~~NEW BUSINESS:~~

3. **O & M HR, LLC (NEXUS DEVELOPMENT CORP.) FOR THE DEMOLITION OF AN EXISTING DEVELOPMENT AND PARKING AREA TO CONSTRUCT "ABERDEEN"; A MIXED-USE PROJECT CONSISTING OF (74) ATTACHED AND DETACHED RESIDENTIAL DWELLINGS, (17) LIVE-WORK UNITS AND APPROXIMATELY 3,000-SQUARE FEET OF RETAIL ON 8.05-ACRES LOCATED AT THE NORTHEAST CORNER OF TAHQUITZ CANYON WAY AND CALLE EL SEGUNDO, ZONE REO AND RA (CASE NOS. 5.1361 PD-375, 3.3820 MAJ AND TTM 36876). (DN)**

Associate Planner Newell provided an overview of the proposed project.

Discussion:

Member Song asked questions about the following:

- Lettered lots;
- Demolition of existing buildings;
- CUP submittal;
- Setbacks from Tahquitz for residential units;
- Building height.

Member Hirschbein questioned what square footage is being demolished versus how much is proposed.

Member Cassady requested clarification on ownership of property.

Member Secoy-Jensen asked what the timeline is for Planning Commission review (environmental needs to be computed).

recommended the following modifications:

1. Study alternatives along Tahquitz Canyon Way;
2. Provide streetscape along El Segundo;
3. Address Calle Alvarado traffic, parking and circulation issues;
4. Resubmit planting diagrams.

A recess was taken at 4:33 pm. The meeting resumed at 4:39 pm.

NEW BUSINESS:

6. SERGE DOROSHIN FOR A PRELIMINARY PLANNED DEVELOPMENT DISTRICT APPLICATION TO DEVELOP A 32-UNIT CONDOMINIUM AND TWO LIVE-WORK UNITS LOCATED AT 262 SOUTH INDIAN CANYON DRIVE, ZONE LSC/C-1AA & C-2, SECTION 14 (CASE 5.1358-PDD 376). (ER)

Principal Planner Robertson presented the proposed project.

Chair Fauber questioned if tribal land is subject to city review.

Member Hirschbein asked for clarification of property use to the north.

Member Song questioned the landscape/streetscape requirement along Indian Canyon.

CHRIS PARDO, project architect, provided additional details.

Member Purnel asked about the landscape at Indian Canyon, vehicular circulation and parking for live/work. He asked about the function of gate at Calle Encilia.

Member Secoy-Jensen questioned the functionality of the parking area at Indian Canyon.

Chair Fauber asked if there are any guest spaces on the interior.

Member Song commented on the architecture: relationship of retail to street is too bare; not well defined. She said the interior street needs trees/plantings.

Member Purnell commented that the street is "harsh" feeling; it needs increased plantings.

Member Secoy-Jensen commented that the vehicular entry is inadequate. Architecture is good, but exterior spaces need to be studied more; footprint may need to be reduced.

Member Hirschbein stated that the density is appropriate for downtown; it needs more

ROB ERES and CHRIS PARDO, applicants, identified the changes made to the plan.

Public Comment:

BETH EDWARDS HARRIS, said she would like to see the list of responsibilities of the Committee.

RON MARSHALL, applauds the AAC for its comments two weeks ago; sustainability should be discussed here.

BARBARA MARSHALL, spoke about the important of the Hugh Kaptur buidlings.

Member Cassady requested clarification of Calle Alvarado design.

Member Hirschbein asked for clarification of pedestrian access through the site.

Member Song asked about the width of the landscape area at Alvarado. She commented that no landscape buffer is shown on Calle El Segundo and asked about the signage - which is not included as part of this approval.

Member Purnel expressed concern about the street trees in tight spaces - it needs to be addressed on landscape plan; need street trees on El Segundo. He said landscape is under-developed. It needs to show landscape of the interior streets.

Member Secoy-Jensen commented that architecture and urban design are inseparable. She noted that Calle Alvarado could be wider and questioned what the design concept is for the live/work buildings on Tahquitz.

Chair Fauber asked if there are no swimming pools on Tahquitz for the live/work units. He commented that parking is short per submitted drawings; and also questioned the Calle Alvarado width.

Member Cassady commented that no parking along Tahquitz will hurt the retail spaces.

Member Secoy-Jensen said she is struggling with the live/work design and monotony of garage doors; however, the residential behind may be appropriate.

Chair Fauber said the issue is with the fourth floor.

Member Hirschbein commented that what is before them now is better than what was originally proposed; however, it is monotonous.

M/S/C (Cassady/Secoy-Jensen, 7-0) Deny.

The Board made a finding that the project does not conform to adopted standards, and

Member Hirschbein asked if a subcommittee is the best way to move this forward.

Member Song commented that the applicant has increased the quantity of plants. She commented that the subcommittee needs to give clear direction up front.

Member Purnel made the following suggestions:

- Increase some plant sizes (slower growing plants);
- A little more massing and rhythm of plants; rather than individual ones scattered out.
- Clarification on plants that are not labeled on the plans - ;
- Identify plants to be replaced - Aurelia is a poor plant recommends alternative plant.
- Greener groundcover - to make it lusher.

M/S/C (Purnell/Fredricks, 7-0) Approve, subject to review with subcommittee and applicant to incorporate the comments made by the AAC. (Purnel and Fredricks)

5. **O & M HR, LLC (NEXUS DEVELOPMENT CORP.) FOR THE DEMOLITION OF AN EXISTING DEVELOPMENT AND PARKING AREA TO CONSTRUCT "ABERDEEN"; A MIXED-USE PROJECT CONSISTING OF (74) ATTACHED AND DETACHED RESIDENTIAL DWELLINGS, (17) LIVE-WORK UNITS AND APPROXIMATELY 1,568-SQUARE FEET OF RETAIL ON 8.05-ACRES LOCATED AT THE NORTHEAST CORNER OF TAHQUITZ CANYON WAY AND CALLE EL SEGUNDO, ZONE REO AND RA (CASE NOS. 5.1361 PD-375, 3.3820 MAJ AND TTM 36876). (DN)**

Douglas Holland, City Attorney, reviewed the AAC's responsibilities for Architectural Review.

Associate Planner Newell provided an overview of the proposed project.

Vice-Chair Fredricks noted issues with the landscape plan - does not see the landscape plan that shows the plant sizes and materials - (can be submitted with final plan).

Member Song commented that landscape is not per Section 14 Plan on Tahquitz Canyon Way; and questioned the prohibition of residential use of live/work space on Tahquitz Canyon Way.

Member Secoy-Jensen verified appropriateness of reviewing context.

Chair Fauber asked staff to identify where in the staff report where it does not conform and what the standards are.

Commissioner Roberts said that he does not a have problem and made the following motion.

ACTION: To continue to a date uncertain to allow the applicant to work with staff in making the following modifications to the project:

- Density / height - justification.
- Distance between buildings - 10 feet.
- Calle Alvarado - a two-way street.
- Viability of live/work (configuration)
- Public benefit - (preserve and consider study)
- Solar panels.
- Consider live/work units on side streets.

Motion Commissioner Roberts, seconded by Commissioner Weremiuk and unanimously carried on a roll call vote.

AYES: Commissioner Calerdine, Commissioner Lowe, Commissioner Middleton, Commissioner Roberts, Commissioner Weremiuk, Vice-Chair Klatchko, Chair Hudson

Commissioner Calerdine noted that the Tribe's conservation plan fees were dropped and requested staff look into applying the CVMSHCP fees.

~~A recess was taken at 3:00 pm.~~

The meeting resumed at 3:47 pm.

2B. 750 LOFTS, LLC FOR A MIXED-USE HOTEL DEVELOPMENT ON A 1.13-ACRE PARCEL LOCATED AT 750 NORTH PALM CANYON DRIVE ZONE C-1 / R-3 / PD 104 / RESORT COMBINING ZONE / LAS PALMAS BUSINESS HISTORIC DISTRICT (HD-1) (CASE NOS. 5.1350 PDD 374 / GPA / CUP AND 3.3795 MAJ). (KL)

Associate Planner Lyon provided an overview of the proposed mixed-use hotel as outlined in the staff report.

The Commission asked further clarification on issues relating to:

- Capture rates for valet parking at the Colony Palms.
- Parking survey to determine the whether the rest of the Uptown area is adequately parked.
- Reciprocal parking agreement with Colony Palms for the existing 750 lot.

Chris Pardo said they looked at many options and none were economically viable. Commission Roberts commented that this is a good project - it's attractive and fits well in the area. However, he is struggling with the project because the zoning mix is very complex. The R-1 zoning is not allowed in this area and does not fit anywhere. It feels overly dense for single-family houses. He does not see the public benefit given for the relief that will be granted for this project. He expressed concern with the live/work units because of the lack of parking in the busy corridor. He would like to send this project back to look at the density and suggested one public benefit could be reconditioning an existing building and contribute to the character of the city.

Commissioner Middleton said she likes what this project does away from Tahquitz but does not see the public benefit for the relief given. She is most impressed with the connection created by the Calle Alvarado extension from Tahquitz to the Convention Center and would like to see a 2-way street. She would like to see the Kaptur buildings preserved. She said the 6' setback on Tahquitz is very crammed with tight spaces. She appreciates the setbacks on Andreas and would like to see the project pushed back from Tahquitz to create more space.

Commissioner Calerdine congratulated the design team and asked questions in reference to the roof deck space. He questioned if some of the live/work units could be brought around the corner on El Segundo and Tahquitz to allow some preservation of existing buildings. He preferred to see Calle Alvarado as a full use street, vehicular gates (parking will be used when conventions are in town) and agreed that a degree of building preservation should be maintained.

Commissioner Lowe expressed concerns about parking on the live/work space on Tahquitz Canyon. He agreed that Called Alvarado would work better as a two-way street.

Rob Eres said they are open to having Calle Alvarado as a two-way street and respectfully requested for an action on this project.

Chair Hudson commented that the most important thing about this project is the preservation of at least a portion of the buildings. He expressed concern with the setbacks on Tahquitz Canyon and thinks this is one location in the city that can handle high density if it were done in a more creative way.

Commissioner Weremiuk spoke about the Section 14 design guidelines and the importance of the Tahquitz Canyon presence. She expressed concern with the setbacks and viability of the live/work units, and would like to see more community public benefit. She noted that one public benefit could be the preservation of one of the Kaptur buildings.

RON MARSHALL, PS Preservation Foundation, said this property needs to be evaluated as a historic resource and requested an environmental analysis be conducted.

ROBERT IMBER, said that thousands of people come to see the city's heritage of architecture.

JUDY DEERTRACK, said the demolition needs to be compared with adaptive historical re-use.

ROXANN PLOSS, encouraged the idea of adaptive re-use in regards to the existing buildings.

BARBARA MARSHALL, said the plan to demolish this property will injure the city; and encouraged the developer to adaptively re-use the historic resource.

DICK BURKETT, suggested the developer come back with a plan as an option to show the study of the adaptive re-use of the Kaptur building.

PETER MORUZZI, PS Modern Committee, chair, spoke about letters received from architectural experts and encouraged the Commission to read the letters.

DR. MICHAEL MCQUARTER, architect, does not understand why the buildings from good architects are torn down.

FRANK TYSON, said people come here because they like the historic architecture; thinks this project needs substantial work and a full impact study.

HUGH KAPTUR, architect, commented that developers come from big cities with projects that change the environment and village of Palm Springs and requested these buildings be preserved.

ROB ERES, applicant rebuttal, thanked all the public that spoke; and clarified that the Aberdeen project will have 2 car garages as well as driveway parking for 2 vehicles, unlike the Morrison project.

There being no further appearances the public hearing was closed.

Chair Hudson commented that providing space for artists in the city is admirable; however, he questioned the appropriateness of the site; there is very little flexibility to have larger retail businesses along this frontage.

Vice-Chair Klatchko noted the community concern about adaptive re-use and asked the developer if they re-thought keeping the buildings.

Chair Hudson opened the public hearing;

ROB ERES, applicant, Nexus Dev. Corp., said they are not pushing density and height to the maximum. He commented that condition PSP 1. would increase the overall street 12 feet more than what is currently proposed instead they are trying to create an urban development. He requested an action be taken today.

CHRIS PARDO, project architect, spoke about Calle Alvarado, setbacks, height, gates and the pedestrian walkway between townhomes.

The following persons spoke in favor of the proposed project:

TOM ADAMO, property owner, said this project is well below the density requirements and will create jobs; this property can be a trend-setter.

AFTAB DADA, read a letter into the record by Harold Matzner, stating that this project is located in the right location where more foot traffic is needed on Tahquitz. Mr. Dada said, as an owner and partner of the Hilton Hotel, they are in full support of the project.

JAMES CIOFFI, said this is an exciting new development and implored the design team to try to find a way to integrate the existing buildings into the project.

REGGIE CAMERON, said this project speaks to the creativity of artists and is excited to have the mixed-use project at this location.

JUAN-MANUEL ALONSO, said it's important to move forward to the future; this project will have a place for artists.

ANDY CARPIAC, represents Hard Rock Hotel, said there is a demand for this type of development and encouraged the Commission to see past the skepticism of other speakers.

MIGUEL CRIEGO, artist, said this project will open up to the community giving it culture and life.

TERRY HASTINGS, artist council board member, praised the development for creating a solid artistic project. He said this would be a great anchor for the artists and community.

The following persons spoke in opposition to the project:

GARY JOHNS, said the city has a resort lifestyle and does not believe there is the clientele for an urban center.

PUBLIC COMMENTS:

Chair Hudson opened public comments and with no appearances coming forward public comments was closed.

1. CONSENT CALENDAR:

1A. APPROVAL OF MINUTES: FEBRUARY 11, 2015

ACTION: Approve, as presented.

Motion Vice-Chair Klatchko, seconded by Commissioner Middleton and carried 6-0-1 on a roll call vote.

AYES: Commissioner Calerdine, Commissioner Lowe, Commissioner Middleton, Commissioner Roberts, Commissioner Weremiuk, Vice-Chair Klatchko
ABSTAIN: Chair Hudson.

2. PUBLIC HEARINGS:

2A. O & M HR, LLC (NEXUS DEVELOPMENT CORP.) FOR THE DEMOLITION OF AN EXISTING DEVELOPMENT AND PARKING AREA TO CONSTRUCT "ABERDEEN"; A MIXED-USE PROJECT CONSISTING OF (74) ATTACHED AND DETACHED RESIDENTIAL DWELLINGS, (17) LIVE-WORK UNITS AND APPROXIMATELY 1,568-SQUARE FEET OF RETAIL ON 8.05-ACRES LOCATED AT THE NORTHEAST CORNER OF TAHQUITZ CANYON WAY AND CALLE EL SEGUNDO, ZONE REO AND CU (CASE NOS. 5.1361 PD-375, 3.3820 MAJ AND TTM 36876). (DN)

Associate Planner Newell presented the proposed mixed-use project as outlined in the staff report.

The Commission asked technical questions pertaining to the project in reference to:

- Potential to preserve buildings under historical ordinance;
- Calle Alvarado street improvements;
- Location of the access points and gates;
- Setbacks on Tahquitz Canyon in front of work/live units;
- Pre-wire for solar;
- Setback requirements for Section 14;
- Parking for the cafe and live/work units.

- The project does not conform to the development standards of the Section 14 Specific Plan;
- The project does not conform to the development standards of the City's High-Rise Building regulations, and general concerns about building heights in excess of 35 feet;
- Scale of residential buildings with respect to separation and height;
- Concerns regarding the design, parking, setbacks and viability of the live/work space on Tahquitz Canyon Way;
- Inadequacy of the perimeter landscaping;
- Failure to address concerns noted by the Planning Commission at the February 25, 2015 meeting, including but not limited to increased building separation, increased street widths, and unencumbered pedestrian access; and
- Further analysis needed on the historical value of existing Kaptur buildings, and preference to retain two of the four existing buildings.

Motion: Commissioner Weremiuk, seconded by Commissioner Calerdine and carried 4-3-0 on a roll call vote.

AYES: Commissioner Calerdine, Commissioner Lowe, Commissioner Weremiuk, Chair Hudson
NOES: Commissioner Middleton, Commissioner Roberts, Vice-Chair Klatchko

2B. CITY OF PALM SPRINGS TO AMEND THE PALM SPRINGS ZONING CODE (PSZC) SECTIONS 93.20.07 AND 93.20.08 REGARDING REAL ESTATE AND OTHER TEMPORARY SIGNS (CASE 5.1338 TA). (FF)

Director Fagg provided an overview on the proposed zone text amendment relative to real estate signs.

The Commission discussed and/or commented on the following items:

1. The original approval was for real estate signs only.
2. Prior discussion on signs not allowed in the public right-a-way.
3. Realtor's concerns regarding coverage.
4. Staff to review Planning Commission video on previous action.

Chair Hudson opened the public hearing and with no speakers coming forward the public hearing was closed.

Vice-Chair Klatchko said that if signs will be allowed in the public right-a-way (not only if it doesn't block the traffic) much more consideration should be given. This has been a problematic issue in the CBD district and suggested further review of the language by the City Attorney.

DRAFT

gated communities for high-end townhomes that are private courts. This is a very central location in the city and these projects need to be more porous and welcoming. The parking has been handled better because of the driveways and is a more realistic scenario. The streetscape has one unit type around three sides of the project because of the change that has been made to retain one of the Kaptur buildings and the meandering sidewalk along Andreas was lost. Chair Hudson said the live/work spaces are so close to the sidewalk and noted the specific standards for Section 14. He said they may work on North Palm Canyon but does not think this will be a vibrant artist colony. There are a lot of missed opportunities to treat the Tahquitz frontage in a much more realistic manner. He said these the two buildings are a pair with a breezeway in the middle and recommended to Council to retain at least 50% - one of the buildings. He encouraged Council to demand more diversity in terms of housing types and affordability.

Commissioner Lowe said he agreed with many comments and appreciates that 1/4 of the Kaptur building is being preserved. He said preserving 50% of the historic buildings is essential in retaining the original architecture of the project. He commented that Tahquitz is a not a walking street but rather a driving street for the live/work units.

Vice-Chair Klatchko said he has many other concerns such as losing the landscaping on Andreas and perspective drawings were just received today. He noted on the west elevation next to the residential there is only a wall and virtually no landscaping. He said Alvarado Street as a two-way access and inclusion of the Kaptur buildings are significant public benefits. He indicated that the applicant has tried to address the issues.

Commissioner Middleton said this has been a difficult project and thanked the applicant for being very responsive to what was asked of them. She still has concerns with the viability of the live/work units on Tahquitz Canyon. She said she appreciates more sidewalk space on Tahquitz Canyon and thinks the integration of the remaining Kaptur building is very esthetically pleasing. She spoke in support of the project.

Commissioner Roberts expressed concern about sending mixed messages to the applicant. He said the Commission did not specify which building was to be retained. And in regards to Alvarado, a big area of parking space behind the live/work was created. He can't say that live/work will be a success - and many conditions could be placed so that it will not be used as storage space. He feels strongly that the applicant has come a long way and made significant changes and sacrifices for this project.

Commissioner Calerdine said there is no real analysis on the historic significance of the buildings. He does not have a concern with the density and the separation of the buildings. He likes the urban style. However, he does not think the parking layout will function for the live/work units.

ACTION: Deny the project based on the following:

DRAFT

Associate Planner Newell noted that the description of the project in the agenda has changed and provided an overview of the modifications made to the proposed development.

Technical Questions:

The Commission questioned and/or commented on the following items:

1. Public testimony regarding consideration of the buildings as a historic resource.
2. Parking in the front of the live/work units.
3. Does ordinance allow for Historic designation of buildings? What is the process?
4. Points of access on the east/west street to the live/work units on Palm Canyon?
5. Distance between the buildings.
6. Internal street width requirements.
7. Modification of Calle Alvarado extension.
8. Installation of a traffic signal for two-way access.
9. Setbacks and building height for the townhouses and live/work units.

Commissioner Calerdine commented that it would not be fair to the developer to put in all the traffic signals. He suggested the possibly of restricting the access to right turn in / right turn out.

ROB ERES, Nexus Development, applicant, stated that they tried to accomodated as many of the Commission comments as possible. Mr. Eres described the modifications made to the development including incorporating the entire western building into the project. He provided details relating to the setbacks, parking count, pre-wired for solar, Calle Alvarado street width and the public benefit for the community. Mr. Eres requested Condition PSP. 1 be removed in reference to the internal streets and requested an action be taken today.

Commissioner Calerdine noted that the first issue that needs to be addressed is the historic preservation of the building and his first inclination is to deny the project to get a decision from the City Council. He has questions regarding the parking for the live/work units; however, he likes the project and thinks the density is a good idea.

Commissioner Roberts disclosed that he met with the applicant on several occasions. He applauds the applicant's willingness to keep one of the Kaptur buildings given their financial viability.

Commissioner Weremiuk a motion for denial.

Commission comments were made:

Vice-Chair Hudson stated that this project is very problematic and not just because of the Kaptur buildings (retention versus demotion). He continues to have problems with

RE: Case Nos. 5.1361 PD-375, 3.3820 MAJ & TTM 36876 – "Aberdeen" Mixed Use Project

Mr. Eres,

On March 25, 2015, the Planning Commission considered the subject applications for a mixed-use project consisting of (73) attached and detached residential dwellings, (13) live-work units and approximately 7,811-square feet of existing commercial space on approx. 8.05-acres located at the northeast corner of Calle El Segundo and Tahquitz Canyon Way. At this meeting the Planning Commission voted 4-3 to deny the project based on the following:

- The project does not conform to the development standards of the Section 14 Specific Plan;
- The project does not conform to the development standards of the City's High-Rise Building regulations, and general concerns about building heights in excess of 35 feet;
- Scale of residential buildings with respect to separation and height;
- Concerns regarding the design, parking, setbacks, and viability of the live/work spaces on Tahquitz Canyon Way;
- Inadequacy of the perimeter landscaping;
- Failure to address concerns noted by the Planning Commission at the February 25, 2015 meeting, including but not limited to increased building separation, increased street widths, and unencumbered pedestrian access; and
- Further analysis needed on the historical value of existing Kaptur buildings, and preference to retain two of the four existing buildings.

In accordance with section 2.05.040 of the Palm Springs Municipal Code, you may appeal the decision of the Planning Commission to the City Council within ten days of the date of this letter. The appeal request must be in writing and presented to the City Clerk with a fee of $546.00 (excludes notification fee, which was previously paid) by 6:00 p.m. on Monday, April 6, 2015.

If you have any questions about this letter, please contact me at (760) 323-8245.

Sincerely,

David Newell
Associate Planner

City Clerk

convention center from Tahquitz Canyon Way. Additional public benefit is provided by a large art plaza in the center of the southern portion of the project. Finally, the plans presented on March 25, 2015 Planning Commission meeting incorporated one (1) existing building and converted it into office and retail/restaurant space for the Project.

We are excited to present the Project in further detail to the City Council and greatly appreciate your assistance with this request to appeal the Planning Commission's decision. Please do not hesitate to contact myself or Rich Meaney if you should have any questions.

Sincerely,

Rob W. Eres
Nexus Development Corporation/Central Division
Vice President of Development

Palm Springs, CA 92262

Re: Formal Appeal of Planning Commission Decision on March 25th, 2015 for Case No. 5.1361 –PD-375, 3.3820 MAJ & TTM 36876 – "Aberdeen" Mixed-Use Project (the "Project")

Dear Flynn:

We are aware of the Planning Commission's action taken on March 25, 2015 to deny approval of the Aberdeen Palm Springs Mixed-Use project (as identified above, the "Project") located at the northeast corner of Tahquitz Canyon Way and Calle El Segundo. We would like this letter to act as our formal appeal of that decision and ask that the Project be considered by the City Council at their next regularly scheduled meeting on April 15, 2015.

The Planning Commission had many mixed comments regarding the architecture and uses within the Project. In some cases, comments provided by commissioners on the February 25, 2015 meeting were contradicted by themselves on March 25, 2015. As the applicant, it was very difficult to clearly understand what would satisfy the Planning Commission given the amount of modifications that were made to the Project as a direct result of comments provided on February 25, 2015. Regardless of the inconsistent comments received between the two (2) planning commission meetings and two (2) architectural advisory committee meetings that we participated in, we believe that the Project has the potential to be a catalyst for employment, community outreach, and economic development within the City.

We feel that this location is ideally suited for a mixed-use project consisting of live/work lofts, restaurant/retail, office, and high-density residential as proposed in the plans presented to the Planning Commission on March 25, 2015. The proposed project ties together the surrounding uses of commercial/movie theater, hospitality (including high-rise), residential, and casino that already exist and are similarly identified as REO/RA areas of the Section 14 Specific Plan. We also believe that the Project provides substantial public benefit given how much developable land is being sacrificed in order to provide a new street, Calle Alvarado, which will allow for new pedestrian and vehicular access to the

CERTIFICATION:

STATE OF CALIFORNIA)
COUNTY OF RIVERSIDE) ss.
CITY OF PALM SPRINGS)

I, JAMES THOMPSON, City Clerk of the City of Palm Springs, California, do hereby certify that Ordinance No. ____ is a full, true, and correct copy, and was introduced at a regular meeting of the Palm Springs City Council on _____ and adopted at a regular meeting of the City Council held on _____ by the following vote:

AYES:
NOES:
ABSENT:
ABSTAIN:

City of Palm Springs, California \

to air quality, cultural resources, land use, hydrology and traffic. Mitigation Measures have been proposed to reduce the project's significant impacts to a less than significant level.

The City Council independently reviewed and considered the information contained in the draft MND and the draft MND reflects the City's independent judgment and analysis. The City Council finds, on the basis of the whole record before it, including the initial study and comments received, that the project as proposed, including all required permits, has the potential to cause significant impacts on the environment but the proposed Mitigation Measures would reduce those impacts to a less than significant level. Therefore the City Council adopts the Mitigated Negative Declaration as a complete and adequate evaluation of the project pursuant to CEQA.

SECTION 2: Preliminary PD in lieu of a Zone Change.

The City Council approves PD 375 in lieu of a Change of Zone (Case 5.1361) as conditioned by City Council Resolution No. _____ for Case 5.1361 PD 375 / CUP / 3.3820 MAJ / TTM 36876.

SECTION 3. Zoning Map change.

The City Council approves the zone map change from CU / REO to PD 375 for a roughly 8.05-acre parcel located at the northeast corner of Tahquitz Canyon Way and Calle El Segundo, in conjunction with Case Nos. 5.1361 PD 375 / CUP / TTM 36876 / 3.3820 MAJ.

SECTION 4. Effective Date.

This Ordinance shall be in full force and effect thirty (30) days after passage.

SECTION 5. Publication.

The City Clerk is hereby ordered to and directed to certify to the passage of this Ordinance, and to cause the same or summary thereof or a display advertisement, duly prepared according to law, to be published in accordance with law.

ADOPTED this 18th day of March, 2015.

MAYOR

ATTEST:

_____
City Clerk

Specialty Retail-Entertainment-Office (REO) - This designation allows for the integration and concentration of large-scale specialty retail, restaurant, entertainment and office development along portions of Tahquitz Canyon Way and Indian Canyon Drive and emphasizes a pedestrian-transit focus.

Resort-Attraction (RA) - This designation allows for large-scale resort hotel complexes, hotels, and major commercial recreation attractions integrated with retail and entertainment facilities.

The PDD is proposed to change the split zoning to a single PD zone designation with its own development standards. Specific Uses requested for approval for the PDD include attached and detached residential townhomes, live/work units and freestanding retail-commercial with outdoor dining. Additional uses consistent with the REO land designation may be considered within the commercial space and workspace of the live/work units, except residential dwelling is prohibited in structures along the street front. The project conforms to this finding.

Vehicular access to the residential portion of project is provided from Andreas Road. The live/work and commercial space is accessed from Calle El Segundo and the extension of Calle Alvarado. The project proposes a mix residential, commercial and live/work that is harmonious with adjacent uses in the vicinity. Thus, the project conforms to this finding.

3. The proposed change of zone is necessary and proper at this time, and is not likely to be detrimental to the adjacent property or residents.

The proposed PDD in lieu of zone change has been evaluated against the development standards for the Section 14 land designations, the Resort Combining Zone and architectural review. While the applicant is seeking setback deviations, the project is harmonious with the existing surrounding development. It continues the pedestrian experience along Tahquitz Canyon Way and introduces commercial uses along the street frontage which is desirable. The project height is consistent with development along the Tahquitz Canyon Way boulevard and is therefore not detrimental to adjacent properties. The project conforms to this finding.

THE CITY COUNCIL OF THE CITY OF PALM SPRINGS ORDAINS:

SECTION 1: CEQA.

The project has been reviewed under the provisions of the California Environmental Quality Act (CEQA). An initial study was conducted and the City concluded that the project as proposed had the potential to cause significant negative impacts on the environment. The analysis included all required CEQA issues, including but not limited

D. A notice of public hearing of the Planning Commission of the City of Palm Springs, California to consider the above-mentioned applications was given in accordance with applicable law and on March 25, 2015, the Planning Commission carefully reviewed and considered all of the evidence presented in connection with the hearing on the project, including but not limited to the staff report, and all written and oral testimony presented and voted 4-3 to deny the revised project.

E. On March 31, 2015, the applicant filed an appeal of the March 25, 2015, denial decision by the Planning Commission in accordance with Chapter 2.05 of the Palm Springs Municipal Code.

F. A notice of public hearing of the City Council of the City of Palm Springs, California to consider the above-mentioned applications was given in accordance with applicable law and on April 15, 2015, the City Council held a public hearing in accordance with applicable law.

G. A Planned Development District in lieu of a Change of Zone is required to be adopted by ordinance as provided in the City's Municipal Code and the proposed project is proposed to be adopted by Ordinance.

H. The City Council has carefully reviewed and considered all of the evidence presented in connection with the meetings on the project, including but not limited to the staff report, the Mitigated Negative Declaration, and all written and oral testimony presented and finds that the Project complies with the requirements of Section 94.07.00 of the City's Zoning Code. The City Council makes the following specific findings based on specific evidence as described after each finding:

> *1. The proposed change of zone is in conformity with the general plan map and report. Any amendment of the general plan necessitated by the proposed change of zone should be made according to the procedure set forth in the State Planning Law either prior to the zone change, or notice may be given and hearings held on such general plan amendment concurrently with notice and hearings on the proposed change of zone.*

The proposed project is located in the Tourist Resort Commercial (TRC) (FAR of 0.35 and density of up to 30 units per acre) land use designation of the General Plan. The mixed-use project proposes 11.2 residential dwelling units per acre and a FAR of 0.35, which is consistent with the land use designation.

> *2. The subject property is suitable for the uses permitted in the proposed zone, in terms of access, size of parcel, relationship to similar or related uses, and other considerations deemed relevant by the commission and council.*

The proposed project is located in the REO and RA land designations of Section 14, which describes these designations as follows:

ORDINANCE NO. ____

AN ORDINANCE OF THE CITY COUNCIL OF THE CITY OF PALM SPRINGS, CALIFORNIA, APPROVING PLANNED DEVELOPMENT DISTRICT (PD-375) IN LIEU OF A CHANGE OF ZONE FOR A ROUGHLY 8.05-ACRE SITE LOCATED AT THE NORTHEAST CORNER OF EAST TAHQUITZ CANYON WAY AND CALLE EL SEGUNDO.

City Attorney's Summary

This Ordinance approves a planned development district in lieu of a zone change to accommodate the development of 73 attached and detached residential units, 13 live/work units and roughly 7,811-square feet of commercial space on a 8.05+/- acres of land generally located at the northeast corner of Tahquitz Canyon Way and Calle El Segundo.

THE CITY COUNCIL OF THE CITY OF PALM SPRINGS FINDS:

A. Nexus Development Corp. ("Applicant") filed an application on behalf of O & M, LLC, ("Owner") pursuant to Palm Springs Zoning Code Section 94.07.00 (*Zone Map Change / Change of Zone)* and Section 94.03.00 (*Planned Development District)* seeking approval of a Planned Development District in lieu of a Change of Zone (Case 5.1361 PD-375) to demolish existing development and construct 73 attached and detached residential dwellings, 13 live/work units and retain approximately 7,811-square feet of commercial space on approximately 8.05-acres at the northeast corner of Tahquitz Canyon Way and Calle El Segundo, identified as APNs 508-055-003, 508-055-006, 508-055-007, 508-055-008 & 508-055-009.

B. The applicant submitted related applications, including a Tentative Tract Map application (Case TTM 36876) to subdivide the project land into 93 lots with private streets and common area pursuant to Title 9 of the Palm Springs Municipal Code; a Conditional Use Permit (Case 5.1361 CUP) to allow multi-family residential within the REO and RA Zones of the Section 14 Specific Plan; and a Major Architectural application (Case 3.3820 MAJ) to review proposed architecture pursuant to Section 94.04.00 of the Zoning Code.

C. A notice of a public hearing of the Planning Commission of the City of Palm Springs, California to consider the above-mentioned applications was given in accordance with applicable law and on February 25, 2015, the Planning Commission held a public hearing in accordance with applicable law and continued the project to a date uncertain for further study.

area is restricted because of secured openings or where immediate access is necessary for life-saving or fire-fighting purposes, the fire code official is authorized to require a key box to be installed in an approved location. The key box shall be flush mount type and shall contain keys to gain necessary access as required by the fire code official.

FID 17 **Hazardous Materials (CFC 5004.1)**: Storage of hazardous materials in amounts exceeding the maximum allowable quantity per control area as set forth in Section 5003.1 shall be in accordance with Sections 5001, 5003 and 5004. Storage of hazardous materials in amounts not exceeding the maximum allowable quantity per control area as set forth in Section 5003.1 shall be in accordance with Sections 5001 and 5003. Retail and wholesale storage and display of nonflammable solid and nonflammable and noncombustible liquid hazardous materials in Group M occupancies and Group S storage shall be in accordance with Section 5003.11.

- Pool Chemicals – dedicated, compliant storage cabinets, rooms, or areas required
- Liquid Petroleum Gas (LPG) – dedicated, compliant storage cabinets, rooms, or areas required

END OF CONDITIONS

operation. Secured automated vehicle gates or entries shall utilize a combination of a Tomar Strobeswitch™, or approved equal, and an approved Knox key electric switch. Electric gate operators, where provided, shall be listed in accordance with UL 325. Gates intended for automatic operation shall be designed, constructed and installed to comply with the requirements of ASTM F 2200 and an approved Knox key electric switch. Secured non-automated vehicle gates or entries shall utilize an approved padlock or chain (maximum link or lock shackle size of ¼ inch). Approved security gates shall be a minimum of 14 feet in unobstructed drive width on each side with gate in open position.

In the event of a power failure, the gates shall be defaulted or automatically transferred to a fail safe mode allowing the gate to be pushed open without the use of special knowledge or any equipment. If a two-gate system is used, the override switch must open both gates.

If there is no sensing device that will automatically open the gates for exiting, a fire department approved Knox electrical override switch shall be placed on each side of the gate in an approved location.

A final field inspection by the fire code official or an authorized representative is required before electronically controlled gates may become operative. Prior to final inspection, electronic gates shall remain in a locked-open position.

FID 13 **Operational Fire Hydrant(s) (CFC 508.1, 508.5.1 & 1412.1):** Operational fire hydrant(s) shall be installed within 250 feet of all combustible construction. They shall be installed and made serviceable prior to and during construction. No landscape planting, walls, or fencing is permitted within 3 feet of fire hydrants, except ground cover plantings

FID 14 **NFPA 13D Fire Sprinklers Required:** An automatic fire sprinkler system is required. Only a C-16 licensed fire sprinkler contractor shall perform system design and installation. System to be designed and installed in accordance with NFPA standard 13D, 2013 Edition, as modified by local ordinance.

FID 15 **Single- and Multiple-Station Smoke Alarms (CFC 907.2.11):** Listed single- and multiple-station smoke alarms complying with UL 217 shall be installed in accordance with Sections 907.2.11.1 through 907.2.11.4 and NFPA 72.

- Exception: For Group R occupancies. A fire alarm system with smoke detectors located in accordance with this section may be installed in lieu of smoke alarms. Upon actuation of the detector, only those notification appliances in the dwelling unit or guest room where the detector is actuated shall activate.

FID 16 **Key Box Required (CFC 506.1):** Where access to or within a structure or an

FID 6 **Aerial Fire Access Roads (CFC Appendix D105.1):** Buildings or portions of buildings or facilities exceeding 30 feet in height above the lowest level of fire department vehicle access shall be provided with approved fire apparatus access roads capable of accommodating fire department aerial apparatus. Overhead utility and power lines shall not be located within the aerial fire apparatus access roadway.

FID 7 **Aerial Fire Access Road Width (CFC Appendix D105.2):** Fire apparatus access roads shall have a minimum unobstructed width of 26 feet, exclusive of shoulders, in the immediate vicinity of any building or portion of building more than 30 feet in height.

FID 8 **Aerial Access Proximity to Building (CFC Appendix D105.3):** At least one of the required access routes for buildings or facility exceeding 30 feet in height above the lowest level of fire department vehicle access shall be located within a minimum of 15 feet and a maximum of 30 feet from the building and shall be positioned parallel to one entire side of the building.

FID 9 **Fire Lanes (CFC 202 Definitions):** A road or other passageway developed to allow the passage of fire apparatus. A fire lane is not necessarily intended for vehicular traffic other than fire apparatus. *A "fire lane" is a component of a "fire apparatus access road".*

- **Designation of Fire Lanes (CVC 22500.1):** Only the fire department with jurisdiction over the area in which the place is located can designate a fire lane.

- **Fire Lane Marking (CFC 503.3):** Where required by the fire code official, approved signs or other approved notices or markings that include the words NO PARKING—FIRE LANE shall be provided for fire apparatus access roads to identify such roads or prohibit the obstruction thereof. The means by which fire lanes are designated shall be maintained in a clean and legible condition at all times and be replaced or repaired when necessary to provide adequate visibility.

FID 10 **Surface (CFC 503.2.3):** Fire apparatus access roads shall be designed and maintained to support the imposed loads of fire apparatus (73,000 lbs. GVW) and shall be surfaced so as to provide all-weather driving capabilities.

FID 11 **Traffic Calming Devices (CFC 503.4.1):** Traffic calming devices shall be prohibited unless approved by the fire code official.

FID 12 **Security Gates (CFC 503.6):** The installation of security gates across a fire apparatus access road shall be approved by the fire code official. Where security gates are installed, they shall have an approved means of emergency

Complete listings and manufacturer's technical data sheets for all system materials shall be included with plan submittals. All system materials shall be UL listed or FM approved for fire protection service and approved by the Fire Prevention Bureau prior to installation.

Plans shall indicate all necessary engineering features, including all hydraulic reference nodes, pipe lengths and pipe diameters as required by the appropriate codes and standards. Plans and supportive data (calculations and manufacturer's technical data sheets) shall be submitted with each plan submittal. Complete and accurate legends for all symbols and abbreviations shall be provided on the plans.

FID 4 **Street Widths (CFC Appendix L; PSMC § 8.04.500; Palm Springs 2007 General Plan):** Private streets in any residential or mixed use land use designation may be reduced to a minimum of 28 feet (curb face to curb face) provided that (1) additional off street parking is provided as determined by the City Engineer, the Fire Chief and Director of Planning, (2) rolled or wedge curb is provided such that vehicles may park partially out of the traveled way, and (3) pedestrian pathways or sidewalks, if located along the street, separated from the curb by a minimum five-foot parkway are provided.

- Any street not designated by the fire department as a "fire lane" shall comply with the above requirements
- Road width shown is not compliant with General Plan

FID 5 **Fire Apparatus Access Roads (CFC 503.1.1):** Approved fire apparatus access roads shall be provided for every facility, building or portion of a building hereafter constructed or moved into or within the jurisdiction. The fire apparatus access road shall comply with the requirements of this section and shall extend to within 150 feet of all portions of the facility and all portions of the exterior walls of the first story of the building as measured by an approved route around the exterior of the building or facility.

- **Fire Apparatus Access Road (CFC 202 Definitions) –** A road that provides fire apparatus access from a fire station to a facility, building or portion thereof. This is a general term inclusive of all other terms such as fire lane, public street, private street, parking lot lane and access roadway.

- **Dimensions (CFC 503.2.1):** Fire apparatus access roads shall have an unobstructed width of not less than 26 feet *(for designated fire lanes)* except for approved security gates in accordance with Section 503.6 and an unobstructed vertical clearance of not less than 13 feet 6 inches.

City Engineer. As a minimum, all construction signing, lighting and barricading shall be in accordance with Part 6 "Temporary Traffic Control" of the California Manual on Uniform Traffic Control Devices (MUTCD), dated November 7, 2014, or subsequent editions in force at the time of construction.

ENG 68. This property is subject to the Transportation Uniform Mitigation Fee which shall be paid prior to issuance of building permit.

FIRE DEPARTMENT CONDITIONS

These Fire Department conditions may not provide all requirements. Detailed plans are still required for review.

FID 1 These conditions are subject to final plan check and review. Initial Fire Department conditions have been determined from the plans received and dated December 11, 2014. Additional requirements may be required at that time based on revisions to site plans.

FID 2 Fire Department Conditions were based on the *2013 California Fire Code* as adopted by City of Palm Springs, Palm Springs Municipal Code and latest adopted NFPA Standards. Four (4) complete sets of plans for private fire service mains, fire alarm, or fire sprinkler systems must be submitted at time of the building plan submittal.

FID 3 **PLANS AND PERMITS**

Complete plans for private fire service mains or fire sprinkler systems should be submitted for approval well in advance of installation. Plan reviews can take up to 20 working days. Submit a minimum of four (4) sets of drawings for review. Upon approval, the Fire Prevention Bureau will retain one set.

Plans shall be submitted to:

City of Palm Springs
Building and Safety Department
3200 E. Tahquitz Canyon Way
Palm Springs, CA 92262

Counter Hours: 8:00 AM – 6:00 PM, Monday – Thursday

A deposit for Plan Check and Inspection Fees is required at the time of Plan Submittal. Inspection fees are charged at the fully burdened hourly rate of the fire inspector. These fees are established by Resolution of the Palm Springs City Council.

lots created therefrom, and copies of record documents shall be submitted with the Final Map to the Engineering Division as part of the review of the Map. The Final Map shall be approved by the City Council prior to issuance of building permits.

ENG 62. A copy of draft Covenants, Conditions and Restrictions (CC&R's) shall be submitted to the City Attorney for review and approval for any restrictions related to the Engineering Division's recommendations. The CC&R's shall be approved by the City Attorney prior to approval of the Final Map by the City Council, or in the absence of a Final Map, shall be submitted and approved by the City Attorney prior to issuance of Certificate of Occupancy.

ENG 63. Upon approval of a Final Map, the Final Map shall be provided to the City in G.I.S. digital format, consistent with the "Guidelines for G.I.S. Digital Submission" from the Riverside County Transportation and Land Management Agency." G.I.S. digital information shall consist of the following data: California Coordinate System, CCS83 Zone 6 (in U.S. feet); monuments (ASCII drawing exchange file); lot lines, rights-of-way, and centerlines shown as continuous lines; full map annotation consistent with annotation shown on the map; map number; and map file name. G.I.S. data format shall be provided on a CDROM/DVD containing the following: ArcGIS Geodatabase, ArcView Shapefile, ArcInfo Coverage or Exchange file, DWG (AutoCAD 2004 drawing file), DGN (Microstation drawing file), DXF (AutoCAD ASCII drawing exchange file), and PDF (Adobe Acrobat 6.0 or greater) formats. Variations of the type and format of G.I.S. digital data to be submitted to the City may be authorized, upon prior approval of the City Engineer.

TRAFFIC

ENG 64. A minimum of 48 inches of clearance for accessibility shall be provided on public sidewalks or pedestrian paths of travel within the development.

ENG 65. All damaged, destroyed, or modified pavement legends, traffic control devices, signing, striping, and street lights, associated with the proposed development shall be replaced as required by the City Engineer prior to issuance of a Certificate of Occupancy.

ENG 66. Pay the fair share of the estimated cost to install angled parking and bikeway (with enhanced signage and sharrows) on Calle El Segundo as required by the Section 14 Specific Plan.

ENG 67. Construction signing, lighting and barricading shall be provided during all phases of construction as required by City Standards or as directed by the

ENG 53. All proposed utility lines shall be installed underground.

ENG 54. All existing utilities shall be shown on the improvement plans if required for the project. The existing and proposed service laterals shall be shown from the main line to the property line.

ENG 55. Upon approval of any improvement plan (if required) by the City Engineer, the improvement plan shall be provided to the City in digital format, consisting of a DWG (AutoCAD 2004 drawing file), DXF (AutoCAD ASCII drawing exchange file), and PDF (Adobe Acrobat 6.0 or greater) formats. Variation of the type and format of the digital data to be submitted to the City may be authorized, upon prior approval by the City Engineer.

ENG 56. The original improvement plans prepared for the proposed development and approved by the City Engineer (if required) shall be documented with record drawing "as-built" information and returned to the Engineering Division prior to issuance of a final certificate of occupancy. Any modifications or changes to approved improvement plans shall be submitted to the City Engineer for approval prior to construction.

ENG 57. Nothing shall be constructed or planted in the corner cut-off area of any (intersection or) driveway which does or will exceed the height required to maintain an appropriate sight distance per City of Palm Springs Zoning Code Section 93.02.00, D.

ENG 58. All proposed trees within the public right-of-way and within 10 feet of the public sidewalk and/or curb shall have City approved deep root barriers installed in accordance with City of Palm Springs Standard Drawing No. 904.

ENG 59. This property is subject to the Coachella Valley Multiple Species Habitat Conservation Plan Local Development Mitigation Fee (CVMSHCP-LDMF). The LDMF shall be paid prior to issuance of Building Permit.

MAP

ENG 60. The developer shall apply for an annexation to the City of Palm Springs Community Facilities District established for public safety services and submit required applications, waivers, and consent forms to the annexation prior to approval of a final map. Payment of an annexation fee of $2,500 shall be made at the time of the application.

ENG 61. A Final Map shall be prepared by a California registered Land Surveyor or qualified Civil Engineer and submitted to the Engineering Division for review and approval. A Title Report prepared for subdivision guarantee for the subject property, the traverse closures for the existing parcel and all

Management Practices (BMP's) included as part of the NPDES Permit issued for the Whitewater River Region from the Colorado River Basin Regional Water Quality Control Board (RWQCB). The applicant is advised that installation of BMP's, including mechanical or other means for pre-treating contaminated stormwater and non-stormwater runoff, shall be required by regulations imposed by the RWQCB. It shall be the applicant's responsibility to design and install appropriate BMP's, in accordance with the NPDES Permit, that effectively intercept and pre-treat contaminated stormwater and non-stormwater runoff from the project site, prior to release to the City's municipal separate storm sewer system ("MS4"), to the satisfaction of the City Engineer and the RWQCB. Such measures shall be designed and installed on-site; and provisions for perpetual maintenance of the measures shall be provided to the satisfaction of the City Engineer, including provisions in Covenants, Conditions, and Restrictions (CC&R's) required for the development.

ENG 50. The project is subject to flood control and drainage implementation fees. The acreage drainage fee at the present time is $ 9212.00 per acre in accordance with Resolution No. 15189. Fees shall be paid prior to issuance of a building permit.

ENG 51. All on-site storm drain systems shall be privately maintained by a Homeowners Association (HOA). Provisions for maintenance of the on-site storm drain systems acceptable to the City Engineer shall be included in Covenants, Conditions and Restrictions (CC&R's) required for this project.

GENERAL

ENG 52. Any utility trenches or other excavations within existing asphalt concrete pavement of off-site streets required by the proposed development shall be backfilled and repaired in accordance with City of Palm Springs Standard Drawing No. 115. The developer shall be responsible for removing, grinding, paving and/or overlaying existing asphalt concrete pavement of off-site streets as required by and at the discretion of the City Engineer, including additional pavement repairs to pavement repairs made by utility companies for utilities installed for the benefit of the proposed development (i.e. Desert Water Agency, Southern California Edison, Southern California Gas Company, Time Warner, Verizon, Mission Springs Water District, etc.). Multiple excavations, trenches, and other street cuts within existing asphalt concrete pavement of off-site streets required by the proposed development may require complete grinding and asphalt concrete overlay of the affected off-site streets, at the discretion of the City Engineer. The pavement condition of the existing off-site streets shall be returned to a condition equal to or better than existed prior to construction of the proposed development.

ENG 47. A Final Project-Specific Water Quality Management Plan (WQMP) shall be submitted to and approved by the City Engineer prior to issuance of a grading or building permit. The WQMP shall address the implementation of operational Best Management Practices (BMP's) necessary to accommodate nuisance water and storm water runoff from the site. Direct release of nuisance water to the adjacent property (or public streets) is prohibited. Construction of operational BMP's shall be incorporated into the Precise Grading and Paving Plan.

a. Prior to issuance of any grading or building permits, the property owner shall record a "Covenant and Agreement" with the County-Clerk Recorder or other instrument on a standardized form to inform future property owners of the requirement to implement the approved Final Project-Specific Water Quality Management Plan (WQMP). Other alternative instruments for requiring implementation of the approved Final Project-Specific WQMP include: requiring the implementation of the Final Project-Specific WQMP in Home Owners Association or Property Owner Association Covenants, Conditions, and Restrictions (CC&Rs); formation of Landscape, Lighting and Maintenance Districts, Assessment Districts or Community Service Areas responsible for implementing the Final Project-Specific WQMP; or equivalent. Alternative instruments must be approved by the City Engineer prior to issuance of any grading or building permits.

b. Prior to issuance of certificate of occupancy or final City approvals (OR of "final" approval by City), the applicant shall: (a) demonstrate that all structural BMP's have been constructed and installed in conformance with approved plans and specifications; (b) demonstrate that applicant is prepared to implement all non-structural BMP's included in the approved Final Project-Specific WQMP, conditions of approval, or grading/building permit conditions; and (c) demonstrate that an adequate number of copies of the approved Final Project-Specific WQMP are available for the future owners (where applicable).

DRAINAGE

ENG 48. Direct release of on-site nuisance water or stormwater runoff shall not be permitted to adjacent streets. Provisions for the interception of nuisance water from entering adjacent public streets from the project site shall be provided through the use of a minor storm drain system that collects and conveys nuisance water to landscape or parkway areas, and in only a stormwater runoff condition, pass runoff directly to the streets through parkway or under sidewalk drains.

ENG 49. This project shall be required to install measures in accordance with applicable National Pollution Discharge Elimination System (NPDES) Best

Management Plan shall be incorporated by reference or attached to the SWPPP as the Post-Construction Management Plan. A copy of the up-to-date SWPPP shall be kept at the project site and be available for review upon request.

ENG 42. In accordance with City of Palm Springs Municipal Code, Section 8.50.022 (h), the applicant shall post with the City a cash bond of two thousand dollars ($2,000.00) per disturbed acre (if there is disturbance of 5,000 square feet or more) at the time of issuance of grading permit for mitigation measures for erosion/blowsand relating to this property and development.

ENG 43. A Geotechnical/Soils Report prepared by a California registered Geotechnical Engineer shall be required for and incorporated as an integral part of the grading plan for the proposed development. A copy of the Geotechnical/Soils Report shall be submitted to the Engineering Division with the first submittal of a grading plan.

ENG 44. The applicant shall provide all necessary geotechnical/soils inspections and testing in accordance with the Geotechnical/Soils Report prepared for the project. All backfill, compaction, and other earthwork shown on the approved grading plan shall be certified by a California registered geotechnical or civil engineer, certifying that all grading was performed in accordance with the Geotechnical/Soils Report prepared for the project. Documentation of all compaction and other soils testing shall be provided. No certificate of occupancy will be issued until the required certification is provided to the City Engineer.

ENG 45. The applicant shall provide pad (or finish floor) elevation certifications for all building (or structure) pads in conformance with the approved grading plan (if required), to the Engineering Division prior to construction of any building (or structure) foundation.

ENG 46. In cooperation with the Riverside County Agricultural Commissioner and the California Department of Food and Agriculture Red Imported Fire Ant Project, applicants for grading permits involving a grading plan and involving the export of soil will be required to present a clearance document from a Department of Food and Agriculture representative in the form of an approved "Notification of Intent To Move Soil From or Within Quarantined Areas of Orange, Riverside, and Los Angeles Counties" (RIFA Form CA-1) prior to approval of the Grading Plan (if required). The California Department of Food and Agriculture office is located at 73-710 Fred Waring Drive, Palm Desert (Phone: 760-776-8208).

WATER QUALITY MANAGEMENT PLAN

Approval; a copy of a final approved conformed copy of the Site Plan; a copy of current Title Report; a copy of Soils Report; and a copy of the associated Hydrology Study/Report.

ENG 36. Prior to approval of a Grading Plan (or issuance of a Grading Permit), the applicant shall obtain written approval to proceed with construction from the Agua Caliente Band of Cahuilla Indians, Tribal Historic Preservation Officer or Tribal Archaeologist. The applicant shall contact the Tribal Historic Preservation Officer or the Tribal Archaeologist at (760) 699-6800, to determine their requirements, if any, associated with grading or other construction. The applicant is advised to contact the Tribal Historic Preservation Officer or Tribal Archaeologist as early as possible. If required, it is the responsibility of the applicant to coordinate scheduling of Tribal monitors during grading or other construction, and to arrange payment of any required fees associated with Tribal monitoring.

ENG 37. In accordance with an approved PM-10 Dust Control Plan, temporary dust control perimeter fencing shall be installed. Fencing shall have screening that is tan in color; green screening will not be allowed. Temporary dust control perimeter fencing shall be installed after issuance of Grading Permit, and immediately prior to commencement of grading operations.

ENG 38. (Temporary dust control) perimeter fence screening shall be appropriately maintained, as required by the City Engineer. Cuts (vents) made into the perimeter fence screening shall not be allowed. Perimeter fencing shall be adequately anchored into the ground to resist wind loading.

ENG 39. Within 10 days of ceasing all construction activity and when construction activities are not scheduled to occur for at least 30 days, the disturbed areas on-site shall be permanently stabilized, in accordance with Palm Springs Municipal Code Section 8.50.022. Following stabilization of all disturbed areas, perimeter fencing shall be removed, as required by the City Engineer.

ENG 40. A Notice of Intent (NOI) to comply with the California General Construction Stormwater Permit (Water Quality Order 2009-0009-DWQ as modified September 2, 2009) is required for the proposed development via the California Regional Water Quality Control Board online SMARTS system). A copy of the executed letter issuing a Waste Discharge Identification (WDID) number shall be provided to the City Engineer prior to issuance of a grading or building permit.

ENG 41. This project requires preparation and implementation of a stormwater pollution prevention plan (SWPPP). As of September 4, 2012, all SWPPPs shall include a post-construction management plan (including Best Management Practices) in accordance with the current Construction General Permit. Where applicable, the approved final project-specific Water Quality

ENG 32. All sanitary facilities shall be connected to the public (or private) sewer system (via the proposed on-site private sewer system). New laterals shall not be connected at manholes.

ENG 33. All on-site sewer systems shall be privately maintained by a Home Owners Association (HOA). Provisions for maintenance of the on-site sewer system acceptable to the City Engineer shall be included in the Covenants, Conditions and Restrictions (CC&R's) required for this project.

ENG 34. Submit sewer improvement plans prepared by a California registered civil engineer to the Engineering Division. The plan(s) shall be approved by the City Engineer prior to issuance of any building permits.

GRADING

ENG 35. Submit a Precise Grading Plan prepared by a California registered Civil engineer to the Engineering Division for review and approval. The Precise Grading Plan shall be approved by the City Engineer prior to issuance of grading permit.

a. A Fugitive Dust Control Plan shall be prepared by the applicant and/or its grading contractor and submitted to the Engineering Division for review and approval. The applicant and/or its grading contractor shall be required to comply with Chapter 8.50 of the City of Palm Springs Municipal Code, and shall be required to utilize one or more "Coachella Valley Best Available Control Measures" as identified in the Coachella Valley Fugitive Dust Control Handbook for each fugitive dust source such that the applicable performance standards are met. The applicant's or its contractor's Fugitive Dust Control Plan shall be prepared by staff that has completed the South Coast Air Quality Management District (AQMD) Coachella Valley Fugitive Dust Control Class. The applicant and/or its grading contractor shall provide the Engineering Division with current and valid Certificate(s) of Completion from AQMD for staff that have completed the required training. For information on attending a Fugitive Dust Control Class and information on the Coachella Valley Fugitive Dust Control Handbook and related "PM10" Dust Control issues, please contact AQMD at (909) 396-3752, or at http://www.AQMD.gov. A Fugitive Dust Control Plan, in conformance with the Coachella Valley Fugitive Dust Control Handbook, shall be submitted to and approved by the Engineering Division prior to approval of the Grading plan.

b. The first submittal of the Grading Plan shall include the following information: a copy of final approved conformed copy of Conditions of

ENG 24. Construct a Pedestrian Plaza from Andreas Road south to southerly property line of lot 74, the Plaza shall be intended to be a pedestrian connection from the Convention Center to Tahquitz Canyon Way with the landscaping, decorative pavers and enhancements to be consistent with the Section 14 Specific Plan. Together with a one way access from Tahquitz Canyon Way to access the proposed live work units identified as lots 75 through 93, as required by the City Engineer.

ENG 25. Dedicate a sidewalk and emergency ingress and egress easement from Andreas Road south to Tahquitz Canyon Way. Decorative pavers and pedestrian enhancements shall be designed to accommodate emergency vehicles.

ENG 26. Final design and layout of proposed pedestrian plaza and one way access shall be subject to review by City Engineer and Fire Marshall.

ENG 27. Vacation of existing public right-of-way for Calle Alvarado shall be identified on the final map.

ON-SITE

ENG 28. Construct a minimum pavement section of 2-1/2 inches asphalt over 4 inches crushed miscellaneous base with a minimum subgrade of 24 inches at 95% relative compaction, or equal, within all on-site private streets in accordance with City of Palm Springs Standard Drawing No. 110 and 302. If an alternative pavement section is proposed, the proposed pavement section shall be designed by a California registered Geotechnical Engineer using "R" values from the project site and submitted to the City Engineer for approval.

ENG 29. All on-site private streets (or drive aisles) shall be two-way with a minimum 26 feet wide travelway (as measured from face of curb) where no on-street parking is proposed.

ENG 30. All on-site private streets (or drive aisles) shall be two-way with a minimum 32 feet wide travelway (as measured from face of curb) where on-street parallel parking is proposed on one-side of the street.

ENG 31. On-site drive aisles (or parking lot) shall be constructed with curbs, gutters, and cross-gutters, as necessary to accept and convey street surface drainage of the on-site streets to the on-site drainage system, in accordance with applicable City standards.

SANITARY SEWER

TAHQUITZ CANYON WAY

ENG 19. Dedicate abutters rights of access to Tahquitz Canyon Way along the entire frontage of the project, vehicular access to Tahquitz Canyon Way shall be prohibited.

ENG 20. The existing sidewalk along the entire frontage shall be modified consistent with the "Grand Boulevard of Indian Culture" described in the Section 14 Specific Plan (dated July 16, 2014). The applicant shall furnish and install artwork relating to Indian culture along the frontage, unless otherwise deferred by the Director of Planning Services. The "Grand Boulevard of Indian Culture" shall be constructed along the entire Tahquitz Canyon Way frontage. The specific street improvements are described in chapter 5 of said Section 14 Specific Plan.

ENG 21. Install Tahquitz Canyon Way decorative light fixtures (12 feet to 15 feet tall) consistent with the existing portion of existing decorative lighting system along Tahquitz Canyon Way, including banner supports and overhead pedestrian-level lighting on the sidewalk. The applicant shall furnish and install the decorative light fixtures, luminaries. The electrical system was installed by others and shall be operated by a separate electric meter, unless an existing meter is available for use by the new lighting system, as approved by the City Engineer. The new portions of the lighting system shall be installed and operational, and accepted for operation and maintenance by the City, prior to issuance of a Certificate of Occupancy, unless otherwise allowed by the City Engineer.

ENG 22. At the time that a comprehensive shuttle/bus route system for the Section 14 Master Development Plan area is planned, it is recommended that the applicant coordinate with the City on the design and layout of, and accommodate an on-site shuttle/bus stop at the Main Entrance of Tahquitz Canyon Way in accordance with the Final Section 14 Master Development Plan/Specific Plan, in consultation with the City, provided that the intent of the Section 14 Specific Plan guideline is maintained.

ENG 23. All broken or off grade street improvements along the project frontage shall be repaired or replaced.

CALLE ALVARADO (PRIVATE STREET)

ENG 12. Dedicate abutters rights of access to Calle El Segundo along the entire frontage of the project, excluding the 28 feet wide access point; vehicular access to Calle El Segundo shall be prohibited.

ENG 13. Remove the existing driveway approaches and replace with a 6 inch curb and gutter to match existing, construct sidewalk to match existing in accordance with City of Palm Springs Standard Drawings No. 200, 210.

ENG 14. Construct a 28 feet wide driveway approach in accordance with City of Palm Springs Standard Drawing No. 205. The centerline of the driveway approach shall be located approximately 180 feet from the centerline of Tahquitz Canyon Way.

ENG 15. Construct a Type A curb ramp meeting current California State Accessibility standards on each side of the driveway approach in accordance with City of Palm Springs Standard Drawing No. 212. The applicant shall ensure that an appropriate path of travel, meeting ADA guidelines, is provided across the driveway, and shall adjust the location of the access ramps, if necessary, to meet ADA guidelines, subject to the approval of the City Engineer. If necessary, additional pedestrian and sidewalk easements shall be provided on-site to construct a path of travel meeting ADA guidelines.

ENG 16. In accordance with the Final Section 14 Specific Plan (dated July 16, 2014), the applicant shall plant shade trees in a formal pattern along the Calle El Segundo frontage, as approved by the City Engineer. The applicant shall be responsible for the perpetual maintenance of the new trees and other parkway landscaping along the Calle El Segundo frontage. The specific landscaping improvements described in this condition may be modified by the applicant, in consultation with the City, provided that the intent of the Section 14 Specific Plan guideline is maintained.

ENG 17. Install decorative light fixtures (12 feet to 15 feet tall) consistent with the existing decorative lighting system along Tahquitz Canyon Way, including banner supports and overhead pedestrian-level lighting on the sidewalk. The applicant shall furnish and install the decorative light fixtures, luminaries and electrical system. The system shall be operated by a separate electric meter, unless an existing meter is available for use by the new lighting system, as approved by the City Engineer. The lighting system shall be installed and operational, and accepted for operation and maintenance by the City, prior to issuance of a Certificate of Occupancy, unless otherwise allowed by the City Engineer.

ENG 18. All broken or off grade street improvements along the project frontage shall be repaired or replaced.

ENG 6. Construct a 36 feet wide driveway approach in accordance with City of Palm Springs Standard Drawing No. 205. The centerline of the driveway approach shall be located approximately 430 feet from the centerline of Calle El Segundo, as shown on the approved site plan.

ENG 7. Construct a Type A curb ramp meeting current California State Accessibility standards on each side of the driveway approach in accordance with City of Palm Springs Standard Drawing No. 212. The applicant shall ensure that an appropriate path of travel, meeting ADA guidelines, is provided across the driveway, and shall adjust the location of the access ramps, if necessary, to meet ADA guidelines, subject to the approval of the City Engineer. If necessary, additional pedestrian and sidewalk easements shall be provided on-site to construct a path of travel meeting ADA guidelines.

ENG 8. In accordance with the Final Section 14 Specific Plan (dated July 16, 2014), the applicant shall plant shade trees in a formal pattern along the Andreas Road frontage, as approved by the City Engineer. The applicant shall be responsible for the perpetual maintenance of the new trees and other parkway landscaping along the Andreas Road frontage. The specific landscaping improvements described in this condition may be modified by the applicant, in consultation with the City, provided that the intent of the Section 14 Specific Plan guideline is maintained.

ENG 9. Install decorative light fixtures (12 feet to 15 feet tall) consistent with the existing decorative lighting system along Tahquitz Canyon Way, including banner supports and overhead pedestrian-level lighting on the sidewalk. The applicant shall furnish and install the decorative light fixtures, luminaries and electrical system. The system shall be operated by a separate electric meter, unless an existing meter is available for use by the new lighting system, as approved by the City Engineer. The lighting system shall be installed and operational, and accepted for operation and maintenance by the City, prior to issuance of a Certificate of Occupancy, unless otherwise allowed by the City Engineer.

ENG 10. All broken or off grade street improvements along the project frontage shall be repaired or replaced.

CALLE EL SEGUNDO

ENG 11. Dedicate an additional 15 feet to provide a right of wayg width of 40 feet where required by the City Engineer.

POLICE DEPARTMENT CONDITIONS

POL 1. Developer shall comply with Section II of Chapter 8.04 "Building Security Codes" of the Palm Springs Municipal Code.

BUILDING DEPARTMENT CONDITIONS

BLD 1. Prior to any construction on-site, all appropriate permits must be secured.

ENGINEERING DEPARTMENT CONDITIONS

The Engineering Division recommends that if this application is approved, such approval is subject to the following conditions being completed in compliance with City standards and ordinances.

Before final acceptance of the project, all conditions listed below shall be completed to the satisfaction of the City Engineer.

STREETS

ENG 1. Any improvements within the public right-of-way require a City of Palm Springs Encroachment Permit.

ANDREAS ROAD

ENG 2. Dedicate an additional 3 feet to provide a right-of-way width of 33 feet along the entire frontage, together with a property line - corner cut-back at the southeast corner of the intersection of Andreas Road and Calle El Segundo, in accordance with City of Palm Springs Standard Drawing No. 105.

ENG 3. Dedicate abutters rights of access to Andreas Road along the entire frontage of the project, excluding the 36 feet wide access point; vehicular access to Andreas Road shall be prohibited.

ENG 4. Dedicate an easement for sidewalk purposes as needed for those portions of meandering sidewalk located outside of the public right-of-way.

ENG 5. Remove the existing driveway approach and replace with a 6 inch curb and gutter to match existing, construct meandering sidewalk to match existing in accordance with City of Palm Springs Standard Drawings No. 200, 210.

PLN 9. Pool Enclosure Approval Required. Details of fencing or walls around pools (material and color) and pool equipment areas shall be submitted for approval by the Planning Department prior to issuance of Building Permits.

PLN 10. Exterior Alarms & Audio Systems. No sirens, outside paging or any type of signalization will be permitted, except approved alarm systems.

PLN 11. Outside Storage Prohibited. No outside storage of any kind shall be permitted except as approved as a part of the proposed plan.

PLN 12. No off-site Parking. Vehicles associated with the operation of the proposed development including company vehicles or employees vehicles shall not be permitted to park off the proposed building site unless a parking management plan has been approved.

PLN 13. Bicycle Parking. The project shall be required to provide secure bicycle parking facilities on site for use by residents and visitors. Location and design shall be approved by the Director of Planning.

PLN 14. Prior to recordation of the final subdivision map, the developer shall submit for review and approval the following documents to the Planning Department which shall demonstrate that the project will be developed and maintained in accordance with the intent and purpose of the approved tentative map:

a. The document to convey title.

b. Deed restrictions, easements, covenant conditions and restrictions that are to be recorded.

c. The approved documents shall be recorded at the same time that the subdivision map is recorded. The documents shall contain provisions for joint access to the proposed parcels and open space restrictions. The approved documents shall contain a provision which provides that they may not be terminated or substantially amended without the consent of the City and the developer's successor-in-interest.

PLN 15. Update of City's Zoning Map. Upon approval of the proposed Change of Zone, Tract Map and/or Planned Development District, the applicant shall be responsible for costs associated with update of the City's GIS based zoning maps.

PLN 16. Shade Structure Option for Buyers. Develop a design for shade structures in the back yards that integrates with the architecture of the complex those buyers could include as a purchase option; review design with Director of Planning for design approval.

PLN 17. Provide 'smart controllers' for all irrigation systems.

issuance of a building permit. Manufacturer's cut sheets of all exterior lighting on the building and in the landscaping shall be included. If lights are proposed to be mounted on buildings, down-lights shall be utilized. No lighting of hillsides is permitted.

PLN 2. Water Efficient Landscaping Conformance. The project is subject to the Water Efficient Landscape Ordinance (Chapter 8.60.00 and Chapter 11.06) of the Palm Springs Municipal Code and all other relevant water efficient landscape ordinances. The applicant shall submit a landscape and irrigation plan to the Director of Planning for review and approval prior to the issuance of a building permit. Landscape plans shall be wet stamped and approved by the Riverside County Agricultural Commissioner's Office prior to submittal. Prior to submittal to the City, landscape plans shall also be certified by the local water agency that they are in conformance with the water agency's and the City's Water Efficient Landscape Ordinances.

PLN 3. Palm Tree Requirement. In accordance with Planning Commission Resolution No. 1503, dated November 18, 1970, the developer is required to plant Washingtonia Fillifera (California Fan) palm trees (14 feet from ground to fronds in height) 60 feet apart along the entire frontage of Palm Canyon Drive and/or Tahquitz Canyon Way median. The existing Robusta / Mexican Fan Palms at the Tahquitz Canyon Way frontage shall be replaced with California Fan Palms.

PLN 4. Sign Applications Required. No signs are approved by this action. Separate approval and permits shall be required for all signs in accordance with Zoning Ordinance Section 93.20.00. The applicant shall submit a sign permit/program to the Department of Planning Services prior to the issuance of building permits.

PLN 5. Flat Roof Requirements. Roof materials on flat roofs (less than 2:12) must conform to California Title 24 thermal standards for "Cool Roofs". Such roofs must have a minimum initial thermal emittance of 0.75 or a minimum SRI of 64 and a three-year aged solar reflectance of 0.55 or greater. Only matte (non-specular) roofing is allowed in colors such as beige or tan.

PLN 6. Maintenance of Awnings & Projections. All awnings shall be maintained and periodically cleaned.

PLN 7. Screen Roof-mounted Equipment. All roof mounted mechanical equipment shall be screened per the requirements of Section 93.03.00 of the Zoning Ordinance.

PLN 8. Surface Mounted Downspouts Prohibited. No exterior downspouts shall be permitted on any facade on the proposed building(s) that are visible from adjacent streets or residential and commercial areas.

discovered shall be handled consistent with state law provisions.

HAZARDS AND HAZARDOUS MATERIALS:

MM VII-1: Prior to the issuance of demolition permits, an asbestos and lead survey shall be conducted by a certified asbestos and lead consultant, and a report shall be provided to the City Building Official. Should asbestos- and/or lead-containing materials be found, the project proponent shall submit to the Building Official a remediation and disposal plan to be conducted by a qualified, licensed specialist in the disposal of hazardous materials. The plan shall include specifics regarding the method of removal, transport, and disposal for all such materials.

NOISE:

MM XI-1. Demolition and construction activities on-site shall occur only between 7:00 a.m. and 7:00 p.m., Monday-Friday, and 8:00 a.m. and 5:00 p.m. on Saturdays, and shall be prohibited on Sundays and holidays, as specified by the Palm Springs Municipal Code.

MM XI-2. All construction equipment, fixed or mobile, shall be equipped with properly operating and maintained mufflers and the engines shall be equipped with shrouds.

MM XI-3. Stationary equipment shall be placed such that emitted noise is directed away from Andreas Road and Calle El Segundo.

MM XI-4. Stockpiling and vehicle staging areas shall be located as far as practical from Andreas Road and Calle El Segundo.

MM XI-5. Delivery hours should be limited to 7 a.m. to 7 p.m. daily to minimize the potential for adverse impacts on the adjacent Plaza Villas.

PLANNING DEPARTMENT CONDITIONS

PLN 1. Outdoor Lighting Conformance. Exterior lighting plans, including a photometric site plan showing the project's conformance with Section 93.21.00 Outdoor Lighting Standards of the Palm Springs Zoning ordinance, shall be submitted for approval by the Department of Planning prior to

reservation are subject to payment of the CVMSHCP LDMF prior to the issuance of certificate of occupancy.

ENV 2. California Fish & Game Fees Required. The project is required to pay a fish and game impact fee as defined in Section 711.4 of the California Fish and Game Code. This CFG impact fee plus an administrative fee for filing the action with the County Recorder shall be submitted by the applicant to the City in the form of a money order or a cashier's check payable to the Riverside County Clerk prior to the final City action on the project (after City Council determination). This fee shall be submitted by the City to the County Clerk with the Notice of Determination. Action on this application shall not be final until such fee is paid. The project may be eligible for exemption or refund of this fee by the California Department of Fish & Game. Applicants may apply for a refund by the CFG at www.dfg.ca.gov for more information.

ENV 3. Mitigation Monitoring. The mitigation measures of the environmental assessment shall apply. The applicant shall submit a signed agreement that the mitigation measures outlined as part of the negative declaration or EIR will be included in the plans prior to Planning Commission consideration of the environmental assessment. Mitigation measures are defined in the CEQA Evaluation and summarized here as follows:

AESTHETICS:

MMI – 1 Project site plans, architectural renderings, and landscape plans shall be revised to address inconsistencies with the development standards and other design requirements of the Section 14 Specific Plan, as determined by the City Council.

CULTURAL RESOURCES:

MM V-1 As there is always a possibility of buried cultural and paleontological resources in a project area, a Native American Monitor(s) shall be present during all ground disturbing activities including clearing and grubbing, excavation, burial of utilities, planting of rooted plants, etc., The Agua Caliente Band of Cahuilla Indian Cultural Office shall be contacted for additional information on the use and availability of Cultural Resource Monitors. Should buried cultural deposits be encountered, the Monitor shall contact the Director of Planning Services. Following consultation, the Director shall have the authority to halt destructive construction and shall notify a qualified archaeologist to investigate the find. If necessary, the qualified archaeologist shall prepare a treatment plan for submission to the State Historic Preservation Officer and Agua Caliente Cultural Resource Coordinator for approval. Human remains

City approval, and shall require maintenance of all property in a good condition and in accordance with all ordinances,

ADM 15. CC&R's Deposits & Fees. The applicant shall submit to the City of Palm Springs, a deposit in the amount of $3,500, for the review of the CC&R's by the City Attorney. A $675 filing fee shall also be paid to the City Planning Department for administrative review purposes.

ADM 16. CC&R's Noise Disclosure. The CC&R's shall have a disclosure statement regarding the location of the project relative to roadway noise, City special events, roadway closures for special events and other planned activities which may occur in the public right-of-way.

ADM 17. Notice to Tenants. The applicant shall provide all tenants with a copy of the Conditions of Approval for this project.

ADM 18. Community Facilities District. The project will bring additional residents, visitors and activities to the community that will potentially impact the needs for public safety services beyond the City's ability to provide such services; and because such services, including police protection, criminal justice, fire protection and suppression, ambulance, paramedic and other safety services, and recreation, library, cultural services are near capacity, the City has established a Community Facilities District to which this project shall be annexed, subject to conditions of approval; and

Prior to recordation of the final map or, at the City's option, prior to issuance of certificate of occupancy, the developer shall agree to support formation of or annexation into a Community Facilities District (CFD) to include the project site. Developer further agrees to waive any right of protest or contest such formation or annexation, provided that the amount of any assessment for any single family dwelling unit (or the equivalency thereof when applied to multiple family, commercial or industrial) as established through appropriate study shall not exceed $500 annually per dwelling unit or dwelling unit equivalency unit, subject to an annual consumer price index escalator. Prior to sale of any lots, or prior to the issuance of any certificate of occupancy, or prior to any approval of the Building Official that will allow the premises to be occupied, the CFD shall be formed, the annexation thereto shall occur, or at the option of the City Manager and Building Official, a covenant agreement may be recorded against any affected parcel(s) with the project, evidencing the Owner's binding consent, approval, and waiver of rights as provided in this condition of approval.

ENVIRONMENTAL ASSESSMENT CONDITIONS

ENV 1. Coachella Valley Multiple-Species Habitat Conservation Plan (CVMSHCP) Local Development Mitigation Fee (LDMF) required. All projects within the City of Palm Springs, not within the Agua Caliente Band of Cahuilla Indians

ADM 11. Park Development Fees. The developer shall dedicate land or pay a fee in lieu of a dedication, at the option of the City. The in-lieu fee shall be computed pursuant to Ordinance No. 1632, Section IV, by multiplying the area of park to be dedicated by the fair market value of the land being developed plus the cost to acquire and improve the property plus the fair share contribution, less any credit given by the City, as may be reasonably determined by the City based upon the formula contained in Ordinance No. 1632. In accordance with the Ordinance, the following areas or features shall not be eligible for private park credit: golf courses, yards, court areas, setbacks, development edges, slopes in hillside areas (unless the area includes a public trail) landscaped development entries, meandering streams, land held as open space for wildlife habitat, flood retention facilities and circulation improvements such as bicycle, hiking and equestrian trails (unless such systems are directly linked to the City's community-wide system and shown on the City's master plan).

ADM 12. Maintenance of Outdoor Seating and structures at the "Art Walk". Periodic cleaning of the "Art Walk" located south of the common pool area in the center of the live/work units shall be the responsibility of the project's homeowners' association (HOA).

ADM 13. CC&R's The applicant prior to issuance of building permits shall submit a draft declaration of covenants, conditions and restrictions ("CC&R's") to the Director of Planning for approval in a format to be approved by the City Attorney. These CC&R's may be enforceable by the City, shall not be amended without City approval, and shall require maintenance of all property in a good condition and in accordance with all ordinances

ADM 14. CC&R's. Prior to recordation of a final Tentative Tract Map or issuance of building permits, the applicant shall submit a draft declaration of covenants, conditions and restrictions ("CC&R's") to the Director of Planning for approval in a format to be approved by the City Attorney. The draft CC&R package shall include:

a. The document to convey title

b. Deed restrictions, easements, of Covenant Conditions and Restrictions to be recorded.

c. Provisions for joint access to the proposed parcels, and any open space restrictions.

d. A provision, which provides that the CC&R's may not be terminated or substantially amended without the consent of the City and the developer's successor-in-interest.

Approved CC&R's are to be recorded following approval of the final map. The CC&R's may be enforceable by the City, shall not be amended without

matter following an adverse judgment or failure to appeal, shall not cause a waiver of the indemnification rights herein.

ADM 7. Maintenance and Repair. The property owner(s) and successors and assignees in interest shall maintain and repair the improvements including and without limitation all structures, sidewalks, bikeways, parking areas, landscape, irrigation, lighting, signs, walls, and fences between the curb and property line, including sidewalk or bikeway easement areas that extend onto private property, in a first class condition, free from waste and debris, and in accordance with all applicable law, rules, ordinances and regulations of all federal, state, and local bodies and agencies having jurisdiction at the property owner's sole expense. This condition shall be included in the recorded covenant agreement for the property if required by the City.

ADM 8. Time Limit on Approval. Approval of the (Planned Development District (PDD) Tentative Tract Map (TTM) and Major Architectural Applications (MAJ) shall be valid for a period of two (2) years from the effective date of the approval. Extensions of time may be granted by the Planning Commission upon demonstration of good cause.

Approval of this Conditional Use Permit shall be valid for a period of two (2) years from the effective date of the approval. Once constructed, the Conditional Use Permit, provided the project has remained in compliance with all conditions of approval, does not have a time limit.

Extensions of time may be approved pursuant to Code Section 9.63.110. Such extension shall be required in writing and received prior to the expiration of the approval (Tentative Tract Map).

ADM 9. Right to Appeal. Decisions of an administrative officer or agency of the City of Palm Springs may be appealed in accordance with Municipal Code Chapter 2.05.00. Permits will not be issued until the appeal period has concluded.

ADM 10. Public Art Fees. This project shall be subject to Chapters 2.24 and 3.37 of the Municipal Code regarding public art. The project shall either provide public art or payment of an in lieu fee. In the case of the in-lieu fee, the fee shall be based upon the total building permit valuation as calculated pursuant to the valuation table in the Uniform Building Code, the fee being 1/2% for commercial projects or 1/4% for residential projects with first $100,000 of total building permit valuation for individual single-family units exempt. Should the public art be located on the project site, said location shall be reviewed and approved by the Director of Planning and Zoning and the Public Arts Commission, and the property owner shall enter into a recorded agreement to maintain the art work and protect the public rights of access and viewing.

ADMINISTRATIVE CONDITIONS

ADM 1. Project Description. This approval is for the project described per Case (5.1361 PDD 375 ZC / CUP / 3.3820 MAJ / TTM 36876); except as modified with the approved Mitigation Monitoring Program and the conditions below.

ADM 2. Reference Documents. The site shall be developed and maintained in accordance with the approved plans, date stamped February 17, 2015, including site plans, architectural elevations, exterior materials and colors, landscaping, and grading on file in the Planning Division except as modified by the approved Mitigation Measures and conditions below.

ADM 3. Conform to all Codes and Regulations. The project shall conform to the conditions contained herein, all applicable regulations of the Palm Springs Zoning Ordinance, Municipal Code, and any other City County, State and Federal Codes, ordinances, resolutions and laws that may apply.

ADM 4. Minor Deviations. The Director of Planning or designee may approve minor deviations to the project description and approved plans in accordance with the provisions of the Palm Springs Zoning Code.

ADM 5. Tentative Map. This approval is for Tentative Tract Map 36876 located at the Northeast corner of Tahquitz Canyon Way and Calle El Segundo, date stamped February 17, 2015. This approval is subject to all applicable regulations of the Subdivision Map Act, the Palm Springs Municipal Code, and any other applicable City Codes, ordinances and resolutions.

ADM 6. Indemnification. The owner shall defend, indemnify, and hold harmless the City of Palm Springs, its agents, officers, and employees from any claim, action, or proceeding against the City of Palm Springs or its agents, officers or employees to attach, set aside, void or annul, an approval of the City of Palm Springs, its legislative body, advisory agencies, or administrative officers concerning Case 5.1365 PDD 375 ZC / CUP / 3.3820 MAJ / TTM 36876, including without limitation the environmental assessments prepared in conjunction with such applications. The City of Palm Springs will promptly notify the applicant of any such claim, action, or proceeding against the City of Palm Springs and the applicant will undertake full defense of the matter and pay all City's costs incurred in the defense of such matters, including any attorneys' fees and or costs that may be assessed against the City as a result of such defense. If the City of Palm Springs fails to promptly notify the applicant of any such claim, action or proceeding or fails to cooperate fully in the defense, the applicant shall not, thereafter, be responsible to defend, indemnify, or hold harmless the City of Palm Springs. Notwithstanding the foregoing, the City retains the right to settle or abandon the matter without the applicant's consent but should it do so, the City shall waive the indemnification herein, except, the City's decision to settle or abandon a

EXHIBIT A
CONDITIONS OF APPROVAL

Case 5.1361 PDD 375 ZC / CUP / 3.3820 MAJ / TTM 36876 - "Aberdeen"
(Northeast corner of Tahquitz Canyon Way and Calle El Segundo)

April 15, 2015

Before final acceptance of the project, all conditions listed below shall be completed to the satisfaction of the City Engineer, the Director of Planning Services, the Director of Building and Safety, the Chief of Police, the Fire Chief or their designee, depending on which department recommended the condition.

Any agreements, easements or covenants required to be entered into shall be in a form approved by the City Attorney.

PROJECT SPECIFIC

PSP 1. Revise the internal street widths to conform to the Section 14 Specific Plan and General Plan minimum required widths for private streets [28 feet (rolled curb to curb) with 5 foot landscape buffer and 5 foot sidewalks].

PSP 2. Modify the extension of Calle Alvarado to satisfactorily meet width requirements of City Engineer and Fire Department.

PSP 3. Provide unlocked pedestrian access through center of site and at all vehicular access gates.

PSP 4. Prohibit residential uses in structures fronting Tahquitz Canyon Way.

PSP 5. Include bicycle parking as required by the Section 14 Specific Plan.

PSP 6. Provide trash enclosure for commercial building.

PSP 7. Consider providing Plug-in Electric Vehicle (PEV) parking spaces as required by the Section 14 Specific Plan.

PSP 8. Redesign streetscape along Tahquitz Canyon to be consistent with the Section 14 Specific Plan with the inclusion of street furniture and identification of Indian public art locations.

CERTIFICATION

STATE OF CALIFORNIA)
COUNTY OF RIVERSIDE) ss.
CITY OF PALM SPRINGS)

I, JAMES THOMPSON, City Clerk of the City of Palm Springs, hereby certify that Resolution No. ____ is a full, true and correct copy, and was duly adopted at a regular meeting of the City Council of the City of Palm Springs on _____, by the following vote:

AYES:
NOES:
ABSENT:
ABSTAIN:

_____
James Thompson, City Clerk
City of Palm Springs, California

g. The design of the subdivision or type of improvements will not conflict with easements, acquired by the public at large, for access through or use of the property within the proposed subdivision.

There are no known public easements across the subject property; therefore the design of the subdivision will not conflict with easements for access through or use of the property. Any utility easements can be accommodated within the project design.

SECTION 6. Appeal: The project was reviewed by the Planning Commission on February 25 and March 25, 2015. After providing direction and comments on the project in February, the Planning Commission voted 4-3 to deny the revised project in March. The applicant submitted an appeal requesting the City Council overturn the Planning Commission's decision to deny the project and contends the following points in response to the Commission's review of the project:

1. *Mixed comments regarding architecture and uses within the Project.*
2. *Comments provided by Commissioners on the February 25, 2015 meeting were contradicted by themselves on March 25, 2015.*
3. *Commission comments lead to project changes that were not satisfactory and it is difficult to determine what would further satisfy Commissioners.*

NOW, THEREFORE, BE IT RESOLVED that, based upon the foregoing, the City Council hereby adopts the Mitigated Negative Declaration under CEQA and approves Case Nos. 5.1361 PDD 375 ZC, CUP, 3.3820 MAJ and TTM 36876; a Planned Development District in lieu of a Change of Zone, a Conditional Use Permit, a Major Architectural Application and a Tentative Tract Map for the development of a partially gated community of 73 attached and detached residential dwellings, 13 live/work units and the re-use of an approximately 7,811-square foot commercial space on 8.05-acres with private streets, guest parking, common areas, landscaping and open space located at the northeast corner of Tahquitz Canyon Way and Calle El Segundo, subject to the conditions set forth in Exhibit A.

ADOPTED this 15th day of April, 2015.

David H. Ready, City Manager

ATTEST:

James Thompson, City Clerk

b. The design and improvements of the proposed Tentative Tract Map are consistent with the zone in which the property is located.

The proposed project design and improvements are generally consistent with the RA / REO land designations in which the property is located. The PDD in lieu of a zone change proposes mixed uses with residential, live/work units and commercial space with a set of development standards unique to this development with smaller lot area, lot dimensions and setbacks. With the approval of the PDD in lieu of a change of zone, the project will be consistent with this finding.

c. The site is physically suited for this type of development.

The relatively flat project site will be mostly razed and graded to accommodate the proposed development. Site modifications include new private driveways to privately-owned lots. Each lot is proposed to accommodate a residential, live/work unit or commercial building as defined by the PDD. A total of 73 residences, 13 live/work units and one commercial building are proposed on the 8.05-acre site. The site has adequate vehicular access with primary access taken from Andreas Road and Calle El Segundo and additional access way through an extension of Calle Alvarado. Thus, the site is physically suited for this type of development.

d. The site is physically suited for the proposed density of development.

The proposed density and FAR is less than that permitted by both the General Plan Tourist Resort Commercial (TRC) and Section 14 REO and RA land use designations. Therefore, the site is physically suited for the proposed density of development.

e. The design of the subdivision is not likely to cause environmental damage or substantially and avoidably injure fish, wildlife, or their habitats.

The Tentative Tract Map and associated Planned Development District have been reviewed under the California Environmental Quality Act, and a Mitigated Negative Declaration is proposed. Mitigation measures have been included which will reduce potential impacts to less than significant levels. The project will therefore not damage or injure fish, wildlife or their habitats.

f. The design of the subdivision or type of improvements is not likely to cause serious public health problems.

The design of the proposed subdivision includes connections to all public utilities including water and sewer systems. The layout of internal private streets provides access to each lot. No serious public health problems are anticipated.

commercial / live/work units, which is compatible with surrounding development and not detrimental to existing or future uses in the zone. The project therefore conforms to this finding.

c. That the site for the intended use is adequate in size and shape to accommodate such use, including yards, setbacks, walls or fences, landscaping and other features required in order to adjust such use to those existing or permitted future uses of land in the neighborhood;

The project consists of a grouping of parcels to form the overall 8.05-acre site with internal private streets, privately owned units and both private and common open spaces. With the approval of the PDD, buildings will be setback from perimeter property lines to accommodate the proposed uses for adjusting to those existing and future uses of land in the neighborhood. Therefore, the project would be deemed in conformance with this finding.

d. That the site for the proposed use relates to streets and highways properly designed and improved to carry the type and quantity of traffic to be generated by the proposed use;

The project proposes to take vehicular access from surrounding streets, excluding Tahquitz Canyon Way, which is consistent with the Section 14 Specific Plan. As determined by the environmental assessment, Tahquitz Canyon Way, Calle El Segundo and Andreas Road are improved with adequate road width to accommodate the type and quantity of traffic expected by the proposed uses. Thus, the project conforms with this finding.

e. That the conditions to be imposed and shown on the approved site plan are deemed necessary to protect the public health, safety and general welfare and may include minor modification of the zone's property development standards.

A set of draft conditions of approval are proposed and attached to this staff report as Exhibit "A".

SECTION 5. *Findings for the Tentative Tract Map.* The findings required for the proposed Tentative Map are pursuant to Section 66474 of the California Subdivision Map Act. The project is evaluated against these findings as follows:

a. The proposed Tentative Tract Map is consistent with all applicable general and specific plans.

The TTM proposes individual privately owned lots with open space, common area and private streets. The proposed density is within the range specified by the Tourist Resort Commercial General Plan land use designation. Therefore, the project is consistent with this finding.

The Resort Combining Zone Finding: Such permit is subject to the planning commission making findings that the proposed use is compatible with its surroundings and that the site in question is not appropriate for other uses allowed by right within the underlying zone.

The mixed-use development proposes commercial and live/work units along a highly-traveled commercial corridor (Tahquitz Canyon Way). Development along this corridor primarily includes commercial-retail and hotel uses. The proposed use continues the commercial theme with residential located behind the commercial / live/work units, which is compatible with surrounding development. The mix of uses provides an appropriate balance for the site. Staff believes the proposed project is consistent with this finding.

SECTION 4. *Conditional Use Permit Findings:* In addition to the findings for the PDD in lieu of a change of zone (from PSZC Section 93.07), the PDD incorporates the findings of the CUP (PSZC 94.02.00) for residential uses in the Resort Combining Zone as follows:

The Council shall not approve a conditional use permit unless it finds as follows:

a. That the use applied for at the location set forth in the application is properly one for which a conditional use permit is authorized by this Zoning Code;

The mixed use project incorporates residential, live/work units and commercial space with the proposed zoning, PD-375. The current Section 14 land designations, RA and REO, allow for multi-family residential, live/work units and commercial developments. The project proposes a PDD in lieu of a change or zone for the proposed uses and seeking relief from certain setback development standards. With approval of the PDD, the project is consistent with this finding.

b. That the use is necessary or desirable for the development of the community, is in harmony with the various elements or objectives of the general plan, and is not detrimental to existing uses or to future uses specifically permitted in the zone in which the proposed use is to be located;

Development of the subject site with densely located single-family uses is desirable as a means of bringing a variety of housing choices to the community. The project is consistent with the General Plan Tourist Resort Commercial land use designation providing a mix of uses, including tourist-related commercial space, live/work units and residential uses on an 8.05-acre site. The proposed use continues the commercial theme with residential located behind the

The PDD is proposed to change the split zoning to a single PD zone designation with its own development standards. Specific Uses requested for approval for the PDD include attached and detached residential townhomes, live/work units and freestanding retail-commercial with outdoor dining. Additional uses consistent with the REO land designation may be considered within the commercial space and workspace of the live/work units, except residential dwelling is prohibited in structures along the street front. The project conforms to this finding.

Vehicular access to the residential portion of project is provided from Andreas Road. The live/work and commercial space is accessed from Calle El Segundo and the extension of Calle Alvarado. The project proposes a mix residential, commercial and live/work that is harmonious with adjacent uses in the vicinity. Thus, the project conforms to this finding.

3. The proposed change of zone is necessary and proper at this time, and is not likely to be detrimental to the adjacent property or residents.

The proposed PDD in lieu of zone change has been evaluated against the development standards for the Section 14 land designations, the Resort Combining Zone and architectural review. While the applicant is seeking setback deviations, the project is harmonious with the existing surrounding development. It continues the pedestrian experience along Tahquitz Canyon Way and introduces commercial uses along the street frontage which is desirable. The project height is consistent with development along the Tahquitz Canyon Way boulevard and is therefore not detrimental to adjacent properties. The project conforms to this finding.

SECTION 3. Resort Combining Zone Finding. In addition to the above, required findings outlined in Section 92.25.00 requires that the Planning Commission evaluate the project against the findings of the Resort Combining Zone. The zoning code notes that:

Uses shall be as provided in the underlying zone with which the "R" zone is combined, except that:...All multiple-family dwellings (including, but not limited to, apartments, group housing projects, boarding and lodging houses, and condominiums) shall be permitted only by conditional use permit (CUP).

The proposed development will have a Homeowners Association (HOA) that will function much like a condominium association to maintain the common areas of the development. As such the project is evaluated against the resort combining finding and the findings for a Conditional Use Permit as follows:

The City has considered the information contained in the Initial Study/Mitigated Negative Declaration prepared for the Aberdeen project (Case No. 5.1361) and all additional evidence submitted to the City in connection with that project. Having carefully reviewed all evidence in the record, the City hereby finds there exists no fair argument, or any evidence supporting a fair argument, that the Aberdeen project, with the incorporation of mitigation measures identified in the Initial Study/Mitigated Negative Declaration, will have any significant effects on the environment. The preparation of an Environmental Impact Report is therefore not warranted under CEQA.

The City Council independently reviewed and considered the information contained in the draft MND and the draft MND reflects the City's independent judgment and analysis. The City Council finds, on the basis of the whole record before it, including the initial study and comments received, that the project as proposed, including all required permits, has the potential to cause significant impacts on the environment but the proposed Mitigation Measures would reduce those impacts to a less than significant level. Therefore the City Council adopts the Mitigated Negative Declaration as a complete and adequate evaluation of the project pursuant to CEQA.

SECTION 2. Findings for a Planned Development District in lieu of a Change of Zone: *The council in reviewing a proposed change of zone, shall consider whether the following conditions exist in reference to the proposed zoning of the subject property:*

1. The proposed change of zone is in conformity with the general plan map and report.

The proposed project is located in the Tourist Resort Commercial (TRC) (FAR of 0.35 and density of up to 30 units per acre) land use designation of the General Plan. The mixed-use project proposes 11.2 residential dwelling units per acre and a FAR of 0.35, which is consistent with the land use designation.

2. The subject property is suitable for the uses permitted in the proposed zone, in terms of access, size of parcel, relationship to similar or related uses, and other considerations deemed relevant by the commission and council.

The proposed project is located in the REO and RA land designations of Section 14, which describes these designations as follows:

Specialty Retail-Entertainment-Office (REO) - This designation allows for the integration and concentration of large-scale specialty retail, restaurant, entertainment and office development along portions of Tahquitz Canyon Way and Indian Canyon Drive and emphasizes a pedestrian-transit focus.

Resort-Attraction (RA) - This designation allows for large-scale resort hotel complexes, hotels, and major commercial recreation attractions integrated with retail and entertainment facilities.

WHEREAS, notice of a public hearing of the City Council of the City of Palm Springs, California to consider Case Nos. 5.1361 PD 375 ZC / CUP / 3.3820 MAJ / TTM 36876 was given in accordance with applicable law; and

WHEREAS, on April 15, 2015, a public hearing of the City Council of the City of Palm Springs, California was held in accordance with applicable law, and

WHEREAS, at said hearing the City Council carefully reviewed and considered all of the evidence presented in connection with the hearing on the project, including, but not limited to, the staff report, and all written and oral testimony presented, and

WHEREAS, pursuant to the California Environmental Quality Act (CEQA), the proposed development has been determined to be a project subject to environmental analysis under guidelines of CEQA.

THE CITY COUNCIL OF THE CITY OF PALM SPRINGS DOES HEREBY RESOLVE AS FOLLOWS:

SECTION 1. CEQA: The project has been reviewed under the provisions of the California Environmental Quality Act (CEQA). An initial study was conducted and the City concluded that the project as proposed had the potential to cause significant negative impacts on the environment. The analysis included all required CEQA issues, including but not limited to air quality, cultural resources, land use, hydrology and traffic. Mitigation Measures have been proposed to reduce the project's significant impacts to a less than significant level.

Under Public Resources Code Section 21084.1 and CEQA Guidelines (California Code of Regulations, Title 14, Chapter 3) Section 15064.5, a resource is considered to be a historic resource if it is listed in, or determined to be eligible for listing in, the California Register of Historical Resources. A resource is presumed to be significant if it is included in a local register of historical resources, as defined Public Resources Code Section 5020.1, or deemed significant pursuant to criteria set forth in Public Resources Code Section 5024.1. Additionally, as the lead agency, the City has the discretion to determine that a resource is a historic resource even if it is not otherwise listed in, or deemed to be eligible for listing in, the State or local register.

The existing structures on the Aberdeen project site are not listed in, and have not been determined to be eligible for listing in, the California Register of Historical Resources. Moreover, those existing structures are not included in any local register of historical resources, and have never been deemed significant pursuant to criteria set forth in Public Resources Code Section 5024.1. The City, as lead agency for the Aberdeen project, hereby exercises its discretionary authority to find and determine, based on all of the evidence in the record, that the existing structures on the project site do not meet any of the criteria identified in the Public Resources Code or the CEQA Guidelines and, therefore, are not historic resources for purposes of CEQA.

RESOLUTION NO. ____

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF PALM SPRINGS, CALIFORNIA UPHOLDING AN APPEAL BY NEXUS DEVELOPMENT CORP. AND OVERTURNING THE DENIAL DECISION OF THE PLANNING COMMISSION REGARDING THREE APPLICATIONS (CASE NOS. 5.1361 PD-375, 3.3820 MAJ AND TTM 36876) AND A MITIGATED NEGATIVE DECLARATION FOR ABERDEEN; A MIXED-USE PROJECT CONSISTING OF THE DEVLEOPMENT OF (73) ATTACHED AND DETACHED RESIDENTIAL DWELLINGS, (13) LIVE/WORK UNITS, AND RE-USE OF AN EXISTING 7,811-SQUARE FOOT COMMERCIAL BUILDING WITH PRIVATE STREETS AND OPEN SPACE ON ROUGHLY 8.05-ACRES LOCATED AT THE NORTHEAST CORNER OF TAHQUITZ CANYON WAY AND CALLE EL SEGUNDO.

WHEREAS, Nexus Development Corp. ("Applicant") on behalf of O & M HR, LLC ("Owner") submitted applications pursuant to Palm Springs Zoning Code Section 94.03 & 93.07 (Planned Development, Zone Change) Section 94.04 (Architectural Review), Section 94.02 & 92.25.00 (Conditional Use Permit / Resort Combining Zone) and Municipal Code Section 9.62 (Maps) seeking approval of a Planned Development District in lieu of a Change of Zone, a Tentative Tract Map, and a Major Architectural Application for the development of a partially gated community comprised of (73) three- and four-story residential attached and detached units, 13 live/work units and adaptive re-use of an existing approximately 7,811-square foot building with private streets, common open space and landscaping on a roughly 8.05-acre site located at the northeast corner of Tahquitz Canyon Way and Calle El Segundo (Case 5.1361 PD 375 ZC / CUP / 3.3820 MAJ, TTM 36876); and

WHEREAS, on January 26, 2015, the subject project was reviewed by the City's Architectural Advisory Committee (AAC), which voted to recommend denial of the project by the Planning Commission; and

WHEREAS, on February 25, 2015, the Planning Commission held a public hearing on the item and tabled the project for further study with direction to the applicant to work with staff on revisions to the project; and

WHEREAS, on March 25, 2015, the Planning Commission reviewed the project in accordance with applicable law and voted 4-3 to deny the revised project; and

WHEREAS, on March 31, 2015, the applicant filed an appeal of the Planning Commission decision to deny the project, in accordance with Section 2.05 of the Palm Springs Municipal Code; and

10. Initial Study / Mitigated Negative Declaration
11. Plan Exhibits

more dwelling units or containing a combination of two (2) or more dwelling units in one (1) lot or parcel."

Finally, a comment was made that development of the proposed project would negatively impact the provision of affordable housing in the City. However, the project site is not designated in the City's Housing Element for affordable housing, and development of the project site will not have any impact on the City's ability to provide affordable housing consistent with State law.

CONCLUSION:

The project proposes a unique mix of land uses and the revised project preserves a portion of existing development as sought by the Planning Commission. The project is a Consolidated Project, as defined by the Section 14 Specific Plan, and allows for flexible development standards which the developer is exercising. After receiving public testimony, the City Council may adopt the attached resolution and ordinance, which would uphold the appeal and overturn the Planning Commission's decision.

Should the Council determine that sufficient evidence exists to uphold the Planning Commission's decision, a new resolution would be presented at the next regular City Council meeting.

FISCAL IMPACT: No Fiscal Impact.

11. Plan Exhibits

Tahquitz Plaza (erroneously referred to in the Draft Survey as Heritage Plaza) is mentioned in the Context Statement component of the Draft Survey, in a description of office building development by a number of different architects in the post-World War II era[2]. The Draft Survey, when final, will ultimately consist of a context statement, maps, and evaluation and criteria assessments on sites found to be of potential historic significance. Site specific findings and evaluation for possible historic significance against the criteria have not been provided to the City in the Draft Survey. The Draft Survey provides criteria for assessing the eligibility of sites as historic resources for each building type (residential, retail, office, bank, hotel, etc.), but the consultant has not provided site-specific evaluations or conclusions of historic eligibility in the current document for any building in the City. The draft historic resource survey may, as it is completed, identify such pre-1969 buildings, but that information is not currently available. The 50% Draft Survey mentions Tahquitz Plaza; however it does not contain conclusive data that would support a determination of significance under CEQA and as a post 1969 building, it will not be addressed in the final draft of the survey.

The Initial Study considered the provisions of CEQA contained in Section 15064.5, as well as the provisions of Palm Springs Municipal Code Chapter 8.05 (Historic Preservation). On the basis of both CEQA and the Municipal Code, the Initial Study determined that Tahquitz Plaza had not been identified as eligible for listing or historically significant by the City, nor is it recognized as a Class I historic site; was not a pre-1969 structure, nor qualify as a Class III historic site; had not been identified as a resource in a local register of historical resources, or identified as significant in an historical resource survey.

Land Use and Planning Comments

Comments were received indicating that the project was inconsistent with the General Plan and Section 14 Specific Plan, insofar as the project proposed single family residential development in an area where such development is not allowed. First, the Section 14 Specific Plan, as identified in that document, provides a 'focused General Plan and Zoning Ordinance' for land within the Plan's boundary.

The Specific Plan designates the proposed project REO and RA. Table 6-1 (Allowable Land Uses) identifies Live/Work units as permitted with the approval of a Land Use Permit in the REO designation; and permitted with approval of a Conditional Use Permit in the RA designation. The project is processing a Conditional Use Permit, and a Land Use Permit (in the form of a Planned Development District and Major Architectural Permit), as required for Live/Work Units. The Specific Plan further identifies multi-family residences as permitted with approval of a Conditional Use Permit in both the REO and RA designations, if the units are part of a mixed use project, and subject to the development standards in the HR designation. The project is a mix of residential, live/work and commercial development, and therefore is considered a mixed use project. The units are multi-family units because they comply with the definition of multi-family units in the City's Zoning Ordinance: "means a building containing two (2) or

[2] "50% Draft – Working Draft for Review & Comment, City of Palm Springs Citywide Historic Context Statement," prepared by Historic Resources Group, January 30, 2015. Page 250.

f. The design of the subdivision or type of improvements is not likely to cause serious public health problems.

The design of the proposed subdivision includes connections to all public utilities including water and sewer systems. The layout of internal private streets provides access to each lot. No serious public health problems are anticipated.

g. The design of the subdivision or type of improvements will not conflict with easements, acquired by the public at large, for access through or use of the property within the proposed subdivision.

There are no known public easements across the subject property; therefore the design of the subdivision will not conflict with easements for access through or use of the property. Any utility easements can be accommodated within the project design.

CEQA ANALYSIS:

The proposed development is a project as defined by the California Environmental Quality Act (CEQA). An initial study was conducted which considered all required CEQA issues, including but not limited to air quality, cultural resources, land use, hydrology and traffic. Potential significant adverse impacts were identified along with Mitigation Measure that would reduce the potential adverse impacts to less than significant levels.

The City received a letter from architect and historian Alan Hess on February 19, 2015, which was included with a letter dated March 30, 2015, directly commenting on the Initial Study from the Office of Historic Preservation (OHP), Department of Parks and Recreation. The Planning Commission also received a number of emails and letters providing opinions and comments on the issue of whether the Tahquitz Plaza buildings are historic resources. Comments relating to other sections of the Initial Study were also received. The following summarizes the comments, and provides responses to these comments for the City Council's information.

Historic Resource Comments

The OHP commented that the Tahquitz Plaza was "evaluated and identified as a historical resource" in the City's currently ongoing City-wide historic resource survey. The OHP further commented that on the basis of the survey's recommendation, the Initial Study should consider the provisions of CEQA Guidelines 15064.5 as it relates to the Tahquitz Plaza buildings. The content of the emails and letters received by the Planning Commission also stated that the buildings are historic resources and should be preserved.

The OHP comment that the Tahquitz Plaza was "evaluated and identified as a historical resource, however, is incorrect. The historic resource survey (Draft Survey) is still in draft form and is less that 50% complete at this time. The Draft Survey does not identify Tahquitz Plaza as a historic resource or as being eligible for historic designation.

these findings follow:

a. The proposed Tentative Tract Map is consistent with all applicable general and specific plans.

The TTM proposes individual privately owned lots with open space, common area and private streets. The proposed density is within the range specified by the Tourist Resort Commercial General Plan land use designation. Therefore, the project is consistent with this finding.

b. The design and improvements of the proposed Tentative Tract Map are consistent with the zone in which the property is located.

The proposed project design and improvements are generally consistent with the RA / REO land designations in which the property is located. The PDD in lieu of a zone change proposes mixed uses with residential, live/work units and commercial space with a set of development standards unique to this development with smaller lot area, lot dimensions and setbacks. With the approval of the PDD in lieu of a change of zone, the project will be consistent with this finding.

c. The site is physically suited for this type of development.

The relatively flat project site will be mostly razed and graded to accommodate the proposed development. Site modifications include new private driveways to privately-owned lots. Each lot is proposed to accommodate a residential, live/work unit or commercial building as defined by the PDD. A total of 73 residences, 13 live/work units and one commercial building are proposed on the 8.05-acre site. The site has adequate vehicular access with primary access taken from Andreas Road and Calle El Segundo and additional access way through an extension of Calle Alvarado. Thus, the site is physically suited for this type of development.

d. The site is physically suited for the proposed density of development.

The proposed density and FAR is less than that permitted by both the General Plan Tourist Resort Commercial (TRC) and Section 14 REO and RA land use designations. Therefore, the site is physically suited for the proposed density of development.

e. The design of the subdivision is not likely to cause environmental damage or substantially and avoidably injure fish, wildlife, or their habitats.

The Tentative Tract Map and associated Planned Development District have been reviewed under the California Environmental Quality Act, and a Mitigated Negative Declaration is proposed. Mitigation measures have been included which will reduce potential impacts to less than significant levels. The project will therefore not damage or injure fish, wildlife or their habitats.

specifically permitted in the zone in which the proposed use is to be located;

Development of the subject site with single family uses is desirable as a means of bringing a variety of housing choices to the community. The project is consistent with the General Plan Tourist Resort Commercial land use designation providing a mix of uses, including tourist-related commercial space, live/work units and residential uses on an 8.05-acre site. The proposed use continues the commercial theme with residential located behind the commercial / live/work units, which is compatible with surrounding development and not detrimental to existing or future uses in the zone. The project therefore conforms to this finding.

c. That the site for the intended use is adequate in size and shape to accommodate such use, including yards, setbacks, walls or fences, landscaping and other features required in order to adjust such use to those existing or permitted future uses of land in the neighborhood;

The project consists of a grouping of parcels to form the overall 8.05-acre site with internal private streets, privately owned units and both private and common open spaces. With the approval of the PDD, buildings will be setback from perimeter property lines to accommodate the proposed uses for adjusting to those existing and future uses of land in the neighborhood. Therefore, the project would be deemed in conformance with this finding.

d. That the site for the proposed use relates to streets and highways properly designed and improved to carry the type and quantity of traffic to be generated by the proposed use;

The project proposes to take vehicular access from surrounding streets, excluding Tahquitz Canyon Way, which is consistent with the Section 14 Specific Plan. As determined by the environmental assessment, Tahquitz Canyon Way, Calle El Segundo and Andreas Road are improved with adequate road width to accommodate the type and quantity of traffic expected by the proposed uses. Thus, the project conforms with this finding.

e. That the conditions to be imposed and shown on the approved site plan are deemed necessary to protect the public health, safety and general welfare and may include minor modification of the zone's property development standards.

A set of draft conditions of approval are proposed and attached to this staff report as Exhibit "A".

Tentative Tract Map Findings:
Findings are required for the proposed subdivision pursuant to Section 66474 of the Subdivision Map Act. These findings and a discussion of the project as it relates to

attached and detached residential townhomes, live/work units and freestanding retail-commercial with outdoor dining. Additional uses consistent with the REO land designation may be considered within the commercial space and workspace of the live/work units, except residential dwelling is prohibited in structures along the street front. The project conforms to this finding.

Vehicular access to the residential portion of project is provided from Andreas Road. The live/work and commercial space is accessed from Calle El Segundo and the extension of Calle Alvarado. The project proposes a mix residential, commercial and live/work that is harmonious with adjacent uses in the vicinity. Thus, the project conforms to this finding.

> *3. The proposed change of zone is necessary and proper at this time, and is not likely to be detrimental to the adjacent property or residents.*

The proposed PDD in lieu of zone change has been evaluated against the development standards for the Section 14 land designations, the Resort Combining Zone and architectural review. While the applicant is seeking setback deviations, the project is harmonious with the existing surrounding development. It continues the pedestrian experience along Tahquitz Canyon Way and introduces commercial uses along the street frontage which is desirable. The project height is consistent with development along the Tahquitz Canyon Way boulevard and is therefore not detrimental to adjacent properties. The project conforms to this finding.

Conditional Use Permit / Planned Development District Findings:
In addition to the findings for the PDD in lieu of a change of zone (from PSZC Section 93.07), the PDD incorporates the findings of the CUP (PSZC 94.02.00) for residential uses in the Resort Combining Zone as follows:

> *The commission shall not approve or recommend approval of a conditional use permit unless it finds as follows:*
>
> *a. That the use applied for at the location set forth in the application is properly one for which a conditional use permit is authorized by this Zoning Code;*

The mixed use project incorporates residential, live/work units and commercial space with the proposed zoning, PD-375. The current Section 14 land designations, RA and REO, allow for multi-family residential, live/work units and commercial developments. The project proposes a PDD in lieu of a change or zone for the proposed uses and seeking relief from certain setback development standards. With approval of the PDD, the project is consistent with this finding.

> *b. That the use is necessary or desirable for the development of the community, is in harmony with the various elements or objectives of the general plan, and is not detrimental to existing uses or to future uses*

Such permit is subject to the planning commission making findings that the proposed use is compatible with its surroundings and that the site in question is not appropriate for other uses allowed by right within the underlying zone.

The mixed-use development proposes commercial and live/work units along a highly-traveled commercial corridor (Tahquitz Canyon Way). Development along this corridor primarily includes commercial-retail and hotel uses. The proposed use continues the commercial theme with residential located behind the commercial / live/work units, which is compatible with surrounding development. The mix of uses provides an appropriate balance for the site. Staff believes the proposed project is consistent with this finding.

Planned Development in lieu of Change of Zone:
The commission in recommending and the council in reviewing a proposed change of zone, shall consider whether the following conditions exist in reference to the proposed zoning of the subject property:

1. The proposed change of zone is in conformity with the general plan map and report.

The proposed project is located in the Tourist Resort Commercial (TRC) (FAR of 0.35 and density of up to 30 units per acre) land use designation of the General Plan. The mixed-use project proposes 11.8 residential dwelling units per acre and a FAR of 0.35, which is consistent with the land use designation.

2. The subject property is suitable for the uses permitted in the proposed zone, in terms of access, size of parcel, relationship to similar or related uses, and other considerations deemed relevant by the commission and council.

The proposed project is located in the REO and RA land designations of Section 14, which describes these designations as follows:

Specialty Retail-Entertainment-Office (REO) - This designation allows for the integration and concentration of large-scale specialty retail, restaurant, entertainment and office development along portions of Tahquitz Canyon Way and Indian Canyon Drive and emphasizes a pedestrian-transit focus.

Resort-Attraction (RA) - This designation allows for large-scale resort hotel complexes, hotels, and major commercial recreation attractions integrated with retail and entertainment facilities.

The PDD is proposed to change the split zoning to a single PD zone designation with its own development standards. Specific Uses requested for approval for the PDD include

7. Further analysis needed on the historical value of existing Kaptur buildings, and preference to retain two of the four existing buildings.

Applicant / Appellant. The applicant submitted an appeal requesting the City Council overturn the Planning Commission's decision to deny the project (see attached letter). The appellant contends the following points in response to the Commission's review of the project:

1. *Mixed comments regarding architecture and uses within the Project.*
2. *Comments provided by Commissioners on the February 25, 2015 meeting were contradicted by themselves on March 25, 2015.*
3. *Commission comments lead to project changes that were not satisfactory and it is difficult to determine what would further satisfy Commissioners.*

REQUIRED FINDINGS:

The project was evaluated against the findings for the Resort Combining Zone pursuant to PSZC 92.25.00, the Planned Development District in lieu of Change of Zone pursuant to PSZC 94.03, 94.07 (Zone Change) and 94.02 (Conditional Use Permit) and the Tentative Tract Map pursuant to Municipal Code Section 9.62 (Maps) as follows:

Resort Combining Zone Findings:

The "R" resort overlay zone is intended primarily to provide for accommodations and services for tourists and visitors while guarding against the intrusion of competing land uses.

The Resort Combining Zone runs along Palm Canyon Drive for nearly its entire length through the City, as well as through the heart Section 14 along Tahquitz Canyon Way from Amado Road to Arenas Road. The subject site lies within this overlay zone.

The zoning code notes that:

> *Uses shall be as provided in the underlying zone with which the "R" zone is combined, except that:...All multiple-family dwellings (including, but not limited to, apartments, group housing projects, boarding and lodging houses, and condominiums) shall be permitted only by conditional use permit (CUP).*

The proposed development will have a Homeowners Association (HOA) that will function much like a condominium association to maintain the common areas of the development. As such the project is evaluated against the findings for a CUP herein[1] and the resort combining finding as follows:

[1] Pursuant to PSZC 94.02.00.A.4 (CUP); the CUP may be incorporated into the PDD without the need for a separate application. Thus the CUP findings of PSZC 94.02 and the Zone Change findings of PSZC 93.07 are both evaluated as integral parts of the PDD application.

Commission voted 4-3 to deny the revised project in March. A summary of actions at both meetings is provided below, as well as the applicant's response from the first meeting. For further details on Commission discussion, see attached meeting minutes.

February 25, 2015 Meeting

1. Justify the proposed density and height.
2. Increase distance between buildings by at least 10 feet.
3. Create a two-way street with the new segment of Alvarado.
4. Concern with viability of live/work units in current configuration.
5. Public benefit not proportional – consider preserving existing structures
6. Pre-wire or install solar panels as a part of project.
7. Consider live/work units on side streets

March 25, 2015 Meeting

The applicant presented a revised site plan in response with the following:

1. Retained an existing building located at the southwesterly corner of the site.
2. Reduced the number of units from 74 to 73 residential units and from 17 to 13 live/work units.
3. Changed the parking configuration from parallel to perpendicular stalls along the north side of the internal street behind the live/work units, thereby increasing off-street parking from 17 to 35 spaces along this private street.
4. Increased building setback along Tahquitz Canyon Way. Buildings previously alternated from 5 to 8 feet in setback and now alternate from 6.75 to 9.83 feet in setback.
5. Eliminated meandering sidewalk and landscape areas along northerly boundary of project site and proposed straight sidewalk with less landscaping. This was done to accommodate additional internal space needed for parking area.
6. Created a two-way vehicular access on Calle Alvarado.

The Planning Commission made the following findings based on the project revisions:

1. The project does not conform to the development standards of the Section 14 Specific Plan, including setbacks, building separation and height;
2. The project does not conform to the development standards of the City's High-Rise Building regulations, and general concerns about building heights in excess of 35 feet;
3. Scale of residential buildings with respect to separation and height;
4. Concerns regarding the design, parking, setbacks, and viability of the live/work spaces on Tahquitz Canyon Way;
5. Inadequacy of the perimeter landscaping;
6. Failure to address concerns noted by the Planning Commission at the February 25, 2015 meeting, including but not limited to increased building separation, increased street widths, and unencumbered pedestrian access; and

structures are two- and three-stories in habitable space with covered roof deck as amenities, reaching heights of up to 45 feet and triggering the "high-rise buildings" ordinance, Section 94.03.00 of the Zoning Code. The project proponent is seeking approval to allow the flexibility of the proposed height for the entire project site, which is consistent with the REO / RA "Building Height" requirements.

Building Height / High-Rise Ordinance

	93.04.00 High Rise Ordinance	Proposed Project: PD 375	Comply
A. Coverage	Per Section 14 Specific Plan: 40% of site shall be developed as usable landscape open space / outdoor living.	48% open space	Yes
B. Height	100 feet. Additional 15 feet may be allowed for stairways, elevators and mechanical equipment if not adding to building bulk	45 feet	Yes
C. Height Setback	Per Section 14 Specific Plan: 1 foot of horizontal setback distance from any residential district for each 1 foot of vertical rise of the building. Additional site-specific setbacks may be imposed through the CUP process based on the relationship of the high-rise building to its surroundings.	Only residential property is located north of the site across Andreas Road: - Required: 45 feet - Proposed: 84 feet	Yes
D. Proximity to Low Density Residential	6 feet of horizontal setback for each 1 foot of vertical rise as measured above.	No R-1 within vicinity.	Yes
F. Structure Design	High-rise buildings shall be designed to insure that each structure fits into the resort character of the community and blends in with the natural surroundings.	Structures are designed with four-sided architecture.	Yes
G. City Council	Council may alter these provisions upon finding that the intent of this section is met.	-	-

These structures are located along a corridor that contains hotels ranging from three- to five-stories in height. The existing residential project to the north of the site contains two-story condominiums. Therefore, the transition from two-story residential to the north to the proposed three- and four-story development along Tahquitz Canyon Way is consistent with nearby and surrounding developments.

PLANNING COMMISSION ACTION:

The project was reviewed by the Planning Commission on February 25 and March 25, 2015. After providing direction and comments on the project in February, the Planning

Pedestrian Access	Direct pedestrian access shall be provided from buildings to the sidewalks on Tahquitz Canyon Way	Pedestrian access to workspace / retail is provided to each work unit	Yes
Front Setback	20 feet	6.75 feet	No, per PDD
Side Yard Setback	20 feet	12 feet on Calle Alvarado Existing on Calle El Segundo	No, per PDD
Rear Yard Setback	20 feet	18 feet from property line to garage	No, per PDD
Setbacks for High-Rise Buildings	High-rise buildings within Section 14 are exempt from the setback requirements identified in 93.04.00 of the PSZO; however, high-rise buildings shall have a minimum setback of one (1) foot of horizontal setback distance from any residential district for each one (1) foot of vertical rise of the building. Additional site-specific setbacks may be imposed through the CUP process based on the relationship of the high-rise building to its surroundings.	Buildings are setback over 100 feet from residential property to the north	Yes
Minimum Lot Area	2 gross acres	8 gross acres for overall project	Yes
Off-street Parking	Commercial: 1 space per 250 gross floor area or 31 spaces for existing 7,811-sq. ft. of commercial building and 23 spaces for 5,733-sq.ft. of workspace for all live/work units. Total Commercial = 54 spaces Live-work: No standard specified; however, in PDDs 3 bdrm units require 2.25 spaces or 29 spaces for the units, plus guest parking of 1 space for every 4 units, or 3 spaces. Total required: 86 spaces	35 parallel parking spaces on private driveway, including two handicap spaces 2 covered spaces are provided with each of the 13 units (26 spaces) + 2 spaces in front of garage on driveways (26 spaces) Total provided: 87 spaces	Yes
Off-street Loading	1 loading space required for size of commercial building.	None provided. (Planning Commission may approve otherwise)	No

Flexible Zoning Standards: Since the project meets the definition of a Consolidated Project, the Section 14 Specific Plan allows flexible zoning standards as a development incentive. Consolidated project sites designated RA or REO may be developed under either RA or REO land use designations. As noted in the table above, the proposed

Height	rise allowing up to 100ft in the RA and REO zones, upon approval of CUP or PD, pursuant to Section 94.03.00 of Palm Springs Zoning Ordinance (PSZO).	- Habitable spaces are 2-3 stories and roughly 25-34 feet in height. - Roof deck appurtenances are above the habitable space and about 45 feet in height.	PD
Density	1,500 sq. ft. of lot area per unit	11 du/ac or 3,985 sq. ft. per unit	Yes
Yard Setbacks			
Overall Site - Front	30 ft. front yard	- 24ft from north (front) property line	No, per PD
- Side	20 ft. side yard	- 15ft from west (side) property line	
- Side	20 ft. side yard	- 43ft from east (side) property line	Yes
- Rear	20 ft. rear yard	- 3ft from south (rear) property line	No, per PD
Individual Lots	Setback requirements may be reduced for residential development if it can be demonstrated through the CUP process that the reductions are necessary or desirable, and are not detrimental to neighboring uses (existing and permitted)	Front / Driveways: 18 feet from private street to face of garage Side: 6ft between residences (Avg. 3ft to common side P/L) 0ft at one side of homes. Rear: 27 to 40ft	Yes
Lot Coverage	45% usable landscaped open space	Usable open space: 48%	Yes
Off-street Parking	Per PSZC 93.06: In PDDs: 3 bdrm units require 2.25 spaces or 167 spaces for the units, plus guest parking 1 space for every 4 units, or 19 spaces; total 186 spaces required	2 covered spaces are provided with each of the 74 units (148 spaces) + 2 spaces in front of garage on driveways (148 spaces); total 296 spaces	Yes
Trash Enclosure	Required per PSZC 93.07.02	Individual trash receptacles provided for each dwelling	Yes

Live / Work and Commercial

	REO Requirements	**Proposed Project**	**Conform**
FAR	3.0 Maximum Floor Area Ratio	1.26 FAR	Yes
Building Height	35ft, except high-rise up to 100ft upon approval of PD	46ft and 2in	Yes
Open Space	40% minimum landscape area for high-rise buildings	~48%	Yes
Compatibility w/Surrounding Development	The rear and side walls of buildings which are visible from adjacent lots or streets shall be treated with an equivalent design quality as the front wall.	Buildings include four-sided architecture	Yes
Building Location	Buildings should be as close as possible to the required front setback	Live/work units have workspace / retail adjacent to front setback	Yes

Gated Communities	CD14.6: Prohibited	Gated requested	No
Pedestrian-oriented Design	CD19.7 Sidewalks, shade trees, sitting areas	No sidewalks along residential street	Partially
Minimum 28 foot street width in private developments	Page 4-5 Circulation Element	26 feet	No

TABLE 4: Zoning

Permitted Uses:

Single-family residential units are not permitted in REO (Retail / Entertainment / Office) and RA (Resort Attraction) Section 14 Land Use designations. MFR is permitted by Conditional Use Permit (CUP) in both designations. The proposed small-lot residential use is similar to multi-family residential (MFR) due to a majority of units being attached and density.

Retail including coffee shops, deli, etc. is permitted within the RA Land Use of the Section 14 Specific Plan.

Live/work units are permitted by Land Use Permit and CUP in the REO and RA zones, respectively.

The PDD has been submitted in lieu of a change of zone to seek City approval of all uses as a consolidated project per the Section 14 Specific Plan.

Development Standards:

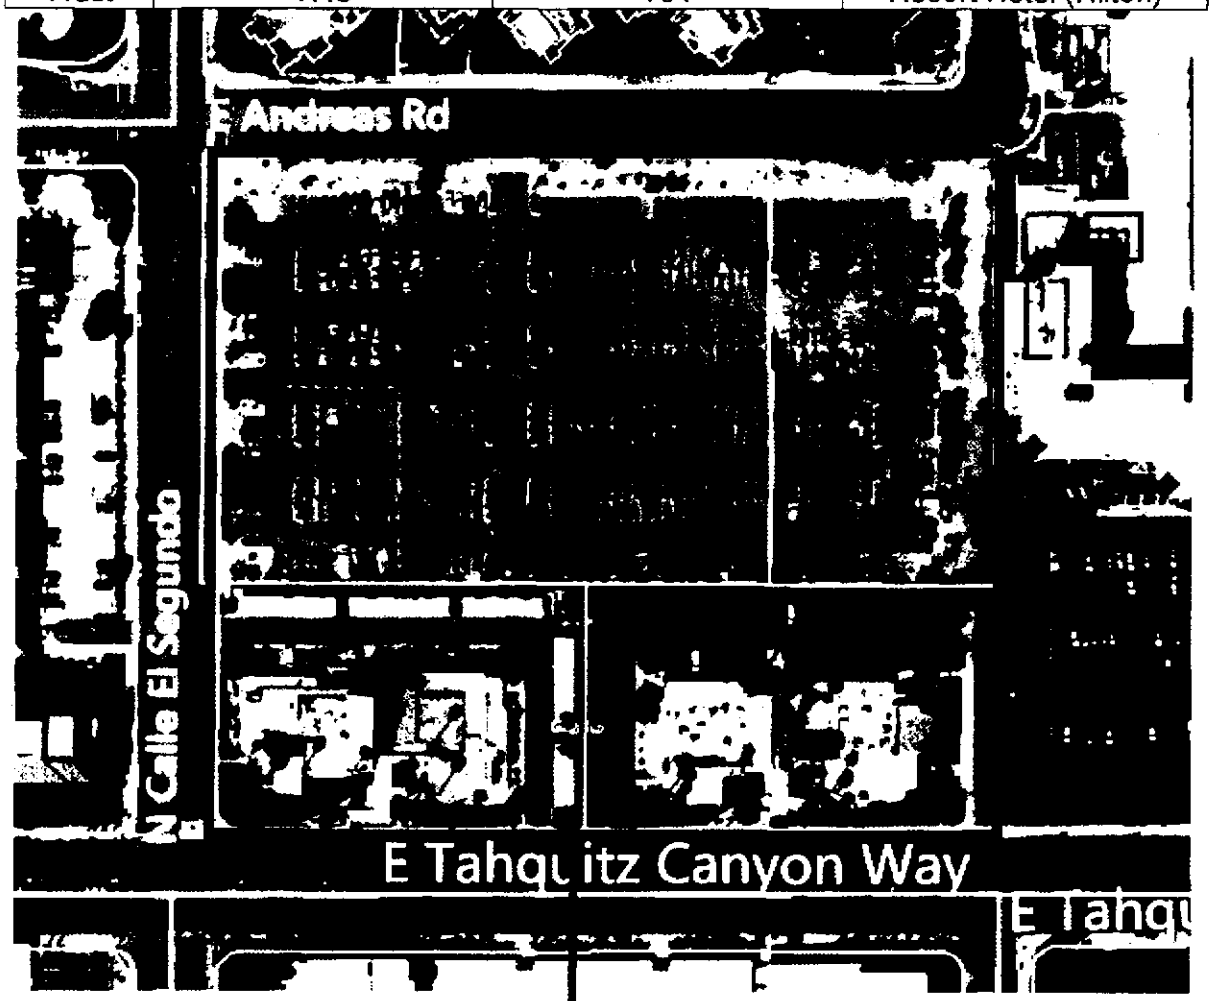
The project includes three land uses within the PD. When multi-family residential is proposed within the REO or RA zones, the Specific Plan requires development consistent with the HR land designation. The live-work and commercial space are located within the REO land designation. Thus, staff analyzed the HR designation development standards for the multi-family residential portion, and the REO designation development standards for the live-work and commercial components.

Since this proposal exceeds five acres in size, the development is a Consolidated Project and can utilize incentives including zoning flexibilities. Where applicable, staff has included in the analysis below.

Multi-family Residential

	HR Requirements / R-4	Proposed Project	Conform
Lot Standards			
Min. Area	Overall of MFR project: 2 gross acres / 130' wide / 155' deep	Overall project: 8.05 gross acres / 675' wide / 561' deep	Yes
Min. Width		Individual Lots:	
Min. Depth		Area ranges from 2,563 - 4,813sf Width ranges from 21ft to 30ft Depth ranges from 107ft to 111ft	No, per PD
Building	35ft, except when developed as high-	Range from 33 feet to 45 feet	No, per

	Residential		Condominiums (Plaza Villas)
South	TRC	REO	Commercial Complex (Courtyard at PS)
East	TRC	RA	Resort Hotel (Renaissance)
West	TRC	RA	Resort Hotel (Hilton)



SUBJECT SITE

PROJECT ANALYSIS:

TABLE 3: General Plan

General Plan Topic	F.A.R. and Density	Request	Compliance
Land Use: Tourist Resort Commercial	0.35 FAR / 43 hotel rooms per acre / 86 hotel rooms per acre on Indian Land / 30 d.u. per acre	11.3 du/ac 0.35 FAR for commercial building	Yes

TABLE 1: Related Relevant City Actions by Planning, Fire, Building, etc...	
Jan 12, 2015	The Architectural Advisory Committee (AAC) tabled the project with direction to the applicant to modify the following: 1. Architecture along Tahquitz is too monotonous, lacks interest and out of scale and context; 2. Parking needs further evaluation for commercial and live-work; 3. Circulation – Increase pedestrian amenities (i.e. landscaping, wider sidewalk, etc.) along extension of Calle Alvarado; 4. Connectivity – Eliminate gates and improve connectivity of project within existing community; 5. Adaptive re-use of existing commercial buildings should be considered in redesign.
Jan 26, 2015	The AAC recommended denial as proposed. The Committee found that the project does not conform to adopted standards, and recommended the following modifications: 1. Study alternatives along Tahquitz Canyon Way; 2. Provide streetscape along El Segundo; 3. Address Calle Alvarado traffic, parking and circulation issues; 4. Resubmit planting diagrams.
Feb 25, 2015	The Planning Commission reviewed the project and directed the applicant to work with staff on addressing the following: 1. Justify the proposed density and height. 2. Increase distance between buildings by at least 10 feet. 3. Create a two-way street with the new segment of Alvarado. 4. Concern with viability of live/work units in current configuration. 5. Public benefit not proportional – consider preserving existing structures 6. Pre-wire or install solar panels as a part of project. 7. Consider live/work units on side streets
Mar 25, 2015	The Planning Commission reviewed the revised project and voted 4-3 to deny the proposal. (Further information on this action is provided later in this report.)
Mar 31, 2015	The applicant filed an appeal of the March 25, 2015 Planning Commission decision.

CITY COUNCIL STAFF REPORT

DATE: April 15, 2015 PUBLIC HEARING

SUBJECT: O & M HR, LLC (NEXUS DEVELOPMENT CORP.) APPEALING THE MARCH 25, 2015, DECISION OF THE PLANNING COMMISSION TO DENY DEMOLITION OF EXISTING DEVELOPMENT AND PARKING AREA TO CONSTRUCT "ABERDEEN"; A MIXED-USE PROJECT CONSISTING OF (74) ATTACHED AND DETACHED RESIDENTIAL DWELLINGS, (17) LIVE-WORK UNITS AND APPROXIMATELY 1,568-SQUARE FEET OF RETAIL ON 8.05-ACRES LOCATED AT THE NORTHEAST CORNER OF TAHQUITZ CANYON WAY AND CALLE EL SEGUNDO, ZONE REO AND CU (CASE NOS. 5.1361 PD-375, CUP, 3.3820 MAJ AND TTM 36876) AND CONSIDER A CEQA DETERMINATION.

FROM: David H. Ready, City Manager

BY: Department of Planning Services

SUMMARY

The appellant, Nexus Development Corp., is requesting the City Council overturn the Planning Commission's decision of March 25, 2015, denying a mixed–use project identified as Aberdeen.

RECOMMENDATION:

1. Open the hearing and receive public testimony;

2. Option A: Uphold the Appeal and

   Adopt Resolution No. ____ "A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF PALM SPRINGS, CALIFORNIA UPHOLDING AN APPEAL BY NEXUS DEVELOPMENT CORP. AND OVERTURNING THE DENIAL DECISION OF THE PLANNING COMMISSION REGARDING THREE APPLICATIONS (CASE NOS. 5.1361 PD-375, CUP 3.3820 MAJ AND TTM 36876) AND A MITIGATED NEGATIVE DECLARATION FOR ABERDEEN; A MIXED-USE PROJECT CONSISTING OF THE DEVLEOPMENT OF (73) ATTACHED AND DETACHED RESIDENTIAL DWELLINGS, (13) LIVE/WORK UNITS, AND RE-USE OF AN EXISTING 7,811-SQUARE FOOT

COMMERCIAL BUILDING WITH PRIVATE STREETS AND OPEN SPACE ON ROUGHLY 8.05-ACRES LOCATED AT THE NORTHEAST CORNER OF TAHQUITZ CANYON WAY AND CALLE EL SEGUNDO."

Waive reading and introduce by title only for first reading Ordinance No. ____, "AN ORDINANCE OF THE CITY COUNCIL OF THE CITY OF PALM SPRINGS, CALIFORNIA, APPROVING PLANNED DEVELOPMENT 375 IN LIEU OF A CHANGE OF ZONE FOR A ROUGHLY 8.05-ACRE PARCEL AT THE NORTHEAST CORNER OF EAST TAHQUITZ CANYON WAY AND CALLE EL SEGUNDO.

3. Option B: Deny the Appeal and Instruct the City Attorney to prepare a resolution of denial for submission to the City Council for consideration and adoption on May 6, 2015.

BACKGROUND AND SETTING:

The project is an application by Nexus Development Corp on behalf of O & M HR, LLC, for the development of a mixed-use project consisting of attached and detached residential, live/work units and commercial space on an 8.05-acre site located at the northwest corner of Tahquitz Canyon Way and Calle El Segundo. The project initially included razing all existing buildings along Tahquitz Canyon Way; however, based on direction from the Planning Commission at the February 25, 2015 meeting, the applicant revised the project to retain one of the four existing buildings, thereby reducing the scope of the proposed development. The revised applications include the following:

- A Planned Development District to establish the project site plan, permitted uses and development standards. The PD proposes razing the existing parking lot and three existing office buildings and construct:
  - 7,811-square feet of existing commercial space at the southwest corner of the site (initial submittal included 1,568-square feet of new commercial space);
  - 13 detached dwellings with associated commercial space (live/work lofts) fronting Tahquitz Canyon Way (initial submittal included 17 live/work lofts);
  - 73 attached and detached residential units within a controlled access / gated area with private open space (initial application included 74 dwellings);
  - A common open space / recreation area with pool, fitness center and barbecue area.
- A Conditional Use permit to construct high-rise development within Section 14 and allow multi-family residential within the RA and REO land designations of the Section 14 Specific Plan.
- Major Architectural Application to review the proposed architectural designs. Plans including Preliminary and Final Development Plans.
- A Tentative Tract Map (TTM) seeking to subdivide the roughly 8.05-acres into 93 numbered lots and 8 lettered lot streets, and common open space.

CITY OF PALM SPRINGS

DEPARTMENT OF PLANNING SERVICES

MEMORANDUM

Date: March 25, 2015

To: Planning Commission

From: Department of Planning Services

Subject: O & M HR, LLC (NEXUS DEVELOPMENT CORP.) FOR THE DEMOLITION OF AN EXISTING DEVELOPMENT AND PARKING AREA TO CONSTRUCT "ABERDEEN"; A MIXED-USE PROJECT CONSISTING OF (74) ATTACHED AND DETACHED RESIDENTIAL DWELLINGS, (17) LIVE-WORK UNITS AND APPROXIMATELY 1,568-SQUARE FEET OF RETAIL ON 8.05-ACRES LOCATED AT THE NORTHEAST CORNER OF TAHQUITZ CANYON WAY AND CALLE EL SEGUNDO, ZONE REO AND CU (CASE NOS. 5.1361 PD-375, CUP, 3.3820 MAJ AND TTM 36876). (DN)

ATTENTION:

The subject project was noticed as described above; however, the scale and density of the project has been reduced since noticing occurred. The project is now described as follows:

O & M HR, LLC (NEXUS DEVELOPMENT CORP.) FOR THE DEMOLITION OF EXISTING DEVELOPMENT AND PARKING AREA TO CONSTRUCT "ABERDEEN"; A MIXED-USE PROJECT CONSISTING OF (73) ATTACHED AND DETACHED RESIDENTIAL DWELLINGS, (13) LIVE-WORK UNITS AND APPROXIMATELY 7,811-SQUARE FEET OF COMMERCIAL SPACE ON 8.05-ACRES LOCATED AT THE NORTHEAST CORNER OF TAHQUITZ CANYON WAY AND CALLE EL SEGUNDO, ZONE REO AND CU (CASE NOS. 5.1361 PD-375, 3.3820 MAJ AND TTM 36876).

SUMMARY:

At its meeting of February 25, 2015, the Planning Commission tabled the subject item and directed the applicant to work with staff on addressing the following:

1. Density / height - justification.

2. Distance between buildings - 10 feet
3. Calle Alvarado - a two-way street
4. Viability of live/work (configuration)
5. Public benefit - (preserve and consider study)
6. Solar panels
7. Consider live/work units on side streets

In response the applicant revised the project as follows:

1. Retained an existing building located at the southwesterly corner of the site.
2. Reduced the number of units from 74 to 73 residential units and from 17 to 13 live/work units.
3. Changed the parking configuration from parallel to perpendicular stalls along the north side of the internal street behind the live/work units, thereby increasing off-street parking from 17 to 35 spaces along this private street.
4. Increased building setback along Tahquitz Canyon Way. Buildings previously alternated from 5 to 8 feet in setback and now alternate from 6.75 to 9.83 feet in setback.
5. Eliminated meandering sidewalk and landscape areas along northerly boundary of project site and proposed straight sidewalk with less landscaping. This was done to accommodate additional internal space needed for parking area.
6. Created a two-way vehicular access on Calle Alvarado.

Staff reviewed the changes and notes the following differences from the previous analysis provided on February 25, 2015:

Multi-family Residential

	HR Requirements / R-4	Proposed Project	Conform
Lot Standards			
Min. Area	2 gross acres / 130' wide / 155' deep, except lot size requirements may be reduced for single-family residential development if it can be demonstrated through the CUP process that the reductions are necessary and desirable, and are not detrimental to neighboring uses (existing and permitted)	Range from 2,563sf and 4,813sf	No, per PDD
Min. Width		Range from 21ft to 30ft	
Min. Depth		Range from 107ft to 111ft	
Building Height	35ft, except when developed as high-rise, pursuant to Section 94.03.00 of Palm Springs Zoning Ordinance (PSZO) – see analysis below in Live/Work and Commercial section.	Range from 33 feet to 46 feet	See live/work analysis
Density	**1,500 sq. ft. of lot area per unit**	**11 du/ac or 3,985 sq. ft. per unit**	**Yes**

Yard Setbacks			
Overall Site - Front - Side - Side - Rear	30 ft. front yard	- 24ft from north (front) property line	No per PDD
	20 ft. side yard	- 15ft from west (side) property line	
	20 ft. side yard	- 43ft from east (side) property line	Yes
	20 ft. rear yard	**- 135ft from south (rear) property line**	**Yes**
Individual Lots	Setback requirements may be reduced for single-family residential development if it can be demonstrated through the CUP process that the reductions are necessary or desirable and are not detrimental to neighboring uses (existing and permitted)	Front: 2 driveways, 18 feet from private street to face of garage Side: 6ft between residences (Avg. 8ft to common side PL) 0ft at ends of homes Rear: 27 to 46ft	Yes when certain findings are made
Lot Coverage	45% usable landscaped open space	Usable open space: 48%	Yes
Off-street Parking	Per PSZC 93.06: In PDDs: 3 bdrm units require 2.25 spaces or 167 spaces for the units, plus guest parking 1 space for every 4 units, or 19 spaces; total 186 spaces required	2 covered spaces are provided with each of the 74 units (148 spaces) + 2 spaces in front of garage or driveways (148 spaces); total 296 spaces	Yes
Trash Enclosure	Per PSZC 93.07.02	TBD	-

Live / Work and Commercial

	REO Requirements	**Proposed Project**	**Conform**
FAR	3.0 Maximum Floor Area Ratio	1.26 FAR	Yes
Building Height	35ft, except 100ft for high-rise	45ft and 2in	Yes
Open Space	40% minimum landscape area for high-rise buildings	~48%	Yes
Compatibility w/Surrounding Development	The rear and side walls of buildings which are visible from adjacent lots or streets shall be treated with an equivalent design quality as the front wall.	Perimeter wall treatment to be designed	TBD
Building Location	Buildings should be as close as possible to the required front setback	Live/work units have workspace / retail adjacent to front setback	Yes
Pedestrian Access	Direct pedestrian access shall be provided from buildings to the sidewalks on Tahquitz Canyon Way	Pedestrian access to workspace / retail is provided to each work unit	Yes
Front Setback	**20 feet**	**6.75 feet**	**No, per PDD**
Side Yard Setback	**20 feet**	**12 feet on Calle El Segundo Existing on Calle Alvarado**	**No, per PDD**

Rear Yard Setback	20 feet	18 feet from property line to garage	No, per PDD
Setbacks for High-Rise Buildings	High-rise buildings within Section 14 are exempt from the setback requirements identified in 93.04.00 of the PSZO; however, high-rise buildings shall have a minimum setback of one (1) foot of horizontal setback distance from any residential district for each one (1) foot of vertical rise of the building. Additional site-specific setbacks may be imposed through the CUP process based on the relationship of the high-rise building to its surroundings.	Buildings are setback over 100 feet from residential property to the north	Yes
Minimum Lot Area	2 gross acres	8 gross acres for overall project	Yes
Off-street Parking	**Commercial: 1 space per 250 gross floor area or 31 spaces.** **Live-work: No standard specified; however, in PDDs 3 bdrm units require 2.25 spaces or 29 spaces for the units, plus guest parking of 1 space for every 4 units, or 3 spaces.** **Total required: 63 spaces**	**35 parking spaces on private driveway, including two handicap spaces** **2 covered spaces are provided with each of the 13 units (26 spaces) + 2 spaces in front of garage on driveways (26 spaces)** **Total provided: 87 spaces**	**Yes**
Off-street Loading	**1 loading space required for size of commercial building.**	**None provided. (Planning Commission may approve otherwise)**	**No**

RECOMMENDATION:

Recommend the City Council adopt the mitigated negative declaration and approve the project, subject to conditions. Specific conditions related to the alteration of the current proposal include:

1. Revise the internal street widths to conform to the Section 14 Specific Plan and General Plan minimum required widths for private streets [28 feet (rolled curb to curb) with 5 foot landscape buffer and 5 foot sidewalks].
2. Modify the extension of Calle Alvarado to satisfactorily meet width requirements of City Engineer and Fire Department.
3. Provide unlocked pedestrian access through center of site and at all vehicular access gates.

4. Prohibit residential uses in structures fronting Tahquitz Canyon Way.
5. Include bicycle parking as required by the Section 14 Specific Plan.
6. Provide trash enclosure for commercial building.
7. Consider providing Plug-in Electric Vehicle (PEV) parking spaces as required by the Section 14 Specific Plan.
8. Redesign streetscape along Tahquitz Canyon to be consistent with the Section 14 Specific Plan with the inclusion of street furniture and identification of Indian public art locations.

CITY OF PALM SPRINGS

RESOLUTION NO. ____

A RESOLUTION OF THE PLANNING COMMISSION OF THE CITY OF PALM SPRINGS, CALIFORNIA RECOMMENDING ADOPTION OF A MITIGATED NEGATIVE DECLARATION UNDER CEQA AND APPROVAL OF THREE APPLICATIONS (CASE NOS. 5.1361 PD-375, 3.3820 MAJ AND TTM 36876) RELATED TO ABERDEEN; A MIXED-USE PROJECT CONSISTING OF THE DEVLEOPMENT OF (73) ATTACHED AND DETACHED RESIDENTIAL DWELLINGS, (13) LIVE/WORK UNITS, AND RE-USE OF AN EXISTING 7,811-SQUARE FOOT COMMERCIAL BUILDING WITH PRIVATE STREETS AND OPEN SPACE ON ROUGHLY 8.05-ACRES LOCATED AT THE NORTHEAST CORNER OF TAHQUITZ CANYON WAY AND CALLE EL SEGUNDO.

WHEREAS, O & M HR, LLC submitted applications pursuant to Palm Springs Zoning Code Section 94.03 & 93.07 (Planned Development, Zone Change) Section 94.04 (Architectural Review), Section 94.02 & 92.25.00 (Conditional Use Permit / Resort Combining Zone) and Municipal Code Section 9.62 (Maps) seeking approval of a Planned Development District in lieu of a Change of Zone, a Tentative Tract Map, and a Major Architectural Application for the development of a partially gated community comprised of (73) three- and four-story residential attached and detached units, 13 live/work units and adaptive re-use of an existing approximately 7,811-square foot building with private streets, common open space and landscaping on a roughly 8.05-acre site located at the northeast corner of Tahquitz Canyon Way and Calle El Segundo (Case 5.1361 PDD 375 / 3.3820 MAJ, TTM 36876); and

WHEREAS, on January 26, 2015, the subject project was reviewed by the City's Architectural Advisory Committee (AAC), which voted to recommend denial of the project by the Planning Commission; and

WHEREAS, on February 25, 2015, the Planning Commission held a public hearing on the item and tabled the project for further study with direction to the applicant to work with staff on revisions to the project; and

WHEREAS, notice of a public hearing of the Planning Commission of the City of Palm Springs, California to consider Case 5.1361 PDD 375 / 3.3820 MAJ / TTM 36876 was given in accordance with applicable law; and

WHEREAS, on March 25, 2015, a public hearing of the Planning Commission of the City of Palm Springs, California was held in accordance with applicable law, and

WHEREAS, at said hearing the Planning Commission carefully reviewed and considered all of the evidence presented in connection with the hearing on the project,

including, but not limited to, the staff report, and all written and oral testimony presented, and

WHEREAS, pursuant to the California Environmental Quality Act (CEQA), the proposed development has been determined to be a project subject to environmental analysis under guidelines of CEQA.

THE PLANNING COMMISSION HEREBY FINDS AS FOLLOWS:

Section 1: CEQA.
The project has been reviewed under the provisions of the California Environmental Quality Act (CEQA). An initial study was conducted and the City concluded that the project as proposed had the potential to cause significant negative impacts on the environment. The analysis included all required CEQA issues, including but not limited to air quality, cultural resources, land use, hydrology and traffic. Mitigation Measures have been proposed to reduce the project's significant impacts to a less than significant level.

The Planning Commission independently reviewed and considered the information contained in the draft MND and the draft MND reflects the City's independent judgment and analysis. The Planning Commission finds, on the basis of the whole record before it, including the initial study and comments received, that the project as proposed, including all required permits, has the potential to cause significant impacts on the environment but the proposed Mitigation Measures would reduce those impacts to a less than significant level. Therefore the Planning Commission recommends the City Council adopt the Mitigated Negative Declaration as a complete and adequate evaluation of the project pursuant to CEQA.

Section 2: Findings for a Planned Development District in lieu of a Change of Zone.
The commission in recommending and the council in reviewing a proposed change of zone, shall consider whether the following conditions exist in reference to the proposed zoning of the subject property:

> *1. The proposed change of zone is in conformity with the general plan map and report.*

The proposed project is located in the Tourist Resort Commercial (TRC) (FAR of 0.35 and density of up to 30 units per acre) land use designation of the General Plan. The mixed-use project proposes 11.2 residential dwelling units per acre and a FAR of 0.35, which is consistent with the land use designation.

> *2. The subject property is suitable for the uses permitted in the proposed zone, in terms of access, size of parcel, relationship to similar or related uses, and other considerations deemed relevant by the commission and council.*

The proposed project is located in the REO and RA land designations of Section 14, which describes these designations as follows:

> Specialty Retail-Entertainment-Office (REO) - This designation allows for the integration and concentration of large-scale specialty retail, restaurant, entertainment and office development along portions of Tahquitz Canyon Way and Indian Canyon Drive and emphasizes a pedestrian-transit focus.
>
> Resort-Attraction (RA) - This designation allows for large-scale resort hotel complexes, hotels, and major commercial recreation attractions integrated with retail and entertainment facilities.

The PDD is proposed to change the split zoning to a single PD zone designation with its own development standards. Specific Uses requested for approval for the PDD include attached and detached residential townhomes, live/work units and freestanding retail-commercial with outdoor dining. Additional uses consistent with the REO land designation may be considered within the commercial space and workspace of the live/work units, except residential dwelling is prohibited in structures along the street front. The project conforms to this finding.

Vehicular access to the residential portion of project is provided from Andreas Road. The live/work and commercial space is accessed from Calle El Segundo and the extension of Calle Alvarado. The project proposes a mix residential, commercial and live/work that is harmonious with adjacent uses in the vicinity. Thus, the project conforms to this finding.

> *3. The proposed change of zone is necessary and proper at this time, and is not likely to be detrimental to the adjacent property or residents.*

The proposed PDD in lieu of zone change has been evaluated against the development standards for the Section 14 land designations, the Resort Combining Zone and architectural review. While the applicant is seeking setback deviations, the project is harmonious with the existing surrounding development. It continues the pedestrian experience along Tahquitz Canyon Way and introduces commercial uses along the street frontage which is desirable. The project height is consistent with development along the Tahquitz Canyon Way boulevard and is therefore not detrimental to adjacent properties. The project conforms to this finding.

Section 3: Resort Combining Zone Finding.
In addition to the above, required findings outlined in Section 92.25.00 requires that the Planning Commission evaluate the project against the findings of the Resort Combining Zone. The zoning code notes that:

> *Uses shall be as provided in the underlying zone with which the "R" zone is combined, except that:...All multiple-family dwellings (including, but not limited to, apartments, group housing projects, boarding and lodging*

houses, and condominiums) shall be permitted only by conditional use permit (CUP).

The proposed development will have a Homeowners Association (HOA) that will function much like a condominium association to maintain the common areas of the development. As such the project is evaluated against the resort combining finding and the findings for a Conditional Use Permit as follows:

The Resort Combining Zone Finding: Such permit is subject to the planning commission making findings that the proposed use is compatible with its surroundings and that the site in question is not appropriate for other uses allowed by right within the underlying zone.

The mixed-use development proposes commercial and live/work units along a highly-traveled commercial corridor (Tahquitz Canyon Way). Development along this corridor primarily includes commercial-retail and hotel uses. The proposed use continues the commercial theme with residential located behind the commercial / live/work units, which is compatible with surrounding development. The mix of uses provides an appropriate balance for the site. Staff believes the proposed project is consistent with this finding.

Section 4: Conditional Use Permit Findings:
In addition to the findings for the PDD in lieu of a change of zone (from PSZC Section 93.07), the PDD incorporates the findings of the CUP (PSZC 94.02.00) for residential uses in the Resort Combining Zone as follows:

The commission shall not approve or recommend approval of a conditional use permit unless it finds as follows:

a. That the use applied for at the location set forth in the application is properly one for which a conditional use permit is authorized by this Zoning Code;

The mixed use project incorporates residential, live/work units and commercial space with the proposed zoning, PD-375. The current Section 14 land designations, RA and REO, allow for multi-family residential, live/work units and commercial developments. The project proposes a PDD in lieu of a change or zone for the proposed uses and seeking relief from certain setback development standards. With approval of the PDD, the project is consistent with this finding.

b. That the use is necessary or desirable for the development of the community, is in harmony with the various elements or objectives of the general plan, and is not detrimental to existing uses or to future uses specifically permitted in the zone in which the proposed use is to be located;

Development of the subject site with densely located single-family uses is desirable as a means of bringing a variety of housing choices to the community. The project is consistent with the General Plan Tourist Resort Commercial land use designation providing a mix of uses, including tourist-related commercial space, live/work units and residential uses on an 8.05-acre site. The proposed use continues the commercial theme with residential located behind the commercial / live/work units, which is compatible with surrounding development and not detrimental to existing or future uses in the zone. The project therefore conforms to this finding.

> *c. That the site for the intended use is adequate in size and shape to accommodate such use, including yards, setbacks, walls or fences, landscaping and other features required in order to adjust such use to those existing or permitted future uses of land in the neighborhood;*

The project consists of a grouping of parcels to form the overall 8.05-acre site with internal private streets, privately owned units and both private and common open spaces. With the approval of the PDD, buildings will be setback from perimeter property lines to accommodate the proposed uses for adjusting to those existing and future uses of land in the neighborhood. Therefore, the project would be deemed in conformance with this finding.

> *d. That the site for the proposed use relates to streets and highways properly designed and improved to carry the type and quantity of traffic to be generated by the proposed use;*

The project proposes to take vehicular access from surrounding streets, excluding Tahquitz Canyon Way, which is consistent with the Section 14 Specific Plan. As determined by the environmental assessment, Tahquitz Canyon Way, Calle El Segundo and Andreas Road are improved with adequate road width to accommodate the type and quantity of traffic expected by the proposed uses. Thus, the project conforms with this finding.

> *e. That the conditions to be imposed and shown on the approved site plan are deemed necessary to protect the public health, safety and general welfare and may include minor modification of the zone's property development standards.*

A set of draft conditions of approval are proposed and attached to this staff report as Exhibit "A".

Section 5: Findings for the Tentative Tract Map.

The findings required for the proposed Tentative Map are pursuant to Section 66474 of the California Subdivision Map Act. The project is evaluated against these findings as follows:

> *a. The proposed Tentative Tract Map is consistent with all applicable*

general and specific plans.

The TTM proposes individual privately owned lots with open space, common area and private streets. The proposed density is within the range specified by the Tourist Resort Commercial General Plan land use designation. Therefore, the project is consistent with this finding.

b. The design and improvements of the proposed Tentative Tract Map are consistent with the zone in which the property is located.

The proposed project design and improvements are generally consistent with the RA / REO land designations in which the property is located. The PDD in lieu of a zone change proposes mixed uses with residential, live/work units and commercial space with a set of development standards unique to this development with smaller lot area, lot dimensions and setbacks. With the approval of the PDD in lieu of a change of zone, the project will be consistent with this finding.

c. The site is physically suited for this type of development.

The relatively flat project site will be mostly razed and graded to accommodate the proposed development. Site modifications include new private driveways to privately-owned lots. Each lot is proposed to accommodate a residential, live/work unit or commercial building as defined by the PDD. A total of 73 residences, 13 live/work units and one commercial building are proposed on the 8.05-acre site. The site has adequate vehicular access with primary access taken from Andreas Road and Calle El Segundo and additional access way through an extension of Calle Alvarado. Thus, the site is physically suited for this type of development.

d. The site is physically suited for the proposed density of development.

The proposed density and FAR is less than that permitted by both the General Plan Tourist Resort Commercial (TRC) and Section 14 REO and RA land use designations. Therefore, the site is physically suited for the proposed density of development.

e. The design of the subdivision is not likely to cause environmental damage or substantially and avoidably injure fish, wildlife, or their habitats.

The Tentative Tract Map and associated Planned Development District have been reviewed under the California Environmental Quality Act, and a Mitigated Negative Declaration is proposed. Mitigation measures have been included which will reduce potential impacts to less than significant levels. The project will therefore not damage or injure fish, wildlife or their habitats.

f. The design of the subdivision or type of improvements is not likely to cause serious public health problems.

The design of the proposed subdivision includes connections to all public utilities including water and sewer systems. The layout of internal private streets provides access to each lot. No serious public health problems are anticipated.

g. The design of the subdivision or type of improvements will not conflict with easements, acquired by the public at large, for access through or use of the property within the proposed subdivision.

There are no known public easements across the subject property; therefore the design of the subdivision will not conflict with easements for access through or use of the property. Any utility easements can be accommodated within the project design.

NOW, THEREFORE, BE IT RESOLVED that, based upon the foregoing, the Planning Commission hereby recommends the City Council adopt the Mitigated Negative Declaration under CEQA and approve Case Nos. 5.1361 PDD 375, 3.3820 MAJ and TTM 36876; a Planned Development District in lieu of a Change of Zone, a Major Architectural Application and a Tentative Tract Map for the development of a gated community of 73 attached and detached residential dwellings, 13 live/work units and re-use of an approximately 7,811-square foot commercial space on 8.05-acres with private streets, guest parking, common areas, landscaping and open space located at the northeast corner of Tahquitz Canyon Way and Calle El Segundo, subject to the conditions set forth in Exhibit A.

ADOPTED this 25th day of March, 2015.

RESOLUTION NO. ____

EXHIBIT A
CONDITIONS OF APPROVAL

Case 5.1361 PDD 375 CUP / 3.3820 MAJ / TTM 36876 - "Aberdeen"
(Northeast corner of Tahquitz Canyon Way and Calle El Segundo)

March 25, 2015

Before final acceptance of the project, all conditions listed below shall be completed to the satisfaction of the City Engineer, the Director of Planning Services, the Director of Building and Safety, the Chief of Police, the Fire Chief or their designee, depending on which department recommended the condition.

Any agreements, easements or covenants required to be entered into shall be in a form approved by the City Attorney.

PROJECT SPECIFIC

PSP 1. Revise the internal street widths to conform to the Section 14 Specific Plan and General Plan minimum required widths for private streets [28 feet (rolled curb to curb) with 5 foot landscape buffer and 5 foot sidewalks].

PSP 2. Modify the extension of Calle Alvarado to satisfactorily meet width requirements of City Engineer and Fire Department.

PSP 3. Provide unlocked pedestrian access through center of site and at all vehicular access gates.

PSP 4. Prohibit residential uses in structures fronting Tahquitz Canyon Way.

PSP 5. Include bicycle parking as required by the Section 14 Specific Plan.

PSP 6. Provide trash enclosure for commercial building.

PSP 7. Consider providing Plug-in Electric Vehicle (PEV) parking spaces as required by the Section 14 Specific Plan.

PSP 8. Redesign streetscape along Tahquitz Canyon to be consistent with the Section 14 Specific Plan with the inclusion of street furniture and identification of Indian public art locations.

ADMINISTRATIVE CONDITIONS

ADM 1. Project Description. This approval is for the project described per Case (5.1361 PDD 375 CUP / 3.3820 MAJ / TTM 36876); except as modified with the approved Mitigation Monitoring Program and the conditions below.

ADM 2. Reference Documents. The site shall be developed and maintained in accordance with the approved plans, date stamped February 17, 2015, including site plans, architectural elevations, exterior materials and colors, landscaping, and grading on file in the Planning Division except as modified by the approved Mitigation Measures and conditions below.

ADM 3. Conform to all Codes and Regulations. The project shall conform to the conditions contained herein, all applicable regulations of the Palm Springs Zoning Ordinance, Municipal Code, and any other City County, State and Federal Codes, ordinances, resolutions and laws that may apply.

ADM 4. Minor Deviations. The Director of Planning or designee may approve minor deviations to the project description and approved plans in accordance with the provisions of the Palm Springs Zoning Code.

ADM 5. Tentative Map. This approval is for Tentative Tract Map 36876 located at the Northeast corner of Tahquitz Canyon Way and Calle El Segundo, date stamped February 17, 2015. This approval is subject to all applicable regulations of the Subdivision Map Act, the Palm Springs Municipal Code, and any other applicable City Codes, ordinances and resolutions.

ADM 6. Indemnification. The owner shall defend, indemnify, and hold harmless the City of Palm Springs, its agents, officers, and employees from any claim, action, or proceeding against the City of Palm Springs or its agents, officers or employees to attach, set aside, void or annul, an approval of the City of Palm Springs, its legislative body, advisory agencies, or administrative officers concerning Case 5.1365 PDD 375 CUP / 3.3820 MAJ / TTM 36876. The City of Palm Springs will promptly notify the applicant of any such claim, action, or proceeding against the City of Palm Springs and the applicant will either undertake defense of the matter or pay the City's associated legal costs or will advance funds to pay for defense of the matter by the City Attorney. If the City of Palm Springs fails to promptly notify the applicant of any such claim, action or proceeding or fails to cooperate fully in the defense, the applicant shall not, thereafter, be responsible to defend, indemnify, or hold harmless the City of Palm Springs. Notwithstanding the foregoing, the City retains the right to settle or abandon the matter without the applicant's consent but should it do so, the City shall waive the indemnification herein, except, the City's decision to settle or abandon a matter following an adverse

judgment or failure to appeal, shall not cause a waiver of the indemnification rights herein.

ADM 7. Maintenance and Repair. The property owner(s) and successors and assignees in interest shall maintain and repair the improvements including and without limitation all structures, sidewalks, bikeways, parking areas, landscape, irrigation, lighting, signs, walls, and fences between the curb and property line, including sidewalk or bikeway easement areas that extend onto private property, in a first class condition, free from waste and debris, and in accordance with all applicable law, rules, ordinances and regulations of all federal, state, and local bodies and agencies having jurisdiction at the property owner's sole expense. This condition shall be included in the recorded covenant agreement for the property if required by the City.

ADM 8. Time Limit on Approval. Approval of the (Planned Development District (PDD) Tentative Tract Map (TTM) and Major Architectural Applications (MAJ) shall be valid for a period of two (2) years from the effective date of the approval. Extensions of time may be granted by the Planning Commission upon demonstration of good cause.

Approval of this Conditional Use Permit shall be valid for a period of two (2) years from the effective date of the approval. Once constructed, the Conditional Use Permit, provided the project has remained in compliance with all conditions of approval, does not have a time limit.

Extensions of time may be approved pursuant to Code Section 9.63.110. Such extension shall be required in writing and received prior to the expiration of the approval (Tentative Tract Map).

ADM 9. Right to Appeal. Decisions of an administrative officer or agency of the City of Palm Springs may be appealed in accordance with Municipal Code Chapter 2.05.00. Permits will not be issued until the appeal period has concluded.

ADM 10. Public Art Fees. This project shall be subject to Chapters 2.24 and 3.37 of the Municipal Code regarding public art. The project shall either provide public art or payment of an in lieu fee. In the case of the in-lieu fee, the fee shall be based upon the total building permit valuation as calculated pursuant to the valuation table in the Uniform Building Code, the fee being 1/2% for commercial projects or 1/4% for residential projects with first $100,000 of total building permit valuation for individual single-family units exempt. Should the public art be located on the project site, said location shall be reviewed and approved by the Director of Planning and Zoning and the Public Arts Commission, and the property owner shall enter into a recorded agreement to maintain the art work and protect the public rights of access and viewing.

ADM 11. Park Development Fees. The developer shall dedicate land or pay a fee in lieu of a dedication, at the option of the City. The in-lieu fee shall be computed pursuant to Ordinance No. 1632, Section IV, by multiplying the area of park to be dedicated by the fair market value of the land being developed plus the cost to acquire and improve the property plus the fair share contribution, less any credit given by the City, as may be reasonably determined by the City based upon the formula contained in Ordinance No. 1632. In accordance with the Ordinance, the following areas or features shall not be eligible for private park credit: golf courses, yards, court areas, setbacks, development edges, slopes in hillside areas (unless the area includes a public trail) landscaped development entries, meandering streams, land held as open space for wildlife habitat, flood retention facilities and circulation improvements such as bicycle, hiking and equestrian trails (unless such systems are directly linked to the City's community-wide system and shown on the City's master plan).

ADM 12. Maintenance of Outdoor Seating and structures at the Corner "Oasis". Periodic cleaning of the "Art Walk" located south of the common pool area in the center of the live/work units shall be the responsibility of the project's homeowners' association (HOA).

ADM 13. CC&R's The applicant prior to issuance of building permits shall submit a draft declaration of covenants, conditions and restrictions ("CC&R's") to the Director of Planning for approval in a format to be approved by the City Attorney. These CC&R's may be enforceable by the City, shall not be amended without City approval, and shall require maintenance of all property in a good condition and in accordance with all ordinances

ADM 14. CC&R's. Prior to recordation of a final Tentative Tract Map or issuance of building permits, the applicant shall submit a draft declaration of covenants, conditions and restrictions ("CC&R's") to the Director of Planning for approval in a format to be approved by the City Attorney. The draft CC&R package shall include:

a. The document to convey title

b. Deed restrictions, easements, of Covenant Conditions and Restrictions to be recorded.

c. Provisions for joint access to the proposed parcels, and any open space restrictions.

d. A provision, which provides that the CC&R's may not be terminated or substantially amended without the consent of the City and the developer's successor-in-interest.

Approved CC&R's are to be recorded following approval of the final map. The CC&R's may be enforceable by the City, shall not be amended without

City approval, and shall require maintenance of all property in a good condition and in accordance with all ordinances,

ADM 15. CC&R's Deposits & Fees. The applicant shall submit to the City of Palm Springs, a deposit in the amount of $3,500, for the review of the CC&R's by the City Attorney. A $675 filing fee shall also be paid to the City Planning Department for administrative review purposes.

ADM 16. CC&R's Noise Disclosure. The CC&R's shall have a disclosure statement regarding the location of the project relative to roadway noise, City special events, roadway closures for special events and other planned activities which may occur in the public right-of-way.

ADM 17. Notice to Tenants. The applicant shall provide all tenants with a copy of the Conditions of Approval for this project.

ADM 18. Community Facilities District. The project will bring additional residents, visitors and activities to the community that will potentially impact the needs for public safety services beyond the City's ability to provide such services; and because such services, including police protection, criminal justice, fire protection and suppression, ambulance, paramedic and other safety services, and recreation, library, cultural services are near capacity, the City has established a Community Facilities District to which this project shall be annexed, subject to conditions of approval; and

Prior to recordation of the final map or, at the City's option, prior to issuance of certificate of occupancy, the developer shall agree to support formation of or annexation into a Community Facilities District (CFD) to include the project site. Developer further agrees to waive any right of protest or contest such formation or annexation, provided that the amount of any assessment for any single family dwelling unit (or the equivalency thereof when applied to multiple family, commercial or industrial) as established through appropriate study shall not exceed $500 annually per dwelling unit or dwelling unit equivalency unit, subject to an annual consumer price index escalator. Prior to sale of any lots, or prior to the issuance of any certificate of occupancy, or prior to any approval of the Building Official that will allow the premises to be occupied, the CFD shall be formed, the annexation thereto shall occur, or at the option of the City Manager and Building Official, a covenant agreement may be recorded against any affected parcel(s) with the project, evidencing the Owner's binding consent, approval, and waiver of rights as provided in this condition of approval.

ENVIRONMENTAL ASSESSMENT CONDITIONS

ENV 1. Coachella Valley Multiple-Species Habitat Conservation Plan (CVMSHCP) Local Development Mitigation Fee (LDMF) required. All projects within the

City of Palm Springs, not within the Agua Caliente Band of Cahuilla Indians reservation are subject to payment of the CVMSHCP LDMF prior to the issuance of certificate of occupancy.

ENV 2. California Fish & Game Fees Required. The project is required to pay a fish and game impact fee as defined in Section 711.4 of the California Fish and Game Code. This CFG impact fee plus an administrative fee for filing the action with the County Recorder shall be submitted by the applicant to the City in the form of a money order or a cashier's check payable to the Riverside County Clerk prior to the final City action on the project (after City Council determination). This fee shall be submitted by the City to the County Clerk with the Notice of Determination. Action on this application shall not be final until such fee is paid. The project may be eligible for exemption or refund of this fee by the California Department of Fish & Game. Applicants may apply for a refund by the CFG at www.dfg.ca.gov for more information.

ENV 3. Mitigation Monitoring. The mitigation measures of the environmental assessment shall apply. The applicant shall submit a signed agreement that the mitigation measures outlined as part of the negative declaration or EIR will be included in the plans prior to Planning Commission consideration of the environmental assessment. Mitigation measures are defined in the CEQA Evaluation and summarized here as follows:

AESTHETICS:

MMI – 1 Project site plans, architectural renderings, and landscape plans shall be revised to address inconsistencies with the development standards and other design requirements of the Section 14 Specific Plan, as determined by the City Council.

CULTURAL RESOURCES:

MM V-1 As there is always a possibility of buried cultural and paleontological resources in a project area, a Native American Monitor(s) shall be present during all ground disturbing activities including clearing and grubbing, excavation, burial of utilities, planting of rooted plants, etc., The Agua Caliente Band of Cahuilla Indian Cultural Office shall be contacted for additional information on the use and availability of Cultural Resource Monitors. Should buried cultural deposits be encountered, the Monitor shall contact the Director of Planning Services. Following consultation, the Director shall have the authority to halt destructive construction and shall notify a qualified archaeologist to investigate the find. If necessary, the qualified

archaeologist shall prepare a treatment plan for submission to the State Historic Preservation Officer and Agua Caliente Cultural Resource Coordinator for approval. Human remains discovered shall be handled consistent with state law provisions.

HAZARDS AND HAZARDOUS MATERIALS:

MM VII-1: Prior to the issuance of demolition permits, an asbestos and lead survey shall be conducted by a certified asbestos and lead consultant, and a report shall be provided to the City Building Official. Should asbestos- and/or lead-containing materials be found, the project proponent shall submit to the Building Official a remediation and disposal plan to be conducted by a qualified, licensed specialist in the disposal of hazardous materials. The plan shall include specifics regarding the method of removal, transport, and disposal for all such materials.

NOISE:

MM XI-1. Demolition and construction activities on-site shall occur only between 7:00 a.m. and 7:00 p.m., Monday-Friday, and 8:00 a.m. and 5:00 p.m. on Saturdays, and shall be prohibited on Sundays and holidays, as specified by the Palm Springs Municipal Code.

MM XI-2. All construction equipment, fixed or mobile, shall be equipped with properly operating and maintained mufflers and the engines shall be equipped with shrouds.

MM XI-3. Stationary equipment shall be placed such that emitted noise is directed away from Andreas Road and Calle El Segundo.

MM XI-4. Stockpiling and vehicle staging areas shall be located as far as practical from Andreas Road and Calle El Segundo.

MM XI-5. Delivery hours should be limited to 7 a.m. to 7 p.m. daily to minimize the potential for adverse impacts on the adjacent Plaza Villas.

PLANNING DEPARTMENT CONDITIONS

PLN 1. Outdoor Lighting Conformance. Exterior lighting plans, including a photometric site plan showing the project's conformance with Section

93.21.00 Outdoor Lighting Standards of the Palm Springs Zoning ordinance, shall be submitted for approval by the Department of Planning prior to issuance of a building permit. Manufacturer's cut sheets of all exterior lighting on the building and in the landscaping shall be included. If lights are proposed to be mounted on buildings, down-lights shall be utilized. No lighting of hillsides is permitted.

PLN 2. Water Efficient Landscaping Conformance. The project is subject to the Water Efficient Landscape Ordinance (Chapter 8.60.00 and Chapter 11.06) of the Palm Springs Municipal Code and all other relevant water efficient landscape ordinances. The applicant shall submit a landscape and irrigation plan to the Director of Planning for review and approval prior to the issuance of a building permit. Landscape plans shall be wet stamped and approved by the Riverside County Agricultural Commissioner's Office prior to submittal. Prior to submittal to the City, landscape plans shall also be certified by the local water agency that they are in conformance with the water agency's and the City's Water Efficient Landscape Ordinances.

PLN 3. Palm Tree Requirement. In accordance with Planning Commission Resolution No. 1503, dated November 18, 1970, the developer is required to plant Washingtonia Fillifera (California Fan) palm trees (14 feet from ground to fronds in height) 60 feet apart along the entire frontage of Palm Canyon Drive and/or Tahquitz Canyon Way median. The existing Robusta / Mexican Fan Palms at the Tahquitz Canyon Way frontage shall be replaced with California Fan Palms.

PLN 4. Sign Applications Required. No signs are approved by this action. Separate approval and permits shall be required for all signs in accordance with Zoning Ordinance Section 93.20.00. The applicant shall submit a sign permit/program to the Department of Planning Services prior to the issuance of building permits.

PLN 5. Flat Roof Requirements. Roof materials on flat roofs (less than 2:12) must conform to California Title 24 thermal standards for "Cool Roofs". Such roofs must have a minimum initial thermal emittance of 0.75 or a minimum SRI of 64 and a three-year aged solar reflectance of 0.55 or greater. Only matte (non-specular) roofing is allowed in colors such as beige or tan.

PLN 6. Maintenance of Awnings & Projections. All awnings shall be maintained and periodically cleaned.

PLN 7. Screen Roof-mounted Equipment. All roof mounted mechanical equipment shall be screened per the requirements of Section 93.03.00 of the Zoning Ordinance.

PLN 8. Surface Mounted Downspouts Prohibited. No exterior downspouts shall be permitted on any facade on the proposed building(s) that are visible from adjacent streets or residential and commercial areas.

PLN 9. Pool Enclosure Approval Required. Details of fencing or walls around pools (material and color) and pool equipment areas shall be submitted for approval by the Planning Department prior to issuance of Building Permits.

PLN 10. Exterior Alarms & Audio Systems. No sirens, outside paging or any type of signalization will be permitted, except approved alarm systems.

PLN 11. Outside Storage Prohibited. No outside storage of any kind shall be permitted except as approved as a part of the proposed plan.

PLN 12. No off-site Parking. Vehicles associated with the operation of the proposed development including company vehicles or employees vehicles shall not be permitted to park off the proposed building site unless a parking management plan has been approved.

PLN 13. Bicycle Parking. The project shall be required to provide secure bicycle parking facilities on site for use by residents and visitors. Location and design shall be approved by the Director of Planning.

PLN 14. Prior to recordation of the final subdivision map, the developer shall submit for review and approval the following documents to the Planning Department which shall demonstrate that the project will be developed and maintained in accordance with the intent and purpose of the approved tentative map:

a. The document to convey title.

b. Deed restrictions, easements, covenant conditions and restrictions that are to be recorded.

c. The approved documents shall be recorded at the same time that the subdivision map is recorded. The documents shall contain provisions for joint access to the proposed parcels and open space restrictions. The approved documents shall contain a provision which provides that they may not be terminated or substantially amended without the consent of the City and the developer's successor-in-interest.

PLN 15. Update of City's Zoning Map. Upon approval of the proposed Change of Zone, Tract Map and/or Planned Development District, the applicant shall be responsible for costs associated with update of the City's GIS based zoning maps.

PLN 16. Shade Structure Option for Buyers. Develop a design for shade structures in the back yards that integrates with the architecture of the complex those buyers could include as a purchase option; review design with Director of Planning for design approval.

PLN 17. Provide 'smart controllers' for all irrigation systems.

POLICE DEPARTMENT CONDITIONS

POL 1. Developer shall comply with Section II of Chapter 8.04 "Building Security Codes" of the Palm Springs Municipal Code.

BUILDING DEPARTMENT CONDITIONS

BLD 1. Prior to any construction on-site, all appropriate permits must be secured.

ENGINEERING DEPARTMENT CONDITIONS

The Engineering Division recommends that if this application is approved, such approval is subject to the following conditions being completed in compliance with City standards and ordinances.

Before final acceptance of the project, all conditions listed below shall be completed to the satisfaction of the City Engineer.

STREETS

ENG 1. Any improvements within the public right-of-way require a City of Palm Springs Encroachment Permit.

ANDREAS ROAD

ENG 2. Dedicate an additional 3 feet to provide a right-of-way width of 33 feet along the entire frontage, together with a property line - corner cut-back at the southeast corner of the intersection of Andreas Road and Calle El Segundo, in accordance with City of Palm Springs Standard Drawing No. 105.

ENG 3. Dedicate abutters rights of access to Andreas Road along the entire frontage of the project, excluding the 36 feet wide access point; vehicular access to Andreas Road shall be prohibited.

ENG 4. Dedicate an easement for sidewalk purposes as needed for those portions of meandering sidewalk located outside of the public right-of-way.

ENG 5. Remove the existing driveway approach and replace with a 6 inch curb and gutter to match existing, construct meandering sidewalk to match existing in accordance with City of Palm Springs Standard Drawings No. 200, 210.

ENG 6. Construct a 36 feet wide driveway approach in accordance with City of Palm Springs Standard Drawing No. 205. The centerline of the driveway approach shall be located approximately 430 feet from the centerline of Calle El Segundo, as shown on the approved site plan.

ENG 7. Construct a Type A curb ramp meeting current California State Accessibility standards on each side of the driveway approach in accordance with City of Palm Springs Standard Drawing No. 212. The applicant shall ensure that an appropriate path of travel, meeting ADA guidelines, is provided across the driveway, and shall adjust the location of the access ramps, if necessary, to meet ADA guidelines, subject to the approval of the City Engineer. If necessary, additional pedestrian and sidewalk easements shall be provided on-site to construct a path of travel meeting ADA guidelines.

ENG 8. In accordance with the Final Section 14 Specific Plan (dated July 16, 2014), the applicant shall plant shade trees in a formal pattern along the Andreas Road frontage, as approved by the City Engineer. The applicant shall be responsible for the perpetual maintenance of the new trees and other parkway landscaping along the Andreas Road frontage. The specific landscaping improvements described in this condition may be modified by the applicant, in consultation with the City, provided that the intent of the Section 14 Specific Plan guideline is maintained.

ENG 9. Install decorative light fixtures (12 feet to 15 feet tall) consistent with the existing decorative lighting system along Tahquitz Canyon Way, including banner supports and overhead pedestrian-level lighting on the sidewalk. The applicant shall furnish and install the decorative light fixtures, luminaries and electrical system. The system shall be operated by a separate electric meter, unless an existing meter is available for use by the new lighting system, as approved by the City Engineer. The lighting system shall be installed and operational, and accepted for operation and maintenance by the City, prior to issuance of a Certificate of Occupancy, unless otherwise allowed by the City Engineer.

ENG 10. All broken or off grade street improvements along the project frontage shall be repaired or replaced.

CALLE EL SEGUNDO

ENG 11. Dedicate an additional 15 feet to provide a right of wayg width of 40 feet where required by the City Engineer.

ENG 12. Dedicate abutters rights of access to Calle El Segundo along the entire frontage of the project, excluding the 28 feet wide access point; vehicular access to Calle El Segundo shall be prohibited.

ENG 13. Remove the existing driveway approaches and replace with a 6 inch curb and gutter to match existing, construct sidewalk to match existing in accordance with City of Palm Springs Standard Drawings No. 200, 210.

ENG 14. Construct a 28 feet wide driveway approach in accordance with City of Palm Springs Standard Drawing No. 205. The centerline of the driveway approach shall be located approximately 180 feet from the centerline of Tahquitz Canyon Way.

ENG 15. Construct a Type A curb ramp meeting current California State Accessibility standards on each side of the driveway approach in accordance with City of Palm Springs Standard Drawing No. 212. The applicant shall ensure that an appropriate path of travel, meeting ADA guidelines, is provided across the driveway, and shall adjust the location of the access ramps, if necessary, to meet ADA guidelines, subject to the approval of the City Engineer. If necessary, additional pedestrian and sidewalk easements shall be provided on-site to construct a path of travel meeting ADA guidelines.

ENG 16. In accordance with the Final Section 14 Specific Plan (dated July 16, 2014), the applicant shall plant shade trees in a formal pattern along the Calle El Segundo frontage, as approved by the City Engineer. The applicant shall be responsible for the perpetual maintenance of the new trees and other parkway landscaping along the Calle El Segundo frontage. The specific landscaping improvements described in this condition may be modified by the applicant, in consultation with the City, provided that the intent of the Section 14 Specific Plan guideline is maintained.

ENG 17. Install decorative light fixtures (12 feet to 15 feet tall) consistent with the existing decorative lighting system along Tahquitz Canyon Way, including banner supports and overhead pedestrian-level lighting on the sidewalk. The applicant shall furnish and install the decorative light fixtures, luminaries and electrical system. The system shall be operated by a separate electric meter, unless an existing meter is available for use by the new lighting system, as approved by the City Engineer. The lighting system shall be installed and operational, and accepted for operation and maintenance by the City, prior to

issuance of a Certificate of Occupancy, unless otherwise allowed by the City Engineer.

ENG 18. All broken or off grade street improvements along the project frontage shall be repaired or replaced.

TAHQUITZ CANYON WAY

ENG 19. Dedicate abutters rights of access to Tahquitz Canyon Way along the entire frontage of the project, vehicular access to Tahquitz Canyon Way shall be prohibited.

ENG 20. The existing sidewalk along the entire frontage shall be modified consistent with the "Grand Boulevard of Indian Culture" described in the Section 14 Specific Plan (dated July 16, 2014). The applicant shall furnish and install artwork relating to Indian culture along the frontage, unless otherwise deferred by the Director of Planning Services. The "Grand Boulevard of Indian Culture" shall be constructed along the entire Tahquitz Canyon Way frontage. The specific street improvements are described in chapter 5 of said Section 14 Specific Plan.

ENG 21. Install Tahquitz Canyon Way decorative light fixtures (12 feet to 15 feet tall) consistent with the existing portion of existing decorative lighting system along Tahquitz Canyon Way, including banner supports and overhead pedestrian-level lighting on the sidewalk. The applicant shall furnish and install the decorative light fixtures, luminaries. The electrical system was installed by others and shall be operated by a separate electric meter, unless an existing meter is available for use by the new lighting system, as approved by the City Engineer. The new portions of the lighting system shall be installed and operational, and accepted for operation and maintenance by the City, prior to issuance of a Certificate of Occupancy, unless otherwise allowed by the City Engineer.

ENG 22. At the time that a comprehensive shuttle/bus route system for the Section 14 Master Development Plan area is planned, it is recommended that the applicant coordinate with the City on the design and layout of, and accommodate an on-site shuttle/bus stop at the Main Entrance of Tahquitz Canyon Way in accordance with the Final Section 14 Master Development Plan/Specific Plan, in consultation with the City, provided that the intent of the Section 14 Specific Plan guideline is maintained.

ENG 23. All broken or off grade street improvements along the project frontage shall be repaired or replaced.

CALLE ALVARADO (PRIVATE STREET)

ENG 24. Construct a Pedestrian Plaza from Andreas Road south to southerly property line of lot 74, the Plaza shall be intended to be a pedestrian connection from the Convention Center to Tahquitz Canyon Way with the landscaping, decorative pavers and enhancements to be consistent with the Section 14 Specific Plan. Together with a one way access from Tahquitz Canyon Way to access the proposed live work units identified as lots 75 through 93, as required by the City Engineer.

ENG 25. Dedicate a sidewalk and emergency ingress and egress easement from Andreas Road south to Tahquitz Canyon Way. Decorative pavers and pedestrian enhancements shall be designed to accommodate emergency vehicles.

ENG 26. Final design and layout of proposed pedestrian plaza and one way access shall be subject to review by City Engineer and Fire Marshall.

ENG 27. Vacation of existing public right-of-way for Calle Alvarado shall be identified on the final map.

ON-SITE

ENG 28. Construct a minimum pavement section of 2-1/2 inches asphalt over 4 inches crushed miscellaneous base with a minimum subgrade of 24 inches at 95% relative compaction, or equal, within all on-site private streets in accordance with City of Palm Springs Standard Drawing No. 110 and 302. If an alternative pavement section is proposed, the proposed pavement section shall be designed by a California registered Geotechnical Engineer using "R" values from the project site and submitted to the City Engineer for approval.

ENG 29. All on-site private streets (or drive aisles) shall be two-way with a minimum 26 feet wide travelway (as measured from face of curb) where no on-street parking is proposed.

ENG 30. All on-site private streets (or drive aisles) shall be two-way with a minimum 32 feet wide travelway (as measured from face of curb) where on-street parallel parking is proposed on one-side of the street.

ENG 31. On-site drive aisles (or parking lot) shall be constructed with curbs, gutters, and cross-gutters, as necessary to accept and convey street surface drainage of the on-site streets to the on-site drainage system, in accordance with applicable City standards.

SANITARY SEWER

ENG 32. All sanitary facilities shall be connected to the public (or private) sewer system (via the proposed on-site private sewer system). New laterals shall not be connected at manholes.

ENG 33. All on-site sewer systems shall be privately maintained by a Home Owners Association (HOA). Provisions for maintenance of the on-site sewer system acceptable to the City Engineer shall be included in the Covenants, Conditions and Restrictions (CC&R's) required for this project.

ENG 34. Submit sewer improvement plans prepared by a California registered civil engineer to the Engineering Division. The plan(s) shall be approved by the City Engineer prior to issuance of any building permits.

GRADING

ENG 35. Submit a Precise Grading Plan prepared by a California registered Civil engineer to the Engineering Division for review and approval. The Precise Grading Plan shall be approved by the City Engineer prior to issuance of grading permit.

a. A Fugitive Dust Control Plan shall be prepared by the applicant and/or its grading contractor and submitted to the Engineering Division for review and approval. The applicant and/or its grading contractor shall be required to comply with Chapter 8.50 of the City of Palm Springs Municipal Code, and shall be required to utilize one or more "Coachella Valley Best Available Control Measures" as identified in the Coachella Valley Fugitive Dust Control Handbook for each fugitive dust source such that the applicable performance standards are met. The applicant's or its contractor's Fugitive Dust Control Plan shall be prepared by staff that has completed the South Coast Air Quality Management District (AQMD) Coachella Valley Fugitive Dust Control Class. The applicant and/or its grading contractor shall provide the Engineering Division with current and valid Certificate(s) of Completion from AQMD for staff that have completed the required training. For information on attending a Fugitive Dust Control Class and information on the Coachella Valley Fugitive Dust Control Handbook and related "PM10" Dust Control issues, please contact AQMD at (909) 396-3752, or at http://www.AQMD.gov. A Fugitive Dust Control Plan, in conformance with the Coachella Valley Fugitive Dust Control Handbook, shall be submitted to and approved by the Engineering Division prior to approval of the Grading plan.

b. The first submittal of the Grading Plan shall include the following information: a copy of final approved conformed copy of Conditions of Approval; a copy of a final approved conformed copy of the Site Plan; a copy of current Title Report; a copy of Soils Report; and a copy of the associated Hydrology Study/Report.

ENG 36. Prior to approval of a Grading Plan (or issuance of a Grading Permit), the applicant shall obtain written approval to proceed with construction from the Agua Caliente Band of Cahuilla Indians, Tribal Historic Preservation Officer or Tribal Archaeologist. The applicant shall contact the Tribal Historic Preservation Officer or the Tribal Archaeologist at (760) 699-6800, to determine their requirements, if any, associated with grading or other construction. The applicant is advised to contact the Tribal Historic Preservation Officer or Tribal Archaeologist as early as possible. If required, it is the responsibility of the applicant to coordinate scheduling of Tribal monitors during grading or other construction, and to arrange payment of any required fees associated with Tribal monitoring.

ENG 37. In accordance with an approved PM-10 Dust Control Plan, temporary dust control perimeter fencing shall be installed. Fencing shall have screening that is tan in color; green screening will not be allowed. Temporary dust control perimeter fencing shall be installed after issuance of Grading Permit, and immediately prior to commencement of grading operations.

ENG 38. (Temporary dust control) perimeter fence screening shall be appropriately maintained, as required by the City Engineer. Cuts (vents) made into the perimeter fence screening shall not be allowed. Perimeter fencing shall be adequately anchored into the ground to resist wind loading.

ENG 39. Within 10 days of ceasing all construction activity and when construction activities are not scheduled to occur for at least 30 days, the disturbed areas on-site shall be permanently stabilized, in accordance with Palm Springs Municipal Code Section 8.50.022. Following stabilization of all disturbed areas, perimeter fencing shall be removed, as required by the City Engineer.

ENG 40. A Notice of Intent (NOI) to comply with the California General Construction Stormwater Permit (Water Quality Order 2009-0009-DWQ as modified September 2, 2009) is required for the proposed development via the California Regional Water Quality Control Board online SMARTS system). A copy of the executed letter issuing a Waste Discharge Identification (WDID) number shall be provided to the City Engineer prior to issuance of a grading or building permit.

ENG 41. This project requires preparation and implementation of a stormwater pollution prevention plan (SWPPP). As of September 4, 2012, all SWPPPs

shall include a post-construction management plan (including Best Management Practices) in accordance with the current Construction General Permit. Where applicable, the approved final project-specific Water Quality Management Plan shall be incorporated by reference or attached to the SWPPP as the Post-Construction Management Plan. A copy of the up-to-date SWPPP shall be kept at the project site and be available for review upon request.

ENG 42. In accordance with City of Palm Springs Municipal Code, Section 8.50.022 (h), the applicant shall post with the City a cash bond of two thousand dollars ($2,000.00) per disturbed acre (if there is disturbance of 5,000 square feet or more) at the time of issuance of grading permit for mitigation measures for erosion/blowsand relating to this property and development.

ENG 43. A Geotechnical/Soils Report prepared by a California registered Geotechnical Engineer shall be required for and incorporated as an integral part of the grading plan for the proposed development. A copy of the Geotechnical/Soils Report shall be submitted to the Engineering Division with the first submittal of a grading plan.

ENG 44. The applicant shall provide all necessary geotechnical/soils inspections and testing in accordance with the Geotechnical/Soils Report prepared for the project. All backfill, compaction, and other earthwork shown on the approved grading plan shall be certified by a California registered geotechnical or civil engineer, certifying that all grading was performed in accordance with the Geotechnical/Soils Report prepared for the project. Documentation of all compaction and other soils testing shall be provided. No certificate of occupancy will be issued until the required certification is provided to the City Engineer.

ENG 45. The applicant shall provide pad (or finish floor) elevation certifications for all building (or structure) pads in conformance with the approved grading plan (if required), to the Engineering Division prior to construction of any building (or structure) foundation.

ENG 46. In cooperation with the Riverside County Agricultural Commissioner and the California Department of Food and Agriculture Red Imported Fire Ant Project, applicants for grading permits involving a grading plan and involving the export of soil will be required to present a clearance document from a Department of Food and Agriculture representative in the form of an approved "Notification of Intent To Move Soil From or Within Quarantined Areas of Orange, Riverside, and Los Angeles Counties" (RIFA Form CA-1) prior to approval of the Grading Plan (if required). The California Department of Food and Agriculture office is located at 73-710 Fred Waring Drive, Palm Desert (Phone: 760-776-8208).

WATER QUALITY MANAGEMENT PLAN

ENG 47. A Final Project-Specific Water Quality Management Plan (WQMP) shall be submitted to and approved by the City Engineer prior to issuance of a grading or building permit. The WQMP shall address the implementation of operational Best Management Practices (BMP's) necessary to accommodate nuisance water and storm water runoff from the site. Direct release of nuisance water to the adjacent property (or public streets) is prohibited. Construction of operational BMP's shall be incorporated into the Precise Grading and Paving Plan.

a. Prior to issuance of any grading or building permits, the property owner shall record a "Covenant and Agreement" with the County-Clerk Recorder or other instrument on a standardized form to inform future property owners of the requirement to implement the approved Final Project-Specific Water Quality Management Plan (WQMP). Other alternative instruments for requiring implementation of the approved Final Project-Specific WQMP include: requiring the implementation of the Final Project-Specific WQMP in Home Owners Association or Property Owner Association Covenants, Conditions, and Restrictions (CC&Rs); formation of Landscape, Lighting and Maintenance Districts, Assessment Districts or Community Service Areas responsible for implementing the Final Project-Specific WQMP; or equivalent. Alternative instruments must be approved by the City Engineer prior to issuance of any grading or building permits.

b. Prior to issuance of certificate of occupancy or final City approvals (OR of "final" approval by City), the applicant shall: (a) demonstrate that all structural BMP's have been constructed and installed in conformance with approved plans and specifications; (b) demonstrate that applicant is prepared to implement all non-structural BMP's included in the approved Final Project-Specific WQMP, conditions of approval, or grading/building permit conditions; and (c) demonstrate that an adequate number of copies of the approved Final Project-Specific WQMP are available for the future owners (where applicable).

DRAINAGE

ENG 48. Direct release of on-site nuisance water or stormwater runoff shall not be permitted to adjacent streets. Provisions for the interception of nuisance water from entering adjacent public streets from the project site shall be provided through the use of a minor storm drain system that collects and conveys nuisance water to landscape or parkway areas, and in only a stormwater

runoff condition, pass runoff directly to the streets through parkway or under sidewalk drains.

ENG 49. This project shall be required to install measures in accordance with applicable National Pollution Discharge Elimination System (NPDES) Best Management Practices (BMP's) included as part of the NPDES Permit issued for the Whitewater River Region from the Colorado River Basin Regional Water Quality Control Board (RWQCB). The applicant is advised that installation of BMP's, including mechanical or other means for pre-treating contaminated stormwater and non-stormwater runoff, shall be required by regulations imposed by the RWQCB. It shall be the applicant's responsibility to design and install appropriate BMP's, in accordance with the NPDES Permit, that effectively intercept and pre-treat contaminated stormwater and non-stormwater runoff from the project site, prior to release to the City's municipal separate storm sewer system ("MS4"), to the satisfaction of the City Engineer and the RWQCB. Such measures shall be designed and installed on-site; and provisions for perpetual maintenance of the measures shall be provided to the satisfaction of the City Engineer, including provisions in Covenants, Conditions, and Restrictions (CC&R's) required for the development.

ENG 50. The project is subject to flood control and drainage implementation fees. The acreage drainage fee at the present time is $ 9212.00 per acre in accordance with Resolution No. 15189. Fees shall be paid prior to issuance of a building permit.

ENG 51. All on-site storm drain systems shall be privately maintained by a Homeowners Association (HOA). Provisions for maintenance of the on-site storm drain systems acceptable to the City Engineer shall be included in Covenants, Conditions and Restrictions (CC&R's) required for this project.

GENERAL

ENG 52. Any utility trenches or other excavations within existing asphalt concrete pavement of off-site streets required by the proposed development shall be backfilled and repaired in accordance with City of Palm Springs Standard Drawing No. 115. The developer shall be responsible for removing, grinding, paving and/or overlaying existing asphalt concrete pavement of off-site streets as required by and at the discretion of the City Engineer, including additional pavement repairs to pavement repairs made by utility companies for utilities installed for the benefit of the proposed development (i.e. Desert Water Agency, Southern California Edison, Southern California Gas Company, Time Warner, Verizon, Mission Springs Water District, etc.). Multiple excavations, trenches, and other street cuts within existing asphalt concrete pavement of off-site streets required by the proposed development may require complete grinding and asphalt concrete overlay of the affected

off-site streets, at the discretion of the City Engineer. The pavement condition of the existing off-site streets shall be returned to a condition equal to or better than existed prior to construction of the proposed development.

ENG 53. All proposed utility lines shall be installed underground.

ENG 54. All existing utilities shall be shown on the improvement plans if required for the project. The existing and proposed service laterals shall be shown from the main line to the property line.

ENG 55. Upon approval of any improvement plan (if required) by the City Engineer, the improvement plan shall be provided to the City in digital format, consisting of a DWG (AutoCAD 2004 drawing file), DXF (AutoCAD ASCII drawing exchange file), and PDF (Adobe Acrobat 6.0 or greater) formats. Variation of the type and format of the digital data to be submitted to the City may be authorized, upon prior approval by the City Engineer.

ENG 56. The original improvement plans prepared for the proposed development and approved by the City Engineer (if required) shall be documented with record drawing "as-built" information and returned to the Engineering Division prior to issuance of a final certificate of occupancy. Any modifications or changes to approved improvement plans shall be submitted to the City Engineer for approval prior to construction.

ENG 57. Nothing shall be constructed or planted in the corner cut-off area of any (intersection or) driveway which does or will exceed the height required to maintain an appropriate sight distance per City of Palm Springs Zoning Code Section 93.02.00, D.

ENG 58. All proposed trees within the public right-of-way and within 10 feet of the public sidewalk and/or curb shall have City approved deep root barriers installed in accordance with City of Palm Springs Standard Drawing No. 904.

ENG 59. This property is subject to the Coachella Valley Multiple Species Habitat Conservation Plan Local Development Mitigation Fee (CVMSHCP-LDMF). The LDMF shall be paid prior to issuance of Building Permit.

MAP

ENG 60. The developer shall apply for an annexation to the City of Palm Springs Community Facilities District established for public safety services and submit required applications, waivers, and consent forms to the annexation prior to approval of a final map. Payment of an annexation fee of $2,500 shall be made at the time of the application.

ENG 61. A Final Map shall be prepared by a California registered Land Surveyor or qualified Civil Engineer and submitted to the Engineering Division for review and approval. A Title Report prepared for subdivision guarantee for the subject property, the traverse closures for the existing parcel and all lots created therefrom, and copies of record documents shall be submitted with the Final Map to the Engineering Division as part of the review of the Map. The Final Map shall be approved by the City Council prior to issuance of building permits.

ENG 62. A copy of draft Covenants, Conditions and Restrictions (CC&R's) shall be submitted to the City Attorney for review and approval for any restrictions related to the Engineering Division's recommendations. The CC&R's shall be approved by the City Attorney prior to approval of the Final Map by the City Council, or in the absence of a Final Map, shall be submitted and approved by the City Attorney prior to issuance of Certificate of Occupancy.

ENG 63. Upon approval of a Final Map, the Final Map shall be provided to the City in G.I.S. digital format, consistent with the "Guidelines for G.I.S. Digital Submission" from the Riverside County Transportation and Land Management Agency." G.I.S. digital information shall consist of the following data: California Coordinate System, CCS83 Zone 6 (in U.S. feet); monuments (ASCII drawing exchange file); lot lines, rights-of-way, and centerlines shown as continuous lines; full map annotation consistent with annotation shown on the map; map number; and map file name. G.I.S. data format shall be provided on a CDROM/DVD containing the following: ArcGIS Geodatabase, ArcView Shapefile, ArcInfo Coverage or Exchange file, DWG (AutoCAD 2004 drawing file), DGN (Microstation drawing file), DXF (AutoCAD ASCII drawing exchange file), and PDF (Adobe Acrobat 6.0 or greater) formats. Variations of the type and format of G.I.S. digital data to be submitted to the City may be authorized, upon prior approval of the City Engineer.

TRAFFIC

ENG 64. A minimum of 48 inches of clearance for accessibility shall be provided on public sidewalks or pedestrian paths of travel within the development.

ENG 65. All damaged, destroyed, or modified pavement legends, traffic control devices, signing, striping, and street lights, associated with the proposed development shall be replaced as required by the City Engineer prior to issuance of a Certificate of Occupancy.

ENG 66. Pay the fair share of the estimated cost to install angled parking and bikeway (with enhanced signage and sharrows) on Calle El Segundo as required by the Section 14 Specific Plan.

ENG 67. Construction signing, lighting and barricading shall be provided during all phases of construction as required by City Standards or as directed by the City Engineer. As a minimum, all construction signing, lighting and barricading shall be in accordance with Part 6 "Temporary Traffic Control" of the California Manual on Uniform Traffic Control Devices (MUTCD), dated November 7, 2014, or subsequent editions in force at the time of construction.

ENG 68. This property is subject to the Transportation Uniform Mitigation Fee which shall be paid prior to issuance of building permit.

FIRE DEPARTMENT CONDITIONS

These Fire Department conditions may not provide all requirements. Detailed plans are still required for review.

These Fire Department conditions may not provide all requirements. Detailed plans are still required for review.

FID 1 These conditions are subject to final plan check and review. Initial Fire Department conditions have been determined from the plans received and dated December 11, 2014. Additional requirements may be required at that time based on revisions to site plans.

FID 2 Fire Department Conditions were based on the *2013 California Fire Code* as adopted by City of Palm Springs, Palm Springs Municipal Code and latest adopted NFPA Standards. Four (4) complete sets of plans for private fire service mains, fire alarm, or fire sprinkler systems must be submitted at time of the building plan submittal.

FID 3 **PLANS AND PERMITS**

Complete plans for private fire service mains or fire sprinkler systems should be submitted for approval well in advance of installation. Plan reviews can take up to 20 working days. Submit a minimum of four (4) sets of drawings for review. Upon approval, the Fire Prevention Bureau will retain one set.

Plans shall be submitted to:

City of Palm Springs

Building and Safety Department
3200 E. Tahquitz Canyon Way
Palm Springs, CA 92262

Counter Hours: 8:00 AM – 6:00 PM, Monday – Thursday

A deposit for Plan Check and Inspection Fees is required at the time of Plan Submittal. Inspection fees are charged at the fully burdened hourly rate of the fire inspector. These fees are established by Resolution of the Palm Springs City Council.

Complete listings and manufacturer's technical data sheets for all system materials shall be included with plan submittals. All system materials shall be UL listed or FM approved for fire protection service and approved by the Fire Prevention Bureau prior to installation.

Plans shall indicate all necessary engineering features, including all hydraulic reference nodes, pipe lengths and pipe diameters as required by the appropriate codes and standards. Plans and supportive data (calculations and manufacturer's technical data sheets) shall be submitted with each plan submittal. Complete and accurate legends for all symbols and abbreviations shall be provided on the plans.

FID 4 **Street Widths (CFC Appendix L; PSMC § 8.04.500; Palm Springs 2007 General Plan):** Private streets in any residential or mixed use land use designation may be reduced to a minimum of 28 feet (curb face to curb face) provided that (1) additional off street parking is provided as determined by the City Engineer, the Fire Chief and Director of Planning, (2) rolled or wedge curb is provided such that vehicles may park partially out of the traveled way, and (3) pedestrian pathways or sidewalks, if located along the street, separated from the curb by a minimum five-foot parkway are provided.

- Any street not designated by the fire department as a "fire lane" shall comply with the above requirements
- Road width shown is not compliant with General Plan

FID 5 **Fire Apparatus Access Roads (CFC 503.1.1):** Approved fire apparatus access roads shall be provided for every facility, building or portion of a building hereafter constructed or moved into or within the jurisdiction. The fire apparatus access road shall comply with the requirements of this section and shall extend to within 150 feet of all portions of the facility and all portions of the exterior walls of the first story of the building as measured by an approved route around the exterior of the building or facility.

- **Fire Apparatus Access Road (CFC 202 Definitions)** – A road that

provides fire apparatus access from a fire station to a facility, building or portion thereof. This is a general term inclusive of all other terms such as fire lane, public street, private street, parking lot lane and access roadway.

- **Dimensions (CFC 503.2.1):** Fire apparatus access roads shall have an unobstructed width of not less than 26 feet *(for designated fire lanes)* except for approved security gates in accordance with Section 503.6 and an unobstructed vertical clearance of not less than 13 feet 6 inches.

FID 6 **Aerial Fire Access Roads (CFC Appendix D105.1):** Buildings or portions of buildings or facilities exceeding 30 feet in height above the lowest level of fire department vehicle access shall be provided with approved fire apparatus access roads capable of accommodating fire department aerial apparatus. Overhead utility and power lines shall not be located within the aerial fire apparatus access roadway.

FID 7 **Aerial Fire Access Road Width (CFC Appendix D105.2):** Fire apparatus access roads shall have a minimum unobstructed width of 26 feet, exclusive of shoulders, in the immediate vicinity of any building or portion of building more than 30 feet in height.

FID 8 **Aerial Access Proximity to Building (CFC Appendix D105.3):** At least one of the required access routes for buildings or facility exceeding 30 feet in height above the lowest level of fire department vehicle access shall be located within a minimum of 15 feet and a maximum of 30 feet from the building and shall be positioned parallel to one entire side of the building.

FID 9 **Fire Lanes (CFC 202 Definitions):** A road or other passageway developed to allow the passage of fire apparatus. A fire lane is not necessarily intended for vehicular traffic other than fire apparatus. *A "fire lane" is a component of a "fire apparatus access road".*

- **Designation of Fire Lanes (CVC 22500.1):** Only the fire department with jurisdiction over the area in which the place is located can designate a fire lane.

- **Fire Lane Marking (CFC 503.3):** Where required by the fire code official, approved signs or other approved notices or markings that include the words NO PARKING—FIRE LANE shall be provided for fire apparatus access roads to identify such roads or prohibit the obstruction thereof. The means by which fire lanes are designated shall be maintained in a clean and legible condition at all times and be

replaced or repaired when necessary to provide adequate visibility.

FID 10 **Surface (CFC 503.2.3):** Fire apparatus access roads shall be designed and maintained to support the imposed loads of fire apparatus (73,000 lbs. GVW) and shall be surfaced so as to provide all-weather driving capabilities.

FID 11 **Traffic Calming Devices (CFC 503.4.1):** Traffic calming devices shall be prohibited unless approved by the fire code official.

FID 12 **Security Gates (CFC 503.6):** The installation of security gates across a fire apparatus access road shall be approved by the fire code official. Where security gates are installed, they shall have an approved means of emergency operation. Secured automated vehicle gates or entries shall utilize a combination of a Tomar Strobeswitch™, or approved equal, and an approved Knox key electric switch. Electric gate operators, where provided, shall be listed in accordance with UL 325. Gates intended for automatic operation shall be designed, constructed and installed to comply with the requirements of ASTM F 2200 and an approved Knox key electric switch. Secured non-automated vehicle gates or entries shall utilize an approved padlock or chain (maximum link or lock shackle size of ¼ inch). Approved security gates shall be a minimum of 14 feet in unobstructed drive width on each side with gate in open position.

In the event of a power failure, the gates shall be defaulted or automatically transferred to a fail safe mode allowing the gate to be pushed open without the use of special knowledge or any equipment. If a two-gate system is used, the override switch must open both gates.

If there is no sensing device that will automatically open the gates for exiting, a fire department approved Knox electrical override switch shall be placed on each side of the gate in an approved location.

A final field inspection by the fire code official or an authorized representative is required before electronically controlled gates may become operative. Prior to final inspection, electronic gates shall remain in a locked-open position.

FID 13 **Operational Fire Hydrant(s) (CFC 508.1, 508.5.1 & 1412.1):** Operational fire hydrant(s) shall be installed within 250 feet of all combustible construction. They shall be installed and made serviceable prior to and during construction. No landscape planting, walls, or fencing is permitted within 3 feet of fire hydrants, except ground cover plantings

FID 14 **NFPA 13D Fire Sprinklers Required:** An automatic fire sprinkler system is required. Only a C-16 licensed fire sprinkler contractor shall perform system design and installation. System to be designed and installed in accordance

with NFPA standard 13D, 2013 Edition, as modified by local ordinance.

FID 15 **Single- and Multiple-Station Smoke Alarms (CFC 907.2.11):** Listed single- and multiple-station smoke alarms complying with UL 217 shall be installed in accordance with Sections 907.2.11.1 through 907.2.11.4 and NFPA 72.

- Exception: For Group R occupancies. A fire alarm system with smoke detectors located in accordance with this section may be installed in lieu of smoke alarms. Upon actuation of the detector, only those notification appliances in the dwelling unit or guest room where the detector is actuated shall activate.

FID 16 **Key Box Required (CFC 506.1):** Where access to or within a structure or an area is restricted because of secured openings or where immediate access is necessary for life-saving or fire-fighting purposes, the fire code official is authorized to require a key box to be installed in an approved location. The key box shall be flush mount type and shall contain keys to gain necessary access as required by the fire code official.

FID 17 **Hazardous Materials (CFC 5004.1):** Storage of hazardous materials in amounts exceeding the maximum allowable quantity per control area as set forth in Section 5003.1 shall be in accordance with Sections 5001, 5003 and 5004. Storage of hazardous materials in amounts not exceeding the maximum allowable quantity per control area as set forth in Section 5003.1 shall be in accordance with Sections 5001 and 5003. Retail and wholesale storage and display of nonflammable solid and nonflammable and noncombustible liquid hazardous materials in Group M occupancies and Group S storage shall be in accordance with Section 5003.11.

- Pool Chemicals – dedicated, compliant storage cabinets, rooms, or areas required
- Liquid Petroleum Gas (LPG) – dedicated, compliant storage cabinets, rooms, or areas required

END OF CONDITIONS

PLANNING COMMISSION STAFF REPORT

DATE: February 25, 2015

SUBJECT: O & M HR, LLC (NEXUS DEVELOPMENT CORP.) FOR THE DEMOLITION OF AN EXISTING DEVELOPMENT AND PARKING AREA TO CONSTRUCT "ABERDEEN"; A MIXED-USE PROJECT CONSISTING OF (74) ATTACHED AND DETACHED RESIDENTIAL DWELLINGS, (17) LIVE-WORK UNITS AND APPROXIMATELY 1,568-SQUARE FEET OF RETAIL ON 8.05-ACRES LOCATED AT THE NORTHEAST CORNER OF TAHQUITZ CANYON WAY AND CALLE EL SEGUNDO, ZONE REO AND CU (CASE NOS. 5.1361 PD-375, 3.3820 MAJ AND TTM 36876).

FROM: Department of Planning Services

SUMMARY

The Planning Commission will review the following applications related to the 8.05-acre site:

- A Planned Development District to establish the project site plan, permitted uses and development standards. The PD proposes razing the existing parking lot and office buildings to construct:
  - 1,568-square feet of commercial space at the southwest corner of the site;
  - 17 detached dwellings with associated commercial space (live-work lofts) fronting Tahquitz Canyon Way;
  - 74 attached and detached residential units within a controlled access / gated area with private open space;
  - A common open space / recreation area with pool, fitness center and barbecue area.
- Major Architectural Application to review the proposed architectural designs. Plans include Preliminary and Final Development Plans.
- A Tentative Tract Map (TTM) seeking to subdivide the roughly 8.05-acres into 93 numbered lots and 8 lettered lot streets, and common open space.

RECOMMENDATION:

Recommend the City Council adopt the mitigated negative declaration and approve the project, subject to conditions. Specific conditions related to the alteration of the current proposal include:

1. Revise the internal street widths to conform to the Section 14 Specific Plan and General Plan minimum required widths for private streets [28 feet (rolled curb to curb) with 5 foot landscape buffer and 5 foot sidewalks].
2. Modify the extension of Calle Alvarado to satisfactorily meet width requirements of City Engineer and Fire Department.
3. Provide unlocked pedestrian access through center of site and at all vehicular access gates.
4. Prohibit residential uses in structures fronting Tahquitz Canyon Way.
5. Include bicycle parking as required by the Section 14 Specific Plan.
6. Provide trash enclosure for commercial building.
7. Consider providing Plug-in Electric Vehicle (PEV) parking spaces as required by the Section 14 Specific Plan.
8. Redesign streetscape along Tahquitz Canyon to be consistent with the Section 14 Specific Plan with the inclusion of street furniture and identification of Indian public art locations.

ISSUES:

1. The project is inconsistent with the General Plan which prohibits gated communities.
2. The internal roadways are inconsistent with the General Plan minimum profile for private streets in Planned Developments and lack sidewalks.
3. Single family residential is prohibited within the REO and RA zones, but multi-family is permitted with the approval of a Conditional Use Permit in both zones.
4. Pools within individual lots do not meet five foot setback requirements of zoning code.
5. Bicycle parking is required for all new developments in Section 14.
6. Landscape along Tahquitz Canyon Way inconsistent with design guidelines of Specific Plan.

BACKGROUND:

TABLE 1: Most Recent Change of Ownership	
Aug 2007 Feb 2008 Dec 2014	Parcels purchased by present owner.

TABLE 2: Related Relevant City Actions by Planning, Fire, Building, etc...	
Jan 12, 2015	The Architectural Advisory Committee (AAC) tabled the project with direction to the applicant to modify the following: 1. Architecture along Tahquitz is too monotonous, lacks interest and out of scale and context; 2. Parking needs further evaluation for commercial and live-work; 3. Circulation – Increase pedestrian amenities (i.e. landscaping, wider sidewalk, etc.) along extension of Calle Alvarado; 4. Connectivity – Eliminate gates and improve connectivity of project within existing community; 5. Adaptive re-use of existing commercial buildings should be considered in redesign.
Jan 26, 2015	The AAC recommended denial as proposed. The Committee found that the project does not conform to adopted standards, and recommended the following modifications: 1. Study alternatives along Tahquitz Canyon Way; 2. Provide streetscape along El Segundo; 3. Address Calle Alvarado traffic, parking and circulation issues; 4. Resubmit planting diagrams.

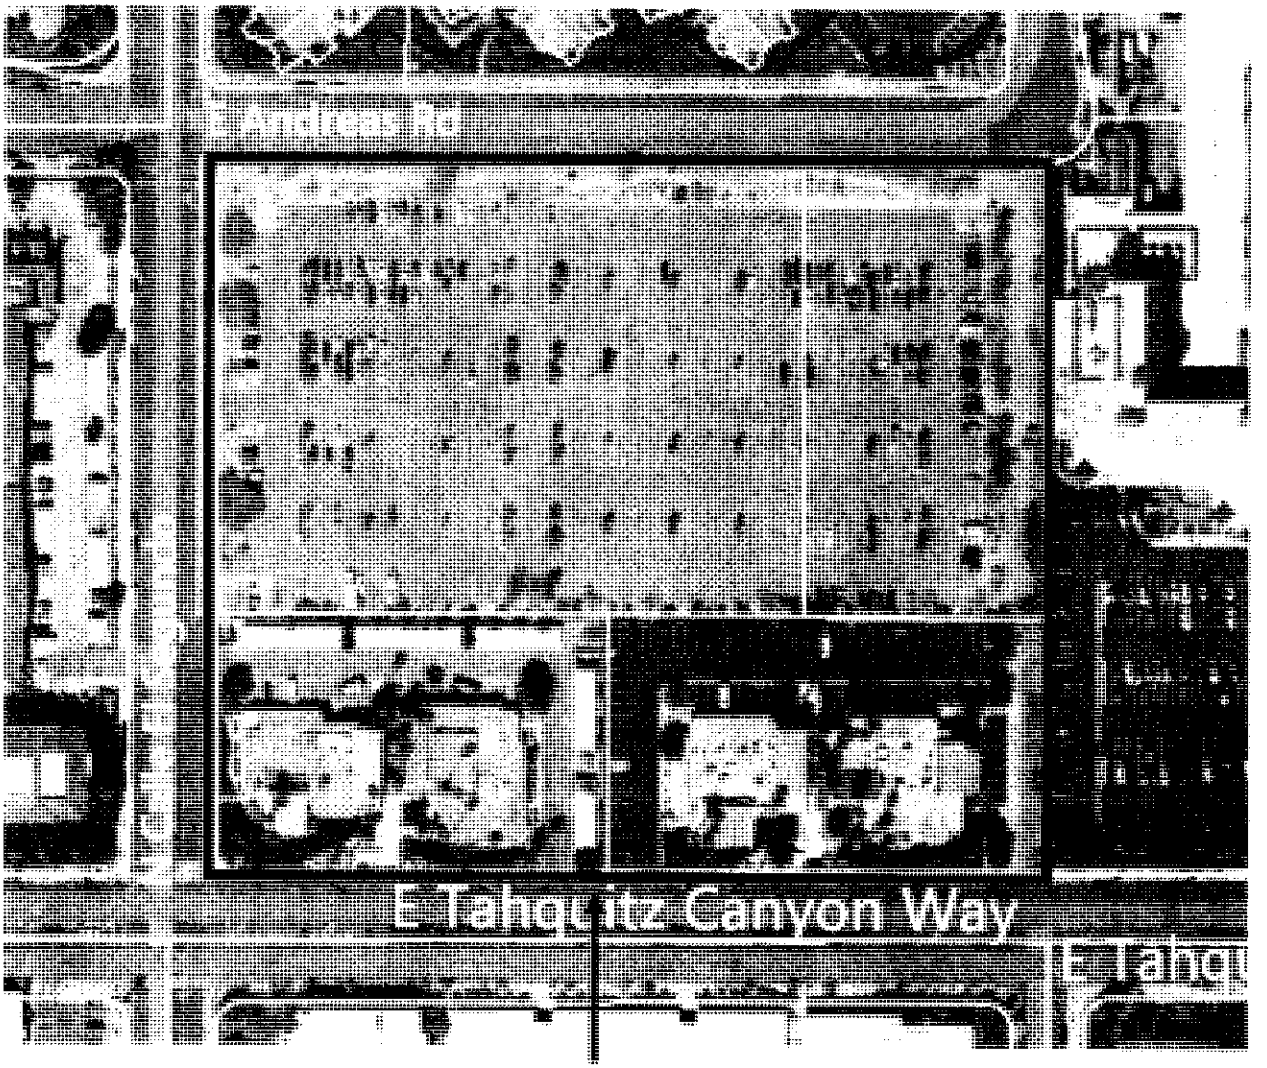
TABLE 6: Site Area	
Net Area	8.05 acres



SUBJECT SITE

TABLE 7: General Plan, Zoning and Land Uses of Site & Surrounding Areas			
	Existing General Plan Designations	***Existing Zoning Designation***	***Existing Land Use***
Site	TRC (Tourist Resort Commercial)	RA (Resort Attraction) and REO (Retail / Entertainment / Office)	Office Buildings and Prairie Schooner Parking Lot
North	HDR (High Density Residential	HR (Residential High)	Multi-family Residential Condominiums (Plaza Villas)
South	TRC	REO	Commercial Complex (Courtyard at PS)
East	TRC	RA	Resort Hotel (Renaissance)
West	TRC	RA	Resort Hotel (Hilton)

PROJECT DESCRIPTION:

The site is comprised of five developed parcels totaling roughly 9.1 gross acres in size and bounded by Tahquitz Canyon Way to the south, Calle El Segundo to the west, Andreas Road to the north and the Renaissance Hotel to the east. After street dedication and the extension of Calle Alvarado, the net acreage of the project area is 8.05-acres in size. The site encompasses the "Prairie Schooner" parking lot, which is being sold by the City to the developer, and the existing office buildings along Tahquitz Canyon Way. All will be razed for the proposed development.

The applicant is proposing a partially gated development for 74 three- and four-story, attached and detached single family residential units on small lots each with its own private spa / pool and two-car garage. These units will have primary vehicular access from Andreas Road. The non-gated portion of the development includes a one-story, 1,568-square foot commercial building and 17 three- and four-story, detached single-family live-work units with vehicular access from a private street extending from Calle El Segundo to the proposed extension of Calle Alvarado.

ANALYSIS:

TABLE 8: General Plan

General Plan Topic	F.A.R. and Density	Request	Compliance
Land Use: Tourist Resort Commercial	0.35 FAR / 43 hotel rooms per acre / 86 hotel rooms per acre on Indian Land / 30 d.u. per acre	11.3 du/ac 0.35 FAR for commercial building	Yes
Gated Communities	CD14.6: Prohibited	Gated requested	No
Pedestrian-oriented Design	CD19.7 Sidewalks, shade trees, sitting areas	No sidewalks along residential street	Partially
Minimum 28 foot street width in private developments	Page 4-5 Circulation Element	26 feet	No

TABLE 9: Zoning

Permitted Uses:

Single-family residential units are prohibited in REO (Retail / Entertainment / Office) and RA (Resort Attraction) Section 14 Land Use designations. The proposed small-lot residential use is similar to multi-family residential (MFR) due to a majority of units being attached. MFR is permitted by Conditional Use Permit (CUP) in both designations.

Retail including coffee shops, deli, etc. is permitted within the RA Land Use of the Section 14 Specific Plan.

Live/work units are permitted by Land Use Permit and CUP in the REO and RA zones, respectively.

The PDD has been submitted in lieu of a change of zone to seek City approval of all uses as a consolidated project per the Section 14 Specific Plan.

Development Standards:

The project includes three land uses within the PD. When multi-family residential is proposed within the REO or RA zones, the Specific Plan requires development consistent with the HR land designation. The live-work and commercial space are located within the REO land designation. Thus, staff analyzed the HR designation development standards for the multi-family residential portion, and the REO designation development standards for the live-work and commercial components.

Since this proposal exceeds five acres in size, the development is a Consolidated Project and can utilize incentives including zoning flexibilities. Where applicable, staff has included in the analysis below.

Multi-family Residential

	HR Requirements / R-4	Proposed Project	Conform
Lot Standards			
Min. Area	2 gross acres / 130' wide / 155' deep, except lot size requirements may be reduced for single-family residential development if it can be demonstrated through the CUP process that the reductions are necessary and desirable, and are not detrimental to neighboring uses (existing and permitted)	Range from 2,563sf and 4,813sf	No, per PDD
Min. Width		Range from 21ft to 30ft	
Min. Depth		Range from 107ft to 111ft	
Building Height	35ft, except when developed as high-rise, pursuant to Section 94.03.00 of Palm Springs Zoning Ordinance (PSZO) – see analysis below in Live/Work and Commercial section.	Range from 33 feet to 46 feet	See live/work analysis
Density	1,500 sq. ft. of lot area per unit	11 du/ac or 3,853 sq. ft. per unit	Yes
Yard Setbacks			
Overall Site			
- Front	30 ft. front yard	- 24ft from north (front) property line	No per PDD
- Side	20 ft. side yard	- 15ft from west (side) property line	
- Side	20 ft. side yard	- 43ft from east (side) property line	Yes
- Rear	20 ft. rear yard	- 145ft from south (rear) property line	Yes

Individual Lots	Setback requirements may be reduced for single-family residential development if it can be demonstrated through the CUP process that the reductions are necessary or desirable, and are not detrimental to neighboring uses (existing and permitted)	Front / Driveways: 18 feet from private street to face of garage Side: 6ft between residences (Avg. 3ft to common side P/L) 0ft at one side of homes. Rear: 27 to 40ft	Yes when certain findings are made
Lot Coverage	45% usable landscaped open space	Usable open space: 48%	Yes
Off-street Parking	Per PSZC 93.06: In PDDs: 3 bdrm units require 2.25 spaces or 167 spaces for the units, plus guest parking 1 space for every 4 units, or 19 spaces; total 186 spaces required	2 covered spaces are provided with each of the 74 units (148 spaces) + 2 spaces in front of garage on driveways (148 spaces); total 296 spaces	Yes
Trash Enclosure	Per PSZC 93.07.02	TBD	-

Live / Work and Commercial

	REO Requirements	**Proposed Project**	**Conform**
FAR	3.0 Maximum Floor Area Ratio	1.26 FAR	Yes
Building Height	35ft, except 100ft for high-rise	46ft and 2in	Yes
Open Space	40% minimum landscape area for high-rise buildings	~48%	Yes
Compatibility w/Surrounding Development	The rear and side walls of buildings which are visible from adjacent lots or streets shall be treated with an equivalent design quality as the front wall.	Perimeter wall treatment to be designed.	TBD
Building Location	Buildings should be as close as possible to the required front setback	Live/work units have workspace / retail adjacent to front setback	Yes
Pedestrian Access	Direct pedestrian access shall be provided from buildings to the sidewalks on Tahquitz Canyon Way	Pedestrian access to workspace / retail is provided to each work unit	Yes
Front Setback	20 feet	6 feet	No, per PDD
Side Yard Setback	20 feet	0 feet on Calle El Segundo 7 feet on Calle Alvarado	No, per PDD
Rear Yard Setback	20 feet	18 feet from property line to garage	No, per PDD
Setbacks for High-Rise Buildings	High-rise buildings within Section 14 are exempt from the setback requirements identified in 93.04.00 of the PSZO; however, high-rise buildings	Buildings are setback over 100 feet from residential property to the north	Yes

	shall have a minimum setback of one (1) foot of horizontal setback distance from any residential district for each one (1) foot of vertical rise of the building. Additional site-specific setbacks may be imposed through the CUP process based on the relationship of the high-rise building to its surroundings.		
Minimum Lot Area	2 gross acres	8 gross acres for overall project	Yes
Off-street Parking	Commercial: 1 space per 250 gross floor area or 6 spaces. Live-work: No standard specified; however, in PDDs 3 bdrm units require 2.25 spaces or 38 spaces for the units, plus guest parking of 1 space for every 4 units, or 4 spaces. Total required: 48 spaces	15 parallel parking spaces on private driveway. At least one handicap space will be required 2 covered spaces are provided with each of the 17 units (34 spaces) + 2 spaces in front of garage on driveways (34 spaces) Total provided: 83 spaces	Yes
Off-street Loading	Not required for commercial spaces less than 3,000-sq. ft. in size	None provided	Yes

Flexible Zoning Standards: Since the project meets the definition of a Consolidated Project, the Section 14 Specific Plan allows flexible zoning standards as a development incentive. Consolidated project sites designated RA or REO may be developed under either RA or REO land use designations. As noted in the table above, the proposed structures are three- and four-stories in size and reach heights of up to 46 feet and 2 inches, triggering the "high-rise buildings" ordinance, Section 94.03.00 of the Zoning Code. The project proponent is seeking approval to allow the flexibility of the proposed height for the entire project site, which conforms to the REO / RA "Building Height" requirements.

These structures are located along a corridor that contains hotels ranging from three- to five-stories in height. The existing residential project to the north of the site contains two-story condominiums. Therefore, the transition from two-story residential to the north to the proposed three- and four-story development along Tahquitz Canyon Way is consistent with nearby and surrounding developments.

Specific Plan Design Guidelines:

Chapter 7 of the Specific Plan includes Design Guidelines for development proposals within Section 14.

Architectural Character: Modern architecture is a theme that is welcomed by the Specific Plan and the following features are suggested for 50s/60s Modern:

- *Skewed, angular roof forms;*
- *Angled, cantilever roof extensions;*
- *Extension of flooring to walls to outdoors;*
- *Bold, eye-catching accent colors;*
- *Large expanses of glass;*
- *Smooth, uninterrupted walls, often free-standing;*
- *Modern metals, such as aluminum, as decoration.*

The Plan also suggests incorporating Cahuilla imagery and symbols. Images would include baskets, pottery and hunting. Symbols are regional fauna and flora, parallel lines, anthropomorphic figures, trident forms, concentric circles, maze-like patterns and lightning bolts.

The proposal includes some of the above-mentioned features, such as cantilever roof extensions, extension of flooring to walls and outdoors and modern metals.

Materials and Colors: A number of materials are encouraged:

- *Stucco walls in off-white and/or muted tones;*
- *Wood highlights;*
- *Terra cotta or ceramic tile roofs;*
- *Built-up roof with parapets and metal or canvas awnings;*
- *Decorative ceramic tiles;*
- *Stone, such as flagstone, marble, travertine, granite;*
- *Decorative metal highlights, such as aluminum, copper, wrought iron.*
- *Smooth finish stucco; for example, exterior stucco, applied with a smooth trowel finish and painted with elastomeric paint is preferred.*
- *Screed expansion joints are favored, which are integrated with the design of windows and doors.*
- *Pre-cast concrete panels for structures taller than two stories.*

- *Cut stone, tile or other smooth, durable material on the ground level (the base) for visual interest at the street level and for ease of graffiti removal.*
- *Wood, steel or aluminum and clear glass on storefronts, windows, doors, or atrium spaces.*
- *Use of light or medium neutral colors on buildings is preferred over dark colors which tend to absorb heat and make a building appear more bulky. Strong colors may be used for accents on awnings, door trim, window mullions, window trim, towers or pedestrian amenities, provided such colors are clearly secondary to a more neutral base color.*

Materials include stucco walls, vertical aluminum panels, faux wood siding anodized aluminum windows and steel cable and beams. Colors include a mix of light and dark throughout the project. The proposed colors are both light and dark grays with some wood-like appearance. Since the initial review by the AAC, the project colors have been modified to reduce bulky appearance of the upper floors.

Massing / Building Bulk: "Structures should be articulated in form and should not be designed as single massive blocks. To reduce bulk and create visual interest, buildings, particularly those over two stories, should employ architectural devices such as stepped terraces, changes in vertical and horizontal planes, varied roof heights, and multi-planed roof forms." The Specific Plan provides additional design discussion related to pedestrian interest, building entrances, street corner articulation, design treatment on every façade and blank planar walls. The proposal meets many of these criteria with stepped / terraced buildings and varied roof plans and shapes.

Tahquitz Canyon Way: The Plan identifies Tahquitz Canyon Way as the "Grand Boulevard of Indian Culture" and provides recommendations on landscaping, lighting and streetscape. The proposed preliminary landscape design includes a formal pattern of two palms and two street trees along Tahquitz Canyon Way, which is consistent with the landscape envisioned along this boulevard. However, existing palms should be replaced with Washingtonia Filifera as identified in Design Guidelines. The sidewalk should include pedestrian amenities, such as new pedestrian scale lighting, street furniture and banners. Staff has included a condition in the draft resolution requiring compliance with additional pedestrian amenities.

AAC Review:

The Architectural Advisory Committee reviewed the project on two occasions and ultimately recommended denial of the project. The Board made a finding that the project does not conform to adopted standards, and recommended the following modifications:

1. Study alternatives along Tahquitz Canyon Way;

2. Provide streetscape along El Segundo;
3. Address Calle Alvarado traffic, parking and circulation issues;
4. Resubmit planting diagrams.

The applicant has modified both ends of the newly proposed Calle Alvarado extension with turf block reduce the appearance as a two-way street. No further changes to project have been proposed to address the above.

Discussion of Public Benefit:

Pursuant the City Council 2008 policy on Public Benefit on Planned Developments, the applicant is to propose some form of public benefit "*proportional to the nature, type and extent of the flexibility granted from the standards and provisions of the Palm Springs Zoning Code*" and may only be considered a public benefit "*when it exceeds the level of improvement needed to mitigate a project's environmental impacts or comply with dedication or exactions which are imposed on all projects such as Quimby Act, public art fees utility undergrounding, etc.*"

The applicant is seeking the following relief via the Planned Development District:

- Reduced setbacks
- Reduced lot area, depth and width

The applicant has proposed the following Public Benefits:

- Creating connectivity between convention center and Tahquitz Canyon Way through the extension of Calle Alvarado (private street);
- Reduction of site from 9.8-acres to 8.05-ares to accommodate new private street, Calle Alvarado;
- Construction of an art walk plaza located in the center of the southerly portion of project with pedestrian access from Tahquitz Canyon Way;
- The project itself as it enhances an "underutilized site" within Section 14.

REQUIRED FINDINGS:

The project was evaluated against the findings for the Resort Combining Zone pursuant to PSZC 92.25.00, the Planned Development District in lieu of Change of Zone pursuant to PSZC 94.03, 94.07 (Zone Change) and 94.02 (Conditional Use Permit) and the Tentative Tract Map pursuant to Municipal Code Section 9.62 (Maps) as follows:

Resort Combining Zone Findings:

The "R" resort overlay zone is intended primarily to provide for accommodations and services for tourists and visitors while guarding against the intrusion of competing land uses.

The Resort Combining Zone runs along Palm Canyon Drive for nearly its entire length through the City, as well as through the heart Section 14 along Tahquitz Canyon Way from Amado Road to Arenas Road. The subject site lies within this overlay zone.

The zoning code notes that:

> *Uses shall be as provided in the underlying zone with which the "R" zone is combined, except that:...All multiple-family dwellings (including, but not limited to, apartments, group housing projects, boarding and lodging houses, and condominiums) shall be permitted only by conditional use permit (CUP).*

The proposed development will have a Homeowners Association (HOA) that will function much like a condominium association to maintain the common areas of the development. As such the project is evaluated against the findings for a CUP herein[1] and the resort combining finding as follows:

> *Such permit is subject to the planning commission making findings that the proposed use is compatible with its surroundings and that the site in question is not appropriate for other uses allowed by right within the underlying zone.*

The mixed-use development proposes commercial and live/work units along a highly-traveled commercial corridor (Tahquitz Canyon Way). Development along this corridor primarily includes commercial-retail and hotel uses. The proposed use continues the commercial theme with residential located behind the commercial / live/work units, which is compatible with surrounding development. The mix of uses provides an appropriate balance for the site. Staff believes the proposed project is consistent with this finding.

Planned Development in lieu of Change of Zone:
The commission in recommending and the council in reviewing a proposed change of zone, shall consider whether the following conditions exist in reference to the proposed zoning of the subject property:

[1] Pursuant to PSZC 94.02.00.A.4 (CUP); the CUP may be incorporated into the PDD without the need for a separate application. Thus the CUP findings of PSZC 94.02 and the Zone Change findings of PSZC 93.07 are both evaluated as integral parts of the PDD application.

1. The proposed change of zone is in conformity with the general plan map and report.

The proposed project is located in the Tourist Resort Commercial (TRC) (FAR of 0.35 and density of up to 30 units per acre) land use designation of the General Plan. The mixed-use project proposes 11.8 residential dwelling units per acre and a FAR of 0.35, which is consistent with the land use designation.

2. The subject property is suitable for the uses permitted in the proposed zone, in terms of access, size of parcel, relationship to similar or related uses, and other considerations deemed relevant by the commission and council.

The proposed project is located in the REO and RA land designations of Section 14, which describes these designations as follows:

Specialty Retail-Entertainment-Office (REO) - This designation allows for the integration and concentration of large-scale specialty retail, restaurant, entertainment and office development along portions of Tahquitz Canyon Way and Indian Canyon Drive and emphasizes a pedestrian-transit focus.

Resort-Attraction (RA) - This designation allows for large-scale resort hotel complexes, hotels, and major commercial recreation attractions integrated with retail and entertainment facilities.

The PDD is proposed to change the split zoning to a single PD zone designation with its own development standards. Specific Uses requested for approval for the PDD include attached and detached residential townhomes, live/work units and freestanding retail-commercial with outdoor dining. Additional uses consistent with the REO land designation may be considered within the commercial space and workspace of the live/work units, except residential dwelling is prohibited in structures along the street front. The project conforms to this finding.

Vehicular access to the residential portion of project is provided from Andreas Road. The live/work and commercial space is accessed from Calle El Segundo and the extension of Calle Alvarado. The project proposes a mix residential, commercial and live/work that is harmonious with adjacent uses in the vicinity. Thus, the project conforms to this finding.

3. The proposed change of zone is necessary and proper at this time, and is not likely to be detrimental to the adjacent property or residents.

The proposed PDD in lieu of zone change has been evaluated against the development standards for the Section 14 land designations, the Resort Combining Zone and

architectural review. While the applicant is seeking setback deviations, the project is harmonious with the existing surrounding development. It continues the pedestrian experience along Tahquitz Canyon Way and introduces commercial uses along the street frontage which is desirable. The project height is consistent with development along the Tahquitz Canyon Way boulevard and is therefore not detrimental to adjacent properties. The project conforms to this finding.

Conditional Use Permit / Planned Development District Findings:
In addition to the findings for the PDD in lieu of a change of zone (from PSZC Section 93.07), the PDD incorporates the findings of the CUP (PSZC 94.02.00) for residential uses in the Resort Combining Zone as follows:

> *The commission shall not approve or recommend approval of a conditional use permit unless it finds as follows:*
>
> *a. That the use applied for at the location set forth in the application is properly one for which a conditional use permit is authorized by this Zoning Code;*

The mixed use project incorporates residential, live/work units and commercial space with the proposed zoning, PD-375. The current Section 14 land designations, RA and REO, allow for multi-family residential, live/work units and commercial developments. The project proposes a PDD in lieu of a change or zone for the proposed uses and seeking relief from certain setback development standards. With approval of the PDD, the project is consistent with this finding.

> *b. That the use is necessary or desirable for the development of the community, is in harmony with the various elements or objectives of the general plan, and is not detrimental to existing uses or to future uses specifically permitted in the zone in which the proposed use is to be located;*

Development of the subject site with single family uses is desirable as a means of bringing a variety of housing choices to the community. The project is consistent with the General Plan Tourist Resort Commercial land use designation providing a mix of uses, including tourist-related commercial space, live/work units and residential uses on an 8.05-acre site. The proposed use continues the commercial theme with residential located behind the commercial / live/work units, which is compatible with surrounding development and not detrimental to existing or future uses in the zone. The project therefore conforms to this finding.

> *c. That the site for the intended use is adequate in size and shape to accommodate such use, including yards, setbacks, walls or fences, landscaping and other features required in order to adjust such use to those existing or permitted future uses of land in the neighborhood;*

The project consists of a grouping of parcels to form the overall 8.05-acre site with internal private streets, privately owned units and both private and common open spaces. With the approval of the PDD, buildings will be setback from perimeter property lines to accommodate the proposed uses for adjusting to those existing and future uses of land in the neighborhood. Therefore, the project would be deemed in conformance with this finding.

> *d. That the site for the proposed use relates to streets and highways properly designed and improved to carry the type and quantity of traffic to be generated by the proposed use;*

The project proposes to take vehicular access from surrounding streets, excluding Tahquitz Canyon Way, which is consistent with the Section 14 Specific Plan. As determined by the environmental assessment, Tahquitz Canyon Way, Calle El Segundo and Andreas Road are improved with adequate road width to accommodate the type and quantity of traffic expected by the proposed uses. Thus, the project conforms with this finding.

> *e. That the conditions to be imposed and shown on the approved site plan are deemed necessary to protect the public health, safety and general welfare and may include minor modification of the zone's property development standards.*

A set of draft conditions of approval are proposed and attached to this staff report as Exhibit "A".

Tentative Tract Map Findings:
Findings are required for the proposed subdivision pursuant to Section 66474 of the Subdivision Map Act. These findings and a discussion of the project as it relates to these findings follow:

> *a. The proposed Tentative Tract Map is consistent with all applicable general and specific plans.*

The TTM proposes individual privately owned lots with open space, common area and private streets. The proposed density is within the range specified by the Tourist Resort Commercial General Plan land use designation. Therefore, the project is consistent with this finding.

> *b. The design and improvements of the proposed Tentative Tract Map are consistent with the zone in which the property is located.*

The proposed project design and improvements are generally consistent with the RA / REO land designations in which the property is located. The PDD in lieu of a zone

change proposes mixed uses with residential, live/work units and commercial space with a set of development standards unique to this development with smaller lot area, lot dimensions and setbacks. With the approval of the PDD in lieu of a change of zone, the project will be consistent with this finding.

c. The site is physically suited for this type of development.

The relatively flat project site will be razed and graded to accommodate the proposed development. Site modifications include new private driveways to privately-owned lots. Each lot is proposed to accommodate a residential, live/work units or commercial building as defined by the PDD. A total of 74 residences, 17 live/work units and one commercial building are proposed on the 8.05-acre site. The site has adequate vehicular access with primary access taken from Andreas Road and Calle El Segundo. Thus, the site is physically suited for this type of development.

d. The site is physically suited for the proposed density of development.

The proposed density and FAR is less than that permitted by both the General Plan Tourist Resort Commercial (TRC) and Section 14 REO and RA land use designations. Therefore, the site is physically suited for the proposed density of development.

e. The design of the subdivision is not likely to cause environmental damage or substantially and avoidably injure fish, wildlife, or their habitats.

The Tentative Tract Map and associated Planned Development District have been reviewed under the California Environmental Quality Act, and a Mitigated Negative Declaration is proposed. Mitigation measures have been included which will reduce potential impacts to less than significant levels. The project will therefore not damage or injure fish, wildlife or their habitats.

f. The design of the subdivision or type of improvements is not likely to cause serious public health problems.

The design of the proposed subdivision includes connections to all public utilities including water and sewer systems. The layout of internal private streets provides access to each lot. No serious public health problems are anticipated.

g. The design of the subdivision or type of improvements will not conflict with easements, acquired by the public at large, for access through or use of the property within the proposed subdivision.

There are no known public easements across the subject property; therefore the design of the subdivision will not conflict with easements for access through or use of the property. Any utility easements can be accommodated within the project design.

ENVIRONMENTAL ANALYSIS:

The proposed development is a project as defined by the California Environmental Quality Act (CEQA). An initial study was conducted which considered all required CEQA issues, including but not limited to air quality, cultural resources, land use, hydrology and traffic. Potential significant adverse impacts were identified along with Mitigation Measure that would reduce the potential adverse impacts to less than significant levels. Mitigation measures are noted as follows:

AESTHETICS:

MMI – 1 Project site plans, architectural renderings, and landscape plans shall be revised to address inconsistencies with the development standards and other design requirements of the Section 14 Specific Plan, as determined by the City Council.

CULTURAL RESOURCES:

MM V-1 As there is always a possibility of buried cultural and paleontological resources in a project area, a Native American Monitor(s) shall be present during all ground disturbing activities including clearing and grubbing, excavation, burial of utilities, planting of rooted plants, etc., The Agua Caliente Band of Cahuilla Indian Cultural Office shall be contacted for additional information on the use and availability of Cultural Resource Monitors. Should buried cultural deposits be encountered, the Monitor shall contact the Director of Planning Services. Following consultation, the Director shall have the authority to halt destructive construction and shall notify a qualified archaeologist to investigate the find. If necessary, the qualified archaeologist shall prepare a treatment plan for submission to the State Historic Preservation Officer and Agua Caliente Cultural Resource Coordinator for approval. Human remains discovered shall be handled consistent with state law provisions.

HAZARDS AND HAZARDOUS MATERIALS:

MM VII-1: Prior to the issuance of demolition permits, an asbestos and lead survey shall be conducted by a certified asbestos and lead consultant, and a report shall be provided to the City Building Official. Should asbestos- and/or lead-containing materials be found, the project proponent shall submit to the Building Official a remediation and disposal plan to be conducted by a qualified, licensed specialist in the disposal of hazardous materials. The

plan shall include specifics regarding the method of removal, transport, and disposal for all such materials.

NOISE:

MM XI-1. Demolition and construction activities on-site shall occur only between 7:00 a.m. and 7:00 p.m., Monday-Friday, and 8:00 a.m. and 5:00 p.m. on Saturdays, and shall be prohibited on Sundays and holidays, as specified by the Palm Springs Municipal Code.

MM XI-2. All construction equipment, fixed or mobile, shall be equipped with properly operating and maintained mufflers and the engines shall be equipped with shrouds.

MM XI-3. Stationary equipment shall be placed such that emitted noise is directed away from Andreas Road and Calle El Segundo.

MM XI-4. Stockpiling and vehicle staging areas shall be located as far as practical from Andreas Road and Calle El Segundo.

MM XI-5. Delivery hours should be limited to 7 a.m. to 7 p.m. daily to minimize the potential for adverse impacts on the adjacent Plaza Villas.

The analysis is available for public comment for a 20-day period from February 20, 2015 through March 18, 2015. As of the writing of this report, comments on study have not been received.

PUBLIC COMMENTS:

Chair Hudson opened public comments and with no appearances coming forward public comments was closed.

1. CONSENT CALENDAR:

1A. APPROVAL OF MINUTES: FEBRUARY 11, 2015

ACTION: Approve, as presented.

Motion Vice-Chair Klatchko, seconded by Commissioner Middleton and carried 6-0-1 on a roll call vote.

AYES: Commissioner Calerdine, Commissioner Lowe, Commissioner Middleton, Commissioner Roberts, Commissioner Weremiuk, Vice-Chair Klatchko
ABSTAIN: Chair Hudson.

2. PUBLIC HEARINGS:

2A. O & M HR, LLC (NEXUS DEVELOPMENT CORP.) FOR THE DEMOLITION OF AN EXISTING DEVELOPMENT AND PARKING AREA TO CONSTRUCT "ABERDEEN"; A MIXED-USE PROJECT CONSISTING OF (74) ATTACHED AND DETACHED RESIDENTIAL DWELLINGS, (17) LIVE-WORK UNITS AND APPROXIMATELY 1,568-SQUARE FEET OF RETAIL ON 8.05-ACRES LOCATED AT THE NORTHEAST CORNER OF TAHQUITZ CANYON WAY AND CALLE EL SEGUNDO, ZONE REO AND CU (CASE NOS. 5.1361 PD-375, 3.3820 MAJ AND TTM 36876). (DN)

Associate Planner Newell presented the proposed mixed-use project as outlined in the staff report.

The Commission asked technical questions pertaining to the project in reference to:

- Potential to preserve buildings under historical ordinance;
- Calle Alvarado street improvements;
- Location of the access points and gates;
- Setbacks on Tahquitz Canyon in front of work/live units;
- Pre-wire for solar;
- Setback requirements for Section 14;
- Parking for the cafe and live/work units.

CITY OF PALM SPRINGS
PLANNING COMMISSION MINUTES
February 25, 2015
Council Chamber, City Hall
3200 East Tahquitz Canyon Way
Palm Springs, CA 92262

CALL TO ORDER:

Chair Hudson called the meeting to order at 1:31 pm.

ROLL CALL:

Present:	Commissioner Calerdine, Commissioner Lowe, Commissioner Middleton, Commissioner Roberts, Commissioner Weremiuk, Vice-Chair Klatchko and Chair Hudson
Absent:	None
Staff Present:	Planning Director Fagg, Planning Admin. Coordinator Hintz, Assistant Director of Public Works Khamphou, Associate Planner Lyon, Associate Planner Newell and Principal Planner Robertson

REPORT OF POSTING OF AGENDA:

The agenda was available for public access at the City Hall exterior bulletin board (west side of Council Chamber) and the Planning Services counter by 4:00 pm on Thursday, February 19, 2015.

ACCEPTANCE OF THE AGENDA:

Chair Hudson noted his abstention on the minutes of February 11, 2015.

ACTION: The agenda was accepted, as presented.

Motion Commissioner Middleton, seconded by Commissioner Lowe and unanimously carried on a roll call vote.

AYES: Commissioner Calerdine, Commissioner Lowe, Commissioner Middleton, Commissioner Roberts, Commissioner Weremiuk, Vice-Chair Klatchko, Chair Hudson

Chair Hudson opened the public hearing:

ROB ERES, applicant, Nexus Dev. Corp., said they are not pushing density and height to the maximum. He commented that condition PSP 1. would increase the overall street 12 feet more than what is currently proposed instead they are trying to create an urban development. He requested an action be taken today.

CHRIS PARDO, project architect, spoke about Calle Alvarado, setbacks, height, gates and the pedestrian walkway between townhomes.

The following persons spoke in favor of the proposed project:

TOM ADAMO, property owner, said this project is well below the density requirements and will create jobs; this property can be a trend-setter.

AFTAB DADA, read a letter into the record by Harold Matzner, stating that this project is located in the right location where more foot traffic is needed on Tahquitz. Mr. Dada said, as an owner and partner of the Hilton Hotel, they are in full support of the project.

JAMES CIOFFI, said this is an exciting new development and implored the design team to try to find a way to integrate the existing buildings into the project.

REGGIE CAMERON, said this project speaks to the creativity of artists and is excited to have the mixed-use project at this location.

JUAN-MANUEL ALONSO, said it's important to move forward to the future; this project will have a place for artists.

ANDY CARPIAC, represents Hard Rock Hotel, said there is a demand for this type of development and encouraged the Commission to see past the skepticism of other speakers.

MIGUEL CRIEGO, artist, said this project will open up to the community giving it culture and life.

TERRY HASTINGS, artist council board member, praised the development for creating a solid artistic project. He said this would be a great anchor for the artists and community.

The following persons spoke in opposition to the project:

GARY JOHNS, said the city has a resort lifestyle and does not believe there is the clientele for an urban center.

RON MARSHALL, PS Preservation Foundation, said this property needs to be evaluated as a historic resource and requested an environmental analysis be conducted.

ROBERT IMBER, said that thousands of people come to see the city's heritage of architecture.

JUDY DEERTRACK, said the demolition needs to be compared with adaptive historical re-use.

ROXANN PLOSS, encouraged the idea of adaptive re-use in regards to the existing buildings.

BARBARA MARSHALL, said the plan to demolish this property will injure the city; and encouraged the developer to adaptively re-use the historic resource.

DICK BURKETT, suggested the developer come back with a plan as an option to show the study of the adaptive re-use of the Kaptur building.

PETER MORUZZI, PS Modern Committee, chair, spoke about letters received from architectural experts and encouraged the Commission to read the letters.

DR. MICHAEL MCQUARTER, architect, does not understand why the buildings from good architects are torn down.

FRANK TYSON, said people come here because they like the historic architecture; thinks this project needs substantial work and a full impact study.

HUGH KAPTUR, architect, commented that developers come from big cities with projects that change the environment and village of Palm Springs and requested these buildings be preserved.

ROB ERES, applicant rebuttal, thanked all the public that spoke; and clarified that the Aberdeen project will have 2 car garages as well as driveway parking for 2 vehicles, unlike the Morrison project.

There being no further appearances the public hearing was closed.

Chair Hudson commented that providing space for artists in the city is admirable; however, he questioned the appropriateness of the site; there is very little flexibility to have larger retail businesses along this frontage.

Vice-Chair Klatchko noted the community concern about adaptive re-use and asked the developer if they re-thought keeping the buildings.

RON MARSHALL, PS Preservation Foundation, said this property needs to be evaluated as a historic resource and requested an environmental analysis be conducted.

ROBERT IMBER, said that thousands of people come to see the city's heritage of architecture.

JUDY DEERTRACK, said the demolition needs to be compared with adaptive historical re-use.

ROXANN PI.OSS, encouraged the idea of adaptive re-use in regards to the existing buildings.

BARBARA MARSHALL, said the plan to demolish this property will injure the city; and encouraged the developer to adaptively re-use the historic resource.

DICK BURKETT, suggested the developer come back with a plan as an option to show the study of the adaptive re-use of the Kaptur building.

PETER MORUZZI, PS Modern Committee, chair, spoke about letters received from architectural experts and encouraged the Commission to read the letters.

DR. MICHAEL MCQUARTER, architect, does not understand why the buildings from good architects are torn down.

FRANK TYSON, said people come here because they like the historic architecture; thinks this project needs substantial work and a full impact study.

HUGH KAPTUR, architect, commented that developers come from big cities with projects that change the environment and village of Palm Springs and requested these buildings be preserved.

ROB ERES, applicant rebuttal, thanked all the public that spoke; and clarified that the Aberdeen project will have 2 car garages as well as driveway parking for 2 vehicles, unlike the Morrison project.

There being no further appearances the public hearing was closed.

Chair Hudson commented that providing space for artists in the city is admirable; however, he questioned the appropriateness of the site; there is very little flexibility to have larger retail businesses along this frontage.

Vice-Chair Klatchko noted the community concern about adaptive re-use and asked the developer if they re-thought keeping the buildings.

Chris Pardo said they looked at many options and none were economically viable. Commission Roberts commented that this is a good project - it's attractive and fits well in the area. However, he is struggling with the project because the zoning mix is very complex. The R-1 zoning is not allowed in this area and does not fit anywhere. It feels overly dense for single-family houses. He does not see the public benefit given for the relief that will be granted for this project. He expressed concern with the live/work units because of the lack of parking in the busy corridor. He would like to send this project back to look at the density and suggested one public benefit could be reconditioning an existing building and contribute to the character of the city.

Commissioner Middleton said she likes what this project does away from Tahquitz but does not see the public benefit for the relief given. She is most impressed with the connection created by the Calle Alvarado extension from Tahquitz to the Convention Center and would like to see a 2-way street. She would like to see the Kaptur buildings preserved. She said the 6' setback on Tahquitz is very crammed with tight spaces. She appreciates the setbacks on Andreas and would like to see the project pushed back from Tahquitz to create more space.

Commissioner Calerdine congratulated the design team and asked questions in reference to the roof deck space. He questioned if some of the live/work units could be brought around the corner on El Segundo and Tahquitz to allow some preservation of existing buildings. He preferred to see Calle Alvarado as a full use street, vehicular gates (parking will be used when conventions are in town) and agreed that a degree of building preservation should be maintained.

Commissioner Lowe expressed concerns about parking on the live/work space on Tahquitz Canyon. He agreed that Called Alvarado would work better as a two-way street.

Rob Eres said they are open to having Calle Alvarado as a two-way street and respectfully requested for an action on this project.

Chair Hudson commented that the most important thing about this project is the preservation of at least a portion of the buildings. He expressed concern with the setbacks on Tahquitz Canyon and thinks this is one location in the city that can handle high density if it were done in a more creative way.

Commissioner Weremiuk spoke about the Section 14 design guidelines and the importance of the Tahquitz Canyon presence. She expressed concern with the setbacks and viability of the live/work units, and would like to see more community public benefit. She noted that one public benefit could be the preservation of one of the Kaptur buildings.

Commissioner Roberts said that he does not a have problem and made the following motion.

ACTION: To continue to a date uncertain to allow the applicant to work with staff in making the following modifications to the project:

- Density / height - justification.
- Distance between buildings - 10 feet.
- Calle Alvarado - a two-way street.
- Viability of live/work (configuration)
- Public benefit - (preserve and consider study)
- Solar panels.
- Consider live/work units on side streets.

Motion Commissioner Roberts, seconded by Commissioner Weremiuk and unanimously carried on a roll call vote.

AYES: Commissioner Calerdine, Commissioner Lowe, Commissioner Middleton, Commissioner Roberts, Commissioner Weremiuk, Vice-Chair Klatchko, Chair Hudson

Commissioner Calerdine noted that the Tribe's conservation plan fees were dropped and requested staff look into applying the CVMSHCP fees.

A recess was taken at 3:38 pm.

The meeting resumed at 3:47 pm.

2B. 750 LOFTS, LLC FOR A MIXED-USE HOTEL DEVELOPMENT ON A 1.13-ACRE PARCEL LOCATED AT 750 NORTH PALM CANYON DRIVE ZONE C-1 / R-3 / PD 104 / RESORT COMBINING ZONE / LAS PALMAS BUSINESS HISTORIC DISTRICT (HD-1) (CASE NOS. 5.1350 PDD 374 / GPA / CUP AND 3.3795 MAJ). (KL)

Associate Planner Lyon provided an overview of the proposed mixed-use hotel as outlined in the staff report.

The Commission asked further clarification on issues relating to:

- Capture rates for valet parking at the Colony Palms.
- Parking survey to determine the whether the rest of the Uptown area is adequately parked.
- Reciprocal parking agreement with Colony Palms for the existing 750 lot.

Commissioner Roberts said that he does not a have problem and made the following motion.

ACTION: To continue to a date uncertain to allow the applicant to work with staff in making the following modifications to the project:

- Density / height - justification.
- Distance between buildings - 10 feet.
- Calle Alvarado - a two-way street.

DICK BURKETT, suggested the developer come back with a plan as an option to show the study of the adaptive re-use of the Kaptur building.

PETER MORUZZI, PS Modern Committee, chair, spoke about letters received from architectural experts and encouraged the Commission to read the letters.

DR. MICHAEL MCQUARTER, architect, does not understand why the buildings from good architects are torn down.

FRANK TYSON, said people come here because they like the historic architecture; thinks this project needs substantial work and a full impact study.

HUGH KAPTUR, architect, commented that developers come from big cities with projects that change the environment and village of Palm Springs and requested these buildings be preserved.

ROB ERES, applicant rebuttal, thanked all the public that spoke; and clarified that the Aberdeen project will have 2 car garages as well as driveway parking for 2 vehicles, unlike the Morrison project.

There being no further appearances the public hearing was closed.

Chair Hudson commented that providing space for artists in the city is admirable; however, he questioned the appropriateness of the site; there is very little flexibility to have larger retail businesses along this frontage.

Vice-Chair Klatchko noted the community concern about adaptive re-use and asked the developer if they re-thought keeping the buildings.

Chris Pardo said they looked at many options and none were economically viable. Commission Roberts commented that this is a good project - it's attractive and fits well in the area. However, he is struggling with the project because the zoning mix is very complex. The R-1 zoning is not allowed in this area and does not fit anywhere. It feels overly dense for single-family houses. He does not see the public benefit given for the relief that will be granted for this project. He expressed concern with the live/work units because of the lack of parking in the busy corridor. He would like to send this project back to look at the density and suggested one public benefit could be reconditioning an existing building and contribute to the character of the city.

Commissioner Middleton said she likes what this project does away from Tahquitz but does not see the public benefit for the relief given. She is most impressed with the connection created by the Calle Alvarado extension from Tahquitz to the Convention Center and would like to see a 2-way street. She would like to see the Kaptur buildings preserved. She said the 6' setback on Tahquitz is very crammed with tight spaces. She appreciates the setbacks on Andreas and would like to see the project pushed back from Tahquitz to create more space.

Commissioner Calerdine congratulated the design team and asked questions in reference to the roof deck space. He questioned if some of the live/work units could be brought around the corner on El Segundo and Tahquitz to allow some preservation of existing buildings. He preferred to see Calle Alvarado as a full use street, vehicular gates (parking will be used when conventions are in town) and agreed that a degree of building preservation should be maintained.

Commissioner Lowe expressed concerns about parking on the live/work space on Tahquitz Canyon. He agreed that Called Alvarado would work better as a two-way street.

Rob Eres said they are open to having Calle Alvarado as a two-way street and respectfully requested for an action on this project.

Chair Hudson commented that the most important thing about this project is the preservation of at least a portion of the buildings. He expressed concern with the setbacks on Tahquitz Canyon and thinks this is one location in the city that can handle high density if it were done in a more creative way.

Commissioner Weremiuk spoke about the Section 14 design guidelines and the importance of the Tahquitz Canyon presence. She expressed concern with the setbacks and viability of the live/work units, and would like to see more community public benefit. She noted that one public benefit could be the preservation of one of the Kaptur buildings.

Commissioner Roberts said that he does not a have problem and made the following motion.

ACTION: To continue to a date uncertain to allow the applicant to work with staff in making the following modifications to the project:

- Density / height - justification.
- Distance between buildings - 10 feet.
- Calle Alvarado - a two-way street.
- Viability of live/work (configuration)
- Public benefit - (preserve and consider study)
- Solar panels.
- Consider live/work units on side streets.

Motion Commissioner Roberts, seconded by Commissioner Weremiuk and unanimously carried on a roll call vote.

AYES: Commissioner Calerdine, Commissioner Lowe, Commissioner Middleton, Commissioner Roberts, Commissioner Weremiuk, Vice-Chair Klatchko, Chair Hudson

Commissioner Calerdine noted that the Tribe's conservation plan fees were dropped and requested staff look into applying the CVMSHCP fees.

A recess was taken at 3:38 pm.

The meeting resumed at 3:47 pm.

2B. 750 LOFTS, LLC FOR A MIXED-USE HOTEL DEVELOPMENT ON A 1.13-ACRE PARCEL LOCATED AT 750 NORTH PALM CANYON DRIVE ZONE C-1 / R-3 / PD 104 / RESORT COMBINING ZONE / LAS PALMAS BUSINESS HISTORIC DISTRICT (HD-1) (CASE NOS. 5.1350 PDD 374 / GPA / CUP AND 3.3795 MAJ). (KL)

Associate Planner Lyon provided an overview of the proposed mixed-use hotel as outlined in the staff report.

The Commission asked further clarification on issues relating to:

- Capture rates for valet parking at the Colony Palms.
- Parking survey to determine the whether the rest of the Uptown area is adequately parked.
- Reciprocal parking agreement with Colony Palms for the existing 750 lot.

Chair Hudson opened the public hearing:

JAMES CIOFFI, project architect, provided additional information regarding the parking, crosswalk, architectural drawings, grade change across the site, and building elevations.

MARVIN ROOS, MSA Consulting, requested removal of engineering conditions #2 and #8 asking for additional dedication and #29 a requirement to pay flood control fees - this would be worked out with Engineering staff.

WALTER HAAK, Movie Colony Hotel, owner, spoke in favor of this project; does not have a problem with the height or setbacks. He likes the passage ways and the interesting architecture fits the modernism concept of Uptown.

DOUG JONES, spoke in favor of the proposed project.

TEE JONES, spoke in favor of the project.

DAVID DOYLE, resides in Movie Colony, read a letter by William Wicom, expressing opposition to the project citing concerns with the lack of parking, amplified roof-top music and obstruction of mountain views.

GARY JOHNS, spoke in support of the project.

DAVID JONKLEINTL, read a letter on behalf of MICHAEL BECKMAN, in support of the project and spoke on his own behalf in support of the project.

SARA FRITH, resides in Movie Colony, spoke in opposition of the proposed project.

ROXANN PLOSS, spoke in opposition of the proposed project.

STEVEN SIMMS, Go Bike USA, requested bike paths, better sidewalks and slowing down the traffic on Palm Canyon and Indian Canyon because these streets are a hazard for cyclist and pedestrians.

DR. MICHAEL MCQUARTER, spoke in favor of the project.

JUDY DEERTRACK, spoke in opposition of the proposed project.

SCOTT SEIBERLING, spoke in opposition of the proposed project.

FELIPE CASTANADA, Los Arboles Hotel, owner, spoke in opposition of the project citing concerns with blocking views, height and density. He requested story poles be placed on the site for more than several hours and the lack of public noticing for the project.

FRANK TYSEN, spoke in opposition of the project.

JAMES CIOFFI, said that this project will add vibrancy to the neighborhood and at least 30 added cars could be parked in the lot using valet parking.

There being no further speakers the public hearing was closed.

Commissioner Weremiuk expressed concern with the retail portion; it does not appear to be the right fit for the frontage on Palm Canyon.

Commissioner Middleton spoke in support of the project - it is well designed for this difficult site. She expressed concern with the parking and lack of public benefit - she requested a condition be added to have the photovoltaic system installed.

Commissioner Weremiuk has concerns with the potential for noise from the rooftop bar, lack of shade structures on Palm Canyon and height. She requested the landscape plan return for review citing concerns with the proposed use of thorny plants near sidewalks.

Commissioner Roberts said he likes how this project opens up on Indian Canyon; however, he is struggling with the under-parking and density. He suggested removing one floor or moving it back from the sidewalk.

Chair Hudson commented that this site cannot solve all the parking problems of Uptown; this is a district-wide issue that needs separate study by the City. He thinks the building steps back adequately from Indian Canyon and likes the pathways with landscaping through the parking lot. He said the biggest issue is the rooftop use which can be mitigated by limiting decibel levels or designing architectural sound screens. He said buildings in the Historic District have many variations in height and this is what makes the district successful. He agrees with the bicycling hazards on Indian Canyon and would like to see further study of Indian Canyon Drive including median and pedestrian amenities along the entire street.

Commissioner Lowe concurred with Chair Hudson and said it would be a tremendous improvement to the neighborhood. He expressed concern with rooftop noise and recommended adding mitigation measures.

Commissioner Weremiuk expressed support for the project because it adds hotel rooms and more people to the district who will support the businesses in the area.

ACTION: To approve subject to conditions as amended:

- The rooftop bar shall comply with City Noise Ordinance for residential uses and those limits should be included in the conditions.

- Land Use Permit required for outdoor dining.
- Land Use Permit required for rooftop bar including noise mitigation measures.
- Validated valet parking system with site plan showing proof of added parking capacity on site in parking lot drive aisles.
- Install the photo voltaic system as an aspect of public benefit, not simply pre-wire.

Motion: Commissioner Calerdine, seconded by Commissioner Middleton and unanimously carried on a roll call vote

AYES: Commissioner Calerdine, Commissioner Lowe, Commissioner Middleton, Commissioner Roberts, Commissioner Weremiuk, Vice-Chair Klatchko, Chair Hudson

3. NEW BUSINESS:

3A. WOODRIDGE PACIFIC GROUP, LLC REQUESTS FOR A MAJOR ARCHITECTURAL APPROVAL FOR THE CONSTRUCTION OF 40 SINGLE-FAMILY RESIDENTIAL HOMES ON APPROXIMATELY 20-ACRE VACANT PARCEL LOCATED AT 665 WEST RAMON ROAD; ZONE R-1-C (CASE NO. 3.3802-MAJ). (ER)

Principal Planner Robertson presented the proposed project as outlined in the staff report.

TODD CUNNINGHAM, Woodbridge Pacific Group, president, provided details on the project.

The Commission questioned and/or commented on:

- The paseo connection.
- The glass garage doors.
- The structure of the shed roof.
- Add a condition that gates are prohibited.

ACTION: Approve subject to conditions, as amended:

- Gates are prohibited for this project including the paseo.

Motion Commissioner Roberts, seconded by Commissioner Lowe and unanimously carried on a roll call vote.

AYES: Commissioner Calerdine, Commissioner Lowe, Commissioner Middleton, Commissioner Roberts, Commissioner Weremiuk, Vice-Chair Klatchko, Chair Hudson

PLANNING COMMISSION REPORTS, REQUESTS AND COMMENTS:

No comments.

PLANNING DIRECTOR'S REPORT:

Director Fagg reported that a study session is anticipated on March 11, 2015.

ADJOURNMENT:

The Planning Commission adjourned at 5:47 pm to 1:30 pm on Wednesday, March 11, 2015, City Hall, Council Chamber, 3200 East Tahquitz Canyon Way.

Flinn Fagg, AICP
Director of Planning Services

PLANNING COMMISSION STAFF REPORT

DATE: February 25, 2015

SUBJECT: O & M HR, LLC (NEXUS DEVELOPMENT CORP.) FOR THE DEMOLITION OF AN EXISTING DEVELOPMENT AND PARKING AREA TO CONSTRUCT "ABERDEEN"; A MIXED-USE PROJECT CONSISTING OF (74) ATTACHED AND DETACHED RESIDENTIAL DWELLINGS, (17) LIVE-WORK UNITS AND APPROXIMATELY 1,568-SQUARE FEET OF RETAIL ON 8.05-ACRES LOCATED AT THE NORTHEAST CORNER OF TAHQUITZ CANYON WAY AND CALLE EL SEGUNDO, ZONE REO AND CU (CASE NOS. 5.1361 PD-375, 3.3820 MAJ AND TTM 36876).

FROM: Department of Planning Services

SUMMARY

The Planning Commission will review the following applications related to the 8.05-acre site:

- A Planned Development District to establish the project site plan, permitted uses and development standards. The PD proposes razing the existing parking lot and office buildings to construct:
  - 1,568-square feet of commercial space at the southwest corner of the site;
  - 17 detached dwellings with associated commercial space (live-work lofts) fronting Tahquitz Canyon Way;
  - 74 attached and detached residential units within a controlled access / gated area with private open space;
  - A common open space / recreation area with pool, fitness center and barbecue area.
- Major Architectural Application to review the proposed architectural designs. Plans include Preliminary and Final Development Plans.
- A Tentative Tract Map (TTM) seeking to subdivide the roughly 8.05-acres into 93 numbered lots and 8 lettered lot streets, and common open space.

RECOMMENDATION:

Recommend the City Council adopt the mitigated negative declaration and approve the project, subject to conditions. Specific conditions related to the alteration of the current proposal include:

1. Revise the internal street widths to conform to the Section 14 Specific Plan and General Plan minimum required widths for private streets [28 feet (rolled curb to curb) with 5 foot landscape buffer and 5 foot sidewalks].
2. Modify the extension of Calle Alvarado to satisfactorily meet width requirements of City Engineer and Fire Department.
3. Provide unlocked pedestrian access through center of site and at all vehicular access gates.
4. Prohibit residential uses in structures fronting Tahquitz Canyon Way.
5. Include bicycle parking as required by the Section 14 Specific Plan.
6. Provide trash enclosure for commercial building.
7. Consider providing Plug-in Electric Vehicle (PEV) parking spaces as required by the Section 14 Specific Plan.
8. Redesign streetscape along Tahquitz Canyon to be consistent with the Section 14 Specific Plan with the inclusion of street furniture and identification of Indian public art locations.

ISSUES:

1. The project is inconsistent with the General Plan which prohibits gated communities.
2. The internal roadways are inconsistent with the General Plan minimum profile for private streets in Planned Developments and lack sidewalks.
3. Single family residential is prohibited within the REO and RA zones, but multi-family is permitted with the approval of a Conditional Use Permit in both zones.
4. Pools within individual lots do not meet five foot setback requirements of zoning code.
5. Bicycle parking is required for all new developments in Section 14.
6. Landscape along Tahquitz Canyon Way inconsistent with design guidelines of Specific Plan.

BACKGROUND:

TABLE 1: Most Recent Change of Ownership	
Aug 2007 Feb 2008 Dec 2014	Parcels purchased by present owner.

TABLE 2: Related Relevant City Actions by Planning, Fire, Building, etc...	
Jan 12, 2015	The Architectural Advisory Committee (AAC) tabled the project with direction to the applicant to modify the following: 1. Architecture along Tahquitz is too monotonous, lacks interest and out of scale and context; 2. Parking needs further evaluation for commercial and live-work; 3. Circulation – Increase pedestrian amenities (i.e. landscaping, wider sidewalk, etc.) along extension of Calle Alvarado; 4. Connectivity – Eliminate gates and improve connectivity of project within existing community; 5. Adaptive re-use of existing commercial buildings should be considered in redesign.
Jan 26, 2015	The AAC recommended denial as proposed. The Committee found that the project does not conform to adopted standards, and recommended the following modifications: 1. Study alternatives along Tahquitz Canyon Way; 2. Provide streetscape along El Segundo; 3. Address Calle Alvarado traffic, parking and circulation issues; 4. Resubmit planting diagrams.

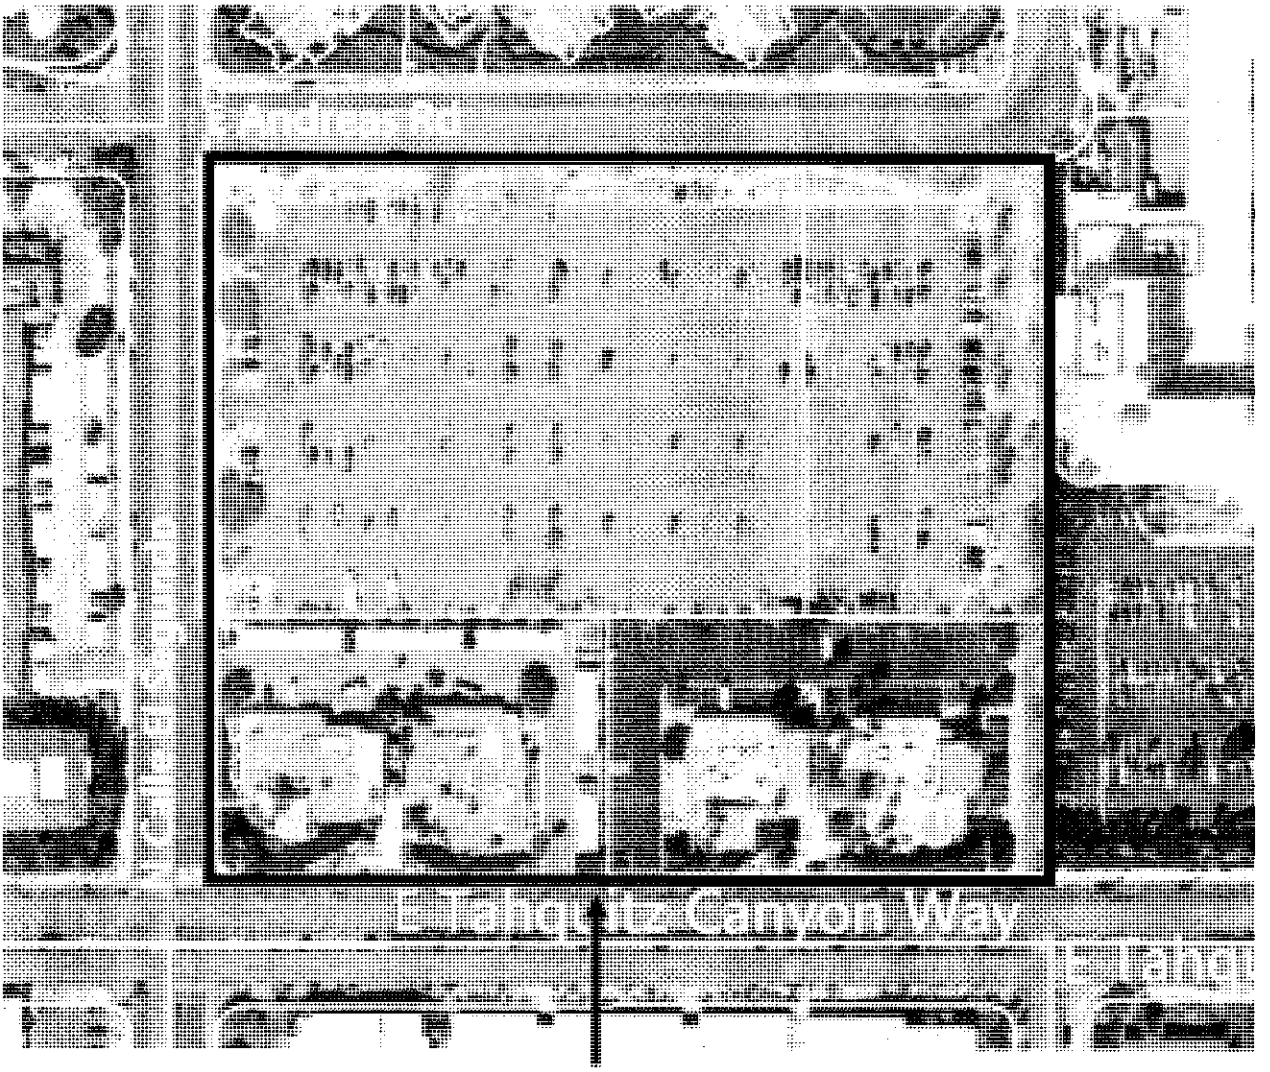
TABLE 6: Site Area	
Net Area	8.05 acres



SUBJECT SITE

TABLE 7: General Plan, Zoning and Land Uses of Site & Surrounding Areas			
	Existing General Plan Designations	***Existing Zoning Designation***	***Existing Land Use***
Site	TRC (Tourist Resort Commercial)	RA (Resort Attraction) and REO (Retail / Entertainment / Office)	Office Buildings and Prairie Schooner Parking Lot
North	HDR (High Density Residential	HR (Residential High)	Multi-family Residential Condominiums (Plaza Villas)
South	TRC	REO	Commercial Complex (Courtyard at PS)
East	TRC	RA	Resort Hotel (Renaissance)
West	TRC	RA	Resort Hotel (Hilton)

PROJECT DESCRIPTION:

The site is comprised of five developed parcels totaling roughly 9.1 gross acres in size and bounded by Tahquitz Canyon Way to the south, Calle El Segundo to the west, Andreas Road to the north and the Renaissance Hotel to the east. After street dedication and the extension of Calle Alvarado, the net acreage of the project area is 8.05-acres in size. The site encompasses the "Prairie Schooner" parking lot, which is being sold by the City to the developer, and the existing office buildings along Tahquitz Canyon Way. All will be razed for the proposed development.

The applicant is proposing a partially gated development for 74 three- and four-story, attached and detached single family residential units on small lots each with its own private spa / pool and two-car garage. These units will have primary vehicular access from Andreas Road. The non-gated portion of the development includes a one-story, 1,568-square foot commercial building and 17 three- and four-story, detached single-family live-work units with vehicular access from a private street extending from Calle El Segundo to the proposed extension of Calle Alvarado.

ANALYSIS:

TABLE 8: General Plan

General Plan Topic	F.A.R. and Density	Request	Compliance
Land Use: Tourist Resort Commercial	0.35 FAR / 43 hotel rooms per acre / 86 hotel rooms per acre on Indian Land / 30 d.u. per acre	11.3 du/ac 0.35 FAR for commercial building	Yes
Gated Communities	CD14.6: Prohibited	Gated requested	No
Pedestrian-oriented Design	CD19.7 Sidewalks, shade trees, sitting areas	No sidewalks along residential street	Partially
Minimum 28 foot street width in private developments	Page 4-5 Circulation Element	26 feet	No

TABLE 9: Zoning

Permitted Uses:

Single-family residential units are prohibited in REO (Retail / Entertainment / Office) and RA (Resort Attraction) Section 14 Land Use designations. The proposed small-lot residential use is similar to multi-family residential (MFR) due to a majority of units being attached. MFR is permitted by Conditional Use Permit (CUP) in both designations.

Retail including coffee shops, deli, etc. is permitted within the RA Land Use of the Section 14 Specific Plan.

Live/work units are permitted by Land Use Permit and CUP in the REO and RA zones, respectively.

The PDD has been submitted in lieu of a change of zone to seek City approval of all uses as a consolidated project per the Section 14 Specific Plan.

Development Standards:

The project includes three land uses within the PD. When multi-family residential is proposed within the REO or RA zones, the Specific Plan requires development consistent with the HR land designation. The live-work and commercial space are located within the REO land designation. Thus, staff analyzed the HR designation development standards for the multi-family residential portion, and the REO designation development standards for the live-work and commercial components.

Since this proposal exceeds five acres in size, the development is a Consolidated Project and can utilize incentives including zoning flexibilities. Where applicable, staff has included in the analysis below.

Multi-family Residential

	HR Requirements / R-4	Proposed Project	Conform
Lot Standards			
Min. Area	2 gross acres / 130' wide / 155' deep, except lot size requirements may be reduced for single-family residential development if it can be demonstrated through the CUP process that the reductions are necessary and desirable, and are not detrimental to neighboring uses (existing and permitted)	Range from 2,563sf and 4,813sf	No, per PDD
Min. Width		Range from 21ft to 30ft	
Min. Depth		Range from 107ft to 111ft	
Building Height	35ft, except when developed as high-rise, pursuant to Section 94.03.00 of Palm Springs Zoning Ordinance (PSZO) – see analysis below in Live/Work and Commercial section.	Range from 33 feet to 46 feet	See live/work analysis
Density	1,500 sq. ft. of lot area per unit	11 du/ac or 3,853 sq. ft. per unit	Yes
Yard Setbacks			
Overall Site			
- Front	30 ft. front yard	- 24ft from north (front) property line	No per PDD
- Side	20 ft. side yard	- 15ft from west (side) property line	
- Side	20 ft. side yard	- 43ft from east (side) property line	Yes
- Rear	20 ft. rear yard	- 145ft from south (rear) property line	Yes

Individual Lots	Setback requirements may be reduced for single-family residential development if it can be demonstrated through the CUP process that the reductions are necessary or desirable, and are not detrimental to neighboring uses (existing and permitted)	Front / Driveways: 18 feet from private street to face of garage Side: 6ft between residences (Avg. 3ft to common side P/L) 0ft at one side of homes. Rear: 27 to 40ft	Yes when certain findings are made
Lot Coverage	45% usable landscaped open space	Usable open space: 48%	Yes
Off-street Parking	Per PSZC 93.06: In PDDs: 3 bdrm units require 2.25 spaces or 167 spaces for the units, plus guest parking 1 space for every 4 units, or 19 spaces; total 186 spaces required	2 covered spaces are provided with each of the 74 units (148 spaces) + 2 spaces in front of garage on driveways (148 spaces); total 296 spaces	Yes
Trash Enclosure	Per PSZC 93.07.02	TBD	-

Live / Work and Commercial

	REO Requirements	**Proposed Project**	**Conform**
FAR	3.0 Maximum Floor Area Ratio	1.26 FAR	Yes
Building Height	35ft, except 100ft for high-rise	46ft and 2in	Yes
Open Space	40% minimum landscape area for high-rise buildings	~48%	Yes
Compatibility w/Surrounding Development	The rear and side walls of buildings which are visible from adjacent lots or streets shall be treated with an equivalent design quality as the front wall.	Perimeter wall treatment to be designed.	TBD
Building Location	Buildings should be as close as possible to the required front setback	Live/work units have workspace / retail adjacent to front setback	Yes
Pedestrian Access	Direct pedestrian access shall be provided from buildings to the sidewalks on Tahquitz Canyon Way	Pedestrian access to workspace / retail is provided to each work unit	Yes
Front Setback	20 feet	6 feet	No, per PDD
Side Yard Setback	20 feet	0 feet on Calle El Segundo 7 feet on Calle Alvarado	No, per PDD
Rear Yard Setback	20 feet	18 feet from property line to garage	No, per PDD
Setbacks for High-Rise Buildings	High-rise buildings within Section 14 are exempt from the setback requirements identified in 93.04.00 of the PSZO; however, high-rise buildings	Buildings are setback over 100 feet from residential property to the north	Yes

	shall have a minimum setback of one (1) foot of horizontal setback distance from any residential district for each one (1) foot of vertical rise of the building. Additional site-specific setbacks may be imposed through the CUP process based on the relationship of the high-rise building to its surroundings.		
Minimum Lot Area	2 gross acres	8 gross acres for overall project	Yes
Off-street Parking	Commercial: 1 space per 250 gross floor area or 6 spaces. Live-work: No standard specified; however, in PDDs 3 bdrm units require 2.25 spaces or 38 spaces for the units, plus guest parking of 1 space for every 4 units, or 4 spaces. Total required: 48 spaces	15 parallel parking spaces on private driveway. At least one handicap space will be required 2 covered spaces are provided with each of the 17 units (34 spaces) + 2 spaces in front of garage on driveways (34 spaces) Total provided: 83 spaces	Yes
Off-street Loading	Not required for commercial spaces less than 3,000-sq. ft. in size	None provided	Yes

Flexible Zoning Standards: Since the project meets the definition of a Consolidated Project, the Section 14 Specific Plan allows flexible zoning standards as a development incentive. Consolidated project sites designated RA or REO may be developed under either RA or REO land use designations. As noted in the table above, the proposed structures are three- and four-stories in size and reach heights of up to 46 feet and 2 inches, triggering the "high-rise buildings" ordinance, Section 94.03.00 of the Zoning Code. The project proponent is seeking approval to allow the flexibility of the proposed height for the entire project site, which conforms to the REO / RA "Building Height" requirements.

These structures are located along a corridor that contains hotels ranging from three- to five-stories in height. The existing residential project to the north of the site contains two-story condominiums. Therefore, the transition from two-story residential to the north to the proposed three- and four-story development along Tahquitz Canyon Way is consistent with nearby and surrounding developments.

Specific Plan Design Guidelines:

Chapter 7 of the Specific Plan includes Design Guidelines for development proposals within Section 14.

Architectural Character: Modern architecture is a theme that is welcomed by the Specific Plan and the following features are suggested for 50s/60s Modern:

- *Skewed, angular roof forms;*
- *Angled, cantilever roof extensions;*
- *Extension of flooring to walls to outdoors;*
- *Bold, eye-catching accent colors;*
- *Large expanses of glass;*
- *Smooth, uninterrupted walls, often free-standing;*
- *Modern metals, such as aluminum, as decoration.*

The Plan also suggests incorporating Cahuilla imagery and symbols. Images would include baskets, pottery and hunting. Symbols are regional fauna and flora, parallel lines, anthropomorphic figures, trident forms, concentric circles, maze-like patterns and lightning bolts.

The proposal includes some of the above-mentioned features, such as cantilever roof extensions, extension of flooring to walls and outdoors and modern metals.

Materials and Colors: A number of materials are encouraged:

- *Stucco walls in off-white and/or muted tones;*
- *Wood highlights;*
- *Terra cotta or ceramic tile roofs;*
- *Built-up roof with parapets and metal or canvas awnings;*
- *Decorative ceramic tiles;*
- *Stone, such as flagstone, marble, travertine, granite;*
- *Decorative metal highlights, such as aluminum, copper, wrought iron.*
- *Smooth finish stucco; for example, exterior stucco, applied with a smooth trowel finish and painted with elastomeric paint is preferred.*
- *Screed expansion joints are favored, which are integrated with the design of windows and doors.*
- *Pre-cast concrete panels for structures taller than two stories.*

- *Cut stone, tile or other smooth, durable material on the ground level (the base) for visual interest at the street level and for ease of graffiti removal.*
- *Wood, steel or aluminum and clear glass on storefronts, windows, doors, or atrium spaces.*
- *Use of light or medium neutral colors on buildings is preferred over dark colors which tend to absorb heat and make a building appear more bulky. Strong colors may be used for accents on awnings, door trim, window mullions, window trim, towers or pedestrian amenities, provided such colors are clearly secondary to a more neutral base color.*

Materials include stucco walls, vertical aluminum panels, faux wood siding anodized aluminum windows and steel cable and beams. Colors include a mix of light and dark throughout the project. The proposed colors are both light and dark grays with some wood-like appearance. Since the initial review by the AAC, the project colors have been modified to reduce bulky appearance of the upper floors.

Massing / Building Bulk: "Structures should be articulated in form and should not be designed as single massive blocks. To reduce bulk and create visual interest, buildings, particularly those over two stories, should employ architectural devices such as stepped terraces, changes in vertical and horizontal planes, varied roof heights, and multi-planed roof forms." The Specific Plan provides additional design discussion related to pedestrian interest, building entrances, street corner articulation, design treatment on every façade and blank planar walls. The proposal meets many of these criteria with stepped / terraced buildings and varied roof plans and shapes.

Tahquitz Canyon Way: The Plan identifies Tahquitz Canyon Way as the "Grand Boulevard of Indian Culture" and provides recommendations on landscaping, lighting and streetscape. The proposed preliminary landscape design includes a formal pattern of two palms and two street trees along Tahquitz Canyon Way, which is consistent with the landscape envisioned along this boulevard. However, existing palms should be replaced with Washingtonia Filifera as identified in Design Guidelines. The sidewalk should include pedestrian amenities, such as new pedestrian scale lighting, street furniture and banners. Staff has included a condition in the draft resolution requiring compliance with additional pedestrian amenities.

AAC Review:

The Architectural Advisory Committee reviewed the project on two occasions and ultimately recommended denial of the project. The Board made a finding that the project does not conform to adopted standards, and recommended the following modifications:

1. Study alternatives along Tahquitz Canyon Way;

2. Provide streetscape along El Segundo;
3. Address Calle Alvarado traffic, parking and circulation issues;
4. Resubmit planting diagrams.

The applicant has modified both ends of the newly proposed Calle Alvarado extension with turf block reduce the appearance as a two-way street. No further changes to project have been proposed to address the above.

Discussion of Public Benefit:

Pursuant the City Council 2008 policy on Public Benefit on Planned Developments, the applicant is to propose some form of public benefit "*proportional to the nature, type and extent of the flexibility granted from the standards and provisions of the Palm Springs Zoning Code*" and may only be considered a public benefit "*when it exceeds the level of improvement needed to mitigate a project's environmental impacts or comply with dedication or exactions which are imposed on all projects such as Quimby Act, public art fees utility undergrounding, etc.*"

The applicant is seeking the following relief via the Planned Development District:

- Reduced setbacks
- Reduced lot area, depth and width

The applicant has proposed the following Public Benefits:

- Creating connectivity between convention center and Tahquitz Canyon Way through the extension of Calle Alvarado (private street);
- Reduction of site from 9.8-acres to 8.05-ares to accommodate new private street, Calle Alvarado;
- Construction of an art walk plaza located in the center of the southerly portion of project with pedestrian access from Tahquitz Canyon Way;
- The project itself as it enhances an "underutilized site" within Section 14.

REQUIRED FINDINGS:

The project was evaluated against the findings for the Resort Combining Zone pursuant to PSZC 92.25.00, the Planned Development District in lieu of Change of Zone pursuant to PSZC 94.03, 94.07 (Zone Change) and 94.02 (Conditional Use Permit) and the Tentative Tract Map pursuant to Municipal Code Section 9.62 (Maps) as follows:

Resort Combining Zone Findings:

The "R" resort overlay zone is intended primarily to provide for accommodations and services for tourists and visitors while guarding against the intrusion of competing land uses.

The Resort Combining Zone runs along Palm Canyon Drive for nearly its entire length through the City, as well as through the heart Section 14 along Tahquitz Canyon Way from Amado Road to Arenas Road. The subject site lies within this overlay zone.

The zoning code notes that:

> *Uses shall be as provided in the underlying zone with which the "R" zone is combined, except that:...All multiple-family dwellings (including, but not limited to, apartments, group housing projects, boarding and lodging houses, and condominiums) shall be permitted only by conditional use permit (CUP).*

The proposed development will have a Homeowners Association (HOA) that will function much like a condominium association to maintain the common areas of the development. As such the project is evaluated against the findings for a CUP herein[1] and the resort combining finding as follows:

> *Such permit is subject to the planning commission making findings that the proposed use is compatible with its surroundings and that the site in question is not appropriate for other uses allowed by right within the underlying zone.*

The mixed-use development proposes commercial and live/work units along a highly-traveled commercial corridor (Tahquitz Canyon Way). Development along this corridor primarily includes commercial-retail and hotel uses. The proposed use continues the commercial theme with residential located behind the commercial / live/work units, which is compatible with surrounding development. The mix of uses provides an appropriate balance for the site. Staff believes the proposed project is consistent with this finding.

Planned Development in lieu of Change of Zone:
The commission in recommending and the council in reviewing a proposed change of zone, shall consider whether the following conditions exist in reference to the proposed zoning of the subject property:

[1] Pursuant to PSZC 94.02.00.A.4 (CUP); the CUP may be incorporated into the PDD without the need for a separate application. Thus the CUP findings of PSZC 94.02 and the Zone Change findings of PSZC 93.07 are both evaluated as integral parts of the PDD application.

1. The proposed change of zone is in conformity with the general plan map and report.

The proposed project is located in the Tourist Resort Commercial (TRC) (FAR of 0.35 and density of up to 30 units per acre) land use designation of the General Plan. The mixed-use project proposes 11.8 residential dwelling units per acre and a FAR of 0.35, which is consistent with the land use designation.

2. The subject property is suitable for the uses permitted in the proposed zone, in terms of access, size of parcel, relationship to similar or related uses, and other considerations deemed relevant by the commission and council.

The proposed project is located in the REO and RA land designations of Section 14, which describes these designations as follows:

Specialty Retail-Entertainment-Office (REO) - This designation allows for the integration and concentration of large-scale specialty retail, restaurant, entertainment and office development along portions of Tahquitz Canyon Way and Indian Canyon Drive and emphasizes a pedestrian-transit focus.

Resort-Attraction (RA) - This designation allows for large-scale resort hotel complexes, hotels, and major commercial recreation attractions integrated with retail and entertainment facilities.

The PDD is proposed to change the split zoning to a single PD zone designation with its own development standards. Specific Uses requested for approval for the PDD include attached and detached residential townhomes, live/work units and freestanding retail-commercial with outdoor dining. Additional uses consistent with the REO land designation may be considered within the commercial space and workspace of the live/work units, except residential dwelling is prohibited in structures along the street front. The project conforms to this finding.

Vehicular access to the residential portion of project is provided from Andreas Road. The live/work and commercial space is accessed from Calle El Segundo and the extension of Calle Alvarado. The project proposes a mix residential, commercial and live/work that is harmonious with adjacent uses in the vicinity. Thus, the project conforms to this finding.

3. The proposed change of zone is necessary and proper at this time, and is not likely to be detrimental to the adjacent property or residents.

The proposed PDD in lieu of zone change has been evaluated against the development standards for the Section 14 land designations, the Resort Combining Zone and

architectural review. While the applicant is seeking setback deviations, the project is harmonious with the existing surrounding development. It continues the pedestrian experience along Tahquitz Canyon Way and introduces commercial uses along the street frontage which is desirable. The project height is consistent with development along the Tahquitz Canyon Way boulevard and is therefore not detrimental to adjacent properties. The project conforms to this finding.

Conditional Use Permit / Planned Development District Findings:
In addition to the findings for the PDD in lieu of a change of zone (from PSZC Section 93.07), the PDD incorporates the findings of the CUP (PSZC 94.02.00) for residential uses in the Resort Combining Zone as follows:

> *The commission shall not approve or recommend approval of a conditional use permit unless it finds as follows:*
>
> *a. That the use applied for at the location set forth in the application is properly one for which a conditional use permit is authorized by this Zoning Code;*

The mixed use project incorporates residential, live/work units and commercial space with the proposed zoning, PD-375. The current Section 14 land designations, RA and REO, allow for multi-family residential, live/work units and commercial developments. The project proposes a PDD in lieu of a change or zone for the proposed uses and seeking relief from certain setback development standards. With approval of the PDD, the project is consistent with this finding.

> *b. That the use is necessary or desirable for the development of the community, is in harmony with the various elements or objectives of the general plan, and is not detrimental to existing uses or to future uses specifically permitted in the zone in which the proposed use is to be located;*

Development of the subject site with single family uses is desirable as a means of bringing a variety of housing choices to the community. The project is consistent with the General Plan Tourist Resort Commercial land use designation providing a mix of uses, including tourist-related commercial space, live/work units and residential uses on an 8.05-acre site. The proposed use continues the commercial theme with residential located behind the commercial / live/work units, which is compatible with surrounding development and not detrimental to existing or future uses in the zone. The project therefore conforms to this finding.

> *c. That the site for the intended use is adequate in size and shape to accommodate such use, including yards, setbacks, walls or fences, landscaping and other features required in order to adjust such use to those existing or permitted future uses of land in the neighborhood;*

The project consists of a grouping of parcels to form the overall 8.05-acre site with internal private streets, privately owned units and both private and common open spaces. With the approval of the PDD, buildings will be setback from perimeter property lines to accommodate the proposed uses for adjusting to those existing and future uses of land in the neighborhood. Therefore, the project would be deemed in conformance with this finding.

> *d. That the site for the proposed use relates to streets and highways properly designed and improved to carry the type and quantity of traffic to be generated by the proposed use;*

The project proposes to take vehicular access from surrounding streets, excluding Tahquitz Canyon Way, which is consistent with the Section 14 Specific Plan. As determined by the environmental assessment, Tahquitz Canyon Way, Calle El Segundo and Andreas Road are improved with adequate road width to accommodate the type and quantity of traffic expected by the proposed uses. Thus, the project conforms with this finding.

> *e. That the conditions to be imposed and shown on the approved site plan are deemed necessary to protect the public health, safety and general welfare and may include minor modification of the zone's property development standards.*

A set of draft conditions of approval are proposed and attached to this staff report as Exhibit "A".

Tentative Tract Map Findings:
Findings are required for the proposed subdivision pursuant to Section 66474 of the Subdivision Map Act. These findings and a discussion of the project as it relates to these findings follow:

> *a. The proposed Tentative Tract Map is consistent with all applicable general and specific plans.*

The TTM proposes individual privately owned lots with open space, common area and private streets. The proposed density is within the range specified by the Tourist Resort Commercial General Plan land use designation. Therefore, the project is consistent with this finding.

> *b. The design and improvements of the proposed Tentative Tract Map are consistent with the zone in which the property is located.*

The proposed project design and improvements are generally consistent with the RA / REO land designations in which the property is located. The PDD in lieu of a zone

change proposes mixed uses with residential, live/work units and commercial space with a set of development standards unique to this development with smaller lot area, lot dimensions and setbacks. With the approval of the PDD in lieu of a change of zone, the project will be consistent with this finding.

c. The site is physically suited for this type of development.

The relatively flat project site will be razed and graded to accommodate the proposed development. Site modifications include new private driveways to privately-owned lots. Each lot is proposed to accommodate a residential, live/work units or commercial building as defined by the PDD. A total of 74 residences, 17 live/work units and one commercial building are proposed on the 8.05-acre site. The site has adequate vehicular access with primary access taken from Andreas Road and Calle El Segundo. Thus, the site is physically suited for this type of development.

d. The site is physically suited for the proposed density of development.

The proposed density and FAR is less than that permitted by both the General Plan Tourist Resort Commercial (TRC) and Section 14 REO and RA land use designations. Therefore, the site is physically suited for the proposed density of development.

e. The design of the subdivision is not likely to cause environmental damage or substantially and avoidably injure fish, wildlife, or their habitats.

The Tentative Tract Map and associated Planned Development District have been reviewed under the California Environmental Quality Act, and a Mitigated Negative Declaration is proposed. Mitigation measures have been included which will reduce potential impacts to less than significant levels. The project will therefore not damage or injure fish, wildlife or their habitats.

f. The design of the subdivision or type of improvements is not likely to cause serious public health problems.

The design of the proposed subdivision includes connections to all public utilities including water and sewer systems. The layout of internal private streets provides access to each lot. No serious public health problems are anticipated.

g. The design of the subdivision or type of improvements will not conflict with easements, acquired by the public at large, for access through or use of the property within the proposed subdivision.

There are no known public easements across the subject property; therefore the design of the subdivision will not conflict with easements for access through or use of the property. Any utility easements can be accommodated within the project design.

ENVIRONMENTAL ANALYSIS:

The proposed development is a project as defined by the California Environmental Quality Act (CEQA). An initial study was conducted which considered all required CEQA issues, including but not limited to air quality, cultural resources, land use, hydrology and traffic. Potential significant adverse impacts were identified along with Mitigation Measure that would reduce the potential adverse impacts to less than significant levels. Mitigation measures are noted as follows:

AESTHETICS:

MMI – 1 Project site plans, architectural renderings, and landscape plans shall be revised to address inconsistencies with the development standards and other design requirements of the Section 14 Specific Plan, as determined by the City Council.

CULTURAL RESOURCES:

MM V-1 As there is always a possibility of buried cultural and paleontological resources in a project area, a Native American Monitor(s) shall be present during all ground disturbing activities including clearing and grubbing, excavation, burial of utilities, planting of rooted plants, etc., The Agua Caliente Band of Cahuilla Indian Cultural Office shall be contacted for additional information on the use and availability of Cultural Resource Monitors. Should buried cultural deposits be encountered, the Monitor shall contact the Director of Planning Services. Following consultation, the Director shall have the authority to halt destructive construction and shall notify a qualified archaeologist to investigate the find. If necessary, the qualified archaeologist shall prepare a treatment plan for submission to the State Historic Preservation Officer and Agua Caliente Cultural Resource Coordinator for approval. Human remains discovered shall be handled consistent with state law provisions.

HAZARDS AND HAZARDOUS MATERIALS:

MM VII-1: Prior to the issuance of demolition permits, an asbestos and lead survey shall be conducted by a certified asbestos and lead consultant, and a report shall be provided to the City Building Official. Should asbestos- and/or lead-containing materials be found, the project proponent shall submit to the Building Official a remediation and disposal plan to be conducted by a qualified, licensed specialist in the disposal of hazardous materials. The

plan shall include specifics regarding the method of removal, transport, and disposal for all such materials.

NOISE:

MM XI-1. Demolition and construction activities on-site shall occur only between 7:00 a.m. and 7:00 p.m., Monday-Friday, and 8:00 a.m. and 5:00 p.m. on Saturdays, and shall be prohibited on Sundays and holidays, as specified by the Palm Springs Municipal Code.

MM XI-2. All construction equipment, fixed or mobile, shall be equipped with properly operating and maintained mufflers and the engines shall be equipped with shrouds.

MM XI-3. Stationary equipment shall be placed such that emitted noise is directed away from Andreas Road and Calle El Segundo.

MM XI-4. Stockpiling and vehicle staging areas shall be located as far as practical from Andreas Road and Calle El Segundo.

MM XI-5. Delivery hours should be limited to 7 a.m. to 7 p.m. daily to minimize the potential for adverse impacts on the adjacent Plaza Villas.

The analysis is available for public comment for a 20-day period from February 20, 2015 through March 18, 2015. As of the writing of this report, comments on study have not been received.

City of Palm Springs
ARCHITECTURAL ADVISORY COMMITTEE
Council Chamber, 3200 East Tahquitz Canyon Way, Palm Springs, California 92262

Minutes of January 26, 2015

CALL TO ORDER: Chair Fauber called the meeting to order at 2:59 pm.

ROLL CALL:

Committee Members Present: Cassady, Hirschbein, Purnel, Secoy-Jensen, Song, Vice-Chair Fredricks and Chair Fauber

Committee Members Absent: None

Planning Commissioner Present: Commissioner Lowe

Also Present: Flinn Fagg, Marcus Fuller, Douglas Holland, Ken Lyon, Glenn Mlaker, David Newell and Edward Robertson

REPORT OF THE POSTING OF AGENDA: The Agenda is available for public access at the City Hall bulletin board (west side of Council Chamber) and the Planning Department counter by 2:00 pm on Wednesday, January 21, 2015.

ACCEPTANCE OF THE AGENDA:

M/S/C (Cassady/Hirschbein, 7-0) The agenda was accepted, as presented.

PUBLIC COMMENTS:

Douglas Holland, City Attorney, introduced himself and thanked the Members for their expertise and contribution to the community.

CONSENT CALENDAR:

M/S/C (Cassady/Hirschbein, 7-0) To approve Items 1, 2 and 3 as part of the Consent Calendar.

1. **APPROVAL OF MINUTES: JANUARY 12, 2015 SPECIAL MEETING MINUTES.**

Approved, as presented.

2. DENLAR, LLC, FOR APPROVAL OF A MAJOR ARCHITECTURAL APPLICATION FOR CONSTRUCTION OF A SINGLE-FAMILY RESIDENCE ON A HILLSIDE LOT LOCATED AT 2110 LEONARD ROAD, ZONE R-1-B, (CASE 3.3817 MAJ). (KL)

Approved, as presented.

3. BARBARA FOSTER HENDERSON, OWNER, REQUESTING A MAJOR ARCHITECTURE APPLICATION FOR THE CONSTRUCTION OF A 3,521-SQUARE FOOT HOUSE ON A HILLSIDE LOT LOCATED AT 884 LA MIRADA CIRCLE (CASE 3.3819 MAJ). (GM)

Approved, as presented.

UNFINISHED BUSINESS:

4. CABALLEROS ESTATES HOA REQUESTING APPROVAL FOR CONVERSION OF PERIMETER TURF AREA TO DESERTSCAPE ALONG SOUTH AVENIDA CABALLEROS FROM BARISTO ROAD TO ARENAS ROAD LOCATED AT 280 SOUTH AVENIDA CABALLEROS, ZONE HR (CASE 3.1878 MAA). (GM)

Assistant Planner Mlaker provided an overview of the proposed project.

Applicants:

ELVIS and ABEL ARANDA, Grand Mark Landscape, spoke about the minor changes to the plan (more riverbed, contour and sizes of plant.) to make it more appealing.

Member Purnel noted that the board had requested an increase in plant sizes; but does not show on the legend. He requested clarification on plant types not identified in the legend and questioned what the HOA's guidelines are in the design.

Vice-Chair Fredricks questioned the size and type of the rubble and groundcover.

Member Purnel said he finds the plan a little busy/chaotic, but overall material selection and viability is good; however, he finds a lack of rhythm in the plan.

Vice-Chair Fredricks does not see massing of plant materials or differences in sizes.

Member Hirschbein asked if a subcommittee is the best way to move this forward.

Member Song commented that the applicant has increased the quantity of plants. She commented that the subcommittee needs to give clear direction up front.

Member Purnel made the following suggestions:

- Increase some plant sizes (slower growing plants);
- A little more massing and rhythm of plants; rather than individual ones scattered out.
- Clarification on plants that are not labeled on the plans - ;
- Identify plants to be replaced - Aurelia is a poor plant recommends alternative plant.
- Greener groundcover - to make it lusher.

M/S/C (Purnell/Fredricks, 7-0) Approve, subject to review with subcommittee and applicant to incorporate the comments made by the AAC. (Purnel and Fredricks)

5. O & M HR, LLC (NEXUS DEVELOPMENT CORP.) FOR THE DEMOLITION OF AN EXISTING DEVELOPMENT AND PARKING AREA TO CONSTRUCT "ABERDEEN"; A MIXED-USE PROJECT CONSISTING OF (74) ATTACHED AND DETACHED RESIDENTIAL DWELLINGS, (17) LIVE-WORK UNITS AND APPROXIMATELY 1,568-SQUARE FEET OF RETAIL ON 8.05-ACRES LOCATED AT THE NORTHEAST CORNER OF TAHQUITZ CANYON WAY AND CALLE EL SEGUNDO, ZONE REO AND RA (CASE NOS. 5.1361 PD-375, 3.3820 MAJ AND TTM 36876). (DN)

Douglas Holland, City Attorney, reviewed the AAC's responsibilities for Architectural Review.

Associate Planner Newell provided an overview of the proposed project.

Vice-Chair Fredricks noted issues with the landscape plan - does not see the landscape plan that shows the plant sizes and materials - (can be submitted with final plan).

Member Song commented that landscape is not per Section 14 Plan on Tahquitz Canyon Way; and questioned the prohibition of residential use of live/work space on Tahquitz Canyon Way.

Member Secoy-Jensen verified appropriateness of reviewing context.

Chair Fauber asked staff to identify where in the staff report where it does not conform and what the standards are.

ROB ERES and CHRIS PARDO, applicants, identified the changes made to the plan.

Public Comment:

BETH EDWARDS HARRIS, said she would like to see the list of responsibilities of the Committee.

RON MARSHALL, applauds the AAC for its comments two weeks ago; sustainability should be discussed here.

BARBARA MARSHALL, spoke about the important of the Hugh Kaptur buidlings.

Member Cassady requested clarification of Calle Alvarado design.

Member Hirschbein asked for clarification of pedestrian access through the site.

Member Song asked about the width of the landscape area at Alvarado. She commented that no landscape buffer is shown on Calle El Segundo and asked about the signage - which is not included as part of this approval.

Member Purnel expressed concern about the street trees in tight spaces - it needs to be addressed on landscape plan; need street trees on El Segundo. He said landscape is under-developed. It needs to show landscape of the interior streets.

Member Secoy-Jensen commented that architecture and urban design are inseparable. She noted that Calle Alvarado could be wider and questioned what the design concept is for the live/work buildings on Tahquitz.

Chair Fauber asked if there are no swimming pools on Tahquitz for the live/work units. He commented that parking is short per submitted drawings; and also questioned the Calle Alvarado width.

Member Cassady commented that no parking along Tahquitz will hurt the retail spaces.

Member Secoy-Jensen said she is struggling with the live/work design and monotony of garage doors; however, the residential behind may be appropriate.

Chair Fauber said the issue is with the fourth floor.

Member Hirschbein commented that what is before them now is better than what was originally proposed; however, it is monotonous.

M/S/C (Cassady/Secoy-Jensen, 7-0) Deny.

The Board made a finding that the project does not conform to adopted standards, and

recommended the following modifications:

1. Study alternatives along Tahquitz Canyon Way;
2. Provide streetscape along El Segundo;
3. Address Calle Alvarado traffic, parking and circulation issues;
4. Resubmit planting diagrams.

A recess was taken at 4:33 pm. The meeting resumed at 4:39 pm.

NEW BUSINESS:

6. SERGE DOROSHIN FOR A PRELIMINARY PLANNED DEVELOPMENT DISTRICT APPLICATION TO DEVELOP A 32-UNIT CONDOMINIUM AND TWO LIVE-WORK UNITS LOCATED AT 262 SOUTH INDIAN CANYON DRIVE, ZONE LSC/C-1AA & C-2, SECTION 14 (CASE 5.1358-PDD 376). (ER)

Principal Planner Robertson presented the proposed project.

Chair Fauber questioned if tribal land is subject to city review.

Member Hirschbein asked for clarification of property use to the north.

Member Song questioned the landscape/streetscape requirement along Indian Canyon.

CHRIS PARDO, project architect, provided additional details.

Member Purnel asked about the landscape at Indian Canyon, vehicular circulation and parking for live/work. He asked about the function of gate at Calle Encilia.

Member Secoy-Jensen questioned the functionality of the parking area at Indian Canyon.

Chair Fauber asked if there are any guest spaces on the interior.

Member Song commented on the architecture: relationship of retail to street is too bare; not well defined. She said the interior street needs trees/plantings.

Member Purnell commented that the street is "harsh" feeling; it needs increased plantings.

Member Secoy-Jensen commented that the vehicular entry is inadequate. Architecture is good, but exterior spaces need to be studied more; footprint may need to be reduced.

Member Hirschbein stated that the density is appropriate for downtown; it needs more

shading on Indian Canyon.

Member Song commented that parking lot at Indian Canyon needs to be redesigned.

Member Purnell commented that pool setbacks provide for additional plantings.

Vice-Chair Fredricks said that landscape is austere; it needs more landscaping at walls. M/S/C (Fauber/Fredricks, 7-0) Approve, subject to conditions:

- Rework parking / maneuvering areas.
- Enhance landscaping.
- Revisit the connection of retail to street.

Vice-Chair Fredricks and Member Secoy-Jensen left for the remainder of the meeting at 5:08 pm.

7. SIERRA OAKS, LLC, FOR A MAJOR ARCHITECTURAL APPROVAL TO CONSTRUCT FORTY (40) SINGLE-FAMILY RESIDENTIAL UNITS ON AN APPROXIMATELY 20-ACRE PALM RIDGE SUBDIVISION LOCATED AT 665 WEST RAMON ROAD, ZONE R-1-C (CASE 3.3802 MAJ). (ER)

Principal Planner Robertson presented the proposed project.

Member Hirschbein asked for clarification of landscape theme.

Member Song asked for verification of stucco treatment on exterior; height of roof and construction details of roof.

Member Purnell said plant spacing might be too tight and size of trees in front yard should be 24" box. He had questions about decomposed granite, cobble stone and chosen colors.

Chair Fauber asked if there will be an HOA.

Member Song asked what the motivation for removing the gates was.

M/S/C (Cassady/Fauber, 5-0-2 absent Fredricks/Secoy-Jensen) Approve, subject to conditions:

- The 1 gal. plants at 24" O.C. - can be spread out for greater coverage.
- Minimum 24" box instead of 15 gallon trees in front yards.
- Replace Palm Springs Gold - with native Decomposed Granite for the groundcover.
- 24" fascia is too deep - reconsider a thinner profile.

COMMITTEE MEMBER COMMENTS:

The Committee Members discussed the possibility of a study session to review a case study of a complex project. (It was decided not to go forward with the study session.)

STAFF MEMBER COMMENTS: None.

ADJOURNMENT: The Architectural Advisory Committee adjourned at 5:46 pm to the next regular meeting at 3:00 pm on February 9, 2015, Council Chamber, City Hall, 3200 East Tahquitz Canyon Way, Palm Springs.

Flinn Fagg, AICP
Director of Planning Services

CITY OF PALM SPRINGS

DEPARTMENT OF PLANNING SERVICES

MEMORANDUM

Date: January 26, 2015

To: Architectural Advisory Committee (AAC)

From: Department of Planning Services

Subject: O & M HR, LLC (NEXUS DEVELOPMENT CORP.) FOR THE DEMOLITION OF AN EXISTING DEVELOPMENT AND PARKING AREA TO CONSTRUCT "ABERDEEN"; A MIXED-USE PROJECT CONSISTING OF (74) ATTACHED AND DETACHED RESIDENTIAL DWELLINGS, (17) LIVE-WORK UNITS AND APPROXIMATELY 1,568-SQUARE FEET OF RETAIL ON 8.05-ACRES LOCATED AT THE NORTHEAST CORNER OF TAHQUITZ CANYON WAY AND CALLE EL SEGUNDO, ZONE REO AND RA (CASE NOS. 5.1361 PD-375, 3.3820 MAJ AND TTM 36876).

On January 12, 2015, the AAC tabled the subject project with comments and recommendations as summarized below. In response to the AAC's action, the applicant has made revisions, which staff has noted following the respective comment / recommendation:

1. Architecture along Tahquitz is too monotonous, lacks interest and out of scale and context;

In response, the applicant revised the street front buildings to consist of three elevations with different color and materials. Additionally, the work pods along Tahquitz have been adjusted to vary in setback, alternating from approximately 15 feet to 18 feet from street curb.

2. Parking needs further evaluation for commercial and live-work;

Off-street parking has increased by two spaces at the rear of the commercial space. These spaces will satisfy ADA parking requirements.

3. Circulation – Increase pedestrian amenities (i.e. landscaping, wider sidewalk, etc.) along extension of Calle Alvarado;

The applicant enhanced the pedestrian experience with additional parkway / landscaping along the extension of Calle Alvarado. Shade trees will be planted along the walkway. This is shown rendering R1.04 (attached).

4. Connectivity – Eliminate gates and improve connectivity of project within existing community;

Pedestrian connectivity is provided in the middle of the live-work units on either side of the common area pool. The project allows pedestrian passage through the central parkway located in the middle of the project.

5. Adaptive re-use of existing commercial buildings should be considered in redesign.

Not part of proposed project.

The revised plans include the site plan, site sections plan and (8) project renderings (attached). For plans that did not change, contact the Planning Services Department for a copy of the January 12, 2015 AAC Exhibits. Alternatively, the plans may be accessed electronically:

Part 1 of 2: http://www.palmsprings-ca.gov/Modules/ShowDocument.aspx?documentid=33615
Part 2 of 2: http://www.palmsprings-ca.gov/Modules/ShowDocument.aspx?documentid=33616

CITY OF PALM SPRINGS

CASE NO: 5.1361 PD-375, ZC, 3.3820 MAJ and TTM 36876 APPLICANT: O & M HR, LLC	DESCRIPTION: A proposal to demolish an existing development and parking lot to construct "Aberdeen"; a mixed-use project consisting of (74) attached and detached residential dwellings, (17) live-work units and approximately 1,568-quare feet of retail on 8.05-acres at the northeast corner of Tahquitz Canyon Way and Calle El Segundo, Zone REO and CU.

ARCHITECTURAL ADVISORY COMMITTEE STAFF MEMORANDUM

DATE: January 12, 2015 NEW BUSINESS

SUBJECT: O & M HR, LLC (NEXUS DEVELOPMENT CORP.) FOR THE DEMOLITION OF AN EXISTING DEVELOPMENT AND PARKING AREA TO CONSTRUCT "ABERDEEN"; A MIXED-USE PROJECT CONSISTING OF (74) ATTACHED AND DETACHED RESIDENTIAL DWELLINGS, (17) LIVE-WORK UNITS AND APPROXIMATELY 1,568-SQUARE FEET OF RETAIL ON 8.05-ACRES LOCATED AT THE NORTHEAST CORNER OF TAHQUITZ CANYON WAY AND CALLE EL SEGUNDO, ZONE REO AND CU (CASE NOS. 5.1361 PD-375, 3.3820 MAJ AND TTM 36876).

FROM: Department of Planning Services

SUMMARY

The Architectural Advisory Committee will review the following applications related to the 8.05-acre site:

- A Planned Development District to establish the project site plan, permitted uses and development standards. The PD proposes razing the existing parking lot and buildings to construct:
  - 1,568-square feet of commercial space at the street corner;
  - 17 detached dwellings with associated commercial space (live-work lofts) fronting Tahquitz Canyon Way;
  - 74 attached and detached residential units within a controlled access / gated area with private open space;
  - A common open space / recreation area with pool, spa, fitness center and barbecue area.
- Major Architectural Application to review the proposed architectural designs. Final Development Plans will be submitted at a later time.
- A Tentative Tract Map (TTM) seeking to subdivide the roughly 8.05-acres into 93 numbered lots and 8 lettered lot streets, and common open space.

RECOMMENDATION:

Provide consultation to the Planning Commission with direction to:

- Revise the internal street widths to conform to the Section 14 Specific Plan and General Plan minimum required widths for private streets [28 feet (rolled curb to curb) with 5 foot landscape buffer and 5 foot sidewalks].
- Revise the extension of Calle Alvarado to meet General Plan Local Street width requirement of 36 feet; alternatively, revise the street width to conform to above private street width.
- Revise site plan to include handicap parking adjacent to commercial building.
- Prohibit residential uses in structures fronting Tahquitz Canyon Way.
- Include bicycle parking as required by the Section 14 Specific Plan.
- Consider providing Plug-in Electric Vehicle (PEV) parking spaces.
- Redesign landscape / streetscape along Tahquitz Canyon to be consistent with Specific Plan.

ISSUES:

1. The project is inconsistent with the General Plan which prohibits gated communities.
2. The internal roadways are inconsistent with the General Plan minimum profile for private streets in Planned Developments and lack sidewalks.
3. Single family residential is prohibited within the REO and RA zones, but multi-family is permitted with the approval of a Conditional Use Permit in both zones.
4. Handicap parking not part of plan, but is required for commercial projects.
5. Pools within individual lots do not meet five foot setback requirements of zoning code.
6. Bicycle parking is required for all new developments in Section 14.
7. Landscape along Tahquitz Canyon Way inconsistent with Specific Plan.

BACKGROUND:

The site is comprised of five developed parcels totaling roughly 9.1 gross acres in size and bounded by Tahquitz Canyon Way to the south, Calle El Segundo to the west, Andreas Road to the north and the Renaissance Hotel to the east. After street dedication and the extension of Calle Alvarado, the net acreage of the project area is 8.05-acres in size. The site encompasses the "Prairie Schooner" parking lot, which is being sold by the City to the developer, and the existing office buildings along Tahquitz Canyon Way. All will be razed for the proposed development.

The applicant is proposing a partially gated development for 74 three- and four-story, attached and detached single family residential units on small lots each with its own

private spa / pool and two-car garage. These units will have primary vehicular access from Andreas Road. The non-gated portion of the development includes a one-story, 1,568-square foot commercial building and 17 three- and four-story, detached single-family live-work units with vehicular access from a private street extending from Calle El Segundo to the proposed extension of Calle Alvarado.

General Plan, Zoning and Land Uses of Site & Surrounding Areas			
	Existing General Plan Designations	***Existing Zoning Designation***	***Existing Land Use***
Site	TRC (Tourist Resort Commercial)	RA (Resort Attraction) and REO (Retail / Entertainment / Office)	Office Buildings and Prairie Schooner Parking Lot
North	HDR (High Density Residential	HR (Residential High)	Multi-family Residential Condominiums (Plaza Villas)
South	TRC	REO	Commercial Complex (Courtyard at PS)
East	TRC	RA	Resort Hotel (Renaissance)
West	TRC	RA	Resort Hotel (Hilton)

ANALYSIS:

General Plan

Land Use Designation	F.A.R. and Density	Request	Compliance
Tourist Resort Commercial	0.35 FAR / 43 hotel rooms per acre / 86 hotel rooms per acre on Indian Land / 30 d.u. per acre	11.3 du/ac 0.35 FAR for commercial building	Yes

Zoning

Permitted Uses:

Single-family residential units are prohibited in REO (Retail / Entertainment / Office) and RA (Resort Attraction) Section 14 Land Use designations. The proposed small-lot residential use is similar to multi-family residential (MFR) due to a majority of units being attached. MFR is permitted by Conditional Use Permit (CUP) in both designations.

Retail including coffee shops, deli, etc. is permitted within the RA Land Use of the Section 14 Specific Plan.

Live/work units are permitted by Land Use Permit and CUP in the REO and RA zones, respectively.

The PDD has been submitted in lieu of a change of zone to seek City approval of all uses as a consolidated project per the Section 14 Specific Plan.

Development Standards:

The project includes three land uses within the PD. When multi-family residential is proposed within the REO or RA zones, the Specific Plan requires development consistent with the HR land designation. The live-work and commercial space are located within the REO land designation. Thus, below staff analyzed the HR designation development standards for the multi-family residential portion, and the REO designation development standards for the live-work and commercial components.

Since this proposal exceeds five acres in size, the development is Consolidated Project and can utilize incentives including zoning flexibilities. Where applicable, staff has included in the analysis below.

Multi-family Residential

	HR Requirements / R-4	Proposed Project	Conform
Lot Standards			
Min. Area	2 gross acres / 130' wide / 155' deep, except: Lot size requirements may be reduced for single-family residential development if it can be demonstrated through the CUP process that the reductions are necessary and desirable, and are not detrimental to neighboring uses (existing and permitted)	Range from 2,563sf and 4,813sf	No, per PDD
Min. Width		Range from 21ft to 30ft	No, per PDD
Min. Depth		Range from 107ft to 111ft	No, per PDD
Building Height	35ft, except when developed as high-rise, pursuant to Section 94.03.00 of Palm Springs Zoning Ordinance (PSZO) – see below.	Range from 30 feet to 41 feet and 2 inches	See below
Density	1,500 sq. ft. of lot area per unit	11 du/ac or 3,853 sq. ft. per unit	Yes
Yard Setbacks			
Overall Site - Front - Side - Rear	30 ft. front yard 20 ft. side yards 20 ft. rear yard	- 45ft from north (front) property line - 15ft from west (side) property line - 45ft from east (side) property line - 145ft from south (rear) property line	No per PDD

Individual Lots	Setback requirements may be reduced for single-family residential development if it can be demonstrated through the CUP process that the reductions are necessary and desirable, and are not detrimental to neighboring uses (existing and permitted)	Front / Driveways: 18 feet from private street to face of garage Side: 6ft between residences. (Avg. 3ft to common side P/L) 0ft at one side of homes. Rear: 40ft in most instances	No, per PDD
Lot Coverage	45% usable landscaped open space	Usable open space: 52%	Yes
Off-street Parking	Per PSZC 93.06: In PDDs: 3 bdrm units require 2.25 spaces or 167 spaces for the units, plus guest parking 1 space for every 4 units, or 19 spaces; total 186 spaces required	2 covered spaces are provided with each of the 74 units (148 spaces) + 2 spaces in front of garage on driveways; total 296 spaces	Yes
Trash Enclosure	Per PSZC 93.07.02	TBD	-

Live / Work and Commercial

	REO Requirements	**Proposed Project**	**Conform**
FAR	3.0 Maximum Floor Area Ratio	1.26 FAR	Yes
Building Height	35ft, except 100ft for high-rise	41ft and 2in	See below
Open Space	30% minimum landscape area	~45%	Yes
Compatibility w/Surrounding Development	The rear and side walls of buildings which are visible from adjacent lots or streets shall be treated with an equivalent design quality as the front wall...	Perimeter wall treatment to be designed.	TBD
Building Location	Buildings should be as close as possible to the required front setback	Live/work units have workspace / retail adjacent to front setback	Yes
Pedestrian Access	Direct pedestrian access shall be provided from buildings to the sidewalks on Tahquitz Canyon Way	Pedestrian access to workspace / retail is provided to each unit	Yes
Front Setback	20 feet	6 feet	No, per PDD
Side Yard Setback	20 feet	0 feet on Calle El Segundo 7 feet on Calle Alvarado	No, per PDD
Rear Yard Setback	20 feet	18 feet from property line to garage	No, per PDD
Setbacks for High-Rise Buildings	High-rise buildings within Section 14 are exempt from the setback requirements identified in 93.04.00 of the PSZO; however, high-rise buildings	Buildings are setback over 100 feet from residential property to the north	Yes

	shall have a minimum setback of one (1) foot of horizontal setback distance from any residential district for each one (1) foot of vertical rise of the building. Additional site-specific setbacks may be imposed through the CUP process based on the relationship of the high-rise building to its surroundings.		
Minimum Lot Area	2 gross acres	8 gross acres for overall project	Yes
Off-street Parking	Commercial: 1 space per 250 gross floor area or 6 spaces. Live-work: No standard specified; however, in PDDs 3 bdrm units require 2.25 spaces or 38 spaces for the units, plus guest parking of 1 space for every 4 units, or 4 spaces. Total required: 48 spaces	15 parallel parking spaces on private driveway. At least one handicap space will be required 2 covered spaces are provided with each of the 17 units (34 spaces) + 2 spaces in front of garage on driveways (34 spaces) Total provided: 83 spaces	Yes

Building height: The proposed structures are three- and four-stories in size and reaching heights of up to 41 feet and 2 inches. These structures are located along a corridor that contains hotels ranging from three- to five-stories in height. The existing residential project to the north of the site contains two-story residential.

Design Guidelines:

Chapter 7 of the Specific Plan includes Design Guidelines for development proposals within Section 14.

Architectural Character: Modern architecture is a theme that is welcomed by the Specific Plan and the following features are suggested for 50s/60s Modern:

- *Skewed, angular roof forms;*
- *Angled, cantilever roof extensions;*
- *Extension of flooring to walls to outdoors;*
- *Bold, eye-catching accent colors;*
- *Large expanses of glass;*

- *Smooth, uninterrupted walls, often free-standing;*
- *Modern metals, such as aluminum, as decoration.*

The Plan also recommends incorporation of Cahuilla imagery and symbols. Images would include baskets, pottery and hunting. Symbols are regional fauna and flora, parallel lines, anthropomorphic figures, trident forms, concentric circles, maze-like patterns and lightning bolts.

The proposal includes some of the above-mentioned features, such as cantilever roof extensions, extension of flooring to walls and outdoors and modern metals. However, Cahuilla imagery and symbols are not proposed as a part of the design.

Materials and Colors: A number of materials are encouraged:

- *Stucco walls in off-white and/or muted tones;*
- *Wood highlights;*
- *Terra cotta or ceramic tile roofs;*
- *Built-up roof with parapets and metal or canvas awnings;*
- *Decorative ceramic tiles;*
- *Stone, such as flagstone, marble, travertine, granite;*
- *Decorative metal highlights, such as aluminum, copper, wrought iron.*
- *Smooth finish stucco; for example, exterior stucco, applied with a smooth trowel finish and painted with elastomeric paint is preferred.*
- *Screed expansion joints are favored, which are integrated with the design of windows and doors.*
- *Pre-cast concrete panels for structures taller than two stories.*
- *Cut stone, tile or other smooth, durable material on the ground level (the base) for visual interest at the street level and for ease of graffiti removal.*
- *Wood, steel or aluminum and clear glass on storefronts, windows, doors, or atrium spaces.*
- *Use of light or medium neutral colors on buildings is preferred over dark colors which tend to absorb heat and make a building appear more bulky. Strong colors may be used for accents on awnings, door trim, window mullions, window trim, towers or pedestrian amenities, provided such colors are clearly secondary to a more neutral base color.*

Materials include stucco walls, vertical aluminum panels, faux wood siding anodized aluminum windows and steel cable and beams. Colors include a mix of light and dark throughout the project. The proposed colors are both light and dark grays with some

wood-like appearance. The dark gray stucco may be too dark and create a bulky appearance on the upper floors.

Massing / Building Bulk: "Structures should be articulated in form and should not be designed as single massive blocks. To reduce bulk and create visual interest, buildings, particularly those over two stories, should employ architectural devices such as stepped terraces, changes in vertical and horizontal planes, varied roof heights, and multi-planed roof forms." The Specific Plan provides additional design discussion related to pedestrian interest, building entrances, street corner articulation, design treatment on every façade and blank walls. The proposal meets many of these criteria with stepped / terraced buildings and varied roof plans and shapes. Additional articulation or design modification (i.e. variation of color or material, etc.) along Tahquitz Canyon Way may enhance the visual interest and reduce monotonous appearance along this important street front.

Tahquitz Canyon Way. The proposed preliminary landscape design includes a formal pattern of two palms and two street trees along Tahquitz Canyon Way, which is inconsistent with the Streetscape envisioned along this boulevard. The Specific Plan requires palm trees every 60ft on center as well as shade trees between palms and landscape buffers where feasible. Palms should be Washingtonia Filifera. The sidewalk should include pedestrian amenities, such as new pedestrian scale lighting, street furniture and banners.

City of Palm Springs
ARCHITECTURAL ADVISORY COMMITTEE
Council Chamber, 3200 East Tahquitz Canyon Way, Palm Springs, California 92262

Minutes of January 12, 2015

CALL TO ORDER: Chair Fauber called the meeting to order at 3:02 pm.

ROLL CALL:

Committee Members Present: Cassady, Hirschbein, Purnel, Secoy-Jensen, Song, and Chair Fauber.

Committee Member Excused: Vice-Chair Fredricks

Planning Commissioner Present: Commissioner Klatchko

Staff Present: Assistant Planner Mlaker, Associate Planner Newell and Planning Director Fagg

REPORT OF THE POSTING OF AGENDA: The agenda was available for public access at the City Hall bulletin board (west side of Council Chamber) and the Planning Department counter by 4:00 pm on Wednesday, January 7, 2015.

ACCEPTANCE OF THE AGENDA: The agenda was accepted, as presented.

PUBLIC COMMENTS: No comments.

CONSENT CALENDAR:

1. APPROVAL OF MINUTES: DECEMBER 22, 2014

M/S/C (Secoy-Jensen/Fauber, 6-0-1 absent Fredricks) Approve, as amended.

UNFINISHED BUSINESS:

2. JOHN HALDERMAN, OWNER OF CANYON CLUB RESORT FOR A BUILDING REPAINT AND FAÇADE REPAIRS AT 960 N. PALM CANYON DRIVE, ZONE C-1 (CASE 3.2753 MAA). (GM)

Assistant Planner Mlaker presented the proposed building repaint and renovations.

Chair Fauber questioned if there are details on the eaves and what the edge of panels will look like.

Applicants: STEVE CHEROSKE and VICTOR PINON, responded that the edge has square corners, mesh base with stucco edge.

Member Cassady asked if details will be painted on the front and side. The applicant responded yes.

Member Hirschbein asked the applicant to verify the paint colors.

Member Secoy-Jensen asked the color of the storefront. The applicant replied dark bronze.

Member Song requested clarification on the details of the windows:

- How will you match the flush surface?
- What was the intent to fill in the windows?
- Why is the same size pop-out used regardless of the length of the wall?

Member Hirschbein asked the applicant how confident they are in getting a flush finish without doing a skim-coat over the entire façade.

The applicant responded that it will be feathered out.

Member Hirschbein was concerned that the filled-in windows will still be visible.

Member Song questioned why pop-outs are not done where the existing windows are.

Member Hirschbein preferred to replicate the shape of awnings in a different material; the proportion of existing awnings is more pleasing than proposed pop-outs.

Member Purnel suggested keeping the awnings but filling-in the windows; but keep setback recessed 1" so that they would not have to skim coat.

Member Secoy-Jensen said she is encouraged this building is being improved and cleaned up. She encouraged continued improvement and evaluation of the signage and landscape.

Chair Fauber asked how the conduits will be enclosed. (The applicant responded that it would be a surface mounted conduit constructed out of 2 x 4's boxes and stuccoed over to match adjacent wall finish.)

Chair Fauber proposed a subcommittee review the project. Staff level review was preferred.

M/S/C (Secoy-Jensen/Song, 6-0-1) To approve with conditions:

- Awnings be replaced on both Palm Canyon and Indian Canyon in the existing locations and evaluate condition of the awning frames; paint to match color sample #2.
- Building painted color sample #1.
- Windows will be in-filled with stucco to match adjacent wall surface leaving a 1" - 2" recessed back panel with the reveal between the in-filled openings.

NEW BUSINESS:

3. **O & M HR, LLC (NEXUS DEVELOPMENT CORP.) FOR THE DEMOLITION OF AN EXISTING DEVELOPMENT AND PARKING AREA TO CONSTRUCT "ABERDEEN"; A MIXED-USE PROJECT CONSISTING OF (74) ATTACHED AND DETACHED RESIDENTIAL DWELLINGS, (17) LIVE-WORK UNITS AND APPROXIMATELY 3,000-SQUARE FEET OF RETAIL ON 8.05-ACRES LOCATED AT THE NORTHEAST CORNER OF TAHQUITZ CANYON WAY AND CALLE EL SEGUNDO, ZONE REO AND RA (CASE NOS. 5.1361 PD-375, 3.3820 MAJ AND TTM 36876). (DN)**

Associate Planner Newell provided an overview of the proposed project.

Discussion:

Member Song asked questions about the following:

- Lettered lots;
- Demolition of existing buildings;
- CUP submittal;
- Setbacks from Tahquitz for residential units;
- Building height.

Member Hirschbein questioned what square footage is being demolished versus how much is proposed.

Member Cassady requested clarification on ownership of property.

Member Secoy-Jensen asked what the timeline is for Planning Commission review (environmental needs to be computed).

ROB ERES AND CHRIS PARDO, applicants, responded that that existing building is about 32,000 square feet; and objects to conditions #1 and #2 in the staff report.

Public Comment:

JOHN WESSMAN, Wessman Development, commented that he knows the Hugh Kaptur buildings, and they were not developed to full potential.

BARBARA MARSHALL, commented that the demolition of the buildings injures the city. This project is not what Palm Springs wants or needs; let's find a way to adequately re-use this property.

GARY JOHNS, commented that Hugh Kaptur will have a voice in this matter at a later time.

RON MARSHALL, commented that the buildings qualify for preservation because they are the work of a master architect.

Questions:

Member Hirschbein asked how would uses be regulated (live/work space - per underlying zoning) and where is parking for coffee shop?

Member Cassady asked if there will be gates at the south end of interior streets.

Member Song made the following comments:

- Why gated? Why not open it up and allow it to flow?
- Expressed concern about the setbacks of the live/work units.
- Why not put art garden and café together (enliven the space)
- Do townhouse units share a sidewalk?
- How will the live/work signage be addressed?
- Open up pool area to pedestrian path.

Member Hirschbein asked if the workspace can be rented separately. How many parking spaces are required by code? And was the adaptive re-use of the existing buildings looked at?

Member Secoy-Jensen questioned why not re-use the buildings?

Member Hirschbein made the following comments:

- Appreciates that the community is bringing information forward on the historic

nature of the existing buildings;
- Prefers the site not be gated;
- Would like to see Calle Alvarado developed in a pedestrian-friendly manner;
- Questions the viability of live/work units.

Member Secoy-Jensen made the following comments:

- Likes the connection of Calle Alvardo;
- Struggling with regularity/monotony of Tahquitz elevation;
- Thinks office buildings could be re-used;
- This project is not characteristic of Palm Springs.

Member Cassady said the project lacks connectivity. He likes the design; however, questioned if this is the right place for it. He would prefer to see the Hugh Kaptur buildings saved.

Chair Fauber made the following comments:

- Concerned with the density and height of the 3 story building;
- Concerned with live/work units;
- Parking is not functional;
- The building is beautiful but not the right location for it;
- Should be non-gated (using St. Baristo as an example).

Member Song said she has three issues with this project: the gates, parking and re-use of existing office buildings.

Chair Fauber said Calle Alvarado street section needs to be increased.

M/S/C (Secoy-Jensen/Fauber, 6-0-1) Table with direction to the applicant to modify the following:

1. Architecture along Tahquitz is too monotonous, lacks interest and out of scale and context;
2. Parking needs further evaluation for commercial and live-work;
3. Circulation – Increase pedestrian amenities (i.e. landscaping, wider sidewalk, etc.) along extension of Calle Alvarado;
4. Connectivity – Eliminate gates and improve connectivity of project within existing community;
5. Adaptive re-use of existing commercial buildings should be considered in redesign.

COMMITTEE MEMBER COMMENTS:

Member Hirschbein asked if the minutes typically only show their questions and not the answers. Director Fagg explained that the minutes show the AAC's questions and concerns and not necessarily the answers because they are usually included in the staff report.

STAFF MEMBER COMMENTS: None.

ADJOURNMENT: The Architectural Advisory Committee of the City of Palm Springs adjourned at 4:56 pm to the next regular meeting on January 26, 2015, at 3:00 pm in the Council Chamber, City Hall, 3200 East Tahquitz Canyon Way, Palm Springs.

Flinn Fagg, AICP
Director of Planning Services

ARCHITECTURAL ADVISORY COMMITTEE
STAFF MEMORANDUM

DATE: January 12, 2015 NEW BUSINESS

SUBJECT: O & M HR, LLC (NEXUS DEVELOPMENT CORP.) FOR THE DEMOLITION OF AN EXISTING DEVELOPMENT AND PARKING AREA TO CONSTRUCT "ABERDEEN"; A MIXED-USE PROJECT CONSISTING OF (74) ATTACHED AND DETACHED RESIDENTIAL DWELLINGS, (17) LIVE-WORK UNITS AND APPROXIMATELY 1,568-SQUARE FEET OF RETAIL ON 8.05-ACRES LOCATED AT THE NORTHEAST CORNER OF TAHQUITZ CANYON WAY AND CALLE EL SEGUNDO, ZONE REO AND CU (CASE NOS. 5.1361 PD-375, 3.3820 MAJ AND TTM 36876).

FROM: Department of Planning Services

SUMMARY

The Architectural Advisory Committee will review the following applications related to the 8.05-acre site:

- A Planned Development District to establish the project site plan, permitted uses and development standards. The PD proposes razing the existing parking lot and buildings to construct:
  - 1,568-square feet of commercial space at the street corner;
  - 17 detached dwellings with associated commercial space (live-work lofts) fronting Tahquitz Canyon Way;
  - 74 attached and detached residential units within a controlled access / gated area with private open space;
  - A common open space / recreation area with pool, spa, fitness center and barbecue area.
- Major Architectural Application to review the proposed architectural designs. Final Development Plans will be submitted at a later time.
- A Tentative Tract Map (TTM) seeking to subdivide the roughly 8.05-acres into 93 numbered lots and 8 lettered lot streets, and common open space.

RECOMMENDATION:

Provide consultation to the Planning Commission with direction to:

- Revise the internal street widths to conform to the Section 14 Specific Plan and General Plan minimum required widths for private streets [28 feet (rolled curb to curb) with 5 foot landscape buffer and 5 foot sidewalks].
- Revise the extension of Calle Alvarado to meet General Plan Local Street width requirement of 36 feet; alternatively, revise the street width to conform to above private street width.
- Revise site plan to include handicap parking adjacent to commercial building.
- Prohibit residential uses in structures fronting Tahquitz Canyon Way.
- Include bicycle parking as required by the Section 14 Specific Plan.
- Consider providing Plug-in Electric Vehicle (PEV) parking spaces.
- Redesign landscape / streetscape along Tahquitz Canyon to be consistent with Specific Plan.

ISSUES:

1. The project is inconsistent with the General Plan which prohibits gated communities.
2. The internal roadways are inconsistent with the General Plan minimum profile for private streets in Planned Developments and lack sidewalks.
3. Single family residential is prohibited within the REO and RA zones, but multi-family is permitted with the approval of a Conditional Use Permit in both zones.
4. Handicap parking not part of plan, but is required for commercial projects.
5. Pools within individual lots do not meet five foot setback requirements of zoning code.
6. Bicycle parking is required for all new developments in Section 14.
7. Landscape along Tahquitz Canyon Way inconsistent with Specific Plan.

BACKGROUND:

The site is comprised of five developed parcels totaling roughly 9.1 gross acres in size and bounded by Tahquitz Canyon Way to the south, Calle El Segundo to the west, Andreas Road to the north and the Renaissance Hotel to the east. After street dedication and the extension of Calle Alvarado, the net acreage of the project area is 8.05-acres in size. The site encompasses the "Prairie Schooner" parking lot, which is being sold by the City to the developer, and the existing office buildings along Tahquitz Canyon Way. All will be razed for the proposed development.

The applicant is proposing a partially gated development for 74 three- and four-story, attached and detached single family residential units on small lots each with its own

private spa / pool and two-car garage. These units will have primary vehicular access from Andreas Road. The non-gated portion of the development includes a one-story, 1,568-square foot commercial building and 17 three- and four-story, detached single-family live-work units with vehicular access from a private street extending from Calle El Segundo to the proposed extension of Calle Alvarado.

General Plan, Zoning and Land Uses of Site & Surrounding Areas			
	Existing General Plan Designations	***Existing Zoning Designation***	***Existing Land Use***
Site	TRC (Tourist Resort Commercial)	RA (Resort Attraction) and REO (Retail / Entertainment / Office)	Office Buildings and Prairie Schooner Parking Lot
North	HDR (High Density Residential	HR (Residential High)	Multi-family Residential Condominiums (Plaza Villas)
South	TRC	REO	Commercial Complex (Courtyard at PS)
East	TRC	RA	Resort Hotel (Renaissance)
West	TRC	RA	Resort Hotel (Hilton)

ANALYSIS:

General Plan

Land Use Designation	F.A.R. and Density	Request	Compliance
Tourist Resort Commercial	0.35 FAR / 43 hotel rooms per acre / 86 hotel rooms per acre on Indian Land / 30 d.u. per acre	11.3 du/ac 0.35 FAR for commercial building	Yes

Zoning

Permitted Uses:

Single-family residential units are prohibited in REO (Retail / Entertainment / Office) and RA (Resort Attraction) Section 14 Land Use designations. The proposed small-lot residential use is similar to multi-family residential (MFR) due to a majority of units being attached. MFR is permitted by Conditional Use Permit (CUP) in both designations.

Retail including coffee shops, deli, etc. is permitted within the RA Land Use of the Section 14 Specific Plan.

Live/work units are permitted by Land Use Permit and CUP in the REO and RA zones, respectively.

The PDD has been submitted in lieu of a change of zone to seek City approval of all uses as a consolidated project per the Section 14 Specific Plan.

Development Standards:

The project includes three land uses within the PD. When multi-family residential is proposed within the REO or RA zones, the Specific Plan requires development consistent with the HR land designation. The live-work and commercial space are located within the REO land designation. Thus, below staff analyzed the HR designation development standards for the multi-family residential portion, and the REO designation development standards for the live-work and commercial components.

Since this proposal exceeds five acres in size, the development is Consolidated Project and can utilize incentives including zoning flexibilities. Where applicable, staff has included in the analysis below.

Multi-family Residential

	HR Requirements / R-4	Proposed Project	Conform
Lot Standards			
Min. Area	2 gross acres / 130' wide / 155' deep, except: Lot size requirements may be reduced for single-family residential development if it can be demonstrated through the CUP process that the reductions are necessary and desirable, and are not detrimental to neighboring uses (existing and permitted)	Range from 2,563sf and 4,813sf	No, per PDD
Min. Width		Range from 21ft to 30ft	No, per PDD
Min. Depth		Range from 107ft to 111ft	No, per PDD
Building Height	35ft, except when developed as high-rise, pursuant to Section 94.03.00 of Palm Springs Zoning Ordinance (PSZO) – see below.	Range from 30 feet to 41 feet and 2 inches	See below
Density	1,500 sq. ft. of lot area per unit	11 du/ac or 3,853 sq. ft. per unit	Yes
Yard Setbacks			
Overall Site - Front - Side - Rear	30 ft. front yard 20 ft. side yards 20 ft. rear yard	- 45ft from north (front) property line - 15ft from west (side) property line - 45ft from east (side) property line - 145ft from south (rear) property line	No per PDD

Individual Lots	Setback requirements may be reduced for single-family residential development if it can be demonstrated through the CUP process that the reductions are necessary and desirable, and are not detrimental to neighboring uses (existing and permitted)	Front / Driveways: 18 feet from private street to face of garage Side: 6ft between residences. (Avg. 3ft to common side P/L) 0ft at one side of homes. Rear: 40ft in most instances	No, per PDD
Lot Coverage	45% usable landscaped open space	Usable open space: 52%	Yes
Off-street Parking	Per PSZC 93.06: In PDDs: 3 bdrm units require 2.25 spaces or 167 spaces for the units, plus guest parking 1 space for every 4 units, or 19 spaces; total 186 spaces required	2 covered spaces are provided with each of the 74 units (148 spaces) + 2 spaces in front of garage on driveways; total 296 spaces	Yes
Trash Enclosure	Per PSZC 93.07.02	TBD	-

Live / Work and Commercial

	REO Requirements	**Proposed Project**	**Conform**
FAR	3.0 Maximum Floor Area Ratio	1.26 FAR	Yes
Building Height	35ft, except 100ft for high-rise	41ft and 2in	See below
Open Space	30% minimum landscape area	~45%	Yes
Compatibility w/Surrounding Development	The rear and side walls of buildings which are visible from adjacent lots or streets shall be treated with an equivalent design quality as the front wall...	Perimeter wall treatment to be designed.	TBD
Building Location	Buildings should be as close as possible to the required front setback	Live/work units have workspace / retail adjacent to front setback	Yes
Pedestrian Access	Direct pedestrian access shall be provided from buildings to the sidewalks on Tahquitz Canyon Way	Pedestrian access to workspace / retail is provided to each unit	Yes
Front Setback	20 feet	6 feet	No, per PDD
Side Yard Setback	20 feet	0 feet on Calle El Segundo 7 feet on Calle Alvarado	No, per PDD
Rear Yard Setback	20 feet	18 feet from property line to garage	No, per PDD
Setbacks for High-Rise Buildings	High-rise buildings within Section 14 are exempt from the setback requirements identified in 93.04.00 of the PSZO; however, high-rise buildings	Buildings are setback over 100 feet from residential property to the north	Yes

	shall have a minimum setback of one (1) foot of horizontal setback distance from any residential district for each one (1) foot of vertical rise of the building. Additional site-specific setbacks may be imposed through the CUP process based on the relationship of the high-rise building to its surroundings.		
Minimum Lot Area	2 gross acres	8 gross acres for overall project	Yes
Off-street Parking	Commercial: 1 space per 250 gross floor area or 6 spaces. Live-work: No standard specified; however, in PDDs 3 bdrm units require 2.25 spaces or 38 spaces for the units, plus guest parking of 1 space for every 4 units, or 4 spaces. Total required: 48 spaces	15 parallel parking spaces on private driveway. At least one handicap space will be required 2 covered spaces are provided with each of the 17 units (34 spaces) + 2 spaces in front of garage on driveways (34 spaces) Total provided: 83 spaces	Yes

Building height: The proposed structures are three- and four-stories in size and reaching heights of up to 41 feet and 2 inches. These structures are located along a corridor that contains hotels ranging from three- to five-stories in height. The existing residential project to the north of the site contains two-story residential.

Design Guidelines:

Chapter 7 of the Specific Plan includes Design Guidelines for development proposals within Section 14.

Architectural Character: Modern architecture is a theme that is welcomed by the Specific Plan and the following features are suggested for 50s/60s Modern:

- *Skewed, angular roof forms;*
- *Angled, cantilever roof extensions;*
- *Extension of flooring to walls to outdoors;*
- *Bold, eye-catching accent colors;*
- *Large expanses of glass;*

- *Smooth, uninterrupted walls, often free-standing;*
- *Modern metals, such as aluminum, as decoration.*

The Plan also recommends incorporation of Cahuilla imagery and symbols. Images would include baskets, pottery and hunting. Symbols are regional fauna and flora, parallel lines, anthropomorphic figures, trident forms, concentric circles, maze-like patterns and lightning bolts.

The proposal includes some of the above-mentioned features, such as cantilever roof extensions, extension of flooring to walls and outdoors and modern metals. However, Cahuilla imagery and symbols are not proposed as a part of the design.

Materials and Colors: A number of materials are encouraged:

- *Stucco walls in off-white and/or muted tones;*
- *Wood highlights;*
- *Terra cotta or ceramic tile roofs;*
- *Built-up roof with parapets and metal or canvas awnings;*
- *Decorative ceramic tiles;*
- *Stone, such as flagstone, marble, travertine, granite;*
- *Decorative metal highlights, such as aluminum, copper, wrought iron.*
- *Smooth finish stucco; for example, exterior stucco, applied with a smooth trowel finish and painted with elastomeric paint is preferred.*
- *Screed expansion joints are favored, which are integrated with the design of windows and doors.*
- *Pre-cast concrete panels for structures taller than two stories.*
- *Cut stone, tile or other smooth, durable material on the ground level (the base) for visual interest at the street level and for ease of graffiti removal.*
- *Wood, steel or aluminum and clear glass on storefronts, windows, doors, or atrium spaces.*
- *Use of light or medium neutral colors on buildings is preferred over dark colors which tend to absorb heat and make a building appear more bulky. Strong colors may be used for accents on awnings, door trim, window mullions, window trim, towers or pedestrian amenities, provided such colors are clearly secondary to a more neutral base color.*

Materials include stucco walls, vertical aluminum panels, faux wood siding anodized aluminum windows and steel cable and beams. Colors include a mix of light and dark throughout the project. The proposed colors are both light and dark grays with some

wood-like appearance. The dark gray stucco may be too dark and create a bulky appearance on the upper floors.

Massing / Building Bulk: "Structures should be articulated in form and should not be designed as single massive blocks. To reduce bulk and create visual interest, buildings, particularly those over two stories, should employ architectural devices such as stepped terraces, changes in vertical and horizontal planes, varied roof heights, and multi-planed roof forms." The Specific Plan provides additional design discussion related to pedestrian interest, building entrances, street corner articulation, design treatment on every façade and blank walls. The proposal meets many of these criteria with stepped / terraced buildings and varied roof plans and shapes. Additional articulation or design modification (i.e. variation of color or material, etc.) along Tahquitz Canyon Way may enhance the visual interest and reduce monotonous appearance along this important street front.

Tahquitz Canyon Way. The proposed preliminary landscape design includes a formal pattern of two palms and two street trees along Tahquitz Canyon Way, which is inconsistent with the Streetscape envisioned along this boulevard. The Specific Plan requires palm trees every 60ft on center as well as shade trees between palms and landscape buffers where feasible. Palms should be Washingtonia Filifera. The sidewalk should include pedestrian amenities, such as new pedestrian scale lighting, street furniture and banners.

Re: Proposed Demolition of Kaptur Designed Buildings as Part of Aberdeen Project; Case Nos. 5.1361 PD-375, 3.3820 MAJ and TTM 36876.

Dear Mr. Fagg and Mr. Zicaro:

On behalf of the Palm Springs Modern Committee, we write regarding the proposed demolition of two mid-century modern office buildings designed by noted Palm Springs' architect Hugh Kaptur ("Kaptur buildings") as part of the proposed Aberdeen mixed use project ("Project"), which is planned for the northeast corner of Tahquitz Canyon Way and Calle El Segundo. We would like to confirm that the City will not issue demolition permits for the Kaptur buildings prior to the completion of environmental review for the entire Aberdeen Project and final approval of this Project by the City Council.

The applicant's plans and the Architectural Advisory Committee's January 12 and 26, 2015 staff memorandums regarding the Project make clear that demolition of the Kaptur buildings is a necessary first step to developing the Project as proposed by the applicant. Because the demolition would be part of the Aberdeen Project, it is subject to the same environmental review under the California Environmental Quality Act ("CEQA") as the rest of the Project. (CEQA Guidelines § 15378(a).) This is true even though demolition permits on their own may be considered ministerial. "Where a project

involves an approval that contains elements of both a ministerial action and a discretionary action, the project will be deemed to be discretionary and will be subject to the requirements of CEQA." (CEQA Guidelines § 15268(d); see also *Orinda Assn. v. Board of Supervisors* (1986) 182 Cal.App.3d 1145, 1171 ["demolition was a phase of the overall Project; as such, it was subject to the same CEQA review as the rest of the Project, and the demolition permit could not be issued until the entire CEQA process was completed and the overall Project lawfully approved."].) Please let us know if the City agrees it will not issue demolition permits for the Kaptur building until after environmental review for the Aberdeen Project is complete and the City Council has approved the Project.

Additionally, pursuant to the CEQA section 21092.2, we request to receive a copy of all CEQA notices for the Aberdeen Project as they are completed. We also request immediate notice of applications for or approval of demolition permits for the Kaptur buildings and notice of any public hearings or meetings regarding this Project. If possible, we request these notices be sent via email to acm@cbcearthlaw.com.

Thank you for your time and consideration in this matter.

Sincerely,

Amy Minteer

Re: Tahquitz Plaza by architect Hugh Kaptur, Tahquitz Canyon and Calle El Segundo

To the Planning Commission:

I am writing as an architect, historian, and author of nineteen books on Modern architecture to express my support for the preservation of the Tahquitz Plaza office complex because of its historical significance to Palm Springs and California architecture. Please share this letter with the Planning Commissioners prior to their February 25, 2015 meeting.

I have written two books on Palm Springs architecture (*Julius Shulman: Palm Springs*, Rizzoli International, 2008, and *Palm Springs Weekend*, Chronicle Books, 2001) and can say that these buildings, and the work of architect Hugh Kaptur, play an important role in what is now identified as Palm Springs Modernism.

I am also a consultant on architectural history for the current City of Palm Springs architectural survey. I have already unequivocally recommended Tahquitz Plaza as a significant building in that survey.

My resume is attached. I have written on architecture for the *Los Angeles Review of Books, The Architect's Newspaper, The Los Angeles Times, Architectural Digest, the Journal of the Society of Architectural Historians*, and other journals. I have been the architecture critic of the *San Jose Mercury News* since 1986, received a grant from the Graham Foundation for Advanced Studies in the Fine Arts, and was a National Arts Journalism Fellow at Columbia University.

The research of the importance of Palm Springs Modern architecture in general is very recent. Only a decade ago, the work of now-recognized architects such as William Cody, Donald Wexler, Palmer & Krisel, and E. Stewart Williams was not well known

generally; few Modern buildings now considered iconic were identified as historic then. Since then, our understanding of these and other architects has made us aware of the full dimension of Palm Springs architectural history.

As we continue researching this history, it is clear that the work of Hugh Kaptur makes a significant contribution to the unique character of Palm Springs architecture. This opinion is not mine alone; the newly published book *The Desert Modernists: The Architects Who Envisioned Midcentury Modern Palm Springs* (Desert Publications, 2015) and the documentary film *Quiet Elegance: The Architecture of Hugh M. Kaptur* (Bert Simonis, director, 2014) indicate the clear direction of scholarly opinion on Kaptur's importance.

Briefly stated, Kaptur's significance is this: 1) Palm Springs midcentury Modern architecture is known for its use of Modern concepts to solve the challenges of climate, function, and new materials; 2) an extraordinary group of talented architects lived or worked in Palm Springs, and while they addressed the same problems they expressed a wide range of aesthetic solutions; 3) Hugh Kaptur's aesthetic is unique in Palm Springs, demonstrating the wide range of fertile innovation in the city.

Tahquitz Plaza is an important and well preserved example of Kaptur's unique approach. Rather than drawing on the rectilinear steel and glass geometries of, for example, Richard Neutra, he draws on organic forms and ideas from the American Southwest, and Frank Lloyd Wright. This is seen in Tahquitz Plaza's irregular roofline, the deep, sculpted, curving frames around windows, the eaves and sun shading features, and the integration of outdoor areas interspersed among the offices. This is a strong piece of design that deserves to remain in place.

In addition, its site on Tahquitz Canyon places it in the context of the city civic center, an extraordinary collection of Modern buildings serving civic purposes, and rare in the state.

I am writing this letter *pro bono* because historic architecture of this quality adds to the civic character and quality of city life. In the years before Palm Springs' heritage was fully understood, the city lost many significant structures. Unfortunately, this degradation has continued; the demolition of a major Kaptur design would be a loss to history and the city's urban quality.

Sincerely,

Alan Hess

Flinn Fagg
Director of Planning Services
City of Palm Springs
3200 E. Tahquitz Canyon Way
Palm Springs, CA 92262

Dear Mr. Fagg:

Historic Resources Group, LLC (HRG) is currently under contract to the City of Palm Springs to develop a historic context statement and conduct a citywide historic resources survey of properties constructed prior to 1968.

We wish to note that comments submitted by Alan Hess on February 19, 2015, regarding Tahquitz Plaza are his own opinions. Mr. Hess is a sub-consultant to the survey effort assisting with the development of the historic context. He and other experts have recommended specific sites for study during the survey project. However, survey findings will only address buildings constructed prior to 1968, as specified in our contract with the City of Palm Springs.

We would be happy to respond to any questions or comments.

Sincerely,

HISTORIC RESOURCES GROUP, LLC

Additional Material

Planning Commission
City of Palm Springs
3200 E. Tahquitz Canyon Way
Palm Springs, CA 92263

I was quite shocked recently upon hearing the City of Palm Springs is considering a developer's plan to demolish the Hugh Kaptur-designed Tahquitz Plaza. It seems almost inconceivable to me that these buildings, some of the best work of Hugh Kaptur's career, could be lost. Although recognition of Hugh Kaptur's work is coming later than those of his local peers--Albert Frey, E. Stewart Williams, Donald Wexler, William Cody and other prominent locals that have made Palm Springs world renowned as a destination for fans of architecture and design and the appreciation of mid century architecture in Palm Springs seems to be the major factor in the revival of the town--Kaptur's work is certainly as important and worthy. His achievements mark the latter end of the mid century era. His work is distinctive, unique and in the case of his pueblo modern design at Tahquitz Plaza highly contextual and specific to stylish Palm Springs. Perhaps his work has not become fully appreciated yet as it is relatively recent when compared to Albert Frey's modern work of the '50s or 60s for instance. That is why Kaptur's complex is threatened to some extent---the work is just now at the cusp of rediscovery---just as Frey's and Williams' and Cody's work was a few years ago.

Hugh Kaptur was a local and made an indelible mark on the landscape of Palm Springs and the City should be very proud and respectful of his work, celebrate and preserve it. It does the City well when it signals to the world the pride it has its achievements and the artistry of its local architects and most of all the appearance and history of the town. It is terrible for the town to be known for allowing demolition of another important building. This estimable canvas that is modern architecture in Palm Springs is economically instrumental and vital now for tourist appeal and more importantly many residents now have chosen to invest in the town and to live here simply because of the great modern architecture we have in our midst..

I urge the City to reconsider any decision which would allow the destruction of this important Kaptur complex, it would be a terrible loss and when it is gone it is gone forever.

I served as a member of the Historic Site Preservation Board in 1995-96. I suspect some of you will recall the firestorm that greeted my nomination of five Frey buildings which included the Tramway Gas Station. A developer wanted to demolish that building soon after designation and quite a controversy erupted. I hope you will agree in hindsight the decision to preserve the building was the correct one. I believe you will feel the same way as time passes and the Tahquitz Plaza is preserved. The complex is inventive, playful, and sophisticated with forms and open areas that best represent not only Kaptur at the top of his game but a true reflection of the state of the best modern architecture in Palm Springs at that period.

My written work about Palm Springs and modernism has appeared in the Los Angeles Times, the New York Times, Vogue, and GQ magazine among others.

088

I hope you will present my plea before or during the Feb. 25th meeting.

Sincerely,

Brad Dunning

Item 2A
Planning Commission Meeting
Date: 2-25-15
Additional Material

Honorable Planning Commission
City of Palm Springs
3200 E. Tahquitz Canyon Way
Palm Springs, CA 92263

Dear Members of Planning Commission:

I'm writing to provide some comment about the proposed demolition of the Tahquitz Plaza designed by Hugh Kaptur.

- I am a qualified architectural historian (M.A., Architectural History and Theory, UCLA, 1984) and the author of two books on architecture and the editor of a third.
- I'm also a professional journalist, specializing in real estate, urban design and architecture. My work has appeared widely, including several dozen articles about commercial real estate in The New York Times and Los Angeles Times. I have written extensively on Modern Architecture, historic preservation, public-private projects, zoning and entitlement issues and other topics relating to the design, financing and government approval of buildings.
- I have published three articles about the architecture of Hugh Kaptur, including a chapter in a recently published book of Palm Springs architecture.

Tahquitz Plaza is a landmark building both in the City of Palm Springs and in the career of Hugh Kaptur. Mr. Kaptur, as you probably know, is one of the luminaries of the "Golden Age" of architecture in the city, having worked in Palm Springs continuously since the 1950s.

Mr. Kaptur has told me this is one of his favorite projects, which seems fitting for a building where he maintained his architectural practice for many years. Although Tahquitz Plaza is not a loud or flashy building, it shows many signs of architectural originality and creativity. One of the themes of Mr. Kaptur's work, and Southern California architecture in general, is the ability of local architects to "make lemonade" when faced with limits both in budget and choice of materials (i.e. the least expensive). I quote one of my own articles on Mr. Kaptur:

"Practical projects, like an office complex on Tahquitz, did not always allow such freedom, yet the comparatively restrained project remains one of the architect's favorites. Originally designed in concrete, cost consideration dictated a less expensive wood frame structure. Despite this constraint the Tahquitz buildings manage to look like masonry, due to walls that are sculptured to look massive as concrete. To further the illusion of thick walls, Kaptur provided the Tahquitz buildings with window that appear to be deeply recessed. In other places, windows push outward from the wall surface, as if trying to break free of the building. Similar out-pushing windows can be found at Kaptur's Musicland Hotel, another building that flirts with the illusion of heavy masonry...."

090

In my view, the human experience of cities is largely made up by memorable images, structures and spaces that lend a sense of identity to the community. These buildings mig ht be described as the "sina qua non" of any particular city, meaning that without these structures or images, the city would be diminished and lose part of its "sense of place." Every person who is aware of architecture in Palm Springs is still feeling the loss of the Palm Springs Spa Hotel. In my view, the Tahquitz office complex is one of the "sina qua non" buildings of Palm Springs. It is a tasteful, viable building that has been tenanted since its completion. The Tahquitz is also part of a trio of Kaptur-designed buildings on either side of the street, which increases both its interest and importance.

At the very least, the Commission should give serious consideration to preserving at least the original building of the complex, which included Mr. Kaptur's former office. Perhaps the City Planning Department can incentivize the developer by granting a density bonus on the remaining portion of the parcel, to compensate for any loss of buildable square footage that preservation of the Tahquitz offices may entail. Additionally, the Planning Department mig ht consider the waiver and/or forgiveness of certain development fees, as a further incentive to preserve the Tahquitz offices. Development is vital for the economic wellbeing of all cities. Equally so is the preservation of buildings that define its character in a positive way. It is my deeply held hope that the Planning Commission will find a way to accommodate both the best interests of both the City and the developer.

Respectfully yours,
Morris Newman

Palm Springs, CA 92262

Re: Aberdeen Project and the Proposed Demolition of Tahquitz Plaza (1971, Kaptur & Lapham) (Case Nos. 5.1361 PD-375, 3.3820 and TTM 36876)

Dear Chairman Hudson,

We understand that the Planning Commission will meet on February 25, 2015 to evaluate the merits of "Aberdeen," a mixed-use project consisting of 74 attached and detached residential dwellings, 17 live-work units and approximately 1,568-square feet of retail on 8.05 acres located at the northeast corner of Tahquitz Canyon Way and Calle El Segundo.

Our primary issue with the project is the unnecessary demolition of the architecturally-significant Tahquitz Plaza complex. Further, it is our view that you should not approve this project because it is flawed on many levels and fails to comport with the values and priorities of the city's general plan, historic resources program and sustainability program. The proposed demolition of Tahquitz Plaza directly contradicts many of the city's general plan values and priorities including: "unique architecture" (page 1-12); "Promot[ing] the…use of…existing construction to minimize resource depletion and conserve resources for future generations" (page 1-12); "Creat[ing] unique places that strengthen community identity, offer visual interest, and support lively activity" (page 1-13); "Preserv[ing] and uphold[ing] the high quality of architecture and the unique visual and aesthetic form in buildings…that distinguish Palm Springs from other cities." (page 1-13); and perhaps most to the point, to "Recogniz[ing] the importance of adaptive reuse for architecturally and historically significant resources." (page 1-13).

The importance of the work of architect Hugh Kaptur has only recently become appreciated. He received a star on the Palm Springs Walk of Stars during Modernism Week 2014 and he was the subject of a recent documentary film (*Quiet Elegance: The Architecture of Hugh M. Kaptur*). Additionally, his Tahquitz Plaza complex has been recommended to the contractor currently conducting the city's historic resources survey.

Possible future activities like the historic preservation of the Tahquitz Plaza are cost-effective tools that can be used to leverage private capital, create jobs, revitalize business districts, and stimulate a wide range of other economic activities. Palm Springs property owners, like Nexus Development, can take advantage of federal and state tax credit programs to help rehabilitate historic buildings. Preserving historic character helps support tourism by providing interesting and unique opportunities for visitors.

092

While the staff report recommends the approval of this project, that approval is highly "conditioned" and raises a host of issues with the project. Many of these concerns are driven by the unseemly density of the project and the developer's attempt to wring the maximum value out of the site. In perhaps one of the most audacious and surreal examples of developer logic, on page 11 of the staff report Nexus Development claims as a public benefit "The project itself as it enhances an 'underutilized site' in Section 14." Apparently, the elegant and brilliant siting of the architecturally-significant Tahquitz Plaza complex on a main city thoroughfare is viewed by this developer as a waste of land and therefore a detriment to the community.

Finally, we applaud the city's Architectural Advisory Committee's recent decision to unanimously deny this project. In that decision, only the merits of the project were considered by the AAC, not the architectural significance of Tahquitz Plaza. That issue falls more properly under your purview (as stated repeatedly by the city attorney during the AAC's January 26, 2015 meeting). In that regard, we suggest you recommend to the city council consideration of Tahquitz Plaza as a Class 1 historic site. The Tahquitz Plaza complex should easily qualify as an historic site under criterion 8.05.020(a)(3) (as the Tahquitz Plaza exemplifies a particular period in local history, to wit, the rise of modernist architecture in Palm Springs) and criterion 8.05.020(a)(5) (the work of a "master... architect").

If you have any questions please don't hesitate to contact the foundation at 760-837-7117 or info@pspreservationfoundation.org.

Sincerely,

Erik Rosenow
President

Advocates for Better Community Development
Palm Springs, California

February 25, 2015

To the Honorable Planning Commission
City of Palm Springs, California

Re: 2A. O & M HR, LLC (NEXUS DEVELOPMENT CORP.) FOR THE DEMOLITION OF AN EXISTING DEVELOPMENT AND PARKING AREA TO CONSTRUCT "ABERDEEN"; A MIXED-USE PROJECT CONSISTING OF (74) ATTACHED AND DETACHED RESIDENTIAL DWELLINGS, (17) LIVE-WORK UNITS AND APPROXIMATELY 1,568-SQUARE FEET OF RETAIL ON 8.05-ACRES LOCATED AT THE NORTHEAST CORNER OF TAHQUITZ CANYON WAY AND CALLE EL SEGUNDO, ZONE REO AND CU (CASE NOS. 5.1361 PD-375, 3.3820 MAJ AND TTM 36876). (DN)

To Whom It May Concern:

On behalf of Advocates for Better Community Planning (ABCD), we are requesting that the Planning Commission recommend denial of the demolition project, Planned Development District 375, Architectural Permit, and Tentative Tract Map based upon a failure of the project to conform to the City's General Plan, the Section 14 Specific Plan, and to conform to the surrounding heights, mass, design, architecture, and function of the surrounding business area. The pending Mitigated Negative Declaration also fails to adequately assess environmental impacts of the proposed demolition project and destruction of an architectural heritage, or HR affordable housing impacts, through failure to consider adaptive re-use, through failure to use multi-family housing in the design, or introduce a viable alternative to the project as proposed – such as adaptive reuse of the current structures.

This project, as proposed, takes a functioning, viable business environment, immediately across from the Regal Theater, and proposes to demolish the design, architecture, and function of the District, and to severely disrupt business functions for most likely a two-year period of time, during a time when the protections of State Redevelopment are defunct, and there is absolutely no evidence of blight in this District -- to the contrary.

Very little has been introduced as a justification for the demolition of existing buildings within a thriving District, and it is a bit frightening to conclude that the City is basically free to do this anywhere within the City, so that a developer can further maximize profit and increase the density and height of a commercial area, and slowly erode the architectural heritage and scale of downtown Palm Springs. This action sets a bad precedent, and needs strong justification – but at the least, it requires a full Environmental Impact Report!

The primary building proposed for demolition is an architectural treasure built by the prominent architect, Hugh Captor. Although Mr. Captor's building was constructed subsequent to 1969, and does not qualify for a Class III historic designation, this is a moot point in terms of its historic value, which can be assessed independently of age. An example of this is the Palm Springs Art Museum (PSAM), a Class I historic resource constructed subsequent to 1969. What has complicated the issue of historic preservation is the rather awesome backlog of buildings awaiting assessment by the City, as the Historic Site Preservation Board is underfunded. Accordingly, it is not surprising the building has not yet been catalogued. But at the least, this building is a treasure and is highly valued by a large and very active segment of the historic preservation population of Palm Springs.

Submitted to
Planning Commission

094
Case #

The applicant is further proceeding in violation of the General Plan and Section 14 Specific Plan standards as follows, and has failed to consider viable environmental alternatives:

1. Table 6-1 of the Section 14 Specific Plan *prohibits* single-family residential buildings within the REO and RA land use classifications. Palm Springs is a charter city, but without doubt, it must comply with the General Plan and Specific Plan *legislative* standards that guide development and build-out.
2. The applicant is using a permit that is not authorized within Chapter 6 Implementation Section of the Section 14 Specific Plan, which limits land use entitlement to permitted uses, land use permits, and conditional use permits. A Planned Development Permit (PD 375) is a rezone action, incompatible with a Specific Plan that has already rezoned the area. *Reference page 6-1 and Table 6-1 of the Section 14 Specific Plan*
3. The applicant then uses the PDD flexibility procedures to justify the imposition of single-family residential within an area where it is expressly prohibited, and alters the development standards of the Specific Plan into a new configuration with greater economic benefit to the developer.
4. The proposed development creates cumulative impacts by destroying further high density residential low-income housing stock, because Section 14 Specific Plan anticipated multi-family residential for renters or low income persons, and the reservation of this housing stock was counted in the City's housing element to meet its allocation of acreage for the Regional Housing Needs Assessment. Instead, through a series of previous permits and this project, the City has slowly replaced the HDR classification with non-permitted single-family residential. They have used their new revised ordinance that eliminates the minimum threshold for residential. This should be evaluated in an Environmental Impact Report, and be considered non-compliance with its Housing Element and General Plan.
5. The Specific Plan was amended to reflect the recent amendment of the City's housing ordinances to eliminate minimum thresholds of density. This leaves the Specific Plan out of compliance with the General Plan and its State housing obligations.
6. The Specific Plan requires a density of 30 du/ac. By proposing 11 du/ac, the applicant violates the General Plan, Specific Plan, and State housing law.
7. The Specific Plan requires a minimum lot size of two acres, and the project lot size is considerably smaller, and it is accordingly, not consistent with the Specific Plan or General Plan.
8. By failure to require a Environmental Impact Report, the City has failed to consider the growth-inducing impacts of demolishing a viable business district and replacing it with a structure that does not conform to the historical character of the area, that does not match its density or form or height, nor does it address adequate housing in the mixed-use residential area. This change in the District may induce further incompatible changes.
9. The Mitigated Negative Declaration was not attached to the staff report, and has not been considered in conjunction with the staff report assessment. Accordingly, the decision makers do not have adequate information about impacts to make a proper recommendation to the City Council. The general public should have been given access in like-kind to the staff report, rather than be forced to make a trip to City Hall and get a non-electronic copy of the Initial Study.
10. The PDD replaces the development standards of the Specific Plan with new housing, new lot size, as a gated community where prohibited, inadequate street fronts, inadequate side, rear and front-yard setbacks, and not the least – an unrealistic examination of the impact of added height to the buildings.

With regard,

Frank Tysen

Case # 2A

Wednesday, March 23 2015

To the Honorable Members of the
Palm Springs Planning Commission
City of Palm Springs, California

2A. O & M HR, LLC. (NEXUS DEVELOPMENT CORP.) FOR THE DEMOLITION OF AN EXISTING DEVELOPMENT AND PARKING AREA TO CONSTRUCT "ABERDEEN"; A MIXED-USE PROJECT CONSISTING OF (74) ATTACHED AND DETACHED RESIDENTIAL DWELLINGS, (17) LIVE-WORK UNITS AND APPROXIMATELY 1,568-SQUARE FEET OF RETAIL ON 8.05-ACRES LOCATED AT THE NORTHEAST CORNER OF TAHQUITZ CANYON WAY AND CALLE EL SEGUNDO, ZONE REO AND CU (CASE NOS. 5.1361 PD-375, 3.3820 MAJ AND TTM 36876). (DN)

To Whom It May Concern:

I am a resident of the City of Palm Springs, with an active interest in historic preservation, and commitment to the small-town village atmosphere planned for in the City's General Plan. I ask the following of the Planning Commission, but also with a conclusion that these acts of proper environmental consideration are mandated by law:

1. I am asking the City to set aside its finding in the Mitigated Negative Declaration that the project has "no impact" on cultural resources, nor does it "a) Cause a substantial adverse change in the significance of a historical resource as defined in 15064.5."
2. I am asking that the City properly refer this project proposal to the Historic Site Preservation Board (HSPB) for a full report and consideration of whether the two Hugh Captor buildings on the site proposed for demolition is a resource that shall be considered by the lead agency to be 'historically significant' as buildings that meet the criteria for listing on the California Register of Historic Resources. I refer the Planning Commission to the comment letters on file from distinguished members of the preservation community.
3. I am asking that the City make a finding on the historical significance of the Hugh Captor buildings at issue as to whether they qualify as discretionary historic resources. That finding should be informed by the evaluation of the HSPB.
4. I am asking the City to review and revise its findings at page 24 of the Mitigated Negative Declaration "Discussion of Impacts a) No Impact" to reflect that the criteria for a finding of impact reflect CEQA Guidelines 15064.5 subd. (a) (3)&(4).
5. I am asking the City to review and revise its findings in the staff report that concludes there is no historic impact of significance in the decision to demolish the Hugh Captor buildings, because they have never been locally registered or state registered as an historic resource. This language is misleading to the decision makers on this project.
6. I am asking the City to review and revise its findings on impacts to Land Use and Planning in the Mitigated Negative Declaration at page 37, wherein it concludes that the project does not "conflict with any applicable land use plan, policy, or regulation of an agency with jurisdiction over the project, (including but not limited to the general plan, specific plan, ... Or zoning ordinance). Adopted for the purpose of avoiding or mitigating an environmental effect." The Discussion of impacts does not even mention the fact that the development standards are not in compliance with the Specific Plan; nor does it reference the fact the project proposes single-family residential in a Specific Plan area where single-family residential is specifically prohibited! (RA and REO). In fact, the discussion at b) is factually

inaccurate, because it discusses multi-family residential buildout. The factual inaccuracy and lack of consistency has impacted mitigation measures and findings, and these need to be corrected.

7. I am asking the City to properly evaluate and mitigate the impact of eliminating multi-family housing within a Specific Plan area that provides for MFR to the exclusion of SFR, along with the attendant affordable housing impact that might arise from exclusion of MFR housing where it is intended to be built.
8. I am asking the City to conform its findings of consistency with the general plan and specific plan for Section 14, to reflect the actual non-compliance with building standards and housing type. (see previous letters on file by Frank Tysen)
9. Most importantly, I am asking for the City to provide a full EIR evaluation so that the environmental alternative of conserving the Hugh Captor buildings can be properly considered. The MND is fatally defective without this assessment.

Please consider the following language from Valley Advocates v. City of Fresno (2008):

VALLEY ADVOCATES et al, v. CITY OF FRESNO et al.
72 Cal.Rptr.3d 690 (2008) 160 Cal.App.4th 1039

OPINION

. . . . . "We reach the following conclusions. First, at the meeting where City determined the project was exempt from CEQA, it was misinformed about its discretionary authority to determine the buildings were historic resources. *As a result, City cut short its inquiry into the historic significance of the buildings and relied too heavily on its earlier decision not to list the buildings in the local register of historic resources.*" [emphasis added] *Valley Advocates* at page 694.

DISCUSSION . . . . .

I. Background on CEQA's Treatment of Historical Resources

"Section 21084.1 and its implementing Guidelines establish three analytical categories for use in determining whether an object is an historical resource for purposes of CEQA. (See *League for Protection of Oakland, supra*, 52 Cal.App.4th at pp. 906-907, 60 Cal.Rptr.2d 821 [three categories of historical resources identified as mandatory, presumptive and discretionary].)" *Valley Advocates* at page 698

II. Mandatory Historical Resources
A. Applicable Text of CEQA and Guidelines

"The category of mandatory historical resources is based on the second sentence of section 21084.1, which states: 'For purposes of this section, an historical resource is a resource *listed in, or determined to be eligible for listing in, the California Register of Historical Resources.*' [emphasis added]

The Guidelines define the scope of the category of mandatory historical resources by adding one limitation to the text of the second sentence of section 21084.1. Specifically, Guidelines section 15064.5, subdivision (a) (1) provides that "the term 'historical resources' shall include ... [¶] ... [a] resource listed in, or determined to be *699 eligible *by the State Historical Resources Commission* [] for listing in[,] the California Register of Historical Resources (Pub. Res.Code § 5024.1, Title 14 CCR, Section 4850 et seq.)." (Italics added.)" *Valley Advocates* at page 698-699

III. Presumptive Historical Resources
A. Applicable Text of CEQA and Guidelines

"The category of presumptive historical resources is created by the third sentence of section 21084.1, which states:

"Historical resources included in a local register of historical resources, as defined in subdivision (k) of Section 5020.1, or deemed significant pursuant to criteria set forth in subdivision (g) of Section 5024.1, are presumed to be historically or culturally significant for purposes of this section, unless the preponderance of the evidence demonstrates that the resource is not historically or culturally significant."

The Guidelines reiterate this definition by stating that "the term 'historical resources' shall include ... [¶] ... [a] resource included in a local register of historical resources, as defined in section 5020.1(k) of the Public Resources Code or identified as significant in an historical resource survey meeting the requirements of section 5024.1(g) of the Public Resources Code, shall be presumed to be historically or culturally significant. Public agencies *701 must treat any such resource as significant unless the preponderance of evidence demonstrates that it is not historically or culturally significant." (Guidelines, § 15064.5, subd. (a)(2).)

Under these provisions, there are two types of presumptive historical resources. The first type is a resource included in a local register of historic resources. A "local register of historic resources" is defined as a "list of properties officially designated or recognized as historically significant by a local government pursuant to a local ordinance or resolution." (§ 5020.1, subd. (k).) The second type of presumptive historical resource is a resource identified as significant in certain surveys of historical resources. (§ 5024.1, subd. (g).) The historical resource survey must meet all four of the criteria set forth in section 5024.1, subdivision (g).[8]" *Valley Advocates* at 700-701

IV. Discretionary Historical Resources

A. Text of CEQA

"The category of discretionary historical resources is derived from a combination of *702 the second sentence and the last sentence of section 21084.1.

The text of the second sentence of section 21084.1 states: "For purposes of this section, an historical resource is a resource listed in, or determined to be eligible for listing in, the California Register of Historical Resources." [10]

The last sentence of section 21084.1 states:

"The fact that a resource is not listed in, or determined to be eligible for listing in, the California Register of Historical Resources, not included in a local register of historical resources, or not deemed significant pursuant to criteria set forth in subdivision (g) of Section 5024.1 shall not preclude a lead agency from determining whether the resource may be an historical resource for purposes of this section." *Valley Advocates* at pp. 701-702.

B. Provisions in the Guidelines . . . . .

2. Guidelines section 15064.5, subdivision (a)(3)

"Guidelines section 15064.5, subdivision (a)(3)[13] addresses aspects of a lead agency's *703 *discretionary authority* in two ways. First, it limits what the lead agency is allowed to do. Second, it appears to impose an affirmative obligation on the lead agency. [emphasis added]

The limitation is stated at the beginning of Guidelines section 15064.5, subdivision (a)(3): "Any object [or] building ... which a lead agency determines to be historically significant ... may be considered to be an historical resource, provided the lead agency's determination is supported by substantial evidence in light of the whole record." The Guidelines use the word "may" to identify discretionary authority. (Guidelines, § 15005, subd. (c); see § 15 ["may" defined].) Thus, Guidelines section 15064.5, subdivision (a)(3) confirms the lead agency's discretion to treat an object or building as an historical resource for purposes of CEQA and limits that discretion to situations where substantial evidence supports the lead agency's determination of historical significance.[14]

The second sentence of Guidelines section 15064.5, subdivision (a)(3) contains the following mandatory language: "Generally, a resource *shall* be considered by the lead agency to be 'historically significant' if the resource meets the criteria for listing on the California Register of Historical Resources...."[15] (Italics added.) The word "shall" is used in the Guidelines to identify "a mandatory element which all public agencies are required to follow." (Guidelines, § 15005, subd. (a).)" *Valley Advocates* at page 702-703

---

3. Discretionary authority. . . . .

C. Application of Interpretation to Facts of this Case

"The May 3, 2005, staff report that recommended the City Council affirm the issuance of the categorical exemption for the project addressed whether the administrative record contained substantial evidence that the Flats were an historic resource:

'The Subject Building is not a 'historic resource' under CEQA because it does not fall into any of the categories within the definition of 'historic resource' in CEQA. That is, the Subject Building is not on a State register, it has not been found to be eligible for a State register by the State Historic Preservation Commission, it is not on a local register, and Council has not treated nor chosen to treat the building as historical." (Italics added.)" *Valley Advocates* at p 704

The staff report, Unruh's advice, and a statement made by an attorney from the city attorney's office misinformed the City Council about its discretion. The City Council was not told that it had a choice to make at the May 3, 2005, hearing. It was told that it already had determined the Flats were not historical resources and that the previous determination answered whether the Flats were historic resources or not.

Instead, the City Council should have been informed of the following. First, its prior determination to deny the listing application meant that the Flats did not qualify for CEQA's presumptive historical resource category.[16] Second, a listing determination and a CEQA determination are not the same thing. Third, at a minimum, the City Council had a discretionary election to make at the May 3, 2005, hearing. Specifically, it could elect to separately consider whether the Flats were an historical resource for purposes of CEQA's discretionary historical resources category.

"Because the City Council was misinformed about its discretion to make such an election, it follows that the City Council did not, in fact, exercise its discretion and make such an election." *Valley Advocates* at page 704.

---

2. Informational errors

"In some contexts presented under CEQA, a prejudicial abuse of discretion occurs when the absence of relevant information precludes informed decision making by the public agency. (E.g., *San Joaquin Raptor Rescue Center v. County of Merced* (2007) 149 Cal.App.4th 645, 653, 57 Cal. Rptr.3d 663.)

This case involves something more than the simple absence of relevant information. *Here, the relevant information was absent and incorrect information was provided in its place."* [emphasis added] *Valley Advocates* at page 705.

B. Discretionary Historical Resources

"Prior determinations regarding the listing of a building on a local register are relevant to the presumptive historical resource category, but prior determinations not to list a building or include it in a survey do not control whether the object or building may be treated as an historical resource under CEQA's discretionary historical resource category. (See Guidelines, § 15064.5, subd. (a)(3)&(4).)".....

"Accordingly, the decision not to list a building on a local register does not necessarily resolve all factual questions and

discretionary aspects of the City Council's inquiry into whether the building is an historical resource for purposes of CEQA's discretionary historical resource category." *Valley Advocates* at page 708.

VII.-IX.[**]
DISPOSITION

"The judgment is reversed. The matter is remanded to the superior court with directions to vacate its order denying the petition for writ of mandate and to enter a new order that grants the petition for writ of mandate and directs City to (1) set aside its approval of the site plan review Application S-04-399, (2) set aside its findings that the proposed project is categorically exempt, and (3) conduct a preliminary review *712 that properly considers the discretionary historical resources category." *Valley Advocates* at page 711-712.

Thank you for your kind consideration.

To: Flinn Fagg; David Newell
Subject: Aberdeen Project / Historic Ordinance (1969)
Attachments: Chapter 8.05 HISTORIC PRESERVATION.pdf; 2015.02.25 PCSR Preservationist Resumes.pdf

Dear Mr. Fagg:

With kind consideration for the hard work put into this project, I wanted to ask questions about the City's comments given to the Planning Commission at Wednesday's hearing, and make some recommendations. Would you also submit this email (letter) on the record of Aberdeen for inclusion in the staff report for City Council review?

Could you please clarify for me at the hearing with the Planning Commission: (1) what you actually told them regarding continuance and review jurisdiction; and (2) if (on hindsight) you would alter any of those statements.

I did not understand some of the limitations imposed upon review of the historic nature of the building, as you can tell from my comment letter submitted; nor did I understand the limitations on a continuance (in general), or denial of jurisdiction to refer the matter to the HSPB.

Please forgive if any of my understandings are incorrect, my Adobe Flash will not function or allow me to update, so I can't view the video of the proceedings until this is repaired.

Although you may want to respond in writing, I would also welcome a meeting with you or staff to clarify some of this before the City Council hearing on Aberdeen, and I really believe some of the historic preservation folks might be willing to meet as well. It is my impression that the City has always been very generous in resolving issues with the general public through constructive meetings, particularly when an issue reaches this level of controversy:

(1) Continuance: The Planning Commission was told they did not have the option of continuing the matter because of ordinance limitations. May I please know what ordinance or rule or limitation the City was referring to? It was not cited at the hearing. Is there a time limitation running under the Permit Streamlining Act? If so, may I have a sense of that timeline? What the time limitation is, what event triggered its time frame, what date terminates the legal time to review?

I was uncomfortable that "a yes or no vote and nothing else" was the City's adamant position, because the applicant / developer was in the audience demanding this! Nexus (O&M HR, LLC) appeared to be exercising the jurisdiction, rather than the City or the Planning Commission, and this is problematic.

This pressure to move up to City Council has happened in a context where the AAC and the Planning Commission clearly have major problems with this project, as proposed, and have refused to recommend approval.

The fact the City also recently passed an urgency ordinance shortcutting committee and commission review, and an unusual appearance of the City Attorney warning the Commissions / Committees against bias, together

with what appears to be a failure to properly assess historic impacts under CEQA - combines to create pressure that may not be in the best interest of anyone.

I so strongly recommend that this process slow down for public intervention. It is so clear to me the developer has chosen to expedite timewise, rather than spend requisite time on the issue of the historical significance of the Hugh Kaptur buildings.

The obligation of the City is to keep the scope of jurisdiction open during these administrative hearings, so that the record is not truncated.

(2) HSPB Referral: The Planning Commission was told by the City that the ordinance language of the City did not allow the Planning Commission to make a referral back to the Historic Site Preservation Board (HSPB) to determine the buildings' historical significance for purposes of CEQA (Commissioner Weremiuk asked staff about my comment letter on Valley Advocates - and the claim that the HSPB should have reviewed this building as a "discretionary historical resource" under CEQA, with an advisory opinion to the Planning Commission and City Council.)

I believe the City also (somewhat separately) concluded the HSPB did not have jurisdiction to review this building for listing or designation as a local historical resource.

At the hearing you stated that the HSPB is limited to review of buildings constructed on or before 1969, therefore, the matter could not be referred to the HSPB on any basis. Later (I am not sure) -- there may have been a comment that "perhaps there could be a referral," but ultimately the City told the PC this matter could not be delayed or continued, and must go "up" to City Council. Is this, in fact, correct?

On the issue of Aberdeen historic resources (and the Hugh Kaptur buildings), I recommend the City clarify HSPB jurisdiction in four important ways:

(a) whether the ordinances and/or practices of the City grant authority to the HSPB to review CEQA historicity on a demolition permit to advise the AAC, Planning Commission, and City Council on whether the buildings are historical in nature under the CEQA Guidelines for Cultural Resources, and if so, whether the buildings fall within the classification of (a) mandatory; (b) presumptive, or (c) discretionary, for purposes of setting a proper record of decision for CEQA.

(b) associated with Section (a), whether the HSPB has jurisdiction to review and advise whether there is "substantial evidence on the record," given Mr. Hess' testimony and that of others, to conclude that the Hugh Kaptur buildings "meet the criteria for listing on the California Register of Historic Resources"; and

(c) whether, as part of its review, the HSPB has jurisdiction to advise and recommend consideration in the commercial district of adaptive reuse of historic resources (Kaptur buildings) as an environmental alternative to the proposed project, or including any specialized conditions of approval or suggested mitigation and monitoring conditions that might be appropriate for the actual proposed project, if applicable; and

(d) whether an applicant, the City, and/or the HSPB can initiate an application for local listing eligibility during the pending of an application for demolition permit for the historic buildings at issue (with a clear understanding that local listing or local eligibility are NOT germane to the CEQA responsibilities!).

(3) Substantial Evidence of Historicity: Alan Hess is a credentialed historian and nomination expert that stated the following in his letter on file in the Aberdeen project:

"Briefly stated, Kaptur's significance is this: 1) Palm Springs mid century Modern architecture is known for its use of Modern concepts to solve the challenges of climate, function, and new materials; 2) an extraordinary group of talented architects lived or worked in Palm Springs, and while they addressed the same problems they expressed a wide range of aesthetic solutions; 3) Hugh Kaptur's aesthetic is unique in Palm Springs, demonstrating the wide range of fertile innovation in the city.

Tahquitz Plaza is an important and well preserved example of Kaptur's unique approach. Rather than drawing on the rectilinear steel and glass geometries of, for example, Richard Neutra, he draws on organic forms and ideas from the American Southwest, and Frank Lloyd Wright. This is seen in Tahquitz Plaza's irregular roofline, the deep, sculpted, curving frames around windows, the eaves and sun shading features, and the integration of outdoor areas interspersed among the offices. This is a strong piece of design that deserves to remain in place." *Comment Letter of Alan Hess on file, dated February 19, 2015.*

This description, without a doubt, should qualify the Hugh Kaptur buildings for review under CEQA and independently qualify it for consideration as a Class I structure if the application is still timely (and I do not see anything barring that application).

I see nothing in the ordinances that bars qualified public members, HSPB, or City Council from initiating a review or nomination simply because a demolition and PDD permit is in process. I would want to be sure that the City, in its hearing process, has done nothing to discourage the public or HSPB from concluding this application is permissible -- at least not without carefully documenting the legal bar to filing an application.

(4) Distinguish CEQA: Please note through all of this discussion -- my position in my comment letter cites *Valley Advocates* -- there is a vast difference between a request for designation and listing as a local resource, and the requirements of review for CEQA with its informational and mitigation responsibilities!

Without a doubt, the City should have provided a clear record of review to establish whether the Kaptur buildings qualify as a discretionary resource under CEQA Guideline 15064.5 sub (a) (3) & (4). That clearly has not occurred:

"The second sentence of Guidelines section 15064.5, subdivision (a)(3) contains the following mandatory language: "Generally, a resource shall be considered by the lead agency to be 'historically significant' *if the resource meets the criteria for listing on the California Register of Historical Resources....*" [15] (Italics added.)" [emphasis added] Valley Advocates at 702-703

Mr. Hess' letter certainly would have raised this issue for environmental consideration. Mr. Hess' analysis and findings, together with the impressive resume and credentials, appear to create substantial evidence on the record for administrative consideration on the building historicity.

Reviewing the Mitigated Negative Declaration proposed for adoption by the City Council, the reasoning appears fatally defective and falls right into the trap of *Valley Advocates*. By CEQA discussion, the City disqualifies the buildings for CEQA historicity as a potentially significant resource ONLY because (quoting the MND).

Discussion of Impacts: a) No Impact. "The existing buildings are not listed as a state historical resource of significance, nor are the buildings locally listed with the City of Palm Springs. No

impacts to historic resources are expected to occur as a result of build out of the proposed project."

I, again, return to the finding of Valley Advocates, invalidated the project permit for insufficient CEQA review and lack of jurisdiction to act:

B. Discretionary Historical Resources

"Prior determinations regarding the listing of a building on a local register are relevant to the presumptive historical resource category, *but prior determinations not to list a building or include it in a survey do not control whether the object or building may be treated as an historical resource under CEQA's discretionary historical resource category.* (See Guidelines, § 15064.5, subd. (a)(3)&(4).)"..... [emphasis added]

"Accordingly, the decision not to list a building on a local register does not necessarily resolve all factual questions and discretionary aspects of the City Council's inquiry into whether the building is an historical resource for purposes of CEQA's discretionary historical resource category." *Valley Advocates* at page 708.

(5) Stay of Demolition: Throughout the entire review period of Aberdeen, the City appears to have always taken (or implied) a public position that it would be null and void for a third party or for any member of HSPB to initiate an application for review and designation of the site for historic significance or listing for these buildings (aside from CEQA). Certainly that is true if they have advised the public that the building must be constructed on or before 1969 to qualify. Can the City now profit (laches) from misleading the public (if, in fact, they have), and preclude the timeliness of an application for listing?

Looking at Ordinance 8.05, it appears to anticipate action by the HSPB during a period when a demolition permit and project review is in progress, for Ordinance 8.05 clearly states:

8.05.170 Stay of demolition.

"At any time after the initiation of proceedings for designation of an historic site or district, the historic site preservation board may, upon its own motion or upon the application of any interested person, *issue an order staying any proposed or threatened demolition* or alteration of the exterior of any structure within or upon such proposed site." [emphasis added]

8.05.166 Initiation of proceedings—National Register.

(a) *The historic site preservation board may initiate proceedings* for designation of an historic site or district or the recommendation of a property for nomination to the National Register by motion, and shall then hold at least one public hearing prior to making a recommendation to the city council.

(b) *The city council may initiate proceedings* for designation of an historic site or district or the recommendation of a property for nomination to the National Register by motion, and shall then refer to the matter to the historic site preservation board for public hearing and recommendation.

(c) Upon final action by the city council recommending a property for nomination to the National Register, the recommendation will be forwarded by appropriate application to the state of California Department of Parks and Recreation. (Ord. 1320 § 7, 1988)

8.05.200 Procedure upon application.

(a) *Upon the filing of an application,* the secretary of the board shall set the matter for review and shall give notice in accordance with the rules of the board. The board shall make its decision within forty-five days from the date the application is filed. If the board fails to act within forty-five days, the application is considered approved unless the applicant and the board agree to an extension of time. [emphasis added]

I am assuming any party may file for an application, as long as they submit the required data, since the ordinance does not specify otherwise.

(6) Brown Act: I did want to alert the City that the posted agenda (notification) for this PC hearing looks problematic to me. It states in the public notice, "O&E HR, LLC, *for the demolition* of an existing *project* and parking area *to construct*.....[project description]" The staff report states, "Recommend the City Council adopt the mitigated negative declaration and *approve the project,* subject to conditions." [emphasis added]

For purposes of adequate public notice on the agenda, I would recommend referring to the underlying permit typology. Approving "a project" doesn't tell us what is being approved. Decision makers approve land use entitlements and the supplemental permits, and often in stages. Where in the description does this say whether this is a PDD, a CUP, a combination, a demolition permit that will be issued before or after project approval? A carefully crafted description answers those questions. The public needs to know whether Planning Commission has final approval or is making a recommendation to the City Council.

(7) Demolition Permit Premature: Frank Tysen raised the issue that it is premature to issue a Demolition Permit when the underlying project has not been approved, and I agree. What will happen if the historical structure is demolished and the subsequent project is denied? It sets up a perfect bias. Once demolished, with an empty lot, impartiality of review cannot be maintained, because the City will be desperate to correct the blight. If demolished ahead of a CEQA determination on the MND (or need for an EIR), the consideration of environmental alternatives is destroyed as an option, and mitigation considerations are truncated or destroyed. This cannot possibly be legal.

This, again, is why public notice must show the action item. Is the demolition permit under review? Who has final authority? What happens to the unresolved PDD and MND?

(8) Valley Advocates Finding: The Fourth District Court of Appeal spoke overtly about the failure to properly instruct the decision making body of their options in classifying the structure as an historic resource. The result of not doing so prejudiced the final election of the body on whether to approve, deny, or refer. I maintain the City has created the same bias through failure to properly instruct the Planning Commission on the option to elect or consider the Kaptur buildings as historic resources, or precluding them from seeking legal advice on this issue, and/or referring the matter for determination to the HSPB. Valley Advocates discusses the issue as such:

> "Instead, the City Council *should have been informed of the following.* First, its prior determination to deny the listing application meant that the Flats did not qualify for CEQA's presumptive historical resource category. [16] Second, *a listing determination and a CEQA determination are not the same thing.* Third, at a minimum, *the City Council had a discretionary election to make at the May 3, 2005, hearing. Specifically, it could elect to separately consider whether the Flats were an historical resource for purposes of CEQA's discretionary historical resources category.* "Because the City Council was misinformed about its discretion to make such an election, it follows that the City Council did not, in fact, exercise its discretion and make such an election." [emphasis added] *Valley Advocates* at page 704.

Because of advice of staff at the Planning Commission hearing, the Planning Commission was denied the full range of opportunities to consider the implications of the Hugh Kaptur buildings as discretionary historical resources.

Thank you so much for your review of this material.

David Newell
Associate Planner
City of Palm Springs
3200 E. Tahquitz Canyon Way
Palm Springs, California 92262

Dear Mr. Newell,

RE: **ABERDEEN PROJECT INITIAL STUDY MITIGATED NEGATIVE DECLARATION**

Thank you for including the California Office of Historic Preservation (OHP) in the environmental review process for the proposed Aberdeen Project. Pursuant to the National Historic Preservation Act and the California Public Resources Code, the State Historic Preservation Officer (SHPO) and the OHP have broad responsibility for the implementation of federal and state historic preservation programs in California. We have a history working with the City of Palm Springs (Lead Agency) through our Certified Local Government Program. Our comments are offered with the intent of protecting historic and cultural resources, while allowing the City of Palm Springs to meet its program needs. The following comments are based on the information included in the Initial Study/Mitigated Negative Declaration (IS/MND) for the Aberdeen Project.

The proposed project will construct an 8 acre mixed-use development with 74 residential units, and 17 live-work units, with approximately 1,568-square feet of retail space. The project site is partially occupied by the Tahquitz Plaza office complex, which would be demolished as part of the proposed project. In order to adopt the IS/MND as an adequate environmental document the in compliance with CEQA, the decision making body must find that it has adequately addressed environmental impacts. If the document has failed to identify significant environmental impacts, the decision making body should not adopt the findings as adequate.

Pursuant to the city's Municipal Code § 8.05.135, the City's Preservation Board is responsible to "conduct or cause to be conducted such preliminary surveys, studies or investigations as it deems necessary to adequately inform the historic site preservation board and city council prior to public hearing, and shall make available to any interested person the results of any such survey, study or investigation." In keeping with this provision of the municipal code, the City of Palm Springs commissioned a city-wide historic architecture survey. This survey effort is currently ongoing. As part of this survey effort, we understand the Tahquitz Plaza office complex was evaluated and identified as a historical resource. These findings were provided to the Lead Agency as

part of the CEQA comment process in a letter dated February 19, 2015, authored by Alan Hess, a specialist in the field of architectural history.

The discussion of environmental impacts within the IS/MND states that the Tahquitz Plaza office complex is not a historic resources as defined in the CEQA Guidelines § 15064.5 because "[t]he existing buildings are not listed as a state historical resource of significance, nor are the buildings locally listed with the City of Palm Springs." Yet, CEQA Guidelines § 15064.5 (4) states that "[t]he fact that a resource is not listed in, or determined to be eligible for listing in the California Register of Historical Resources, not included in a local register of historical resources, or identified in a historical resources survey does not preclude a lead agency from determining the resource may be a historical resource [for the purposes of CEQA]..." There is no mention in the IS/MND of the ongoing city-wide survey, nor any evaluation of eligibility for the Tahquitz Plaza office complex. In light of the preliminary findings of historical significance described in the Alan Hess letter, we encourage the Lead Agency to act within its discretion, provided in § 15064.5(4) of the CEQA Guidelines, to consider the Tahquitz Plaza office complex as a historic resource for the purposes of CEQA. If the Lead Agency is to consider the Tahquitz Plaza office complex a historic resource, it could not reasonably adopt the findings in the IS/MND as being in compliance with CEQA and adequately addressing significant environmental impacts.

If the Lead Agency chooses to exercise its discretion under § 15064.5(4) of the CEQA Guidelines and treat the Tahquitz Plaza office complex as a historic resource, it may be possible to modify the proposed project to avoid impacts to the historical resources. If the project is modified to avoid demolition, impacts to historic resources could be avoided. In this way, the Lead Agency could modify the IS/MND, and avoid the time and cost involved in preparing an Environmental Impact Report (EIR).

If you have questions, please contact Sean de Courcy of the Local Government and Environmental Compliance Unit, at (916) 445-7042 or at Sean.deCourcy@parks.ca.gov.

Sincerely,

Carol Roland-Nawi, Ph.D.

RECEIVED
2015 APR -7 PM 4:3.

Palm Springs City Council

My name is Hugh Kaptur, I have spent fulltime, the last 60 years of my life living in Palm Springs, earning a living in the field of architecture. In the eighties and nineties I've contributed my time, as a member to the city Architectural Review Board and the Planning Commission. I have a deep respect for you, contributing your time to our great city as well.

Reviewing the Aberdeen project, I have some serious concerns as to the concept that is being presented. They are from a historic standpoint, good planning practices, and personal.

Our forefathers from the fifties envisioned Tahquitz Mccallum to be a grand boulevard connecting the City Airport and the Downtown. Their dream was cemented into the Palm Springs General Plan and Zoning Ordinances along this boulevard. Their plan was high end development along its frontage, to create an impressive avenue for visitors, visiting Palm Springs. To achieve this goal, strict conditions were written into the Zoning Ordinance as to what would be allowed. The Aberdeen project as presented violates all of the conditions set forth in the zoning, including setbacks, heights, density, parking and use. This dream our forefathers had for Palm Springs and Tahquitz Mccallum has been handed down through the years, council to council and respected. In my opinion it is your duty, to continue that legacy, and enforce our General Plan and Zoning Ordinances.

This concept being presented of small cubicles with live workings spaces, is not new, it's been going on for hundreds of years, and under certain conditions works well. The Pacific Coast and other similar areas, where wide boardwalks and several 100 yards of Sandy Beach overlooking the Ocean, it has become particularly popular. These areas draw hundreds if not thousands of vacationers and beachgoers to enjoyed nature's gifts. These areas also have wide barriers separating people from vehicular traffic. Looking at the Aberdeen project at this location none of these demographics are represented.

Let's assume the developers hope comes true, that this use will draw pedestrians, that creates a major planning problem. With its narrow sidewalks and the 40 mph speed limit on Tahquitz with no barrier, separating pedestrians and vehicular traffic, is an accident waiting to happen. Even downtown you have curb parking which separates people from vehicles.

Tahquitz Plaza has become a significant piece of architecture, not that I have designed it, but that the buildings themselves have become part of a heart and soul for iconic architecture in Palm Springs. These buildings are being suggested for CEQA. review. Tahquitz Plaza is included in many of the architectural tours that have made Palm Springs so popular in recent years. According to Palm Springs Life Magazine, modernism week, and yearly architectural tours brings hundreds and hundreds of thousands of dollars of revenues to local hotels, restaurants

and retailers and some of the things which in turn adds to the city tax base.

I'm in hopes this counsel will keep in mind its historic commitment to your predecessors, and not allow the Plan Development process to overrule good planning practices!

Respectfully yours

Hugh M. Kaptur

Honorable City Council
City of Palm Springs
3200 E. Tahquitz Canyon Way
Palm Springs, CA 92263

Re: Comments on Aberdeen Project, Case Nos 5.1361 PD-375, CUP, 3.3820 MAJ and TTM 36876; Objection to Demolition of Historic Tahquitz Plaza

Honorable Councilmembers:

On behalf of the Palm Springs Modern Committee, we urge the City to require the preservation of the Tahquitz Plaza as part of the proposed Aberdeen Project. The Aberdeen Project, as described in the mitigated negative declaration (MND) prepared for the project, includes: demolition of all four Hugh Kaptur designed buildings that comprise the historic and architecturally significant Tahquitz Plaza; construction of 74 residential units; and construction of 17 live-work units along Tahquitz Canyon Way (the "Project" or "Aberdeen Project"). The Project was slightly revised as presented to the Planning Commission to reduce the number of residential units to 73 and the number of live-work units to 13 to allow for the preservation of one of the four Tahquitz Plaza buildings, but it is unknown to the Palm Springs Modern Committee whether the MND version of the Project or the Planning Commission version of the Project will be presented to the City Council.

Under either iteration, the Project would result in significant adverse impacts that have not been disclosed or analyzed in the MND. The California Environmental Quality Act ("CEQA") requires preparation of an environmental impact report ("EIR") whenever a project may have a significant adverse impact on the environment. (Public Resources Code section 21151.) As proposed, the Aberdeen Project would result in the demolition of all or most of the Tahquitz Plaza, resulting in significant adverse historic resource and aesthetic impacts. Despite pleas to analyze the significance of and impacts to this resource from numerous members of the public, including experts in historic architecture, the Planning Commission and even the California Office of Historic Preservation, the

City has provided no analysis of the Tahquitz Plaza. The Project would also result in land use and aesthetic impacts due to the Project's inconsistencies with height, setback, inclusion of prohibited uses and landscaping requirements. Approval of the Project as proposed, and based upon only a MND, would result in a clear violation of CEQA. However, revising the Project to include the preservation of the Tahquitz Plaza would mitigate the majority of these potentially significant impacts, likely obviating the need for an EIR. A revised Project would provide the City with a project that preserves Palm Springs' important architectural history while still accommodating a substantial amount of new development.

I. CEQA's Requirements

An EIR must be prepared instead of a MND when there is substantial evidence to support a fair argument that the project may have significant adverse environmental impacts. "The fair argument standard is a "low threshold" test for requiring the preparation of an EIR." (*Pocket Protectors v. City of Sacramento* (2004) 124 Cal.App.4th 903, 928.) "If there is substantial evidence of a significant environmental impact, evidence to the contrary does not dispense with the need for an EIR when it can still be 'fairly argued' that the project may have a significant impact." (*Friends of "B" Street v. City of Hayward* (1980) 106 Cal.App.3d 988, 1001; *see also* CEQA Guidelines § 15064.) It is a question of law, not fact, whether a fair argument exists, and courts owe no deference to a lead agency's determination. There is a clear preference for resolving doubts in favor of preparing an EIR. (*Architectural Heritage Association. v. County of Monterey* (2004) 122 Cal.App.4th 1095, 1110; *San Joaquin Raptor/Wildlife Rescue Center v. County of Stanislaus* (1996) 42 Cal.App.4th 608, 617-618; *Stanislaus Audubon Society, Inc. v. County of Stanislaus* (1995) 33 Cal.App.4th 144, 151; *Quail Botanical Gardens Foundation, Inc. v. City of Encinitas* (1994) 29 Cal.App.4th 1597, 1602-03.)

There is substantial evidence to support a fair argument that, as proposed, the Aberdeen Project may have significant adverse impacts. The Project would demolish the historically significant Tahquitz Plaza, resulting in significant historic resource impacts. The Project also fails to comply with numerous land use regulations and requirements. This noncompliance results in both land use and aesthetic impacts that were not analyzed or even acknowledged by the MND.

A. Historic Resource Impacts.

CEQA section 21084.1 mandates that "[a] project that may cause a substantial adverse change in the significance of an historical resource is a project that may have a significant effect on the environment." A substantial adverse change in the significance

of an historical resource includes "physical demolition, destruction, relocation, or alteration of the resource..." (CEQA Guidelines § 15064.5(b)(1).) The Aberdeen Project would demolish the historically significant Tahquitz Plaza, resulting in a significant adverse impact.

1. Tahquitz Plaza is an Historic Resource.

Hugh Kaptur is among Palm Spring's most important and visionary local architects. He is an innovative designer with his own distinctive to Desert Modern architecture. Mr. Kaptur was the subject of a recent documentary, *Quiet Elegance: The Architecture of Hugh M. Kaptur*. (See http://www.thisnthatfilms.net/hugh-kaptur.html, incorporated by reference.) The importance of his work within the City was also recognized when he received a star on the Palm Springs Walk of Stars in 2014 alongside those including William F. Cody, Albert Frey, Donald Wexler and E. Steward Williams.

The Tahquitz Plaza is a shining example of Mr. Kaptur's originality and ingenuity. The beautiful pueblo-influenced design of these buildings embodies his distinctive style. The Tahquitz Plaza was also designed to be energy efficient with thick walls and wide overhangs that protect the buildings from absorbing heat and an orientation intended to capture breezes. The visually prominent location of the Tahquitz Plaza along Tahquitz Canyon Way heightens the significance of this resource.

Under CEQA, "[g]enerally, a resource shall be considered by the lead agency to be 'historically significant' if the resource...: (A) Is associated with events that have made a significant contribution to the broad patterns of California's history and cultural heritage; (B) Is associated with the lives of persons important in our past; (C) *Embodies the distinctive characteristics of a type, period, region, or method of construction, or represents the work of an important creative individual, or possesses high artistic values*; or (D) Has yielded, or may be likely to yield, information important in prehistory or history." (CEQA Guidelines § 15064.5(a)(3).)

The record for the Aberdeen Project is replete with evidence regarding the importance of Hugh Kaptur and the significance of the Tahquitz Plaza. The following evidence submitted by experts clearly demonstrates the Tahquitz Plaza embodies distinctive characteristics of Desert Modern design, represents the work of an important creative individual and possesses high artistic values. Thus, the City must consider the Tahquitz Plaza an historic resource and analyze any impacts to this resource in an EIR.

Alan Hess, architect, historian, and the author of numerous books on Modern architecture, submitted comments regarding the importance of Hugh Kaptur in history of

Palm Springs Modernism. (**Attachment 1**, February 19, 2015 Hess Letter to City and March 20, 2015 Hess Letter to OHP.) His letter describes Hugh Kaptur's unique style and the high artistic value of his work at Tahquitz Plaza. Mr. Hess is a consultant on the City's Citywide Historic Resource Survey Update that is currently being prepared. He has strongly recommended the listing of Tahquitz Plaza as a significant resource on that survey.

Architectural historian Morris Newman interviewed Hugh Kaptur as part of his work on an essay regarding Mr. Kaptur published in *The Desert Modernists: The Architects Who Envisioned Midcentury Modern Palm Springs*. (**Attachment 2**, Newman Essay re Hugh Kaptur.) Mr. Kaptur informed Mr. Newman that the Tahquitz Plaza, where Mr. Kaptur maintained his practice for many years, is one of his favorite projects. In comments submitted to the City, Mr. Newman found that "[a]lthough Tahquitz Plaza is not a loud or flashy building, it shows many signs of architectural originality and creativity...In my view, the Tahquitz office complex is one of the "sina qua non" buildings of Palm Springs." (**Attachment 3**, Newman Email to City.) Mr. Newman also noted the importance of Tahquitz Plaza is enhanced by the fact that it is part of a trio of Kaptur-designed buildings along this stretch of Tahquitz Canyon Way.

Brad Dunning, a former Historic Site Preservation Board member and designer known for working on architecturally significant properties and restorations, also submitted comments urging preservation of the Tahquitz Plaza. He stated that Hugh Kaptur's work is as important to Palm Springs as that of Albert Frey, E. Stewart Williams, Donald Wexler, and William Cody. He found Kaptur's work to be "distinctive, unique and in the case of his pueblo modern design at Tahquitz Plaza highly contextual and specific to stylish Palm Springs." (**Attachment 4**, February 20, 2015 Dunning Email to City.)

The architect for the Tahquitz Plaza, Hugh Kaptur, who is also a former Planning Commissioner and member of the City's Architectural Advisory Committee, has articulated before the Planning Commission and in a recent editorial why the Tahquitz Plaza is one of his favorite projects. (**Attachment 5**, April 7, 2015 Kaptur Editorial in *Desert Sun*.) Mr. Kaptur feels the Tahquitz Plaza represents some of his best work, noting that the buildings were the recipients of architectural awards in 1979 and 1980.

The California Office of Historic Preservation has also urged the City consider the Tahquitz Plaza an historic resource and either modify the Aberdeen Project to preserve the Tahquitz Plaza or to prepare an EIR to analyze the impacts. . The OHP's letter officially states "in light of the preliminary findings of historical significance described in the Alan Hess letter, we encourage the Lead Agency [the City] to act within its

discretion...to consider the Tahquitz Plaza office complex as a historic resource for the purposes of CEQA." The OHP letter further states that the City has the discretion under CEQA to "treat the Tahquitz Plaza office complex as a historic resource, [and that] it may be possible to modify the proposed project to avoid impacts to the historic resources.... In this way, [the City] could avoid the time and cost involved in preparing an Environmental Impact Report (EIR)."

The City's own design and land use experts, the Architectural Advisory Committee and the Planning Commission, recognized the significance of Tahquitz Plaza and recommended denial of the Project based in large part upon the proposed demolition of these buildings.[1] At the Planning Commission hearing, a Commissioner asked City staff whether the City could find a building to be a local historic resource if it had not yet reached 50 years of age. No specific answer was provided, but a review of the City's Historic Preservation Ordinance demonstrates there is no prohibition or limitation regarding buildings that are less than 50 years and the City has previously listed resources that were less than 50 years of age. The Historic Preservation Ordinance was adopted "for the purpose of preserving areas and specific buildings of the city which reflect elements of its cultural, social, economic, political, architectural and archaeological history." (Palm Springs Municipal Code 8.05.010.) This Ordinance defines an historic site as "any real property ... that is unique or significant because of its location, design, setting, materials, workmanship or aesthetic effect and: ... (4) That embodies the distinctive characteristics of a type, period or method of construction; or (5) That presents the work of a master builder, designer, artist, or architect whose individual genius influenced his age; or that possesses high artistic value." (Palm Springs Municipal Code 8.05.020(a).) The expert testimony demonstrates that the Tahquitz Plaza meets criteria (4) and (5) of the City's definition of an historic site.

The wealth of evidence regarding the historic significance of the Tahquitz Plaza is similar to the evidence presented to the county in *Architectural Heritage Association v. County of Monterey* (2004) 122 Cal.App.4th 1095. In that case, the court found that the opinion of a consultant commissioned by the county, findings of an advisory committee and testimony of members of the public with relevant expertise represented "substantial evidence supporting a fair argument that the Old Jail is an historic resource." (*Id.* at 1118.) **Here, a City commissioned consultant (Alan Hess), other experts in the community, the Architectural Advisory Committee, the Planning Commission and**

1 The Planning Commissioners that voted against denial of the Project did not dispute the significance of the Tahquitz Plaza. Instead, they stated that they did not believe it was economically feasible to preserve these buildings. There is no economic analysis in the record to support this conclusion. Moreover, this is a determination that can only be made after analysis in an EIR.

even the California Office of Historic Preservation have urged the City to consider the Tahquitz Plaza to be an historic resource. Failure to do so is a violation of CEQA as it was in *Architectural Heritage Association.*

2. The MND Provide No Evidentiary Support for Finding of Insignificant Impacts to Historic Resources.

Despite all of the evidence presented to the City, and the importance of Hugh Kaptur and the Tahquitz Plaza, the MND/Initial Study completely ignores the buildings' potential historic significance. Instead of evaluating the historic significance of these resources, the MND/Initial Study merely references the Tahquitz Plaza as "1971 vintage office buildings." (MND p. 24.) The MND/Initial Study does not disclose that Hugh Kaptur was the architect of these buildings nor does it describe their unique design. It states that the buildings are not listed on the state or local register, but does not acknowledge that the buildings may soon be listed on the City's historic resources survey. Further, as pointed out by the Office of Historic Preservation, the fact that a resource is not listed on a register does not preclude a resource from meeting the criteria for historic resource under CEQA. CEQA "does not demand formal listing of a resource in a national, state or local register as a prerequisite to 'historical' status. The statutory language is more expansive and flexible." (*Architectural Heritage Ass'n, supra* 122 Cal.App.4th at 1114, citation to *League for Protection of Oakland's Historic Resources v. City of Oakland* (1997) 52 Cal.App.4th 896, 907.)

The City's failure to evaluate the historic significance of the Tahquitz Plaza, despite substantial evidence of the buildings historicity and requests from the Planning Commission to study these impacts, is a violation of CEQA. The purpose of the initial study is to provide the lead agency with adequate information regarding a project to determine the appropriate environmental review document and "documentation of the factual basis for the finding in a negative declaration that a project will not have a significant effect on the environment." (*Ctr. for Sierra Nevada Conservation v. County of El Dorado* (2012) 202 Cal. App. 4th 1156, 1170, citations omitted.) "Where an agency. . . fails to gather information and undertake an adequate environmental analysis in its initial study, a negative declaration is inappropriate." (*El Dorado County Taxpayers for Quality Growth v. County of El Dorado* (2004) 122 Cal. App. 4th 1591, 1597, citations omitted.) Failure to adequately analyze all of a project's potentially significant impacts or provide evidence to support conclusions reached in the initial study is a failure to comply with the law.

This failure to provide an analysis is also a violation of the City's General Plan Policy RC 10.3, which states: "Require site assessment conducted by a qualified

specialist whenever information indicates that a site proposed for development may contain paleontological, historic, or archaeological resources." The evidence cited above clearly indicates the Tahquitz Plaza not only may be but is an historic resource.

3. The City's Failure to Follow OHP Recommendations Could Jeopardize Its Status as a Certified Local Government.

Palm Springs was recently approved as a Certified Local Government (CLG) by the California Office of Historic Preservation (OHP). The CLG Program is designed to encourage the participation of local governments in the identification, evaluation, registration, and preservation of historic properties in their communities. CLG communities are also eligible to receive a wide range of technical assistance and substantial grants from the OHP. The OHP monitors CLG communities' compliance with CEQA and other laws and regulations intended to protect historic resources. A determination by OHP that the City has failed to comply with CEQA could result in a loss of CLG status and/or the City's inability to receive OHP grant funding. OHP has recommended the City evaluate the historic significance of the Tahquitz Plaza. To comply with CEQA and protect its status as a CLG, the City should follow this recommendation.

B. Land Use Impacts.

The Architectural Advisory Committee and the Planning Commission have identified numerous areas in which the Aberdeen Project would be inconsistent with the Section 14 Specific Plan and City zoning regulations. The majority of these inconsistencies would be resolved if the Project were modified to include the preservation of Tahquitz Plaza.

A project's conflict with any applicable land use plan, policy or regulation is a significant environmental impact under CEQA. (*Pocket Protectors v. City of Sacramento* (2004) 124 Cal.App.4th 903, 929.) "If substantial evidence supports a fair argument that the proposed project conflicts with [land use] policies, this constitutes grounds for requiring an EIR. Whether a fair argument can be made on this point is a legal question" that provides no deference to a city council determination.

The Aberdeen Project would exceed Section 14 height limits. The MND dismisses this land use policy conflict by claiming the Project would meet the requirements of the City's high-rise development standards. (MND p. 12.) As found by the Planning Commission, the Project would not comply with the high-rise development standards because it lacks the required setbacks by providing only 6.75 feet of setback from Tahquitz Canyon Way. Planning Commissioner's fact-based conclusions regarding a

project's failure to comply with land use policy is substantial evidence to support a fair argument that the project would have significant land use impacts. (*Stanislaus Audubon Society, Inc. v. County of Stanislaus* (1995) 33 Cal.App.4th 144, 155.) Additionally, the Project would not include 60 percent open space, which is required to meet the high-rise development standards. (Palm Springs Municipal Code 93.04.00(A).) If the Tahquitz Plaza were preserved, adequate setbacks would be provided along Tahquitz Canyon Way and additional open space would be included in the Project, which would likely allow the Project to meet the high-rise standards for the remainder of the Project.

The Project would also result in a land use impact by including single family homes in area where single family homes are prohibited. (Section 14 Specific Plan p. 6-4.) The MND ignores this inconsistency by mischaracterizing the Project as multi-family housing. The City's Municipal Code defines multi-family housing as "a building designed for or occupied by two (2) or more families living independently of each other." (Palm Springs Municipal Code 91.00.10.) In the Aberdeen Project, the majority of the buildings, particularly those along Tahquitz Canyon Way, are completely detached units that are designed for occupancy by only one family, thus they do not meet the City's definition of multi-family housing and are prohibited by the Section 14 Specific Plan. The MND is inaccurate and misleading to the public and decision makers by failing to disclose the inclusion of a prohibited use in this Project.

The setback, height and use conflicts are similar to those found by the court to be significant impacts requiring preparation of an EIR in *Pocket Protectors v. City of Sacramento* (2004) 124 Cal.App.4th 903. In the *Pocket Protectors* case, the planning commission found a densely packed single family housing project to be inconsistent with housing type and setback policies for the area. The MND prepared in that case glossed over or ignored the inconsistencies, much the way it does here, and the project approval was found to be in violation of CEQA.

The Aberdeen Project further violates land use policies due to its inconsistencies with required landscaping along Tahquitz Canyon Way. The minimal setbacks provided by the Project do not allow adequate space for the large palm trees, desert landscaping, public art and pedestrian amenities along Tahquitz Canyon Way required by the Section 14 Specific Plan. The MND acknowledges the inconsistency and provides mitigation measure MMI-1, which states: "Project site plans, architectural renderings and landscape plans shall be revised to address inconsistencies with the development standards and other design requirements of the Section 14 Specific Plan, as determined by City Council." The ability of mitigation measures to actually mitigate impacts must be evaluated in the environmental review document. By waiting until after the City Council hearing to develop a mitigation measure for this impact, the MND fails to assess the efficacy of the

measure and improperly defers mitigation. The developer has opted not to make the revisions necessary to bring this Project into compliance with the Section 14 Specific Plan and thus the inconsistency, and land use impact, remains.

The Project would also violate several City General Plan policies, resulting in further land use impacts. The General Plan requires the City to:

- RC10.1 Support the preservation and protection of historically, architecturally, or archaeologically significant sites, places, districts, structures, landforms, objects, native burial sites and other features.
- RC10.2 Encourage and support the retention and adaptive reuse of buildings of architectural, historic, or cultural significance where financially feasible.
- RC10.5 Actively encourage and promote the understanding, appreciation, and preservation of the archaeological, historic, and cultural resources.

By allowing the demolition of the historically significant Tahquitz Plaza, the City's approval of the Project would violate these General Plan policies.

C. Aesthetic Impacts

The Aberdeen Project would also result in significant aesthetic impacts that require analysis in an EIR. The proposed demolition of the historically significant Tahquitz Plaza at a prominent location in the City's downtown would degrade the visual character of the area. These architecturally distinctive buildings with wide landscaped setbacks would be replaced with densely packed units that exceed height limits and violate setback requirements. The Planning Commission has questioned the viability of providing live-work units along Tahquitz Canyon Way and expressed concern that these visually prominent units would end up being used as storage space, further degrading the visual character. This degradation is particularly significant because Tahquitz Canyon Way is designated as a scenic corridor by the City's General Plan.

Conclusion

The Palm Springs Modern Committee urges you to reconsider the proposed Aberdeen Project. As proposed, the Project's impacts require analysis in an EIR and the City's proposal to approve the Project based upon a MND violates CEQA. If the Project were revised to include preservation of the Tahquitz Plaza, the majority of the housing units could still be constructed, but the impacts of the Project would be substantially reduced.

Thank you for your time and consideration in this matter.

Sincerely,

Amy Minteer

Re: Tahquitz Plaza by architect Hugh Kaptur, Tahquitz Canyon and Calle El Segundo

To the Planning Commission:

I am writing as an architect, historian, and author of nineteen books on Modern architecture to express my support for the preservation of the Tahquitz Plaza office complex because of its historical significance to Palm Springs and California architecture. Please share this letter with the Planning Commissioners prior to their February 25, 2015 meeting.

I have written two books on Palm Springs architecture (*Julius Shulman: Palm Springs*, Rizzoli International, 2008, and *Palm Springs Weekend*, Chronicle Books, 2001) and can say that these buildings, and the work of architect Hugh Kaptur, play an important role in what is now identified as Palm Springs Modernism.

I am also a consultant on architectural history for the current City of Palm Springs architectural survey. I have already unequivocally recommended Tahquitz Plaza as a significant building in that survey.

My resume is attached. I have written on architecture for the *Los Angeles Review of Books, The Architect's Newspaper, The Los Angeles Times, Architectural Digest, the Journal of the Society of Architectural Historians*, and other journals. I have been the architecture critic of the *San Jose Mercury News* since 1986, received a grant from the Graham Foundation for Advanced Studies in the Fine Arts, and was a National Arts Journalism Fellow at Columbia University.

The research of the importance of Palm Springs Modern architecture in general is very recent. Only a decade ago, the work of now-recognized architects such as William Cody, Donald Wexler, Palmer & Krisel, and E. Stewart Williams was not well known

generally; few Modern buildings now considered iconic were identified as historic then. Since then, our understanding of these and other architects has made us aware of the full dimension of Palm Springs architectural history.

As we continue researching this history, it is clear that the work of Hugh Kaptur makes a significant contribution to the unique character of Palm Springs architecture. This opinion is not mine alone; the newly published book *The Desert Modernists: The Architects Who Envisioned Midcentury Modern Palm Springs* (Desert Publications, 2015) and the documentary film *Quiet Elegance: The Architecture of Hugh M. Kaptur* (Bert Simonis, director, 2014) indicate the clear direction of scholarly opinion on Kaptur's importance.

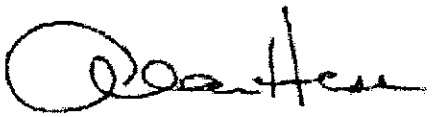
Briefly stated, Kaptur's significance is this: 1) Palm Springs midcentury Modern architecture is known for its use of Modern concepts to solve the challenges of climate, function, and new materials; 2) an extraordinary group of talented architects lived or worked in Palm Springs, and while they addressed the same problems they expressed a wide range of aesthetic solutions; 3) Hugh Kaptur's aesthetic is unique in Palm Springs, demonstrating the wide range of fertile innovation in the city.

Tahquitz Plaza is an important and well preserved example of Kaptur's unique approach. Rather than drawing on the rectilinear steel and glass geometries of, for example, Richard Neutra, he draws on organic forms and ideas from the American Southwest, and Frank Lloyd Wright. This is seen in Tahquitz Plaza's irregular roofline, the deep, sculpted, curving frames around windows, the eaves and sun shading features, and the integration of outdoor areas interspersed among the offices. This is a strong piece of design that deserves to remain in place.

In addition, its site on Tahquitz Canyon places it in the context of the city civic center, an extraordinary collection of Modern buildings serving civic purposes, and rare in the state.

I am writing this letter *pro bono* because historic architecture of this quality adds to the civic character and quality of city life. In the years before Palm Springs' heritage was fully understood, the city lost many significant structures. Unfortunately, this degradation has continued; the demolition of a major Kaptur design would be a loss to history and the city's urban quality.

Sincerely,



Alan Hess

Carol Roland-Nawi
State Historic Preservation Officer
Office of Historic Preservation
1725 23rd Street, Suite 100
Sacramento, CA 95816

Re: Tahquitz Plaza by architect Hugh Kaptur, Tahquitz Canyon and Calle El Segundo

Dear Ms. Roland-Nawi:

I am writing at the request of the Palm Springs Preservation Foundation to ask you to consider writing a letter to the City of Palm Springs encouraging them to conduct an EIR for the Tahquitz Plaza office buildings (1971) by Kaptur & Lapham. The four buildings in this complex are excellent and well preserved examples of key aspects of architect Hugh Kaptur's work, and of Palm Springs Modernism.

The buildings are currently under threat of demolition for a proposed residential project. So far the city has not requested an EIR, but I believe the complex's significance and quality require it.

Kaptur is an important architect in Palm Springs Modernism. Rather than drawing on the rectilinear steel and glass geometries of, for example, Richard Neutra, Kaptur often draws on organic concepts from Frank Lloyd Wright and forms from the American Southwest. This is seen in Tahquitz Plaza's irregular roofline, the deep, sculpted frames around windows, the bermed walls, the eaves and sun shading features, and the integration of outdoor areas interspersed among the offices. The strong composition of these many elements shows Kaptur's skill and the high artistic value of his work.

In addition, Tahquitz Plaza's location on Tahquitz Canyon places it in the context of the city's Modern civic center. Tahquitz Canyon is the city's main civic thoroughfare, linking the airport to downtown; along this boulevard is an extraordinary collection of Modern buildings serving civic purposes, including city hall, police and county facilities, and the airport, complemented by commercial buildings of similar style and siting. Such a collection of Modern civic center buildings is rare in the state.

Palm Springs' midcentury Modern architecture is known for its use of Modern concepts in addressing the challenges of climate, functions, and new material technologies. These are not typified by a single aesthetic; it ranges from the lightweight, steel framed houses resting lightly on the earth seen in the work of Richard Neutra and Albert Frey, to the autochthonous monolithic concrete structures, literally buried in the earth, seen in John Lautner's work, with many more interpretations in between.

Within this wide range, Kaptur's work is singular. His training in design was closely associated with midcentury automotive design in Detroit, where he attended Lawrence Tech and worked for General Motors' consumer design division. Kaptur has worked in Palm Springs from 1956 to the present day. He worked for and with other noted local architects, including Donald Wexler, Richard Harrison, and William Cody. Like those architects, his work is distinctive and individual, and yet his design also reflects common themes that distinguish Palm Springs Modernism.

The Tahquitz Plaza offices are an excellent representation of his use of sculptural, expressionist forms influenced by Native American adobe structures, but modernized and abstracted aesthetically in the spirit of Modernism. The complex's thick stuccoed walls do not imitate those vernacular structures; the silhouette of the walls and the curving windows frames that grow directly from those walls are carefully abstracted into forms that represent a distinct, modernized aesthetic vocabulary. This approach is also seen in other Kaptur designs, including the William Holden house (1977), and the Casa Blanca motel (1979.)

In addition, the Tahquitz Plaza offices incorporate unpainted wood walls and wood trellises. These also update the wood ramadas and trellises of traditional Southwestern architecture. The siting of the office structures creates small courtyards between the buildings (another design aspect seen in historic Spanish architecture of the Southwest) allowing for shaded outdoor areas.

Likewise, the landscaping and siting of the Tahquitz Plaza buildings represent an updating of traditional concepts and a Modern response to the hot climate. Berms rise partway up the walls, providing thermal insulation and connecting the structure to the earth, similar to Lautner's desert designs.

The thick walls, hooded windows, and shaded courts all have historic precedents, but they are also practical, integral elements that help moderate the strong sunlight and heat of the local climate. The design of all these elements is artful and well composed.

The use of historic regional architecture by twentieth century architects is an important facet of Modern architecture in California and the West. It can be seen, for example, in the work of Irving Gill in the 1910s, the Ranch Houses of Cliff May in the 1950s and 1960s, and the civic buildings and residences of Bennie Gonzales in Arizona, where historic forms were blended with Modernism's abstraction. Hugh Kaptur is the primary interpreter of this approach in midcentury Palm Springs, and Tahquitz Plaza is a primary example in the city.

Kaptur's work has been rediscovered fairly recently. This is not surprising; our understanding of the significance of Palm Springs Modern architecture in general is also relatively recent. Only a dozen years ago, the work of now-recognized architects such as William Cody, Donald Wexler, Palmer & Krisel, and E. Stewart Williams was not generally well known outside Palm Springs, and its significance was not even widely recognized within Palm Springs.

In the years before Palm Springs' heritage was fully understood, the city lost many significant structures. Unfortunately, this degradation has continued; the demolition of a major Kaptur design such as this would be a loss to history and the city's urban quality.

But as we continue researching this history, it is clear that the work of Hugh Kaptur makes a significant contribution to the unique character of Palm Springs architecture. This opinion is not mine alone; the newly published book *The Desert Modernists: The Architects Who Envisioned Midcentury Modern Palm Springs* (Desert Publications, 2015) and the documentary film *Quiet Elegance: The Architecture of Hugh M. Kaptur* (Bert Simonis, director, 2014) indicate the clear direction of opinion on Kaptur's importance.

I have written to the Palm Springs Planning Commission about my support, as a historian and architect, for the preservation of Tahquitz Plaza. I am also a consultant on architectural history for the Palm Springs architectural survey, currently underway. I have already unequivocally recommended Tahquitz Plaza as a significant building in that survey. I believe that a letter from your state office would encourage them to conduct an EIR that would document the significance of this complex.

Thank you for your consideration of this matter.

Sincerely,

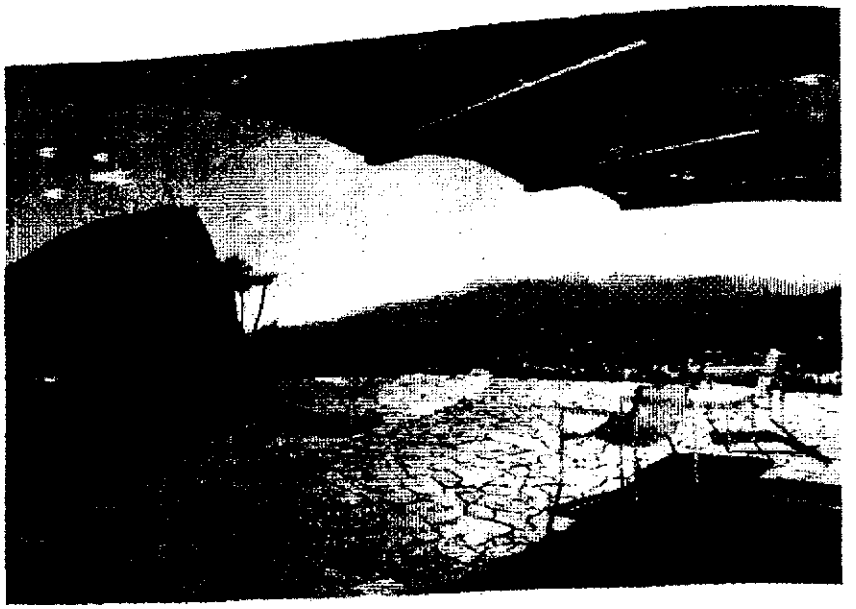
(MAY 22, 1931 –)

HUGH KAPTUR STANDS APART FROM MOST OF THE PALM SPRINGS ARCHITECTS OF HIS GENERATION. RATHER THAN THE MAINLINE, INTERNATIONAL STYLE MODERNISM FAVORED BY MOST OF HIS PREDECESSORS AND COLLEAGUES IN THE DESERT, KAPTUR PREFERS WHAT HE CALLS "AN ARTISTIC ARCHITECTURE THAT IS ORGANIC AND FLOWING." HIS FIRST INSPIRATION WAS FRANK LLOYD WRIGHT, NOT MIES VAN DER ROHE.

Kaptur is not a doctrinaire follower of Wright, however. He denies having a signature style. His primary debt to the master of Taliesin, he adds, was the acknowledgment of climate and landscape in his projects, as well as a taste for sculptural masses and a delight in contrasting materials. In some cases, Kaptur was able to translate some of the sculptural feeling of Wright's designs into a colorful "populuxe" style. Kaptur's first Palm Springs project was the Impala Lodge (1957–58; now the Triangle Inn), a wildly inventive building with steel beams supporting a canopy reminiscent of a lean-to. Walls of glass stand on a stone base, while external "buttresses" support shade structures to keep the sun off the windows. Other "pop" buildings are the Siva House of 1959, with scallop-shaped awnings draped in orange plastic, and the clubhouse Kaptur designed with Robert Ricciardi for the Palm Springs Golf Course (1959), with a curved roofline resembling a cresting wave.

Practical commissions, such as the Tahquitz Plaza office complex (1971, by Kaptur, Lapham, and Associates) on Tahquitz Canyon Way, did not always allow total freedom, yet this comparatively restrained project remains one of Kaptur's favorites. After an original design called for concrete, cost considerations dictated that a less expensive wood frame structure be employed. Despite this



This page and opposite: Kaptur created this home in 1958 at 660 Palisades Drive in Palm Springs. The house is known as the Russell House and/or the Silva House.

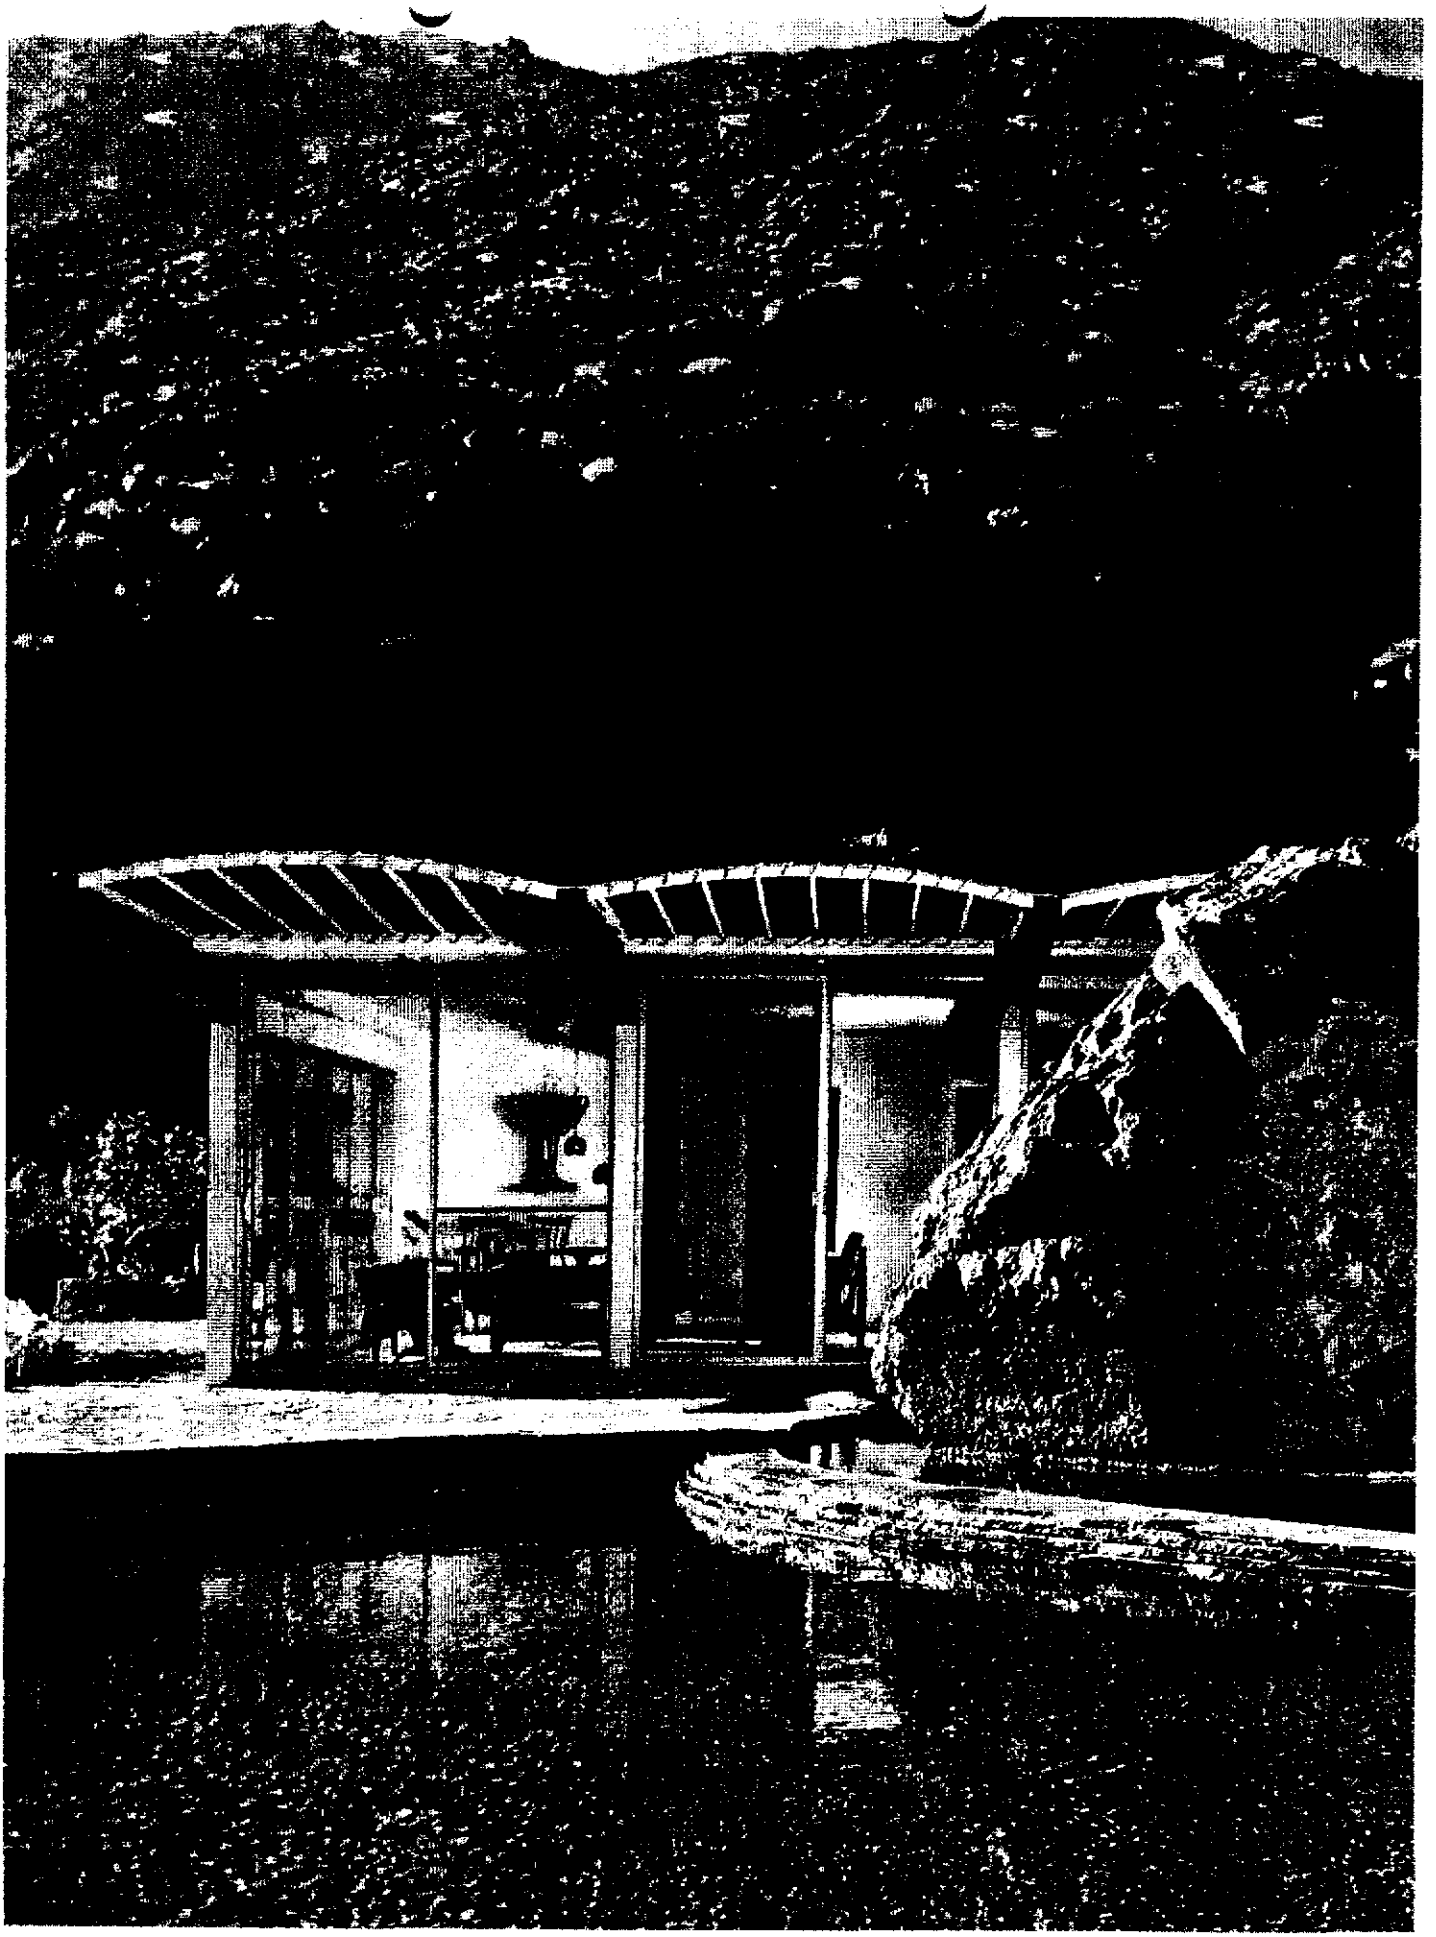
Previous page: Hugh Kaptur.

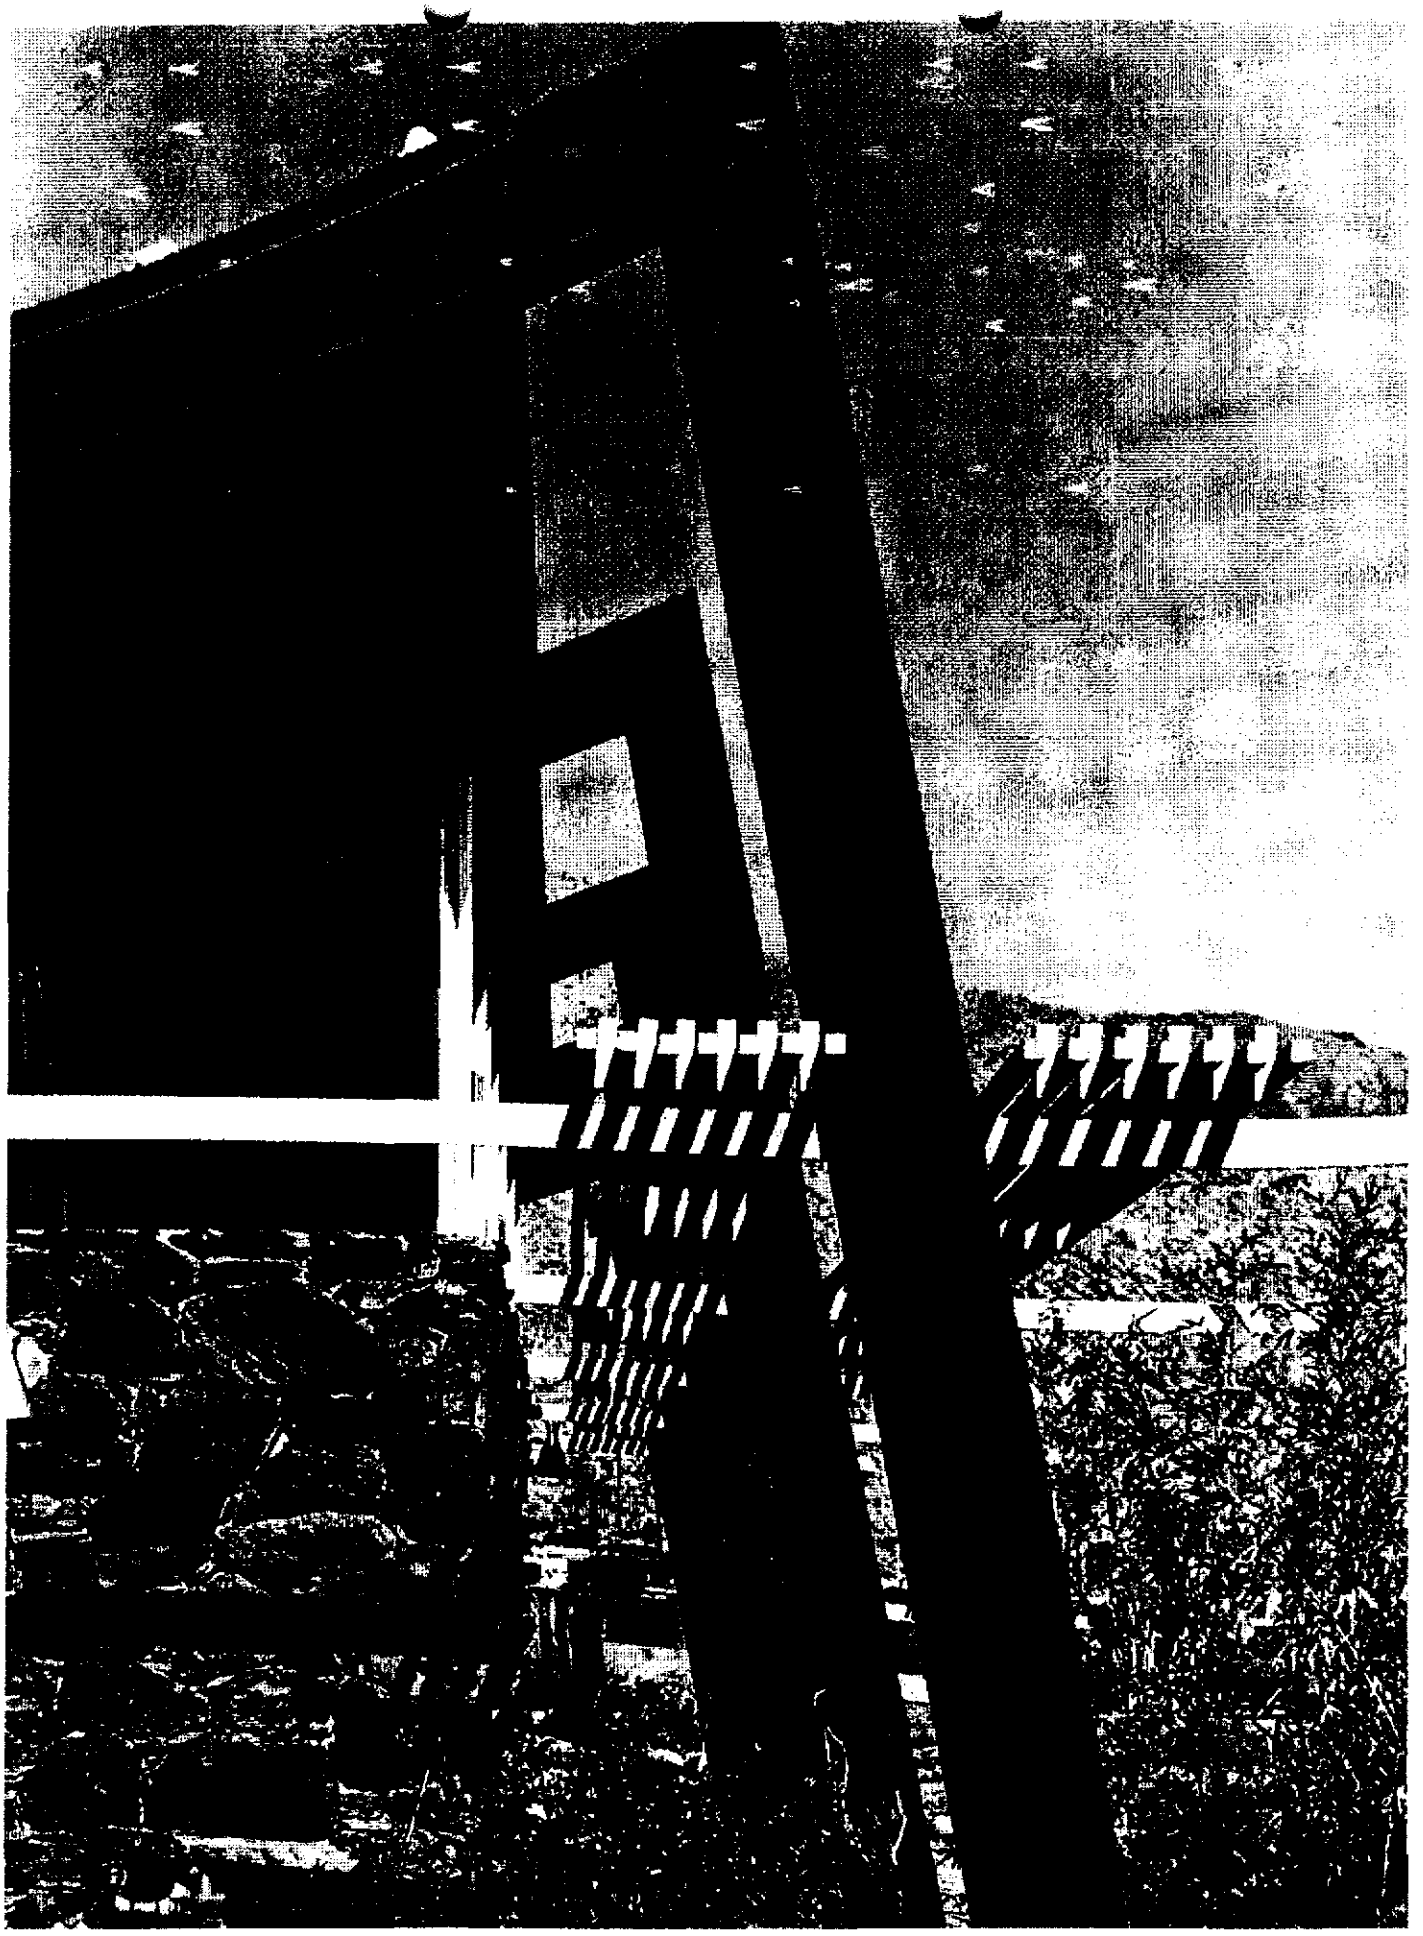
constraint, the Tahquitz buildings manage to look like masonry, due to walls that are sculpted to look as massive as concrete. To further the illusion of thick walls, Kaptur provided the buildings with windows that appear deeply recessed. In other places, windows push outward from the wall surface as if trying to break free of the building. Similar jutting windows can be found at Kaptur's Musicland Hotel (1967), another building that flirts with the illusion of heavy masonry in the form of a pueblo adobe.

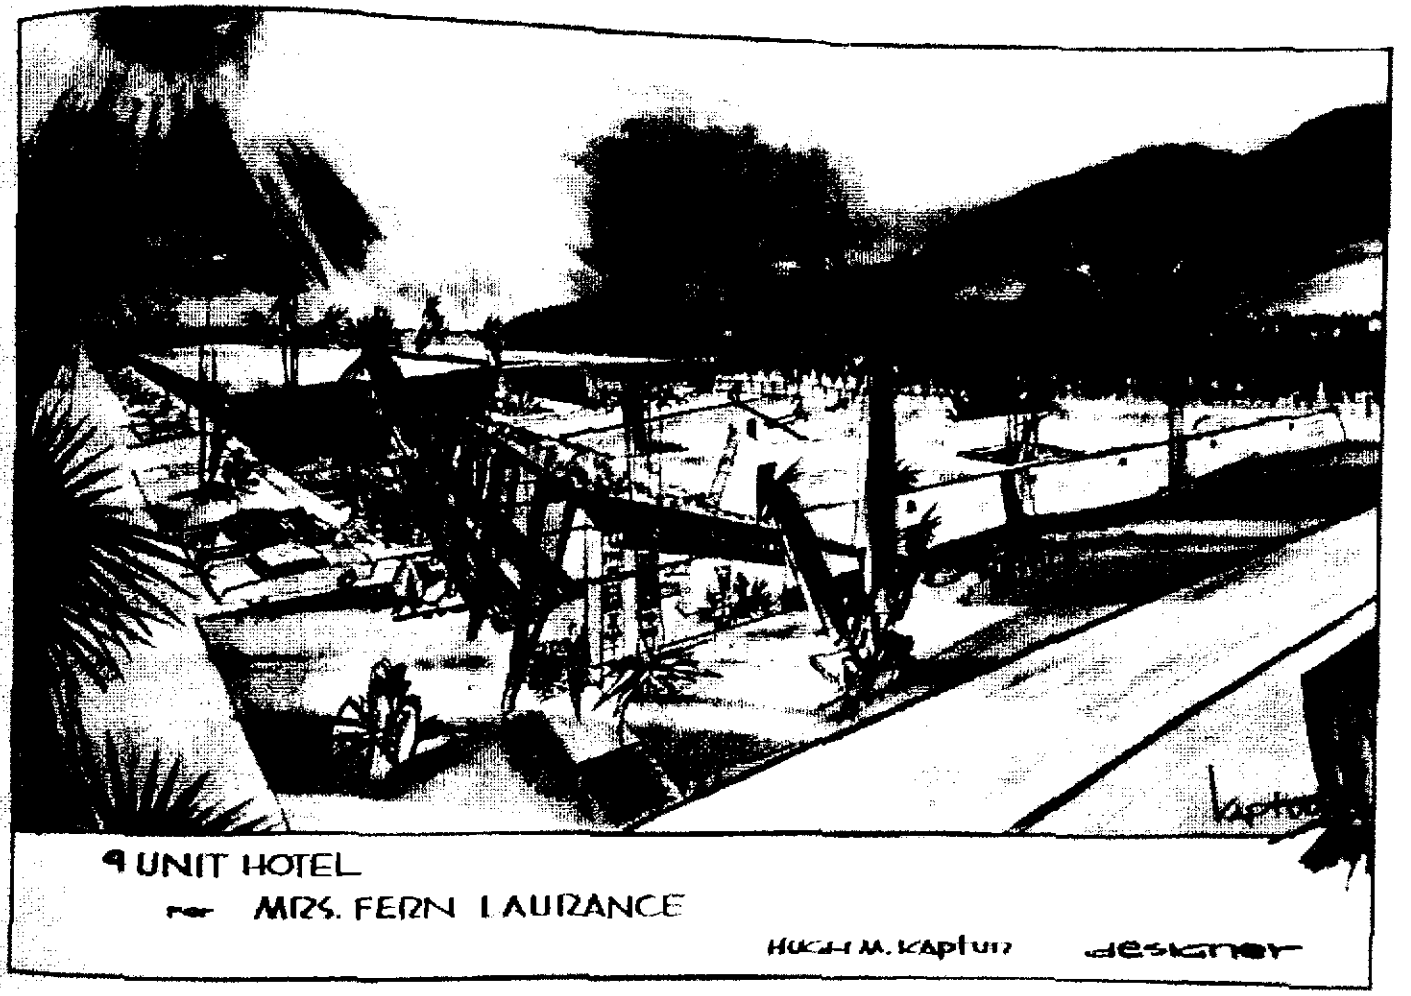
A Detroit native, Hugh Kaptur was born in 1931 to an artistic mother and an automobile design engineer father. After high school, he briefly attended Lawrence Institute of Technology (now known as Lawrence Technological University) in Michigan to study engineering. But at 20, he enrolled in the Marines during the Korean War; he and his young family briefly lived in California before he returned to Michigan so that he could work with his father at GM's design studio while finishing his education. At that point, Kaptur and his family returned to California, this time to the largely undeveloped Palm Springs of the early 1950s. After working briefly for Wexler and Harrison, Kaptur supported himself by making presentation drawings for Donald Wexler, Albert Frey, and others.

Although Kaptur says he is willing and able to design in any style, sometimes his inner exuberance bubbles to the surface. Commissioned in 1988 to design a conventional home for Jay and Kay Selzer, Kaptur came up with something very different: a lively, hard-to-describe residence comprising a cone-shaped dome set amid other simple geometric shapes that seem to vibrate together. Twenty-five years later, the Selzers report that they are still happy with the unconventional house and they remain friendly with the architect.

The exuberance has survived into the architect's ninth decade. Kaptur is currently designing an addition to an existing home in the form of a circular casita, or guesthouse, separated from the main house by a courtyard. In a nod to the ongoing influence of Frank Lloyd Wright, the addition is to be nestled into the natural contours of the landscape.



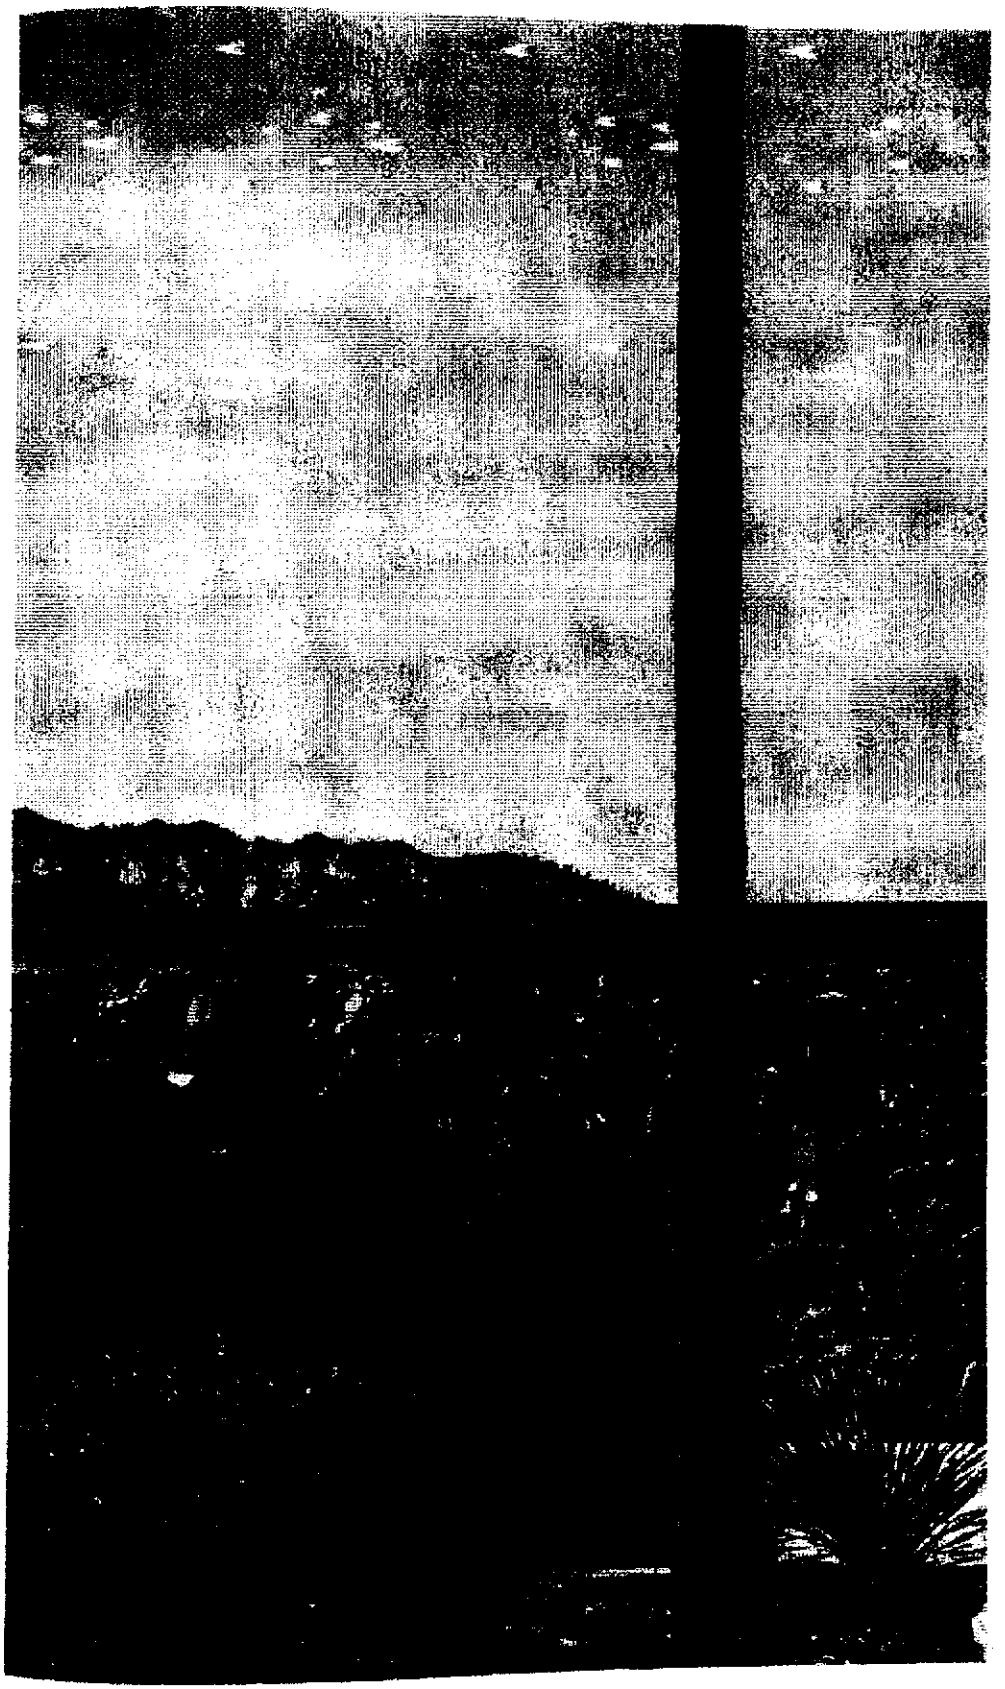




Opposite: This was Kaptur's first Palm Springs building (1957-58), the Impala Lodge, 555 East San Lorenzo Road, now the Triangle Inn.

This page, above: Kaptur's imaginative graphic hand

Left: Kaptur's creative arrangement placed the dramatic steel beams next to the swimming pool. The buttresses remind more than a few guests of spider legs.



Left: Originally named the Palm Springs Golf Course (1950), the Tamarisk Creek Golf Resort, 1885 Golf Club Drive, Palm Springs sports one of Kaufler's most awe-inspiring facades via its clubhouse, a giant slab of masonry whose sweep captures the arc of a golf swing. The course's proximity to the airport also figured into Kaufler's roof design, visible from the air. "I wanted (desert dwellers) to see something clean and different from the air," he said.

Honorable Planning Commission

City of Palm Springs

3200 E. Tahquitz Canyon Way

Palm Springs, CA 92263

Dear Members of Planning Commission:

I'm writing to provide some comment about the proposed demolition of the Tahquitz Plaza designed by Hugh Kaptur.

- I am a qualified architectural historian (M.A., Architectural History and Theory, UCLA, 1984) and the author of two books on architecture and the editor of a third.

- I'm also a professional journalist, specializing in real estate, urban design and architecture. My work has appeared widely, including several dozen articles about commercial real estate in The New York Times and Los Angeles Times. I have written extensively on Modern Architecture, historic preservation, public-private projects, zoning and entitlement issues and other topics relating to the design, financing and government approval of buildings.

- I have published three articles about the architecture of Hugh Kaptur, including a chapter in a recently published book of Palm Springs architecture.

Tahquitz Plaza is a landmark building both in the City of Palm Springs and in the career of

Hugh Kaptur. Mr. Kaptur, as you probably know, is one of the luminaries of the "Golden Age" of architecture in the city, having worked in Palm Springs continuously since the 1950s.

Mr. Kaptur has told me this is one of his favorite projects, which seems fitting for a building where he maintained his architectural practice for many years. Although Tahquitz Plaza is not a loud or flashy building, it shows many signs of architectural originality and creativity. One of the themes of Mr. Kaptur's work, and Southern California architecture in general, is the ability of local architects to "make lemonade" when faced with limits both in budget and choice of materials (i.e. the least expensive). I quote one of my own articles on Mr. Kaptur:

"Practical projects, like an office complex on Tahquitz, did not always allow such freedom, yet the comparatively restrained project remains one of the architect's favorites. Originally designed in concrete, cost consideration dictated a less expensive wood frame structure. Despite this constraint the Tahquitz buildings manage to look like masonry, due to walls that are sculptured to look massive as concrete. To further the illusion of thick walls, Kaptur provided the Tahquitz buildings with window that appear to be deeply recessed. In other places, windows push outward from the wall surface, as if trying to break free of the building. Similar out-pushing windows can be found at Kaptur's Musicland Hotel, another building that flirts with the illusion of heavy masonry...."

In my view, the human experience of cities is largely made up by memorable images, structures and spaces that lend a sense of identity to the community. These buildings might be described as the "sina qua non" of any particular city, meaning that without these structures or images, the city would be diminished and lose part of its "sense of place." Every person who is aware of architecture in Palm Springs is still feeling the loss of the Palm Springs Spa Hotel. In my view, the Tahquitz office complex is one of the "sina qua non" buildings of Palm Springs. It is a tasteful, viable building that has been tenanted since its completion. The Tahquitz offices are also part of a trio of Kaptur-designed buildings on either side of the street, which increases both its interest and importance.

At the very least, the Commission should give serious consideration to preserving at least the original building of the complex. Perhaps the City Planning Department can incentivize the developer by granting a density bonus on the remaining portion of the parcel to compensate the developer for any loss of buildable square footage entailed by the preservation of the Tahquitz offices. Additionally, the Planning Department might consider the waiver and/or forgiveness of certain development fees, as a further incentive to preserve the Tahquitz offices. Development is vital for the economic well being of all cities. Equally so is the preservation of buildings that define its character in a positive way. It is my deeply held hope that the Planning Commission will find a way to accommodate both the best interests of both the City and the developer.

Respectfully yours,

Morris Newman

Palm Springs, CA 92263

I was quite shocked recently upon hearing the City of Palm Springs is considering a developer's plan to demolish the Hugh Kaptur-designed Tahquitz Plaza. It seems almost inconceivable to me that these buildings, some of the best work of Hugh Kaptur's career, could be lost. Although recognition of Hugh Kaptur's work is coming later than those of his local peers--Albert Frey, E. Stewart WIlliams, Donald Wexler, William Cody and other prominent locals that have made Palm Springs world renowned as a destination for fans of architecture and design and the appreciation of mid century architecture in Palm Springs seems to be the major factor in the revival of the town--Kaptur's work is certainly as important and worthy. His achievements mark the latter end of the mid century era. His work is distinctive, unique and in the case of his pueblo modern design at Tahquitz Plaza highly contextual and specific to stylish Palm Springs. Perhaps his work has not become fully appreciated yet as it is relatively recent when compared to Albert Frey's modern work of the '50s or 60s for instance. That is why Kaptur's complex is threatened to some extent---the work is just now at the cusp of rediscovery---just as Frey's and Williams' and Cody's work was a few years ago.

Hugh Kaptur was a local and made an indelible mark on the landscape of Palm Springs and the City should be very proud and respectful of his work, celebrate and preserve it. It does the City well when it signals to the world the pride it has its achievements and the artistry of its local architects and most of all the appearance and history of the town. It is terrible for the town to be known for allowing demolition of another important building. This estimable canvas that is modern architecture in Palm Springs is economically instrumental and vital now for tourist appeal and more importantly many residents now have chosen to invest in the town and to live here simply because of the great modern architecture we have in our midst..

I urge the City to reconsider any decision which would allow the destruction of this important Kaptur complex, it would be a terrible loss and when it is gone it is gone forever.

I served as a member of the Historic Site Preservation Board in 1995-96. I suspect some of you will recall the firestorm that greeted my nomination of five Frey buildings which included the Tramway Gas Station. A developer wanted to demolish that building soon after designation and quite a controversy erupted. I hope you will agree in hindsight the decision to preserve the building was the correct one. I believe you will feel the same way as time passes and the Tahquitz Plaza is preserved. The complex is inventive, playful, and sophisticated with forms and open areas that best represent not only Kaptur at the top of his game but a true reflection of the state of the best modern architecture in Palm Springs at that period.

My written work about Palm Springs and modernism has appeared in the Los Angeles Times, the New York Times, Vogue, and GQ magazine among others.

I hope you will present my plea before or during the Feb. 25th meeting.

Sincerely,

Brad Dunning

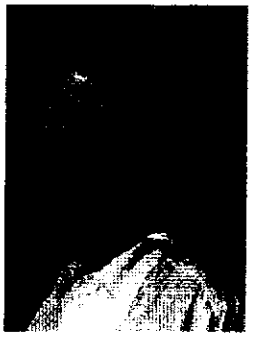
Architect Hugh Kaptur speaks out on Aberdeen Project

Hugh M Kaptur, Special to The Desert Sun 8:51 p.m. PDT April 7, 2015



(Photo: Special to the Desert Sun)

As a former city of Palm Springs planning commissioner, past member of the city's Architectural Advisory Committee and the architect that designed and built Tahquitz Plaza, I feel I am both qualified and obligated to comment on the proposed Aberdeen Project that calls for the demolition of these buildings.

Over the years I have watched many of my professional contemporaries see buildings they were proud of demolished: architect Bill Cody's Huddle Springs comes to mind, as does Stewart Williams' Potter Clinic. Most recently I've seen Don Wexler's high school Administration Building and Spa Hotel colonnade tragically lost.

Now two of my buildings are slated for demolition and a similar unhappy fate. I am particularly proud of the design of Tahquitz Plaza; I had great artistic latitude, as it was to become my offices and I had the opportunity to make an architectural statement. With this creative freedom I designed the architecture to "grow" from the desert floor. I feel these buildings are some of my best work from that period. In fact, the "plaza" won architectural awards in 1979 and 1980.

Aberdeen is a high-density project that overcrowds 74 residential units, 17 live-work units and a cafe space into an eight-acre site. The project is before the city as a Planned Development (PDs), which allows the developer to skirt zoning, parking, setbacks, height and use requirements. PDs were originally intended to create a safety valve that would allow creative projects to be considered by the city and not be overly constrained by the zoning requirements of the area. Unfortunately, developers and the city are using PDs, which should be encouraging architectural excellence, as a way to over develop sites that are out of scale with their surroundings. The Aberdeen Project doesn't fit zoning or the village character of the city and it demolishes four more mid-century buildings.

But demolishing more of our city's architecture is just one of the major shortcomings of the Aberdeen project. Fundamentally, it is the wrong project in the wrong place and creates a dangerous mix of vehicular and pedestrian traffic on Tahquitz Canyon Way. And a row of garage doors along our city's most important thoroughfare just isn't good architecture or good planning and goes against our forefather's vision for the street. This is not just my opinion but also a concern stated by both the city's Architectural Advisory Committee and the Planning Commission, both groups denying the project for these and other failings of the project.

The developer recently presented a revised design that is proposing to retain a quarter of the buildings. I designed the complex as four integrated buildings relating to each other as a single project. Demolishing 75% of the buildings will end that unity and mute the architecture. The developer should be more respectful of Palm Springs's mid-century architecture and build a project where the two can coexist.

The Aberdeen project will soon be reviewed by the city council and I plan to attend. I am humbled that many people have told me they will be at that council meeting too, raising their voice to preserve Tahquitz Plaza. The city council will hear these voices and I hope they will also hear the voices of previous city councils and previous planning commissions and visionaries like Pearl McManus and other forefathers who together had an idea for a city like few others in the world. Their vision for Tahquitz (McCallum) Way is widely known and their intention was to not allow any residential along Tahquitz. The Aberdeen Project now endangers that vision, which is more suitable for a dense urban environment not in a resort town like ours.

The developer has an obligation to provide public benefit to the citizens of Palm Springs. It is impossible to see the public benefit from demolishing more of our iconic architecture. Instead, Nexxus Development should restore and re-purpose Tahquitz Plaza, incorporating it into The Aberdeen, that would be public benefit no one could argue.

Hugh Kaptur is an architect of many midcentury buildings in Palm Springs. He can be reached at hughmkaptur@yahoo.com.

Palm Springs, California 92262

VIA Email

RE: Aberdeen Project IS/MND, Case Nos 5.1361 PD-375, CUP, 3.3820 MAJ and TTM 36876

Honorable Councilmembers:

On behalf of the National Trust for Historic Preservation, I would like to express our concern with the proposed demolition of the Tahquitz Plaza on Tahquitz Canyon Way in the heart of the City of Palm Springs. We are particularly alarmed with the City's preliminary determination that the demolition project and subsequent development of a mixed-use project on the site would cause no harm to historic resources. The City has received the opinion of multiple experts, including City staff, that Tahquitz Plaza is a historical resource. We are aware of no evidence in the record that contradicts these well-supported arguments. **Under these circumstances, the California Environmental Quality Act requires the City to prepare an EIR and consider feasible alternatives to demolition.**

The Tahquitz Plaza office buildings were designed by Kaptur & Lapham in 1971 and are excellent and well-preserved examples of Palm Springs Modernism. Hugh Kaptur's contributions to the City of Palm Springs were significant and Tahquitz Plaza is considered to be one of his most outstanding works.

The City's February 2015 Mitigated Negative Declaration indicates that the demolition of Tahquitz Plaza would "cause no substantial adverse change in the significance of a historical resource as defined in [CEQA Guideline] 15064.5" (MND, p.24-25). This determination was made in error. According to a March 26, 2015 letter from the California Office of Historic Preservation, the City has commissioned a city-wide survey of its historic resources and, during this process, identified Tahquitz Plaza as a historical resource. It has also received the opinion of Alan Hess, a qualified expert in the field of architectural history, that the Plaza is historically significant. Further, the City's own Architectural Advisory Committee and Planning Commission have both recommended denial of the project as a result of the proposed impact to historic resources.

Under CEQA, an EIR is required if there is substantial evidence in the "whole record" of proceedings that supports a "fair argument" that a project "may" have a significant effect on the environment. Guideline § 15064(f)(1). *In League for Protection of Oakland's Architectural etc. v. City of Oakland* (1997) 52 Cal.App.4th 896, the court affirmed that the fair argument standard as to whether an impact "may" occur is a low threshold test. (See also *Architectural Heritage Association v. County of Monterey* (2005) 122

San Francisco Field Office
The Hearst Building, 5 Third Street, Suite 707 San Francisco, CA 94103
E info@savingplaces.org P 415.947.0692 F 415.947.0699 **www.PreservationNation.org**

Cal.App.4th 1095; holding that the opinion of a consultant commissioned by the county, findings of an advisory committee and testimony of members of the public with relevant expertise represented "substantial evidence supporting a fair argument" that the Old Jail was a historic resource).

In addition to case law, the CEQA Guidelines are clear that a conflict in expert opinion over the significance of an environmental impact normally requires preparation of an EIR. Guideline § 15064(g). *Sierra Club v. CDF* (2007) 150 Cal.App.4th 370. In this case, all evidence before the City suggests that Tahquitz Plaza is historically significant. The cannot in good faith deny that its finding that the Tahquitz Plaza is non-historic against the litany of public information prepared by experts in the field of historic preservation, including the Office of Historic Preservation and the City's own staff.

We urge the City to develop an Environmental Impact Report in light of the very serious consequences to historic resource that would result from the project as proposed.

Thank you for your consideration of these comments. Please contact me at bturner@savingplaces.org or 415-947-0692 should you have any questions.

Sincerely,

Senior Field Officer/Attorney

NOTICE OF PUBLIC HEARING
CITY COUNCIL
CITY OF PALM SPRINGS

APPEAL OF CASE NOS.: 5.1361 PDD 375 / 3.3820-MAJ & TTM 36876
O & M HR, LLC / NEXUS DEVELOPMENT CORP. FOR "ABERDEEN"
8.05-ACRES AT NORTHEAST CORNER OF TAHQUITZ CANYON WAY AND CALLE EL SEGUNDO

NOTICE IS HEREBY GIVEN that the City Council of the City of Palm Springs, California, will hold a public hearing at its meeting of April 15, 2015. The City Council meeting begins at 6:00 p.m., in the Council Chamber at City Hall, 3200 East Tahquitz Canyon Way, Palm Springs.

The purpose of this hearing is to consider an appeal by Nexus Development Corp. representing O & M HR, LLC, regarding the March 25, 2015, Planning Commission denial decision of a proposed mixed-use project called Aberdeen; a proposal to demolish existing buildings and parking areas for the construction of seventy-four (74) attached and detached residential dwellings, seventeen (17) live-work units and approximately 1,568 square feet of commercial-retail space on approximately 8.05-acres located at the northeast corner of Tahquitz Canyon Way and Calle El Segundo, zone REO and CU.

ENVIRONMENTAL DETERMINATION: An Initial Study was prepared for the project and it determined that the project would have less than significant impact with the incorporation of mitigation measures. Members of the public may view this document at the Planning Services Department, City Hall, 3200 East Tahquitz Canyon Way, Palm Springs, and submit written comments at, or prior to, the Council hearing.

REVIEW OF PROJECT INFORMATION: The staff report and other supporting documents regarding this project are also available for public review at the City Hall between the hours of 8:00 a.m. and 6:00 p.m. Monday through Thursday. Please contact the Office of the City Clerk at (760) 323-8204 if you would like to schedule an appointment to review these documents.

COMMENT ON THIS APPLICATION: Response to this notice may be made verbally at the Public Hearing and/or in writing before the hearing. Written comments may be made to the City Council by letter (for mail or hand delivery) to:

James Thompson, City Clerk
3200 E. Tahquitz Canyon Way
Palm Springs, CA 92262

Any challenge of the proposed project in court may be limited to raising only those issues raised at the public hearing described in this notice, or in written correspondence delivered to the City Clerk at, or prior, to the public hearing. (Government Code Section 65009[b][2]).

An opportunity will be given at said hearing for all interested persons to be heard. Questions regarding this case may be directed to David Newell, Associate Planner, at (760) 323-8245.

Si necesita ayuda con esta carta, porfavor llame a la Ciudad de Palm Springs y puede hablar con Felipe Primera telefono (760) 323-8253.

Palm Springs City Council

My name is Hugh Kaptur, I have spent fulltime, the last 60 years of my life living in Palm Springs, earning a living in the field of architecture. In the eighties and nineties I've contributed my time, as a member to the city Architectural Review Board and the Planning Commission. I have a deep respect for you, contributing your time to our great city as well.

Reviewing the Aberdeen project, I have some serious concerns as to the concept that is being presented. They are from a historic standpoint, good planning practices, and personal.

Our forefathers from the fifties envisioned Tahquitz Mccallum to be a grand boulevard connecting the City Airport and the Downtown. Their dream was cemented into the Palm Springs General Plan and Zoning Ordinances along this boulevard. Their plan was high end development along its frontage, to create an impressive avenue for visitors, visiting Palm Springs. To achieve this goal, strict conditions were written into the Zoning Ordinance as to what would be allowed. The Aberdeen project as presented violates all of the conditions set forth in the zoning, including setbacks, heights, density, parking and use. This dream our forefathers had for Palm Springs and Tahquitz Mccallum has been handed down through the years, council to council and respected. In my opinion it is your duty, to continue that legacy, and enforce our General Plan and Zoning Ordinances.

This concept being presented of small cubicles with live workings spaces, is not new, it's been going on for hundreds of years, and under certain conditions works well. The Pacific Coast and other similar areas, where wide boardwalks and several 100 yards of Sandy Beach overlooking the Ocean, it has become particularly popular. These areas draw hundreds if not thousands of vacationers and beachgoers to enjoyed nature's gifts. These areas also have wide barriers separating people from vehicular traffic. Looking at the Aberdeen project at this location none of these demographics are represented.

Let's assume the developers hope comes true, that this use will draw pedestrians, that creates a major planning problem. With its narrow sidewalks and the 40 mph speed limit on Tahquitz with no barrier, separating pedestrians and vehicular traffic, is an accident waiting to happen. Even downtown you have curb parking which separates people from vehicles.

Tahquitz Plaza has become a significant piece of architecture, not that I have designed it, but that the buildings themselves have become part of a heart and soul for iconic architecture in Palm Springs. These buildings are being suggested for CEQA. review. Tahquitz Plaza is included in many of the architectural tours that have made Palm Springs so popular in recent years. According to Palm Springs Life Magazine, modernism week, and yearly architectural tours brings hundreds and hundreds of thousands of dollars of revenues to local hotels, restaurants

and retailers and some of the things which in turn adds to the city tax base.

I'm in hopes this counsel will keep in mind its historic commitment to your predecessors, and not allow the Plan Development process to overrule good planning practices!

Respectfully yours

Hugh M. Kaptur

To the Palm Springs City Council,

I am writing to voice my strong opposition to the demolition scheduled for Wednesday, April 15 2015 of the highly significant Tahquitz Plaza designed by celebrated Palm Springs architect Hugh Kaptur.

As a design and preservation professional in Sydney, Australia, I am appalled that such an important piece of Palm Springs cultural and architectural history would be considered disposable.

I fly halfway across the world every year to attend Modernism Week, along with tens of thousands of others, to celebrate Palms Springs' unique and very rare collection of modernist architecture.

The city benefits enormously in economic terms from it's priceless modern architectural assets so it makes no sense, anyway you look at it, either financially or culturally, to keep demolishing what makes Palm Springs so incredibly special.

If the city continues to side with developers whose only interest is in the short term buck, then Palm Springs will eventually end up looking like any other desert city in the US and that would be not only a tragic loss but also a sad legacy to leave to future generations. Once these buildings are gone they are gone forever.

Please do the right thing and vote against this demolition.

Regards,

Annalisa Capurro

Dear Sirs:

I am writing about the fate of the Hugh Kaptur buildings on Tahquitz Canyon. Yet another debacle about to happen.

Since moving here 5 years ago, a move undertaken specifically because of the historic wealth of preserved architecture, we have watched with dismay as one after another gems have been destroyed. Palm Springs is casually destroying some of its most valuable assets- a treasure trove of architecture unlike any other city. A tourism draw par excellence. Witness the recent Modernism week stats if you have any doubts about that.

Hugh Kaptur – one of PS's most honored and respected architects – on par with William Cody, E. Stewart Williams, Donald Wexler and Albert Frey. Recently awarded a "Walk-of-Fame" star on Palm Canyon to much fanfare, immediately outside the proud new Architecture & Design Council's Edwards Harris Pavilion. Compelling subject of a well-received DVD documentary, "Hugh Kaptur: A Quiet Elegance". His career only recently beginning the first stages of great re-appreciation and re-appraisal.

Tahquitz Plaza, one of his finest and most evocative complexes, was built in 1971, designed by Kaptur together will equally respected architect Howard Lapham. The structures represent a visceral, viable bridge between the Palm Springs of the 1960s, and the Palm Springs of today – and it bridges both beautifully in a way that is just coming to be valued now. There are only a handful of other structures in the entire City as effective as these cultural touchstones.

The City can not do anything about what the Indians do. I get that. But this project? Dear City Council, do something before it is too late.

Mr. Mayor and the City Councilmembers,

When will the City of Palm Springs wake up and stop allowing the destruction of our unique architecture that draws visitors from all over the world.

The future and viability of Tahquitz Plaza is totally within the Council's jurisdiction to protect, preserve and be proud of. It is within the Council's power to reverse the tide of recent and unfortunate destruction it is the perfect place and opportunity to take a stand.

Tahquitz Plaza, one of Hugh Kaptur's finest and most evocative complexes, was built in 1971, designed by Kaptur together will equally respected architect Howard Lapham. These structures represent a visceral, viable bridge between the Palm Springs of the 1960s, and the Palm Springs of today. There are only a handful of other structures in the entire City as effective as these cultural touchstones.

Preservation Makes DOLLARS and sense. It is imperative that the City MUST act to save these buildings, KNOWING that people come to Palm Springs and surrounding areas expressly to see and explore and enjoy this built environment and PAY GOOD MONEY to do so -- you can't argue with the FINANCIAL SUCCESS of Modernism Week.

So, Councilmembers, we are asking you to stand with your citizens, residents, visitors, and stakeholders. To send a message: if you want to destroy this city's built heritage, we will oppose you.

Please preserve our rich and important architectural heritage.

Brandon Hoskins

Palm Springs resident and business owner.

Cc:	Gary Johns
Subject:	ABERDEEN -- Save Tahquitz Plaza!

In regards the subject of the proposed demolition of Tahquitz Plaza for the Aberdeen Development, we already have the perspective of experience about what will NOT best serve the community of Palm Springs. Most importantly, in this case, we have the means to prevent another tragedy.

In the case of the Palms Springs Spa – petitioners were told it was out of the Council's control. Soverign Nation. Tribal land. And one of the desert's finest and most iconic landmarks was spitefully destroyed. Gone. TAKEN AWAY.

In the case of the Wexler-designed buildings as Palm Springs High School – petitioners were told it was beyond the Council's ability to determine. School Board autonomy. Resulting in the loss of another perfectly fine and serviceable structure. TAKEN AWAY.
This time, It Is Different: The future and viability of Tahquitz Plaza is totally within the Council's jurisdiction to protect, preserve and be proud of. It is within the Council's power to reverse the tide of recent and unfortunate destruction it is the perfect place and opportunity to take a stand.

And for good reason: "Preservation Makes DOLLARS and SENSE".

That tens of thousands of people travel to Palm Springs twice a year and spend MILLIONS of dollars to visit (and sometimes eventually dwell) in these surroundings has been PROVEN.

Continuing to allow the elimination of these evocative structures REMOVES THEIR REASON FOR DOING SO and makes BAD financial sense.

Greater historians than myself can attest to the career and architectural eminence of Hugh Kaptur – one of PS's most honored and respected architects – on par with William Cody, E. Stewart Williams, Donald Wexler and Albert Frey. His career only recently begun the first stages of great re-appreciation and re-appraisal.

Tahquitz Plaza, one of his finest and most evocative complexes, represents a exceptionally visceral, viable bridge between the Palm Springs of the 1960s, and the Palm Springs of today – and it bridges both beautifully in a way that is just coming to be valued now. There are only a handful of other structures in the entire City as effective as these cultural touchstones.

The late Patrick McGrew wrote about the pending, precarious fate of the building as far back as 2010. The City has had PLENTY of time to work out a solution, and had had ample opportunity to examine the best use of this property and options for development.

Given the outcry on this and other similar examples before it, it seems clear and imperative that the City MUST act to save these buildings And most importantly, even by keeping the Kaptur buildings, THE DEVELOPER WILL GET SUBSTANTIALLY WHAT THEY WANT, ANYWAY.

So, Councilmembers, we are asking you to stand with your citizens, residents, visitors, and stakeholders. To send a message: if you want to destroy this city's built heritage, we will oppose you. There are plenty of blocks and properties with buildings no one will miss. You are welcome – encouraged ! -- to make those into something new and contributing. But where ever our history, a structure of quality, is concerned, we will ask you to think twice. And if necessary, fight to save it.

Of course the developer class will say only THEY have the right to do what they want, that's their line -- but we don't have to buy it without question, or just accept blindly and quietly!

THANK YOU and PLEASE, do the right thing, this time.

City Council- My wife and I came to Palm Springs 12 years ago to SEE the Mid-Century Modern architecture the town was known for. We decided to make it our winter home and have purchased 2 houses here at a combined cost of close to $3,000,000 (THREE MILLION DOLLARS). We have spent many hundreds of thousands more in renovations, auto purchases, restaurants, museum donations, serve on several boards AND opened a new entertainment venue the city sorely needed. We are performing every weekend and giving our time and performances for local charity events to support the museum, animal shelter, food bank, etc.

You can see the economic impact of our presence in many places, not just the taxes collected.

IN OTHER WORDS - OUR OPINION COUNTS.

The Hugh Kaptur complex known as Tahquitz Plaza should NOT BE DEMOLISHED.

Have you know pride, imagination, or sense of history?

In the recent years several of Palm Springs iconic Mid-Center Modern structures have been brought down due to a hypnotic blinding of local opinion to the heritage of this magical paradise.

IT IS TIME TO PUT THE BRAKES ON, TAKE A DEEP BREATH AND OPEN YOUR EYES.

Palm Springs must be stopped from turning into another FACELESS SHOPPING MALL.

What reason would anyone come here for that?

We are from Chicago where surveys have shown that the NUMBER ONE tourist attraction is the ARCHITECTURE.
Not the shopping, the parks, the Lake front, the restaurants: IT'S THE BUILDINGS.

Got it ?????

You've got one of the greatest collections of the #1 attraction and you want to replace it with ME TO crap that tourists can see in Anytown USA.

STOP THIS NOW.

Hello,

I am writing to you as a part time resident of Palm Springs, please do everything you can to stop the current demolition of yet another great building in this town. Saving just 25% of this building is not adequate at all! We purchased a vacation home in Palm Springs because of all the interesting architecture and now it is disappearing before our very eyes at an alarming rate. I wonder how long it will be just like any other touristy town with ordinary boring builds? Stop now and think about what made Palm Springs a mid century mecca full of amazing buildings and why so many come here.

Regards from a very concerned citizen who loves this town with a passion.

This is such an exciting time for Palm Springs. I have lived here now for 15 years and the new developments are so fresh and inspiring, from the rejuvenated downtown core, south end 111 coming in to its own, Tahquitz median....I'm just thrilled with the job the city council, the Mayor and the residents are doing to make this a vibrant community (again). However, with success and new development there is a fine line that needs to be paid attention to, the line between a "new powerful Palm Springs" and the "old charming little town" that we all love. I love progress and feel that our recent history squelching such progress has turned Palm Desert into the "go to" community and left ours as a bit of a museum piece. I am concerned about the demolition of some of our more "unique" buildings, those quirky structures that have always made our city stand out from the rest, but I do understand that with progress comes some collateral damage. Not every structure with a predominant architects pedigree should be considered a "classic" but I would hope to see that those elements of our special architecture could be incorporated into new developments that would still give the "feel" of what distinguishes Palm Springs from other communities. Just as the City provided a terrific venue with the Village Green, could the Kaptur buildings be better incorporated into this project? As a centerpiece to this project, I feel that it would be something the entire community could enjoy and be a highlight of our architectural tours as well as a great example of progress with respect to what made this city what it is today.

Dear Palm Springs City Council Members:

I am writing to express my concern over the proposed demolition of yet another Palm Springs architecturally significant midcentury-modern gem: the Hugh Kaptur Tahquitz Plaza. As a concerned Palm Springs homeowner and as a midcentury modern enthusiast, I oppose the demolition these Kaptur buildings.

In February, almost 60,000 people traveled to Palm Springs for Modernism Week and added hundreds of thousands of dollars to the local economy. Yet over the past few years, Palm Springs has lost several important midcentury buildings, including the iconic Spa Hotel with its much-photographed colonnade and the classic Donald Wexler school administration building. Palm Springs cannot afford to let these losses continue.

Sadly, there are several empty lots in Palm Springs where important midcentury modern buildings have been demolished to make way for new development, which never happened. Why not build on these now empty lots rather than add more architecturally historic buildings to the rubble pile?

Thank you for giving thoughtful consideration to this important issue.

Sincerely,
Doug MacBeth

Subject: attn ABERDEEN re: Hugh Kaptur Tahquitz Plaza

We are new residents to Palm Springs, and we are writing in hopes that our voices will be heard regarding the impending demolition the Hugh Kaptur-designed Tahquitz Plaza before it is too late. We understand that this demolition is exclusively within the City Council's purview and it is frighteningly scheduled for only one week from today!!

We chose to move to this community from Los Angeles because, at the top of our list of many other great reasons, it has such a rich history in iconic architecture that we love and admire.

Since last September when we purchased our house (not insignificantly a Kings Point home that we consider an architectural masterpiece by William Krisel), we are seeing a trend towards thoughtless demolition of that legacy that is very disturbing. The aggressive demolition of the William Cody, Donald Wexler and Richard Harrison-designed colonnade at the Spa Hotel happened days after we purchased our home, adding to the sadness we and others suffered over the 2012 destruction of Wexler-designed buildings at Palm Springs High School. The noise made over these losses are not just about the politics of preservationist nostalgists versus progress — they are representative of our collective dismay as residents that developers are literally diminishing one of the main attractions that brings new buyers like us into the area.

We know we are not alone in saying these local architects are artists who deserve the respect that reaches beyond having stars on the Palm Springs Walk of Fame, and so it is with great urgency that we implore the City Council — who stated they were powerless in the cases of the other buildings we cite above, that are forever gone — to stand up now that they do have the power, on behalf on their citizens, to preserve the architecturally-significant Tahquitz Plaza scheduled for demolition on Wednesday, April 15.

Dear City Council Members,

I implore you to reconsider the potential destruction of Tahquitz Plaza by noted local architect Hugh Kaptur. Palm Springs has risen from the dust like the mythical Phoenix due to the wonderful, unique Mid Century architecture in it. Now a greedy developer wants to turn a master piece of modern architecture into dust in order to line his pockets. Palm Suffered a major loss at the hands of the Agua Caliente tribe this past year when the highly important Spa Hotel was destroyed. Consider the people who have flocked here spending money and purchasing and restoring Mid Century properties!! We are your constituents!! We be here long after a flush developer has left town. As a owner of 2 Mid Century properties in Palm Springs, I implore you to stop the destruction of what makes this city unique and great!!

SAVE TAHQUITZ PLAZA FROM DESTRUCTION!!

Repectfully,
Stan Deen MD

Honorable City Council
City of Palm Springs
3200 E. Tahquitz Canyon Way
Palm Springs, CA 92263

Re: Comments on Aberdeen Project, Case Nos 5.1361 PD-375, CUP, 3.3820 MAJ and TTM 36876; Objection to Demolition of Historic Tahquitz Plaza

Honorable Councilmembers:

On behalf of the Palm Springs Modern Committee, we urge the City to require the preservation of the Tahquitz Plaza as part of the proposed Aberdeen Project. The Aberdeen Project, as described in the mitigated negative declaration (MND) prepared for the project, includes: demolition of all four Hugh Kaptur designed buildings that comprise the historic and architecturally significant Tahquitz Plaza; construction of 74 residential units; and construction of 17 live-work units along Tahquitz Canyon Way (the "Project" or "Aberdeen Project"). The Project was slightly revised as presented to the Planning Commission to reduce the number of residential units to 73 and the number of live-work units to 13 to allow for the preservation of one of the four Tahquitz Plaza buildings, but it is unknown to the Palm Springs Modern Committee whether the MND version of the Project or the Planning Commission version of the Project will be presented to the City Council.

Under either iteration, the Project would result in significant adverse impacts that have not been disclosed or analyzed in the MND. The California Environmental Quality Act ("CEQA") requires preparation of an environmental impact report ("EIR") whenever a project may have a significant adverse impact on the environment. (Public Resources Code section 21151.) As proposed, the Aberdeen Project would result in the demolition of all or most of the Tahquitz Plaza, resulting in significant adverse historic resource and aesthetic impacts. Despite pleas to analyze the significance of and impacts to this resource from numerous members of the public, including experts in historic architecture, the Planning Commission and even the California Office of Historic Preservation, the

City has provided no analysis of the Tahquitz Plaza. The Project would also result in land use and aesthetic impacts due to the Project's inconsistencies with height, setback, inclusion of prohibited uses and landscaping requirements. Approval of the Project as proposed, and based upon only a MND, would result in a clear violation of CEQA. However, revising the Project to include the preservation of the Tahquitz Plaza would mitigate the majority of these potentially significant impacts, likely obviating the need for an EIR. A revised Project would provide the City with a project that preserves Palm Springs' important architectural history while still accommodating a substantial amount of new development.

I. CEQA's Requirements

An EIR must be prepared instead of a MND when there is substantial evidence to support a fair argument that the project may have significant adverse environmental impacts. "The fair argument standard is a "low threshold" test for requiring the preparation of an EIR." (*Pocket Protectors v. City of Sacramento* (2004) 124 Cal.App.4th 903, 928.) "If there is substantial evidence of a significant environmental impact, evidence to the contrary does not dispense with the need for an EIR when it can still be 'fairly argued' that the project may have a significant impact." (*Friends of "B" Street v. City of Hayward* (1980) 106 Cal.App.3d 988, 1001; *see also* CEQA Guidelines § 15064.) It is a question of law, not fact, whether a fair argument exists, and courts owe no deference to a lead agency's determination. There is a clear preference for resolving doubts in favor of preparing an EIR. (*Architectural Heritage Association. v. County of Monterey* (2004) 122 Cal.App.4th 1095, 1110; *San Joaquin Raptor/Wildlife Rescue Center v. County of Stanislaus* (1996) 42 Cal.App.4th 608, 617-618; *Stanislaus Audubon Society, Inc. v. County of Stanislaus* (1995) 33 Cal.App.4th 144, 151; *Quail Botanical Gardens Foundation, Inc. v. City of Encinitas* (1994) 29 Cal.App.4th 1597, 1602-03.)

There is substantial evidence to support a fair argument that, as proposed, the Aberdeen Project may have significant adverse impacts. The Project would demolish the historically significant Tahquitz Plaza, resulting in significant historic resource impacts. The Project also fails to comply with numerous land use regulations and requirements. This noncompliance results in both land use and aesthetic impacts that were not analyzed or even acknowledged by the MND.

A. Historic Resource Impacts.

CEQA section 21084.1 mandates that "[a] project that may cause a substantial adverse change in the significance of an historical resource is a project that may have a significant effect on the environment." A substantial adverse change in the significance

of an historical resource includes "physical demolition, destruction, relocation, or alteration of the resource..." (CEQA Guidelines § 15064.5(b)(1).) The Aberdeen Project would demolish the historically significant Tahquitz Plaza, resulting in a significant adverse impact.

I. Tahquitz Plaza is an Historic Resource.

Hugh Kaptur is among Palm Spring's most important and visionary local architects. He is an innovative designer with his own distinctive to Desert Modern architecture. Mr. Kaptur was the subject of a recent documentary, *Quiet Elegance: The Architecture of Hugh M. Kaptur*. (See http://www.thisnthatfilms.net/hugh-kaptur.html, incorporated by reference.) The importance of his work within the City was also recognized when he received a star on the Palm Springs Walk of Stars in 2014 alongside those including William F. Cody, Albert Frey, Donald Wexler and E. Steward Williams.

The Tahquitz Plaza is a shining example of Mr. Kaptur's originality and ingenuity. The beautiful pueblo-influenced design of these buildings embodies his distinctive style. The Tahquitz Plaza was also designed to be energy efficient with thick walls and wide overhangs that protect the buildings from absorbing heat and an orientation intended to capture breezes. The visually prominent location of the Tahquitz Plaza along Tahquitz Canyon Way heightens the significance of this resource.

Under CEQA, "[g]enerally, a resource shall be considered by the lead agency to be 'historically significant' if the resource...: (A) Is associated with events that have made a significant contribution to the broad patterns of California's history and cultural heritage; (B) Is associated with the lives of persons important in our past; (C) *Embodies the distinctive characteristics of a type, period, region, or method of construction, or represents the work of an important creative individual, or possesses high artistic values*; or (D) Has yielded, or may be likely to yield, information important in prehistory or history." (CEQA Guidelines § 15064.5(a)(3).)

The record for the Aberdeen Project is replete with evidence regarding the importance of Hugh Kaptur and the significance of the Tahquitz Plaza. The following evidence submitted by experts clearly demonstrates the Tahquitz Plaza embodies distinctive characteristics of Desert Modern design, represents the work of an important creative individual and possesses high artistic values. Thus, the City must consider the Tahquitz Plaza an historic resource and analyze any impacts to this resource in an EIR.

Alan Hess, architect, historian, and the author of numerous books on Modern architecture, submitted comments regarding the importance of Hugh Kaptur in history of

Palm Springs Modernism. (**Attachment 1**, February 19, 2015 Hess Letter to City and March 20, 2015 Hess Letter to OHP.) His letter describes Hugh Kaptur's unique style and the high artistic value of his work at Tahquitz Plaza. Mr. Hess is a consultant on the City's Citywide Historic Resource Survey Update that is currently being prepared. He has strongly recommended the listing of Tahquitz Plaza as a significant resource on that survey.

Architectural historian Morris Newman interviewed Hugh Kaptur as part of his work on an essay regarding Mr. Kaptur published in *The Desert Modernists: The Architects Who Envisioned Midcentury Modern Palm Springs*. (**Attachment 2**, Newman Essay re Hugh Kaptur.) Mr. Kaptur informed Mr. Newman that the Tahquitz Plaza, where Mr. Kaptur maintained his practice for many years, is one of his favorite projects. In comments submitted to the City, Mr. Newman found that "[a]lthough Tahquitz Plaza is not a loud or flashy building, it shows many signs of architectural originality and creativity...In my view, the Tahquitz office complex is one of the "sina qua non" buildings of Palm Springs." (**Attachment 3**, Newman Email to City.) Mr. Newman also noted the importance of Tahquitz Plaza is enhanced by the fact that it is part of a trio of Kaptur-designed buildings along this stretch of Tahquitz Canyon Way.

Brad Dunning, a former Historic Site Preservation Board member and designer known for working on architecturally significant properties and restorations, also submitted comments urging preservation of the Tahquitz Plaza. He stated that Hugh Kaptur's work is as important to Palm Springs as that of Albert Frey, E. Stewart Williams, Donald Wexler, and William Cody. He found Kaptur's work to be "distinctive, unique and in the case of his pueblo modern design at Tahquitz Plaza highly contextual and specific to stylish Palm Springs." (**Attachment 4**, February 20, 2015 Dunning Email to City.)

The architect for the Tahquitz Plaza, Hugh Kaptur, who is also a former Planning Commissioner and member of the City's Architectural Advisory Committee, has articulated before the Planning Commission and in a recent editorial why the Tahquitz Plaza is one of his favorite projects. (**Attachment 5**, April 7, 2015 Kaptur Editorial in *Desert Sun*.) Mr. Kaptur feels the Tahquitz Plaza represents some of his best work, noting that the buildings were the recipients of architectural awards in 1979 and 1980.

The California Office of Historic Preservation has also urged the City consider the Tahquitz Plaza an historic resource and either modify the Aberdeen Project to preserve the Tahquitz Plaza or to prepare an EIR to analyze the impacts. . The OHP's letter officially states "in light of the preliminary findings of historical significance described in the Alan Hess letter, we encourage the Lead Agency [the City] to act within its

discretion...to consider the Tahquitz Plaza office complex as a historic resource for the purposes of CEQA." The OHP letter further states that the City has the discretion under CEQA to "treat the Tahquitz Plaza office complex as a historic resource, [and that] it may be possible to modify the proposed project to avoid impacts to the historic resources.... In this way, [the City] could avoid the time and cost involved in preparing an Environmental Impact Report (EIR)."

The City's own design and land use experts, the Architectural Advisory Committee and the Planning Commission, recognized the significance of Tahquitz Plaza and recommended denial of the Project based in large part upon the proposed demolition of these buildings.[1] At the Planning Commission hearing, a Commissioner asked City staff whether the City could find a building to be a local historic resource if it had not yet reached 50 years of age. No specific answer was provided, but a review of the City's Historic Preservation Ordinance demonstrates there is no prohibition or limitation regarding buildings that are less than 50 years and the City has previously listed resources that were less than 50 years of age. The Historic Preservation Ordinance was adopted "for the purpose of preserving areas and specific buildings of the city which reflect elements of its cultural, social, economic, political, architectural and archaeological history." (Palm Springs Municipal Code 8.05.010.) This Ordinance defines an historic site as "any real property ... that is unique or significant because of its location, design, setting, materials, workmanship or aesthetic effect and: ... (4) That embodies the distinctive characteristics of a type, period or method of construction; or (5) That presents the work of a master builder, designer, artist, or architect whose individual genius influenced his age; or that possesses high artistic value." (Palm Springs Municipal Code 8.05.020(a).) The expert testimony demonstrates that the Tahquitz Plaza meets criteria (4) and (5) of the City's definition of an historic site.

The wealth of evidence regarding the historic significance of the Tahquitz Plaza is similar to the evidence presented to the county in *Architectural Heritage Association v. County of Monterey* (2004) 122 Cal.App.4th 1095. In that case, the court found that the opinion of a consultant commissioned by the county, findings of an advisory committee and testimony of members of the public with relevant expertise represented "substantial evidence supporting a fair argument that the Old Jail is an historic resource." (*Id.* at 1118.) **Here, a City commissioned consultant (Alan Hess), other experts in the community, the Architectural Advisory Committee, the Planning Commission and**

1 The Planning Commissioners that voted against denial of the Project did not dispute the significance of the Tahquitz Plaza. Instead, they stated that they did not believe it was economically feasible to preserve these buildings. There is no economic analysis in the record to support this conclusion. Moreover, this is a determination that can only be made after analysis in an EIR.

even the California Office of Historic Preservation have urged the City to consider the Tahquitz Plaza to be an historic resource. Failure to do so is a violation of CEQA as it was in *Architectural Heritage Association.*

2. The MND Provide No Evidentiary Support for Finding of Insignificant Impacts to Historic Resources.

Despite all of the evidence presented to the City, and the importance of Hugh Kaptur and the Tahquitz Plaza, the MND/Initial Study completely ignores the buildings' potential historic significance. Instead of evaluating the historic significance of these resources, the MND/Initial Study merely references the Tahquitz Plaza as "1971 vintage office buildings." (MND p. 24.) The MND/Initial Study does not disclose that Hugh Kaptur was the architect of these buildings nor does it describe their unique design. It states that the buildings are not listed on the state or local register, but does not acknowledge that the buildings may soon be listed on the City's historic resources survey. Further, as pointed out by the Office of Historic Preservation, the fact that a resource is not listed on a register does not preclude a resource from meeting the criteria for historic resource under CEQA. CEQA "does not demand formal listing of a resource in a national, state or local register as a prerequisite to 'historical' status. The statutory language is more expansive and flexible." (*Architectural Heritage Ass'n, supra* 122 Cal.App.4th at 1114, citation to *League for Protection of Oakland's Historic Resources v. City of Oakland* (1997) 52 Cal.App.4th 896, 907.)

The City's failure to evaluate the historic significance of the Tahquitz Plaza, despite substantial evidence of the buildings historicity and requests from the Planning Commission to study these impacts, is a violation of CEQA. The purpose of the initial study is to provide the lead agency with adequate information regarding a project to determine the appropriate environmental review document and "documentation of the factual basis for the finding in a negative declaration that a project will not have a significant effect on the environment." (*Ctr. for Sierra Nevada Conservation v. County of El Dorado* (2012) 202 Cal. App. 4th 1156, 1170, citations omitted.) "Where an agency. . . fails to gather information and undertake an adequate environmental analysis in its initial study, a negative declaration is inappropriate." (*El Dorado County Taxpayers for Quality Growth v. County of El Dorado* (2004) 122 Cal. App. 4th 1591, 1597, citations omitted.) Failure to adequately analyze all of a project's potentially significant impacts or provide evidence to support conclusions reached in the initial study is a failure to comply with the law.

This failure to provide an analysis is also a violation of the City's General Plan Policy RC 10.3, which states: "Require site assessment conducted by a qualified

specialist whenever information indicates that a site proposed for development may contain paleontological, historic, or archaeological resources." The evidence cited above clearly indicates the Tahquitz Plaza not only may be but is an historic resource.

3. The City's Failure to Follow OHP Recommendations Could Jeopardize Its Status as a Certified Local Government.

Palm Springs was recently approved as a Certified Local Government (CLG) by the California Office of Historic Preservation (OHP). The CLG Program is designed to encourage the participation of local governments in the identification, evaluation, registration, and preservation of historic properties in their communities. CLG communities are also eligible to receive a wide range of technical assistance and substantial grants from the OHP. The OHP monitors CLG communities' compliance with CEQA and other laws and regulations intended to protect historic resources. A determination by OHP that the City has failed to comply with CEQA could result in a loss of CLG status and/or the City's inability to receive OHP grant funding. OHP has recommended the City evaluate the historic significance of the Tahquitz Plaza. To comply with CEQA and protect its status as a CLG, the City should follow this recommendation.

B. Land Use Impacts.

The Architectural Advisory Committee and the Planning Commission have identified numerous areas in which the Aberdeen Project would be inconsistent with the Section 14 Specific Plan and City zoning regulations. The majority of these inconsistencies would be resolved if the Project were modified to include the preservation of Tahquitz Plaza.

A project's conflict with any applicable land use plan, policy or regulation is a significant environmental impact under CEQA. (*Pocket Protectors v. City of Sacramento* (2004) 124 Cal.App.4th 903, 929.) "If substantial evidence supports a fair argument that the proposed project conflicts with [land use] policies, this constitutes grounds for requiring an EIR. Whether a fair argument can be made on this point is a legal question" that provides no deference to a city council determination.

The Aberdeen Project would exceed Section 14 height limits. The MND dismisses this land use policy conflict by claiming the Project would meet the requirements of the City's high-rise development standards. (MND p. 12.) As found by the Planning Commission, the Project would not comply with the high-rise development standards because it lacks the required setbacks by providing only 6.75 feet of setback from Tahquitz Canyon Way. Planning Commissioner's fact-based conclusions regarding a

project's failure to comply with land use policy is substantial evidence to support a fair argument that the project would have significant land use impacts. (*Stanislaus Audubon Society, Inc. v. County of Stanislaus* (1995) 33 Cal.App.4th 144, 155.) Additionally, the Project would not include 60 percent open space, which is required to meet the high-rise development standards. (Palm Springs Municipal Code 93.04.00(A).) If the Tahquitz Plaza were preserved, adequate setbacks would be provided along Tahquitz Canyon Way and additional open space would be included in the Project, which would likely allow the Project to meet the high-rise standards for the remainder of the Project.

The Project would also result in a land use impact by including single family homes in area where single family homes are prohibited. (Section 14 Specific Plan p. 6-4.) The MND ignores this inconsistency by mischaracterizing the Project as multi-family housing. The City's Municipal Code defines multi-family housing as "a building designed for or occupied by two (2) or more families living independently of each other." (Palm Springs Municipal Code 91.00.10.) In the Aberdeen Project, the majority of the buildings, particularly those along Tahquitz Canyon Way, are completely detached units that are designed for occupancy by only one family, thus they do not meet the City's definition of multi-family housing and are prohibited by the Section 14 Specific Plan. The MND is inaccurate and misleading to the public and decision makers by failing to disclose the inclusion of a prohibited use in this Project.

The setback, height and use conflicts are similar to those found by the court to be significant impacts requiring preparation of an EIR in *Pocket Protectors v. City of Sacramento* (2004) 124 Cal.App.4th 903. In the *Pocket Protectors* case, the planning commission found a densely packed single family housing project to be inconsistent with housing type and setback policies for the area. The MND prepared in that case glossed over or ignored the inconsistencies, much the way it does here, and the project approval was found to be in violation of CEQA.

The Aberdeen Project further violates land use policies due to its inconsistencies with required landscaping along Tahquitz Canyon Way. The minimal setbacks provided by the Project do not allow adequate space for the large palm trees, desert landscaping, public art and pedestrian amenities along Tahquitz Canyon Way required by the Section 14 Specific Plan. The MND acknowledges the inconsistency and provides mitigation measure MMI-1, which states: "Project site plans, architectural renderings and landscape plans shall be revised to address inconsistencies with the development standards and other design requirements of the Section 14 Specific Plan, as determined by City Council." The ability of mitigation measures to actually mitigate impacts must be evaluated in the environmental review document. By waiting until after the City Council hearing to develop a mitigation measure for this impact, the MND fails to assess the efficacy of the

measure and improperly defers mitigation. The developer has opted not to make the revisions necessary to bring this Project into compliance with the Section 14 Specific Plan and thus the inconsistency, and land use impact, remains.

The Project would also violate several City General Plan policies, resulting in further land use impacts. The General Plan requires the City to:

- RC10.1 Support the preservation and protection of historically, architecturally, or archaeologically significant sites, places, districts, structures, landforms, objects, native burial sites and other features.
- RC10.2 Encourage and support the retention and adaptive reuse of buildings of architectural, historic, or cultural significance where financially feasible.
- RC10.5 Actively encourage and promote the understanding, appreciation, and preservation of the archaeological, historic, and cultural resources.

By allowing the demolition of the historically significant Tahquitz Plaza, the City's approval of the Project would violate these General Plan policies.

C. Aesthetic Impacts

The Aberdeen Project would also result in significant aesthetic impacts that require analysis in an EIR. The proposed demolition of the historically significant Tahquitz Plaza at a prominent location in the City's downtown would degrade the visual character of the area. These architecturally distinctive buildings with wide landscaped setbacks would be replaced with densely packed units that exceed height limits and violate setback requirements. The Planning Commission has questioned the viability of providing live-work units along Tahquitz Canyon Way and expressed concern that these visually prominent units would end up being used as storage space, further degrading the visual character. This degradation is particularly significant because Tahquitz Canyon Way is designated as a scenic corridor by the City's General Plan.

Conclusion

The Palm Springs Modern Committee urges you to reconsider the proposed Aberdeen Project. As proposed, the Project's impacts require analysis in an EIR and the City's proposal to approve the Project based upon a MND violates CEQA. If the Project were revised to include preservation of the Tahquitz Plaza, the majority of the housing units could still be constructed, but the impacts of the Project would be substantially reduced.

Thank you for your time and consideration in this matter.

Sincerely,

Amy Minteer
Attorney at Law

Re: Tahquitz Plaza by architect Hugh Kaptur, Tahquitz Canyon and Calle El Segundo

To the Planning Commission:

I am writing as an architect, historian, and author of nineteen books on Modern architecture to express my support for the preservation of the Tahquitz Plaza office complex because of its historical significance to Palm Springs and California architecture. Please share this letter with the Planning Commissioners prior to their February 25, 2015 meeting.

I have written two books on Palm Springs architecture (*Julius Shulman: Palm Springs*, Rizzoli International, 2008, and *Palm Springs Weekend*, Chronicle Books, 2001) and can say that these buildings, and the work of architect Hugh Kaptur, play an important role in what is now identified as Palm Springs Modernism.

I am also a consultant on architectural history for the current City of Palm Springs architectural survey. I have already unequivocally recommended Tahquitz Plaza as a significant building in that survey.

My resume is attached. I have written on architecture for the *Los Angeles Review of Books, The Architect's Newspaper, The Los Angeles Times, Architectural Digest, the Journal of the Society of Architectural Historians*, and other journals. I have been the architecture critic of the *San Jose Mercury News* since 1986, received a grant from the Graham Foundation for Advanced Studies in the Fine Arts, and was a National Arts Journalism Fellow at Columbia University.

The research of the importance of Palm Springs Modern architecture in general is very recent. Only a decade ago, the work of now-recognized architects such as William Cody, Donald Wexler, Palmer & Krisel, and E. Stewart Williams was not well known

generally; few Modern buildings now considered iconic were identified as historic then. Since then, our understanding of these and other architects has made us aware of the full dimension of Palm Springs architectural history.

As we continue researching this history, it is clear that the work of Hugh Kaptur makes a significant contribution to the unique character of Palm Springs architecture. This opinion is not mine alone; the newly published book *The Desert Modernists: The Architects Who Envisioned Midcentury Modern Palm Springs* (Desert Publications, 2015) and the documentary film *Quiet Elegance: The Architecture of Hugh M. Kaptur* (Bert Simonis, director, 2014) indicate the clear direction of scholarly opinion on Kaptur's importance.

Briefly stated, Kaptur's significance is this: 1) Palm Springs midcentury Modern architecture is known for its use of Modern concepts to solve the challenges of climate, function, and new materials; 2) an extraordinary group of talented architects lived or worked in Palm Springs, and while they addressed the same problems they expressed a wide range of aesthetic solutions; 3) Hugh Kaptur's aesthetic is unique in Palm Springs, demonstrating the wide range of fertile innovation in the city.

Tahquitz Plaza is an important and well preserved example of Kaptur's unique approach. Rather than drawing on the rectilinear steel and glass geometries of, for example, Richard Neutra, he draws on organic forms and ideas from the American Southwest, and Frank Lloyd Wright. This is seen in Tahquitz Plaza's irregular roofline, the deep, sculpted, curving frames around windows, the eaves and sun shading features, and the integration of outdoor areas interspersed among the offices. This is a strong piece of design that deserves to remain in place.

In addition, its site on Tahquitz Canyon places it in the context of the city civic center, an extraordinary collection of Modern buildings serving civic purposes, and rare in the state.

I am writing this letter *pro bono* because historic architecture of this quality adds to the civic character and quality of city life. In the years before Palm Springs' heritage was fully understood, the city lost many significant structures. Unfortunately, this degradation has continued; the demolition of a major Kaptur design would be a loss to history and the city's urban quality.

Sincerely,

Alan Hess

Re: Tahquitz Plaza by architect Hugh Kaptur, Tahquitz Canyon and Calle El Segundo

Dear Ms. Roland-Nawi:

I am writing at the request of the Palm Springs Preservation Foundation to ask you to consider writing a letter to the City of Palm Springs encouraging them to conduct an EIR for the Tahquitz Plaza office buildings (1971) by Kaptur & Lapham. The four buildings in this complex are excellent and well preserved examples of key aspects of architect Hugh Kaptur's work, and of Palm Springs Modernism.

The buildings are currently under threat of demolition for a proposed residential project. So far the city has not requested an EIR, but I believe the complex's significance and quality require it.

Kaptur is an important architect in Palm Springs Modernism. Rather than drawing on the rectilinear steel and glass geometries of, for example, Richard Neutra, Kaptur often draws on organic concepts from Frank Lloyd Wright and forms from the American Southwest. This is seen in Tahquitz Plaza's irregular roofline, the deep, sculpted frames around windows, the bermed walls, the eaves and sun shading features, and the integration of outdoor areas interspersed among the offices. The strong composition of these many elements shows Kaptur's skill and the high artistic value of his work.

In addition, Tahquitz Plaza's location on Tahquitz Canyon places it in the context of the city's Modern civic center. Tahquitz Canyon is the city's main civic thoroughfare, linking the airport to downtown; along this boulevard is an extraordinary collection of Modern buildings serving civic purposes, including city hall, police and county facilities, and the airport, complemented by commercial buildings of similar style and siting. Such a collection of Modern civic center buildings is rare in the state.

Palm Springs' midcentury Modern architecture is known for its use of Modern concepts in addressing the challenges of climate, functions, and new material technologies. These are not typified by a single aesthetic; it ranges from the lightweight, steel framed houses resting lightly on the earth seen in the work of Richard Neutra and Albert Frey, to the autochthonous monolithic concrete structures, literally buried in the earth, seen in John Lautner's work, with many more interpretations in between.

Within this wide range, Kaptur's work is singular. His training in design was closely associated with midcentury automotive design in Detroit, where he attended Lawrence Tech and worked for General Motors' consumer design division. Kaptur has worked in Palm Springs from 1956 to the present day. He worked for and with other noted local architects, including Donald Wexler, Richard Harrison, and William Cody. Like those architects, his work is distinctive and individual, and yet his design also reflects common themes that distinguish Palm Springs Modernism.

The Tahquitz Plaza offices are an excellent representation of his use of sculptural, expressionist forms influenced by Native American adobe structures, but modernized and abstracted aesthetically in the spirit of Modernism. The complex's thick stuccoed walls do not imitate those vernacular structures; the silhouette of the walls and the curving windows frames that grow directly from those walls are carefully abstracted into forms that represent a distinct, modernized aesthetic vocabulary. This approach is also seen in other Kaptur designs, including the William Holden house (1977), and the Casa Blanca motel (1979.)

In addition, the Tahquitz Plaza offices incorporate unpainted wood walls and wood trellises. These also update the wood ramadas and trellises of traditional Southwestern architecture. The siting of the office structures creates small courtyards between the buildings (another design aspect seen in historic Spanish architecture of the Southwest) allowing for shaded outdoor areas.

Likewise, the landscaping and siting of the Tahquitz Plaza buildings represent an updating of traditional concepts and a Modern response to the hot climate. Berms rise partway up the walls, providing thermal insulation and connecting the structure to the earth, similar to Lautner's desert designs.

The thick walls, hooded windows, and shaded courts all have historic precedents, but they are also practical, integral elements that help moderate the strong sunlight and heat of the local climate. The design of all these elements is artful and well composed.

The use of historic regional architecture by twentieth century architects is an important facet of Modern architecture in California and the West. It can be seen, for example, in the work of Irving Gill in the 1910s, the Ranch Houses of Cliff May in the 1950s and 1960s, and the civic buildings and residences of Bennie Gonzales in Arizona, where historic forms were blended with Modernism's abstraction. Hugh Kaptur is the primary interpreter of this approach in midcentury Palm Springs, and Tahquitz Plaza is a primary example in the city.

Kaptur's work has been rediscovered fairly recently. This is not surprising; our understanding of the significance of Palm Springs Modern architecture in general is also relatively recent. Only a dozen years ago, the work of now-recognized architects such as William Cody, Donald Wexler, Palmer & Krisel, and E. Stewart Williams was not generally well known outside Palm Springs, and its significance was not even widely recognized within Palm Springs.

In the years before Palm Springs' heritage was fully understood, the city lost many significant structures. Unfortunately, this degradation has continued; the demolition of a major Kaptur design such as this would be a loss to history and the city's urban quality.

But as we continue researching this history, it is clear that the work of Hugh Kaptur makes a significant contribution to the unique character of Palm Springs architecture. This opinion is not mine alone; the newly published book *The Desert Modernists: The Architects Who Envisioned Midcentury Modern Palm Springs* (Desert Publications, 2015) and the documentary film *Quiet Elegance: The Architecture of Hugh M. Kaptur* (Bert Simonis, director, 2014) indicate the clear direction of opinion on Kaptur's importance.

I have written to the Palm Springs Planning Commission about my support, as a historian and architect, for the preservation of Tahquitz Plaza. I am also a consultant on architectural history for the Palm Springs architectural survey, currently underway. I have already unequivocally recommended Tahquitz Plaza as a significant building in that survey. I believe that a letter from your state office would encourage them to conduct an EIR that would document the significance of this complex.

Thank you for your consideration of this matter.

Sincerely,

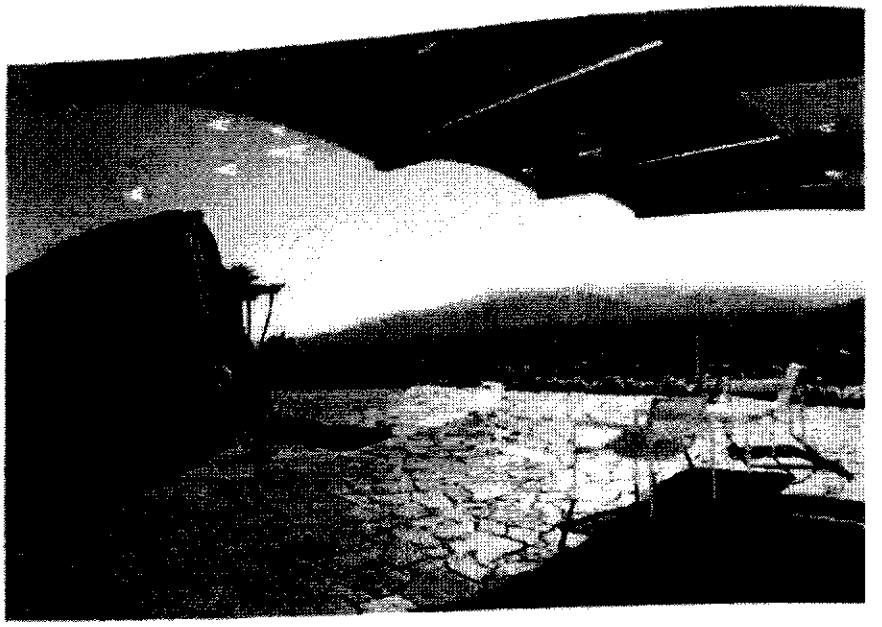
(MAY 22, 1931 –)

HUGH KAPTUR STANDS APART FROM MOST OF THE PALM SPRINGS ARCHITECTS OF HIS GENERATION. RATHER THAN THE MAINLINE, INTERNATIONAL STYLE MODERNISM FAVORED BY MOST OF HIS PREDECESSORS AND COLLEAGUES IN THE DESERT, KAPTUR PREFERS WHAT HE CALLS "AN ARTISTIC ARCHITECTURE THAT IS ORGANIC AND FLOWING." HIS FIRST INSPIRATION WAS FRANK LLOYD WRIGHT, NOT MIES VAN DER ROHE.

Kaptur is not a doctrinaire follower of Wright, however. He denies having a signature style. His primary debt to the master of Taliesin, he adds, was the acknowledgment of climate and landscape in his projects, as well as a taste for sculptural masses and a delight in contrasting materials. In some cases, Kaptur was able to translate some of the sculptural feeling of Wright's designs into a colorful, "populuxe" style. Kaptur's first Palm Springs project was the Impala Lodge (1957–58; now the Triangle Inn), a wildly inventive building with steel beams supporting a canopy reminiscent of a lean-to. Walls of glass stand on a stone base, while external "buttresses" support shade structures to keep the sun off the windows. Other "pop" buildings are the Siva House of 1959, with scallop-shaped awnings draped in orange plastic, and the clubhouse Kaptur designed with Robert Riccardi for the Palm Springs Golf Course (1959), with a curved roofline resembling a cresting wave.

Practical commissions, such as the Tahquitz Plaza office complex (1971, by Kaptur, Lapham, and Associates) on Tahquitz Canyon Way, did not always allow total freedom, yet this comparatively restrained project remains one of Kaptur's favorites. After an original design called for concrete, cost considerations dictated that a less expensive wood frame structure be employed. Despite this



This page and opposite: Kaptur created this home in 1963 at 660 Paloarden Drive in Palm Springs. The house is known as the Russell House and/or the Sea House.

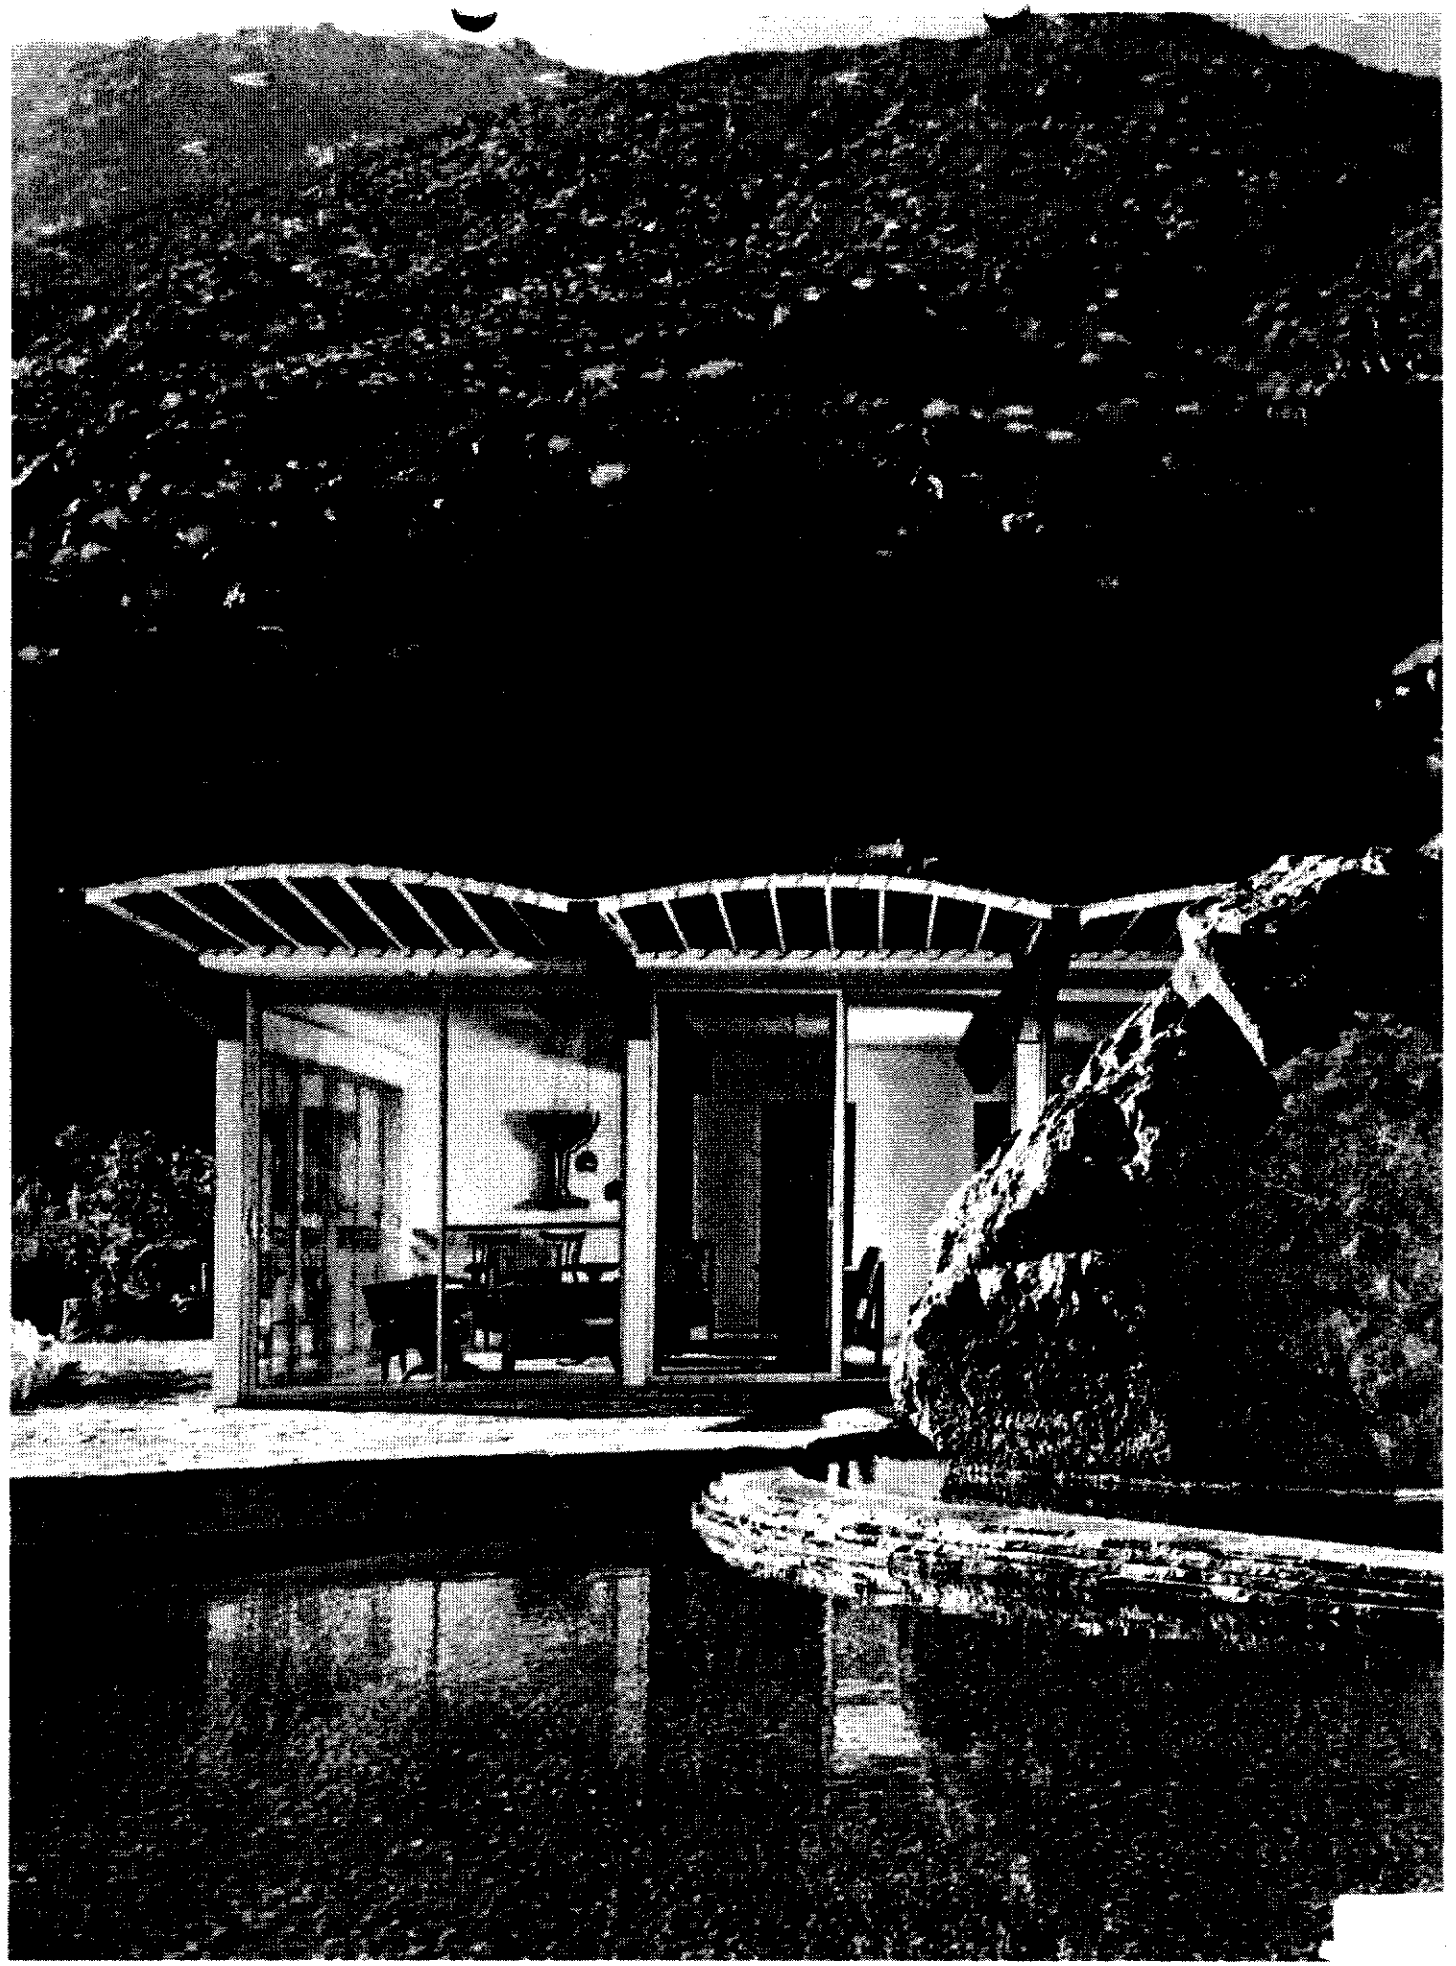
Previous page: Hugh Kaptur

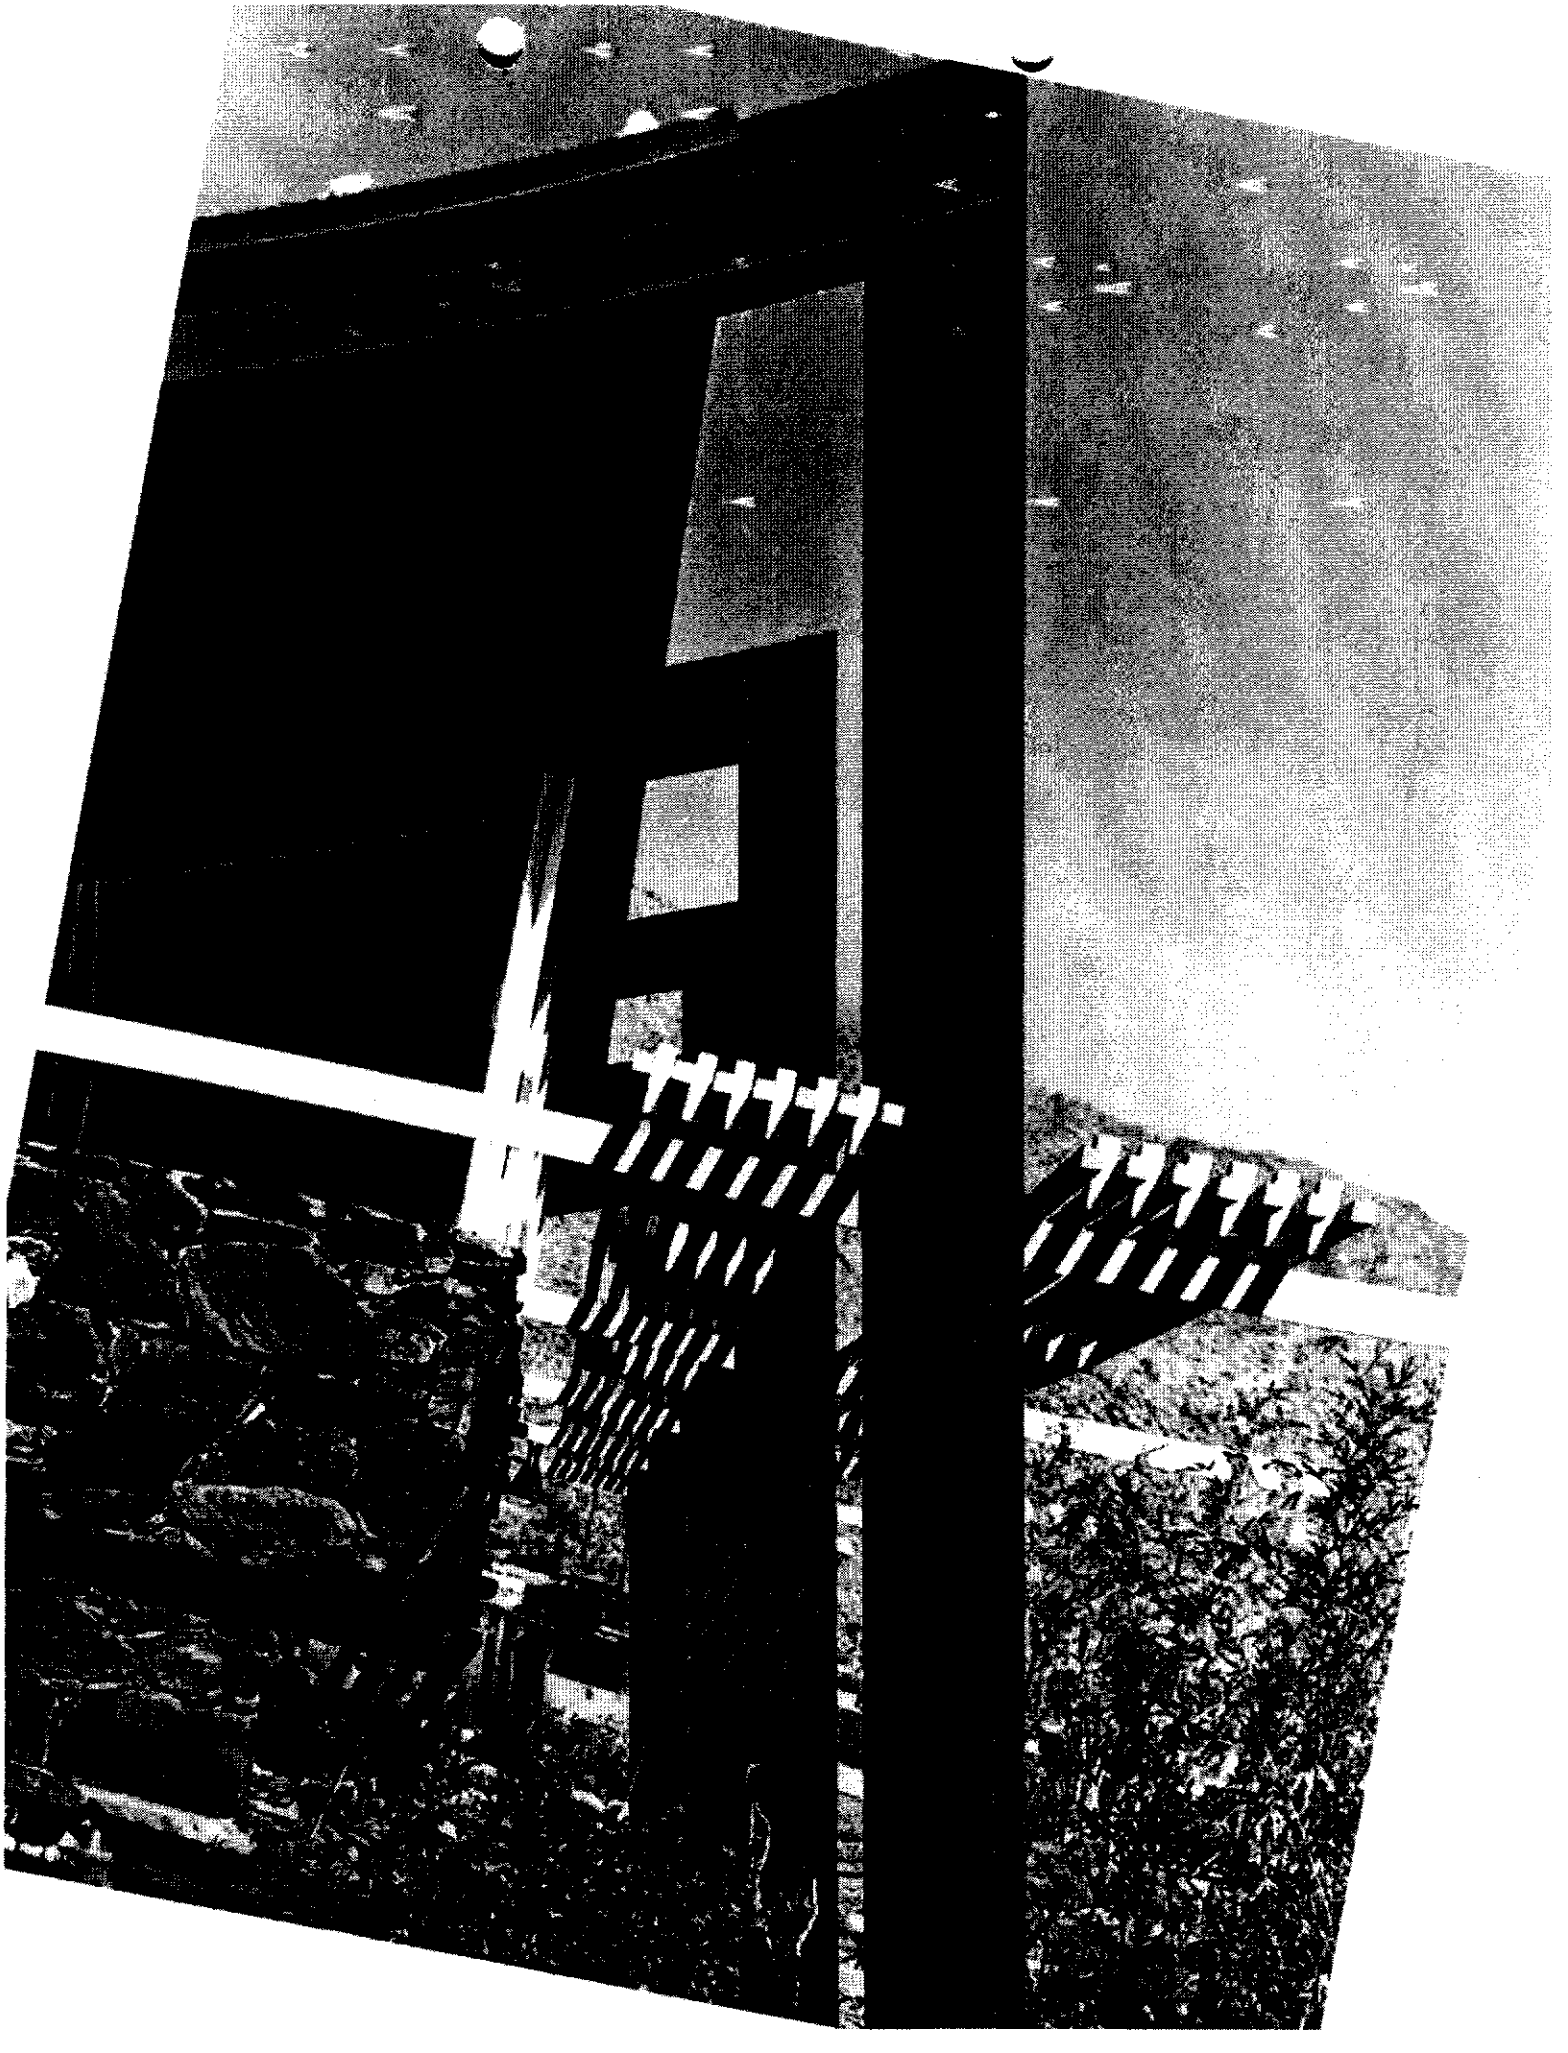
constraint, the Tahquitz buildings manage to look like masonry, due to walls that are sculpted to look as massive as concrete. To further the illusion of thick walls, Kaptur provided the buildings with windows that appear deeply recessed. In other places, windows push outward from the wall surface as if trying to break free of the building. Similar jutting windows can be found at Kaptur's Musicland Hotel (1967), another building that flirts with the illusion of heavy masonry in the form of a pueblo adobe.

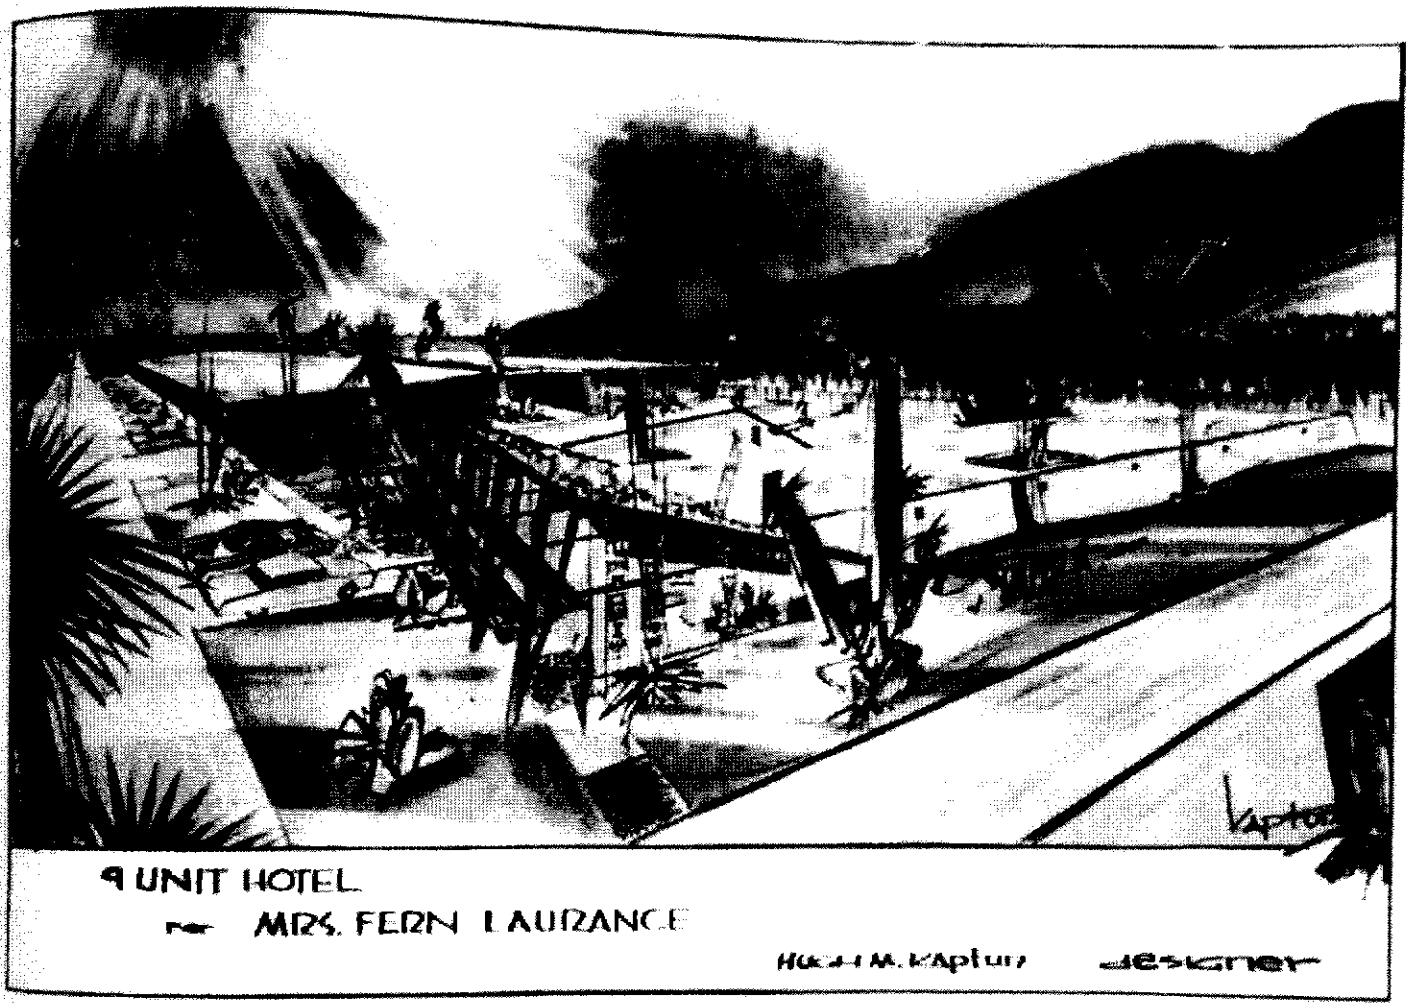
A Detroit native, Hugh Kaptur was born in 1931 to an artistic mother and an automobile design engineer father. After high school, he briefly attended Lawrence Institute of Technology (now known as Lawrence Technological University) in Michigan to study engineering. But at 20, he enrolled in the Marines during the Korean War; he and his young family briefly lived in California before he returned to Michigan so that he could work with his father at GM's design studio while finishing his education. At that point, Kaptur and his family returned to California, this time to the largely undeveloped Palm Springs of the early 1950s. After working briefly for Wexler and Harrison, Kaptur supported himself by making presentation drawings for Donald Wexler, Albert Frey, and others.

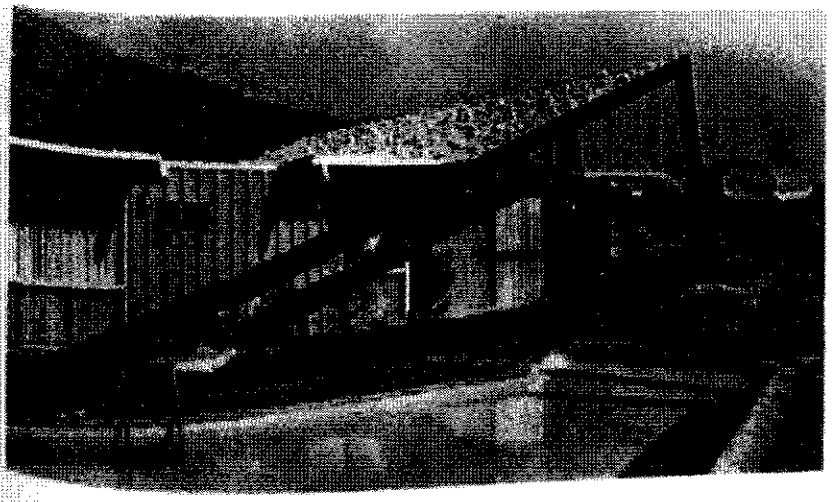
Although Kaptur says he is willing and able to design in any style, sometimes his inner exuberance bubbles to the surface. Commissioned in 1988 to design a conventional home for Jim and Kay Selzer, Kaptur came up with something very different: a lively, hard-to-describe residence comprising a cone-shaped dome set amid other simple geometric shapes that seem to vibrate together. Twenty-five years later, the Selzers report that they are still happy with the unconventional house and they remain friendly with the architect.

The exuberance has survived into the architect's ninth decade. Kaptur is currently designing an addition to an existing home in the form of a circular casita, or guesthouse, separated from the main house by a courtyard. In a nod to the ongoing influence of Frank Lloyd Wright, the addition is to be nestled into the natural contours of the landscape.





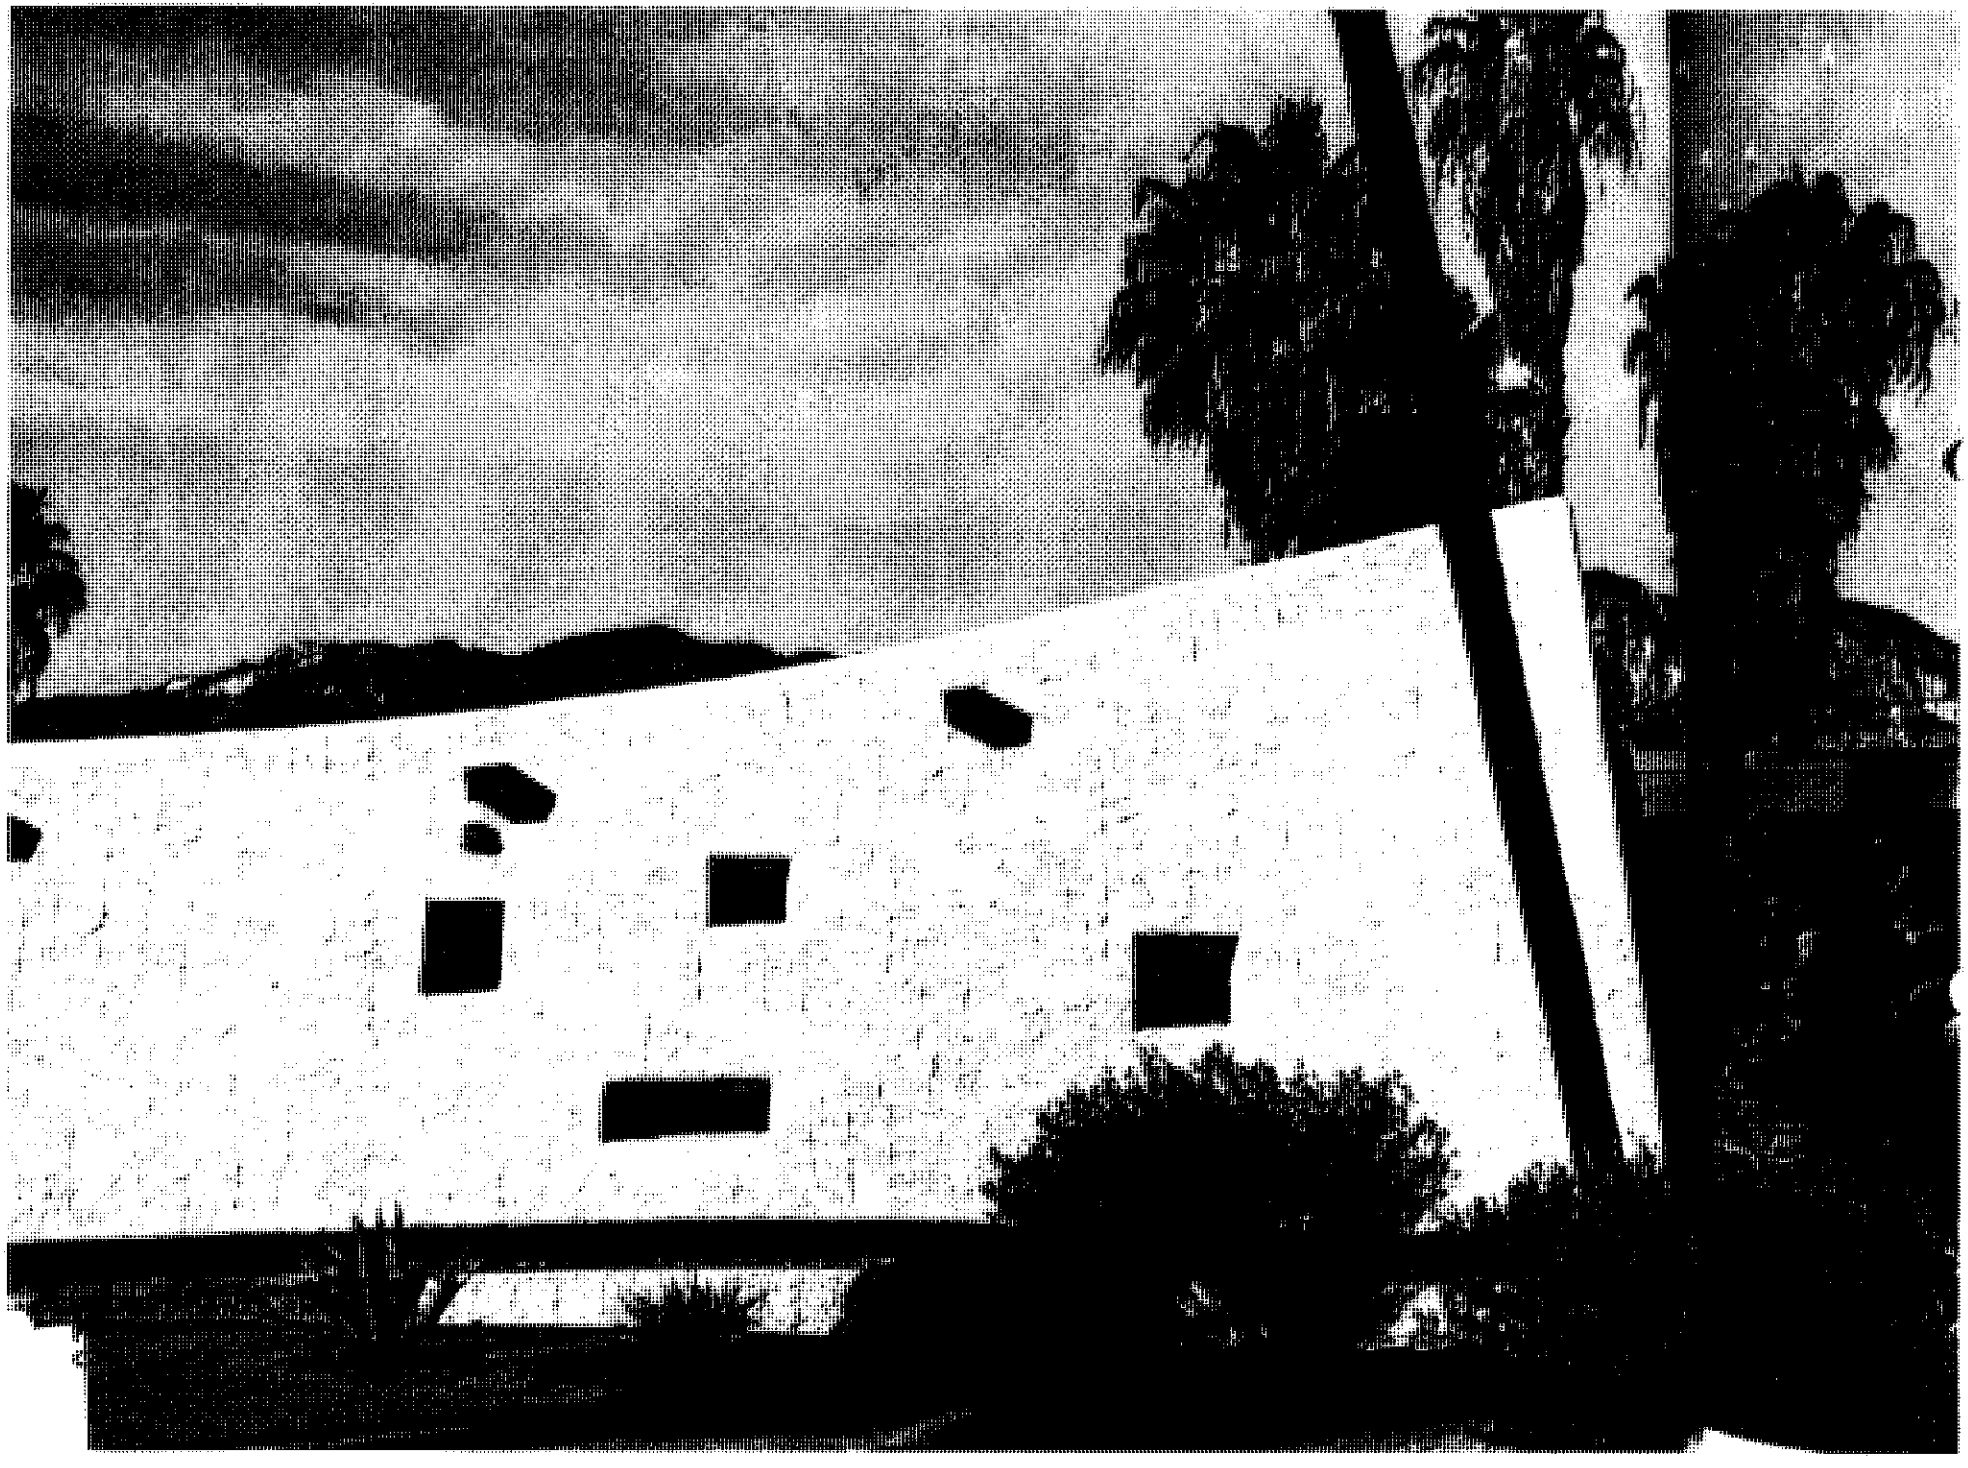


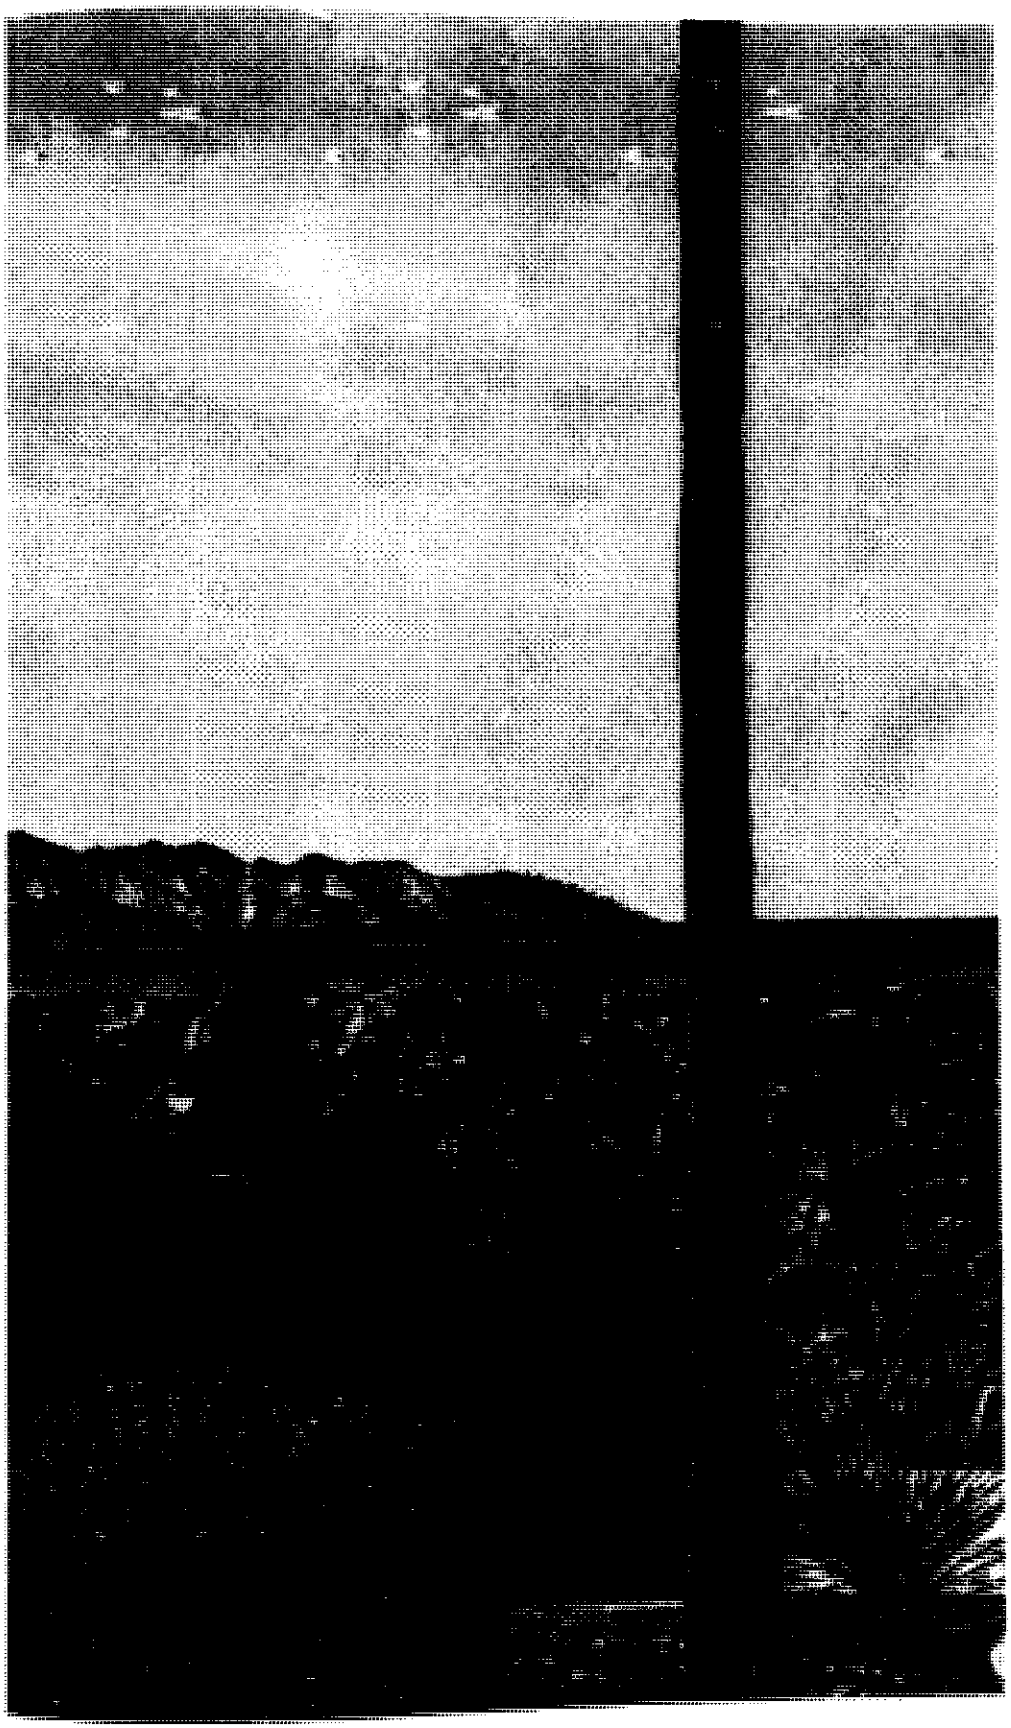


Opposite: This was Kaptur's first Palm Springs building (1953-54), the Ingalls Lodge, 566 East San Lorenzo Road, now the Triangle Inn.

This page, above: Kaptur's imaginative graphic hand.

Left: Kaptur's creative arrangement placed the dramatic steel beams next to the swimming pool. The buttresses remind more than a few guests of spider legs.





Left: Originally named the Palm Springs Golf Course (1958), the Tahquitz Creek Golf Resort (1884 Golf Club Drive, Palm Springs) sports one of Kaptur's most interesting facades on its clubhouse, a giant slab of masonry whose waves captures the arc of a golf swing. The course's proximity to the airport also figured into Kaptur's final design, visible from the air [illegible] (desert sunflower) to look something green and different from the air. He said.

Honorable Planning Commission

City of Palm Springs

3200 E. Tahquitz Canyon Way

Palm Springs, CA 92263

Dear Members of Planning Commission:

I'm writing to provide some comment about the proposed demolition of the Tahquitz Plaza designed by Hugh Kaptur.

- I am a qualified architectural historian (M.A., Architectural History and Theory, UCLA, 1984) and the author of two books on architecture and the editor of a third.

- I'm also a professional journalist, specializing in real estate, urban design and architecture. My work has appeared widely, including several dozen articles about commercial real estate in The New York Times and Los Angeles Times. I have written extensively on Modern Architecture, historic preservation, public-private projects, zoning and entitlement issues and other topics relating to the design, financing and government approval of buildings.

- I have published three articles about the architecture of Hugh Kaptur, including a chapter in a recently published book of Palm Springs architecture.

Tahquitz Plaza is a landmark building both in the City of Palm Springs and in the career of

Hugh Kaptur. Mr. Kaptur, as you probably know, is one of the luminaries of the "Golden Age" of architecture in the city, having worked in Palm Springs continuously since the 1950s.

Mr. Kaptur has told me this is one of his favorite projects, which seems fitting for a building where he maintained his architectural practice for many years. Although Tahquitz Plaza is not a loud or flashy building, it shows many signs of architectural originality and creativity. One of the themes of Mr. Kaptur's work, and Southern California architecture in general, is the ability of local architects to "make lemonade" when faced with limits both in budget and choice of materials (i.e. the least expensive). I quote one of my own articles on Mr. Kaptur:

"Practical projects, like an office complex on Tahquitz, did not always allow such freedom, yet the comparatively restrained project remains one of the architect's favorites. Originally designed in concrete, cost consideration dictated a less expensive wood frame structure. Despite this constraint the Tahquitz buildings manage to look like masonry, due to walls that are sculptured to look massive as concrete. To further the illusion of thick walls, Kaptur provided the Tahquitz buildings with window that appear to be deeply recessed. In other places, windows push outward from the wall surface, as if trying to break free of the building. Similar out-pushing windows can be found at Kaptur's Musicland Hotel, another building that flirts with the illusion of heavy masonry...."

In my view, the human experience of cities is largely made up by memorable images, structures and spaces that lend a sense of identity to the community. These buildings might be described as the "sina qua non" of any particular city, meaning that without these structures or images, the city would be diminished and lose part of its "sense of place." Every person who is aware of architecture in Palm Springs is still feeling the loss of the Palm Springs Spa Hotel. In my view, the Tahquitz office complex is one of the "sina qua non" buildings of Palm Springs. It is a tasteful, viable building that has been tenanted since its completion. The Tahquitz offices are also part of a trio of Kaptur-designed buildings on either side of the street, which increases both its interest and importance.

At the very least, the Commission should give serious consideration to preserving at least the original building of the complex. Perhaps the City Planning Department can incentivize the developer by granting a density bonus on the remaining portion of the parcel to compensate the developer for any loss of buildable square footage entailed by the preservation of the Tahquitz offices. Additionally, the Planning Department might consider the waiver and/or forgiveness of certain development fees, as a further incentive to preserve the Tahquitz offices. Development is vital for the economic well being of all cities. Equally so is the preservation of buildings that define its character in a positive way. It is my deeply held hope that the Planning Commission will find a way to accommodate both the best interests of both the City and the developer.

Respectfully yours,

Morris Newman

Palm Springs, CA 92263

I was quite shocked recently upon hearing the City of Palm Springs is considering a developer's plan to demolish the Hugh Kaptur-designed Tahquitz Plaza. It seems almost inconceivable to me that these buildings, some of the best work of Hugh Kaptur's career, could be lost. Although recognition of Hugh Kaptur's work is coming later than those of his local peers--Albert Frey, E. Stewart WIlliams, Donald Wexler, William Cody and other prominent locals that have made Palm Springs world renowned as a destination for fans of architecture and design and the appreciation of mid century architecture in Palm Springs seems to be the major factor in the revival of the town--Kaptur's work is certainly as important and worthy. His achievements mark the latter end of the mid century era. His work is distinctive, unique and in the case of his pueblo modern design at Tahquitz Plaza highly contextual and specific to stylish Palm Springs. Perhaps his work has not become fully appreciated yet as it is relatively recent when compared to Albert Frey's modern work of the '50s or 60s for instance. That is why Kaptur's complex is threatened to some extent---the work is just now at the cusp of rediscovery---just as Frey's and Williams' and Cody's work was a few years ago.

Hugh Kaptur was a local and made an indelible mark on the landscape of Palm Springs and the City should be very proud and respectful of his work, celebrate and preserve it. It does the City well when it signals to the world the pride it has its achievements and the artistry of its local architects and most of all the appearance and history of the town. It is terrible for the town to be known for allowing demolition of another important building. This estimable canvas that is modern architecture in Palm Springs is economically instrumental and vital now for tourist appeal and more importantly many residents now have chosen to invest in the town and to live here simply because of the great modern architecture we have in our midst..

I urge the City to reconsider any decision which would allow the destruction of this important Kaptur complex, it would be a terrible loss and when it is gone it is gone forever.

I served as a member of the Historic Site Preservation Board in 1995-96. I suspect some of you will recall the firestorm that greeted my nomination of five Frey buildings which included the Tramway Gas Station. A developer wanted to demolish that building soon after designation and quite a controversy erupted. I hope you will agree in hindsight the decision to preserve the building was the correct one. I believe you will feel the same way as time passes and the Tahquitz Plaza is preserved. The complex is inventive, playful, and sophisticated with forms and open areas that best represent not only Kaptur at the top of his game but a true reflection of the state of the best modern architecture in Palm Springs at that period.

My written work about Palm Springs and modernism has appeared in the Los Angeles Times, the New York Times, Vogue, and GQ magazine among others.

I hope you will present my plea before or during the Feb. 25th meeting.

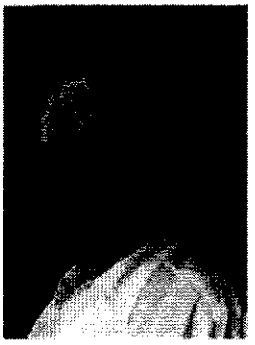
Sincerely,

Brad Dunning

ATTACHMENT 5

Architect Hugh Kaptur speaks out on Aberdeen Project

Hugh M Kaptur, Special to The Desert Sun 8:51 p.m. PDT April 7, 2015



(Photo: Special to the Desert Sun)

As a former city of Palm Springs planning commissioner, past member of the city's Architectural Advisory Committee and the architect that designed and built Tahquitz Plaza, I feel I am both qualified and obligated to comment on the proposed Aberdeen Project that calls for the demolition of these buildings.

Over the years I have watched many of my professional contemporaries see buildings they were proud of demolished: architect Bill Cody's Huddle Springs comes to mind, as does Stewart Williams' Potter Clinic. Most recently I've seen Don Wexler's high school Administration Building and Spa Hotel colonnade tragically lost.

Now two of my buildings are slated for demolition and a similar unhappy fate. I am particularly proud of the design of Tahquitz Plaza; I had great artistic latitude, as it was to become my offices and I had the opportunity to make an architectural statement. With this creative freedom I designed the architecture to "grow" from the desert floor. I feel these buildings are some of my best work from that period. In fact, the "plaza" won architectural awards in 1979 and 1980.

Aberdeen is a high-density project that overcrowds 74 residential units, 17 live-work units and a cafe space into an eight-acre site. The project is before the city as a Planned Development (PDs), which allows the developer to skirt zoning, parking, setbacks, height and use requirements. PDs were originally intended to create a safety valve that would allow creative projects to be considered by the city and not be overly constrained by the zoning requirements of the area. Unfortunately, developers and the city are using PDs, which should be encouraging architectural excellence, as a way to over develop sites that are out of scale with their surroundings. The Aberdeen Project doesn't fit zoning or the village character of the city and it demolishes four more mid-century buildings.

But demolishing more of our city's architecture is just one of the major shortcomings of the Aberdeen project. Fundamentally, it is the wrong project in the wrong place and creates a dangerous mix of vehicular and pedestrian traffic on Tahquitz Canyon Way. And a row of garage doors along our city's most important thoroughfare just isn't good architecture or good planning and goes against our forefather's vision for the street. This is not just my opinion but also a concern stated by both the city's Architectural Advisory Committee and the Planning Commission, both groups denying the project for these and other failings of the project.

The developer recently presented a revised design that is proposing to retain a quarter of the buildings. I designed the complex as four integrated buildings relating to each other as a single project. Demolishing 75% of the buildings will end that unity and mute the architecture. The developer should be more respectful of Palm Springs's mid-century architecture and build a project where the two can coexist.

The Aberdeen project will soon be reviewed by the city council and I plan to attend. I am humbled that many people have told me they will be at that council meeting too, raising their voice to preserve Tahquitz Plaza. The city council will hear these voices and I hope they will also hear the voices of previous city councils and previous planning commissions and visionaries like Pearl McManus and other forefathers who together had an idea for a city like few others in the world. Their vision for Tahquitz (McCallum) Way is widely known and their intention was to not allow any residential along Tahquitz. The Aberdeen Project now endangers that vision, which is more suitable for a dense urban environment not in a resort town like ours.

The developer has an obligation to provide public benefit to the citizens of Palm Springs. It is impossible to see the public benefit from demolishing more of our iconic architecture. Instead, Nexxus Development should restore and re-purpose Tahquitz Plaza, incorporating it into The Aberdeen, that would be public benefit no one could argue.

Hugh Kaptur is an architect of many midcentury buildings in Palm Springs. He can be reached at hughmkaptur@yahoo.com.

We come to Palm Springs almost every winter to visit my parents. They spend 2-3 months in the beautiful Palm Springs from January – April. We are all from Canada and admire and love the beautiful, retro architecture in Palm Springs. This is part of why we come and love it so much. This last winter I was happy to attend many Modernism week events with friends there... what a treat to have all this rich culture and preserved architecture in your lovely town.

I write this letter because I strongly support that the city deny Aberdeen's plans and retain Kaptur's complex. Keep Palm Springs' retro buildings as they are and preserve them instead!!

Sincerely, Laurisa DeFehr

Dear City Council,

I'm sure you have received quite a few emails from a vocal group of preservationists who are opposed to the demolition and reuse of this property.

I am not one of them.

This project is close to a revitalized downtown and across from the soon to be renovated office/movie complex. I think the developers have a great plan for high density urban living which is increasing in demand for Palm Springs and appropriate for the site.

The existing office complex's architectural importance is a puzzle to me as it looks unremarkable from the street and resembles several ordinary office complexes I have seen and even worked in one in Orange County. The fact that Hugh Kaptur was the architect of these buildings should not take away the owner's right to re-use this property for a different purpose.

Good luck with your decision.

Subject:	Aberdeen and our need to save this building in order to make Palm Springs special

Dear City Council,
I am a 13 year part time resident of Palm Springs and have so enjoyed the city and what it offers. My husband and I decided to acquire our weekend residence because of the unique architecture and design components the city offers not due to the weather and amenities of the city. Palm Springs is unique in the Coachella Valley due to the architecture and if we start losing significant buildings we will be just like the other cities and you will lose the influx of young and old residents who treasure them.

Please consider the Aberdeen as a city treasure and veto the current project. I believe that the developer could easily come up with another design that incorporates the current buildings and make it a fantastic mix of old and new.

Sincerely,

Subject: Save Tahquitz Plaza

Dear City Council,

You have the power to save meaningful architecture of Palm Springs and share it with the rest of the world.
If 60,000 architectural pilgrims visting for Moderism Week 2015 are any indication, Palm Springs is a mecca for architecture.

It is incumbent upon you to preserve the architectural heritage and lifeblood of the City of Palm Springs. We may have made our name with mid century design, but we shouldn't limit our focus to just that.
We need to embrace innovative design, but certainly not destroy thoughtful archtitecture of the near past for the mere sake of building and expanding.

Architects have been coming to our fair city for nearly a century to create a built environment that has become a benchmark that is to be admired.
Please do not lose sight of that, but embrace it.

Please do not let Hugh Kaptur's Tahquitz Plaza go the way of Donald Wexler's colonade and Palm Springs High School music building.

Sincerely,
Kurt Cyr

Subject: Please stop the Abderdeen Development project - don't just table it!

Dear Mr. Mayor and City Council,
I wanted to write to let you know my opposition to tearing down the Kaptur designed Tahquitz Plaza buildings. This section of your city needs commercial space in order to be vibrant during the daytime. Not empty condos or so-called live-work spaces. (In San Jose, they have turned into "live-only" spaces with shutters and curtains in the storefronts.

Vote the project down, save the buildings and stand up for the brand that Palm Springs has become!

Theo DeVries

Subject: Aberdeen

To Whom It May Concern,

Architecture is important to the integrity and history of Palm Springs, and the Palm Springs City Council should do all that it can to help protect buildings such as the Hugh Kaptur building that could be demolished for the Aberdeen Project.
My husband and I first visited Palm Springs in 2003 to see our friend's Wexler Steel House in the Racquet Club neighborhood. At the time an important Neutra home, the Maslon house, had just been torn down and the Neutra Miller house was in peril.
We have recently made Palm Springs our full time home after many years of enjoying the climate, the architecture, and the totally unique mix of contemporary and mid-century style resort escape that only Palm Springs can offer.
Hugh Kaptur's Tahquitz Plaza building should be preserved and protected. If developers need to alter the use of these important buildings they will be praised in the future for leaving Kaptur's unique and original architectural composition intact rather than imitating the re-use of early 20th C or late 19th C urban architecture that never existed in the desert. The failure to preserve this building would continue a tragic loss of iconic structures that I have seen demolished or slated for destruction in the short time we have lived here.
We are new to Palm Springs and I have been told that I need to pick my battles. Palm Springs is a very small town that has an amazing architectural legacy. There are a handful of still living architects that made this town into something unlike any other place in the country. It would be a shame to continue and contribute to a trend of undervaluing and destroying the structures that have made Palm Springs what it is today.
There is room for innovative and contemporary architecture in Palm Springs. Perhaps more than anywhere else. Palm Springs should embrace new architecture and support the visionary design, but not at the expense of the radical experiments that architects like Kaptur were given the chance to make only a generation ago.
Hugh Kaptur's Tahquitz Plaza building must be allowed to grow into the future and to be considered in the context of Kaptur's contribution to the city and to the practice of Architecture.

Thank you,
Brooks and Brad Hudson Thomas

Subject: ABERDEEN

Importance: High

Dear City Council Members,

My name is Amanda Erlinger. I am a resident of the Coachella Valley, and my family has been living in the Valley for over 60 years. I am the daughter of Nancy Sinatra, the granddaughter of Frank. My husband and I have a home here, my sister and her family as well as my mother (who now lives here full time), and my grandmother who came to the valley with my grandpa in 1939 all have homes here. My grandmother is now 98 years old, and still loves to visit her home in the desert when she can.

On behalf of the entire Sinatra Family, my family, I urge you to please consider prohibiting the demolition of Hugh Kaptur's Tahquitz Plaza. It is a landmark structure for which there will be no replacement if it is demolished. Mr. Kaptur is not as recognized as some of our most treasured mid-century iconic architects, and this is too bad. In the last couple of years, thanks to the PSPF and the PS ModCom, and to Mr. Kaptur himself, he has received the recognition that he deserves. His designs are innovative and ahead of their time. They illustrate how creative design can be both interesting, beautiful, and functional. He also happens to be one of the most prolific architects in the Valley's history, creating a number of iconic buildings that have stood the test of time.

I have been a member of the PSPF and ModCom for years. My family has a long history in the desert, and my grandfather was a champion of mid-century architects throughout California but especially in the Valley. If he were alive today, he would be on the phone to every single one of you pleading with you to intervene in what is sure become another in a series of preventable detractions from the landscape of the place he loved so much...the place that my family still calls home.

I implore you to stop this demolition, and to keep what iconic structures we have left intact.

Thank you for your time.
Amanda Erlinger

On behalf of my grandfather, Frank Sinatra and the rest of my family:

I strongly oppose the approval of the Aberdeen project. To destroy award winning architecture and replace it with sn overcrowded planned development is a travesty. A large part of Palm Spring's charm, appeal and status is its inventory of wonderful architecture and the Hugh Kaptur buildings are part of that inventory. Aberdeen is a bad plan.

Dear Palm Springs City Council,

We are new residents of the City of Palm Springs and we are deeply saddened by the news if impending demolishion of at least 75% of the buildings designed by Architect Hugh Kaptur. I believe a City Council in Palm Springs or any other city in the US must be devoted to protect the culture and History of the City. By allowing this new development, you are turning the blid eye on the destruction of the city heritage, not just for the current residents but the generations to come. If behaviour like this continues, the city will no longer the the place that attracts so many for its buildings and architecture but a city full of Casinos and dense urban development.

Sincerely,

Jorge Valladares Oyola

Dear Mayor Pougnet,

As former full-time, now seasonal, residents we have devoted thousands of volunteer hours to help make Palm Springs a better place to live. We have had to endure the destruction of many of the city's architectural gems by "suspicious" fires, tribal contrarianism and a lackadaisical attitude on the part of the city with regard to the implementation of the vacant building ordinance. During our time in Palm Springs you, councilmembers Foat, Hutcheson and Lewin have all personally given us assurances that you understand the importance of the city's midcentury architecture and its criticality to the economic health of the city.

The lot that Aberdeen is being built on is over eight acres. Please retain the entire Tahquitz Plaza complex and do not give in to an anemic compromise that destroys any of this extraordinary Kaptur architecture. Re-purpose the Tahquitz Plaza into something that is creative and unique. Good examples of such creative re-purposing abound (e.g., architect Edward Durell Stone's Stuart Pharmaceutical Building in Pasadena has a similarly dense project behind it). We all know that Nexus Development will still make an extraordinary amount of money on this overly-dense project even if they must build behind Tahquitz Plaza.

Subject: Aberdeen Project

I am writing in opposition to the proposed demolition of the Hugh Kaptur designed Tahquitz Plaza buildings to make way for the proposed Aberdeen Project. Palm Springs has enjoyed a remarkable resurgence of tourism and related commercial activity due in large part to the national and international media coverage of the town's extraordinary collection of Mid Century Modern architecture. Articles in the Los Angeles Times and New York Times focus not on the weather or golfing, but rather its remarkable treasure of Mid Century Modern homes and buildings. The annual Modernism Week activities and year round private architectural tours of the city draw visitors from all over the world. There are many individual Mid Century Modern designed buildings in town that are published, acclaimed and studied internationally. These structures bring honor and prestige to our city. However the acclaim this city enjoys comes not from only individual structures, but from the extraordinary collection and concentration of preserved Mid Century Modern homes and buildings. It is this collective architectural treasure that distinguishes Palm Springs from not only the other cities in Southern California, but from those around the world. The Hugh Kaptur designed Tahquitz Plaza buildings are a significant, award winning, part of this collection of architectural treasures residing in Palm Springs.

The Palm Springs City Council has been given articulate and logical recommendations to deny approval of the Aberdeen Project from not only Hugh Kaptur himself, but the city's advisory boards, comprised of experts in both architecture and city planning. The City has established these panels to use their expertise in evaluating proposed projects to ascertain their appropriateness to our city's character, aesthetics, and mission. These recommendations should be endorsed and followed by the City Council; to do otherwise suggests the council has special interests as their priority over preserving the integrity and treasures of Palm Springs.

The Palm Springs City Council has been elected to serve this city, not developers whose only interest is a quick financial gain. Palm Springs will no longer be a unique and desirable destination if the city continues to approve the destruction of the very things that make the city unique. I urge the City Council to stop the needless destruction of Palm Springs honored buildings, in this case the Tahquitz Plaza, and refocus on the preservation of our unique and treasured architectural heritage.

For your consideration:

My husband and I are frequent visitors to Palm Springs and anticipate retirement here. We stay in a mid-century hotel and intend on purchasing a mid-century styled home. We love the architecture in the Desert and enjoy going on "photo safaris" seeking out Palm Springs' finest examples. That is why it is very distressing to me to now hear that another mid-century gem is in danger of disappearing.

Hugh Kaptur's Tahquitz Plaza needs to be preserved and maintained for what it is.....a representation of a time when architecture was free-flowing and innovative. Destroying one property after another and replacing them with cookie-cutter developments will only continue to minimize the ambiance that IS Palm Springs. These buildings are the heart and soul of the City!!

If the City Council does, indeed, represent the voters, the voters are now speaking. Please, do not destroy our mid-century legacy by allowing the senseless elimination of these beautiful buildings. It's part of the charm and lifestyle that IS Palm Springs.

Respectfully yours,

April 9, 2015

During my forty years living in Palm Springs, I have witnessed the loss or irreparable damage of countless significant buildings either by demolition or fire (caused by neglect). Many of these unfortunate losses could have been prevented with better community education, understanding and civic support. Well, that day has come. The years-ongoing saga of Hugh Kaptur's Tahquitz Plaza has come to an unprecedented fore in recent months that has resulted in thousands of informed and concerned voices locally and around the world in favor of saving, restoring and reusing the whole of Tahquitz Plaza. And, to a greater degree, preserving that which contributes to the unique architectural make-up of Palm Springs. The greatest of these voices is the architect Hugh Kaptur himself. Please respect his wishes, and for the greater good of our City, reject "Aberdeen" and any past, current or future plans to destroy any part of Tahquitz Plaza.
Thank you.

Mayor Steve Pougnet
City of Palm Springs
3200 East Tahquitz Canyon Way
Palm Springs, CA 92262

Subject: Aberdeen Project and the Proposed Demolition of Tahquitz Plaza (1971, Kaptur & Lapham)

Dear Mayor Pougnet,

On February 22, 2015 the foundation wrote to the city's Planning Commission expressing our many concerns about the Aberdeen project proposed by Nexus Development. Foremost among our concerns was the proposed demolition of the architecturally-significant Tahquitz Plaza. We also stated our concerns that the project fails to comport with the values and priorities of the city's general plan, historic resources program and sustainability program.

The latest iteration of the Nexus Development project before you now claims to present a compromise wherein a small portion (25%) of the architecturally-significant Tahquitz Plaza complex is retained. We want to be clear that the foundation does not view this as any sort of a "compromise." A compromise implies two parties negotiating towards an agreement acceptable to both. Our steadfast position has been that the solution which yields the most public benefit, while allowing significant profitability to the developer, is to place the Aberdeen project behind a re-purposed Tahquitz Plaza complex. We believe the Palm Springs Preservation Foundation's position already embodies a significant compromise: it concedes a high-profit and incongruously high-density project in an area of the city where it is allowed to skirt a host of city zoning requirements.

In view of a burgeoning appreciation of the work of architect Hugh Kaptur, the foundation believes it would be unconscionable of the city council to allow the demolition of any portion of the award-winning* Tahquitz Plaza complex. The irony should not be lost on the council that it was a city council member that presented Mr. Kaptur with a star on the Palm Springs Walk of Stars during Modernism Week 2014. Additionally, Kaptur is the subject of a new documentary film (*Quiet Elegance: The Architecture of Hugh M. Kaptur*). Finally, the Tahquitz Plaza complex will be included in the city's ongoing historic resources survey.

We applaud the Architectural Advisory Committee's January 26, 2015 decision to unanimously deny this project. In that decision, only the merits of the project were considered by the AAC, not the architectural significance of Tahquitz Plaza. We also applaud the Planning Commission's recent deliberations which also found the Aberdeen project profoundly flawed and the proposed demolition of the Tahquitz Plaza complex

* Tahquitz Plaza won the Palm Springs Golden Palm Award for architectural excellence in both 1979 and 1980.

1775 East Palm Canyon Drive, Suite 110-195, Palm Springs, CA 92264
(760) 837-7117 • info@pspreservationfoundation.org • www.pspreservationfoundation.org

highly problematic. It was noteworthy that most of the commissioners considered that at a minimum at least half of the Tahquitz Plaza should be considered for retention. These concerns resulted in the Planning Commission's denial of the Aberdeen project on February 25, 2015.

City structures built in the 1970s are now being evaluated for their historical and architectural importance (the 1975 Palm Springs Art Museum designed by E. Stewart Williams was designated a Class 1 historic site many years ago but only due to an active lobbying effort). We submit that the city council should consider the designation of the Tahquitz Plaza complex as a Class 1 historic site. To that end we have included a summary sheet (attachment (1)) showing the rationale for such a designation under Palm Springs Municipal Code (PSMC) Chapter 8.05.

We are also compelled to remind the city of its obligations under the California Environmental Quality Act (CEQA) with regard to historic resources. Three years ago, on April 11, 2012, PSPF sent the city manager a legal opinion from Chatten-Brown & Carstens (a law firm which specializes in CEQA matters) regarding the city's consistent failure to implement the requirements of CEQA (attachment (2)). Since our letter, case law has shown that historical resources do not have to appear on local registers to be considered historic resources. This is an opinion recently communicated to you by California's Office of Historic Preservation. At this juncture the weight of the administrative record on the Aberdeen project should convince the city to conduct an Environment Impact Report (EIR) under CEQA.

We are also forwarding attachment (3) for the administrative record. If you have any questions please don't hesitate to contact the foundation at 760-837-7117 or info@pspreservationfoundation.org.

Sincerely,

Erik Rosenow
President

EVALUATION OF TAHQUITZ PLAZA UNDER PSMC CHAPTER 8.05

Criterion 1: Significant Event. To qualify for listing under this criterion, a property must be associated with one or more events important in the defined historic context. *Criterion 1 recognizes properties* associated with *single events* or *patterns of events or historic trends*, such as the gradual rise of the city's prominence in architectural excellence in midcentury modern architecture that is an important pattern of events within this associated context. The Tahquitz Plaza complex is an outstanding example of commercial design and construction of buildings within the context of midcentury desert Modernism. *Tahquitz Plaza is associated with this pattern of events for its ability to exemplify the modern period of the national, state and local history. Tahquitz Plaza qualifies for listing as a Class 1 Historic Site on the local registry under Criterion 1.*

ARCHITECTURE (Criteria 3 – 6)

Criterion 3: *(That reflects or exemplifies a particular period of the national, state or local history).* Tahquitz Plaza was designed by the architectural firm of Kaptur & Lapham and constructed in 1971. The complex was intended to house the architectural offices of Kaptur & Lapham and the commercial offices of a supportive and sympathetic client hence both Kaptur and Lapham were given significant creative latitude. The stylistic markers of the complex place it directly in the historic context of Palm Springs' Modern Period. The commercial complex represents a prime and largely intact example of the significant modernist architecture for which Palm Springs is widely known. As such the commercial complex may be viewed as an important component of the historic trends that have come to define Palm Springs' image as a center of important midcentury architecture, i.e., an historic trend that exemplifies a particular period of the national, state or local history. *The Tahquitz Plaza complex qualifies for listing as a Class 1 Historic Site on the local registry under Criterion 3.*

Criterion 4: *(That embodies the distinctive characteristics of a type, period or method of construction; or)* Type, Period, and Method of Construction: "Type, period, or method of construction" refers to the way certain properties are related to one another by cultural tradition or function, by dates of construction or style, or by choice or availability of materials and technology. To be eligible under this Criterion, a property must clearly illustrate, through "distinctive characteristics" a pattern of features common to a particular class of resources. "Distinctive characteristics" are the physical features or traits that commonly recur in individual types, periods, or methods of construction. To be eligible, a property must clearly contain enough of those characteristics to be considered a true representative of a particular type, period, or method of construction. Characteristics can be expressed in terms such as form, proportion, structure, plan, style, or materials.

Tahquitz Plaza is eligible under the theme of Modern architecture because it possesses distinctive characteristics that make up the many qualities of the style, such as overall horizontality, an irregular roofline, inexpensive mass-produced materials like concrete and stucco, man-made and natural materials suitable to the harsh desert environment (steel, aluminum, glass, etc.) and an architectural design that strives to moderate the harsh desert environment with deep and sculpted eyebrows over windows, bermed walls, eaves and sun-

shading features and the integration of outdoor areas. As such, Tahquitz Plaza is eligible under this criterion because it represents an important example of building practices in Palm Springs at midcentury. *Tahquitz Plaza qualifies for listing as a Class 1 Historic Site on the local registry under Criterion 4.*

Criterion 5: *(That (a): represents the work of a master builder, designer, artist, or architect whose individual genius influenced his age; or (b): that possesses high artistic value).*

5a: Work of a Master: A master is a figure of generally recognized greatness in a field, a known craftsman of consummate skill. The property must express a particular phase in the development of the master's career, an aspect of his work, or a particular idea or theme in his craft. A property is not eligible as the work of a master, however, simply because it was designed by a prominent architect. For example, not every building designed by Frank Lloyd Wright is eligible under this portion of Criterion 5, although it might meet other Criteria.

The architectural firm of Kaptur & Lapham (in partnership from 1965-1975) qualifies as a firm of "master architects." Both Hugh Kaptur and the late Howard Lapham produced architecturally significant works that have stood the test of time. Kaptur's Steve McQueen Residence (1968), William Holden Residence (1977) and Palm Springs Fire Stations #3 and #4 and Lapham's Desert Star Hotel (1956) and Ichpa Mayapan (translated as "Exclusive Estate" and the recent temporary residence of President Obama in Thunderbird Heights) are just a few noteworthy examples of their combined and individual work.

5b: Properties possessing high artistic values: High artistic values may be expressed in many ways, including areas as diverse as community design or planning, engineering, and sculpture. As an example of the maturing modernist movement, the Tahquitz Plaza complex certainly articulates the best of modernist "adobe-influenced" architecture to a level of excellence and confidence that, in total, they could easily be considered an aesthetic ideal. Architectural historian Alan Hess expounds as follows: "The Tahquitz Plaza offices are an excellent representation of [Kaptur's] use of sculptural, expressionist forms influenced by Native American adobe structures, but modernized and abstracted aesthetically in the spirit of Modernism." *As the work of Master architects, and for its high artistic values, Tahquitz Plaza qualifies for listing as a Class 1 Historic Site on the local registry under Criterion 5.*

The foregoing evaluation was reviewed by licensed California architect Susan Secoy-Jensen who meets the minimum professional qualifications under 36 CFR Part 61 both in "Architecture" and "Historic Architecture"

PALM SPRINGS PRESERVATION FOUNDATION

April 11, 2012

Dr. David Ready, City Manager
City of Palm Springs
3200 East Tahquitz Canyon Way
Palm Springs, CA 92262

Dear Dr. Ready,

For many years individuals with experience in city planning (including current and former members of the city's Planning Commission and Architectural Advisory Committee) have expressed their concern to us that the city is not adhering to the requirements of the California Environmental Quality Act (CEQA). Typically these individuals have served on boards and commissions in other California cities where the requirements of CEQA seem to be more seriously considered.

While we have expressed this concern informally over the years, we have now taken the additional step of soliciting a legal opinion from Chatten-Brown & Carstens (attached), a firm with experience and specialized expertise in this particular area of the law. In short, it observes that "it is a violation of CEQA to categorically exempt a project from environmental review if that project may have an impact on an historic resource."

We are sending this legal opinion to you as the city manager (rather than the mayor) because we consider this first and foremost a "good government" matter.

If you have any questions, please contact the foundation at (760) 837-7117 or via email at info@pspreservationfoundation.org.

Respectfully,

Ron Marshall

Re: Use of Categorical Exemptions for Projects Impacting Historic Resources

Dear Mr. Marshall,

The Palm Springs Preservation Foundation has requested Chatten-Brown & Carstens prepare this legal opinion regarding the City of Palm Spring's use of categorical exemptions to the California Environmental Quality Act (CEQA) for development projects that could impact historic resources. Based on our review of CEQA, the CEQA Guidelines, and relevant case law, we conclude that it is a violation of CEQA to categorically exempt a project from environmental review if that project may have an impact on an historic resource.

CEQA establishes California's policy to "take all action necessary to provide the people of this state with clean air and water, enjoyment of aesthetic, natural, scenic, and historic environmental qualities, and freedom from excessive noise." (Public Resources Code § 21001.) To ensure all aspects of the environment are protected, CEQA requires agencies that will be approving discretionary projects to analyze a project's potentially significant environmental impacts in a negative declaration or environmental impact report. CEQA specifically finds that adverse impacts to historic resources are significant environmental impacts: "A project that may cause a substantial adverse change in the significance of an historical resource is a project that may have a significant effect on the environment." (Public Resources Code § 21084.1.)

Buildings, structures, and other resources listed on a local register of historic resources are presumed to be historically significant. (Public Resources Code § 21084.1.) "Public agencies must treat any such resource as significant unless the preponderance of

evidence demonstrates that it is not historically or culturally significant." (CEQA Guidelines § 15064.5(a)(2).) The City of Palm Springs has a local register of historic resources, providing for designation of three classes of historic sites and historic districts. All resources designated by the City as an historic site or district are presumed to be historically significant under CEQA.

While CEQA seeks to ensure the protection of the environment through the preparation of environmental review documents and inclusion of mitigation measures, the Act does not require environmental review of classes of projects the Secretary of the California Natural Resources Agency has determined would not have a significant effect on the environment. (Public Resources Code § 21084(a).) The CEQA Guidelines set out 33 classes of these categorically exempt projects. Public agencies are generally not required to prepare an environmental review document for activities that fall under one of the categorically exempt classes of projects because the Resources Agency has already found these types of projects do not typically have any adverse environmental impacts. (CEQA Guidelines § 15354.)

However, CEQA contains several exceptions to the categorical exemptions. If a project that would otherwise fit within a class of categorical exemption falls within one of the exceptions, preparation of an environmental review document is required. (CEQA Guidelines § 15300.2.) One of the exceptions to the use of a categorical exemption provided by CEQA is for any project that may impact an historic resource: "A categorical exemption shall not be used for a project which may cause a substantial adverse change in the significance of a historical resource." (CEQA Guidelines § 15300.2(f); *see also* Public Resources Code § 21084(f).) "Substantial adverse change" includes physical demolition, destruction, relocation, or alteration of a resource or its immediate surroundings such that the significance of an historical resource would be materially impaired. (CEQA Guideline § 15064.5(b)(1).) Material impairment occurs when a project demolishes or materially alters the resource's physical characteristics that convey its historical significance and that justify its inclusion in a state or local register of historic resources or its identification in an historic resources survey. (CEQA Guideline § 15064.5(b)(2).)

The California Court of Appeal has applied this exception to prohibit the use of a categorical exemption when a project could impact an historic resource. In *Comm. to Save Hollywoodland Specific Plan v. City of Los Angeles* (2008) 161 Cal.App.4th 1168, the City of Los Angeles had approved the construction of a wooden fence on top of one of the historic Hollywoodland granite walls pursuant to a Class 5 categorical exemption for projects consisting of minor alternations in land use limitations. These granite walls

had been designated as an historic monument by the City of Los Angeles, making them an historic resource pursuant to Public Resources Code section 21084.1. The Court found the City's use of a categorical exemption was improper because the construction of a wooden fence on top of the historic wall could "significantly impact the environment by altering the historic resource, both as to its physical integrity and its aesthetic appeal from the neighboring streets." (*Id.* at 1187.) The City was required to vacate its issuance of an exemption under CEQA. (*Id.* at 1188.)

Courts have set a low threshold for showing that an exception to use of a categorical exemption applies. Whenever there is substantial evidence in the record to support a fair argument that the proposed construction will have a significant effect on the environment, the application of a categorical exemption is inappropriate. (*Berkeley Hillside Preservation v. City of Berkeley* A131254, 2012 WL 489195 (Cal. Ct. App. Feb. 15, 2012.) This means that if there is substantial evidence an exception is applicable to a project, the project is not categorically exempt from preparing environmental review even if there is contrary evidence in the record or a disagreement among experts regarding the applicability of the exception. (*Ibid.*) For example, if an historic resource expert submits his or her opinion that a project would adverse impact the historicity of a structure the City has designated as an historic site, the City could not rely on a categorical exemption to CEQA to approve the project, even if another historic resource expert determined the project would not adverse impact the historic resource. In this instance, the City is required to prepare an environmental review document that analyzes whether the project would or would not impact the historic resource. If the project would impact the historic resource, the City must find measures to mitigate the significance of that impact.

"Generally, a project that follows the Secretary of the Interior's Standards for the Treatment of Historic Properties with Guidelines for Preserving, Rehabilitating, Restoring, and Reconstructing Historic Buildings or the Secretary of the Interior's Standards for Rehabilitation and Guidelines for Rehabilitating Historic Buildings (1995), Weeks and Grimmer, shall be considered as mitigated to a level of less than a significant impact on the historical resource." (CEQA Guidelines § 15064.5(b)(3).) However, mitigation measures such as compliance with the Secretary of Interior's Standards cannot be a basis for refraining from applying one of the exceptions to categorical exemptions. (*Azusa Land Reclamation Co. v. Main San Gabriel Basin Watermaster* (1997) 52 Cal.App.4th 1165, 1200.) If a project may have a significant effect requiring mitigation, use of a categorical exemption is improper and an environmental review document should be prepared to assess the effectiveness of the mitigation measure. (*Salmon Protection & Watershed Network v. County of Marin* (2004) 125 Cal.App.4th 1098, 1102.)

Thus, it is our conclusion that it would be a violation of CEQA to apply a categorical exemption to any project that may significantly and adversely impact an historic resource, even if mitigation is included in the project.

We have enjoyed working with the Palm Springs Preservation Foundation on this matter. Please feel free to contact us if you have any questions regarding this legal opinion.

Sincerely,

Amy Minteer

Re: Endorsement of Hess Letter Regarding the Aberdeen Project and the Proposed Demolition of Tahquitz Plaza (1971, Kaptur & Lapham)

Dear Ms. Roland-Nawi,

The Palm Springs Preservation Foundation board of directors has read and discussed Mr. Alan Hess' scholarly letter of March 20, 2015 concerning Tahquitz Plaza (1971, Kaptur & Lapham).

We strongly concur with his assessment of the architectural importance of the Tahquitz Plaza complex and his opinion that an Environmental Impact Report (EIR) is warranted.

The Palm Springs Preservation Foundation is a non-profit organization whose mission is "to educate and promote public awareness of the importance of preserving the historical resources and architecture of the city of Palm Springs and the Coachella Valley area." We have over 2,100 members throughout the Coachella Valley and the United States.

If you have any questions please don't hesitate to contact the foundation at (760) 837-7117 or info@pspreservationfoundation.org.

Sincerely,

Erik Rosenow
President

Re: Tahquitz Plaza by architect Hugh Kaptur, Tahquitz Canyon and Calle El Segundo

Dear Ms. Roland-Nawi:

I am writing at the request of the Palm Springs Preservation Foundation to ask you to consider writing a letter to the City of Palm Springs encouraging them to conduct an EIR for the Tahquitz Plaza office buildings (1971) by Kaptur & Lapham. The four buildings in this complex are excellent and well preserved examples of key aspects of architect Hugh Kaptur's work, and of Palm Springs Modernism.

The buildings are currently under threat of demolition for a proposed residential project. So far the city has not requested an EIR, but I believe the complex's significance and quality require it.

Kaptur is an important architect in Palm Springs Modernism. Rather than drawing on the rectilinear steel and glass geometries of, for example, Richard Neutra, Kaptur often draws on organic concepts from Frank Lloyd Wright and forms from the American Southwest. This is seen in Tahquitz Plaza's irregular roofline, the deep, sculpted frames around windows, the bermed walls, the eaves and sun shading features, and the integration of outdoor areas interspersed among the offices. The strong composition of these many elements shows Kaptur's skill and the high artistic value of his work.

In addition, Tahquitz Plaza's location on Tahquitz Canyon places it in the context of the city's Modern civic center. Tahquitz Canyon is the city's main civic thoroughfare, linking the airport to downtown; along this boulevard is an extraordinary collection of Modern buildings serving civic purposes, including city hall, police and county facilities, and the airport, complemented by commercial buildings of similar style and siting. Such a collection of Modern civic center buildings is rare in the state.

Palm Springs' midcentury Modern architecture is known for its use of Modern concepts in addressing the challenges of climate, functions, and new material technologies. These are not typified by a single aesthetic; it ranges from the lightweight, steel framed houses resting lightly on the earth seen in the work of Richard Neutra and Albert Frey, to the autochthonous monolithic concrete structures, literally buried in the earth, seen in John Lautner's work, with many more interpretations in between.

Within this wide range, Kaptur's work is singular. His training in design was closely associated with midcentury automotive design in Detroit, where he attended Lawrence Tech and worked for General Motors' consumer design division. Kaptur has worked in Palm Springs from 1956 to the present day. He worked for and with other noted local architects, including Donald Wexler, Richard Harrison, and William Cody. Like those architects, his work is distinctive and individual, and yet his design also reflects common themes that distinguish Palm Springs Modernism.

The Tahquitz Plaza offices are an excellent representation of his use of sculptural, expressionist forms influenced by Native American adobe structures, but modernized and abstracted aesthetically in the spirit of Modernism. The complex's thick stuccoed walls do not imitate those vernacular structures; the silhouette of the walls and the curving windows frames that grow directly from those walls are carefully abstracted into forms that represent a distinct, modernized aesthetic vocabulary. This approach is also seen in other Kaptur designs, including the William Holden house (1977), and the Casa Blanca motel (1979.)

In addition, the Tahquitz Plaza offices incorporate unpainted wood walls and wood trellises. These also update the wood ramadas and trellises of traditional Southwestern architecture. The siting of the office structures creates small courtyards between the buildings (another design aspect seen in historic Spanish architecture of the Southwest) allowing for shaded outdoor areas.

Likewise, the landscaping and siting of the Tahquitz Plaza buildings represent an updating of traditional concepts and a Modern response to the hot climate. Berms rise partway up the walls, providing thermal insulation and connecting the structure to the earth, similar to Lautner's desert designs.

The thick walls, hooded windows, and shaded courts all have historic precedents, but they are also practical, integral elements that help moderate the strong sunlight and heat of the local climate. The design of all these elements is artful and well composed.

The use of historic regional architecture by twentieth century architects is an important facet of Modern architecture in California and the West. It can be seen, for example, in the work of Irving Gill in the 1910s, the Ranch Houses of Cliff May in the 1950s and 1960s, and the civic buildings and residences of Bennie Gonzales in Arizona, where historic forms were blended with Modernism's abstraction. Hugh Kaptur is the primary interpreter of this approach in midcentury Palm Springs, and Tahquitz Plaza is a primary example in the city.

Kaptur's work has been rediscovered fairly recently. This is not surprising; our understanding of the significance of Palm Springs Modern architecture in general is also relatively recent. Only a dozen years ago, the work of now-recognized architects such as William Cody, Donald Wexler, Palmer & Krisel, and E. Stewart Williams was not generally well known outside Palm Springs, and its significance was not even widely recognized within Palm Springs.

In the years before Palm Springs' heritage was fully understood, the city lost many significant structures. Unfortunately, this degradation has continued; the demolition of a major Kaptur design such as this would be a loss to history and the city's urban quality.

But as we continue researching this history, it is clear that the work of Hugh Kaptur makes a significant contribution to the unique character of Palm Springs architecture. This opinion is not mine alone; the newly published book *The Desert Modernists: The Architects Who Envisioned Midcentury Modern Palm Springs* (Desert Publications, 2015) and the documentary film *Quiet Elegance: The Architecture of Hugh M. Kaptur* (Bert Simonis, director, 2014) indicate the clear direction of opinion on Kaptur's importance.

I have written to the Palm Springs Planning Commission about my support, as a historian and architect, for the preservation of Tahquitz Plaza. I am also a consultant on architectural history for the Palm Springs architectural survey, currently underway. I have already unequivocally recommended Tahquitz Plaza as a significant building in that survey. I believe that a letter from your state office would encourage them to conduct an EIR that would document the significance of this complex.

Thank you for your consideration of this matter.

Sincerely,

Re: Aberdeen
To: Palm Springs City Council

As a licensed California realtor, not only do I have professional standards to uphold, but it's in my interest to both educate and listen to my clients. I'm in the business of helping people buy and sell properties, and I hear over and that they come to Palm Springs for a lifestyle they can't get just anywhere else. Some are fleeing overdeveloped areas with a kind of creeping sameness. It's in our interest to have a diverse commercial, retail and housing stock. Just because something is a few years old, by no means makes it outdated. There are land use and legal issues upon which I have to advise them. I urge them to look at the suitability of what they want and where they want it. And I would ask the same of any commercial developer with whom I was working.

As a full-time resident of this City, I have sadly watched important buildings demolished, where City Council had no power to intervene. This demolition is within your purview and I urge you to intervene. Please show support preserving and reusing these buildings.

Kind Regards,

Vincent Williams

Subject: Please reject the Aberdeen Project and save Tahquitz Plaza
Attachments: Historic Preservation Ordinance.pdf

Hello,

When I go to the building department I see this brochure and think how lucky we are to have an ordinance in place to protect the diverse architecture in place.

The success of Modernism Week is still fresh in my mind - it was wonderful to see all the excitement and people that really appreciate architecture. To see the architect's names and the year the building was built projected on the along Palm Canyon was a great history lesson.

Let's protect and save the architecture that people come here to see and that makes Palm Springs unique.

Bottomline - the architectures of Palms Springs brings in tourist dollars - why destroy what brings people here?

Hugh Kaptur's office park is architecturally important building and should be saved for future generations to enjoy.

Thank you,

Subject: Aberdeen

Dear Sir,

I am writing to express deep concern about the proposed redevelopment of Tahquitz Plaza in tot he adjacent Aberdeen project.
As a Palm Springs homeowner, I invested in Palm Springs because of its Architectural legacy. To see a project by notable architect Hugh Kaptur demolished to create a nonsensical vision is a gross injustice and serves neither the preservation of the past nor the development for the further. The project is just wrong on many levels. Most importantly, because Palm Springs will loose so much more than it will gain.

It will loose Architectural integrity.
It will loose a uniform vision.
It will jose a cultural legacy.

And what will we gain, another mediocre project doomed to fail.

Warmest regards,
Peter

PLANNING SERVICES
DEPARTMENT

PALM SPRINGS MODERN COMMITTEE

May 4, 2015

Honorable Councilmembers,

We understand the City has received many lengthy and detailed letters from the community – including the Architectural Advisory Committee and the Planning Commission – regarding the proposed Aberdeen Project and its many problems. To assist in your review of the Project, the Palm Springs Modern Committee would like to provide you with a brief overview of our concerns and major legal issues regarding this Project.

Approval of the Project Would Violate the California Environmental Quality Act (CEQA).

- Many experts have submitted comments regarding the historic significance of Tahquitz Plaza. Despite these comments, despite the numerous objections to demolition submitted by City residents, and despite a request by the Planning Commission for a historic analysis of Tahquitz Plaza, the mitigated negative declaration (MND) for the Aberdeen Project includes no evaluation of the historic significance of the property. CEQA does not limit its definition of historic resources to only those that are listed on the National Register, California Register or as a Class One Historic Site. **The failure of the City to gather information and conduct an adequate analysis of the historic significance of Tahquitz Plaza is a violation of CEQA.**

- **CEQA requires preparation of an environmental impact report (EIR)** instead of a MND whenever there is substantial evidence to support a fair argument that a project may have a significant adverse impact. Here, there is substantial evidence that the Aberdeen Project would have significant adverse impacts to historic resources, land use, and aesthetics.

- As set forth below, the Project is inconsistent with the Section 14 Specific Plan, General Plan policies, and Zoning Code requirements. Thus, it would result in a significant adverse land use impact.

- **Demolition of Tahquitz Plaza and the failure to comply with required setbacks, height restrictions and landscaping requirements would result in significant adverse aesthetic impacts.**

- The MND does not properly address the Project's inconsistencies with the Section 14 Specific Plan's landscaping requirements.

The Project is Inconsistent with the Section 14 Specific Plan.

- The Project includes single-family units (i.e. separate residential units built on a single lot). **Single-family units are prohibited at this site by the Section 14 Specific Plan.**

- The Project would **exceed Section 14 height limits**.

- The Project does not meet the Section 14 Specific Plan's definition of a consolidated project because it is mainly a residential project and does not consolidate existing lots. Instead it splits the site into 93 separate lots.

- The Project fails to include landscaping along Tahquitz Canyon Way in the manner required by the Section 14 Specific Plan.

The Project Cannot Rely on the City's High Rise Ordinance.

- The Section 14 Specific Plan contains the controlling development standards for the Project site and thus the City's high rise ordinance cannot apply.

- Even if the high rise ordinance were applicable, the Project cannot rely on the height limits set forth in the high rise ordinance because it does not comply with the required setbacks.

- The Project also does not comply with the open space requirements set forth in the high-rise ordinance.

The City Cannot Make the Required Findings to Approve the Project.

- The City cannot make the required findings to approve a Planned Development District (PDD) for the Project.
    - The proposed PDD would allow the development of single-family homes, which is inconsistent with the Section 14 Specific Plan.
    - Reduced setbacks are not necessary or desirable and would be detrimental to neighboring uses.
    - **The feasibility of live/work units is not supported and these units may result in visual blight along Tahquitz Canyon Road if the live/work concept fails**.
- The City cannot make the required findings to approve a Tentative Tract Map or a Conditional Use Permit (CUP) for the Project.
    - The Project would violate General Plan policies requiring the preservation and adaptive reuse of historic or culturally significant buildings.
    - The Project is inconsistent with the applicable Section 14 Specific Plan.
    - The Project would result in detrimental impacts to historic resources and the aesthetics of downtown.
    - Single-family units are prohibited at this location and thus approval by CUP is improper.
    - The design of the Project is detrimental to existing uses because it demolishes an important historic resource and would adversely change the visual character of Tahquitz Canyon Road.
    - The Project does not include adequate setbacks or necessary landscaping.

We would appreciate the opportunity to meet with you and discuss these concerns in more detail.

Sincerely,

Chris Menrad
President
Palm Springs Modern Committee

CONDITIONS OF APPROVAL
April 14, 2015

1. All plants listed as being invasive by the California Invasive Plant Council (e.g. Olea europea 'Swan Hill'/Fruitless Olive and Washintonia robusta/Mexican Fan Palm) shall be removed from the Landscape Plan and replaced with suitable plant material per Section 7.3, *On-Site Landscaping*, of the Section 14 Specific Plan. The integration of native plant material is also strongly encouraged to promote water conservation and complement the natural desert environment.

2. The use of ornamental turf in non-recreational areas shall be removed from the Landscape Plan.

3. A cultural resources inventory shall be conducted of the Project Site by a qualified archaeologist prior to any ground disturbing activities.

4. The presence of an approved Native American Cultural Resource Monitor(s) shall be present during any ground disturbing activities (including archaeological testing and surveys). Please contact the Tribal Historic Preservation Office at 760-699-6800 for details. Should buried cultural deposits be encountered, the Monitor may request that destructive construction halt and the Monitor shall notify a Qualified Archaeologist (Secretary of the Interior's Standards and Guidelines) to investigate and, if necessary, prepare a mitigation plan for submission to the State Historic Preservation Officer and the Agua Caliente Tribal Historic Preservation Office.

RE: 4/15/15 Agenda Item 1C
Aberdeen

Honorable Councilmembers,

Advocates for Better Community Development, ("ABCD") and Palm Springs Preservation Foundation ("PSPF") collectively submit this letter in opposition to the Aberdeen project ("Project"), which will be before you on the project applicant's appeal of the Planning Commission's denial of a demolition permit. We strongly believe you may not lawfully approve this Project at this time because as proposed, the project is inadequately reviewed under CEQA and violates a great many development standards set forth in the Section 14 Specific Plan. This application could be the poster child for the flaws in the City of Palm Springs' approach to land use planning. The City Staff's analysis and recommendations exemplify the City's disregard, bordering on contempt, for planning laws as well as the City's own development standards and land use regulations.

We are puzzled by the fact that the Staff Report barely mentions the public's strong opposition to this Project in large part due to the proposed demolition of the historically significant and much beloved Tahquitz Plaza. In fact, this issue is not even mentioned in the introduction and is not touched upon until the very end of the Staff Report.

Given the substantial number of public comments the City has received on this issue, including comments by experts and the State Commission on Historic Preservation and the noted architect, Hugh Kaptor, himself, it is simply unfathomable that the Staff Report to the City Council does not mention the controversy up front.

As set forth below, we agree with the Architectural Advisory Committee and the Planning Commission's conclusion that the Project should be denied because it violates many of the applicable development standards. While staff has attempted to cobble together a number of procedural devices --such as a conditional use permit and planned development district-- to shoe-horn this ill-fitting project into this location, the project breaks too many rules and is inconsistent with too many development standards to be approved.

Equally puzzling is the City's failure to objectively assess the historic significance of the Tahquitz Plaza as required by CEQA. The City cannot approve this project before undertaking a detailed review of the Project's impact on this significant historic resource by preparing a detailed Environmental Impact Report. The well-documented and reasoned opinion of the many experts who have weighed in on this project amounts to substantial evidence supporting the conclusion that as proposed, the Project will result in a substantial adverse impact on a significant historic resource.

Finally, it should be noted that the applicant's appeal of the Planning Commission's denial of the Project fails to articulate a coherent basis for this appeal. The Planning Commission forcefully articulated a number of significant concerns about the project's inconsistency with various development standards, including those governing building heights, setbacks and building separation. The Commission, moreover, expressed serious concern about the project's height and impact on a historically significant resource. The applicant's response to these concerns was merely to accuse the Planning Commission of sending mixed messages and to complain about finding it difficult to determine how to address the Commission's concerns. These complaints do not articulate a basis for appeal. Ordinarily, it would be the staff's job to evaluate the appellant's arguments in support of an appeal, but in this case, it seems abundantly clear that it is the Staff who has supplied all the arguments in support of the appeal.

A. The Project is inconsistent with Section 14 development standards.

The Staff Report admits the project is inconsistent with the underlying R (Resort) overlay, which the staff explains:

> is intended primarily to provide for accommodations and services for tourists and visitors while guarding against the intrusion of competing land uses. The Resort Combining Zoneruns along Palm Canyon Drive for nearly its entire length through the City, as well as through the heart Section 14 along Tahquitz Canyon Way from Amado Road to Arenas Road.

To address this inconsistency, the Project includes an application for a Conditional Use Permit (CUP). As explained below, the evidence in the record does not support the findings the City is required to make in support of the CUP

The Staff Report also admits that single-family units are not permitted in the REO and RA Section 14 land use designation. Staff Report ("SR") at p. 5. The Staff Report attempts to excuse this inconsistency by claiming "the proposed small-lot residential use is similar to multi-family residential (MFR) due to a majority of unites being attached and density." Ibid., (emphasis added). No matter how the Staff attempts to spin the facts, the Specific Plan specifically prohibits single-family residential developments in RA and REO land use designations. See, Table 6-1, p. 6-4. Accordingly, even if the proposed project is "similar" to multi-family because of its relatively high density (which is still below the density levels for HDR zone), and because some units are attached, it does not fundamentally change the character of the development from single-family to multi-family. The City has not adduced any evidence or cited any convincing authority to show a residential development that is proposed on individual lots can be considered multi-family.

At the very end of the Staff Report (page 16), staff again attempts to rebut the argument that "the project proposed single family residential development in an area where such development is not allowed." Here, for the first time Staff claims "the units are multi-family units because they comply with the definition of multi-family units in the City's Zoning Ordinance, which according to the Staff Report, ..." "means a building containing two (2) or more dwelling units or containing a combination of two or more dwelling units in one(1) lot or parcel." SR p.16-17.

Even according to this unidentified definition, the Project cannot be described as multi-family because there is no evidence to suggest the Project includes more than one residential dwelling per single lot. According to the Staff Report's "Background and Setting" description, the Tentative Tract Map for the Project seeks to subdivide the roughly 8 acre site into 93 numbered lots and 8 letter lot streets, and common open space. The Project as proposed includes 73 residential units and 13 detached live/work lofts, in addition to the 7811 square feet of commercial space. It is therefore evident that the single-family and live/work units will be built on individual lots. There is no evidence to suggest any building containing two or more dwelling units would be built on any one lot or parcel. Accordingly, the Project does not meet the definition of multi-family housing. Accordingly, the claim that this project involves multi-family dwellings must be rejected.

The Staff Report is internally inconsistent because elsewhere in the Report, staff admits that the project consists of single-family dwellings which are merely "similar" to multi-family. The City moreover, has consistently treated similar projects as small lot, single-family dwellings.

Moreover, the proposed residential units have all the hallmarks of single-family dwellings to the extent that each dwelling would be built on a separate numbered lot and will enjoy private amenities.

B. The project is not a "consolidated project"

Staff invokes the "consolidated project" concept under Section 14 Specific Plan to argue the Project may be approved despite the many inconsistencies with the Specific Plan's development standards. This contention is utterly without merit as the Project does not qualify as a consolidated project under the Section 14 Specific Plan.

The Specific Plan contains certain incentives for the development of "consolidated projects" in order to aid in the development of projects on vacant and underutilized parcels:

> With a significant amount of vacant and underutilized land available for development in Section 14, an exciting opportunity exists for consolidating individual parcels/allotments into larger development sites. Larger, consolidated sites provide the chance to develop integrated projects that offer greater amenities, creative building designs, greater options for site access, and ultimately a stronger impact. To encourage consolidation of parcels and ultimately fulfillment of its vision, the Specific Plan provides both development incentives and flexible zoning standards for development. Sp. Pl. at 6-11.

As the current project is proposed on land already occupied by four historically significant buildings, it is clear that this is not the type of parcel on which the Specific Plan intended to promote the development of consolidated projects.

The Specific Plan delineates two types of consolidated projects: (1) commercial or mixed use development on sites designated as REO, RA, LSC or NC or (2) residential or hotel development on sites designated as HR. Both types of consolidated projects must be proposed on at least two or more parcels/allotments totaling 5 or more acres combined "are consolidated for one planned project." Sp. Pl. 6-12 (emphasis added.)

The staff report does not specifically explain what type of consolidated project applies here, but the project does not quality as either. The Project is primarily a residential project, as the

residential portion

of the project takes up 5.6 acres of the 8 acre site. But as the underlying parcel is designated REO/RA, the Project does not meet the definition of a residential project. Likewise, the Project does not meet the definition of a commercial/mixed use development because only a small fraction of the over-all project is designated as mixed use. The Project is overwhelmingly residential.

The Project cannot be considered a "consolidated project" also because the applicant does not propose to "consolidate" any lots to form a larger development plan. To the contrary, the applicant intends to split the parcel into many small pieces each with individual ownership.

C. The Project cannot exceed the 35 Foot Height Limit

Even if the project qualified as a "consolidated project", it would still be inconsistent with Section 14 Specific Plan development standards, including height restriction. The Staff Report vaguely claims "since the project meets the definition of a Consolidated Project, the Section 14 Specific Plan allows flexible zoning standards as a development incentive." The Staff goes on to claim that the structures are two and three-stories in habitable space with covered roof deck as amenities, reaching heights of up to 45 feet and triggering the "high-rise buildings" ordinance, Section 34.03.00 of the Zoning Code. The Project proponent is seeking approval to allow the flexibility of the proposed height for the entire project site, which is consistent with the REO/RA "Building Height" requirements. SR p. 8. Staff does not point to any specific provision of the Specific Plan that would permit single-family residential buildings to exceed 35 feet.

While it is not entirely clear what kind of flexibility the Project would be afforded if it meets the definition of a "Consolidated Project," the Staff appears to believe by labeling it a "Consolidated Project", the 73 or 74 single-family residential buildings can exceed the underlying 35 feet height limit for residential buildings. This conclusion is untenable.

The only "flexibility" the Specific Plan accords "Consolidated Projects" is increased density. See Sp. Pl at p. 6-12. Commercial/mixed use projects proposed on consolidated RA or REO parcels "may be developed under either the RA or REO land use designations." Ibid. There is otherwise nothing in the Specific Plan to suggest that single-family residential buildings can exceed the 35 feet subject maximum height subject to the High Rise Ordinance.

According to the Section 14 Specific Plan, only Specialty Retail-Entertainment-Office (REO) and Resort Attraction (RA) developments can exceed the 35 feet height limit with the adoption of a CUP. See, Sp. Pl., Table 6-2, p.6-2. Even Local Serving Commercial (LCS) and Neighborhood Commercial (NC) type developments are limited to 35 feet and cannot exceed that height even with a CUP. Ibid. Table 6-3 provides that High Density Residential

(HR) developments are also subject to the 35 foot height limit. Sp. Pl. p. 6-9. There is no provision in the Specific Plan indicating that multi-family or single-family dwellings may exceed the 35 foot height limit, even with the adoption of a CUP.

Even if even the Section 14 Specific Plan allowed residential dwellings in excess of 35 feet, this Project could not be approved as proposed because the Project does not meet the minimum setbacks required under the City's High Rise Ordinance. The Planning Commission recognized that the proposed project does not meet the minimum setback requirements required by the High Rise Ordinance. The Staff Report seems to believe that the setback provisions of the High Rise Ordinance do not apply within Section 14. The problem with the Staff's contention is that the exemption from the minimum setback requirements applies only to buildings within the REO and RA land use designations. There is nothing in the Section 14 Specific Plan to suggest the exemption from the requirements of the High Rise Ordinance, including the minimum setback requirements, apply in any other context.

D. The City cannot make the findings necessary to permit the proposed single-family residential development in the "R" resort overlay zone.

As the Staff Report readily admits, the "R" overlay is intended to accommodate and provide services to meet the needs of tourists. Single-family dwellings are not allowed and multi-family dwellings are allowed only if the City can find that (1) the proposed use is compatible with the surroundings and (2) "that the site in question is not appropriate for other uses allowed by right within the underlying zone." There is no evidence or analysis supporting the second finding.

The Staff Report claims both findings can be made because, according to Staff, the proposed "commercial and live/work units" would be consistent with surrounding uses. SR p. 11. Staff further claims "the mix of uses provides an appropriate balance for the site." On this basis, "staff believes the proposed project is consistent with this finding." Ibid.

Initially, we note that the City cannot make the necessary findings because the project does not consist of "multi-family housing." The Specific Plan does not permit single-family residential housing in the R overlay, even if the project will include well maintained common areas or a Home Owners Association (HOA). Staff does not offer any coherent arguments how single-family residences can morph into multi-family housing merely because the project will include common areas that would be maintained by an HOA. There are plenty of gated single-family residential developments that include such an arrangement. If Staff is correct, then all such projects would be considered multi-family projects, which they clearly are not.

The Staff Report, moreover, fails to explain how the City can make a finding that the "the site in question is not appropriate for other uses allowed by right within the underlying zone." Table 6-1 includes a long list of allowable uses, including office buildings, financial institutions, food facilities, etc. There is simply no evidence in the record to suggest the site could not be developed with any other type of development, particularly one that would be compatible with the historically-significant Tahquitz Plaza complex.

E. The City cannot make the necessary findings in support of the Tentative Tract Map

The City cannot make all the findings necessary to approve a tentative tract map for this project. Specifically, the City cannot make a finding that "the proposed Tentative Tract Map is consistent with all applicable general and specific plans" because, as set forth above, the Project is inconsistent with the Section 14 Specific Plan land use designations, which does not permit single-family residential developments in the "R" overlay. Moreover, as set forth above, the City cannot make the necessary findings to permit the Project even as a multi-family project.

Likewise, the City cannot make a finding that the proposed map is consistent with the underlying RA/REO land use designation because the project is inconsistent with the applicable development standards.

F. The Proposed Planned Development District (PDD) is not permitted pursuant to the Section 14 Specific Plan.

The Staff Report explains that the proposed PDD is intended to "change the split zoning to a single PD zone designation with its own development standards." SR at p 11. A PDD would be needed presumably to excuse the Project's inconsistency with the minimum yard setbacks for residential units (see SR at p. 6) and front and yard setbacks for the Live/Work units. SR at. P. 7.

The Section 14 Specific Plan, however, does not permit relief from the established development standards through the adoption of a PDD. According to Table 6-3 of the Specific Plan, which establishes the "Residential Development Standards," the only permissible exception to the applicable development standards is for lot size and lot setback requirements, which may be reduced "for single-family residential development if it can be demonstrated that through the CUP process that the reductions are necessary or desirable, and are not detrimental to neighboring uses (existing or future permitted)." Sp. Pl. at p. 6-9. Accordingly, yard and front setbacks may not be modified through the adoption of a PDD.

Moreover, even the lot size and setback exception does not apply to this project because the City is apparently processing the project as a multi-family project. Per Table 6-3, the lot size and setback exception only applies to single-family residential developments.

G. The proposed Negative Declaration violates CEQA because the City has failed to adequately consider whether the Tahquitz Plaza qualifies as a historically significant resource

The Initial Study/Negative Declaration's ("ND") discussion in support of the conclusion that the project would have no impact on a historically significant resource is grossly inadequate and violates CEQA. The ND's discussion is limited to the following short paragraph:

> No Impact. The project site is fully developed with a parking lot and 197 6 vintage office buildings. The existing buildings do not qualify or meet the criteria of a historical resource as defined in Section 15064.5. The existing buildings are not listed as a state historical resource of significance, nor are the buildings locally listed with the City of Palm Springs. No impacts to historic resources are expected to occur as a result of build out of the proposed project. The site has not been included in any previous studies of historical resources and is not included in the current study of historical resources.

There are a number of significant problems with this "analysis".

1. The ND's discussion of the historical significance of the Tahquitz Plaza fails to adequately discuss the nature and significance of this resource. As by now should be clear to the City, Tahquitz Plaza is a magnificent example of the work of the noted architect, Hugh Kaptur, whose exemplary architecture has been recognized by among others, the City of Palm Springs. The ND fails to adequately describe the Tahquitz Plaza or mention the fact that it was designed by this decorated architect. Likewise, the ND fails even to mention that the noted architect and historian, Alan Hess, who serves as a consultant on the City's Historic Resource Survey Update, has made a strong case that the Tahquitz Plaza should be considered a significant historic resource.

2. The ND fails to set forth the CEQA criteria for historic significance, including CEQA Guideline §15064.5(a)(3)(C), according to which, a resource must be considered "historically significant" if it "embodies the distinctive characteristics of a type, period, region, or method of construction, or represents the work of an important creative individual, or possesses high historic values." The ND never considers whether the Tahquitz Plaza

should be considered significant under this criteria. The City Council will not be able to comply with its responsibility under CEQA to determine whether the Plaza is a historically significant resource unless it is made aware of the applicable criteria.

3. The ND misleadingly reports that "The existing buildings are not listed as a state historical resource of significance, nor are the buildings locally listed with the City of Palm Springs," implying that these facts inexorably lead to the conclusion that the resource is not historically significant. This implication is false, because "the fact that a resource is not listed in, or determined to be eligible for listing in the California Register of Historical Resources, not included in a local register of historical resources (pursuant to section 5020.1(k) of the Public Resources Code), or identified in an historical resources survey (meeting the criteria in section 5024.1(g) of the Public Resources Code) does not preclude a lead agency from determining that the resource may be an historical resource." CEQA Guideline §15064.5 The ND is also misleading because the Tahquitz Plaza may be listed on the City's Historic Resource Survey Update based on the strong recommendation of Alan Hess.

4. The ND fails to evaluate the historic significance of the Tahquitz Plaza under the City's Municipal Code, Chapter 8.05. In its April 8, 2015 comments to the City, analyzed the Tahquitz Plaza's historic significance based on the criteria set forth in Chapter 8.05 and concluded that it should be considered historically significant. The ND is grossly inadequate in that it fails even to consider whether the Tahquitz Plaza should be considered significant based on Chapter 8.05.

5. Perhaps most significantly, the ND fails to consider whether the evidence supports a finding that the Tahquitz Plaza meets the definition of a historically significant resource under Guideline §15064.5(a)(3)(C). The ND thus fails as an informational document because it does not identify or document the evidence that supports its factual finding that the Tahquitz Plaza is not a historically significant resource. Center for Sierra Nevada Cons. V. County of El Dorado (2012) 202 Cal.App.4th 1156, 1170.

The Staff Report does not make any serious effort to remedy the ND's failure to evaluate the historic significance of the Tahquitz Plaza. The Staff Report spends a lot of breath taking issue with the comments of the Office of Historic Preservation's ("OHP") particularly their statement that in the course of the City's survey of historical sites, the Tahquitz Plaza was evaluated and identified as a historic resource. Staff insists that the draft survey has not evaluated the Tahquitz Canyon, a fact that in itself has no legal significance.

This is especially true because, as explained by Payton Hall in his April 9, 2015 letter, the City's contract with Historic Resources Group, LLC for the historic resources survey does not authorize consideration of any building constructed after 1968. Accordingly, it is appears that the City has already decided that post-1968 buildings have no historic value.

The Staff Report otherwise fails to address the OHP or other expert commentator's argument that the Tahquitz Plaza meets the criteria for a historic resource. More importantly, the Staff Report itself fails to actually consider whether, based on the evidence in the record and expert opinion submitted by the public, the Tahquitz Plaza should be considered a historically significant resource.

CEQA does not permit the lead agency to hide behind its own failure to investigate the significance of a project's potential impacts:

> "The agency [will] not be allowed to hide behind its own failure to gather relevant data. . . . CEQA places the burden of environmental investigation on government rather than the public. If the local agency has failed to study an area of possible environmental impact, a fair argument may be based on the limited facts in the record. Deficiencies in the record may actually enlarge the scope of fair argument by lending a logical plausibility to a wider range of inferences." (Sundstrom v. County of Mendocino (1988) 202 Cal. App. 3d 296, 311 [248 Cal.Rptr. 352]; see also Christward Ministry v. Superior Court (1986) 184 Cal. App. 3d 180, 197 [228 Cal.Rptr. 868] [fact that initial study checklist was incomplete and marked every impact "no" supported fair argument that project would have significant environmental effects].)

Gentry v. City of Murrieta, (1995) 36 Cal. App. 4th 1359, 1378. See, also, Sundstrom v. County of Mendocino (1988) 202 Cal. App. 3d 296, 311 ("Sundstrom") (CEQA places the burden of environmental investigation on government rather than the public.)

H. Because Tahquitz Plaza is a historically significant resource, the City must prepare an Environmental Impact Report

Testimony of experts and other evidence in the record support the conclusion that the Tahquitz Plaza is a historically significant resource because it "embodies the distinctive characteristics of a type, period, region, or method of construction, or represents the work of an important creative individual, or possesses high historic values." CEQA Guideline §15064.5(a)(3)(C).

The Tahquitz Plaza embodies Hugh Kaptur's distinctive "Desert Modern" style, which according to the noted historian and architect, Alan Hess, uses "Modern concepts to solve the challenges of climate, function, and new materials."

The Tahquitz Plaza also exemplifies a period when "an extraordinary group of talented architects lived or worked in Palm Springs." Finally, the Plaza "is an important and well preserved example of Kaptur's unique approach which "draws on draws on organic forms and ideas from the American Southwest, and Frank Lloyd Wright."

Because the Tahquitz Plaza meets the criteria set forth in §15064.5(a)(3)(C), the City Council "shall" determine that it is a historically significant resource.

According to Public Resources Code §21084.1, a substantial adverse change in the significance of an historical resource results in a "significant effect on the environment." The proposed demolition of the Tahquitz Plaza therefore amounts to a substantial adverse change in the significance of historical resource. CEQA Guideline §15064(b)(1). The Project, therefore will result in a significant adverse environmental impact, triggering the need for the preparation of an EIR.

Conclusion

For all the foregoing procedural and substantive reasons, I urge you to deny the project as proposed.

Sincerely,

/s/ Babak Naficy

RE: Aberdeen Project, 5.1361 PD-375, CUP, 3.3820 MAJ and TTM; Objection to Demolition of Tahquitz Plaza

Dear Honorable Councilmembers:

On behalf of the Southern California Chapter of Docomomo US, I am writing in regard to the proposed demolition of the historic 1971 Tahquitz Plaza on Tahquitz Canyon Way. Docomomo strongly believes that the building qualifies as an historical resource for its association with architects Kaptur & Lapham and as an excellent example of late Modernism within the City of Palm Springs. Tahquitz Plaza is considered by numerous experts in the field as one of Hugh Kaptur's most outstanding commissions. Now threatened with either complete or partial demolition, it is important to recognize it as a historic resource and fully evaluate a range of viable preservation alternatives. Given that significant adverse impacts will occur through demolition, the City is required to prepare an Environmental Impact Report (EIR) as part of the California Environmental Quality Act (CEQA).

Substantial evidence supports a fair argument that the project will cause a substantial adverse change to a historical resource, requiring preparation of an Environmental Impact Report (EIR).

A key policy under the California Environmental Quality Act (CEQA) is the lead agency's duty to "take all action necessary to provide the people of this state with... historic environmental qualities...and preserve for future generations...examples of major periods of California history."[1] Courts often refer to the EIR as "the heart" of CEQA, providing decision makers with an in-depth review of projects with potentially significant environmental impacts and analyzing alternatives that would reduce or avoid those impacts.[2] To this end, CEQA "requires public agencies to deny approval of a project with significant adverse effects when feasible alternatives or feasible mitigation measures can substantially lessen such effects."[3]

"Since the preparation of an EIR is the key to environmental protection under CEQA," an EIR is required "whenever it can be fairly argued on the basis of substantial evidence that

---

[1] Public Resources Code §21001 (b), (c).
[2] *County of Inyo v. Yorty* (1973) 32 Cal.App.3d 795; *Laurel Heights Improvement Association v. Regents of the University of California* (1993) 6 Cal.4th 1112, 1123.
[3] *Sierra Club v. Gilroy City Council* (1990) 222 Cal. App.3d 30, 41; *also see* PRC §§ 21002, 21002.1.

the project may have significant environmental impact"[4] The "fair argument" test establishes a low threshold for initial preparation of an EIR, which reflects a preference for resolving doubts in favor of environmental review."[5] Evidence supporting a fair argument of a significant environmental impact will trigger an EIR even if the record contains contrary evidence."[6] As applied to the proposed project, even if the MND's unsupported finding of "no impact" on historical resources were accepted on faith alone, an EIR is nonetheless required given substantial new evidence in the record establishing the significance of the Tahquitz Plaza.

Despite Tahquitz Plaza being less than fifty years old, a clear case has been made already in the record for its exceptional significance and eligibility as an historic resource. The City cannot arbitrarily decide which resources it chooses to identify as being historic, based on age alone or cutoff dates established by the City. The City of Palm Springs' Historic Preservation Ordinance does not limit age and the City has previously designated buildings less than fifty years old as local landmarks.

Conclusion

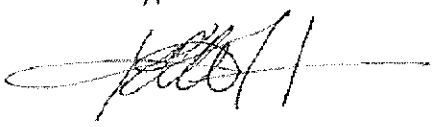
CEQA review has proven to be one of the most effective tools that we have to stanch the erosion of our cultural heritage. It can prevent irreversible losses through careful consideration of alternatives that can achieve most of the project objectives while avoiding significant impacts on the environment. Docomomo strongly urges the City of Palm Springs to reject the proposed Mitigated Negative Declaration (MND) and require preparation of an EIR for this project, as clearly mandated under CEQA.

Docomomo welcomes the opportunity to meet and work with the City of Palm Springs to explore potential "win-win" alternatives to the proposed project. Please contact me at (626) 616-3976 or docomomosocal@gmail.com if you have any questions or concerns.

About Docomomo US / Southern California Chapter

Docomomo US/SoCal's mission is to increase awareness of, and celebrate the unique legacy of, Southern California's Modern Movement and its influences, through education, documentation, and advocacy. We partner with other local, regional, and statewide organizations and agencies to enhance understanding and appreciation of the area's diverse Modern resources.

Sincerely,



Katie E. Horak
President, Docomomo US / Southern California Chapter

RE: Aberdeen Project IS/MND, Case Nos 5.1361 PD-375, CUP, 3.3820 MAJ and TTM 36876

Honorable Councilmembers:

On behalf of the National Trust for Historic Preservation, I would like to express our concern with the proposed demolition of the Tahquitz Plaza on Tahquitz Canyon Way in the heart of the City of Palm Springs. We are particularly alarmed with the City's preliminary determination that the demolition project and subsequent development of a mixed-use project on the site would cause no harm to historic resources. The City has received the opinion of multiple experts, including City staff, that Tahquitz Plaza is a historical resource. We are aware of no evidence in the record that contradicts these well-supported arguments. **Under these circumstances, the California Environmental Quality Act requires the City to prepare an EIR and consider feasible alternatives to demolition.**

The Tahquitz Plaza office buildings were designed by Kaptur & Lapham in 1971 and are excellent and well-preserved examples of Palm Springs Modernism. Hugh Kaptur's contributions to the City of Palm Springs were significant and Tahquitz Plaza is considered to be one of his most outstanding works.

The City's February 2015 Mitigated Negative Declaration indicates that the demolition of Tahquitz Plaza would "cause no substantial adverse change in the significance of a historical resource as defined in [CEQA Guideline] 15064.5" (MND, p.24-25). This determination was made in error. According to a March 26, 2015 letter from the California Office of Historic Preservation, the City has commissioned a city-wide survey of its historic resources and, during this process, identified Tahquitz Plaza as a historical resource. It has also received the opinion of Alan Hess, a qualified expert in the field of architectural history, that the Plaza is historically significant. Further, the City's own Architectural Advisory Committee and Planning Commission have both recommended denial of the project as a result of the proposed impact to historic resources.

Under CEQA, an EIR is required if there is substantial evidence in the "whole record" of proceedings that supports a "fair argument" that a project "may" have a significant effect on the environment. Guideline § 15064(f)(1). *In League for Protection of Oakland's Architectural etc. v. City of Oakland* (1997) 52 Cal.App.4th 896, the court affirmed that the fair argument standard as to whether an impact "may" occur is a low threshold test. (See also *Architectural Heritage Association v. County of Monterey* (2005) 122

San Francisco Field Office
The Hearst Building, 5 Third Street, Suite 707 San Francisco, CA 94103
e info@savingplaces.org p 415.947.0600 f 415.947.0699 www.PreservationNation.org

Cal.App.4th 1095; holding that the opinion of a consultant commissioned by the county, findings of an advisory committee and testimony of members of the public with relevant expertise represented "substantial evidence supporting a fair argument" that the Old Jail was a historic resource).

In addition to case law, the CEQA Guidelines are clear that a conflict in expert opinion over the significance of an environmental impact normally requires preparation of an EIR. Guideline § 15064(g). *Sierra Club v. CDF* (2007) 150 Cal.App.4th 370. In this case, all evidence before the City suggests that Tahquitz Plaza is historically significant. The cannot in good faith deny that its finding that the Tahquitz Plaza is non-historic against the litany of public information prepared by experts in the field of historic preservation, including the Office of Historic Preservation and the City's own staff.

We urge the City to develop an Environmental Impact Report in light of the very serious consequences to historic resource that would result from the project as proposed.

Thank you for your consideration of these comments. Please contact me at bturner@savingplaces.org or 415-947-0692 should you have any questions.

Sincerely,

Senior Field Officer/Attorney

Honorable City Council
City of Palm Springs
3200 E. Tahquitz Canyon Way
Palm Springs, CA 92263

Re: Comments on Aberdeen Project, Case Nos 5.1361 PD-375, CUP, 3.3820 MAJ and TTM 36876; Objection to Demolition of Historic Tahquitz Plaza

Honorable Councilmembers:

On behalf of the Palm Springs Modern Committee, we urge the City to require the preservation of the Tahquitz Plaza as part of the proposed Aberdeen Project. The Aberdeen Project, as described in the mitigated negative declaration (MND) prepared for the project, includes: demolition of all four Hugh Kaptur designed buildings that comprise the historic and architecturally significant Tahquitz Plaza; construction of 74 residential units; and construction of 17 live-work units along Tahquitz Canyon Way (the "Project" or "Aberdeen Project"). The Project was slightly revised as presented to the Planning Commission to reduce the number of residential units to 73 and the number of live-work units to 13 to allow for the preservation of one of the four Tahquitz Plaza buildings, but it is unknown to the Palm Springs Modern Committee whether the MND version of the Project or the Planning Commission version of the Project will be presented to the City Council.

Under either iteration, the Project would result in significant adverse impacts that have not been disclosed or analyzed in the MND. The California Environmental Quality Act ("CEQA") requires preparation of an environmental impact report ("EIR") whenever a project may have a significant adverse impact on the environment. (Public Resources Code section 21151.) As proposed, the Aberdeen Project would result in the demolition of all or most of the Tahquitz Plaza, resulting in significant adverse historic resource and aesthetic impacts. Despite pleas to analyze the significance of and impacts to this resource from numerous members of the public, including experts in historic architecture, the Planning Commission and even the California Office of Historic Preservation, the

City has provided no analysis of the Tahquitz Plaza. The Project would also result in land use and aesthetic impacts due to the Project's inconsistencies with height, setback, inclusion of prohibited uses and landscaping requirements. Approval of the Project as proposed, and based upon only a MND, would result in a clear violation of CEQA. However, revising the Project to include the preservation of the Tahquitz Plaza would mitigate the majority of these potentially significant impacts, likely obviating the need for an EIR. A revised Project would provide the City with a project that preserves Palm Springs' important architectural history while still accommodating a substantial amount of new development.

I. CEQA's Requirements

An EIR must be prepared instead of a MND when there is substantial evidence to support a fair argument that the project may have significant adverse environmental impacts. "The fair argument standard is a "low threshold" test for requiring the preparation of an EIR." (*Pocket Protectors v. City of Sacramento* (2004) 124 Cal.App.4th 903, 928.) "If there is substantial evidence of a significant environmental impact, evidence to the contrary does not dispense with the need for an EIR when it can still be 'fairly argued' that the project may have a significant impact." (*Friends of "B" Street v. City of Hayward* (1980) 106 Cal.App.3d 988, 1001; *see also* CEQA Guidelines § 15064.) It is a question of law, not fact, whether a fair argument exists, and courts owe no deference to a lead agency's determination. There is a clear preference for resolving doubts in favor of preparing an EIR. (*Architectural Heritage Association. v. County of Monterey* (2004) 122 Cal.App.4th 1095, 1110; *San Joaquin Raptor/Wildlife Rescue Center v. County of Stanislaus* (1996) 42 Cal.App.4th 608, 617-618; *Stanislaus Audubon Society, Inc. v. County of Stanislaus* (1995) 33 Cal.App.4th 144, 151; *Quail Botanical Gardens Foundation, Inc. v. City of Encinitas* (1994) 29 Cal.App.4th 1597, 1602-03.)

There is substantial evidence to support a fair argument that, as proposed, the Aberdeen Project may have significant adverse impacts. The Project would demolish the historically significant Tahquitz Plaza, resulting in significant historic resource impacts. The Project also fails to comply with numerous land use regulations and requirements. This noncompliance results in both land use and aesthetic impacts that were not analyzed or even acknowledged by the MND.

A. Historic Resource Impacts.

CEQA section 21084.1 mandates that "[a] project that may cause a substantial adverse change in the significance of an historical resource is a project that may have a significant effect on the environment." A substantial adverse change in the significance

of an historical resource includes "physical demolition, destruction, relocation, or alteration of the resource..." (CEQA Guidelines § 15064.5(b)(1).) The Aberdeen Project would demolish the historically significant Tahquitz Plaza, resulting in a significant adverse impact.

1. Tahquitz Plaza is an Historic Resource.

Hugh Kaptur is among Palm Spring's most important and visionary local architects. He is an innovative designer with his own distinctive to Desert Modern architecture. Mr. Kaptur was the subject of a recent documentary, *Quiet Elegance: The Architecture of Hugh M. Kaptur*. (See http://www.thisnthatfilms.net/hugh-kaptur.html, incorporated by reference.) The importance of his work within the City was also recognized when he received a star on the Palm Springs Walk of Stars in 2014 alongside those including William F. Cody, Albert Frey, Donald Wexler and E. Steward Williams.

The Tahquitz Plaza is a shining example of Mr. Kaptur's originality and ingenuity. The beautiful pueblo-influenced design of these buildings embodies his distinctive style. The Tahquitz Plaza was also designed to be energy efficient with thick walls and wide overhangs that protect the buildings from absorbing heat and an orientation intended to capture breezes. The visually prominent location of the Tahquitz Plaza along Tahquitz Canyon Way heightens the significance of this resource.

Under CEQA, "[g]enerally, a resource shall be considered by the lead agency to be 'historically significant' if the resource...: (A) Is associated with events that have made a significant contribution to the broad patterns of California's history and cultural heritage; (B) Is associated with the lives of persons important in our past; (C) *Embodies the distinctive characteristics of a type, period, region, or method of construction, or represents the work of an important creative individual, or possesses high artistic values*; or (D) Has yielded, or may be likely to yield, information important in prehistory or history." (CEQA Guidelines § 15064.5(a)(3).)

The record for the Aberdeen Project is replete with evidence regarding the importance of Hugh Kaptur and the significance of the Tahquitz Plaza. The following evidence submitted by experts clearly demonstrates the Tahquitz Plaza embodies distinctive characteristics of Desert Modern design, represents the work of an important creative individual and possesses high artistic values. Thus, the City must consider the Tahquitz Plaza an historic resource and analyze any impacts to this resource in an EIR.

Alan Hess, architect, historian, and the author of numerous books on Modern architecture, submitted comments regarding the importance of Hugh Kaptur in history of

Palm Springs Modernism. (**Attachment 1**, February 19, 2015 Hess Letter to City and March 20, 2015 Hess Letter to OHP.) His letter describes Hugh Kaptur's unique style and the high artistic value of his work at Tahquitz Plaza. Mr. Hess is a consultant on the City's Citywide Historic Resource Survey Update that is currently being prepared. He has strongly recommended the listing of Tahquitz Plaza as a significant resource on that survey.

Architectural historian Morris Newman interviewed Hugh Kaptur as part of his work on an essay regarding Mr. Kaptur published in *The Desert Modernists: The Architects Who Envisioned Midcentury Modern Palm Springs.* (**Attachment 2**, Newman Essay re Hugh Kaptur.) Mr. Kaptur informed Mr. Newman that the Tahquitz Plaza, where Mr. Kaptur maintained his practice for many years, is one of his favorite projects. In comments submitted to the City, Mr. Newman found that "[a]lthough Tahquitz Plaza is not a loud or flashy building, it shows many signs of architectural originality and creativity...In my view, the Tahquitz office complex is one of the "sina qua non" buildings of Palm Springs." (**Attachment 3**, Newman Email to City.) Mr. Newman also noted the importance of Tahquitz Plaza is enhanced by the fact that it is part of a trio of Kaptur-designed buildings along this stretch of Tahquitz Canyon Way.

Brad Dunning, a former Historic Site Preservation Board member and designer known for working on architecturally significant properties and restorations, also submitted comments urging preservation of the Tahquitz Plaza. He stated that Hugh Kaptur's work is as important to Palm Springs as that of Albert Frey, E. Stewart Williams, Donald Wexler, and William Cody. He found Kaptur's work to be "distinctive, unique and in the case of his pueblo modern design at Tahquitz Plaza highly contextual and specific to stylish Palm Springs." (**Attachment 4**, February 20, 2015 Dunning Email to City.)

The architect for the Tahquitz Plaza, Hugh Kaptur, who is also a former Planning Commissioner and member of the City's Architectural Advisory Committee, has articulated before the Planning Commission and in a recent editorial why the Tahquitz Plaza is one of his favorite projects. (**Attachment 5**, April 7, 2015 Kaptur Editorial in *Desert Sun*.) Mr. Kaptur feels the Tahquitz Plaza represents some of his best work, noting that the buildings were the recipients of architectural awards in 1979 and 1980.

The California Office of Historic Preservation has also urged the City consider the Tahquitz Plaza an historic resource and either modify the Aberdeen Project to preserve the Tahquitz Plaza or to prepare an EIR to analyze the impacts. . The OHP's letter officially states "in light of the preliminary findings of historical significance described in the Alan Hess letter, we encourage the Lead Agency [the City] to act within its

discretion...to consider the Tahquitz Plaza office complex as a historic resource for the purposes of CEQA." The OHP letter further states that the City has the discretion under CEQA to "treat the Tahquitz Plaza office complex as a historic resource, [and that] it may be possible to modify the proposed project to avoid impacts to the historic resources.... In this way, [the City] could avoid the time and cost involved in preparing an Environmental Impact Report (EIR)."

The City's own design and land use experts, the Architectural Advisory Committee and the Planning Commission, recognized the significance of Tahquitz Plaza and recommended denial of the Project based in large part upon the proposed demolition of these buildings.[1] At the Planning Commission hearing, a Commissioner asked City staff whether the City could find a building to be a local historic resource if it had not yet reached 50 years of age. No specific answer was provided, but a review of the City's Historic Preservation Ordinance demonstrates there is no prohibition or limitation regarding buildings that are less than 50 years and the City has previously listed resources that were less than 50 years of age. The Historic Preservation Ordinance was adopted "for the purpose of preserving areas and specific buildings of the city which reflect elements of its cultural, social, economic, political, architectural and archaeological history." (Palm Springs Municipal Code 8.05.010.) This Ordinance defines an historic site as "any real property ... that is unique or significant because of its location, design, setting, materials, workmanship or aesthetic effect and: ... (4) That embodies the distinctive characteristics of a type, period or method of construction; or (5) That presents the work of a master builder, designer, artist, or architect whose individual genius influenced his age; or that possesses high artistic value." (Palm Springs Municipal Code 8.05.020(a).) The expert testimony demonstrates that the Tahquitz Plaza meets criteria (4) and (5) of the City's definition of an historic site.

The wealth of evidence regarding the historic significance of the Tahquitz Plaza is similar to the evidence presented to the county in *Architectural Heritage Association v. County of Monterey* (2004) 122 Cal.App.4th 1095. In that case, the court found that the opinion of a consultant commissioned by the county, findings of an advisory committee and testimony of members of the public with relevant expertise represented "substantial evidence supporting a fair argument that the Old Jail is an historic resource." (*Id.* at 1118.) **Here, a City commissioned consultant (Alan Hess), other experts in the community, the Architectural Advisory Committee, the Planning Commission and**

1 The Planning Commissioners that voted against denial of the Project did not dispute the significance of the Tahquitz Plaza. Instead, they stated that they did not believe it was economically feasible to preserve these buildings. There is no economic analysis in the record to support this conclusion. Moreover, this is a determination that can only be made after analysis in an EIR.

even the California Office of Historic Preservation have urged the City to consider the Tahquitz Plaza to be an historic resource. Failure to do so is a violation of CEQA as it was in *Architectural Heritage Association.*

2. The MND Provide No Evidentiary Support for Finding of Insignificant Impacts to Historic Resources.

Despite all of the evidence presented to the City, and the importance of Hugh Kaptur and the Tahquitz Plaza, the MND/Initial Study completely ignores the buildings' potential historic significance. Instead of evaluating the historic significance of these resources, the MND/Initial Study merely references the Tahquitz Plaza as "1971 vintage office buildings." (MND p. 24.) The MND/Initial Study does not disclose that Hugh Kaptur was the architect of these buildings nor does it describe their unique design. It states that the buildings are not listed on the state or local register, but does not acknowledge that the buildings may soon be listed on the City's historic resources survey. Further, as pointed out by the Office of Historic Preservation, the fact that a resource is not listed on a register does not preclude a resource from meeting the criteria for historic resource under CEQA. CEQA "does not demand formal listing of a resource in a national, state or local register as a prerequisite to 'historical' status. The statutory language is more expansive and flexible." (*Architectural Heritage Ass'n, supra* 122 Cal.App.4th at 1114, citation to *League for Protection of Oakland's Historic Resources v. City of Oakland* (1997) 52 Cal.App.4th 896, 907.)

The City's failure to evaluate the historic significance of the Tahquitz Plaza, despite substantial evidence of the buildings historicity and requests from the Planning Commission to study these impacts, is a violation of CEQA. The purpose of the initial study is to provide the lead agency with adequate information regarding a project to determine the appropriate environmental review document and "documentation of the factual basis for the finding in a negative declaration that a project will not have a significant effect on the environment." (*Ctr. for Sierra Nevada Conservation v. County of El Dorado* (2012) 202 Cal. App. 4th 1156, 1170, citations omitted.) "Where an agency. . . fails to gather information and undertake an adequate environmental analysis in its initial study, a negative declaration is inappropriate." (*El Dorado County Taxpayers for Quality Growth v. County of El Dorado* (2004) 122 Cal. App. 4th 1591, 1597, citations omitted.) Failure to adequately analyze all of a project's potentially significant impacts or provide evidence to support conclusions reached in the initial study is a failure to comply with the law.

This failure to provide an analysis is also a violation of the City's General Plan Policy RC 10.3, which states: "Require site assessment conducted by a qualified

specialist whenever information indicates that a site proposed for development may contain paleontological, historic, or archaeological resources." The evidence cited above clearly indicates the Tahquitz Plaza not only may be but is an historic resource.

3. The City's Failure to Follow OHP Recommendations Could Jeopardize Its Status as a Certified Local Government.

Palm Springs was recently approved as a Certified Local Government (CLG) by the California Office of Historic Preservation (OHP). The CLG Program is designed to encourage the participation of local governments in the identification, evaluation, registration, and preservation of historic properties in their communities. CLG communities are also eligible to receive a wide range of technical assistance and substantial grants from the OHP. The OHP monitors CLG communities' compliance with CEQA and other laws and regulations intended to protect historic resources. A determination by OHP that the City has failed to comply with CEQA could result in a loss of CLG status and/or the City's inability to receive OHP grant funding. OHP has recommended the City evaluate the historic significance of the Tahquitz Plaza. To comply with CEQA and protect its status as a CLG, the City should follow this recommendation.

B. Land Use Impacts.

The Architectural Advisory Committee and the Planning Commission have identified numerous areas in which the Aberdeen Project would be inconsistent with the Section 14 Specific Plan and City zoning regulations. The majority of these inconsistencies would be resolved if the Project were modified to include the preservation of Tahquitz Plaza.

A project's conflict with any applicable land use plan, policy or regulation is a significant environmental impact under CEQA. (*Pocket Protectors v. City of Sacramento* (2004) 124 Cal.App.4th 903, 929.) "If substantial evidence supports a fair argument that the proposed project conflicts with [land use] policies, this constitutes grounds for requiring an EIR. Whether a fair argument can be made on this point is a legal question" that provides no deference to a city council determination.

The Aberdeen Project would exceed Section 14 height limits. The MND dismisses this land use policy conflict by claiming the Project would meet the requirements of the City's high-rise development standards. (MND p. 12.) As found by the Planning Commission, the Project would not comply with the high-rise development standards because it lacks the required setbacks by providing only 6.75 feet of setback from Tahquitz Canyon Way. Planning Commissioner's fact-based conclusions regarding a

project's failure to comply with land use policy is substantial evidence to support a fair argument that the project would have significant land use impacts. (*Stanislaus Audubon Society, Inc. v. County of Stanislaus* (1995) 33 Cal.App.4th 144, 155.) Additionally, the Project would not include 60 percent open space, which is required to meet the high-rise development standards. (Palm Springs Municipal Code 93.04.00(A).) If the Tahquitz Plaza were preserved, adequate setbacks would be provided along Tahquitz Canyon Way and additional open space would be included in the Project, which would likely allow the Project to meet the high-rise standards for the remainder of the Project.

The Project would also result in a land use impact by including single family homes in area where single family homes are prohibited. (Section 14 Specific Plan p. 6-4.) The MND ignores this inconsistency by mischaracterizing the Project as multi-family housing. The City's Municipal Code defines multi-family housing as "a building designed for or occupied by two (2) or more families living independently of each other." (Palm Springs Municipal Code 91.00.10.) In the Aberdeen Project, the majority of the buildings, particularly those along Tahquitz Canyon Way, are completely detached units that are designed for occupancy by only one family, thus they do not meet the City's definition of multi-family housing and are prohibited by the Section 14 Specific Plan. The MND is inaccurate and misleading to the public and decision makers by failing to disclose the inclusion of a prohibited use in this Project.

The setback, height and use conflicts are similar to those found by the court to be significant impacts requiring preparation of an EIR in *Pocket Protectors v. City of Sacramento* (2004) 124 Cal.App.4th 903. In the *Pocket Protectors* case, the planning commission found a densely packed single family housing project to be inconsistent with housing type and setback policies for the area. The MND prepared in that case glossed over or ignored the inconsistencies, much the way it does here, and the project approval was found to be in violation of CEQA.

The Aberdeen Project further violates land use policies due to its inconsistencies with required landscaping along Tahquitz Canyon Way. The minimal setbacks provided by the Project do not allow adequate space for the large palm trees, desert landscaping, public art and pedestrian amenities along Tahquitz Canyon Way required by the Section 14 Specific Plan. The MND acknowledges the inconsistency and provides mitigation measure MMI-1, which states: "Project site plans, architectural renderings and landscape plans shall be revised to address inconsistencies with the development standards and other design requirements of the Section 14 Specific Plan, as determined by City Council." The ability of mitigation measures to actually mitigate impacts must be evaluated in the environmental review document. By waiting until after the City Council hearing to develop a mitigation measure for this impact, the MND fails to assess the efficacy of the

measure and improperly defers mitigation. The developer has opted not to make the revisions necessary to bring this Project into compliance with the Section 14 Specific Plan and thus the inconsistency, and land use impact, remains.

The Project would also violate several City General Plan policies, resulting in further land use impacts. The General Plan requires the City to:

- RC10.1 Support the preservation and protection of historically, architecturally, or archaeologically significant sites, places, districts, structures, landforms, objects, native burial sites and other features.
- RC10.2 Encourage and support the retention and adaptive reuse of buildings of architectural, historic, or cultural significance where financially feasible.
- RC10.5 Actively encourage and promote the understanding, appreciation, and preservation of the archaeological, historic, and cultural resources.

By allowing the demolition of the historically significant Tahquitz Plaza, the City's approval of the Project would violate these General Plan policies.

C. Aesthetic Impacts

The Aberdeen Project would also result in significant aesthetic impacts that require analysis in an EIR. The proposed demolition of the historically significant Tahquitz Plaza at a prominent location in the City's downtown would degrade the visual character of the area. These architecturally distinctive buildings with wide landscaped setbacks would be replaced with densely packed units that exceed height limits and violate setback requirements. The Planning Commission has questioned the viability of providing live-work units along Tahquitz Canyon Way and expressed concern that these visually prominent units would end up being used as storage space, further degrading the visual character. This degradation is particularly significant because Tahquitz Canyon Way is designated as a scenic corridor by the City's General Plan.

Conclusion

The Palm Springs Modern Committee urges you to reconsider the proposed Aberdeen Project. As proposed, the Project's impacts require analysis in an EIR and the City's proposal to approve the Project based upon a MND violates CEQA. If the Project were revised to include preservation of the Tahquitz Plaza, the majority of the housing units could still be constructed, but the impacts of the Project would be substantially reduced.

Thank you for your time and consideration in this matter.

Sincerely,

Amy Minteer
Attorney at Law

Re: Tahquitz Plaza by architect Hugh Kaptur, Tahquitz Canyon and Calle El Segundo

To the Planning Commission:

I am writing as an architect, historian, and author of nineteen books on Modern architecture to express my support for the preservation of the Tahquitz Plaza office complex because of its historical significance to Palm Springs and California architecture. Please share this letter with the Planning Commissioners prior to their February 25, 2015 meeting.

I have written two books on Palm Springs architecture (*Julius Shulman: Palm Springs*, Rizzoli International, 2008, and *Palm Springs Weekend*, Chronicle Books, 2001) and can say that these buildings, and the work of architect Hugh Kaptur, play an important role in what is now identified as Palm Springs Modernism.

I am also a consultant on architectural history for the current City of Palm Springs architectural survey. I have already unequivocally recommended Tahquitz Plaza as a significant building in that survey.

My resume is attached. I have written on architecture for the *Los Angeles Review of Books, The Architect's Newspaper, The Los Angeles Times, Architectural Digest, the Journal of the Society of Architectural Historians*, and other journals. I have been the architecture critic of the *San Jose Mercury News* since 1986, received a grant from the Graham Foundation for Advanced Studies in the Fine Arts, and was a National Arts Journalism Fellow at Columbia University.

The research of the importance of Palm Springs Modern architecture in general is very recent. Only a decade ago, the work of now-recognized architects such as William Cody, Donald Wexler, Palmer & Krisel, and E. Stewart Williams was not well known

generally; few Modern buildings now considered iconic were identified as historic then. Since then, our understanding of these and other architects has made us aware of the full dimension of Palm Springs architectural history.

As we continue researching this history, it is clear that the work of Hugh Kaptur makes a significant contribution to the unique character of Palm Springs architecture. This opinion is not mine alone; the newly published book *The Desert Modernists: The Architects Who Envisioned Midcentury Modern Palm Springs* (Desert Publications, 2015) and the documentary film *Quiet Elegance: The Architecture of Hugh M. Kaptur* (Bert Simonis, director, 2014) indicate the clear direction of scholarly opinion on Kaptur's importance.

Briefly stated, Kaptur's significance is this: 1) Palm Springs midcentury Modern architecture is known for its use of Modern concepts to solve the challenges of climate, function, and new materials; 2) an extraordinary group of talented architects lived or worked in Palm Springs, and while they addressed the same problems they expressed a wide range of aesthetic solutions; 3) Hugh Kaptur's aesthetic is unique in Palm Springs, demonstrating the wide range of fertile innovation in the city.

Tahquitz Plaza is an important and well preserved example of Kaptur's unique approach. Rather than drawing on the rectilinear steel and glass geometries of, for example, Richard Neutra, he draws on organic forms and ideas from the American Southwest, and Frank Lloyd Wright. This is seen in Tahquitz Plaza's irregular roofline, the deep, sculpted, curving frames around windows, the eaves and sun shading features, and the integration of outdoor areas interspersed among the offices. This is a strong piece of design that deserves to remain in place.

In addition, its site on Tahquitz Canyon places it in the context of the city civic center, an extraordinary collection of Modern buildings serving civic purposes, and rare in the state.

I am writing this letter *pro bono* because historic architecture of this quality adds to the civic character and quality of city life. In the years before Palm Springs' heritage was fully understood, the city lost many significant structures. Unfortunately, this degradation has continued; the demolition of a major Kaptur design would be a loss to history and the city's urban quality.

Sincerely,

Alan Hess

Carol Roland-Nawi
State Historic Preservation Officer
Office of Historic Preservation
1725 23rd Street, Suite 100
Sacramento, CA 95816

Re: Tahquitz Plaza by architect Hugh Kaptur, Tahquitz Canyon and Calle El Segundo

Dear Ms. Roland-Nawi:

I am writing at the request of the Palm Springs Preservation Foundation to ask you to consider writing a letter to the City of Palm Springs encouraging them to conduct an EIR for the Tahquitz Plaza office buildings (1971) by Kaptur & Lapham. The four buildings in this complex are excellent and well preserved examples of key aspects of architect Hugh Kaptur's work, and of Palm Springs Modernism.

The buildings are currently under threat of demolition for a proposed residential project. So far the city has not requested an EIR, but I believe the complex's significance and quality require it.

Kaptur is an important architect in Palm Springs Modernism. Rather than drawing on the rectilinear steel and glass geometries of, for example, Richard Neutra, Kaptur often draws on organic concepts from Frank Lloyd Wright and forms from the American Southwest. This is seen in Tahquitz Plaza's irregular roofline, the deep, sculpted frames around windows, the bermed walls, the eaves and sun shading features, and the integration of outdoor areas interspersed among the offices. The strong composition of these many elements shows Kaptur's skill and the high artistic value of his work.

In addition, Tahquitz Plaza's location on Tahquitz Canyon places it in the context of the city's Modern civic center. Tahquitz Canyon is the city's main civic thoroughfare, linking the airport to downtown; along this boulevard is an extraordinary collection of Modern buildings serving civic purposes, including city hall, police and county facilities, and the airport, complemented by commercial buildings of similar style and siting. Such a collection of Modern civic center buildings is rare in the state.

Palm Springs' midcentury Modern architecture is known for its use of Modern concepts in addressing the challenges of climate, functions, and new material technologies. These are not typified by a single aesthetic; it ranges from the lightweight, steel framed houses resting lightly on the earth seen in the work of Richard Neutra and Albert Frey, to the autochthonous monolithic concrete structures, literally buried in the earth, seen in John Lautner's work, with many more interpretations in between.

Within this wide range, Kaptur's work is singular. His training in design was closely associated with midcentury automotive design in Detroit, where he attended Lawrence Tech and worked for General Motors' consumer design division. Kaptur has worked in Palm Springs from 1956 to the present day. He worked for and with other noted local architects, including Donald Wexler, Richard Harrison, and William Cody. Like those architects, his work is distinctive and individual, and yet his design also reflects common themes that distinguish Palm Springs Modernism.

The Tahquitz Plaza offices are an excellent representation of his use of sculptural, expressionist forms influenced by Native American adobe structures, but modernized and abstracted aesthetically in the spirit of Modernism. The complex's thick stuccoed walls do not imitate those vernacular structures; the silhouette of the walls and the curving windows frames that grow directly from those walls are carefully abstracted into forms that represent a distinct, modernized aesthetic vocabulary. This approach is also seen in other Kaptur designs, including the William Holden house (1977), and the Casa Blanca motel (1979.)

In addition, the Tahquitz Plaza offices incorporate unpainted wood walls and wood trellises. These also update the wood ramadas and trellises of traditional Southwestern architecture. The siting of the office structures creates small courtyards between the buildings (another design aspect seen in historic Spanish architecture of the Southwest) allowing for shaded outdoor areas.

Likewise, the landscaping and siting of the Tahquitz Plaza buildings represent an updating of traditional concepts and a Modern response to the hot climate. Berms rise partway up the walls, providing thermal insulation and connecting the structure to the earth, similar to Lautner's desert designs.

The thick walls, hooded windows, and shaded courts all have historic precedents, but they are also practical, integral elements that help moderate the strong sunlight and heat of the local climate. The design of all these elements is artful and well composed.

The use of historic regional architecture by twentieth century architects is an important facet of Modern architecture in California and the West. It can be seen, for example, in the work of Irving Gill in the 1910s, the Ranch Houses of Cliff May in the 1950s and 1960s, and the civic buildings and residences of Bennie Gonzales in Arizona, where historic forms were blended with Modernism's abstraction. Hugh Kaptur is the primary interpreter of this approach in midcentury Palm Springs, and Tahquitz Plaza is a primary example in the city.

Kaptur's work has been rediscovered fairly recently. This is not surprising; our understanding of the significance of Palm Springs Modern architecture in general is also relatively recent. Only a dozen years ago, the work of now-recognized architects such as William Cody, Donald Wexler, Palmer & Krisel, and E. Stewart Williams was not generally well known outside Palm Springs, and its significance was not even widely recognized within Palm Springs.

In the years before Palm Springs' heritage was fully understood, the city lost many significant structures. Unfortunately, this degradation has continued; the demolition of a major Kaptur design such as this would be a loss to history and the city's urban quality.

But as we continue researching this history, it is clear that the work of Hugh Kaptur makes a significant contribution to the unique character of Palm Springs architecture. This opinion is not mine alone; the newly published book *The Desert Modernists: The Architects Who Envisioned Midcentury Modern Palm Springs* (Desert Publications, 2015) and the documentary film *Quiet Elegance: The Architecture of Hugh M. Kaptur* (Bert Simonis, director, 2014) indicate the clear direction of opinion on Kaptur's importance.

I have written to the Palm Springs Planning Commission about my support, as a historian and architect, for the preservation of Tahquitz Plaza. I am also a consultant on architectural history for the Palm Springs architectural survey, currently underway. I have already unequivocally recommended Tahquitz Plaza as a significant building in that survey. I believe that a letter from your state office would encourage them to conduct an EIR that would document the significance of this complex.

Thank you for your consideration of this matter.

Sincerely,

HUGH KAPTUR

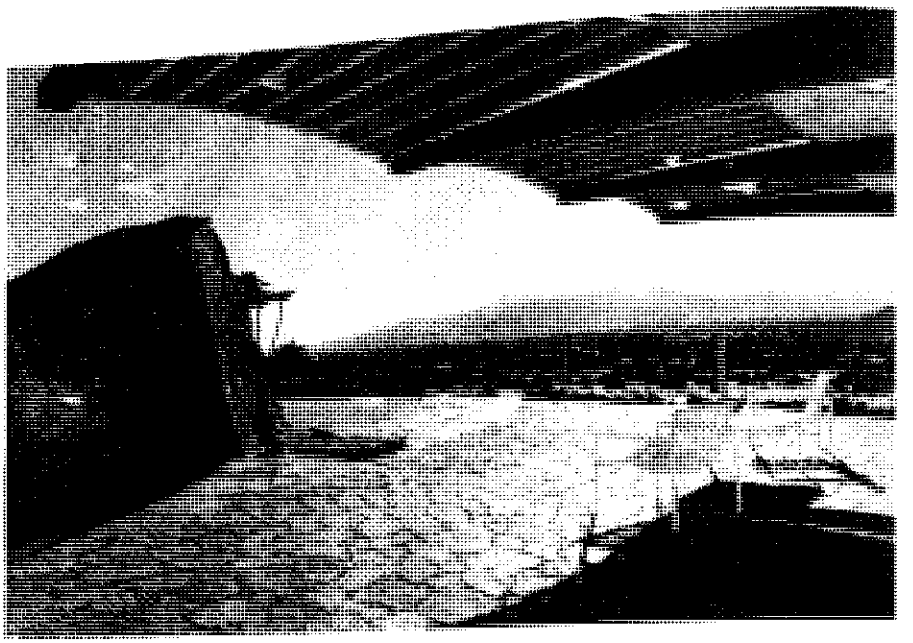
(MAY 22, 1931 –)

BY THOMAS HINE

HUGH KAPTUR STANDS APART FROM MOST OF THE PALM SPRINGS ARCHITECTS OF HIS GENERATION. ✦ RATHER THAN THE MAINLINE, INTERNATIONAL STYLE MODERNISM FAVORED BY MOST OF HIS PREDECESSORS AND COLLEAGUES IN THE DESERT, KAPTUR PREFERS WHAT HE CALLS "AN ARTISTIC ARCHITECTURE THAT IS ORGANIC AND FLOWING." ✦ HIS FIRST INSPIRATION WAS FRANK LLOYD WRIGHT, NOT MIES VAN DER ROHE.

Kaptur is not a doctrinaire follower of Wright, however. He denies having a signature style. His primary debt to the master of Taliesin, he adds, was the acknowledgment of climate and landscape in his projects, as well as a taste for sculptural masses and a delight in contrasting materials. In some cases, Kaptur was able to translate some of the sculptural feeling of Wright's designs into a colorful, "expressive" style. Kaptur's first Palm Springs project was the Angela Lodge (1957–58, now the Triangle Inn), a wildly inverted building with steel beams supporting a canopy reminiscent of a lean-to. Walls of glass stand on a stone base, while external "buttresses" support shade structures to keep the sun off the windows. Other "pop" buildings are the Sea House of 1960, with scallop-shaped awnings draped in orange plastic, and the Clubhouse Kaptur designed with Robert Pinzuti for the Palm Springs Golf Course (1959), with a curved roofline resembling a cresting wave.

Practical commissions, such as the Tahquitz Plaza office complex (1971, by Kaptur, Lapham, and Associates) on Tahquitz Canyon Way, did not always allow total freedom, yet this comparatively restrained project remains one of Kaptur's favorites. After an original design called for concrete, cost considerations dictated that a less expensive wood frame structure be employed. Despite the



This page and opposite: Kaptur created this home in 1958 at 580 Palisades Drive in Palm Springs. The house is known as the Russell House and/or the Sled House.

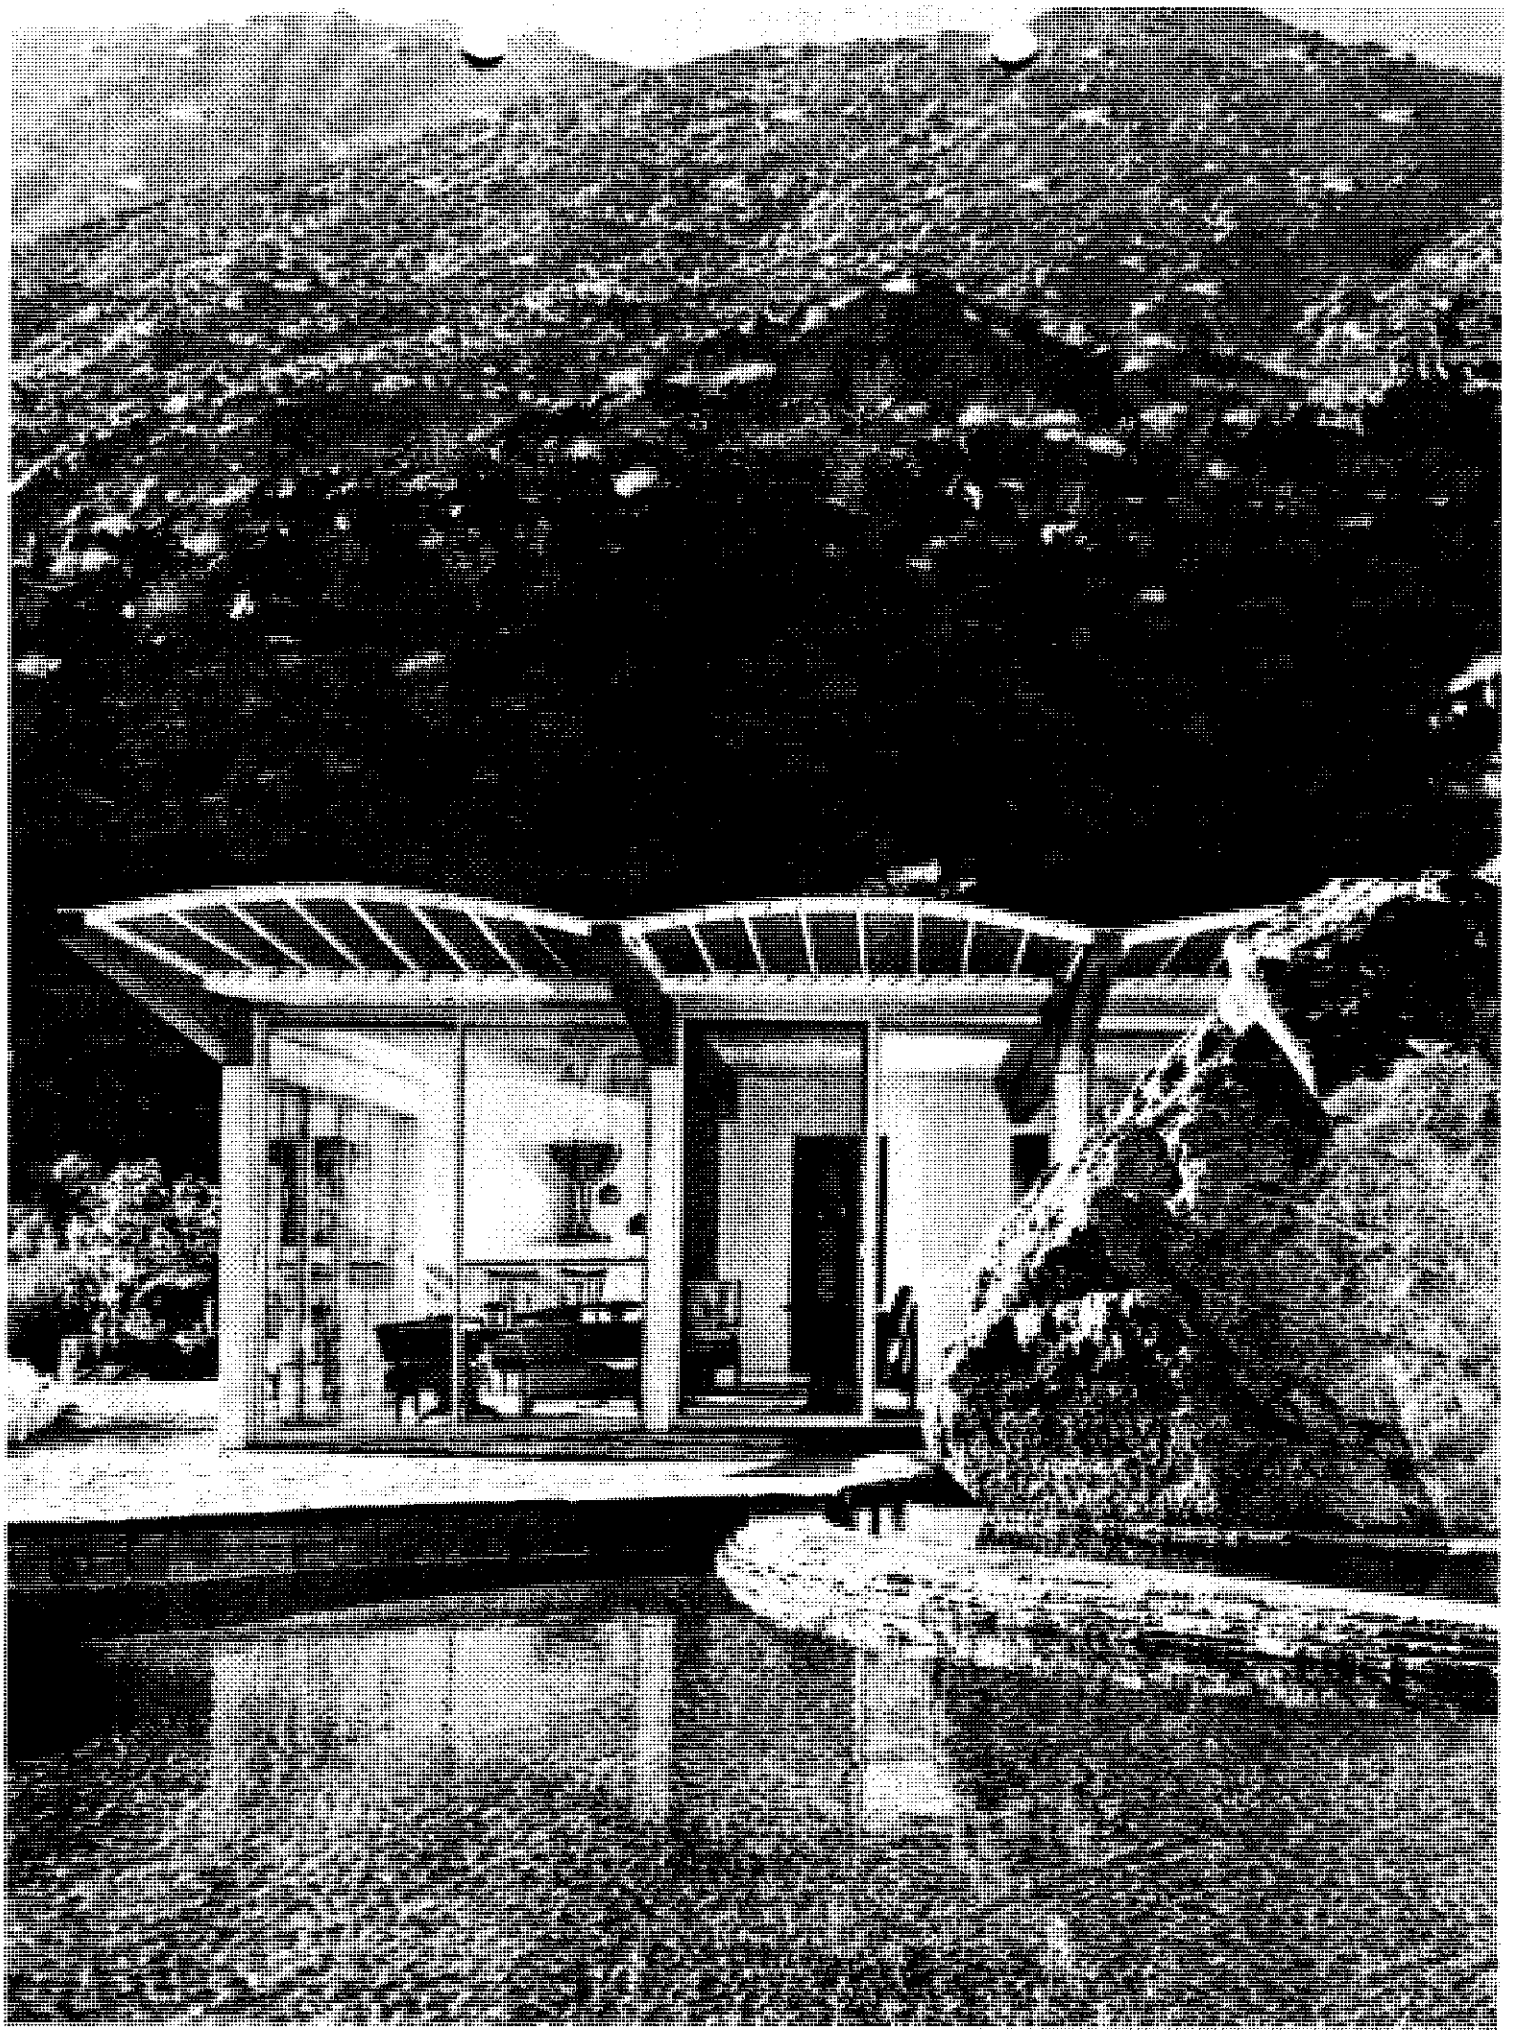
Portrait, page 58: Hugh Kaptur

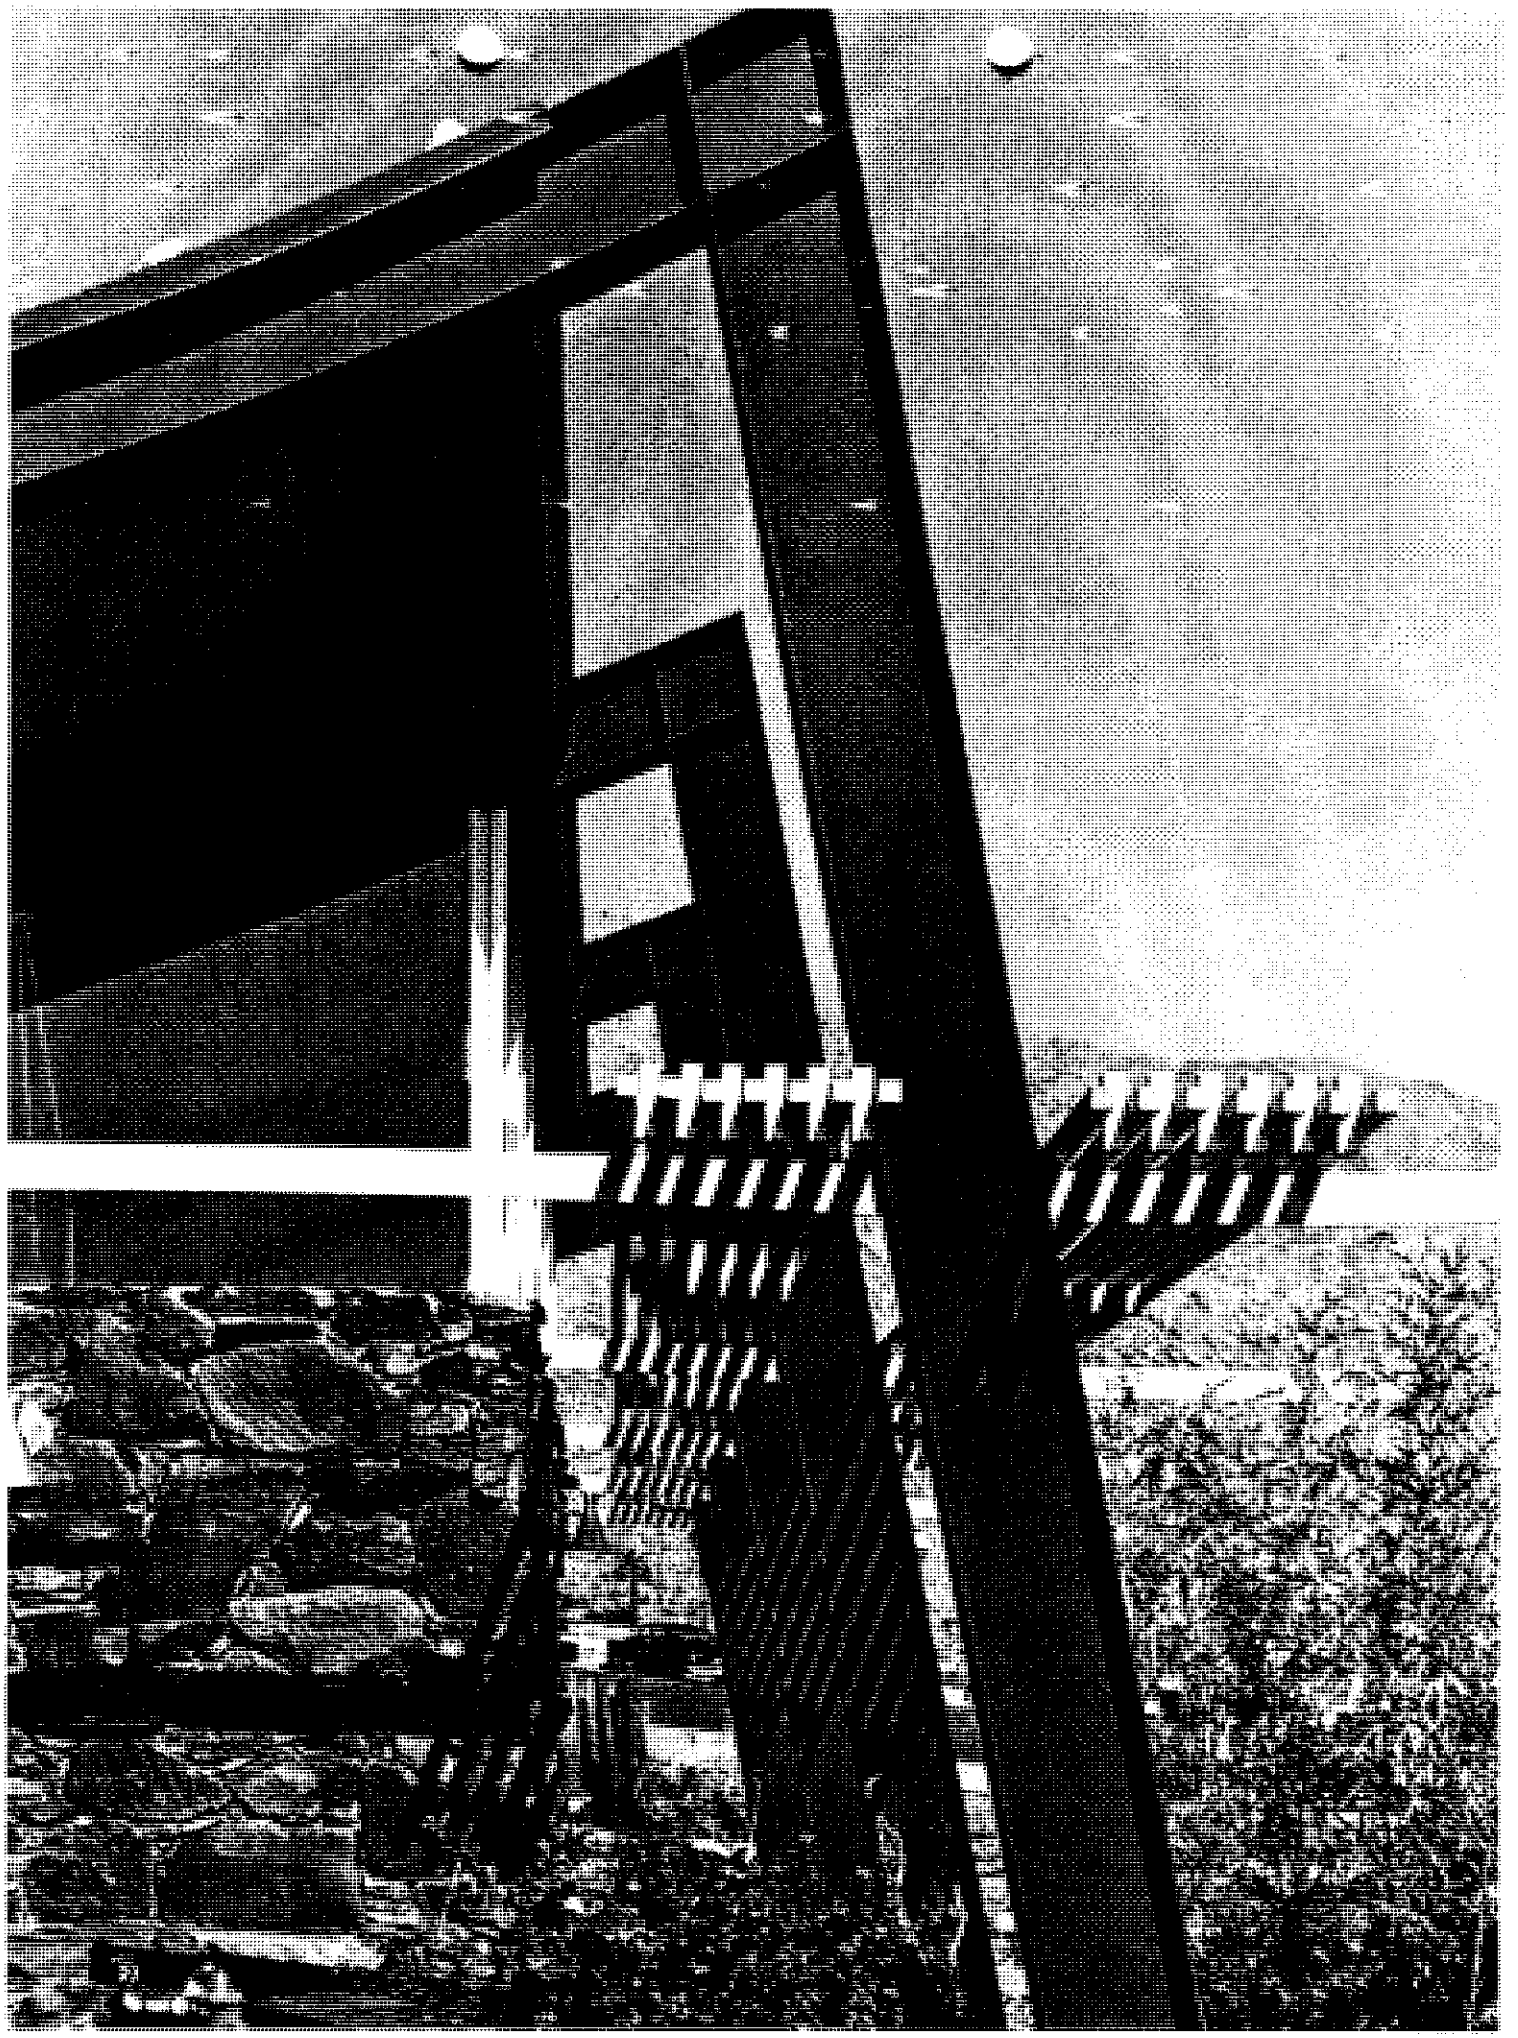
constraint, the Tahquitz buildings manage to look like masonry, due to walls that are sculpted to look as massive as concrete. To further the illusion of thick walls, Kaptur provided the buildings with windows that appear deeply recessed. In other places, windows push outward from the wall surface as if trying to break free of the building. Similar jutting windows can be found at Kaptur's Musicrand Hotel (1967), another building that flirts with the illusion of heavy masonry in the form of a pueblo adobe.

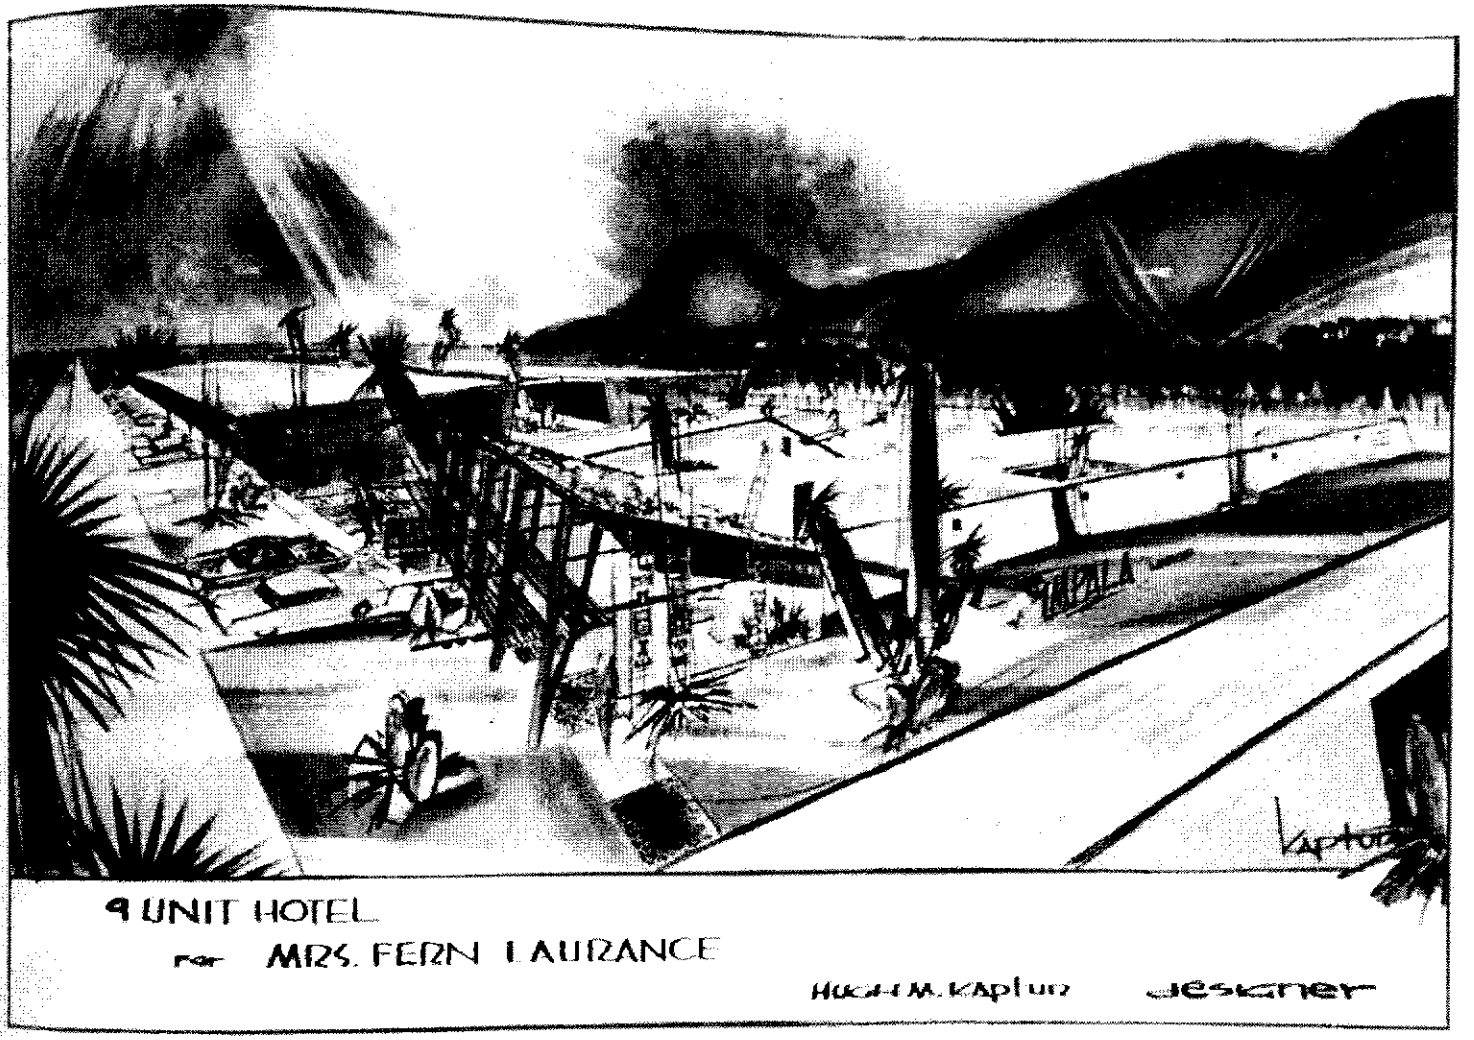
A Detroit native, Hugh Kaptur was born in 1931 to an artistic mother and an automobile design engineer father. After high school, he briefly attended Lawrence Institute of Technology (now known as Lawrence Technological University) in Michigan to study engineering. But at 20, he enrolled in the Marines during the Korean War; he and his young family briefly lived in California before he returned to Michigan so that he could work with his father at GM's design studio while finishing his education. At that point, Kaptur and his family returned to California, this time to the largely undeveloped Palm Springs of the early 1950s. After working briefly for Wexler and Harrison, Kaptur supported himself by making presentation drawings for Donald Wexler, Albert Frey, and others.

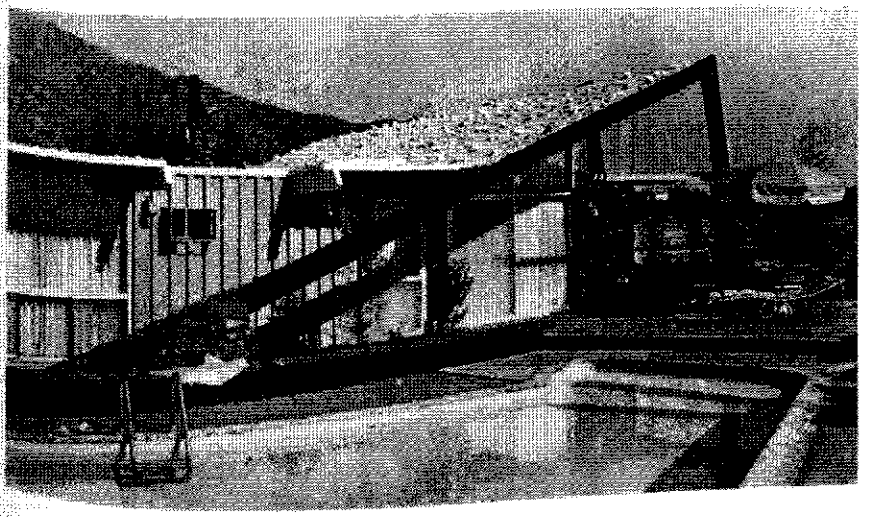
Although Kaptur says he is willing and able to design in any style, sometimes his inner exuberance bubbles to the surface. Commissioned in 1988 to design a conventional home for Joe and Kay Selzer, Kaptur came up with something very different: a lively, hard-to-describe residence comprising a cone-shaped dome set amid other simple geometric shapes that seem to vibrate together. Twenty-five years later, the Selzers report that they are still happy with the unconventional house and they remain friendly with the architect.

The exuberance has survived into the architect's ninth decade. Kaptur is currently designing an addition to an existing home in the form of a circular casita, or guesthouse, separated from the main house by a courtyard. In a nod to the ongoing influence of Frank Lloyd Wright, the addition is to be nestled into the natural contours of the landscape.





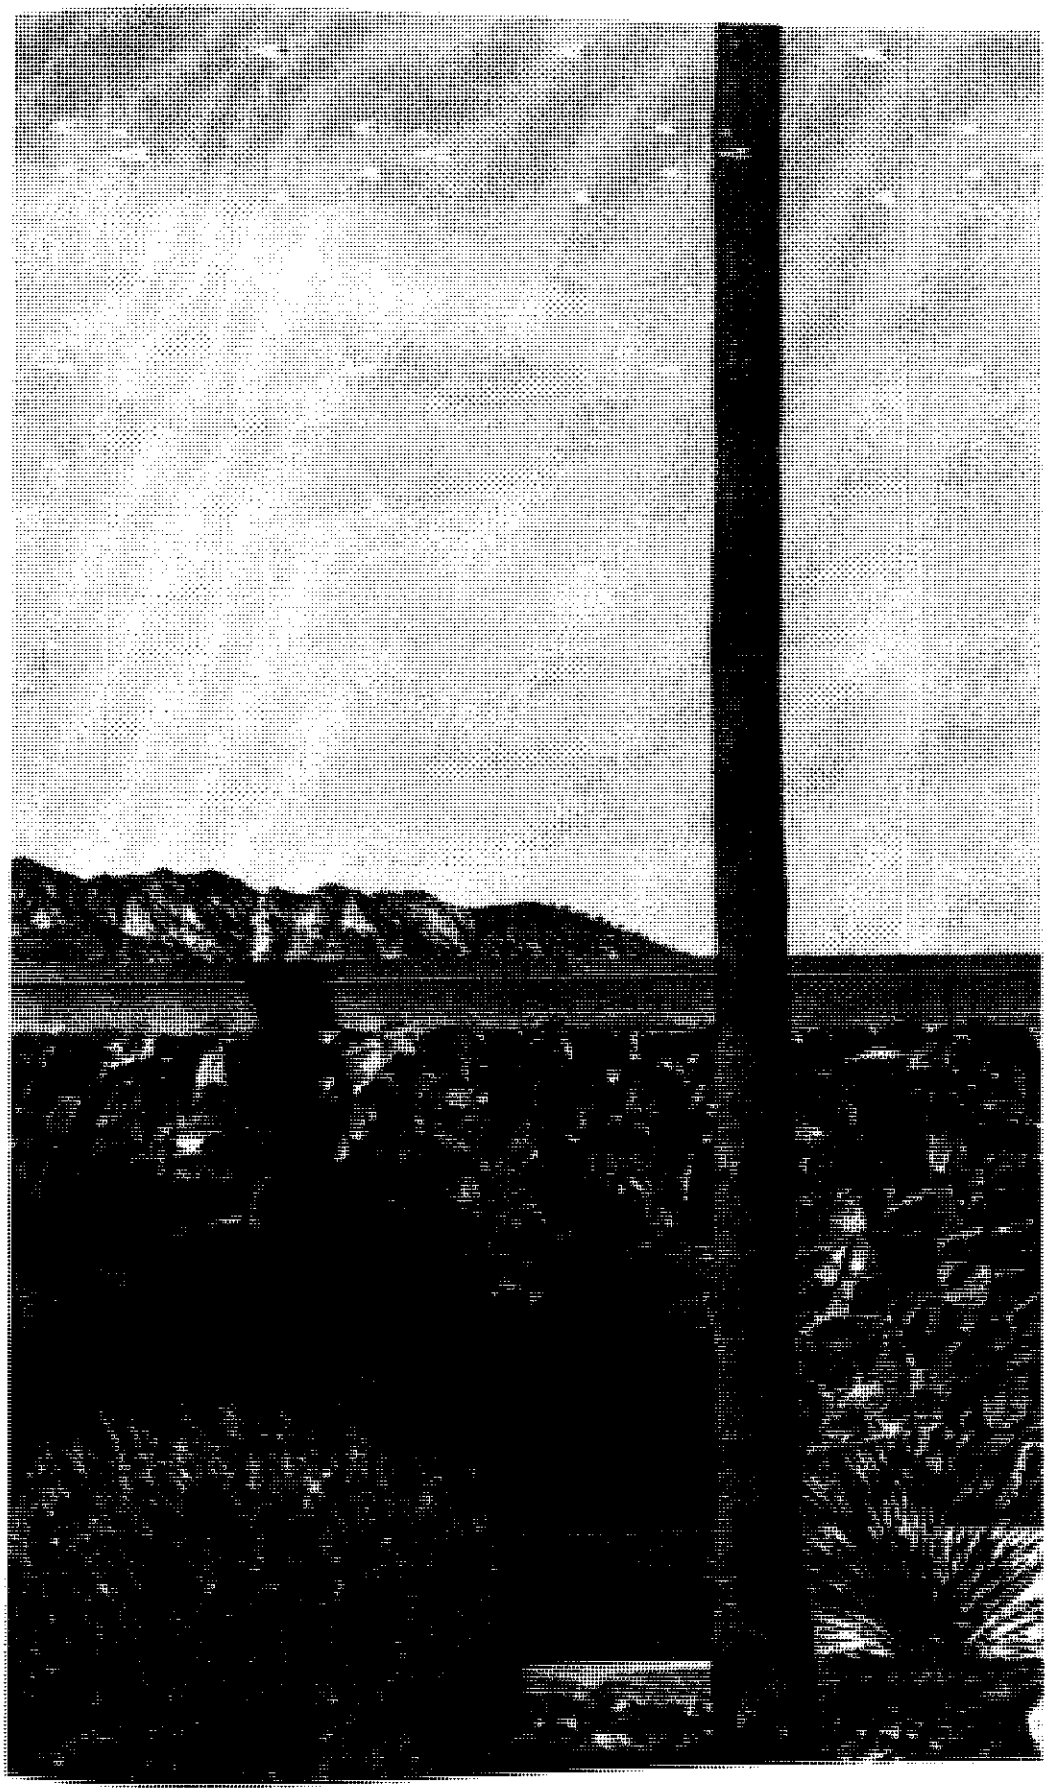




Opposite: This was Kaptur's first Palm Springs building (1957-58), the Imperial Lodge, 555 East Sir Lawrence Road, now the Triangle Inn.

This page, above: Kaptur's imaginative graphic hand.

Left: Kaptur's creative arrangement placed the dramatic steel beams next to the swimming pool. The buttresses remind more than a few guests of spider legs.



Left: Originally named the Palm Springs Golf Course (1959), the Tahquitz Creek Golf Resort, 1965 Golf Club Drive, Palm Springs, sports one of Kaufmann's most arresting facades on its clubhouse, a giant slab of masonry whose swoop captures the arc of a golf swing. The course's proximity to the airport was figured into Kaufmann's roof design, visible from the air. "I wanted [desert visitors] to see something big as they approached from the air," he said.

Honorable Planning Commission

City of Palm Springs

3200 E. Tahquitz Canyon Way

Palm Springs, CA 92263

Dear Members of Planning Commission:

I'm writing to provide some comment about the proposed demolition of the Tahquitz Plaza designed by Hugh Kaptur.

- I am a qualified architectural historian (M.A., Architectural History and Theory, UCLA, 1984) and the author of two books on architecture and the editor of a third.

- I'm also a professional journalist, specializing in real estate, urban design and architecture. My work has appeared widely, including several dozen articles about commercial real estate in The New York Times and Los Angeles Times. I have written extensively on Modern Architecture, historic preservation, public-private projects, zoning and entitlement issues and other topics relating to the design, financing and government approval of buildings.

- I have published three articles about the architecture of Hugh Kaptur, including a chapter in a recently published book of Palm Springs architecture.

Tahquitz Plaza is a landmark building both in the City of Palm Springs and in the career of

Hugh Kaptur. Mr. Kaptur, as you probably know, is one of the luminaries of the "Golden Age" of architecture in the city, having worked in Palm Springs continuously since the 1950s.

Mr. Kaptur has told me this is one of his favorite projects, which seems fitting for a building where he maintained his architectural practice for many years. Although Tahquitz Plaza is not a loud or flashy building, it shows many signs of architectural originality and creativity. One of the themes of Mr. Kaptur's work, and Southern California architecture in general, is the ability of local architects to "make lemonade" when faced with limits both in budget and choice of materials (i.e. the least expensive). I quote one of my own articles on Mr. Kaptur:

"Practical projects, like an office complex on Tahquitz, did not always allow such freedom, yet the comparatively restrained project remains one of the architect's favorites. Originally designed in concrete, cost consideration dictated a less expensive wood frame structure. Despite this constraint the Tahquitz buildings manage to look like masonry, due to walls that are sculptured to look massive as concrete. To further the illusion of thick walls, Kaptur provided the Tahquitz buildings with window that appear to be deeply recessed. In other places, windows push outward from the wall surface, as if trying to break free of the building. Similar out-pushing windows can be found at Kaptur's Musicland Hotel, another building that flirts with the illusion of heavy masonry...."

In my view, the human experience of cities is largely made up by memorable images, structures and spaces that lend a sense of identity to the community. These buildings might be described as the "sina qua non" of any particular city, meaning that without these structures or images, the city would be diminished and lose part of its "sense of place." Every person who is aware of architecture in Palm Springs is still feeling the loss of the Palm Springs Spa Hotel. In my view, the Tahquitz office complex is one of the "sina qua non" buildings of Palm Springs. It is a tasteful, viable building that has been tenanted since its completion. The Tahquitz offices are also part of a trio of Kaptur-designed buildings on either side of the street, which increases both its interest and importance.

At the very least, the Commission should give serious consideration to preserving at least the original building of the complex. Perhaps the City Planning Department can incentivize the developer by granting a density bonus on the remaining portion of the parcel to compensate the developer for any loss of buildable square footage entailed by the preservation of the Tahquitz offices. Additionally, the Planning Department might consider the waiver and/or forgiveness of certain development fees, as a further incentive to preserve the Tahquitz offices. Development is vital for the economic well being of all cities. Equally so is the preservation of buildings that define its character in a positive way. It is my deeply held hope that the Planning Commission will find a way to accommodate both the best interests of both the City and the developer.

Respectfully yours,

Morris Newman

I was quite shocked recently upon hearing the City of Palm Springs is considering a developer's plan to demolish the Hugh Kaptur-designed Tahquitz Plaza. It seems almost inconceivable to me that these buildings, some of the best work of Hugh Kaptur's career, could be lost. Although recognition of Hugh Kaptur's work is coming later than those of his local peers--Albert Frey, E. Stewart WIlliams, Donald Wexler, William Cody and other prominent locals that have made Palm Springs world renowned as a destination for fans of architecture and design and the appreciation of mid century architecture in Palm Springs seems to be the major factor in the revival of the town--Kaptur's work is certainly as important and worthy. His achievements mark the latter end of the mid century era. His work is distinctive, unique and in the case of his pueblo modern design at Tahquitz Plaza highly contextual and specific to stylish Palm Springs. Perhaps his work has not become fully appreciated yet as it is relatively recent when compared to Albert Frey's modern work of the '50s or 60s for instance. That is why Kaptur's complex is threatened to some extent---the work is just now at the cusp of rediscovery---just as Frey's and Williams' and Cody's work was a few years ago.

Hugh Kaptur was a local and made an indelible mark on the landscape of Palm Springs and the City should be very proud and respectful of his work, celebrate and preserve it. It does the City well when it signals to the world the pride it has its achievements and the artistry of its local architects and most of all the appearance and history of the town. It is terrible for the town to be known for allowing demolition of another important building. This estimable canvas that is modern architecture in Palm Springs is economically instrumental and vital now for tourist appeal and more importantly many residents now have chosen to invest in the town and to live here simply because of the great modern architecture we have in our midst..

I urge the City to reconsider any decision which would allow the destruction of this important Kaptur complex, it would be a terrible loss and when it is gone it is gone forever.

I served as a member of the Historic Site Preservation Board in 1995-96. I suspect some of you will recall the firestorm that greeted my nomination of five Frey buildings which included the Tramway Gas Station. A developer wanted to demolish that building soon after designation and quite a controversy erupted. I hope you will agree in hindsight the decision to preserve the building was the correct one. I believe you will feel the same way as time passes and the Tahquitz Plaza is preserved. The complex is inventive, playful, and sophisticated with forms and open areas that best represent not only Kaptur at the top of his game but a true reflection of the state of the best modern architecture in Palm Springs at that period.

My written work about Palm Springs and modernism has appeared in the Los Angeles Times, the New York Times, Vogue, and GQ magazine among others.

I hope you will present my plea before or during the Feb. 25th meeting.

Sincerely,

Brad Dunning

Architect Hugh Kaptur speaks out on Aberdeen Project

Hugh M Kaptur, Special to The Desert Sun 8:51 p.m. PDT April 7, 2015

(Photo: Special to the Desert Sun)

As a former city of Palm Springs planning commissioner, past member of the city's Architectural Advisory Committee and the architect that designed and built Tahquitz Plaza, I feel I am both qualified and obligated to comment on the proposed Aberdeen Project that calls for the demolition of these buildings.

Over the years I have watched many of my professional contemporaries see buildings they were proud of demolished: architect Bill Cody's Huddle Springs comes to mind, as does Stewart Williams' Potter Clinic. Most recently I've seen Don Wexler's high school Administration Building and Spa Hotel colonnade tragically lost.

Now two of my buildings are slated for demolition and a similar unhappy fate. I am particularly proud of the design of Tahquitz Plaza; I had great artistic latitude, as it was to become my offices and I had the opportunity to make an architectural statement. With this creative freedom I designed the architecture to "grow" from the desert floor. I feel these buildings are some of my best work from that period. In fact, the "plaza" won architectural awards in 1979 and 1980.

Aberdeen is a high-density project that overcrowds 74 residential units, 17 live-work units and a cafe space into an eight-acre site. The project is before the city as a Planned Development (PDs), which allows the developer to skirt zoning, parking, setbacks, height and use requirements. PDs were originally intended to create a safety valve that would allow creative projects to be considered by the city and not be overly constrained by the zoning requirements of the area. Unfortunately, developers and the city are using PDs, which should be encouraging architectural excellence, as a way to over develop sites that are out of scale with their surroundings. The Aberdeen Project doesn't fit zoning or the village character of the city and it demolishes four more mid-century buildings.

But demolishing more of our city's architecture is just one of the major shortcomings of the Aberdeen project. Fundamentally, it is the wrong project in the wrong place and creates a dangerous mix of vehicular and pedestrian traffic on Tahquitz Canyon Way. And a row of garage doors along our city's most important thoroughfare just isn't good architecture or good planning and goes against our forefather's vision for the street. This is not just my opinion but also a concern stated by both the city's Architectural Advisory Committee and the Planning Commission, both groups denying the project for these and other failings of the project.

The developer recently presented a revised design that is proposing to retain a quarter of the buildings. I designed the complex as four integrated buildings relating to each other as a single project. Demolishing 75% of the buildings will end that unity and mute the architecture. The developer should be more respectful of Palm Springs's mid-century architecture and build a project where the two can coexist.

The Aberdeen project will soon be reviewed by the city council and I plan to attend. I am humbled that many people have told me they will be at that council meeting too, raising their voice to preserve Tahquitz Plaza. The city council will hear these voices and I hope they will also hear the voices of previous city councils and previous planning commissions and visionaries like Pearl McManus and other forefathers who together had an idea for a city like few others in the world. Their vision for Tahquitz (McCallum) Way is widely known and their intention was to not allow any residential along Tahquitz. The Aberdeen Project now endangers that vision, which is more suitable for a dense urban environment not in a resort town like ours.

The developer has an obligation to provide public benefit to the citizens of Palm Springs. It is impossible to see the public benefit from demolishing more of our iconic architecture. Instead, Nexxus Development should restore and re-purpose Tahquitz Plaza, incorporating it into The Aberdeen, that would be public benefit no one could argue.

Hugh Kaptur is an architect of many midcentury buildings in Palm Springs. He can be reached at hughmkaptur@yahoo.com.

RECEIVED
CITY OF PALM SPRINGS
2015 APR -7 PM 4:34
CITY CLERK

Palm Springs City Council

My name is Hugh Kaptur, I have spent fulltime, the last 60 years of my life living in Palm Springs, earning a living in the field of architecture. In the eighties and nineties I've contributed my time, as a member to the city Architectural Review Board and the Planning Commission. I have a deep respect for you, contributing your time to our great city as well.

Reviewing the Aberdeen project, I have some serious concerns as to the concept that is being presented. They are from a historic standpoint, good planning practices, and personal.

Our forefathers from the fifties envisioned Tahquitz Mccallum to be a grand boulevard connecting the City Airport and the Downtown. Their dream was cemented into the Palm Springs General Plan and Zoning Ordinances along this boulevard. Their plan was high end development along its frontage, to create an impressive avenue for visitors, visiting Palm Springs. To achieve this goal, strict conditions were written into the Zoning Ordinance as to what would be allowed. The Aberdeen project as presented violates all of the conditions set forth in the zoning, including setbacks, heights, density, parking and use. This dream our forefathers had for Palm Springs and Tahquitz Mccallum has been handed down through the years, council to council and respected. In my opinion it is your duty, to continue that legacy, and enforce our General Plan and Zoning Ordinances.

This concept being presented of small cubicles with live workings spaces, is not new, it's been going on for hundreds of years, and under certain conditions works well. The Pacific Coast and other similar areas, where wide boardwalks and several 100 yards of Sandy Beach overlooking the Ocean, it has become particularly popular. These areas draw hundreds if not thousands of vacationers and beachgoers to enjoyed nature's gifts. These areas also have wide barriers separating people from vehicular traffic. Looking at the Aberdeen project at this location none of these demographics are represented.

Let's assume the developers hope comes true, that this use will draw pedestrians, that creates a major planning problem. With its narrow sidewalks and the 40 mph speed limit on Tahquitz with no barrier, separating pedestrians and vehicular traffic, is an accident waiting to happen. Even downtown you have curb parking which separates people from vehicles.

Tahquitz Plaza has become a significant piece of architecture, not that I have designed it, but that the buildings themselves have become part of a heart and soul for iconic architecture in Palm Springs. These buildings are being suggested for CEQA. review. Tahquitz Plaza is included in many of the architectural tours that have made Palm Springs so popular in recent years. According to Palm Springs Life Magazine, modernism week, and yearly architectural tours brings hundreds and hundreds of thousands of dollars of revenues to local hotels, restaurants

and retailers and some of the things which in turn adds to the city tax base.

I'm in hopes this counsel will keep in mind its historic commitment to your predecessors, and not allow the Plan Development process to overrule good planning practices!

Respectfully yours

Hugh M. Kaptur

Palm Springs, California 92262

Dear Mr. Newell,

RE: **ABERDEEN PROJECT INITIAL STUDY MITIGATED NEGATIVE DECLARATION**

Thank you for including the California Office of Historic Preservation (OHP) in the environmental review process for the proposed Aberdeen Project. Pursuant to the National Historic Preservation Act and the California Public Resources Code, the State Historic Preservation Officer (SHPO) and the OHP have broad responsibility for the implementation of federal and state historic preservation programs in California. We have a history working with the City of Palm Springs (Lead Agency) through our Certified Local Government Program. Our comments are offered with the intent of protecting historic and cultural resources, while allowing the City of Palm Springs to meet its program needs. The following comments are based on the information included in the Initial Study/Mitigated Negative Declaration (IS/MND) for the Aberdeen Project.

The proposed project will construct an 8 acre mixed-use development with 74 residential units, and 17 live-work units, with approximately 1,568-square feet of retail space. The project site is partially occupied by the Tahquitz Plaza office complex, which would be demolished as part of the proposed project. In order to adopt the IS/MND as an adequate environmental document the in compliance with CEQA, the decision making body must find that it has adequately addressed environmental impacts. If the document has failed to identify significant environmental impacts, the decision making body should not adopt the findings as adequate.

Pursuant to the city's Municipal Code § 8.05.135, the City's Preservation Board is responsible to "conduct or cause to be conducted such preliminary surveys, studies or investigations as it deems necessary to adequately inform the historic site preservation board and city council prior to public hearing, and shall make available to any interested person the results of any such survey, study or investigation." In keeping with this provision of the municipal code, the City of Palm Springs commissioned a city-wide historic architecture survey. This survey effort is currently ongoing. As part of this survey effort, we understand the Tahquitz Plaza office complex was evaluated and identified as a historical resource. These findings were provided to the Lead Agency as

part of the CEQA comment process in a letter dated February 19, 2015, authored by Alan Hess, a specialist in the field of architectural history.

The discussion of environmental impacts within the IS/MND states that the Tahquitz Plaza office complex is not a historic resources as defined in the CEQA Guidelines § 15064.5 because "[t]he existing buildings are not listed as a state historical resource of significance, nor are the buildings locally listed with the City of Palm Springs." Yet, CEQA Guidelines § 15064.5 (4) states that "[t]he fact that a resource is not listed in, or determined to be eligible for listing in the California Register of Historical Resources, not included in a local register of historical resources, or identified in a historical resources survey does not preclude a lead agency from determining the resource may be a historical resource [for the purposes of CEQA]..." There is no mention in the IS/MND of the ongoing city-wide survey, nor any evaluation of eligibility for the Tahquitz Plaza office complex. In light of the preliminary findings of historical significance described in the Alan Hess letter, we encourage the Lead Agency to act within its discretion, provided in § 15064.5(4) of the CEQA Guidelines, to consider the Tahquitz Plaza office complex as a historic resource for the purposes of CEQA. If the Lead Agency is to consider the Tahquitz Plaza office complex a historic resource, it could not reasonably adopt the findings in the IS/MND as being in compliance with CEQA and adequately addressing significant environmental impacts.

If the Lead Agency chooses to exercise its discretion under § 15064.5(4) of the CEQA Guidelines and treat the Tahquitz Plaza office complex as a historic resource, it may be possible to modify the proposed project to avoid impacts to the historical resources. If the project is modified to avoid demolition, impacts to historic resources could be avoided. In this way, the Lead Agency could modify the IS/MND, and avoid the time and cost involved in preparing an Environmental Impact Report (EIR).

If you have questions, please contact Sean de Courcy of the Local Government and Environmental Compliance Unit, at (916) 445-7042 or at Sean.deCourcy@parks.ca.gov.

Sincerely,

Carol Roland-Nawi, Ph.D.

In light of the preliminary findings of historical significance described in the Alan Hess letter, we encourage the Lead Agency to act within its discretion, provided in § 15064.5(4) of the CEQA Guidelines, to consider the Tahquitz Plaza office complex as a historic resource for the purposes of CEQA. If the Lead Agency is to consider the Tahquitz Plaza office complex a historic resource, it could not reasonably adopt the findings in the IS/MND as being in compliance with CEQA and adequately addressing significant environmental impacts.

If the Lead Agency chooses to exercise its discretion under § 15064.5(4) of the CEQA Guidelines and treat the Tahquitz Plaza office complex as a historic resource, it may be possible to modify the proposed project to avoid impacts to the historical resources. If the project is modified to avoid demolition, impacts to historic resources could be avoided. In this way, the Lead Agency could modify the IS/MND, and avoid the time and cost involved in preparing an Environmental Impact Report (EIR).

If you have questions, please contact Sean de Courcy of the Local Government and Environmental Compliance Unit, at (916) 445-7042 or at Sean.deCourcy@parks.ca.gov.

Sincerely,

Carol Roland-Nawi, Ph.D.

Subject: Aberdeen Project / Historic Ordinance (1969)
Attachments: Chapter 8.05 HISTORIC PRESERVATION.pdf; 2015.02.25 PCSR Preservationist Resumes.pdf

Dear Mr. Fagg:

With kind consideration for the hard work put into this project, I wanted to ask questions about the City's comments given to the Planning Commission at Wednesday's hearing, and make some recommendations. Would you also submit this email (letter) on the record of Aberdeen for inclusion in the staff report for City Council review?

Could you please clarify for me at the hearing with the Planning Commission: (1) what you actually told them regarding continuance and review jurisdiction; and (2) if (on hindsight) you would alter any of those statements.

I did not understand some of the limitations imposed upon review of the historic nature of the building, as you can tell from my comment letter submitted; nor did I understand the limitations on a continuance (in general), or denial of jurisdiction to refer the matter to the HSPB.

Please forgive if any of my understandings are incorrect, my Adobe Flash will not function or allow me to update, so I can't view the video of the proceedings until this is repaired.

Although you may want to respond in writing, I would also welcome a meeting with you or staff to clarify some of this before the City Council hearing on Aberdeen, and I really believe some of the historic preservation folks might be willing to meet as well. It is my impression that the City has always been very generous in resolving issues with the general public through constructive meetings, particularly when an issue reaches this level of controversy:

(1) Continuance: The Planning Commission was told they did not have the option of continuing the matter because of ordinance limitations. May I please know what ordinance or rule or limitation the City was referring to? It was not cited at the hearing. Is there a time limitation running under the Permit Streamlining Act? If so, may I have a sense of that timeline? What the time limitation is, what event triggered its time frame, what date terminates the legal time to review?

I was uncomfortable that "a yes or no vote and nothing else" was the City's adamant position, because the applicant / developer was in the audience demanding this! Nexus (O&M HR, LLC) appeared to be exercising the jurisdiction, rather than the City or the Planning Commission, and this is problematic.

This pressure to move up to City Council has happened in a context where the AAC and the Planning Commission clearly have major problems with this project, as proposed, and have refused to recommend approval.

The fact the City also recently passed an urgency ordinance shortcutting committee and commission review, and an unusual appearance of the City Attorney warning the Commissions / Committees against bias, together

with what appears to be a failure to properly assess historic impacts under CEQA - combines to create pressure that may not be in the best interest of anyone.

I so strongly recommend that this process slow down for public intervention. It is so clear to me the developer has chosen to expedite timewise, rather than spend requisite time on the issue of the historical significance of the Hugh Kaptur buildings.

The obligation of the City is to keep the scope of jurisdiction open during these administrative hearings, so that the record is not truncated.

(2) HSPB Referral: The Planning Commission was told by the City that the ordinance language of the City did not allow the Planning Commission to make a referral back to the Historic Site Preservation Board (HSPB) to determine the buildings' historical significance for purposes of CEQA (Commissioner Weremiuk asked staff about my comment letter on Valley Advocates - and the claim that the HSPB should have reviewed this building as a "discretionary historical resource" under CEQA, with an advisory opinion to the Planning Commission and City Council.)

I believe the City also (somewhat separately) concluded the HSPB did not have jurisdiction to review this building for listing or designation as a local historical resource.

At the hearing you stated that the HSPB is limited to review of buildings constructed on or before 1969, therefore, the matter could not be referred to the HSPB on any basis. Later (I am not sure) -- there may have been a comment that "perhaps there could be a referral," but ultimately the City told the PC this matter could not be delayed or continued, and must go "up" to City Council. Is this, in fact, correct?

On the issue of Aberdeen historic resources (and the Hugh Kaptur buildings), I recommend the City clarify HSPB jurisdiction in four important ways:

(a) whether the ordinances and/or practices of the City grant authority to the HSPB to review CEQA historicity on a demolition permit to advise the AAC, Planning Commission, and City Council on whether the buildings are historical in nature under the CEQA Guidelines for Cultural Resources, and if so, whether the buildings fall within the classification of (a) mandatory; (b) presumptive, or (c) discretionary, for purposes of setting a proper record of decision for CEQA.

(b) associated with Section (a), whether the HSPB has jurisdiction to review and advise whether there is "substantial evidence on the record," given Mr. Hess' testimony and that of others, to conclude that the Hugh Kaptur buildings "meet the criteria for listing on the California Register of Historic Resources"; and

(c) whether, as part of its review, the HSPB has jurisdiction to advise and recommend consideration in the commercial district of adaptive reuse of historic resources (Kaptur buildings) as an environmental alternative to the proposed project, or including any specialized conditions of approval or suggested mitigation and monitoring conditions that might be appropriate for the actual proposed project, if applicable; and

(d) whether an applicant, the City, and/or the HSPB can initiate an application for local listing eligibility during the pending of an application for demolition permit for the historic buildings at issue (with a clear understanding that local listing or local eligibility are NOT germane to the CEQA responsibilities!).

(3) Substantial Evidence of Historicity: Alan Hess is a credentialed historian and nomination expert that stated the following in his letter on file in the Aberdeen project:

"Briefly stated, Kaptur's significance is this: 1) Palm Springs mid century Modern architecture is known for its use of Modern concepts to solve the challenges of climate, function, and new materials; 2) an extraordinary group of talented architects lived or worked in Palm Springs, and while they addressed the same problems they expressed a wide range of aesthetic solutions; 3) Hugh Kaptur's aesthetic is unique in Palm Springs, demonstrating the wide range of fertile innovation in the city.

Tahquitz Plaza is an important and well preserved example of Kaptur's unique approach. Rather than drawing on the rectilinear steel and glass geometries of, for example, Richard Neutra, he draws on organic forms and ideas from the American Southwest, and Frank Lloyd Wright. This is seen in Tahquitz Plaza's irregular roofline, the deep, sculpted, curving frames around windows, the eaves and sun shading features, and the integration of outdoor areas interspersed among the offices. This is a strong piece of design that deserves to remain in place." *Comment Letter of Alan Hess on file, dated February 19, 2015.*

This description, without a doubt, should qualify the Hugh Kaptur buildings for review under CEQA and independently qualify it for consideration as a Class I structure if the application is still timely (and I do not see anything barring that application).

I see nothing in the ordinances that bars qualified public members, HSPB, or City Council from initiating a review or nomination simply because a demolition and PDD permit is in process. I would want to be sure that the City, in its hearing process, has done nothing to discourage the public or HSPB from concluding this application is permissible -- at least not without carefully documenting the legal bar to filing an application.

(4) Distinguish CEQA: Please note through all of this discussion -- my position in my comment letter cites *Valley Advocates* -- there is a vast difference between a request for designation and listing as a local resource, and the requirements of review for CEQA with its informational and mitigation responsibilities!

Without a doubt, the City should have provided a clear record of review to establish whether the Kaptur buildings qualify as a discretionary resource under CEQA Guideline 15064.5 sub (a) (3) & (4). That clearly has not occurred:

"The second sentence of Guidelines section 15064.5, subdivision (a)(3) contains the following mandatory language: "Generally, a resource shall be considered by the lead agency to be `historically significant' *if the resource meets the criteria for listing on the California Register of Historical Resources...."* [15] (Italics added.)" [emphasis added] Valley Advocates at 702-703

Mr. Hess' letter certainly would have raised this issue for environmental consideration. Mr. Hess' analysis and findings, together with the impressive resume and credentials, appear to create substantial evidence on the record for administrative consideration on the building historicity.

Reviewing the Mitigated Negative Declaration proposed for adoption by the City Council, the reasoning appears fatally defective and falls right into the trap of *Valley Advocates.* By CEQA discussion, the City disqualifies the buildings for CEQA historicity as a potentially significant resource ONLY because (quoting the MND).

Discussion of Impacts: a) No Impact. "The existing buildings are not listed as a state historical resource of significance, nor are the buildings locally listed with the City of Palm Springs. No

impacts to historic resources are expected to occur as a result of build out of the proposed project."

I, again, return to the finding of Valley Advocates, invalidated the project permit for insufficient CEQA review and lack of jurisdiction to act:

B. Discretionary Historical Resources

"Prior determinations regarding the listing of a building on a local register are relevant to the presumptive historical resource category, *but prior determinations not to list a building or include it in a survey do not control whether the object or building may be treated as an historical resource under CEQA's discretionary historical resource category.* (See Guidelines, § 15064.5, subd. (a)(3)&(4).)"..... [emphasis added]

"Accordingly, the decision not to list a building on a local register does not necessarily resolve all factual questions and discretionary aspects of the City Council's inquiry into whether the building is an historical resource for purposes of CEQA's discretionary historical resource category." *Valley Advocates* at page 708.

(5) Stay of Demolition: Throughout the entire review period of Aberdeen, the City appears to have always taken (or implied) a public position that it would be null and void for a third party or for any member of HSPB to initiate an application for review and designation of the site for historic significance or listing for these buildings (aside from CEQA). Certainly that is true if they have advised the public that the building must be constructed on or before 1969 to qualify. Can the City now profit (laches) from misleading the public (if, in fact, they have), and preclude the timeliness of an application for listing?

Looking at Ordinance 8.05, it appears to anticipate action by the HSPB during a period when a demolition permit and project review is in progress, for Ordinance 8.05 clearly states:

8.05.170 Stay of demolition.

"At any time after the initiation of proceedings for designation of an historic site or district, the historic site preservation board may, upon its own motion or upon the application of any interested person, *issue an order staying any proposed or threatened demolition* or alteration of the exterior of any structure within or upon such proposed site." [emphasis added]

8.05.166 Initiation of proceedings—National Register.

(a) *The historic site preservation board may initiate proceedings* for designation of an historic site or district or the recommendation of a property for nomination to the National Register by motion, and shall then hold at least one public hearing prior to making a recommendation to the city council.

(b) *The city council may initiate proceedings* for designation of an historic site or district or the recommendation of a property for nomination to the National Register by motion, and shall then refer to the matter to the historic site preservation board for public hearing and recommendation.

(c) Upon final action by the city council recommending a property for nomination to the National Register, the recommendation will be forwarded by appropriate application to the state of California Department of Parks and Recreation. (Ord. 1320 § 7, 1988)

8.05.200 Procedure upon application.

(a) *Upon the filing of an application,* the secretary of the board shall set the matter for review and shall give notice in accordance with the rules of the board. The board shall make its decision within forty-five days from the date the application is filed. If the board fails to act within forty-five days, the application is considered approved unless the applicant and the board agree to an extension of time. [emphasis added]

I am assuming any party may file for an application, as long as they submit the required data, since the ordinance does not specify otherwise.

(6) Brown Act: I did want to alert the City that the posted agenda (notification) for this PC hearing looks problematic to me. It states in the public notice, "O&E HR, LLC, *for the demolition* of an existing *project* and parking area *to construct*.....[project description]" The staff report states, "Recommend the City Council adopt the mitigated negative declaration and *approve the project,* subject to conditions." [emphasis added]

For purposes of adequate public notice on the agenda, I would recommend referring to the underlying permit typology. Approving "a project" doesn't tell us what is being approved. Decision makers approve land use entitlements and the supplemental permits, and often in stages. Where in the description does this say whether this is a PDD, a CUP, a combination, a demolition permit that will be issued before or after project approval? A carefully crafted description answers those questions. The public needs to know whether Planning Commission has final approval or is making a recommendation to the City Council.

(7) Demolition Permit Premature: Frank Tysen raised the issue that it is premature to issue a Demolition Permit when the underlying project has not been approved, and I agree. What will happen if the historical structure is demolished and the subsequent project is denied? It sets up a perfect bias. Once demolished, with an empty lot, impartiality of review cannot be maintained, because the City will be desperate to correct the blight. If demolished ahead of a CEQA determination on the MND (or need for an EIR), the consideration of environmental alternatives is destroyed as an option, and mitigation considerations are truncated or destroyed. This cannot possibly be legal.

This, again, is why public notice must show the action item. Is the demolition permit under review? Who has final authority? What happens to the unresolved PDD and MND?

(8) Valley Advocates Finding: The Fourth District Court of Appeal spoke overtly about the failure to properly instruct the decision making body of their options in classifying the structure as an historic resource. The result of not doing so prejudiced the final election of the body on whether to approve, deny, or refer. I maintain the City has created the same bias through failure to properly instruct the Planning Commission on the option to elect or consider the Kaptur buildings as historic resources, or precluding them from seeking legal advice on this issue, and/or referring the matter for determination to the HSPB. Valley Advocates discusses the issue as such:

> "Instead, the City Council *should have been informed of the following.* First, its prior determination to deny the listing application meant that the Flats did not qualify for CEQA's presumptive historical resource category. [16] Second, *a listing determination and a CEQA determination are not the same thing.* Third, at a minimum, *the City Council had a discretionary election to make at the May 3, 2005, hearing. Specifically, it could elect to separately consider whether the Flats were an historical resource for purposes of CEQA's discretionary historical resources category.* "Because the City Council was misinformed about its discretion to make such an election, it follows that the City Council did not, in fact, exercise its discretion and make such an election." [emphasis added] *Valley Advocates* at page 704.

Because of advice of staff at the Planning Commission hearing, the Planning Commission was denied the full range of opportunities to consider the implications of the Hugh Kaptur buildings as discretionary historical resources.

Thank you so much for your review of this material.

Subject: Aberdeen

I am opposed to the Aberdeen project and encourage the planning commission to DENY approval.
(Planning Commission meeting March 25 ITEM 1.B)
This project is too dense, lacks open spaces, and offers a poorly designed facade along Tahquitz Canyon.

Please deliver a hard copy to each commissioner before today's meeting.

MAR 25 2015

Case # 2A

Wednesday, March 23 2015

To the Honorable Members of the
Palm Springs Planning Commission
City of Palm Springs, California

2A. O & M HR, LLC. (NEXUS DEVELOPMENT CORP.) FOR THE DEMOLITION OF AN EXISTING DEVELOPMENT AND PARKING AREA TO CONSTRUCT "ABERDEEN": A MIXED-USE PROJECT CONSISTING OF (74) ATTACHED AND DETACHED RESIDENTIAL DWELLINGS, (17) LIVE-WORK UNITS AND APPROXIMATELY 1,568-SQUARE FEET OF RETAIL ON 8.05-ACRES LOCATED AT THE NORTHEAST CORNER OF TAHQUITZ CANYON WAY AND CALLE EL SEGUNDO. ZONE REO AND CU (CASE NOS. 5.1361 PD-375, 3.3820 MAJ AND TTM 36876). (DN)

To Whom It May Concern:

I am a resident of the City of Palm Springs, with an active interest in historic preservation, and commitment to the small-town village atmosphere planned for in the City's General Plan. I ask the following of the Planning Commission, but also with a conclusion that these acts of proper environmental consideration are mandated by law:

1. I am asking the City to set aside its finding in the Mitigated Negative Declaration that the project has "no impact" on cultural resources, nor does it "a) Cause a substantial adverse change in the significance of a historical resource as defined in 15064.5."
2. I am asking that the City properly refer this project proposal to the Historic Site Preservation Board (HSPB) for a full report and consideration of whether the two Hugh Captor buildings on the site proposed for demolition is a resource that shall be considered by the lead agency to be 'historically significant' as buildings that meet the criteria for listing on the California Register of Historic Resources. I refer the Planning Commission to the comment letters on file from distinguished members of the preservation community.
3. I am asking that the City make a finding on the historical significance of the Hugh Captor buildings at issue as to whether they qualify as discretionary historic resources. That finding should be informed by the evaluation of the HSPB.
4. I am asking the City to review and revise its findings at page 24 of the Mitigated Negative Declaration "Discussion of Impacts a) No Impact" to reflect that the criteria for a finding of impact reflect CEQA Guidelines 15064.5 subd. (a) (3)&(4).
5. I am asking the City to review and revise its findings in the staff report that concludes there is no historic impact of significance in the decision to demolish the Hugh Captor buildings, because they have never been locally registered or state registered as an historic resource. This language is misleading to the decision makers on this project.
6. I am asking the City to review and revise its findings on impacts to Land Use and Planning in the Mitigated Negative Declaration at page 37, wherein it concludes that the project does not "conflict with any applicable land use plan, policy, or regulation of an agency with jurisdiction over the project, (including but not limited to the general plan, specific plan, ... Or zoning ordinance). Adopted for the purpose of avoiding or mitigating an environmental effect." The Discussion of impacts does not even mention the fact that the development standards are not in compliance with the Specific Plan; nor does it reference the fact the project proposes single-family residential in a Specific Plan area where single-family residential is specifically prohibited! (RA and REO). In fact, the discussion at b) is factually

inaccurate, because it discusses multi-family residential buildout. The factual inaccuracy and lack of consistency has impacted mitigation measures and findings, and these need to be corrected.

7. I am asking the City to properly evaluate and mitigate the impact of eliminating multi-family housing within a Specific Plan area that provides for MFR to the exclusion of SFR, along with the attendant affordable housing impact that might arise from exclusion of MFR housing where it is intended to be built.
8. I am asking the City to conform its findings of consistency with the general plan and specific plan for Section 14, to reflect the actual non-compliance with building standards and housing type. (see previous letters on file by Frank Tysen)
9. Most importantly, I am asking for the City to provide a full EIR evaluation so that the environmental alternative of conserving the Hugh Captor buildings can be properly considered. The MND is fatally defective without this assessment.

Please consider the following language from Valley Advocates v. City of Fresno (2008):

VALLEY ADVOCATES et al, v. CITY OF FRESNO et al.
72 Cal.Rptr.3d 690 (2008) 160 Cal.App.4th 1039

OPINION

. . . . . "We reach the following conclusions. First, at the meeting where City determined the project was exempt from CEQA, it was misinformed about its discretionary authority to determine the buildings were historic resources. *As a result, City cut short its inquiry into the historic significance of the buildings and relied too heavily on its earlier decision not to list the buildings in the local register of historic resources.*" [emphasis added] *Valley Advocates* at page 694.

DISCUSSION . . . . .

I. Background on CEQA's Treatment of Historical Resources

"Section 21084.1 and its implementing Guidelines establish three analytical categories for use in determining whether an object is an historical resource for purposes of CEQA. (See *League for Protection of Oakland, supra*, 52 Cal.App.4th at pp. 906-907, 60 Cal.Rptr.2d 821 [three categories of historical resources identified as mandatory, presumptive and discretionary].)" *Valley Advocates* at page 698

II. Mandatory Historical Resources
A. Applicable Text of CEQA and Guidelines

"The category of mandatory historical resources is based on the second sentence of section 21084.1, which states: 'For purposes of this section, an historical resource is a resource *listed in, or determined to be eligible for listing in, the California Register of Historical Resources.*' [emphasis added]

The Guidelines define the scope of the category of mandatory historical resources by adding one limitation to the text of the second sentence of section 21084.1. Specifically, Guidelines section 15064.5, subdivision (a) (1) provides that "the term `historical resources' shall include ... [¶] ... [a] resource listed in, or determined to be *699 eligible *by the State Historical Resources Commission* [] for listing in[,] the California Register of Historical Resources (Pub. Res.Code § 5024.1, Title 14 CCR, Section 4850 et seq.)." (Italics added.)" *Valley Advocates* at page 698-699

III. Presumptive Historical Resources
A. Applicable Text of CEQA and Guidelines

"The category of presumptive historical resources is created by the third sentence of section 21084.1, which states:

"Historical resources included in a local register of historical resources, as defined in subdivision (k) of Section 5020.1, or deemed significant pursuant to criteria set forth in subdivision (g) of Section 5024.1, are presumed to be historically or culturally significant for purposes of this section, unless the preponderance of the evidence demonstrates that the resource is not historically or culturally significant."

The Guidelines reiterate this definition by stating that "the term `historical resources' shall include ... [¶] ... [a] resource included in a local register of historical resources, as defined in section 5020.1(k) of the Public Resources Code or identified as significant in an historical resource survey meeting the requirements of section 5024.1(g) of the Public Resources Code, shall be presumed to be historically or culturally significant. Public agencies *701 must treat any such resource as significant unless the preponderance of evidence demonstrates that it is not historically or culturally significant." (Guidelines, § 15064.5, subd. (a)(2).)

Under these provisions, there are two types of presumptive historical resources. The first type is a resource included in a local register of historic resources. A "local register of historic resources" is defined as a "list of properties officially designated or recognized as historically significant by a local government pursuant to a local ordinance or resolution." (§ 5020.1, subd. (k).) The second type of presumptive historical resource is a resource identified as significant in certain surveys of historical resources. (§ 5024.1, subd. (g).) The historical resource survey must meet all four of the criteria set forth in section 5024.1, subdivision (g).[8]" *Valley Advocates* at 700-701

IV. Discretionary Historical Resources

A. Text of CEQA

"The category of discretionary historical resources is derived from a combination of *702 the second sentence and the last sentence of section 21084.1.

The text of the second sentence of section 21084.1 states: "For purposes of this section, an historical resource is a resource listed in, or determined to be eligible for listing in, the California Register of Historical Resources." [10]

The last sentence of section 21084.1 states:

"The fact that a resource is not listed in, or determined to be eligible for listing in, the California Register of Historical Resources, not included in a local register of historical resources, or not deemed significant pursuant to criteria set forth in subdivision (g) of Section 5024.1 shall not preclude a lead agency from determining whether the resource may be an historical resource for purposes of this section." *Valley Advocates* at pp. 701-702.

B. Provisions in the Guidelines . . . . .

2. Guidelines section 15064.5, subdivision (a)(3)

"Guidelines section 15064.5, subdivision (a)(3)[13] addresses aspects of a lead agency's *703 *discretionary authority* in two ways. First, it limits what the lead agency is allowed to do. Second, it appears to impose an affirmative obligation on the lead agency. [emphasis added]

The limitation is stated at the beginning of Guidelines section 15064.5, subdivision (a)(3): "Any object [or] building ... which a lead agency determines to be historically significant ... may be considered to be an historical resource, provided the lead agency's determination is supported by substantial evidence in light of the whole record." The Guidelines use the word "may" to identify discretionary authority. (Guidelines, § 15005, subd. (c); see § 15 ["may" defined].) Thus, Guidelines section 15064.5, subdivision (a)(3) confirms the lead agency's discretion to treat an object or building as an historical resource for purposes of CEQA and limits that discretion to situations where substantial evidence supports the lead agency's determination of historical significance.[14]

The second sentence of Guidelines section 15064.5, subdivision (a)(3) contains the following mandatory language: "Generally, a resource *shall* be considered by the lead agency to be `historically significant' if the resource meets the criteria for listing on the California Register of Historical Resources...."[15] (Italics added.) The word "shall" is used in the Guidelines to identify "a mandatory element which all public agencies are required to follow." (Guidelines, § 15005, subd. (a).)" *Valley Advocates* at page 702-703

---

3. Discretionary authority. . . . .

C. Application of Interpretation to Facts of this Case

"The May 3, 2005, staff report that recommended the City Council affirm the issuance of the categorical exemption for the project addressed whether the administrative record contained substantial evidence that the Flats were an historic resource:

'The Subject Building is not a `historic resource' under CEQA because it does not fall into any of the categories within the definition of `historic resource' in CEQA. That is, the Subject Building is not on a State register, it has not been found to be eligible for a State register by the State Historic Preservation Commission, it is not on a local register, and Council has not treated nor chosen to treat the building as historical." (Italics added.)" *Valley Advocates* at p 704

"The staff report, Unruh's advice, and a statement made by an attorney from the city attorney's office misinformed the City Council about its discretion. The City Council was not told that it had a choice to make at the May 3, 2005, hearing. It was told that it already had determined the Flats were not historical resources and that the previous determination answered whether the Flats were historic resources or not.

Instead, the City Council should have been informed of the following. First, its prior determination to deny the listing application meant that the Flats did not qualify for CEQA's presumptive historical resource category.[16] Second, a listing determination and a CEQA determination are not the same thing. Third, at a minimum, the City Council had a discretionary election to make at the May 3, 2005, hearing. Specifically, it could elect to separately consider whether the Flats were an historical resource for purposes of CEQA's discretionary historical resources category.

"Because the City Council was misinformed about its discretion to make such an election, it follows that the City Council did not, in fact, exercise its discretion and make such an election." *Valley Advocates* at page 704.

---

2. Informational errors

"In some contexts presented under CEQA, a prejudicial abuse of discretion occurs when the absence of relevant information precludes informed decision making by the public agency. (E.g., *San Joaquin Raptor Rescue Center v. County of Merced* (2007) 149 Cal.App.4th 645, 653, 57 Cal. Rptr.3d 663.)

This case involves something more than the simple absence of relevant information. *Here, the relevant information was absent and incorrect information was provided in its place."* [emphasis added] *Valley Advocates* at page 705.

B. Discretionary Historical Resources

"Prior determinations regarding the listing of a building on a local register are relevant to the presumptive historical resource category, but prior determinations not to list a building or include it in a survey do not control whether the object or building may be treated as an historical resource under CEQA's discretionary historical resource category. (See Guidelines, § 15064.5, subd. (a)(3)&(4).)".....

"Accordingly, the decision not to list a building on a local register does not necessarily resolve all factual questions and

discretionary aspects of the City Council's inquiry into whether the building is an historical resource for purposes of CEQA's discretionary historical resource category." *Valley Advocates* at page 708.

VII.-IX.[**]
DISPOSITION

"The judgment is reversed. The matter is remanded to the superior court with directions to vacate its order denying the petition for writ of mandate and to enter a new order that grants the petition for writ of mandate and directs City to (1) set aside its approval of the site plan review Application S-04-399, (2) set aside its findings that the proposed project is categorically exempt, and (3) conduct a preliminary review *712 that properly considers the discretionary historical resources category." *Valley Advocates* at page 711-712.

Thank you for your kind consideration.

Judy Deertrack

Advocates for Better Community Development
Palm Springs, California

February 25, 2015

To the Honorable Planning Commission
City of Palm Springs, California

Re: 2A. O & M HR, LLC (NEXUS DEVELOPMENT CORP.) FOR THE DEMOLITION OF AN EXISTING DEVELOPMENT AND PARKING AREA TO CONSTRUCT "ABERDEEN"; A MIXED-USE PROJECT CONSISTING OF (74) ATTACHED AND DETACHED RESIDENTIAL DWELLINGS, (17) LIVE-WORK UNITS AND APPROXIMATELY 1,568-SQUARE FEET OF RETAIL ON 8.05-ACRES LOCATED AT THE NORTHEAST CORNER OF TAHQUITZ CANYON WAY AND CALLE EL SEGUNDO, ZONE REO AND CU (CASE NOS. 5.1361 PD-375, 3.3820 MAJ AND TTM 36876). (DN)

To Whom It May Concern:

On behalf of Advocates for Better Community Planning (ABCD), we are requesting that the Planning Commission recommend denial of the demolition project, Planned Development District 375, Architectural Permit, and Tentative Tract Map based upon a failure of the project to conform to the City's General Plan, the Section 14 Specific Plan, and to conform to the surrounding heights, mass, design, architecture, and function of the surrounding business area. The pending Mitigated Negative Declaration also fails to adequately assess environmental impacts of the proposed demolition project and destruction of an architectural heritage, or HR affordable housing impacts, through failure to consider adaptive re-use, through failure to use multi-family housing in the design, or introduce a viable alternative to the project as proposed – such as adaptive reuse of the current structures.

This project, as proposed, takes a functioning, viable business environment, immediately across from the Regal Theater, and proposes to demolish the design, architecture, and function of the District, and to severely disrupt business functions for most likely a two-year period of time, during a time when the protections of State Redevelopment are defunct, and there is absolutely no evidence of blight in this District -- to the contrary.

Very little has been introduced as a justification for the demolition of existing buildings within a thriving District, and it is a bit frightening to conclude that the City is basically free to do this anywhere within the City, so that a developer can further maximize profit and increase the density and height of a commercial area, and slowly erode the architectural heritage and scale of downtown Palm Springs. This action sets a bad precedent, and needs strong justification – but at the least, it requires a full Environmental Impact Report!

The primary building proposed for demolition is an architectural treasure built by the prominent architect, Hugh Captor. Although Mr. Captor's building was constructed subsequent to 1969, and does not qualify for a Class III historic designation, this is a moot point in terms of its historic value, which can be assessed independently of age. An example of this is the Palm Springs Art Museum (PSAM), a Class I historic resource constructed subsequent to 1969. What has complicated the issue of historic preservation is the rather awesome backlog of buildings awaiting assessment by the City, as the Historic Site Preservation Board is underfunded. Accordingly, it is not surprising the building has not yet been catalogued. But at the least, this building is a treasure and is highly valued by a large and very active segment of the historic preservation population of Palm Springs.

Submitted to
Planning Commission

FEB 25 2015

Case # _____

The applicant is further proceeding in violation of the General Plan and Section 14 Specific Plan standards as follows, and has failed to consider viable environmental alternatives:

1. Table 6-1 of the Section 14 Specific Plan *prohibits* single-family residential buildings within the REO and RA land use classifications. Palm Springs is a charter city, but without doubt, it must comply with the General Plan and Specific Plan *legislative* standards that guide development and build-out.
2. The applicant is using a permit that is not authorized within Chapter 6 Implementation Section of the Section 14 Specific Plan, which limits land use entitlement to permitted uses, land use permits, and conditional use permits. A Planned Development Permit (PD 375) is a rezone action, incompatible with a Specific Plan that has already rezoned the area. *Reference page 6-1 and Table 6-1 of the Section 14 Specific Plan*
3. The applicant then uses the PDD flexibility procedures to justify the imposition of single-family residential within an area where it is expressly prohibited, and alters the development standards of the Specific Plan into a new configuration with greater economic benefit to the developer.
4. The proposed development creates cumulative impacts by destroying further high density residential low-income housing stock, because Section 14 Specific Plan anticipated multi-family residential for renters or low income persons, and the reservation of this housing stock was counted in the City's housing element to meet its allocation of acreage for the Regional Housing Needs Assessment. Instead, through a series of previous permits and this project, the City has slowly replaced the HDR classification with non-permitted single-family residential. They have used their new revised ordinance that eliminates the minimum threshold for residential. This should be evaluated in an Environmental Impact Report, and be considered non-compliance with its Housing Element and General Plan.
5. The Specific Plan was amended to reflect the recent amendment of the City's housing ordinances to eliminate minimum thresholds of density. This leaves the Specific Plan out of compliance with the General Plan and its State housing obligations.
6. The Specific Plan requires a density of 30 du/ac. By proposing 11 du/ac, the applicant violates the General Plan, Specific Plan, and State housing law.
7. The Specific Plan requires a minimum lot size of two acres, and the project lot size is considerably smaller, and it is accordingly, not consistent with the Specific Plan or General Plan.
8. By failure to require a Environmental Impact Report, the City has failed to consider the growth-inducing impacts of demolishing a viable business district and replacing it with a structure that does not conform to the historical character of the area, that does not match its density or form or height, nor does it address adequate housing in the mixed-use residential area. This change in the District may induce further incompatible changes.
9. The Mitigated Negative Declaration was not attached to the staff report, and has not been considered in conjunction with the staff report assessment. Accordingly, the decision makers do not have adequate information about impacts to make a proper recommendation to the City Council. The general public should have been given access in like-kind to the staff report, rather than be forced to make a trip to City Hall and get a non-electronic copy of the Initial Study.
10. The PDD replaces the development standards of the Specific Plan with new housing, new lot size, as a gated community where prohibited, inadequate street fronts, inadequate side, rear and front-yard setbacks, and not the least – an unrealistic examination of the impact of added height to the buildings.

With regard,

Frank Tysen

Mr. Doug Hudson
Chair, Planning Commission
City of Palm Springs
3200 East Tahquitz Canyon Way
Palm Springs, CA 92262

Re: Aberdeen Project and the Proposed Demolition of Tahquitz Plaza (1971, Kaptur & Lapham) (Case Nos. 5.1361 PD-375, 3.3820 and TTM 36876)

Dear Chairman Hudson,

We understand that the Planning Commission will meet on February 25, 2015 to evaluate the merits of "Aberdeen," a mixed-use project consisting of 74 attached and detached residential dwellings, 17 live-work units and approximately 1,568-square feet of retail on 8.05 acres located at the northeast corner of Tahquitz Canyon Way and Calle El Segundo.

Our primary issue with the project is the unnecessary demolition of the architecturally-significant Tahquitz Plaza complex. Further, it is our view that you should not approve this project because it is flawed on many levels and fails to comport with the values and priorities of the city's general plan, historic resources program and sustainability program. The proposed demolition of Tahquitz Plaza directly contradicts many of the city's general plan values and priorities including: "unique architecture" (page 1-12); "Promot[ing] the…use of…existing construction to minimize resource depletion and conserve resources for future generations" (page 1-12); "Creat[ing] unique places that strengthen community identity, offer visual interest, and support lively activity" (page 1-13); "Preserv[ing] and uphold[ing] the high quality of architecture and the unique visual and aesthetic form in buildings…that distinguish Palm Springs from other cities." (page 1-13); and perhaps most to the point, to "Recogniz[ing] the importance of adaptive reuse for architecturally and historically significant resources." (page 1-13).

The importance of the work of architect Hugh Kaptur has only recently become appreciated. He received a star on the Palm Springs Walk of Stars during Modernism Week 2014 and he was the subject of a recent documentary film (*Quiet Elegance: The Architecture of Hugh M. Kaptur*). Additionally, his Tahquitz Plaza complex has been recommended to the contractor currently conducting the city's historic resources survey.

Possible future activities like the historic preservation of the Tahquitz Plaza are cost-effective tools that can be used to leverage private capital, create jobs, revitalize business districts, and stimulate a wide range of other economic activities. Palm Springs property owners, like Nexus Development, can take advantage of federal and state tax credit programs to help rehabilitate historic buildings. Preserving historic character helps promote tourism by providing interesting and unique opportunities for visitors.

While the staff report recommends the approval of this project, that approval is highly "conditioned" and raises a host of issues with the project. Many of these concerns are driven by the unseemly density of the project and the developer's attempt to wring the maximum value out of the site. In perhaps one of the most audacious and surreal examples of developer logic, on page 11 of the staff report Nexus Development claims as a public benefit "The project itself as it enhances an 'underutilized site' in Section 14." Apparently, the elegant and brilliant siting of the architecturally-significant Tahquitz Plaza complex on a main city thoroughfare is viewed by this developer as a waste of land and therefore a detriment to the community.

Finally, we applaud the city's Architectural Advisory Committee's recent decision to unanimously deny this project. In that decision, only the merits of the project were considered by the AAC, not the architectural significance of Tahquitz Plaza. That issue falls more properly under your purview (as stated repeatedly by the city attorney during the AAC's January 26, 2015 meeting). In that regard, we suggest you recommend to the city council consideration of Tahquitz Plaza as a Class 1 historic site. The Tahquitz Plaza complex should easily qualify as an historic site under criterion 8.05.020(a)(3) (as the Tahquitz Plaza exemplifies a particular period in local history, to wit, the rise of modernist architecture in Palm Springs) and criterion 8.05.020(a)(5) (the work of a "master… architect").

If you have any questions please don't hesitate to contact the foundation at 760-837-7117 or info@pspreservationfoundation.org.

Sincerely,

Erik Rosenow
President

Item 2A
Planning Commission Meeting
Date: 2-25-15
Additional Material

Honorable Planning Commission
City of Palm Springs
3200 E. Tahquitz Canyon Way
Palm Springs, CA 92263

Dear Members of Planning Commission:

I'm writing to provide some comment about the proposed demolition of the Tahquitz Plaza designed by Hugh Kaptur.

- I am a qualified architectural historian (M.A., Architectural History and Theory, UCLA, 1984) and the author of two books on architecture and the editor of a third.
- I'm also a professional journalist, specializing in real estate, urban design and architecture. My work has appeared widely, including several dozen articles about commercial real estate in The New York Times and Los Angeles Times. I have written extensively on Modern Architecture, historic preservation, public-private projects, zoning and entitlement issues and other topics relating to the design, financing and government approval of buildings.
- I have published three articles about the architecture of Hugh Kaptur, including a chapter in a recently published book of Palm Springs architecture.

Tahquitz Plaza is a landmark building both in the City of Palm Springs and in the career of Hugh Kaptur. Mr. Kaptur, as you probably know, is one of the luminaries of the "Golden Age" of architecture in the city, having worked in Palm Springs continuously since the 1950s.

Mr. Kaptur has told me this is one of his favorite projects, which seems fitting for a building where he maintained his architectural practice for many years. Although Tahquitz Plaza is not a loud or flashy building, it shows many signs of architectural originality and creativity. One of the themes of Mr. Kaptur's work, and Southern California architecture in general, is the ability of local architects to "make lemonade" when faced with limits both in budget and choice of materials (i.e. the least expensive). I quote one of my own articles on Mr. Kaptur:

"Practical projects, like an office complex on Tahquitz, did not always allow such freedom, yet the comparatively restrained project remains one of the architect's favorites. Originally designed in concrete, cost consideration dictated a less expensive wood frame structure. Despite this constraint the Tahquitz buildings manage to look like masonry, due to walls that are sculptured to look massive as concrete. To further the illusion of thick walls, Kaptur provided the Tahquitz buildings with window that appear to be deeply recessed. In other places, windows push outward from the wall surface, as if trying to break free of the building. Similar out-pushing windows can be found at Kaptur's Musicland Hotel, another building that flirts with the illusion of heavy masonry...."

In my view, the human experience of cities is largely made up by memorable images, structures and spaces that lend a sense of identity to the community. These buildings might be described as the "sina qua non" of any particular city, meaning that without these structures or images, the city would be diminished and lose part of its "sense of place." Every person who is aware of architecture in Palm Springs is still feeling the loss of the Palm Springs Spa Hotel. In my view, the Tahquitz office complex is one of the "sina qua non" buildings of Palm Springs. It is a tasteful, viable building that has been tenanted since its completion. The Tahquitz is also part of a trio of Kaptur-designed buildings on either side of the street, which increases both its interest and importance.

At the very least, the Commission should give serious consideration to preserving at least the original building of the complex, which included Mr. Kaptur's former office. Perhaps the City Planning Department can incentivize the developer by granting a density bonus on the remaining portion of the parcel, to compensate for any loss of buildable square footage that preservation of the Tahquitz offices may entail. Additionally, the Planning Department might consider the waiver and/or forgiveness of certain development fees, as a further incentive to preserve the Tahquitz offices. Development is vital for the economic wellbeing of all cities. Equally so is the preservation of buildings that define its character in a positive way. It is my deeply held hope that the Planning Commission will find a way to accommodate both the best interests of both the City and the developer.

Respectfully yours,
Morris Newman

Additional Material

Planning Commission
City of Palm Springs
3200 E. Tahquitz Canyon Way
Palm Springs, CA 92263

I was quite shocked recently upon hearing the City of Palm Springs is considering a developer's plan to demolish the Hugh Kaptur-designed Tahquitz Plaza. It seems almost inconceivable to me that these buildings, some of the best work of Hugh Kaptur's career, could be lost. Although recognition of Hugh Kaptur's work is coming later than those of his local peers--Albert Frey, E. Stewart WIlliams, Donald Wexler, William Cody and other prominent locals that have made Palm Springs world renowned as a destination for fans of architecture and design and the appreciation of mid century architecture in Palm Springs seems to be the major factor in the revival of the town--Kaptur's work is certainly as important and worthy. His achievements mark the latter end of the mid century era. His work is distinctive, unique and in the case of his pueblo modern design at Tahquitz Plaza highly contextual and specific to stylish Palm Springs. Perhaps his work has not become fully appreciated yet as it is relatively recent when compared to Albert Frey's modern work of the '50s or 60s for instance. That is why Kaptur's complex is threatened to some extent---the work is just now at the cusp of rediscovery---just as Frey's and Williams' and Cody's work was a few years ago.

Hugh Kaptur was a local and made an indelible mark on the landscape of Palm Springs and the City should be very proud and respectful of his work, celebrate and preserve it. It does the City well when it signals to the world the pride it has its achievements and the artistry of its local architects and most of all the appearance and history of the town. It is terrible for the town to be known for allowing demolition of another important building. This estimable canvas that is modern architecture in Palm Springs is economically instrumental and vital now for tourist appeal and more importantly many residents now have chosen to invest in the town and to live here simply because of the great modern architecture we have in our midst..

I urge the City to reconsider any decision which would allow the destruction of this important Kaptur complex, it would be a terrible loss and when it is gone it is gone forever.

I served as a member of the Historic Site Preservation Board in 1995-96. I suspect some of you will recall the firestorm that greeted my nomination of five Frey buildings which included the Tramway Gas Station. A developer wanted to demolish that building soon after designation and quite a controversy erupted. I hope you will agree in hindsight the decision to preserve the building was the correct one. I believe you will feel the same way as time passes and the Tahquitz Plaza is preserved. The complex is inventive, playful, and sophisticated with forms and open areas that best represent not only Kaptur at the top of his game but a true reflection of the state of the best modern architecture in Palm Springs at that period.

My written work about Palm Springs and modernism has appeared in the Los Angeles Times, the New York Times, Vogue, and GQ magazine among others.

I hope you will present my plea before or during the Feb. 25th meeting.

Sincerely,

Brad Dunning

Re: Tahquitz Plaza by architect Hugh Kaptur, Tahquitz Canyon and Calle El Segundo

To the Planning Commission:

I am writing as an architect, historian, and author of nineteen books on Modern architecture to express my support for the preservation of the Tahquitz Plaza office complex because of its historical significance to Palm Springs and California architecture. Please share this letter with the Planning Commissioners prior to their February 25, 2015 meeting.

I have written two books on Palm Springs architecture (*Julius Shulman: Palm Springs*, Rizzoli International, 2008, and *Palm Springs Weekend*, Chronicle Books, 2001) and can say that these buildings, and the work of architect Hugh Kaptur, play an important role in what is now identified as Palm Springs Modernism.

I am also a consultant on architectural history for the current City of Palm Springs architectural survey. I have already unequivocally recommended Tahquitz Plaza as a significant building in that survey.

My resume is attached. I have written on architecture for the *Los Angeles Review of Books, The Architect's Newspaper, The Los Angeles Times, Architectural Digest, the Journal of the Society of Architectural Historians*, and other journals. I have been the architecture critic of the *San Jose Mercury News* since 1986, received a grant from the Graham Foundation for Advanced Studies in the Fine Arts, and was a National Arts Journalism Fellow at Columbia University.

The research of the importance of Palm Springs Modern architecture in general is very recent. Only a decade ago, the work of now-recognized architects such as William Cody, Donald Wexler, Palmer & Krisel, and E. Stewart Williams was not well known

generally; few Modern buildings now considered iconic were identified as historic then. Since then, our understanding of these and other architects has made us aware of the full dimension of Palm Springs architectural history.

As we continue researching this history, it is clear that the work of Hugh Kaptur makes a significant contribution to the unique character of Palm Springs architecture. This opinion is not mine alone; the newly published book *The Desert Modernists: The Architects Who Envisioned Midcentury Modern Palm Springs* (Desert Publications, 2015) and the documentary film *Quiet Elegance: The Architecture of Hugh M. Kaptur* (Bert Simonis, director, 2014) indicate the clear direction of scholarly opinion on Kaptur's importance.

Briefly stated, Kaptur's significance is this: 1) Palm Springs midcentury Modern architecture is known for its use of Modern concepts to solve the challenges of climate, function, and new materials; 2) an extraordinary group of talented architects lived or worked in Palm Springs, and while they addressed the same problems they expressed a wide range of aesthetic solutions; 3) Hugh Kaptur's aesthetic is unique in Palm Springs, demonstrating the wide range of fertile innovation in the city.

Tahquitz Plaza is an important and well preserved example of Kaptur's unique approach. Rather than drawing on the rectilinear steel and glass geometries of, for example, Richard Neutra, he draws on organic forms and ideas from the American Southwest, and Frank Lloyd Wright. This is seen in Tahquitz Plaza's irregular roofline, the deep, sculpted, curving frames around windows, the eaves and sun shading features, and the integration of outdoor areas interspersed among the offices. This is a strong piece of design that deserves to remain in place.

In addition, its site on Tahquitz Canyon places it in the context of the city civic center, an extraordinary collection of Modern buildings serving civic purposes, and rare in the state.

I am writing this letter *pro bono* because historic architecture of this quality adds to the civic character and quality of city life. In the years before Palm Springs' heritage was fully understood, the city lost many significant structures. Unfortunately, this degradation has continued; the demolition of a major Kaptur design would be a loss to history and the city's urban quality.

Sincerely,

Alan Hess

Re: Proposed Demolition of Kaptur Designed Buildings as Part of Aberdeen Project; Case Nos. 5.1361 PD-375, 3.3820 MAJ and TTM 36876.

Dear Mr. Fagg and Mr. Zicaro:

On behalf of the Palm Springs Modern Committee, we write regarding the proposed demolition of two mid-century modern office buildings designed by noted Palm Springs' architect Hugh Kaptur ("Kaptur buildings") as part of the proposed Aberdeen mixed use project ("Project"), which is planned for the northeast corner of Tahquitz Canyon Way and Calle El Segundo. We would like to confirm that the City will not issue demolition permits for the Kaptur buildings prior to the completion of environmental review for the entire Aberdeen Project and final approval of this Project by the City Council.

The applicant's plans and the Architectural Advisory Committee's January 12 and 26, 2015 staff memorandums regarding the Project make clear that demolition of the Kaptur buildings is a necessary first step to developing the Project as proposed by the applicant. Because the demolition would be part of the Aberdeen Project, it is subject to the same environmental review under the California Environmental Quality Act ("CEQA") as the rest of the Project. (CEQA Guidelines § 15378(a).) This is true even though demolition permits on their own may be considered ministerial. "Where a project

involves an approval that contains elements of both a ministerial action and a discretionary action, the project will be deemed to be discretionary and will be subject to the requirements of CEQA." (CEQA Guidelines § 15268(d); see also *Orinda Assn. v. Board of Supervisors* (1986) 182 Cal.App.3d 1145, 1171 ["demolition was a phase of the overall Project; as such, it was subject to the same CEQA review as the rest of the Project, and the demolition permit could not be issued until the entire CEQA process was completed and the overall Project lawfully approved."].) Please let us know if the City agrees it will not issue demolition permits for the Kaptur building until after environmental review for the Aberdeen Project is complete and the City Council has approved the Project.

Additionally, pursuant to the CEQA section 21092.2, we request to receive a copy of all CEQA notices for the Aberdeen Project as they are completed. We also request immediate notice of applications for or approval of demolition permits for the Kaptur buildings and notice of any public hearings or meetings regarding this Project. If possible, we request these notices be sent via email to acm@cbcearthlaw.com.

Thank you for your time and consideration in this matter.

Sincerely,

Amy Minteer
Attorney at Law

ELECTRICAL NOTES

1. Electrician is to provide all necessary plans, specifications, and documents, etc. and obtain all required approvals and permits.
2. Unless otherwise provided by Contractor, electrician is to size and circuit all electrical requirements shown on plans. (i.e. lights, pumps, pool equipment, time clocks, irrigation controllers, etc..) Contractor is to provide as builts.
3. All materials and workmanship shall conform to all Governing Codes and Ordinances and acceptable standards of practice.
4. Coordinate all work, especially sleeving, trenching and backfilling with irrigation, concrete and masonry subcontractors as required.
5. Lighting controllers will be located adjacent to irrigation controllers whenever possible.
6. Electrician is to confirm exact tree location so as to insure proper installation of light fixtures.

SETBACK NOTES

1. Locate light fixtures a min. of 4'-0" from edge of tree.
2. These measurements area superseded only when field conditions warrant change by Landscape Architect.

Parking Study - Hacienda Cantina

The current requirements for a shopping complex that exceeds 20,000 square feet in size are as follows:

Mixed use Developments (with a gross floor area exceeding twenty thousand (20,000) square feet including retail but excepting the C-B-D zone)

One (1) space for each two hundred fifty (250) square feet of gross floor area

Additional parking need not be provided for restaurants provided that, no more than twenty-five (25) percent of the total floor area of the whole complex is devoted to restaurant use

a The percentage of floor area devoted to restaurant uses without additional parking may be increased by the planning commission where it finds that the nature of the use will not require increased parking that other adequate arrangements exist to satisfy the parking demand or that other similar factors exist

87,803 total building s.f. of entire complex

Based on 1 space per 250 s.f. of floor area = 351 spaces required
Currently there are 443 spaces

We propose to remove 44 spaces
We propose to add 2 spaces

There will be a total of 401 spaces when complete
(50 spaces more than required)

LAND USE PERMIT #13-067
CONDITIONS OF APPROVAL

DATE: November 27, 2013

REQUEST: Land Use Permit for musicians and entertainment (subject to provisions of noise ordinance) outside on pool deck; entertainment to include live DJ's and bands with hours of operation for outside pool area to be from 8:00 AM to 6:00 PM seven days a week.

APPLICANT: Miggy's Cantina LLC

LOCATION: 1555 South Palm Canyon Drive

ZONING/ GENERAL PLAN: C-1 / NCC - Section 92.12.01(C)(2)(j) – outdoor musicians and entertainment (subject to provisions of noise ordinance) located on the same property as permitted use allowed with a Land Use Permit.

Before final acceptance of the project, all conditions listed below shall be completed to the satisfaction of the City Engineer, the Director of Planning and Building, the Chief of Police, the Fire Chief, or their designee, depending on which department recommended the condition(s).

Any agreements, easements or covenants required to be entered into shall be in a form approved by the City Attorney.

1. The proposed development of the premises shall conform to all applicable regulations of the Palm Springs Zoning Ordinance, Municipal Code, or any other City Codes, ordinances and resolutions which supplement the zoning district regulations.

2. The owner shall defend, indemnify, and hold harmless the City of Palm Springs, its agents, officers, and employees from any claim, action, or proceeding against the City of Palm Springs or its agents, officers or employees to attach, set aside, void or annul, an approval of the City of Palm Springs, its legislative body, advisory agencies, or administrative officers concerning this Land Use Permit application. The City of Palm Springs will promptly notify the applicant of any such claim, action, or proceeding against the City of Palm Springs and the applicant will either undertake defense of the matter or pay the City's associated legal costs or will advance funds to pay for defense of the matter by the City Attorney. If the City of Palm Springs fails to promptly notify the applicant of any such claim, action or proceeding or fails to cooperate fully in the defense, the applicant shall not, thereafter, be responsible to defend, indemnify, or hold harmless the City of Palm Springs. Notwithstanding the foregoing, the City retains the right to settle or abandon the matter without the applicant's consent but should it do so, the City shall waive the indemnification herein, except, the City's decision to settle or abandon a matter

following an adverse judgment or failure to appeal, shall not cause a waiver of the indemnification rights herein.

3. No architectural approval is granted herein. Any exterior changes of the establishment shall require separate applications and permits.

4. Any exterior signing, including menu boards and temporary signs shall be approved by the Planning Department. Menu boards and portable open signs shall not be permitted within the City right-of-way without a permit and violations will result in issuance of citations and revocation of all permits and agreements.

5. This Land Use Permit authorizes the use of live DJ's and bands providing entertainment outdoor on pool deck.

   Live Entertainment is approved as follows:

   a) Live entertainment shall be limited to the pool deck within the hours of 8:00 AM to 6:00 PM.

   b) Any and all instruments shall have limited amplification.

   c) All amplification equipment shall be placed so that sound is projected toward other commercial properties and roadways away from nearby residential communities.

   d) Noise levels shall be maintained to a level where customers can conduct normal conversation.

   e) All activities shall comply with the provisions of the City's Noise Ordinance.

6. Hours of operation for outdoor pool area to be from 8:00 AM to 6:00 PM seven days a week.

7. This permit does not waive the City's noise ordinance. The business is required to adhere to the following noise levels at all times according to Muni. Code Chap. 11.74.

Ordinance Time of Day	Ordinance dBA Limits
7:00 AM to 6:00 PM	60
6:00 PM to 10:00 PM	55
10:00 PM to 7:00 AM	50

8. All conditions of approval associated with Minor Architectural Application (MAA) Case # 3.111 shall apply including site layout, hardscape, and landscaping.

9. This Land Use Permit recognizes the presence of 401 off-street parking spaces at Plaza del Sol Shopping Center meeting the requirements of Section 93.06.00(D)(19) of the Palm Springs Zoning Code (PSZC) for mixed-use developments over 20,000-square feet.

10. The food service use shall conform to all County of Riverside Department of Health requirements.

11. A business license and any other permits are required.

12. Applicant shall comply with all California Alcohol Beverage Control regulations.

13. This Land Use Permit shall be displayed on-site at all times and made available to City officials upon request.

14. Failure to comply with Municipal Codes, Ordinances, and the conditions of this land use permit may result in revocation of this permit.

ARCHITECTURAL ADVISORY COMMITTEE
STAFF MEMORANDUM

DATE: November 25, 2013

SUBJECT: PLAZA DEL SOL, LLC FOR A MINOR ARCHITECTURAL APPLICATION TO DEVELOP A VACANT AREA ADJACENT TO THE EXISTING RESTAURANT WITH A POOL, LOUNGE AREAS, BAR, RESTROOM AND LANDSCAPING AT THE EXISTING SHOPPING CENTER LOCATED AT 1555 SOUTH PALM CANYON DRIVE, ZONE PD-131 (CASE 3.1111 MAA). (DN)

FROM: Department of Planning Services

On October 21, 2013, the Architectural Advisory Committee reviewed a proposal to develop a vacant pad area adjacent to the existing restaurant building with an outdoor pool, recreation, lounge and bar area at the existing Plaza Del Sol shopping center. The project was tabled with comments and requests, including:

1. Use of Washington Filifera Palms instead of Queen Palms;
2. Use 36-inch box Olive trees in parking lot for shading;
3. Setback wall along Palm Canyon with enhanced landscape;
4. Height of service (bar) structure too tall at ten feet height and should be reduced;
5. Provide additional information on Palm Canyon building / structure elevations, and details of wall finish and articulation;

The plans have been revised as follows:

1. Sheet L-1:
    a. Queen Palms replaced with Washingtonia Robusta (California Fan Palms);
    b. 36-inch box Olive trees proposed in adjacent parking area planters (3 shown – additional will be necessary in remainder of parking lot);
    c. No change to wall location along Palm Canyon Drive;
2. Sheet 2.2: Service bar reduced by one foot in height;
3. Sheets 3.0 and 3.1: Proposed gray colors superimposed on elevations of existing restaurant building;
4. Added Sheet 3.4: Building perspectives from S. Palm Canyon Drive.

RECOMMENDATION:

Recommend approval to the Planning Director, subject to the following:

1. Planters with shade trees shall be incorporated into new parking and existing parking areas west of the proposed development. Specifically, landscape fingers shall be installed every ten spaces and six-foot wide planter diamonds shall be installed ever two to three spaces where possible. Tree species to be Olive species consistent with existing on-site.

CITY OF PALM SPRINGS

CASE NO: 3.1111 MAA

APPLICANT: Plaza Del Sol, LLC

DESCRIPTION:
A proposal to develop a vacant pad area adjacent to the existing restaurant building with an outdoor pool, recreation, lounge and bar area at the existing Plaza Del Sol shopping center, 1555 South Palm Canyon Drive, Zone PD-131 / C-1, Section 22.

COMMITTEE MEMBERS HIRSCHBEIN, SONG AND CHAIR SECOY-JENSEN all said that the current misting system is not acceptable.

M/S/C (Vice Chair Fauber/Purnel, 6-0-1 absent Cassady) To deny

8. **PLAZA DEL SOL, LLC FOR A MINOR ARCHITECTURAL APPLICATION TO DEVELOP A VACANT AREA ADJACENT TO THE EXISTING RESTAURANT WITH A POOL, LOUNGE AREAS, BAR, RESTROOM AND LANDSCAPING AT THE EXISTING SHOPPING CENTER LOCATED AT 1555 SOUTH PALM CANYON DRIVE, ZONE PD-131 (CASE 3.1111 MAA). (DN)**

RUBEN WALTERS, applicant, presented the project.

COMMITTEE MEMBER FREDRICKS said the buildings could blend in better with existing structure. They should not duplicate Queen palms but use Washingtonian filifera instead. The trees in parking lot to be 36" olives.

COMMITTEE MEMBER HIRSCHBEIN said he felt the modern aesthetic was fine; however, they need a significant setback with landscaping outside the street wall; need Palm Canyon elevations.

COMMITTEE MEMBER SONG said the 10' roof is too massive at the sidewalk; need elevations of existing roof; details on wall finish and articulation.

M/S/C (Chair Secoy-Jensen/Fauber, 6-0-1 absent Cassady) To table, applicant to return with amendments upon comments.

COMMITTEE MEMBER COMMENTS:

None.

STAFF MEMBER COMMENTS:

Director Wheeler provided an update on the on-site sign posting requirements.

Director Wheeler announced that there would be no meeting on December 23, 2013.

ARCHITECTURAL ADVISORY COMMITTEE STAFF MEMORANDUM

DATE: October 21, 2013

SUBJECT: PLAZA DEL SOL, LLC FOR A MINOR ARCHITECTURAL APPLICATION TO DEVELOP A VACANT AREA ADJACENT TO THE EXISTING RESTAURANT WITH A POOL, LOUNGE AREAS, BAR, RESTROOM AND LANDSCAPING AT THE EXISTING SHOPPING CENTER LOCATED AT 1555 SOUTH PALM CANYON DRIVE, ZONE PD-131 (CASE 3.1111 MAA). (DN)

FROM: Department of Planning Services

SUMMARY

The Architectural Advisory Committee will review a proposal to develop a vacant pad area adjacent to the existing restaurant building with an outdoor pool, recreation, lounge and bar area at the existing Plaza Del Sol shopping center. Modifications to the existing parking areas are also proposed.

RECOMMENDATION:

Recommend approval to the Planning Director, subject to the following:

1. Planters with shade trees shall be incorporated into new parking and existing parking areas west of the proposed development. Specifically, landscape fingers shall be installed every ten spaces and six-foot wide planter diamonds shall be installed ever two to three spaces where possible. Tree species to be recommended by AAC.

ISSUES:

- Shopping center non-conforming in parking lot shading.

PROPOSED DEVELOPMENT

PROJECT DESCRIPTION:

The applicant proposes to develop the grass area and a portion of the parking area adjacent to the existing restaurant building as follows:

- Construct outdoor recreation area including, pool, lounge chairs, private cabanas, palapa bar, bathrooms and (2) bocce ball courts;
- Surround the proposed recreation area with six-foot high block wall;
- Install wrought-iron fence between pool area and restaurant building walkway;
- Expand the parking area to the vacant, undeveloped dirt area west of the building;
- Re-paint existing restaurant building with gray hues;
- Enhance landscaping around and within proposed recreation area.

ANALYSIS:

General Plan			
Land Use Designation	Floor Area Ratio	Request	Compliance
NCC	0.35 F.A.R.	No change (No usable floor space proposed)	Yes

Zoning – Uses & Lot Standards			
	Zoning Requirements: PD-131 with underlying C-1	Proposed	Compliance
Uses permitted	Restaurant, including accessory uses	Restaurant with outdoor accessory uses (entertainment, recreation, etc.)	Yes, with approval of Land Use Permit
Lot Standards			
Min. Area	20,000 sq. ft.	Existing (17.4 acres)	Yes
Min. Width	100 ft.	Existing (580 ft.)	Yes
Min. Depth	150 ft.	Existing (1,275 ft.)	Yes

Zoning – Building Development Standards			
	Requirements for PD-131 with underlying C-1 Zone	Proposed	Compliance
Building Height	30 ft. maximum	13 ft. maximum	Yes
Yard Setbacks			
Street Frontages	5 ft. from any street frontage	5 ft. to 6 ft. high block wall	Yes
Pool / spas	5 ft. from any property line	65 ft. +	Yes
Distance Between Buildings	No requirement	N/a	N/a
Lot Coverage	No requirement	N/a	N/a
Off-street Parking	Mixed Use Development require 1 parking space per 250 sq. ft. of gross floor area	Parking removed will be replaced on-site	Yes
Trash Enclosure	Required	Existing	Yes

D. *Planning Commission Architectural Advisory Committee Review Guidelines.*

The planning commission architectural advisory committee shall examine the material submitted with the architectural approval application and specific aspects of design shall be examined to determine whether the proposed development will provide desirable environment for its occupants as well as being compatible with the character of adjacent and surrounding developments, and whether aesthetically it is of good composition, materials, textures and colors. Conformance will be evaluated, based on consideration of the following:

Item	Guideline	Conforms?	Staff Evaluation
1	Does the proposed development provide a desirable environment for its occupants?	Yes	Outdoor recreation area will be accessory to restaurant use;
2	Is the proposed development compatible with the character of adjacent and surrounding developments?	Yes	Restaurant building is existing; accessory recreation area located within commercial shopping complex with adequate parking. No impacts to surrounding developments are anticipated;
3	Is the proposed development of good composition, materials, textures, and colors?	Yes	Materials include corrugated metal, concrete block (scored and diamond face), burnt cedar and stucco; colors include white and grays;
4	Site layout, orientation, location of structures and relationship to one another and to open spaces and topography. Definition of pedestrian and vehicular areas; i.e., sidewalks as distinct from parking lot areas	Yes	Pool area will be separated from restaurant with pedestrian walkway and wrought-iron fence;
5	Harmonious relationship with existing and proposed adjoining developments and in the context of the immediate neighborhood/community, avoiding both excessive variety and monotonous repetition, but allowing similarity of style, if warranted	Partial	The proposed structures are a modern design with simple lines and shapes, while the existing restaurant building and remainder of the shopping center were built with in a Spanish Revival theme.

6	Maximum height, area, setbacks and overall mass, as well as parts of any structure (buildings, walls, screens, towers or signs) and effective concealment of all mechanical equipment	Yes	Structures conform to zoning code requirements. No mechanical equipment is proposed;
7	Building design, materials and colors to be sympathetic with desert surroundings	Yes	Shade devices built with corrugated metal;
8	Harmony of materials, colors and composition of those elements of a structure, including overhangs, roofs, and substructures which are visible simultaneously	Yes	Materials and colors used in consistent manor throughout project site;
9	Consistency of composition and treatment	Yes	Composition and treatment consistent throughout;
10	Location and type of planting, with regard for desert climate conditions. Preservation of specimen and landmark trees upon a site, with proper irrigation to insure maintenance of all plant materials	Yes	Trees and plants will be consistent with existing landscape in shopping centers.

DEPARTMENT OF PLANNING SERVICES

MEMORANDUM

DATE: JUNE 24, 2015

TO: CINDY BERARDI, DEPUTY CITY CLERK

FROM: DEBBI ALLEN, DEVELOPMENT SERVICES CONCIERGE

SUBJECT: RECORD REQUEST FOR 1555 PALM CANYON DRIVE SOUTH – HACIENDA CANTINA & BEACH CLUB – Case: 3.1111

BY: Davidl819@yahoo.com

The City of Palm Springs Planning Services Department has attached copies of documents answering the questions asked by Davidl819@yahoo.com in his records request of June 22, 2015.

The Hacienda Cantina – Parking Study for 1555 Palm Canyon Drive South, Palm Springs, CA 92264 lists the entire square footage of the complex (all of the buildings) as 87,803 sf. We have also attached the City of Palm Springs Architectural Advisory Committee Staff Memorandum of November 25, 2013, as well as, the Land Use Permit #13-067 which lists the Conditions of Approval for Miggy's Cantina, LLC – Hacienda Cantina.

Also attached is the Case File 3.1111 for Mr. David's review.

If I may be of any further assistance please do not hesitate to contact me 760-323-8245 Ext 8767.

Parking Study - Hacienda Cantina

The current requirements for a shopping complex that exceeds 20,000 square feet in size are as follows.

Mixed use Developments (with a gross floor area exceeding twenty thousand (20 000) square feet including retail but excluding the C-B-D zone)

One (1) space for each two hundred fifty (250) square feet of gross floor area

Additional parking need not be provided for restaurants provided that, no more than twenty-five (25) percent of the total floor area of the whole complex is devoted to restaurant use

a The percentage of floor area devoted to restaurant uses without additional parking may be increased by the planning commission where it finds that the nature of the use will not require increased parking that other adequate arrangements exist to satisfy the parking demand or that other similar factors exist

87,803 total building s.f. of entire complex

Based on 1 space per 250 s.f. of floor area = 351 spaces required
Currently there are 443 spaces

We propose to remove 44 spaces
We propose to add 2 spaces

There will be a total of 401 spaces when complete
(50 spaces more than required)

LAND USE PERMIT #13-067
CONDITIONS OF APPROVAL

DATE: November 27, 2013

REQUEST: Land Use Permit for musicians and entertainment (subject to provisions of noise ordinance) outside on pool deck; entertainment to include live DJ's and bands with hours of operation for outside pool area to be from 8:00 AM to 6:00 PM seven days a week.

APPLICANT: Miggy's Cantina LLC

LOCATION: 1555 South Palm Canyon Drive

ZONING/ GENERAL PLAN: C-1 / NCC - Section 92.12.01(C)(2)(j) – outdoor musicians and entertainment (subject to provisions of noise ordinance) located on the same property as permitted use allowed with a Land Use Permit.

Before final acceptance of the project, all conditions listed below shall be completed to the satisfaction of the City Engineer, the Director of Planning and Building, the Chief of Police, the Fire Chief, or their designee, depending on which department recommended the condition(s).

Any agreements, easements or covenants required to be entered into shall be in a form approved by the City Attorney.

1. The proposed development of the premises shall conform to all applicable regulations of the Palm Springs Zoning Ordinance, Municipal Code, or any other City Codes, ordinances and resolutions which supplement the zoning district regulations.

2. The owner shall defend, indemnify, and hold harmless the City of Palm Springs, its agents, officers, and employees from any claim, action, or proceeding against the City of Palm Springs or its agents, officers or employees to attach, set aside, void or annul, an approval of the City of Palm Springs, its legislative body, advisory agencies, or administrative officers concerning this Land Use Permit application. The City of Palm Springs will promptly notify the applicant of any such claim, action, or proceeding against the City of Palm Springs and the applicant will either undertake defense of the matter or pay the City's associated legal costs or will advance funds to pay for defense of the matter by the City Attorney. If the City of Palm Springs fails to promptly notify the applicant of any such claim, action or proceeding or fails to cooperate fully in the defense, the applicant shall not, thereafter, be responsible to defend, indemnify, or hold harmless the City of Palm Springs. Notwithstanding the foregoing, the City retains the right to settle or abandon the matter without the applicant's consent but should it do so, the City shall waive the indemnification herein, except, the City's decision to settle or abandon a matter

following an adverse judgment or failure to appeal, shall not cause a waiver of the indemnification rights herein.

3. No architectural approval is granted herein. Any exterior changes of the establishment shall require separate applications and permits.

4. Any exterior signing, including menu boards and temporary signs shall be approved by the Planning Department. Menu boards and portable open signs shall not be permitted within the City right-of-way without a permit and violations will result in issuance of citations and revocation of all permits and agreements.

5. This Land Use Permit authorizes the use of live DJ's and bands providing entertainment outdoor on pool deck.

   Live Entertainment is approved as follows:

   a) Live entertainment shall be limited to the pool deck within the hours of 8:00 AM to 6:00 PM.

   b) Any and all instruments shall have limited amplification.

   c) All amplification equipment shall be placed so that sound is projected toward other commercial properties and roadways away from nearby residential communities.

   d) Noise levels shall be maintained to a level where customers can conduct normal conversation.

   e) All activities shall comply with the provisions of the City's Noise Ordinance.

6. Hours of operation for outdoor pool area to be from 8:00 AM to 6:00 PM seven days a week.

7. This permit does not waive the City's noise ordinance. The business is required to adhere to the following noise levels at all times according to Muni. Code Chap. 11.74.

Ordinance Time of Day	Ordinance dBA Limits
7:00 AM to 6:00 PM	60
6:00 PM to 10:00 PM	55
10:00 PM to 7:00 AM	50

8. All conditions of approval associated with Minor Architectural Application (MAA) Case # 3.111 shall apply including site layout, hardscape, and landscaping.

9. This Land Use Permit recognizes the presence of 401 off-street parking spaces at Plaza del Sol Shopping Center meeting the requirements of Section 93.06.00(D)(19) of the Palm Springs Zoning Code (PSZC) for mixed-use developments over 20,000-square feet.

10. The food service use shall conform to all County of Riverside Department of Health requirements.

11. A business license and any other permits are required.

12. Applicant shall comply with all California Alcohol Beverage Control regulations.

13. This Land Use Permit shall be displayed on-site at all times and made available to City officials upon request.

14. Failure to comply with Municipal Codes, Ordinances, and the conditions of this land use permit may result in revocation of this permit.

ARCHITECTURAL ADVISORY COMMITTEE
STAFF MEMORANDUM

DATE: November 25, 2013

SUBJECT: PLAZA DEL SOL, LLC FOR A MINOR ARCHITECTURAL APPLICATION TO DEVELOP A VACANT AREA ADJACENT TO THE EXISTING RESTAURANT WITH A POOL, LOUNGE AREAS, BAR, RESTROOM AND LANDSCAPING AT THE EXISTING SHOPPING CENTER LOCATED AT 1555 SOUTH PALM CANYON DRIVE, ZONE PD-131 (CASE 3.1111 MAA). (DN)

FROM: Department of Planning Services

On October 21, 2013, the Architectural Advisory Committee reviewed a proposal to develop a vacant pad area adjacent to the existing restaurant building with an outdoor pool, recreation, lounge and bar area at the existing Plaza Del Sol shopping center. The project was tabled with comments and requests, including:

1. Use of Washington Filifera Palms instead of Queen Palms;
2. Use 36-inch box Olive trees in parking lot for shading;
3. Setback wall along Palm Canyon with enhanced landscape;
4. Height of service (bar) structure too tall at ten feet height and should be reduced;
5. Provide additional information on Palm Canyon building / structure elevations, and details of wall finish and articulation;

The plans have been revised as follows:

1. Sheet L-1:
    a. Queen Palms replaced with Washingtonia Robusta (California Fan Palms);
    b. 36-inch box Olive trees proposed in adjacent parking area planters (3 shown – additional will be necessary in remainder of parking lot);
    c. No change to wall location along Palm Canyon Drive;
2. Sheet 2.2: Service bar reduced by one foot in height;
3. Sheets 3.0 and 3.1: Proposed gray colors superimposed on elevations of existing restaurant building;
4. Added Sheet 3.4: Building perspectives from S. Palm Canyon Drive.

RECOMMENDATION:

Recommend approval to the Planning Director, subject to the following:

1. Planters with shade trees shall be incorporated into new parking and existing parking areas west of the proposed development. Specifically, landscape fingers shall be installed every ten spaces and six-foot wide planter diamonds shall be installed ever two to three spaces where possible. Tree species to be Olive species consistent with existing on-site.

CITY OF PALM SPRINGS

CASE NO: 3.1111 MAA

APPLICANT: Plaza Del Sol, LLC

DESCRIPTION:
A proposal to develop a vacant pad area adjacent to the existing restaurant building with an outdoor pool, recreation, lounge and bar area at the existing Plaza Del Sol shopping center, 1555 South Palm Canyon Drive, Zone PD-131 / C-1, Section 22.

COMMITTEE MEMBERS HIRSCHBEIN, SONG AND CHAIR SECOY-JENSEN all said that the current misting system is not acceptable.

M/S/C (Vice Chair Fauber/Burnet, 6-0-1 absent Cassady) To deny.

8. PLAZA DEL SOL, LLC FOR A MINOR ARCHITECTURAL APPLICATION TO DEVELOP A VACANT AREA ADJACENT TO THE EXISTING RESTAURANT WITH A POOL, LOUNGE AREAS, BAR, RESTROOM AND LANDSCAPING AT THE EXISTING SHOPPING CENTER LOCATED AT 1555 SOUTH PALM CANYON DRIVE, ZONE PD-131 (CASE 3.1111 MAA). (DN)

RUBEN WALTERS, applicant, presented the project.

COMMITTEE MEMBER FREDRICKS said the buildings could blend in better with existing structure. They should not duplicate Queen palms but use Washingtonian filifera instead. The trees in parking lot to be 36" olives.

COMMITTEE MEMBER HIRSCHBEIN said he felt the modern aesthetic was fine; however, they need a significant setback with landscaping outside the street wall; need Palm Canyon elevations.

COMMITTEE MEMBER SONG said the 10' roof is too massive at the sidewalk; need elevations of existing roof; details on wall finish and articulation.

M/S/C (Chair Secoy-Jensen/Fauber, 6-0-1 absent Cassady) To table, applicant to return with amendments upon comments.

COMMITTEE MEMBER COMMENTS:

None.

STAFF MEMBER COMMENTS:

Director Wheeler provided an update on the on-site sign posting requirements.

Director Wheeler announced that there would be no meeting on December 23, 2013.

ARCHITECTURAL ADVISORY COMMITTEE STAFF MEMORANDUM

DATE: October 21, 2013

SUBJECT: PLAZA DEL SOL, LLC FOR A MINOR ARCHITECTURAL APPLICATION TO DEVELOP A VACANT AREA ADJACENT TO THE EXISTING RESTAURANT WITH A POOL, LOUNGE AREAS, BAR, RESTROOM AND LANDSCAPING AT THE EXISTING SHOPPING CENTER LOCATED AT 1555 SOUTH PALM CANYON DRIVE, ZONE PD-131 (CASE 3.1111 MAA). (DN)

FROM: Department of Planning Services

SUMMARY

The Architectural Advisory Committee will review a proposal to develop a vacant pad area adjacent to the existing restaurant building with an outdoor pool, recreation, lounge and bar area at the existing Plaza Del Sol shopping center. Modifications to the existing parking areas are also proposed.

RECOMMENDATION:

Recommend approval to the Planning Director, subject to the following:

1. Planters with shade trees shall be incorporated into new parking and existing parking areas west of the proposed development. Specifically, landscape fingers shall be installed every ten spaces and six-foot wide planter diamonds shall be installed ever two to three spaces where possible. Tree species to be recommended by AAC.

ISSUES:

- Shopping center non-conforming in parking lot shading.

PROPOSED DEVELOPMENT

PROJECT DESCRIPTION:

The applicant proposes to develop the grass area and a portion of the parking area adjacent to the existing restaurant building as follows:

- Construct outdoor recreation area including, pool, lounge chairs, private cabanas, palapa bar, bathrooms and (2) bocce ball courts;
- Surround the proposed recreation area with six-foot high block wall;
- Install wrought-iron fence between pool area and restaurant building walkway;
- Expand the parking area to the vacant, undeveloped dirt area west of the building;
- Re-paint existing restaurant building with gray hues;
- Enhance landscaping around and within proposed recreation area.

ANALYSIS:

General Plan			
Land Use Designation	**Floor Area Ratio**	**Request**	**Compliance**
NCC	0.35 F.A.R.	No change (No usable floor space proposed)	Yes

Zoning – Uses & Lot Standards			
	Zoning Requirements: PD-131 with underlying C-1	**Proposed**	**Compliance**
Uses permitted	Restaurant, including accessory uses	Restaurant with outdoor accessory uses (entertainment, recreation, etc.)	Yes, with approval of Land Use Permit
Lot Standards			
Min. Area	20,000 sq. ft.	Existing (17.4 acres)	Yes
Min. Width	100 ft.	Existing (580 ft.)	Yes
Mo. Depth	150 ft.	Existing (1,275 ft.)	Yes

Zoning – Building Development Standards			
	Requirements for PD-131 with underlying C-1 Zone	**Proposed**	**Compliance**
Building Height	30 ft. maximum	13 ft. maximum	Yes
Yard Setbacks			
Street Frontages	5 ft. from any street frontage	5 ft. to 6 ft. high block wall	Yes
Pool / spas	5 ft. from any property line	65 ft. +	Yes
Distance Between Buildings	No requirement	N/a	N/a
Lot Coverage	No requirement	N/a	N/a
Off-street Parking	Mixed Use Development require 1 parking space per 250 sq. ft. of gross floor area	Parking removed will be replaced on-site	Yes
Trash Enclosure	Required	Existing	Yes

D. Planning Commission Architectural Advisory Committee Review Guidelines.

The planning commission architectural advisory committee shall examine the material submitted with the architectural approval application and specific aspects of design shall be examined to determine whether the proposed development will provide desirable environment for its occupants as well as being compatible with the character of adjacent and surrounding developments, and whether aesthetically it is of good composition, materials, textures and colors. Conformance will be evaluated, based on consideration of the following:

Item	Guideline	Conforms?	Staff Evaluation
1	Does the proposed development provide a desirable environment for its occupants?	Yes	Outdoor recreation area will be accessory to restaurant use;
2	Is the proposed development compatible with the character of adjacent and surrounding developments?	Yes	Restaurant building is existing; accessory recreation area located within commercial shopping complex with adequate parking. No impacts to surrounding developments are anticipated;
3	Is the proposed development of good composition, materials, textures, and colors?	Yes	Materials include corrugated metal, concrete block (scored and diamond face), burnt cedar and stucco; colors include white and grays;
4	Site layout, orientation, location of structures and relationship to one another and to open spaces and topography. Definition of pedestrian and vehicular areas; i.e., sidewalks as distinct from parking lot areas	Yes	Pool area will be separated from restaurant with pedestrian walkway and wrought-iron fence;
5	Harmonious relationship with existing and proposed adjoining developments and in the context of the immediate neighborhood/community, avoiding both excessive variety and monotonous repetition, but allowing similarity of style, if warranted	Partial	The proposed structures are a modern design with simple lines and shapes, while the existing restaurant building and remainder of the shopping center were built with in a Spanish Revival theme.

6	Maximum height, area, setbacks and overall mass, as well as parts of any structure (buildings, walls, screens, towers or signs) and effective concealment of all mechanical equipment	Yes	Structures conform to zoning code requirements. No mechanical equipment is proposed;
7	Building design, materials and colors to be sympathetic with desert surroundings	Yes	Shade devices built with corrugated metal;
8	Harmony of materials, colors and composition of those elements of a structure, including overhangs, roofs, and substructures which are visible simultaneously	Yes	Materials and colors used in consistent manor throughout project site;
9	Consistency of composition and treatment	Yes	Composition and treatment consistent throughout;
10	Location and type of planting, with regard for desert climate conditions. Preservation of specimen and landmark trees upon a site, with proper irrigation to insure maintenance of all plant materials	Yes	Trees and plants will be consistent with existing landscape in shopping centers.

Parking Study - Hacienda Cantina

The current requirements for a shopping complex that exceeds 20,000 square feet in size are as follows:

Mixed use Developments (with a gross floor area exceeding twenty thousand (20,000) square feet including retail but excepting the C-B-D zone)

One (1) Space for each two hundred fifty (250) square feet of gross floor area

Additional parking need not be provided for restaurants provided that, no more than twenty-five (25) percent of the total floor area of the whole complex is devoted to restaurant use

a The percentage of floor area devoted to restaurant uses without additional parking may be increased by the planning commission where it finds that the nature of the use will not require increased parking that other adequate arrangements exist to satisfy the parking demand or that other similar factors exist

87,803 total building s.f. of entire complex

Based on 1 space per 250 s.f. of floor area = 351 spaces required
Currently there are 443 spaces

We propose to remove 44 spaces
We propose to add 2 spaces

There will be a total of 401 spaces when complete
(50 spaces more than required)

ARCHITECTURAL ADVISORY COMMITTEE
STAFF MEMORANDUM

DATE: November 25, 2013

SUBJECT: PLAZA DEL SOL, LLC FOR A MINOR ARCHITECTURAL APPLICATION TO DEVELOP A VACANT AREA ADJACENT TO THE EXISTING RESTAURANT WITH A POOL, LOUNGE AREAS, BAR, RESTROOM AND LANDSCAPING AT THE EXISTING SHOPPING CENTER LOCATED AT 1555 SOUTH PALM CANYON DRIVE, ZONE PD-131 (CASE 3.1111 MAA). (DN)

FROM: Department of Planning Services

On October 21, 2013, the Architectural Advisory Committee reviewed a proposal to develop a vacant pad area adjacent to the existing restaurant building with an outdoor pool, recreation, lounge and bar area at the existing Plaza Del Sol shopping center. The project was tabled with comments and requests, including:

1. Use of Washington Filifera Palms instead of Queen Palms;
2. Use 36-inch box Olive trees in parking lot for shading;
3. Setback wall along Palm Canyon with enhanced landscape;
4. Height of service (bar) structure too tall at ten feet height and should be reduced;
5. Provide additional information on Palm Canyon building / structure elevations, and details of wall finish and articulation;

The plans have been revised as follows:

1. Sheet L-1:
    a. Queen Palms replaced with Washingtonia Robusta (California Fan Palms);
    b. 36-inch box Olive trees proposed in adjacent parking area planters (3 shown – additional will be necessary in remainder of parking lot);
    c. No change to wall location along Palm Canyon Drive;
2. Sheet 2.2: Service bar reduced by one foot in height;
3. Sheets 3.0 and 3.1: Proposed gray colors superimposed on elevations of existing restaurant building;
4. Added Sheet 3.4: Building perspectives from S. Palm Canyon Drive.

RECOMMENDATION:

Recommend approval to the Planning Director, subject to the following:

1. Planters with shade trees shall be incorporated into new parking and existing parking areas west of the proposed development. Specifically, landscape fingers shall be installed every ten spaces and six-foot wide planter diamonds shall be installed ever two to three spaces where possible. Tree species to be Olive species consistent with existing on-site.

CITY OF PALM SPRINGS

CASE NO: 3.1111 MAA

APPLICANT: Plaza Del Sol, LLC

DESCRIPTION:
A proposal to develop a vacant pad area adjacent to the existing restaurant building with an outdoor pool, recreation, lounge and bar area at the existing Plaza Del Sol shopping center, 1555 South Palm Canyon Drive, Zone PD-131 / C-1, Section 22.

COMMITTEE MEMBERS HIRSCHBEIN, SONG AND CHAIR SECOY-JENSEN all said that the current misting system is not acceptable.

M/S/C (Vice Chair Fauber/Purnel, 6-0-1 absent Cassady) To deny.

8. **PLAZA DEL SOL, LLC FOR A MINOR ARCHITECTURAL APPLICATION TO DEVELOP A VACANT AREA ADJACENT TO THE EXISTING RESTAURANT WITH A POOL, LOUNGE AREAS, BAR, RESTROOM AND LANDSCAPING AT THE EXISTING SHOPPING CENTER LOCATED AT 1555 SOUTH PALM CANYON DRIVE, ZONE PD-131 (CASE 3.1111 MAA). (DN)**

RUBEN WALTERS, applicant, presented the project.

COMMITTEE MEMBER FREDRICKS said the buildings could blend in better with existing structure. They should not duplicate Queen palms but use Washingtonian filifera instead. The trees in parking lot to be 36" olives.

COMMITTEE MEMBER HIRSCHBEIN said he felt the modern aesthetic was fine; however, they need a significant setback with landscaping outside the street wall; need Palm Canyon elevations.

COMMITTEE MEMBER SONG said the 10' roof is too massive at the sidewalk; need elevations of existing roof; details on wall finish and articulation.

M/S/C (Chair Secoy-Jensen/Fauber, 6-0-1 absent Cassady) To table, applicant to return with amendments upon comments.

COMMITTEE MEMBER COMMENTS:

None.

STAFF MEMBER COMMENTS:

Director Wheeler provided an update on the on-site sign posting requirements.

Director Wheeler announced that there would be no meeting on December 23, 2013.

ARCHITECTURAL ADVISORY COMMITTEE STAFF MEMORANDUM

DATE: October 21, 2013

SUBJECT: PLAZA DEL SOL, LLC FOR A MINOR ARCHITECTURAL APPLICATION TO DEVELOP A VACANT AREA ADJACENT TO THE EXISTING RESTAURANT WITH A POOL, LOUNGE AREAS, BAR, RESTROOM AND LANDSCAPING AT THE EXISTING SHOPPING CENTER LOCATED AT 1555 SOUTH PALM CANYON DRIVE, ZONE PD-131 (CASE 3.1111 MAA). (DN)

FROM: Department of Planning Services

SUMMARY

The Architectural Advisory Committee will review a proposal to develop a vacant pad area adjacent to the existing restaurant building with an outdoor pool, recreation, lounge and bar area at the existing Plaza Del Sol shopping center. Modifications to the existing parking areas are also proposed.

RECOMMENDATION:

Recommend approval to the Planning Director, subject to the following:

1. Planters with shade trees shall be incorporated into new parking and existing parking areas west of the proposed development. Specifically, landscape fingers shall be installed every ten spaces and six-foot wide planter diamonds shall be installed ever two to three spaces where possible. Tree species to be recommended by AAC.

ISSUES:

- Shopping center non-conforming in parking lot shading.

PROPOSED DEVELOPMENT

PROJECT DESCRIPTION:

The applicant proposes to develop the grass area and a portion of the parking area adjacent to the existing restaurant building as follows:

- Construct outdoor recreation area including, pool, lounge chairs, private cabanas, palapa bar, bathrooms and (2) bocce ball courts;
- Surround the proposed recreation area with six-foot high block wall;
- Install wrought-iron fence between pool area and restaurant building walkway;
- Expand the parking area to the vacant, undeveloped dirt area west of the building;
- Re-paint existing restaurant building with gray hues;
- Enhance landscaping around and within proposed recreation area.

ANALYSIS:

General Plan			
Land Use Designation	**Floor Area Ratio**	**Request**	**Compliance**
NCC	0.35 F.A.R.	No change (No usable floor space proposed)	Yes

Zoning – Uses & Lot Standards			
	Zoning Requirements: PD-131 with underlying C-1	**Proposed**	**Compliance**
Uses permitted	Restaurant, including accessory uses	Restaurant with outdoor accessory uses (entertainment, recreation, etc.)	Yes, with approval of Land Use Permit
Lot Standards			
Min. Area	20,000 sq. ft.	Existing (17.4 acres)	Yes
Min. Width	100 ft.	Existing (580 ft.)	Yes
Min. Depth	150 ft.	Existing (1,275 ft.)	Yes

Zoning – Building Development Standards			
	Requirements for PD-131 with underlying C-1 Zone	**Proposed**	**Compliance**
Building Height	30 ft. maximum	13 ft. maximum	Yes
Yard Setbacks			
Street Frontages	5 ft. from any street frontage	5 ft. to 6 ft. high block wall	Yes
Pool / spas	5 ft. from any property line	65 ft. +	Yes
Distance Between Buildings	No requirement	N/a	N/a
Lot Coverage	No requirement	N/a	N/a
Off-street Parking	Mixed Use Development require 1 parking space per 250 sq. ft. of gross floor area	Parking removed will be replaced on-site	Yes
Trash Enclosure	Required	Existing	Yes

D. Planning Commission Architectural Advisory Committee Review Guidelines.

The planning commission architectural advisory committee shall examine the material submitted with the architectural approval application and specific aspects of design shall be examined to determine whether the proposed development will provide desirable environment for its occupants as well as being compatible with the character of adjacent and surrounding developments, and whether aesthetically it is of good composition, materials, textures and colors. Conformance will be evaluated, based on consideration of the following:

Item	Guideline	Conforms?	Staff Evaluation
1	Does the proposed development provide a desirable environment for its occupants?	Yes	Outdoor recreation area will be accessory to restaurant use;
2	Is the proposed development compatible with the character of adjacent and surrounding developments?	Yes	Restaurant building is existing; accessory recreation area located within commercial shopping complex with adequate parking. No impacts to surrounding developments are anticipated;
3	Is the proposed development of good composition, materials, textures, and colors?	Yes	Materials include corrugated metal, concrete block (scored and diamond face), burnt cedar and stucco; colors include white and grays;
4	Site layout, orientation, location of structures and relationship to one another and to open spaces and topography. Definition of pedestrian and vehicular areas; i.e., sidewalks as distinct from parking lot areas	Yes	Pool area will be separated from restaurant with pedestrian walkway and wrought-iron fence;
5	Harmonious relationship with existing and proposed adjoining developments and in the context of the immediate neighborhood/community, avoiding both excessive variety and monotonous repetition, but allowing similarity of style, if warranted	Partial	The proposed structures are a modern design with simple lines and shapes, while the existing restaurant building and remainder of the shopping center were built with in a Spanish Revival theme.

6	Maximum height, area, setbacks and overall mass, as well as parts of any structure (buildings, walls, screens, towers or signs) and effective concealment of all mechanical equipment	Yes	Structures conform to zoning code requirements. No mechanical equipment is proposed;
7	Building design, materials and colors to be sympathetic with desert surroundings	Yes	Shade devices built with corrugated metal;
8	Harmony of materials, colors and composition of those elements of a structure, including overhangs, roofs, and substructures which are visible simultaneously	Yes	Materials and colors used in consistent manor throughout project site;
9	Consistency of composition and treatment	Yes	Composition and treatment consistent throughout;
10	Location and type of planting, with regard for desert climate conditions. Preservation of specimen and landmark trees upon a site, with proper irrigation to insure maintenance of all plant materials	Yes	Trees and plants will be consistent with existing landscape in shopping centers.

REQUIRED MATERIALS TO BE SUBMITTED FOR A MINOR ARCHITECTURAL APPLICATION:

The following materials are necessary for your application to be evaluated. Unless otherwise indicated, do not mount these exhibits on a board. All required diagrams must be neatly drawn and dimensioned including a north arrow and the project address. Use this list to assemble your application materials.

INCOMPLETE SUBMITTALS MAY DELAY PROCESSING OF YOUR APPLICATION.

Applicant Use | Staff Use:

- ☐ ☑ **Complete the Minor Architectural Application Form:** (attached to this instruction packet)
- ☐ ☑ **Authorization Letter or Contract signed by Homeowners Association or Owner** (if project is within a condo or HOA, or if application is being completed by owners' agent)
- ☑ ☑ **A Detailed Site Plan and Floor Plans:** These exhibits must be submitted for additions, rehabilitation of properties, landscaping changes, parking lot re-striping, walls, pools, mechanical equipment, or projects involving any type of exterior modification to the site. Include a north arrow and the project's street address. Site plans are usually submitted at 24" x 36" , to a scale not smaller than 1" = 40'. (Some plans may need to be drawn using a larger scale, such as 1" - 10'.) (An 11"x 17" site plan may be sufficient for minor building improvements, minor landscaping, walls, pools, and mechanical equipment. Please consult with a planner) The site plan should include the following information:
  - All property boundaries and distance to centerline of abutting street (obtain from Public Works Department)
  - All walls, sidewalks, driveways, gates, parking areas, landscaping, etc.
  - (Differentiate existing from new work by differing line weights or by notation).
- ☐ ☑ **Elevations**: Elevation drawing (showing front, back and sides) should be included for any project involving changes to the exterior of a structure, and to show proposed walls, fences, gates and/or mechanical screening. Include notes to describe colors, materials, dimensions (including height) and any other relevant information.

  Per City Standard
- ☐ ☑ **Color and Material Exhibits:** Provide swatches of actual paint colors proposed and cut sheets or small samples of materials where appropriate. Photographs of existing materials that will be matched is encouraged. Where a full color/material board is required, the board should be no larger than 8-1/2" x 11".

  To Match Existing
- ☐ ☐ **Existing Site Photographs:** One (1) set of photographs showing existing conditions at the proposed project and adjacent surroundings, structures, landscaping, walls, etc. .
- ☑ ☑ **Payment of Application Fees.**

TIME LIMIT FOR DEVELOPMENT: Planning approvals given on Minor Architectural Applications (MAA's) are valid for two (2) years from the Effective Date that the approval is made (see definition of Effective Date below). After Planning approvals are granted, applicants must apply for building permits through the City Department of Building and Safety. If building permits are not pulled or the construction initiated within two (2) years of the Effective approval date, the planning approval expires.

EFFECTIVE DATE: A Minor Architectural Application approval becomes "effective" after an elapsed period of fifteen (15) days from the date of the decision by the Planning Staff, Planning Commission or City Council. Any project for which a building permit application is made or a building permit is issued prior to the Effective Date of the Planning approval, are deemed to be made "at the risk" of the applicant such that an appeal could modify or overrule the subject approval.

November 27, 2013

Rich Meaney
Nexus Palm Springs
700 East Tahquitz Canyon Way, Suite A
Palm Springs, CA 92262

RE: Case No. LUP 13-067 & 3.1111 MAA; 1555 S. Palm Canyon Drive
Request to construct and operate accessory outdoor uses accessory to existing restaurant

Mr. Meaney,

Thank you for submitting the Minor Architectural (MAA) and Land Use Permit (LUP) applications for the property located at the above address. Specifically, you have requested approval to develop the vacant land adjacent to the existing restaurant building with accessory uses, including an outdoor pool, recreation, lounge and bar area. The developed area will be used as accessory space to the existing restaurant. Modifications to the existing parking area are also proposed.

Staff has reviewed the applications in accordance with Planned Development 131 and the underlying C-1 zone, Section 92.12.01 of the Palm Springs Zoning Code (PSZC). Staff has determined that the outdoor pool, bar and recreation space is accessory to the restaurant and outdoor entertainment / musicians may be permitted with the approval of a Land Use Permit, pursuant to Sections 92.12.01(A)(1) and 92.12.01(C)(2)(h) of the PSZC, respectively.

In accordance with Section 94.02.01(D) of the PSZC, staff has reviewed and approved the LUP application (LUP 13-067), subject to conditions of approval (see attached). This decision may be appealed to the Planning Commission within (5) days, pursuant to 94.02.01(D)(4) of the PSZC. The appeal must be filed in writing no later than December 5, 2013, and include the applicable filing fee.

In accordance with Section 94.04.00 of the PSZC, staff has reviewed and conditionally approved the Minor Architectural Application (Case 3.1111 MAA) after consulting with the Architectural Advisory Committee (AAC) on October 21, 2013 and November 25, 2013. Conditions of approval include:

1. Final wall plans shall be submitted for review and approval by the Planning Department prior to the issuance of building permit and must include size,

location, material, color and texture. Details on existing walls and proposed walls shall be included in the final wall plans.
2. Four (existing) Queen Palms shall be replaced with Mexican Fan Palms.
3. Planters with shade trees shall be incorporated into new and existing parking areas west of the proposed development to the satisfaction of the Planning Director.

This decision may be appealed to the Planning Commission within (10) working days, pursuant to 94.04.00(E)(2)(b) of the PSZC. The appeal must be filed in writing no later than December 16, 2013, and include the applicable filing fee.

Staff has determined that the above actions are categorically exempt from the preparation of further environmental documents, pursuant to Section 15303 of the California Environmental Quality Act (CEQA) Guidelines. A Notice of Exemption (NOE) will be filed with the County Clerk.

If you have any questions about this letter, please contact me or Associate Planner David Newell at (760) 323-8245.

Sincerely,

Margo Wheeler, AICP
Director of Planning Services

LAND USE PERMIT #13-067
CONDITIONS OF APPROVAL

DATE: November 27, 2013

REQUEST: Land Use Permit for musicians and entertainment (subject to provisions of noise ordinance) outside on pool deck; entertainment to include live DJ's and bands with hours of operation for outside pool area to be from 8:00 AM to 6:00 PM seven days a week.

APPLICANT: Miggy's Cantina LLC

LOCATION: 1555 South Palm Canyon Drive

ZONING/ GENERAL PLAN: C-1 / NCC - Section 92.12.01(C)(2)(j) – outdoor musicians and entertainment (subject to provisions of noise ordinance) located on the same property as permitted use allowed with a Land Use Permit.

Before final acceptance of the project, all conditions listed below shall be completed to the satisfaction of the City Engineer, the Director of Planning and Building, the Chief of Police, the Fire Chief, or their designee, depending on which department recommended the condition(s).

Any agreements, easements or covenants required to be entered into shall be in a form approved by the City Attorney.

1. The proposed development of the premises shall conform to all applicable regulations of the Palm Springs Zoning Ordinance, Municipal Code, or any other City Codes, ordinances and resolutions which supplement the zoning district regulations.

2. The owner shall defend, indemnify, and hold harmless the City of Palm Springs, its agents, officers, and employees from any claim, action, or proceeding against the City of Palm Springs or its agents, officers or employees to attach, set aside, void or annul, an approval of the City of Palm Springs, its legislative body, advisory agencies, or administrative officers concerning this Land Use Permit application. The City of Palm Springs will promptly notify the applicant of any such claim, action, or proceeding against the City of Palm Springs and the applicant will either undertake defense of the matter or pay the City's associated legal costs or will advance funds to pay for defense of the matter by the City Attorney. If the City of Palm Springs fails to promptly notify the applicant of any such claim, action or proceeding or fails to cooperate fully in the defense, the applicant shall not, thereafter, be responsible to defend, indemnify, or hold harmless the City of Palm Springs. Notwithstanding the foregoing, the City retains the right to settle or abandon the matter without the applicant's consent but should it do so, the City shall waive the indemnification herein, except, the City's decision to settle or abandon a matter

following an adverse judgment or failure to appeal, shall not cause a waiver of the indemnification rights herein.

3. No architectural approval is granted herein. Any exterior changes of the establishment shall require separate applications and permits.

4. Any exterior signing, including menu boards and temporary signs shall be approved by the Planning Department. Menu boards and portable open signs shall not be permitted within the City right-of-way without a permit and violations will result in issuance of citations and revocation of all permits and agreements.

5. This Land Use Permit authorizes the use of live DJ's and bands providing entertainment outdoor on pool deck.

   Live Entertainment is approved as follows:

   a) Live entertainment shall be limited to the pool deck within the hours of 8:00 AM to 6:00 PM.

   b) Any and all instruments shall have limited amplification.

   c) All amplification equipment shall be placed so that sound is projected toward other commercial properties and roadways away from nearby residential communities.

   d) Noise levels shall be maintained to a level where customers can conduct normal conversation.

   e) All activities shall comply with the provisions of the City's Noise Ordinance.

6. Hours of operation for outdoor pool area to be from 8:00 AM to 6:00 PM seven days a week.

7. This permit does not waive the City's noise ordinance. The business is required to adhere to the following noise levels at all times according to Muni. Code Chap. 11.74.

Ordinance Time of Day	Ordinance dBA Limits
7:00 AM to 6:00 PM	60
6:00 PM to 10:00 PM	55
10:00 PM to 7:00 AM	50

8. All conditions of approval associated with Minor Architectural Application (MAA) Case # 3.111 shall apply including site layout, hardscape, and landscaping.

9. This Land Use Permit recognizes the presence of 401 off-street parking spaces at Plaza del Sol Shopping Center meeting the requirements of Section 93.06.00(D)(19) of the Palm Springs Zoning Code (PSZC) for mixed-use developments over 20,000-square feet.

10. The food service use shall conform to all County of Riverside Department of Health requirements.

11. A business license and any other permits are required.

12. Applicant shall comply with all California Alcohol Beverage Control regulations.

13. This Land Use Permit shall be displayed on-site at all times and made available to City officials upon request.

14. Failure to comply with Municipal Codes, Ordinances, and the conditions of this land use permit may result in revocation of this permit.

ARCHITECTURAL ADVISORY COMMITTEE
CITY OF PALM SPRINGS, CALIFORNIA
Council Chamber, 3200 East Tahquitz Canyon Way, Palm Springs, California 92262

Minutes of November 25, 2013

CALL TO ORDER: Chair Susan Secoy-Jensen called the meeting to order at 3:02 PM.

ROLL CALL:

Committee Members Present:	Chair Secoy-Jensen, Cassady, Fredricks, Hirschbein, Purnel
Committee Members Excused:	Vice-Chair Fauber, Song
Also Present:	Director of Planning Wheeler, Associate Planner Newell
Planning Commissioner Present:	Commissioner Weremiuk

REPORT OF THE POSTING OF AGENDA: Agenda is available for public access at the City Hall bulletin board (west side of Council Chamber) and the Planning Department counter by 4:00 pm on Tuesday, November 19, 2013.

ACCEPTANCE OF THE AGENDA:
ACTION: The Agenda was unanimously accepted as presented.

PUBLIC COMMENTS - None

1. CONSENT CALENDAR:

1.A. APPROVAL OF MINUTES: November 12, 2013
ACTION: Approve the minutes as amended. (Three changes on page 2 per Committee Member Fredricks and Chair Secoy-Jensen)
Motion Committee Member Cassady seconded by Committee Member Hirschbein. Carried by a 5-0 roll call vote.

2. UNFINISHED BUSINESS:

2.A. PLAZA DEL SOL, LLC FOR A MINOR ARCHITECTURAL APPLICATION TO DEVELOP A VACANT AREA ADJACENT TO THE EXISTING RESTAURANT WITH A POOL, LOUNGE AREAS, BAR, RESTROOM AND LANDSCAPING AT THE EXISTING SHOPPING CENTER LOCATED AT 1555 SOUTH PALM CANYON DRIVE, ZONE PD-131 (CASE 3.1111 MAA). (DW)

Associate Planner Newell provided details of the proposed project.

Committee Member Fredricks asked if the four Queen Palms on the northeast

corner that currently exist on the lot are to remain or to be replaced.

CHRIS PARDO, architect, stated in response to conditions raised at the October 21, 2013 AAC Meeting, that the roof of the bar has been lowered to 9 feet, the cabanas will be 10 feet high and are 20 feet off the fence line which is 15 feet off the curb. They have also updated the landscaping along the fence. No new parking spaces are to be added.

Committee members paused to read a letter from JUDY DEERTRACK.

JUDY DEERTRACK, resident of Tahquitz Mesa Villas adjacent to the site, asked the Committee to delay the project until some of her questions are answered. She believes the matter should go to the Planning Commission and have a public hearing with CEQA findings.

FRANK TYSON, 175 Cahuilla, Palm Springs, also feels this is a major architectural application. He is bothered that these types of projects come to the AAC before they go before the Planning Commission. He also questioned the potential noise problems as the noise bounces off the mountains and affects the area around the project.

Chair Secoy-Jensen had questions regarding the process of determining whether a project is a minor or major architectural application.

Director Wheeler stated that staff determines if the application is major or minor according to the zoning code as adopted by the City Council. Decisions of the AAC in regard to minor architectural applications are appealable to the Planning Commission within 10 days of the decision.

Committee Member Hirschbein asked if the current zoning ordinance prohibits the type of use requested.

Director Wheeler stated that the project is within the current zoning ordinances.

Committee Member Hirschbein questioned if there is a noise ordinance in Palm Springs.

Director Wheeler stated yes, there is a noise ordinance and that this project falls within the ordinance.

CHRIS PARDO, architect for applicant stated that the applicant is not the owner of the property, but a tenant. He also stated there is an existing 80 person patio on the south side of the property which will be expanded. Parking is within the applicable laws.

Committee Member Fredricks asked why the applicant is leaving the 4 Queen Palms on the property.

CHRIS PARDO stated they are staying due to a cost issue.

Committee Member Hirschbein asked about the wall height on Palm Canyon and the height of the cabana. He also questioned the type of material facing the wall.

CHRIS PARDO stated the height of the wall is 6 feet and the roof of the cabana is 10 feet. The material is reclaimed wood.

Committee Member Hirschbein also asked if the current decorative wall will remain.

CHRIS PARDO stated that all but a small part of the wall will remain. New equipment to maintain the pool will be coming in and space is required for the equipment.

Chair Secoy-Jensen stated there is an inconsistency on the landscape plan and the grading plan regarding 3 Date Palms.

CHRIS PARDO stated to defer to the landscape plan.

Committee Member Hirschbein asked that the applicant come back with a description on how the existing walls are to be replicated and how the new and old walls will work together.

Committee Member Fredricks recommended that the 4 Queen Palms be replaced since they are not in good health.

Committee Member Hirschbein would like to see the application come back to a subcommittee specifying how the new walls will interface with the original walls with regard to size, location, material, color and texture.

Chair Secoy-Jensen asked for volunteers for the subcommittee.
Committee members Hirschbein, Purnel and Chair Secoy-Jensen volunteered to be on the subcommittee.

ACTION: To approve the project to the Planning Director, subject to proposed conditions and have a subcommittee review how the new walls will interface with the original walls with regard to size, location, material, color and texture, and an additional condition for the four Queen Palms to be replaced with Washingtonia Palms. Chair Secoy-Jensen added an amendment stating that the landscape plans supersede the drainage plans due to inconsistencies.

Motion Committee Member Cassady seconded by Committee Member Fredricks and carried by a 5-0 roll call vote.

3. NEW BUSINESS:

3.A. GEOFF MCINTOSH, OWER OF BERNIE'S SUPPER CLUB TO REPLACE EXISTING ENCLOSED ENTRY CANOPY WITH NEW METAL AWNING WITH PIN-STRIPED BLACK / GOLD FABRIC LOCATED AT 292 EAST PALM CANYON DRIVE, ZONE C-1. (CASE 3.1324 MAA)

Committee Member Hirschbein asked if there are any right of way issues.

Associate Planner Newell replied no right of way issues.

Committee Member Fredricks stated that a more accurate visual representation is needed.

Chair Secoy-Jensen requested that heights of the awning structure and how it relates to the building be presented. Also, a more accurate and substantial drawing be provided.

ACTION: Table project until more accurate plans can be received.
Motion Chair Secoy-Jensen seconded by Committee Member Cassady and carried by a 5-0 roll call vote.

COMMITTEE MEMBER REPORTS: None

DIRECTOR REPORTS:

Director Wheeler announced that there will only be one meeting in December.

ADJOURNMENT: At 3:53 PM the Architectural Advisory Committee adjourned to the next regular meeting at 3:00 pm on Monday, December 9, 2013, Council Chamber, City Hall, 3200 East Tahquitz Canyon Way, Palm Springs.

RECEIVED

NOV 25 2013

PLANNING SERVICES
DEPARTMENT

Monday, November 25, 2013

To the Architectural Advisory Committee
Palm Springs, California

Re: Item 2A
Plaza Del Sol
November 25 2013

To the Honorable Committee:

I wish to add commentary to the above matter before the Committee, and recommend a delay in approval of the project until the following has occurred:

1. A staff report finding of whether the project dimensions, impact, size, and character make this a Major Architectural Permit or Minor Architectural Permit.
2. If this is a Major Architectural Permit, the project should be delayed until the applicant has met with and properly notified the residential neighbors at Tahquitz Mesa Villas, who are also applicant's tenants;
3. Even if it is deemed a minor architectural permit, there is a lack of specificity about the outdoor activities that will occur in this area, including music, entertainment, and special events, which will have traffic and noise impacts to the multi-family units immediately adjacent. Public Notice should have been given to all affected nearby residents.
4. A staff report finding on whether this project is a major or ;minor modification to the pre-existing restaurant.
5. A more detailed staff report finding on neighborhood compatibility of this project with the multi-family residential neighborhood, considering the potential noise and traffic impacts.
6. A more specific staff report finding of whether this project is compatible with the remaining commercial project that is on the same lot and within the same commercial complex.
7. A determination of whether the potential impacts of this project require California Environmental Quality Act review.

With regard,

Judy Deertrack

ARCHITECTURAL ADVISORY COMMITTEE
STAFF MEMORANDUM

DATE: November 25, 2013

SUBJECT: PLAZA DEL SOL, LLC FOR A MINOR ARCHITECTURAL APPLICATION TO DEVELOP A VACANT AREA ADJACENT TO THE EXISTING RESTAURANT WITH A POOL, LOUNGE AREAS, BAR, RESTROOM AND LANDSCAPING AT THE EXISTING SHOPPING CENTER LOCATED AT 1555 SOUTH PALM CANYON DRIVE, ZONE PD-131 (CASE 3.1111 MAA). (DN)

FROM: Department of Planning Services

On October 21, 2013, the Architectural Advisory Committee reviewed a proposal to develop a vacant pad area adjacent to the existing restaurant building with an outdoor pool, recreation, lounge and bar area at the existing Plaza Del Sol shopping center. The project was tabled with comments and requests, including:

1. Use of Washington Filifera Palms instead of Queen Palms;
2. Use 36-inch box Olive trees in parking lot for shading;
3. Setback wall along Palm Canyon with enhanced landscape;
4. Height of service (bar) structure too tall at ten feet height and should be reduced;
5. Provide additional information on Palm Canyon building / structure elevations, and details of wall finish and articulation;

The plans have been revised as follows:

1. Sheet L-1:
    a. Queen Palms replaced with Washingtonia Robusta (California Fan Palms);
    b. 36-inch box Olive trees proposed in adjacent parking area planters (3 shown – additional will be necessary in remainder of parking lot);
    c. No change to wall location along Palm Canyon Drive;
2. Sheet 2.2: Service bar reduced by one foot in height;
3. Sheets 3.0 and 3.1: Proposed gray colors superimposed on elevations of existing restaurant building;
4. Added Sheet 3.4: Building perspectives from S. Palm Canyon Drive.

RECOMMENDATION:

Recommend approval to the Planning Director, subject to the following:

1. Planters with shade trees shall be incorporated into new parking and existing parking areas west of the proposed development. Specifically, landscape fingers shall be installed every ten spaces and six-foot wide planter diamonds shall be installed ever two to three spaces where possible. Tree species to be Olive species consistent with existing on-site.

CITY OF PALM SPRINGS

CASE NO: 3.1111 MAA

APPLICANT: Plaza Del Sol, LLC

DESCRIPTION:
A proposal to develop a vacant pad area adjacent to the existing restaurant building with an outdoor pool, recreation, lounge and bar area at the existing Plaza Del Sol shopping center, 1555 South Palm Canyon Drive, Zone PD-131 / C-1, Section 22.

COMMITTEE MEMBERS HIRSCHBEIN, SONG AND CHAIR SECOY-JENSEN all said that the current misting system is not acceptable.

M/S/C (Vice Chair Fauber/Burnel, 6-0-1 absent Cassady) To deny.

8. PLAZA DEL SOL, LLC FOR A MINOR ARCHITECTURAL APPLICATION TO DEVELOP A VACANT AREA ADJACENT TO THE EXISTING RESTAURANT WITH A POOL, LOUNGE AREAS, BAR, RESTROOM AND LANDSCAPING AT THE EXISTING SHOPPING CENTER LOCATED AT 1555 SOUTH PALM CANYON DRIVE, ZONE PD-131 (CASE 3.1111 MAA). (DN)

RUBEN WALTERS, applicant, presented the project.

COMMITTEE MEMBER FREDRICKS said the buildings could blend in better with existing structure. They should not duplicate Queen palms but use Washingtonian filifera instead. The trees in parking lot to be 36" olives.

COMMITTEE MEMBER HIRSCHBEIN said he felt the modern aesthetic was fine; however, they need a significant setback with landscaping outside the street wall; need Palm Canyon elevations.

COMMITTEE MEMBER SONG said the 10' roof is too massive at the sidewalk; need elevations of existing roof; details on wall finish and articulation.

M/S/C (Chair Secoy-Jensen/Fauber, 6-0-1 absent Cassady) To table, applicant to return with amendments upon comments.

COMMITTEE MEMBER COMMENTS:

None.

STAFF MEMBER COMMENTS:

Director Wheeler provided an update on the on-site sign posting requirements.

Director Wheeler announced that there would be no meeting on December 23, 2013.

ARCHITECTURAL ADVISORY COMMITTEE STAFF MEMORANDUM

DATE: October 21, 2013

SUBJECT: PLAZA DEL SOL, LLC FOR A MINOR ARCHITECTURAL APPLICATION TO DEVELOP A VACANT AREA ADJACENT TO THE EXISTING RESTAURANT WITH A POOL, LOUNGE AREAS, BAR, RESTROOM AND LANDSCAPING AT THE EXISTING SHOPPING CENTER LOCATED AT 1555 SOUTH PALM CANYON DRIVE, ZONE PD-131 (CASE 3.1111 MAA). (DN)

FROM: Department of Planning Services

SUMMARY

The Architectural Advisory Committee will review a proposal to develop a vacant pad area adjacent to the existing restaurant building with an outdoor pool, recreation, lounge and bar area at the existing Plaza Del Sol shopping center. Modifications to the existing parking areas are also proposed.

RECOMMENDATION:

Recommend approval to the Planning Director, subject to the following:

1. Planters with shade trees shall be incorporated into new parking and existing parking areas west of the proposed development. Specifically, landscape fingers shall be installed every ten spaces and six-foot wide planter diamonds shall be installed ever two to three spaces where possible. Tree species to be recommended by AAC.

ISSUES:

- Shopping center non-conforming in parking lot shading.

PROPOSED DEVELOPMENT

PROJECT DESCRIPTION:

The applicant proposes to develop the grass area and a portion of the parking area adjacent to the existing restaurant building as follows:

- Construct outdoor recreation area including, pool, lounge chairs, private cabanas, palapa bar, bathrooms and (2) bocce ball courts;
- Surround the proposed recreation area with six-foot high block wall;
- Install wrought-iron fence between pool area and restaurant building walkway;
- Expand the parking area to the vacant, undeveloped dirt area west of the building;
- Re-paint existing restaurant building with gray hues;
- Enhance landscaping around and within proposed recreation area.

ANALYSIS:

General Plan			
Land Use Designation	**Floor Area Ratio**	**Request**	**Compliance**
NCC	0.35 F.A.R.	No change (No usable floor space proposed)	Yes

Zoning – Uses & Lot Standards			
	Zoning Requirements: PD-131 with underlying C-1	**Proposed**	**Compliance**
Uses permitted	Restaurant, including accessory uses	Restaurant with outdoor accessory uses (entertainment, recreation, etc.)	Yes, with approval of Land Use Permit
Lot Standards			
Min. Area	20,000 sq. ft.	Existing (17.4 acres)	Yes
Min. Width	100 ft.	Existing (580 ft.)	Yes
Min. Depth	150 ft.	Existing (1,275 ft.)	Yes

Zoning – Building Development Standards			
	Requirements for PD-131 with underlying C-1 Zone	**Proposed**	**Compliance**
Building Height	30 ft. maximum	13 ft. maximum	Yes
Yard Setbacks			
Street Frontages	5 ft. from any street frontage	5 ft. to 6 ft. high block wall	Yes
Pool / spas	5 ft. from any property line	65 ft. +	Yes
Distance Between Buildings	No requirement	N/a	N/a
Lot Coverage	No requirement	N/a	N/a
Off-street Parking	Mixed Use Development require 1 parking space per 250 sq. ft. of gross floor area	Parking removed will be replaced on-site	Yes
Trash Enclosure	Required	Existing	Yes

D. Planning Commission Architectural Advisory Committee Review Guidelines.

The planning commission architectural advisory committee shall examine the material submitted with the architectural approval application and specific aspects of design shall be examined to determine whether the proposed development will provide desirable environment for its occupants as well as being compatible with the character of adjacent and surrounding developments, and whether aesthetically it is of good composition, materials, textures and colors. Conformance will be evaluated, based on consideration of the following:

Item	Guideline	Conforms?	Staff Evaluation
1	Does the proposed development provide a desirable environment for its occupants?	Yes	Outdoor recreation area will be accessory to restaurant use;
2	Is the proposed development compatible with the character of adjacent and surrounding developments?	Yes	Restaurant building is existing; accessory recreation area located within commercial shopping complex with adequate parking. No impacts to surrounding developments are anticipated;
3	Is the proposed development of good composition, materials, textures, and colors?	Yes	Materials include corrugated metal, concrete block (scored and diamond face), burnt cedar and stucco; colors include white and grays;
4	Site layout, orientation, location of structures and relationship to one another and to open spaces and topography. Definition of pedestrian and vehicular areas; i.e., sidewalks as distinct from parking lot areas	Yes	Pool area will be separated from restaurant with pedestrian walkway and wrought-iron fence;
5	Harmonious relationship with existing and proposed adjoining developments and in the context of the immediate neighborhood/community, avoiding both excessive variety and monotonous repetition, but allowing similarity of style, if warranted	Partial	The proposed structures are a modern design with simple lines and shapes, while the existing restaurant building and remainder of the shopping center were built with in a Spanish Revival theme.

6	Maximum height, area, setbacks and overall mass, as well as parts of any structure (buildings, walls, screens, towers or signs) and effective concealment of all mechanical equipment	Yes	Structures conform to zoning code requirements. No mechanical equipment is proposed;
7	Building design, materials and colors to be sympathetic with desert surroundings	Yes	Shade devices built with corrugated metal;
8	Harmony of materials, colors and composition of those elements of a structure, including overhangs, roofs, and substructures which are visible simultaneously	Yes	Materials and colors used in consistent manor throughout project site;
9	Consistency of composition and treatment	Yes	Composition and treatment consistent throughout;
10	Location and type of planting, with regard for desert climate conditions. Preservation of specimen and landmark trees upon a site, with proper irrigation to insure maintenance of all plant materials	Yes	Trees and plants will be consistent with existing landscape in shopping centers.

City of Palm Springs

ARCHITECTURAL ADVISORY COMMITTEE

Council Chamber, 3200 East Tahquitz Canyon Way, Palm Springs, California 92262

Revised Minutes of October 21, 2013

CALL TO ORDER: Chair Secoy-Jensen called the meeting to order at 3:03 pm.

ROLL CALL:

Committee Members Present:	Fredricks, Hirschbein, Purnel, Song, Vice-Chair Fauber and Chair Secoy-Jensen
Committee Members Absent:	Cassady
Planning Commissioner Present:	Chair Donenfeld
Also Present:	Director Wheeler and Associate Planner Newell

REPORT OF THE POSTING OF AGENDA: The Agenda is available for public access at the City Hall bulletin board (west side of Council Chamber) and the Planning Department counter by 6:00 pm on Wednesday, October 16, 2013.

ACCEPTANCE OF THE AGENDA: Item #6, Case 13-071, was moved to the Consent Calendar. (See Item 2 below)

PUBLIC COMMENTS:

MATTHEW BOUSQUETTE, owner of 1090 N. Palm Canyon commented about the problems of break-ins and copper theft and also the concern of new development immediately adjacent to his property. (See Item 2 below)

FRANK TYSEN, owner of Casa Cody, spoke about fires of historic structures and the need for security also concerns about lack of notification. He also commented that there should be conceptual meetings so that the AAC can make drastic changes.

1. CONSENT CALENDAR:

M/S/C (Fauber/Purnel, 6-0) Approve items 1A and 6, as part of the Consent Calendar.

1.A. APPROVAL OF MINUTES: OCTOBER 7, 2013

Approved, as amended.

6. AMY BOYLAN, OWNER OF TONGA HUT RESTAURANT FOR A 25-SQUARE

FOOT SECOND STORY SIGN WITH AUTOMATED TIKI TORCH FEATURE LOCATED AT 254 NORTH PALM CANYON DRIVE, ZONE CBD (CASE 13-071). (GM)

Approve, as submitted.

UNFINISHED BUSINESS:

2. PALM SPRINGS, LLC, FOR AN AMENDMENT TO PLANNED DEVELOPMENT DISTRICT 324 FOR A MIXED-USE DEVELOPMENT LOCATED AT 400 NORTH PALM CANYON DRIVE, ZONE PD 324 (CASE 5.1091 PD324-AMND). (ER)

Project architect, Hagy Belzburg described the changes from the last presentation on October 7th.

MATTHEW BOUSQUETTE, adjacent property owner, said that he wants something built that doesn't leave trash and utility dock adjacent to his property. He said that police would not be able to patrol the roadway in between. He wants to do a restaurant and sculpture garden on his property but will not be able to do if this moves forward.

FRANK TYSEN, historic inn owner, disagreed with the architect saying the project did not look at all like Palm Springs. He said it is the absence of large projects why people come here. He said that the developer should do community meetings, there should be a new EIR and the project should be sent back to the drawing board.

FERNANDO SILVA, architect, said the project was not out of scale and that Palm Springs is no longer a small 19th century village.

JAMES CIOFFI, architect, said that the developer had previously done community meetings. This site is identified as a high intensity gateway site in the Downtown Design Plan. The architect has done an outstanding job; the trash locations can be handled.

MR. BELZBURG followed up saying the trash location on the south can be removed; he designed the building breaking up the massing and so as not to cast shadows on adjacent properties.

COMMITTEE MEMBER FAUBER asked for the architect to describe the changes on Indian Canyon.

MR. BELZBURG said there was greater activation on the ground floor with meeting space enhanced lighting and landscaping.

COMMITTEE MEMBER SONG had concerns about headlights shining directly into the meeting space, blunt edges and driveways. The architect agreed to look into the headlight issue and enhanced overhangs.

COMMITTEE MEMBER FREDRICKS asked about the height on the corner at Palm Canyon and Alejo Road.

MR. BELZBURG responded 45 feet.

COMMITTEE MEMBER FAUBER commented he was originally concerned with the project changes to hotel from residential but the design has assuaged his misgivings. He asked about the south property line.

MR. BELZBURG indicated it is a landscaped setback. Their preference is that the retail be continuous along Palm Canyon.

COMMITTEE MEMBER HIRSCHBEIN had questions regarding the landscape planter in front of stores. He supports extending the storefronts to the south.

COMMITTEE MEMBER FREDRICKS stated that he is pleased with the setbacks but is still concerned with the massing.

CHAIR SECOY-JENSEN wants to see stronger effort on the south. The retail needs to continue. Although she may be in the minority, she preferred the previous elevations, specifically the northwest corner.

VICE-CHAIR FAUBER indicated that he felt that the North Palm Canyon needs high quality railings. The applicant should work with the neighbor to the south.

M/S/C (Secoy-Jensen/Fauber, 6-0-1 absent Cassady) Approve request with the following to be re-submitted:

- Exhibits showing: south side compatible with neighbor with additional retail and remove trash area
- Overhang on the east details
- Bulkhead on east blocking car lights
- Northwest corner options

DISCUSSION:

COMMITTEE MEMBER HIRSCHBEIN asked to ensure it doesn't impede with schedule.

DIRECTOR Wheeler said enough of a recommendation to go forward to the Planning Commission. These items of study are to return to the AAC.

COMMITTEE MEMBER HIRSCHBEIN requested an amendment to add planters on Palm Canyon. Chair Secoy-Jensen and Vice-Chair Fauber accepted the amendment and added:

- North-South and East-West section plans at property lines to be submitted, showing relation to adjacent properties.
- Planters on Palm Canyon

Chair Secoy-Jensen noted that landscape plans may be submitted later.

3. AEK CAPITAL MANAGEMENT LLC, FOR A MINOR ARCHITECTURAL APPLICATION TO RENOVATE AN EXISTING HOTEL LOCATED AT 2135 NORTH PALM CANYON DRIVE, ZONED C-1 (CASE 3.0676 MAA). (DN)

Associate Planner Newell presented the project.

COMMITTEE MEMBER SONG asked applicant about re-plastering the wall and the location of parking spaces.

COMMITTEE MEMBER FREDRICKS questioned the ficus and other planting materials.

COMMITTEE MEMBER PURNEL called for larger planter areas in the parking lot and indicated the light fixtures at the walkways may be too fragile.

COMMITTEE MEMBER SONG said the foam molding needs to be simplified so that it is not so Mediterranean and plaster to be consistent window to door.

M/S/C (Vice-Chair Fauber/Fredricks, 6-0-1 absent Cassady) Approve with conditions.

- Parking lot trees shall be 36" box
- Crown molding more deco not Mediterranean
- 4 eastern parking spaces to be set back per director's approval
- Return with revised landscape plan to subcommittee: (Purnel, Fredricks, Fauber)
- Tree wells with tree choice
- Replace ficus, all 15 gallon
- All shrubs 5 gallon

NEW BUSINESS:

4. HARD ROCK HOTEL FOR THE REPAINT OF THE FRONT PORTE COHERE TO THE COLOR PURPLE LOCATED AT 150 SOUTH INDIAN CANYON

DRIVE, ZONE RA (CASE NO. 3.1707 MAA). (GM)

JIM CIOFFI, applicant, presented the project.

M/S/C (Vice-Chair Fauber/Chair Secoy-Jensen, 4-2-1 Hirschbein/Song 1 absent/ Cassady absent) Approve with purple paint to stop at inside corner.

5. MICHAEL KING, OWNER FOR A NEW 4,537-SQUARE FOOT CUSTOM HOUSE ON A HILLSIDE LOT TO INLCUDE AN ADMINISTRATIVE MINOR MODIFICATION REQUESTING AN INCREASE IN BUILDING HEIGHT AT 2355 MILO DRIVE, ZONE R-1-B (CASE 3.2938 MAJ AND 7.1402 AMM). (GM)

MICHAEL KING, applicant, presented his project indicating that he sent out many more notices than required.

COMMITTEE MEMBER FREDRICKS asked about the height of the carport and landscape material. He wants more landscaping in front and more variety and more height.

MICHAEL KING replied 12' carport and 3 palo verdes proposed.

CHAIR SECOY-JENSEN asked about the distinctive color panels.

COMMITTEE MEMBER PURNEL felt that additional landscaping was necessary to soften walls both at street front and in front of the pool wall.

M/S/C (Secoy-Jensen/Fredricks, 6-0-1 absent/Cassady) Approve with conditions.

- Additional landscaping at the street
- Pool equipment shall be fully screened
- Additional landscaping between structure and wall
- Revise the landscape plan per comments

7. GYORO RESTAURANT FOR A MINOR ARCHITECTURAL APPLICATION TO ADD A ROOF TO THE OUTDOOR BAR AND A TAKE-OUT WINDOW ON THE NORTH FAÇADE AT THE OASIS COMMERCIAL BUILDING, A CLASS 1 HISTORIC SITE, AT 101-121 SOUTH PALM CANYON DRIVE, ZONE CBD, (CASE 3.1289 MAA). (KL)

GREG WILLIAMS, architect, presented the project.

CHAIR SECOY-JENSEN asked why changes had not been made per Committee and staff direction.

COMMITTEE MEMBER PURNEL about the interaction between the bar roof and tree as it is still not clear on the plans.

COMMITTEE MEMBERS FAUBER AND HIRSCHBEIN offered alternative methods for handling the roof.

CHAIR SECOY-JENSEN offered that the exterior takeout may not be necessary.

COMMITTEE MEMBERS HIRSCHBEIN, SONG AND CHAIR SECOY-JENSEN all said that the current misting system is not acceptable.

M/S/C (Vice-Chair Fauber/Purnel, 6-0-1 absent Cassady) To deny.

8. PLAZA DEL SOL, LLC FOR A MINOR ARCHITECTURAL APPLICATION TO DEVELOP A VACANT AREA ADJACENT TO THE EXISTING RESTAURANT WITH A POOL, LOUNGE AREAS, BAR, RESTROOM AND LANDSCAPING AT THE EXISTING SHOPPING CENTER LOCATED AT 1555 SOUTH PALM CANYON DRIVE, ZONE PD-131 (CASE 3.1111 MAA). (DN)

RUBEN WALTERS, applicant, presented the project.

COMMITTEE MEMBER FREDRICKS said the buildings could blend in better with existing structure. They should not duplicate Queen palms but use Washingtonian filifera instead. The trees in parking lot to be 36" olives.

COMMITTEE MEMBER HIRSCHBEIN said he felt the modern aesthetic was fine; however, they need a significant setback with landscaping outside the street wall; need Palm Canyon elevations.

COMMITTEE MEMBER SONG said the 10' roof is too massive at the sidewalk; need elevations of existing roof; details on wall finish and articulation.

M/S/C (Chair Secoy-Jensen/Fauber, 6-0-1 absent Cassady) To table, applicant to return with amendments upon comments.

COMMITTEE MEMBER COMMENTS:

None.

STAFF MEMBER COMMENTS:

Director Wheeler provided an update on the on-site sign posting requirements.

Director Wheeler announced that there would be no meeting on December 23, 2013.

ADJOURNMENT: The Architectural Advisory Committee adjourned at 6:30 pm to Tuesday, *November 12, 2013*, at 3:00 pm, Council Chamber, City Hall, 3200 East Tahquitz Canyon Way.

M. Margo Wheeler, AICP
Director of Planning Services

ARCHITECTURAL ADVISORY COMMITTEE STAFF MEMORANDUM

DATE: October 21, 2013

SUBJECT: PLAZA DEL SOL, LLC FOR A MINOR ARCHITECTURAL APPLICATION TO DEVELOP A VACANT AREA ADJACENT TO THE EXISTING RESTAURANT WITH A POOL, LOUNGE AREAS, BAR, RESTROOM AND LANDSCAPING AT THE EXISTING SHOPPING CENTER LOCATED AT 1555 SOUTH PALM CANYON DRIVE, ZONE PD-131 (CASE 3.1111 MAA). (DN)

FROM: Department of Planning Services

SUMMARY

The Architectural Advisory Committee will review a proposal to develop a vacant pad area adjacent to the existing restaurant building with an outdoor pool, recreation, lounge and bar area at the existing Plaza Del Sol shopping center. Modifications to the existing parking areas are also proposed.

RECOMMENDATION:

Recommend approval to the Planning Director, subject to the following:

1. Planters with shade trees shall be incorporated into new parking and existing parking areas west of the proposed development. Specifically, landscape fingers shall be installed every ten spaces and six-foot wide planter diamonds shall be installed ever two to three spaces where possible. Tree species to be recommended by AAC.

ISSUES:

- Shopping center non-conforming in parking lot shading.

REQUIRED MATERIALS TO BE SUBMITTED FOR A MINOR ARCHITECTURAL APPLICATION:

The following materials are necessary for your application to be evaluated. Unless otherwise indicated, do not mount these exhibits on a board. All required diagrams must be neatly drawn and dimensioned including a north arrow and the project address. Use this list to assemble your application materials.

INCOMPLETE SUBMITTALS MAY DELAY PROCESSING OF YOUR APPLICATION.

Applicant Use ↓	Staff Use: ↓	
☑	☐	**Complete the Minor Architectural Application Form**: (attached to this instruction packet)
☑	☐	**Authorization Letter or Contract signed by Homeowners Association or Owner** (if project is within a condo or HOA, or if application is being completed by owners' agent)
☑	☐	**A Detailed Site Plan and Floor Plans**: These exhibits must be submitted for additions, rehabilitation of properties, landscaping changes, parking lot re-striping, walls, pools, mechanical equipment, or projects involving any type of exterior modification to the site. Include a north arrow and the project's street address. Site plans are usually submitted at 24" x 36" , to a scale not smaller than 1" = 40'. (Some plans may need to be drawn using a larger scale, such as 1" - 10'.) (An 11"x 17" site plan may be sufficient for minor building improvements, minor landscaping, walls, pools, and mechanical equipment. Please consult with a planner) The site plan should include the following information: ▪ All property boundaries and distance to centerline of abutting street (obtain from Public Works Department) ▪ All walls, sidewalks, driveways, gates, parking areas, landscaping, etc. ▪ (Differentiate existing from new work by differing line weights or by notation).
☑	☐	**Elevations**: Elevation drawing (showing front, back and sides) should be included for any project involving changes to the exterior of a structure, and to show proposed walls, fences, gates and/or mechanical screening. Include notes to describe colors, materials, dimensions (including height) and any other relevant information.
☑	☐	**Color and Material Exhibits:** Provide swatches of actual paint colors proposed and cut sheets or small samples of materials where appropriate. Photographs of existing materials that will be matched is encouraged. Where a full color/material board is required, the board should be no larger than 8-1/2" x 11".
☑	☐	**Existing Site Photographs**: One (1) set of photographs showing existing conditions at the proposed project and adjacent surroundings, structures, landscaping, walls, etc. .
☑	☐	**Payment of Application Fees.**

TIME LIMIT FOR DEVELOPMENT: Planning approvals given on Minor Architectural Applications (MAA's) are valid for two (2) hears from the Effective Date that the approval is made (see definition of Effective Date below). After Planning approvals are granted, applicants must apply for building permits through the City Department of Building and Safety. If building permits are not pulled or the construction initiated within two (2) years of the Effective approval date, the planning approval expires.

EFFECTIVE DATE: A Minor Architectural Application approval becomes "effective" after an elapsed period of fifteen (15) days from the date of the decision by the Planning Staff, Planning Commission or City Council. Any project for which a building permit application is made or a building permit is issued prior to the Effective Date of the Planning approval, are deemed to be made "at the risk" of the applicant such that an appeal could modify or overrule the subject approval.

Hacienda Cantina and Beach Club- JustificationLetter

Project consists of an existing 8,030 square foot restaurant building and 44,000 square feet of adjacent land that will house a swimming pool, bathroom facility and an outdoor bar with 5 fire pits.

The project will employ approximately 70 new employees. The restaurant has been closed for 27 months.

Hours of operation are 4 pm to 12am, Sunday – Friday and 9am to 12 am Saturday to Sunday.

The only State license required is a liquor license from the ABC.

The property houses an existing restaurant that was built in 1982. The underlying zoning supports all of the entertainment uses on the site.

The Health Dept has already approved the pool and bathroom additions.

Michael Braun – Property Owner

AGREEMENT REGARDING DEFERRED CONDITIONS BETWEEN THE CITY OF PALM SPRINGS AND WESSMAN HOLDINGS, LLC TPM 36438

Title of Document

THIS AREA FOR RECORDER'S USE ONLY

AGREEMENT REGARDING DEFERRED CONDITIONS

This AGREEMENT REGARDING DEFERRED CONDITIONS ("Agreement") is made effective as of 03.21, 2012, by and between the City of Palm Springs, a California municipal corporation and charter city ("City"), and Wessman Holdings, LLC, a California limited liability company ("Owner"), with reference to the following:

BACKGROUND:

A. Filed Applications. Prior to the effective date of this Agreement, Owner, as the owner of fee title to 1.38 acres of developed property located at the northeast corner of the intersection of Sunrise Way and Tahquitz Canyon Way in the City of Palm Springs ("Property"), filed applications ("Applications") requesting (1) that the City Planning Commission (a) approve Administrative Minor Modification Case 7.1369, (b) approve Tentative Parcel Map Waiver 36438, and (c) adopt an appropriate negative declaration under the California Environmental Quality Act, and (2) that the City Council (a) approve a Change of Zone for the Property, and (b) adopt an appropriate negative declaration under the California Environmental Quality Act.

B. Approval Subject to Agreement Regarding Deferred Conditions. Prior to the effective date of this Agreement, the Applications were approved subject, among other things, to the requirement that Owner execute an agreement regarding certain Deferred Conditions specified by the City Engineering Department, and this Agreement is intended to satisfy such requirement.

AGREEMENT: NOW, THEREFORE, IT IS AGREED AS FOLLOWS:

1. Satisfaction of Deferred Conditions. Owner agrees to and shall construct off-site improvements and comply with other Deferred Conditions specified by the City Engineering Department at such time as a modification or expansion of use of the existing Del Taco building is proposed and approved, which modification or expansion exceeds the sum of $300,000 in total costs; provided, however, only costs of basic core and shell improvements shall be included in calculating such $300,000 amount, and all other costs, such as costs incurred in connection with any A/C, plumbing, electrical, interior reconfigurations or improvements, any or all utilities, furniture, fixtures or equipment, etc. and any consultants fees (architectural, engineering, landscape fees or permit fees, public agency, or any other fees) shall not be included in such calculation.

2. General Provisions.

A. Entire Agreement. This Agreement contains the entire agreement of the parties with respect to matters covered herein, and there are no other agreements or representations, written or oral, other than as contained herein.

B. Cooperation. Each party agrees to and shall do and perform such other and further acts and properly execute and deliver such other and further documents

2012-0151829
04/03/2012 08:17A
2 of 7

as may be reasonably necessary, expedient or convenient to implement the intents and purposes hereof.

C. Reasonable Approvals. Whenever this Agreement requires or calls for the approval or consent of any party hereto, such approval shall not be unreasonably withheld, delayed or conditioned.

D. Binding Arbitration. (Intentionally Deleted.)

E. Legal Fees. In the event of any dispute, arbitration or litigation arising out of or relating to this Agreement, or the breach or performance of it, the prevailing party shall be entitled to recover, in addition to any other appropriate relief, reasonable legal fees and costs incurred in connection therewith.

F. Force Majeure. Neither party shall be deemed to be in default where failure or delay in performance of any of such party's obligations under this Agreement is caused by action or inaction on the part of the other party, or by floods, earthquakes, Acts of God, fires, wars, riots, hostilities, strikes, labor difficulties, government regulations, court actions, or other causes beyond such party's reasonable control. If any such events shall occur, the term of this Agreement and the time for performance hereunder shall be extended by the length of time that such events reasonably prevented or delayed performance.

G. No Partnership. Notwithstanding anything herein, this Agreement is not intended to, and does not, create any type of partnership or joint venture between City and Owner.

H. Binding on Successors. This Agreement shall be binding on the parties hereto, their heirs, successors and assigns.

I. Independent Legal Representation. Each party hereto has, at all times during the negotiation and execution of this Agreement, been represented by independent legal counsel.

J. Incorporation of Recitals and Exhibits. All recitals herein and all Exhibits attached hereto are incorporated into and made a part of this Agreement.

K. Captions and Headings. Any captions or headings in this Agreement are for convenience only, and shall not be used to determine or construe meanings of substantive language herein.

L. Applicable Law. This Agreement is entered into in California, and relates to California real property, and shall be determined in accordance with the laws of the State of California.

M. Venue. In the event of any arbitration or litigation arising out of or relating to this Agreement, or the breach or performance of it, any such arbitration shall be conducted in the Coachella Valley, and any such litigation shall be filed in the Indio Branch of the Riverside County Superior Court.

N. Severability. In the event any provisions of this Agreement is deemed or construed by arbitration or a court of competent jurisdiction to be unenforceable, the remaining provisions shall nevertheless remain binding and enforceable to the maximum extent possible.

O. Notices. As used in this Agreement, "notice" includes, but is not limited to, the communication of notice, request, demand, approval, statement, report, acceptance, consent, waiver, appointment or other communication required or permitted hereunder. All notices shall be in writing and shall be considered given either: (i) when delivered in person to the recipient named below; or (ii) on the date of delivery shown on the return receipt, after deposit in the United States mail in a sealed envelope as either registered or certified mail with return receipt requested, and postage and postal charges prepaid, and addressed to the recipient named below; or (iii) on the date of delivery shown in the records of the telegraph company after transmission by telegraph to the recipient named below. All notices shall be addressed as follows:

Planning Commission Staff Report

Date:	March 14, 2012
Case:	5.1275 CZ, 7.1369 AMM and TPM 36438 (parcel map waiver)
Application Type:	Change of Zone (CZ), Administrative Minor Modification (AMM) and Tentative Parcel Map Waiver (TPM)
Location:	Northeast corner Tahquitz Canyon Way & Sunrise Way
Applicant:	Wessman Holdings, LLC
Zone:	C1-AA (Large Scale Retail Commercial)
General Plan:	NCC (Neighborhood Community Commercial) and O (Office)
APN:	502 065 008 and 502 065 018
From:	Craig A. Ewing, AICP, Director of Planning Services
Project Planner:	Ken Lyon, Associate Planner

PROJECT DESCRIPTION:

An application by Wessman Holdings LLC, to change the zone designation of a roughly 1.38-acre parcel from C1-AA (Large Scale Retail Commercial) to C1 (Retail Commercial). The application includes an Administrative Minor Modification for a five (5) foot reduction in setbacks along Tahquitz Canyon Way and a Tentative Parcel Map Waiver application (TPM 36438), to reconfigure the two lots that comprise the 1.38 acre parcel.

RECOMMENDATION:

DRAFT

That the Planning Commission

- Adopts the Negative Declaration pursuant to the guidelines of the California Environmental Quality Act (CEQA), and
- Approves the Administrative Minor Modification Case 7.1369 and
- Approves Tentative Parcel Map Waiver 36438, an application to reconfigure two lots that comprise a roughly 1.38 acre parcel,

And furthermore, that the Planning Commission recommends that the City Council:

- Adopt the Negative Declaration pursuant to the guidelines of the California Environmental Quality Act (CEQA), and
- Approve the Change of Zone request for parcel APN's 502 065 008 and 502 065 018 from C1-AA to C-1, subject to the attached conditions of approval.

PRIOR ACTIONS TAKEN ON THE PROJECT: None

BACKGROUND AND SETTING:

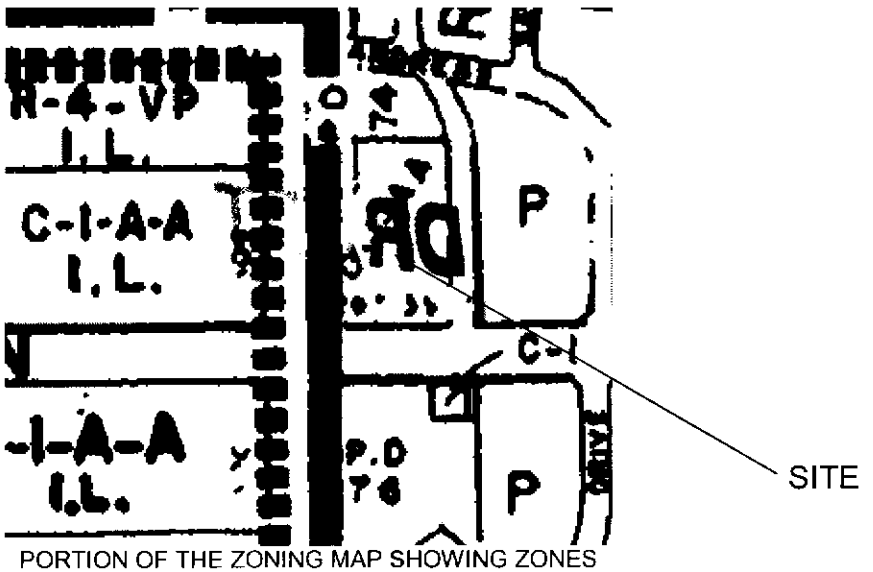
The subject parcel is located at the northeast corner of Sunrise Way and Tahquitz Canyon Way. The site is fully developed with existing office and restaurant uses in existing structures with on-site parking and landscaping.

Both Tahquitz Canyon Way and Sunrise Way are designated as major thoroughfares on the City's General Plan Circulation Map. The parcels are currently fully developed and provide commercial uses that serve the adjacent residential neighborhoods and the community in general. Surrounding land uses are as follows:

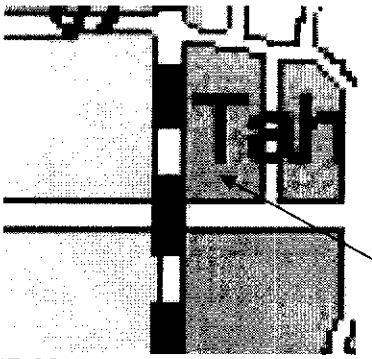
Table 1: Adjacent General Plan Designations, Zones and Land Uses:

	General Plan	Zoning	Existing Land Uses
North	Neighborhood Community Commercial (NCC)	PD 74	Office
South	NCC	PD 76	Retail
East	O (Office)	P (Professional)	Professional Office
West	Tourist Resort Commercial	C-1-AA (Lg. Scale Commercial / Retail)	Vacant / Gas Station

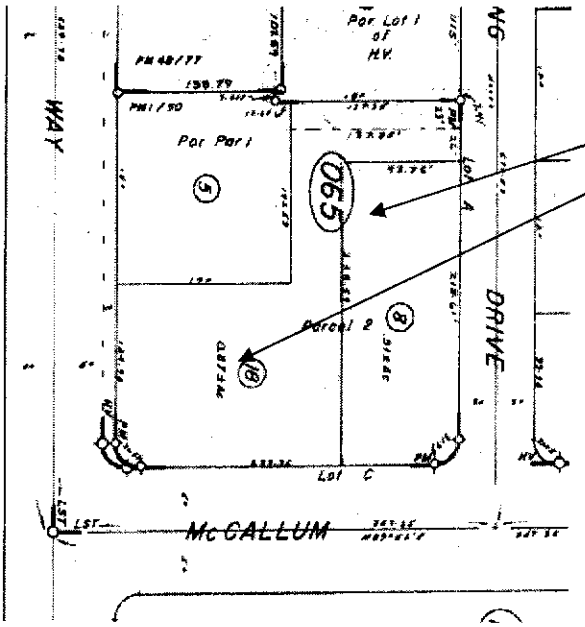
The following graphics show portions of the zoning map, the general plan land use map, the tax map and an aerial photo showing the parcel and surrounding development.



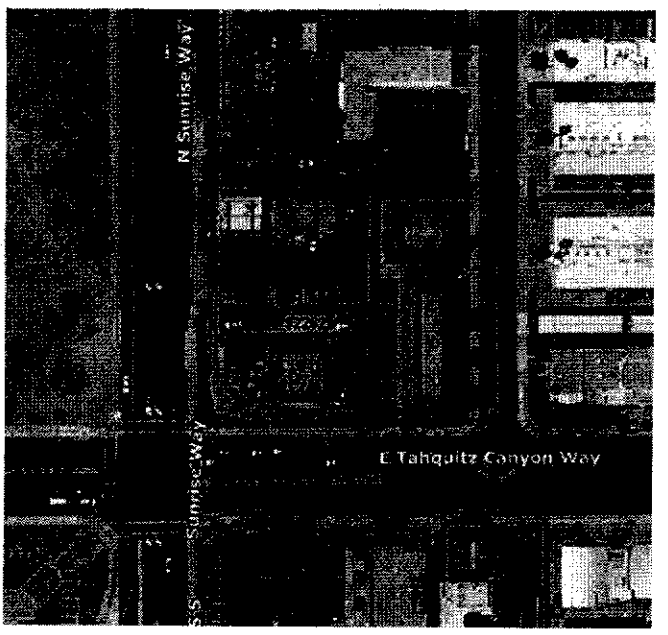
PORTION OF THE ZONING MAP SHOWING ZONES



PORTION OF THE GENERAL PLAN MAP SHOWING LAND USES



PORTION OF THE TAX MAP FOR THE
NORTHEAST CORNER OF TAHQUITZ AND SUNRISE WAY



AERIAL PHOTO SHOWING THE PARCEL AND SURROUNDING EXISTING DEVELOPMENT

The applicant seeks to reconfigure the two parcels within the Tentative Parcel Map to facilitate sale of the parcels. The minimum parcel size for the C-1-AA zone is two (2) gross acres, however the combined total area of the two lots is only roughly 1.38 acres. Reconfiguration of lots within a parcel map may occur only when the resultant lots conform to the development standards of the zone in which they are located. In this case, the combined lots are too small to meet the minimum lot area of the C-1-AA zone. The minimum lot size for the C-1 zone is only 20,000 square feet. Thus, by seeking approval of the zone change the proposed reconfigured lots would conform to the standards of the (new) zone.

The Administrative Minor Modification (AMM) is necessary to formally establish the front yard setback for the existing office building at seventy (70) feet from the centerline of Tahquitz Canyon Way as the legal conforming front yard setback for that lot for purposes of conformity findings for the Change of Zone. The minimum required setback pursuant to Zoning Code Section 93.01.02 is seventy-five (75) feet; thus the applicant is seeking a five foot reduction in this setback.

ANALYSIS:

General Plan

The subject property lies within two land use designations of the General Plan: Neighborhood Community Commercial (NCC; 0.35 FAR) and Office (O; 0.35 FAR). The "NCC" land use designation encourages convenience commercial uses that serve adjacent residential neighborhoods. The "O" land use designation allows for development of office uses. Retail uses in this district should be limited to uses directly related to office operations, such as restaurants, office supply stores and pharmacies associated with a medical building. Both land uses have a maximum floor area ratio (FAR) of 0.35[1] and existing uses on site are consistent with the land use designations in which they are located.

An analysis of the floor area ratio of the existing development for both parcels is shown here:

Parcel 1: (Del Taco Building) 2,759 square feet. Proposed lot area: 24,630 square feet. FAR: 0.15: conforms.

Parcel 2: (Retail / Office Buildings total 9,190 square feet. Proposed lot area: 35,054 square feet. FAR: 0.26: conforms.

The proposed change of zone and parcel map were evaluated and found to be consistent with policies and goals of the City's General Plan as follows:

> *Policy LU4. Ensure that sufficient land is designated for commercial use in appropriate areas to support the current and future needs of the community and surrounding areas in a manner that responds to the changing market conditions.*

The proposed zone change from C-1-AA to C-1 and the proposed Tentative Parcel Map is consistent with this policy. The land at this location is appropriate for commercial uses because it is at the intersection of two major thoroughfares and provides commercial and retail amenities to nearby residential neighborhoods.

[1] Floor Area Ratio (FAR) is the ratio of the total net floor area of a building to the total lot area and describes the intensity of use or density of a site.

Policy LU1.1 Ensure that development meets or exceeds the requirements and standards specified within each land use designation.

The existing commercial and office development on the subject parcels is developed with uses and densities that are consistent with the standards for the land use designation in which they are located. .

Change of Zone.
The project proposes to change the zone designation from C-1-AA to C-1. The change of zone is necessary to facilitate the reconfiguration of lots within the parcel map. Findings for the change of zone are evaluated later in this staff report.

Zoning
The change of zone application proposes that all lots within the proposed subdivision be zoned C-1 (Commercial Retail). The proposed parcel reconfiguration and C-1 zone development standards are analyzed below in Table 2.

Table 2: M-2 Zone Requirements and the Proposed Subdivision

	C-1 Min. Requirements	Proposed Subdivision	
		Lot 1	Lot 2
Lot depth	150	170 ft (conforms)	287 ft (conforms)
Lot width	100	145 ft (conforms)	107 ft (conforms)
Lot Area	20,000 sf	0.56 ac (24,630 sf) conforms	0.80 acres (35.,054 sf) (conforms)
Front Yard	5 feet	72 ft (conforms)	20 ft (conforms)
Special Setbacks	75 ft from centerline of Tahquitz Canyon Way	77.7 ft (conforms)	70 ft (**conforms with approval of AMM**)
Bldg Area	2,000 minimum	2,759 sf (conforms)	5,881 and 3,309 sf (conforms)
Bldg. Height	30 feet max	One story (conforms)	One story (conforms)
Landscaping	50% of yard areas created by required setbacks is to be landscaped.	95% is landscaped (conforms)	95% is landscaped (conforms)

Administrative Minor Modification Required.

The proposed reconfigured lots conform to the development standards of the zone except that the existing front yard along Tahquitz Canyon Way on lot 2 is slightly less than the required 75 feet for that street frontage. The applicant has included an Administrative Minor Modification (AMM) application seeking a five (5) foot reduction in the Tahquitz Canyon front yard setback from seventy-five (75) feet to seventy feet (70) feet. Findings for the AMM are included later in this staff report.

Parcel Map Waiver

The applicant has applied for a parcel map waiver. Pursuant to the California Subdivision Map Act Section 66428, California municipalities may waive the requirements for a parcel map upon

making certain findings that the proposed subdivision complies with specific requirements of the Map Act and local ordinances. Section 9 of the City's Municipal Code outlines the process and the requirements for granting approval of a parcel map waiver.

Municipal Code Section 9.62.070: Waiver of parcel map.

> *Except where required by the Subdivision Map Act, no parcel map need be filed or recorded provided that pursuant to the procedure set forth in Chapter 9.63, the planning commission finds and determines that the proposed division of land complies with all applicable requirements as to area, improvement and design, floodwater drainage control, appropriate improved public roads, sanitary disposal facilities, water supply availability, environmental protection, and all other requirements of the Subdivision Map Act and any applicable provisions of this title.*

The Subdivision Map Act allows parcel map waivers for the division of land of less than five parcels as long as the local agency (the City) provides a procedure for waiving the requirement for a parcel map. The Municipal Code sections below outline the procedures for a map waiver.

Section 9.63.180, *Planning Commission action*:

> *"(a) The planning commission shall consider the application within forty-five days after the filing of the application. The planning commission may grant the application, provided that it finds that the proposal complies with applicable requirements as to area, general plan, improvements and design, floodwater drainage control, appropriate improved public roads, sanitary disposal facilities, water supply availability, environmental protection, and other requirements of this title. The time limit for action may be extended by mutual consent of the subdivider and the director of planning and zoning.*
>
> *(b) If a parcel map waiver approval is granted, a certificate of compliance shall be filed with the county recorder, which certificate shall describe the real properties involved, name the owners thereof, and state that a* parcel map waiver *has been granted by action of the planning commission, giving the date thereof."*

Section 9.63.280, *Issuance when application for* waiver *of parcel map approved:*

> *"Upon request of the owner of the property, a certificate of compliance may be issued and filed for record for any real property for which an application for* waiver *of the requirement of a parcel map has been approved under this chapter."*

After the Planning Commission makes the required findings for the map waiver, the approval process becomes similar to a Lot Line Adjustment (in that a Certificate of Compliance is issued creating the new parcels proposed as part of the parcel map waiver). The Certificate of Compliance is processed by the Engineering Department at the staff level.

FINDINGS:

Three sets of findings will be analyzed below; (1) Change of zone findings, (2) Administrative Minor Modification findings and (3). Parcel Map Waiver findings.

Change of Zone Findings.
The findings for a Change of Zone are found in PSZO Section 94.07.00 (A) as follows:

1. *The proposed change of zone is in conformity with the general plan map and report. Any amendment of the general plan necessitated by the proposed change of zone should be made according to the procedure set forth in the State Planning Law either prior to the zone change, or notice may be given and hearings held on such general plan amendment concurrently with notice and hearings on the proposed change of zone.*

The proposed change from C-1-AA to C-1 conforms to the General Plan Land Use Designations of Neighborhood Community Commercial (NCC) and Office (O) in terms of uses on the site (which are commercial and office type uses) and the development density which is below the maximum 0.35 FAR for each proposed parcel. The Change of Zone is also consistent with policies of the General Plan as follows:

> *Policy LU4.1 Ensure that sufficient land is designated for commercial use in appropriate areas to support the current and future needs of the community and surrounding areas in a manner that responds to the changing market conditions.*

The proposed zone change from C-1-AA to C-1 and the proposed Tentative Parcel Map is consistent with this policy. The land at this location is appropriate for commercial uses because it is at the intersection of two major thoroughfares and provides commercial and retail amenities to nearby residential neighborhoods.

> *Policy LU1.1 Ensure that development meets or exceeds the requirements and standards specified within each land use designation.*

The existing commercial and office development on the subject parcels is developed with uses and densities that are consistent with the standards for the land use designation in which they are located. .

2. *The subject property is suitable for the uses permitted in the proposed zone, in terms of access, size of parcel, relationship to similar or related uses, and other considerations deemed relevant by the commission and council.*

The application proposes two (2) lots each of which are conforming to the minimum size and dimensional requirements for the C-1 zone. The parcels are both fully developed with commercial and office uses that are permissible in the proposed C-1 zone. The parcels are located along major thoroughfares which have adequate capacity and physical configuration to provide safe and appropriate access to each of the proposed parcels. .

3. *The proposed change of zone is necessary and proper at this time, and is not likely to be detrimental to the adjacent property or residents.*

The change of zone request allows reconfiguration of the parcels in a manner that is consistent with the development standards for the C-1 zone. As they presently exist, the lots would be considered "legal non-conforming" because they are less than the required minimum two acre lot size of the C-1-AA zone. The parcels are currently fully developed with uses and structures that are consistent with the C-1 zone. The change of zone is not detrimental to residential zones in the vicinity because the sites are developed with uses and structures that are supportive and convenient to the adjacent residential zone.

Findings for the Administrative Minor Modification

Pursuant to Zoning Code Section 94.06.01(A)(5), Findings are hereby made in support of the Administrative Minor Modification seeking reduction in the front yard setback from 75 feet from the centerline of the street right-of-way to 70 feet for Parcel 2 along Tahquitz Canyon Way :

1. *The requested minor modification is consistent with the General Plan, applicable Specific Plan(s) and overall objectives of the zoning ordinance.*

The General Plan designation for this property is O (Office). There is no General Plan Policy that would be adversely affected by this modification nor are their any specific plans associated with this property. The overall objective of the Palm Springs Zoning Code is the comprehensive and orderly planned use of land resources. The administrative minor modification establishes the findings and guidelines necessary to carry out minor but orderly development of exceptions to the ordinance. Section 94.06.01(A)(5) of the Palm Springs Zoning Code (PSZC) specifically allows for a 20% reduction of the required front yard set-backs and staff concludes that the request has met the finding.

2. *The neighboring properties will not be adversely affected as a result of the approval or conditional approval of the minor modification.*

The set-back reduction request is to bring an existing development into conformance with the current zoning development standards for front yard setbacks along Tahquitz Canyon Way. The structures on the site were constructed around 1977 and the condition of the front yard setback at 70 feet from the Tahquitz centerline instead of the required 75 foot front yard setback has not adversely affected the neighboring properties and Staff concludes that the request has met this finding.

3. *The approval of the minor modification will not be detrimental to the health, safety, or general welfare of persons residing or working on the site or in the vicinity.*

All construction on the site has existed for many years without detriment to the persons on or around the site. Consequently, staff concludes that the request has met the finding.

4. *The approval of the minor modification is justified by environmental features, site conditions, location of existing improvements, or historic development patterns of the property or neighborhood.*

The proposed reduction in setbacks is an administrative action to bring existing conditions into

conformance to enable processing of the requested zone change and tentative parcel map waiver. Staff concludes that the set-back reduction is justified because it reflects existing conditions that have been in place for many years without detrimental effect.

Parcel Map Waiver Findings

The approval of the map waiver is dependent on the Planning Commission findings that the proposal complies with applicable requirements as to area, general plan, improvements and design, floodwater drainage control, appropriate improved public roads, sanitary disposal facilities, water supply availability, environmental protection, and other requirements of this title.

1. *Area*

   The C-1 zone specifies minimum lot dimensions of 100 feet by 150 feet and a minimum lot area of 20,000 gross square feet. The proposed lots conform to these area requirements.

2. *General Plan*

   The subject property lies within two land use designations of the General Plan: Neighborhood Community Commercial (NCC; 0.35 FAR) and Office (O; 0.35 FAR). The "NCC" land use designation encourages convenience commercial uses that serve adjacent residential neighborhoods. The "O" land use designation allows for development of office uses. Retail uses in this district should be limited to uses directly related to office operations, such as restaurants, office supply stores and pharmacies associated with a medical building. Both land uses have a maximum floor area ratio (FAR) of 0.35

   An analysis of the floor area ratio of the existing development for both parcels is shown here:

   Parcel 1: (Del Taco Building) 2,759 square feet. Proposed lot area: 24,630 square feet. FAR: 0.15: conforms.
   Parcel 2: (Retail / Office Buildings total 9,190 square feet. Proposed lot area: 35,054 square feet. FAR: 0.26: conforms.

   The proposed change of zone and parcel map were evaluated and found to be consistent with policies and goals of the City's General Plan as follows:

   > *Policy LU4. Ensure that sufficient land is designated for commercial use in appropriate areas to support the current and future needs of the community and surrounding areas in a manner that responds to the changing market conditions.*

   The proposed zone change from C-1-AA to C-1 and the proposed Tentative Parcel Map is consistent with this policy. The land at this location is appropriate for commercial uses because it is at the intersection of two major thoroughfares and provides commercial and retail amenities to nearby residential neighborhoods.

Policy LU1.1 Ensure that development meets or exceeds the requirements and standards specified within each land use designation.

The existing commercial and office development on the subject parcels is developed with uses and densities that are consistent with the standards for the land use designation in which they are located. .

3. *Improvements and design*

Street improvements are already installed. There are no improvements proposed for the reconfiguration of the lots under consideration.

4. *Floodwater drainage control, appropriate improved public roads, sanitary disposal facilities, water supply availability, and environmental protection.*

The subject property is not located within a flood zone. Both proposed parcels have access to an improved public road. Sanitary sewer service is available in this area and the buildings are connected to the City sewer. Water service is available subject to the terms, conditions, limitations and restrictions set forth by Desert Water Agency. The streets are already improved and all utilities exist and are operating on the premises.

ENVIRONMENTAL ASSESSMENT:

Pursuant to the California Environmental Quality Act (CEQA) Guidelines, the application has been deemed "a project". An initial study was prepared and a 20-day period for public review and comments period commenced on January 27, 2012. Copies of the draft Initial Study were previously distributed to the Planning Commission as well. Notices of the report were sent to all applicable agencies. The review period ended on February 16, 2012. At the time of this writing, no comments have been received. The project was found to have no significant adverse impacts. Thus a Notice of Intent to Adopt a Negative Declaration has been filed.

NOTIFICATION:

A public hearing notice was advertised and was mailed to all property owners within 400 feet of the subject property. As of the writing of this report, staff has not received any comment.

DOCUMENTARY TRANSFER TAX AFFIDAVIT

WARNING

ANY PERSON WHO MAKES ANY MATERIAL MISREPRESENTATION OF FACT FOR THE PURPOSE OF AVOIDING ALL OR ANY PART OF THE DOCUMENTARY TRANSFER TAX IS GUILTY OF A MISDEMEANOR UNDER SECTION 5 OF ORDINANCE 516 OF THE COUNTY OF RIVERSIDE AND IS SUBJECT TO PROSECUTION FOR SUCH OFFENSE.

ASSESSOR'S PARCEL NO. 502 -- 065 -- 018,008 I declare that the documentary transfer tax for this
Property Address: 102 N. SUNRISE WAY, PALM SPRINGS transaction is: $ 0 .

If this transaction is exempt from Documentary Transfer Tax, the reason must be identified below.

I CLAIM THAT THIS TRANSACTION IS EXEMPT FROM DOCUMENTARY TRANSFER TAX BECAUSE: (The Sections listed below are taken from the Revenue and Taxation Code. Please check one or explain in "Other".)

1. ___ Section 11911. The document is a lease for a term of **less** than thirty-five (35) years (including options).
2. ___ Section 11911. The easement is **not** perpetual, permanent, or for life.
3. ___ Section 11921. The instrument was given to secure a debt.
4. ___ Section 11922. The conveyance is to a governmental entity or political subdivision.
5. ___ Section 11925. The transfer is between individuals and a legal entity, or between legal entities, and does not change the proportional interests held.
6. ___ Section 11926. The instrument is from a trustor to a beneficiary, in lieu of foreclosure, and no additional consideration was paid.
7. ___ Section 11926. The grantee is the foreclosing beneficiary and the consideration paid by the foreclosing beneficiary does not exceed the unpaid debt.
8. ___ Section 11927. The conveyance relates to a dissolution of marriage or legal separation.
9. ___ Section 11930. The conveyance is an *inter vivos* gift* or a transfer by death.

   ***Please be aware that information stated on this document may be given to and used by governmental agencies, including the Internal Revenue Service. Also, certain gifts in excess of the annual Federal gift tax exemption may trigger a Federal Gift Tax. In such cases, the Transferor (donor/grantor) may be required to file Form 709 (Federal Gift Tax Return) with the Internal Revenue Service.**
10. ___ Section 11930. The conveyance is to the grantor's revocable living trust.
11. X Other (Include explanation and authority) CERTIFICATE OF COMPLIANCE TO DIVIDE THE PROPERTY INTO TWO PARCELS

I DECLARE UNDER PENALTY OF PERJURY THAT THE FOREGOING IS TRUE AND CORRECT.

Executed this 7 day of Feb, 2012 at [illegible] City, Ca State.

   A Fee

2. TITLE TO SAID ESTATE OR INTEREST AT THE DATE HEREOF IS VESTED IN:

   WESSMAN HOLDINGS, LLC, a California limited liability company

3. THE LAND REFERRED TO IN THIS REPORT IS DESCRIBED AS FOLLOWS:

   SEE EXHIBIT "A" ATTACHED HERETO AND MADE A PART HEREOF

EH\AG 12/27/2011

LEGAL DESCRIPTION

EXHIBIT "A"

THE LAND REFERRED TO IN THIS POLICY IS SITUATED IN THE STATE OF CALIFORNIA, COUNTY OF RIVERSIDE, AND IS DESCRIBED AS FOLLOWS:

PARCEL A:

PARCEL 2 OF PARCEL MAP, RECORDED FEBRUARY 26, 1969 ON FILE IN BOOK 1, PAGE 50 OF PARCEL MAPS, RECORDS OF THE CITY OF PALM SPRINGS, COUNTY OF RIVERSIDE, CALIFORNIA.

PARCEL B:

A NON-EXCLUSIVE EASEMENT FOR VEHICULAR DRIVEWAYS AND PARKING AREAS AS SET FORTH IN THAT CERTAIN "RECIPROCAL EASEMENT AGREEMENT FOR TAHQUITZ SQUARE", RECORDED SEPTEMBER 22, 2006 AS INSTRUMENT NO. 2006-0705447 OFFICIAL RECORDS.

APN(s): 502-065-018-7 AND 502-065-008-8

AT THE DATE HEREOF, ITEMS TO BE CONSIDERED AND EXCEPTIONS TO COVERAGE IN ADDITION TO THE PRINTED EXCEPTIONS AND EXCLUSIONS IN SAID POLICY FORM WOULD BE AS FOLLOWS:

A. **Property taxes,** which are a lien not yet due and payable, including any assessments collected with taxes to be levied for the fiscal year 2012-2013.

1. **Property taxes,** including any personal property taxes and any assessments collected with taxes, for the fiscal year 2011-2012, Assessor's Parcel Number 502-065-018-7.

Code Area Number:	011-003
1st Installment:	$4,032.22 PAID
2nd Installment:	$4,032.22 OPEN
Land:	$204,990.00
Improvements:	$407,540.00
Exemption:	$0.00
Personal Property:	$0.00
Bill No.:	0338336

2. **Property taxes,** including any personal property taxes and any assessments collected with taxes, for the fiscal year 2011-2012, Assessor's Parcel Number 502-065-008-8.

Code Area Number:	011-003
1st Installment:	$5,253.05 PAID
2nd Installment:	$5,253.05 OPEN
Land:	$100,025.00
Improvements:	$736,135.00
Exemption:	$0.00
Personal Property:	$0.00
Bill No.:	0578488

3. **The lien of supplemental taxes,** if any, assessed pursuant to the provisions of Chapter 3.5 (Commencing with Section 75) of the Revenue and Taxation code of the State of California.

4. **Water rights, claims or title to water,** whether or not disclosed by the public records.

5. **Covenants, conditions and restrictions** in the declaration of restrictions but omitting any covenants or restrictions, if any, including, but not limited to those based upon race, color, religion, sex, sexual orientation, familial status, marital status, disability, handicap, national origin, ancestry, or source of income, as set forth in applicable state or federal laws, except to the extent that said covenant or restriction is permitted by applicable law.

Recorded: April 27, 1946, Book 745, Page 191, of Official Records

Said covenants, conditions and restrictions provide that a violation thereof shall not defeat the lien of any mortgage or deed of trust made in good faith and for value.

6. **Covenants and easements** as set out in that certain agreement between John W. Nevins, et al, and Reproco Inc., a Delaware Corporation, dated March 20, 1969 and Recorded April 17, 1969 as Instrument No. 37800 of Official Records of Riverside County, California, to which record reference is made for further particulars.

Affects: Parcel B

7. **An unrecorded lease** with certain terms, covenants, conditions and provisions set forth therein as disclosed by the document

Entitled:	Short Form of Lease
Lessor:	John Wessman
Lessee:	Carl Karcher Enterprises, Inc., a California corporation
Recorded:	Instrument No. 1977-35690, of Official Records

The present ownership of the leasehold created by said lease and other matters affecting the interest of the lessee are not shown herein.

An agreement to amend or modify certain provisions of said lease, as set forth in the document executed by:

As Lessor:	Wessman Holdings, LLC
As Lessee:	Carl Karcher Enterprises, Inc.
Recorded:	May 16, 2003, Instrument No. 2003-355060, of Official Records

8. **Easement(s)** for the purpose(s) shown below and rights incidental thereto as granted in a document.

Granted to:	Southern California Edison Company, a corporation
Purpose:	Underground electrical supply systems and communication systems
Recorded:	November 21, 1977, Instrument No. 232451, of Official Records
Affects:	The North 4 feet of the East 137.35 feet of Parcel No. 2; and the West 4 feet of the North 225 feet of the East 137.35 feet of Parcel No. 2 of Map filed in Book 1, page 50 of Parcel Maps, records of Riverside County. Also, a 4 foot strip of land lying within said Parcel No. 2, the centerline being described as follows: Beginning at a point 8 feet South of the Northwest corner of the East 137.35 feet of said Parcel No. 2; thence Southeast 65 feet.

9. **Intentionally Deleted**

10. **Intentionally Deleted**

11. **Matters** contained in that certain document entitled "Reciprocal Easement Agreement", executed by and between Wessman Holdings, LLC, a California limited liability company and Palm Springs Oil Company recorded September 22, 2006, Instrument No. 2006-0705447, of Official Records.

Reference is hereby made to said document for full particulars.

12. **A deed of trust** to secure an indebtedness in the amount shown below, and any other obligations secured thereby

Amount:	$1,100,000.00
Dated:	August 25, 2005
Trustor:	Wessman Holdings LLC, a California limited liability company
Trustee:	Provident Financial Corp., a California corporation
Beneficiary:	Provident Savings Bank, FSB, a savings bank chartered under the laws of the United States of America
Loan No.:	88790936
Recorded:	August 31, 2005, Instrument No. 2005-0722134, of Official Records

An assignment of the beneficial interest under said deed of trust which names:

Assignee:	Banco Popular North America
Loan No.:	887-88790936
Recorded:	May 25, 2006, Instrument No. 006-0379441, of Official Records

13. **A lien for unsecured property taxes** filed by the tax collector of the county shown, for the amount set forth, and any other amounts due.

County:	Riverside
Fiscal Year:	2006-2007
Taxpayer:	Starkey Dan B TR; Gonzales Mario TR; PS Kids; Wessman Holdings
County Identification Number:	0393143
Amount:	$2,052.63
Recorded:	May 4, 2011, Instrument No. 2011-0196786, of Official Records

14. **A lien for unsecured property taxes** filed by the tax collector of the county shown, for the amount set forth, and any other amounts due.

County:	Riverside
Fiscal Year:	2006-2007
Taxpayer:	Starkey Dan B TR; Gonzales Mario TR; PS Kids; Wessman Holdings
County Identification Number:	0393144
Amount:	$4,058.51
Recorded:	May 4, 2011, Instrument No. 2011-0196787, of Official Records

ATTACHMENT ONE

AMERICAN LAND TITLE ASSOCIATION
RESIDENTIAL TITLE INSURANCE POLICY (6-1-87) EXCLUSIONS

In addition to the Exceptions in Schedule B, you are not insured against loss, costs, attorneys' fees, and expenses resulting from:

1. Governmental police power, and the existence or violation of any law or government regulation. This includes building and zoning ordinances and also laws and regulations concerning:
   - land use
   - improvements on the land
   - land division
   - environmental protection

   This exclusion does not apply to violations or the enforcement of these matters which appear in the public records at policy date.

   This exclusion does not limit the zoning coverage described in Items 12 and 13 of Covered Title Risks.
2. The right to take the land by condemning it, unless:
   - a notice of exercising the right appears in the public records on the Policy Date
   - the taking happened prior to the Policy Date and is binding on you if you bought the land without knowledge of the taking
3. Title Risks:
   - that are created, allowed, or agreed to by you
   - that are known to you, but not to us, on the Policy Date- unless they appeared in the public records
   - that result in no loss to you
   - that first affect your title after the Policy Date - this does not limit the labor and material lien coverage in Item 8 of Covered Title Risks
4. Failure to pay value for your title.
5. Lack of a right:
   - to any land outside the area specifically described and referred to in Item 3 of Schedule A

     or
   - in streets, alleys, or waterways that touch your land

   This exclusion does not limit the access coverage in Item 5 of Covered Title Risks.

In addition to the Exclusions, you are not insured against loss, costs, attorneys' fees, and the expenses resulting from:

1. Any rights, interests, or claims of parties in possession of the land not shown by the public records.
2. Any easements or liens not shown by the public records. This does not limit the lien coverage in Item 8 of Covered Title Risks.
3. Any facts about the land which a correct survey would disclose and which are not shown by the public records. This does not limit the forced removal coverage in Item 12 of Covered Title Risks.
4. Any water rights or claims or title to water in or under the land, whether or not shown by the public records.

CALIFORNIA LAND TITLE ASSOCIATION STANDARD COVERAGE POLICY - 1990
EXCLUSIONS FROM COVERAGE

The following matters are expressly excluded from the coverage of this policy and the Company will not pay loss or damage, costs, attorneys' fees or expenses which arise by reason of:

1. (a) Any law, ordinance or governmental regulation (including but not limited to building and zoning laws, ordinances, or regulations) restricting, regulating, prohibiting or relating (i) the occupancy, use, or enjoyment of the land; (ii) the character, dimensions or location of any improvement now or hereafter erected on the land; (iii) a separation in ownership or a change in the dimensions or area of the land or any parcel of which the land is or was a part; or (iv) environmental protection, or the effect of any violation of these laws, ordinances or governmental regulations, except to the extent that a notice of the enforcement thereof or a notice of a defect, lien or encumbrance resulting from a violation or alleged violation affecting the land has been recorded in the public records at Date of Policy.
   (b) Any governmental police power not excluded by (a) above, except to the extent that a notice of the exercise thereof or a notice of a defect, lien or encumbrance resulting from a violation or alleged violation affecting the land has been recorded in the public records at Date of Policy.
2. Rights of eminent domain unless notice of the exercise thereof has been recorded in the public records at Date of Policy, but not excluding from coverage any taking which has occurred prior to Date of Policy which would be binding on the rights of a purchaser for value without knowledge.
3. Defects, liens, encumbrances, adverse claims, or other matters:
   (a) whether or not recorded in the public records at Date of Policy, but created, suffered, assumed or agreed to by the insured claimant;
   (b) not known to the Company, not recorded in the public records at Date of Policy, but known to the insured claimant and not disclosed in writing to the Company by the insured claimant prior to the date the insured claimant became an insured under this policy;
   (c) resulting in no loss or damage to the insured claimant;
   (d) attaching or created subsequent to Date of Policy; or
   (e) resulting in loss or damage which would not have been sustained if the insured claimant had paid value for the insured mortgage or for the estate or interest insured by this policy.
4. Unenforceability of the lien of the insured mortgage because of the inability or failure of the insured at Date of Policy, or the inability or failure of any subsequent owner of the indebtedness, to comply with the applicable doing business laws of the state in which the land is situated.
5. Invalidity or unenforceability of the lien of the insured mortgage, or claim thereof, which arises out of the transaction evidenced by the insured mortgage and is based upon usury or any consumer credit protection or truth in lending law.
6. Any claim, which arises out of the transaction vesting in the insured the estate or interest insured by this policy or the transaction creating the interest of the insured lender, by reason of the operation of federal bankruptcy, state insolvency or similar creditors' rights laws.

SCHEDULE B, PART I
EXCEPTIONS FROM COVERAGE

This policy does not insure against loss or damage (and the Company will not pay costs, attorneys' fees or expenses) which arise by reason of:

PART I

1. Taxes or assessments which are not shown as existing liens by the records of any taxing authority that levies taxes or assessments on real property or by the public records. Proceedings by a public agency which may result in taxes or assessments, or notices of such proceedings, whether or not shown by the records of such agency or by the public records.
2. Any facts, rights, interests or claims which are not shown by the public records but which could be ascertained by an inspection of the land or which may be asserted by persons in possession thereof.
3. Easements, liens or encumbrances, or claims thereof, not shown by the public records.
4. Discrepancies, conflicts in boundary lines, shortage in area, encroachments, or any other facts which a correct survey would disclose, and which are not shown by the public records.
5. (a) Unpatented mining claims; (b) reservations or exceptions in patents or in Acts authorizing the issuance thereof; (c) water rights, claims or title to water, whether or not the matters excepted under (a), (b), or (c) are shown by the public records.
6. Any lien or right to a lien for services, labor or material not shown by the public records.

FORMERLY AMERICAN LAND TITLE ASSOCIATION LOAN POLICY (10-17-92)
WITH A.L.T.A. ENDORSEMENT-FORM 1 COVERAGE
EXCLUSIONS FROM COVERAGE

The following matters are expressly excluded from the coverage of this policy and the Company will not pay loss or damage, costs, attorneys' fees or expenses which arise by reason of:

1. (a) Any law, ordinance or governmental regulation (including but not limited to building and zoning laws, ordinances, or regulations) restricting, regulating, prohibiting or relating to (i) the occupancy, use, or enjoyment of the land; (ii) the character, dimensions or location of any improvement now or hereafter erected on the land; (iii) a separation in ownership or a change in the dimensions or area of the land or any parcel of which the land is or was a part; or (iv) environmental protection, or the effect of any violation of these laws, ordinances or governmental regulations, except to the extent that a notice of the enforcement thereof or a notice of a defect, lien or encumbrance resulting from a violation or alleged violation affecting the land has been recorded in the public records at Date of Policy.
   (b) Any governmental police power not excluded by (a) above, except to the extent that a notice of the exercise thereof or a notice of a defect, lien or encumbrance resulting from a violation or alleged violation affecting the land has been recorded in the public records at Date of Policy.
2. Rights of eminent domain unless notice of the exercise thereof has been recorded in the public records at Date of Policy, but not excluding from coverage any taking which has occurred prior to Date of Policy which would be binding on the rights of a purchaser for value without knowledge.
3. Defects, liens, encumbrances, adverse claims, or other matters:
   (a) created, suffered, assumed or agreed to by the insured claimant;
   (b) not known to the Company, not recorded in the public records at Date of Policy, but known to the insured claimant and not disclosed in writing to the Company by the insured claimant prior to the date the insured claimant became an insured under this policy;
   (c) resulting in no loss or damage to the insured claimant;
   (d) attaching or created subsequent to Date of Policy (except to the extent that this policy insures the priority of the lien of the insured mortgage over any statutory lien for services, labor or material or to the extent insurance is afforded herein as to assessments for street improvements under construction or completed at Date of Policy); or
   (e) resulting in loss or damage which would not have been sustained if the insured claimant had paid value for the insured mortgage.
4. Unenforceability of the lien of the insured mortgage because of the inability or failure of the insured at Date of Policy, or the inability or failure of any subsequent owner of the indebtedness, to comply with applicable doing business laws of the state in which the land is situated.
5. Invalidity or unenforceability of the lien of the insured mortgage, or claim thereof, which arises out of the transaction evidenced by the insured mortgage and is based upon usury or any consumer credit protection or truth in lending law.
6. Any statutory lien for services, labor or materials (or the claim of priority of any statutory lien for services, labor or materials over the lien of the insured mortgage) arising from an improvement or work related to the land which is contracted for and commenced subsequent to Date of Policy and is not financed in whole or in part by proceeds of the indebtedness secured by the insured mortgage which at Date of Policy the insured has advanced or is obligated to advance.
7. Any claim, which arises out of the transaction creating the interest of the mortgagee insured by this policy, by reason of the operation of federal bankruptcy, state insolvency, or similar creditors' rights laws, that is based on:
   (i) the transaction creating the interest of the insured mortgagee being deemed a fraudulent conveyance or fraudulent transfer; or
   (ii) the subordination of the interest of the insured mortgagee as a result of the application of the doctrine of equitable subordination; or
   (iii) the transaction creating the interest of the insured mortgagee being deemed a preferential transfer except where the preferential transfer results from the failure:
      (a) to timely record the instrument of transfer; or
      (b) of such recordation to impart notice to a purchaser for value or a judgement or lien creditor.

The above policy form may be issued to afford either Standard Coverage or Extended Coverage.
In addition to the above Exclusions from Coverage, the Exceptions from Coverage in a Standard Coverage policy will also include the following Exceptions from Coverage:

EXCEPTIONS FROM COVERAGE

This policy does not insure against loss or damage (and the Company will not pay costs, attorneys' fees or expenses) which arise by reason of:

1. Taxes or assessments which are not shown as existing liens by the records of any taxing authority that levies taxes or assessments on real property or by the public records. Proceedings by a public agency which may result in taxes or assessments, or notices of such proceedings, whether or not shown by the records of such agency or by the public records.
2. Any facts, rights, interests or claims which are not shown by the public records but which could be ascertained by an inspection of the land or which may be asserted by persons in possession thereof.
3. Easements, liens or encumbrances, or claims thereof, not shown by the public records.
4. Discrepancies, conflicts in boundary lines, shortage in area, encroachments, or any other facts which a correct survey would disclose, and which are not shown by the public records.
5. (a) Unpatented mining claims; (b) reservations or exceptions in patents or in Acts authorizing the issuance thereof; (c) water rights, claims or title to water, whether or not the matters excepted under (a), (b) or (c) are shown by the public records.
6. Any lien or right to a lien for services, labor or material not shown by the public records.

2006 AMERICAN LAND TITLE ASSOCIATION LOAN POLICY (06-17-06)
EXCLUSIONS FROM COVERAGE

The following matters are expressly excluded from the coverage of this policy, and the Company will not pay loss or damage, costs, attorneys' fees, or expenses that arise by reason of:

1. (a) Any law, ordinance, permit, or governmental regulation (including those relating to building and zoning) restricting, regulating, prohibiting, or relating to
   (i) the occupancy, use, or enjoyment of the Land;
   (ii) the character, dimensions, or location of any improvement erected on the Land;
   (iii) the subdivision of land; or
   (iv) environmental protection;
   or the effect of any violation of these laws, ordinances, or governmental regulations. This Exclusion 1(a) does not modify or limit the coverage provided under Covered Risk 5.
   (b) Any governmental police power. This Exclusion 1(b) does not modify or limit the coverage provided under Covered Risk 6.
2. Rights of eminent domain. This Exclusion does not modify or limit the coverage provided under Covered Risk 7 or 8.
3. Defects, liens, encumbrances, adverse claims, or other matters
   (a) created, suffered, assumed, or agreed to by the Insured Claimant;
   (b) not Known to the Company, not recorded in the Public Records at Date of Policy, but Known to the Insured Claimant and not disclosed in writing to the Company by the Insured Claimant prior to the date the Insured Claimant became an Insured under this policy;
   (c) resulting in no loss or damage to the Insured Claimant;
   (d) attaching or created subsequent to Date of Policy (however, this does not modify or limit the coverage provided under Covered Risk 11, 13, or 14); or
   (e) resulting in loss or damage that would not have been sustained if the Insured Claimant had paid value for the Insured Mortgage.
4. Unenforceability of the lien of the Insured Mortgage because of the inability or failure of an Insured to comply with applicable doing-business laws of the state where the Land is situated.
5. Invalidity or unenforceability in whole or in part of the lien of the Insured Mortgage that arises out of the transaction evidenced by the Insured Mortgage and is based upon usury or any consumer credit protection or truth-in-lending law.
6. Any claim, by reason of the operation of federal bankruptcy, state insolvency, or similar creditors' rights laws, that the transaction creating the lien of the Insured Mortgage, is
   (a) a fraudulent conveyance or fraudulent transfer, or
   (b) a preferential transfer for any reason not stated in Covered Risk 13(b) of this policy.
7. Any lien on the Title for real estate taxes or assessments imposed by governmental authority and created or attaching between Date of Policy and the date of recording of the Insured Mortgage in the Public Records. This Exclusion does not modify or limit the coverage provided under Covered Risk 11(b).

The above policy form may be issued to afford either Standard Coverage or Extended Coverage.
In addition to the above Exclusions from Coverage, the Exceptions from Coverage in a Standard Coverage policy will also include the following Exceptions from Coverage:

EXCEPTIONS FROM COVERAGE

This policy does not insure against loss or damage (and the Company will not pay costs, attorneys' fees or expenses) that arise by reason of:

1. (a) Taxes or assessments that are not shown as existing liens by the records of any taxing authority that levies taxes or assessments on real property or by the Public Records; (b) proceedings by a public agency that may result in taxes or assessments, or notices of such proceedings, whether or not shown by the records of such agency or by the Public Records.
2. Any facts, rights, interests, or claims that are not shown by the Public Records but that could be ascertained by an inspection of the Land or that may be asserted by persons in possession of the Land.
3. Easements, liens or encumbrances, or claims thereof, not shown by the Public Records.
4. Any encroachment, encumbrance, violation, variation, or adverse circumstance affecting the Title that would be disclosed by an accurate and complete land survey of the Land and not shown by the Public Records.
5. (a) Unpatented mining claims; (b) reservations or exceptions in patents or in Acts authorizing the issuance thereof; (c) water rights, claims or title to water, whether or not the matters excepted under (a), (b), or (c) are shown by the Public Records.
6. Any lien or right to a lien for services, labor or material not shown by the Public Records.

FORMERLY AMERICAN LAND TITLE ASSOCIATION OWNER'S POLICY (10-17-92)
EXCLUSIONS FROM COVERAGE

The following matters are expressly excluded from the coverage of this policy and the Company will not pay loss or damage, costs, attorneys' fees or expenses which arise by reason of:

1. (a) Any law, ordinance or governmental regulation (including but not limited to building and zoning laws, ordinances, or regulations) restricting, regulating, prohibiting or relating to (i) the occupancy, use, or enjoyment of the land; (ii) the character, dimensions or location of any improvement now or hereafter erected on the land; (iii) a separation in ownership or a change in the dimensions or area of the land or any parcel of which the land is or was a part; or (iv) environmental protection, or the effect of any violation of these laws, ordinances or governmental regulations, except to the extent that a notice of the enforcement thereof or a notice of a defect, lien or encumbrance resulting from a violation or alleged violation affecting the land has been recorded in the public records at Date of Policy.
   (b) Any governmental police power not excluded by (a) above, except to the extent that a notice of the exercise thereof or a notice of a defect, lien or encumbrance resulting from a violation or alleged violation affecting the land has been recorded in the public records at Date of Policy.
2. Rights of eminent domain unless notice of the exercise thereof has been recorded in the public records at Date of Policy, but not excluding from coverage any taking which has occurred prior to Date of Policy which would be binding on the rights of a purchaser for value without knowledge.
3. Defects, liens, encumbrances, adverse claims, or other matters: (a) created, suffered, assumed or agreed to by the insured claimant;
   (b) not known to the Company, not recorded in the public records at Date of Policy, but known to the insured claimant and not disclosed in writing to the Company by the insured claimant prior to the date the insured claimant became an insured under this policy;
   (c) resulting in no loss or damage to the insured claimant;
   (d) attaching or created subsequent to Date of Policy, or
   (e) resulting in loss or damage which would not have been sustained if the insured claimant had paid value for the estate or interest insured by this policy.
4. Any claim, which arises out of the transaction vesting in the insured the estate or interest insured by this policy, by reason of the operation of federal bankruptcy, state insolvency, or similar creditors' rights laws, that is based on:
   (i) the transaction creating the estate or interest insured by this policy being deemed a fraudulent conveyance or fraudulent transfer; or
   (ii) the transaction creating the estate or interest insured by this policy being deemed a preferential transfer except where the preferential transfer results from the failure:
      (a) to timely record the instrument of transfer; or
      (b) of such recordation to impart notice to a purchaser for value or a judgement or lien creditor.

The above policy form may be issued to afford either Standard Coverage or Extended Coverage.
In addition to the above Exclusions from Coverage, the Exceptions from Coverage in a Standard Coverage policy will also include the following Exceptions from Coverage:

EXCEPTIONS FROM COVERAGE

This policy does not insure against loss or damage (and the Company will not pay costs, attorneys' fees or expenses) which arise by reason of:

1. Taxes or assessments which are not shown as existing liens by the records of any taxing authority that levies taxes or assessments on real property or by the public records. Proceedings by a public agency which may result in taxes or assessments, or notices of such proceedings, whether or not shown by the records of such agency or by the public records.
2. Any facts, rights, interests or claims which are not shown by the public records but which could be ascertained by an inspection of the land or which may be asserted by persons in possession thereof.
3. Easements, liens or encumbrances, or claims thereof, not shown by the public records.
4. Discrepancies, conflicts in boundary lines, shortage in area, encroachments, or any other facts which a correct survey would disclose, and which are not shown by the public records.
5. (a) Unpatented mining claims; (b) reservations or exceptions in patents or in Acts authorizing the issuance thereof; (c) water rights, claims or title to water, whether or not the matters excepted under (a), (b) or (c) are shown by the public records.
6. Any lien or right to a lien for services, labor or material not shown by the public records.

2006 AMERICAN LAND TITLE ASSOCIATION OWNER'S POLICY (06-17-06)
EXCLUSIONS FROM COVERAGE

The following matters are expressly excluded from the coverage of this policy, and the Company will not pay loss or damage, costs, attorneys' fees, or expenses that arise by reason of:

1. (a) Any law, ordinance, permit, or governmental regulation (including those relating to building and zoning) restricting, regulating, prohibiting, or relating to
   (i) the occupancy, use, or enjoyment of the Land;
   (ii) the character, dimensions, or location of any improvement erected on the Land;
   (iii) the subdivision of land; or
   (iv) environmental protection;
   or the effect of any violation of these laws, ordinances, or governmental regulations. This Exclusion 1(a) does not modify or limit the coverage provided under Covered Risk 5.
   (b) Any governmental police power. This Exclusion 1(b) does not modify or limit the coverage provided under Covered Risk 6.
2. Rights of eminent domain. This Exclusion does not modify or limit the coverage provided under Covered Risk 7 or 8.
3. Defects, liens, encumbrances, adverse claims, or other matters (a) created, suffered, assumed, or agreed to by the Insured Claimant;
   (b) not Known to the Company, not recorded in the Public Records at Date of Policy, but Known to the Insured Claimant and not disclosed in writing to the Company by the Insured Claimant prior to the date the Insured Claimant became an Insured under this policy;
   (c) resulting in no loss or damage to the Insured Claimant;
   (d) attaching or created subsequent to Date of Policy (however, this does not modify or limit the coverage provided under Covered Risk 9 and 10); or
   (e) resulting in loss or damage that would not have been sustained if the Insured Claimant had paid value for the Title.
4. Any claim, by reason of the operation of federal bankruptcy, state insolvency, or similar creditors' rights laws, that the transaction vesting the Title as shown in Schedule A, is
   (a) a fraudulent conveyance or fraudulent transfer; or
   (b) a preferential transfer for any reason not stated in Covered Risk 9 of this policy.
5. Any lien on the Title for real estate taxes or assessments imposed by governmental authority and created or attaching between Date of Policy and the date of recording of the deed or other instrument of transfer in the Public Records that vests Title as shown in Schedule A.

The above policy form may be issued to afford either Standard Coverage or Extended Coverage.
In addition to the above Exclusions from Coverage, the Exceptions from Coverage in a Standard Coverage policy will also include the following Exceptions from Coverage:

EXCEPTIONS FROM COVERAGE

This policy does not insure against loss or damage (and the Company will not pay costs, attorneys' fees or expenses) that arise by reason of:

1. (a) Taxes or assessments that are not shown as existing liens by the records of any taxing authority that levies taxes or assessments on real property or by the Public Records; (b) proceedings by a public agency that may result in taxes or assessments, or notices of such proceedings, whether or not shown by the records of such agency or by the Public Records.
2. Any facts, rights, interests, or claims that are not shown by the Public Records but that could be ascertained by an inspection of the Land or that may be asserted by persons in possession of the Land.
3. Easements, liens or encumbrances, or claims thereof, not shown by the Public Records.
4. Any encroachment, encumbrance, violation, variation, or adverse circumstance affecting the Title that would be disclosed by an accurate and complete land survey of the Land and not shown by the Public Records.
5. (a) Unpatented mining claims; (b) reservations or exceptions in patents or in Acts authorizing the issuance thereof; (c) water rights, claims or title to water, whether or not the matters excepted under (a), (b), or (c) are shown by the Public Records.
6. Any lien or right to a lien for services, labor or material not shown by the Public Records.

CLTA HOMEOWNER'S POLICY OF TITLE INSURANCE (10-22-03)
ALTA HOMEOWNER'S POLICY OF TITLE INSURANCE (10-22-03)
EXCLUSIONS

In addition to the Exceptions in Schedule B, You are not insured against loss, costs, attorneys' fees, and expenses resulting from:

1. Governmental police power, and the existence or violation of any law or government regulation. This includes ordinances, laws and regulations concerning:
   a. building
   b. zoning
   c. Land use
   d. improvements on Land
   e. Land division
   f. environmental protection

This Exclusion does not apply to violations or the enforcement of these matters if notice of the violation or enforcement appears in the Public Records at the Policy Date.
This Exclusion does not limit the coverage described in Covered Risk 14, 15, 16, 17 or 24.

2. The failure of Your existing structures, or any part of them, to be constructed in accordance with applicable building codes. This Exclusion does not apply to violations of building codes if notice of the violation appears in the Public Records at the Policy Date.
3. The right to take the Land by condemning it, unless:
   a. notice of exercising the right appears in the Public Records at the Policy Date; or
   b. the taking happened before the Policy Date and is binding on You if You bought the Land without Knowing of the taking.
4. Risks:
   a. that are created, allowed, or agreed to by You, whether or not they appear in the Public Records;
   b. that are Known to You at the Policy Date, but not to Us, unless they appear in the Public Records at the Policy Date;
   c. that result in no loss to You; or
   d. that first occur after the Policy Date - this does not limit the coverage described in Covered Risk 7, 8.d, 22, 23, 24 or 25.
5. Failure to pay value for Your Title.
6. Lack of a right:
   a. to any Land outside the area specifically described and referred to in paragraph 3 of Schedule A; and
   b. in streets, alleys, or waterways that touch the Land.

This Exclusion does not limit the coverage described in Covered Risk 11 or 18.

LIMITATIONS ON COVERED RISKS

Your insurance for the following Covered Risks is limited on the Owner's Coverage Statement as follows:

- For Covered Risk 14, 15, 16 and 18, Your Deductible Amount and Our Maximum Dollar Limit of Liability shown in Schedule A.

The deductible amounts and maximum dollar limits shown on Schedule A are as follows:

	Your Deductible Amount	Our Maximum Dollar Limit of Liability
Covered Risk 14:	1.00% of Policy Amount or $ 2,500.00 (whichever is less)	$ 10,000.00
Covered Risk 15:	1.00% of Policy Amount or $ 5,000.00 (whichever is less)	$ 25,000.00
Covered Risk 16:	1.00% of Policy Amount or $ 5,000.00 (whichever is less)	$ 25,000.00
Covered Risk 18:	1.00% of Policy Amount or $ 2,500.00 (whichever is less)	$ 5,000.00

CLTA HOMEOWNER'S POLICY OF TITLE INSURANCE (02-03-10)
ALTA HOMEOWNER'S POLICY OF TITLE INSURANCE (02-03-10)
EXCLUSIONS

In addition to the Exceptions in Schedule B, You are not insured against loss, costs, attorneys' fees, and expenses resulting from:

1. Governmental police power, and the existence or violation of those portions of any law or government regulation concerning:
   a. building;
   b. zoning;
   c. land use;
   d. improvements on the Land;
   e. land division; and
   f. environmental protection.

   This Exclusion does not limit the coverage described in Covered Risk 8.a., 14, 15, 16, 18, 19, 20, 23 or 27.
2. The failure of Your existing structures, or any part of them, to be constructed in accordance with applicable building codes. This Exclusion does not limit the coverage described in Covered Risk 14 or 15.
3. The right to take the Land by condemning it. This Exclusion does not limit the coverage described in Covered Risk 17.
4. Risks:
   a. that are created, allowed, or agreed to by You, whether or not they are recorded in the Public Records;
   b. that are Known to You at the Policy Date, but not to Us, unless they are recorded in the Public Records at the Policy Date;
   c. that result in no loss to You; or
   d. that first occur after the Policy Date - this does not limit the coverage described in Covered Risk 7, 8.e., 25, 26, 27 or 28.
5. Failure to pay value for Your Title.
6. Lack of a right:
   a. to any land outside the area specifically described and referred to in paragraph 3 of Schedule A; and
   b. in streets, alleys, or waterways that touch the Land.

   This Exclusion does not limit the coverage described in Covered Risk 11 or 21.
7. The transfer of the Title to You is invalid as a preferential transfer or as a fraudulent transfer or conveyance under federal bankruptcy, state insolvency, or similar creditors' rights laws.

LIMITATIONS ON COVERED RISKS

Your insurance for the following Covered Risks is limited on the Owner's Coverage Statement as follows:

- For Covered Risk 16, 18, 19 and 21, Your Deductible Amount and Our Maximum Dollar Limit of Liability shown in Schedule A.

The deductible amounts and maximum dollar limits shown on Schedule A are as follows:

	Your Deductible Amount	Our Maximum Dollar Limit of Liability
Covered Risk 16:	1.00% of Policy Amount Shown in Schedule A or $ 2,500.00 (whichever is less)	$ 10,000.00
Covered Risk 18:	1.00% of Policy Amount Shown in Schedule A or $ 5,000.00 (whichever is less)	$ 25,000.00
Covered Risk 19:	1.00% of Policy Amount Shown in Schedule A or $ 5,000.00 (whichever is less)	$ 25,000.00
Covered Risk 21:	1.00% of Policy Amount Shown in Schedule A or $ 2,500.00 (whichever is less)	$ 5,000.00

ALTA EXPANDED COVERAGE RESIDENTIAL LOAN POLICY (10/13/01)
EXCLUSIONS FROM COVERAGE

The following matters are expressly excluded from the coverage of this policy and the Company will not pay loss or damage, costs, attorneys' fees or expenses which arise by reason of:

1. (a) Any law, ordinance or governmental regulation (including but not limited to zoning laws, ordinances, or regulations) restricting, regulating, prohibiting or relating to (i) the occupancy, use, or enjoyment of the Land; (ii) the character, dimensions or location of any improvements now or hereafter erected on the Land; (iii) a separation in ownership or a change in the dimensions or areas of the Land or any parcel of which the Land is or was a part; or (iv) environmental protection, or the effect of any violation of these laws, ordinances or governmental regulations, except to the extent that a notice of the enforcement thereof or a notice of a defect, lien or encumbrance resulting from a violation or alleged violation affecting the Land has been recorded in the Public Records at Date of Policy. This exclusion does not limit the coverage provided under Covered Risks 12, 13, 14, and 16 of this policy.
   (b) Any governmental police power not excluded by (a) above, except to the extent that a notice of the exercise thereof or a notice of a defect, lien or encumbrance resulting from a violation or alleged violation affecting the Land has been recorded in the Public Records at Date of Policy. This exclusion does not limit the coverage provided under Covered Risks 12, 13, 14, and 16 of this policy.
2. Rights of eminent domain unless notice of the exercise thereof has been recorded in the Public Records at Date of Policy, but not excluding from coverage any taking which has occurred prior to Date of Policy which would be binding on the rights of a purchaser for value without Knowledge.
3. Defects, liens, encumbrances, adverse claims or other matters:
   (a) created, suffered, assumed or agreed to by the Insured Claimant;
   (b) not Known to the Company, not recorded in the Public Records at Date of Policy, but Known to the Insured Claimant and not disclosed in writing to the Company by the Insured Claimant prior to the date the Insured Claimant became an Insured under this policy;
   (c) resulting in no loss damage to the Insured Claimant;
   (d) attaching or created subsequent to Date of Policy (this paragraph does not limit the coverage provided under Covered Risks 8, 16, 18, 19, 20, 21, 22, 23, 24, 25 and 26); or
   (e) resulting in loss or damage which would not have been sustained if the Insured Claimant had paid value for the Insured Mortgage.
4. Unenforceability of the lien of the Insured Mortgage because of the inability or failure of the Insured at Date of Policy, or the inability or failure of any subsequent owner of the indebtedness, to comply with applicable doing business laws of the state in which the Land is situated.
5. Invalidity or unenforceability of the lien of the Insured Mortgage, or claim thereof, which arises out of the transaction evidenced by the Insured Mortgage and is based upon usury, except as provided in Covered Risk 27, or any consumer credit protection or truth in lending law.
6. Real property taxes or assessments of any governmental authority which become a lien on the Land subsequent to Date of Policy. This exclusion does not limit the coverage provided under Covered Risks 7, 8(e) and 26.
7. Any claim of invalidity, unenforceability or lack of priority of the lien of the Insured Mortgage as to advances or modifications made after the Insured has Knowledge that the vestee shown in Schedule A is no longer the owner of the estate or interest covered by this policy. This exclusion does not limit the coverage provided in Covered Risk 8.
8. Lack of priority of the lien of the Insured Mortgage as to each and every advance made after Date of Policy, and all interest charged thereon, over liens, encumbrances and other matters affecting the title, the existence of which are Known to the Insured at:
   (a) The time of the advance; or
   (b) The time a modification is made to the terms of the Insured Mortgage which changes the rate of interest charged, if the rate of interest is greater as a result of the modification than it would have been before the modification. This exclusion does not limit the coverage provided in Covered Risk 8.
9. The failure of the residential structure, or any portion thereof to have been constructed before, on or after Date of Policy in accordance with applicable building codes. This exclusion does not apply to violations of building codes if notice of the violation appears in the Public Records at Date of Policy.

ALTA EXPANDED COVERAGE RESIDENTIAL LOAN POLICY (07/26/10)
EXCLUSIONS FROM COVERAGE

The following matters are expressly excluded from the coverage of this policy and the Company will not pay loss or damage, costs, attorneys' fees or expenses which arise by reason of:

1. (a) Any law, ordinance, permit, or governmental regulation (including those relating to building and zoning) restricting, regulating, prohibiting, or relating to
   (i) the occupancy, use, or enjoyment of the Land;
   (ii) the character, dimensions, or location of any improvement erected on the Land;
   (iii) the subdivision of land; or
   (iv) environmental protection;
   or the effect of any violation of these laws, ordinances, or governmental regulations. This Exclusion 1(a) does not modify or limit the coverage provided under Covered Risk 5, 6, 13(c), 13(d), 14 or 16.
   (b) Any governmental police power. This Exclusion 1(b) does not modify or limit the coverage provided under Covered Risk 5, 6, 13(c), 13(d), 14 or 16.
2. Rights of eminent domain. This Exclusion does not modify or limit the coverage provided under Covered Risk 7 or 8.
3. Defects, liens, encumbrances, adverse claims, or other matters
   (a) created, suffered, assumed, or agreed to by the Insured Claimant;
   (b) not Known to the Company, not recorded in the Public Records at Date of Policy, but Known to the Insured Claimant and not disclosed in writing to the Company by the Insured Claimant prior to the date the Insured Claimant became an Insured under this policy;
   (c) resulting in no loss or damage to the Insured Claimant;
   (d) attaching or created subsequent to Date of Policy (however, this does not modify or limit the coverage provided under Covered Risk 11, 16, 17, 18, 19, 20, 21, 22, 23, 24, 27 or 28); or
   (e) resulting in loss or damage that would not have been sustained if the Insured Claimant had paid value for the Insured Mortgage.
4. Unenforceability of the lien of the Insured Mortgage because of the inability or failure of an Insured to comply with applicable doing-business laws of the state where the Land is situated.
5. Invalidity or unenforceability in whole or in part of the lien of the Insured Mortgage that arises out of the transaction evidenced by the Insured Mortgage and is based upon usury, or any consumer credit protection or truth-in-lending law. This Exclusion does not modify or limit the coverage provided in Covered Risk 26.
6. Any claim of invalidity, unenforceability or lack of priority of the lien of the Insured Mortgage as to Advances or modifications made after the Insured has Knowledge that the vestee shown in Schedule A is no longer the owner of the estate or interest covered by this policy. This Exclusion does not modify or limit the coverage provided in Covered Risk 11.
7. Any lien on the Title for real estate taxes or assessments imposed by governmental authority and created or attaching subsequent to Date of Policy. This Exclusion does not modify or limit the coverage provided in Covered Risk 11(b) or 25.
8. The failure of the residential structure, or any portion of it, to have been constructed before, on or after Date of Policy in accordance with applicable building codes. This Exclusion does not modify or limit the coverage provided in Covered Risk 5 or 6.
9. Any claim, by reason of the operation of federal bankruptcy, state insolvency, or similar creditors' rights laws, that the transaction creating the lien of the Insured Mortgage, is
   (a) a fraudulent conveyance or fraudulent transfer, or
   (b) a preferential transfer for any reason not stated in Covered Risk 27(b) of this policy.

Notice

You may be entitled to receive a $20.00 discount on escrow services if you purchased, sold or refinanced residential property in California between May 19, 1995 and November 1, 2002. If you had more than one qualifying transaction, you may be entitled to multiple discounts.

If your previous transaction involved the same property that is the subject of your current transaction, you do not have to do anything; the Company will provide the discount, provided you are paying for escrow or title services in this transaction.

If your previous transaction involved property different from the property that is subject of your current transaction, you must - prior to the close of the current transaction - inform the Company of the earlier transaction, provide the address of the property involved in the previous transaction, and the date or approximate date that the escrow closed to be eligible for the discount.

Unless you inform the Company of the prior transaction on property that is not the subject of this transaction, the Company has no obligation to conduct an investigation to determine if you qualify for a discount. If you provide the Company information concerning a prior transaction, the Company is required to determine if you qualify for a discount which is subject to other terms and conditions.

Effective Date: 5/1/2008

Fidelity National Financial, Inc.
Privacy Statement

Fidelity National Financial, Inc. and its subsidiaries ("FNF") respect the privacy and security of your non-public personal information ("Personal Information") and protecting your Personal Information is one of our top priorities. This Privacy Statement explains FNF's privacy practices, including how we use the Personal Information we receive from you and from other specified sources, and to whom it may be disclosed. FNF follows the privacy practices described in this Privacy Statement and, depending on the business performed, FNF companies may share information as described herein.

Personal Information Collected

We may collect Personal Information about you from the following sources:

- Information we receive from you on applications or other forms, such as your name, address, social security number, tax identification number, asset information, and income information;
- Information we receive from you through our Internet websites, such as your name, address, email address, Internet Protocol address, the website links you used to get to our websites, and your activity while using or reviewing our websites;
- Information about your transactions with or services performed by us, our affiliates, or others, such as information concerning your policy, premiums, payment history, information about your home or other real property, information from lenders and other third parties involved in such transaction, account balances, and credit card information; and
- Information we receive from consumer or other reporting agencies and publicly recorded documents.

Disclosure of Personal Information

We may provide your Personal Information (excluding information we receive from consumer or other credit reporting agencies) to various individuals and companies, as permitted by law, without obtaining your prior authorization. Such laws do not allow consumers to restrict these disclosures. Disclosures may include, without limitation, the following:

- To insurance agents, brokers, representatives, support organizations, or others to provide you with services you have requested, and to enable us to detect or prevent criminal activity, fraud, material misrepresentation, or nondisclosure in connection with an insurance transaction;
- To third-party contractors or service providers for the purpose of determining your eligibility for an insurance benefit or payment and/or providing you with services you have requested;
- To an insurance regulatory authority, or a law enforcement or other governmental authority, in a civil action, in connection with a subpoena or a governmental investigation;
- To companies that perform marketing services on our behalf or to other financial institutions with which we have joint marketing agreements and/or
- To lenders, lien holders, judgment creditors, or other parties claiming an encumbrance or an interest in title whose claim or interest must be determined, settled, paid or released prior to a title or escrow closing.

We may also disclose your Personal Information to others when we believe, in good faith, that such disclosure is reasonably necessary to comply with the law or to protect the safety of our customers, employees, or property and/or to comply with a judicial proceeding, court order or legal process.

Effective Date: 5/1/2008

Disclosure to Affiliated Companies - We are permitted by law to share your name, address and facts about your transaction with other FNF companies, such as insurance companies, agents, and other real estate service providers to provide you with services you have requested, for marketing or product development research, or to market products or services to you. We do not, however, disclose information we collect from consumer or credit reporting agencies with our affiliates or others without your consent, in conformity with applicable law, unless such disclosure is otherwise permitted by law.

Disclosure to Nonaffiliated Third Parties - We do not disclose Personal Information about our customers or former customers to nonaffiliated third parties, except as outlined herein or as otherwise permitted by law.

Confidentiality and Security of Personal Information
We restrict access to Personal Information about you to those employees who need to know that information to provide products or services to you. We maintain physical, electronic, and procedural safeguards that comply with federal regulations to guard Personal Information.

Access To Personal Information/
Requests for Correction, Amendment, or Deletion of Personal Information
As required by applicable law, we will afford you the right to access your Personal Information, under certain circumstances to find out to whom your Personal Information has been disclosed, and request correction or deletion of your Personal Information. However, FNF's current policy is to maintain customers' Personal Information for no less than your state's required record retention requirements for the purpose of handling future coverage claims.

For your protection, all requests made under this section must be in writing and must include your notarized signature to establish your identity. Where permitted by law, we may charge a reasonable fee to cover the costs incurred in responding to such requests. Please send requests to:

Chief Privacy Officer
Fidelity National Financial, Inc.
601 Riverside Avenue
Jacksonville, FL 32204

Changes to this Privacy Statement
This Privacy Statement may be amended from time to time consistent with applicable privacy laws. When we amend this Privacy Statement, we will post a notice of such changes on our website. The effective date of this Privacy Statement, as stated above, indicates the last time this Privacy Statement was revised or materially changed.

Notice of Available Discounts

Pursuant to Section 2355.3 in Title 10 of the California Code of Regulations Fidelity National Financial, Inc. and its subsidiaries ("FNF") must deliver a notice of each discount available under our current rate filing along with the delivery of escrow instructions, a preliminary report or commitment. Please be aware that the provision of this notice does not constitute a waiver of the consumer's right to be charged the filed rate. As such, your transaction may not qualify for the below discounts.

You are encouraged to discuss the applicability of one or more of the below discounts with a Company representative. These discounts are generally described below; consult the rate manual for a full description of the terms, conditions and requirements for such discount. These discounts only apply to transactions involving services rendered by the FNF Family of Companies. This notice only applies to transactions involving property improved with a one-to-four family residential dwelling.

FNF Underwritten Title Companies
FNTC – Fidelity National Title Company
FNTCCA – Fidelity National Title Company of California

FNF Underwriter
FNTIC – Fidelity National Title Insurance Company

Available Discounts

CREDIT FOR PRELIMINARY REPORTS AND/OR COMMITMENTS ON SUBSEQUENT POLICIES (FNTIC)
Where no major change in the title has occurred since the issuance of the original report or commitment, the order may be reopened within 12 or 36 months and all or a portion of the charge previously paid for the report or commitment may be credited on a subsequent policy charge.

FEE REDUCTION SETTLEMENT PROGRAM (FNTC, FNTCCA and FNTIC)
Eligible customers shall receive a $20.00 reduction in their title and/or escrow fees charged by the Company for each eligible transaction in accordance with the terms of the Final Judgments entered in *The People of the State of California et al. v. Fidelity National Title Insurance Company et al.*, Sacramento Superior Court Case No. 99AS02793, and related cases.

DISASTER LOANS (FNTIC)
The charge for a Lender's Policy (Standard or Extended coverage) covering the financing or refinancing by an owner of record, within 24 months of the date of a declaration of a disaster area by the government of the United States or the State of California on any land located in said area, which was partially or totally destroyed in the disaster, will be 50% of the appropriate title insurance rate.

CHURCHES OR CHARITABLE NON-PROFIT ORGANIZATIONS (FNTIC)
On properties used as a church or for charitable purposes within the scope of the normal activities of such entities, provided said charge is normally the church's obligation the charge for an owner's policy shall be 50% or 70% of the appropriate title insurance rate, depending on the type of coverage selected. The charge for a lender's policy shall be 32% or 50% of the appropriate title insurance rate, depending on the type of coverage selected.

Fidelity National Title Company

PRELIMINARY REPORT

In response to the application for a policy of title insurance referenced herein, ***Fidelity National Title Company*** *hereby reports that it is prepared to issue, or cause to be issued, as of the date hereof, a policy or policies of title insurance describing the land and the estate or interest therein hereinafter set forth, insuring against loss which may be sustained by reason of any defect, lien or encumbrance not shown or referred to as an exception herein or not excluded from coverage pursuant to the printed Schedules, Conditions and Stipulations or Conditions of said policy forms.*

The printed Exceptions and Exclusions from the coverage and Limitations on Covered Risks of said policy or policies are set forth in Attachment One. The policy to be issued may contain an arbitration clause. When the Amount of Insurance is less than that set forth in the arbitration clause, all arbitrable matters shall be arbitrated at the option of either the Company or the Insured as the exclusive remedy of the parties. Limitations on Covered Risks applicable to the CLTA and ALTA Homeowner's Policies of Title Insurance which establish a Deductible Amount and a Maximum Dollar Limit of Liability for certain coverages are also set forth in Attachment One. Copies of the policy forms should be read. They are available from the office which issued this report.

This report (and any supplements or amendments hereto) is issued solely for the purpose of facilitating the issuance of a policy of title insurance and no liability is assumed hereby. If it is desired that liability be assumed prior to the issuance of a policy of title insurance, a Binder or Commitment should be requested.

The policy(s) of title insurance to be issued hereunder will be policy(s) of Fidelity National Title Insurance Company, a California corporation.

Please read the exceptions shown or referred to herein and the exceptions and exclusions set forth in Attachment One of this report carefully. The exceptions and exclusions are meant to provide you with notice of matters which are not covered under the terms of the title insurance policy and should be carefully considered.

It is important to note that this preliminary report is not a written representation as to the condition of title and may not list all liens, defects and encumbrances affecting title to the land.

John –
I just noticed that the title report is **not correct**. The title report from December 2011 shows John Wessman, a married man... However, in 2005 he transferred title to Wessman Holdings, Inc. Please have him have the title company update the title report along with the chain of title being requested.

Sincerely,

Felipe Primera

AT THE DATE HEREOF, ITEMS TO BE CONSIDERED AND EXCEPTIONS TO COVERAGE IN ADDITION TO THE PRINTED EXCEPTIONS AND EXCLUSIONS IN SAID POLICY FORM WOULD BE AS FOLLOWS:

1. **Property taxes**, including any personal property taxes and any assessments collected with taxes, for the fiscal year 2011-2012, Assessor's Parcel Number 502-065-008-8.

Code Area Number:	011-003
1st Installment:	$5,253.05 PAID
2nd Installment:	$5,253.05 OPEN
Land:	$100,025.00
Improvements:	$736,135.00
Exemption:	$0.00
Personal Property:	$0.00
Bill No.:	0578488

2. **Property taxes**, including any personal property taxes and any assessments collected with taxes, for the fiscal year 2011-2012, Assessor's Parcel Number 502-065-018-7.

Code Area Number:	011-003
1st Installment:	$4,032.22 DELINQUENT + PENALTY $ 403.22
2nd Installment:	$4,032.22 OPEN
Land:	$204,990.00
Improvements:	$407,540.00
Exemption:	$0.00
Personal Property:	$0.00
Bill No.:	0338336

3. **The lien of supplemental taxes**, if any, assessed pursuant to the provisions of Chapter 3.5 (Commencing with Section 75) of the Revenue and Taxation code of the State of California.

4. **Water rights, claims or title to water**, whether or not disclosed by the public records.

5. **Covenants, conditions and restrictions** in the declaration of restrictions but omitting any covenants or restrictions, if any, including, but not limited to those based upon race, color, religion, sex, sexual orientation, familial status, marital status, disability, handicap, national origin, ancestry, or source of income, as set forth in applicable state or federal laws, except to the extent that said covenant or restriction is permitted by applicable law.

   Recorded: April 27, 1946, Book 745, Page 191, of Official Records

   Said covenants, conditions and restrictions provide that a violation thereof shall not defeat the lien of any mortgage or deed of trust made in good faith and for value.

6. **Covenants and easements** as set out in that certain agreement between John W. Nevins, et al, and Reproco Inc., a Delaware Corporation, dated March 20, 1969 and Recorded April 17, 1969 as Instrument No. 37800 of Official Records of Riverside County, California, to which record reference is made for further particulars.

Affects: Parcel B

7. **An unrecorded lease** with certain terms, covenants, conditions and provisions set forth therein as disclosed by the document

Entitled:	Short Form of Lease
Lessor:	John Wessman
Lessee:	Carl Karcher Enterprises, Inc., a California corporation
Recorded:	Instrument No. 1977-35690, of Official Records

The present ownership of the leasehold created by said lease and other matters affecting the interest of the lessee are not shown herein.

An agreement to amend or modify certain provisions of said lease, as set forth in the document executed by:

As Lessor:	Wessman Holdings, LLC
As Lessee:	Carl Karcher Enterprises, Inc.
Recorded:	May 16, 2003, Instrument No. 2003-355060, of Official Records

8. **Easement(s)** for the purpose(s) shown below and rights incidental thereto as granted in a document.

Granted to:	Southern California Edison Company, a corporation
Purpose:	Underground electrical supply systems and communication systems
Recorded:	November 21, 1977, Instrument No. 232451, of Official Records
Affects:	The North 4 feet of the East 137.35 feet of Parcel No. 2; and the West 4 feet of the North 225 feet of the East 137.35 feet of Parcel No. 2 of Map filed in Book 1, page 50 of Parcel Maps, records of Riverside County. Also, a 4 foot strip of land lying within said Parcel No. 2, the centerline being described as follows: Beginning at a point 8 feet South of the Northwest corner of the East 137.35 feet of said Parcel No. 2; thence Southeast 65 feet.

9. **An unrecorded sublease** with certain terms, covenants, conditions and provisions set forth therein as disclosed by the document

Entitled:	Memorandum of Sublease
Sublessor:	Carl Karcher Enterprises, Inc., a California corporation
Sublessee:	CLK, Inc., a California corporation
Recorded:	October 28, 1999, Instrument No. 1999-470739, of Official Records

The present ownership of the leasehold created by said lease and other matters affecting the interest of the lessee are not shown herein.

10. **A Leasehold Interest** deed of trust to secure an indebtedness in the amount shown below, and any other obligations secured thereby

Amount:	$5,000,000.00
Dated:	October 15, 1999
Trustor:	CLK, Inc., a California corporation
Trustee:	Chicago Title Insurance Company
Beneficiary:	Franchise Mortgage Acceptance Company
Loan No.:	500025011
Recorded:	October 20, 1999, Instrument No. 1999-463410, of Official Records

An assignment of the beneficial interest under said deed of trust which names:

Assignee:	General Electric Capital Business Asset Funding Corporation
Loan No.:	500025011
Recorded:	July 29, 2003, Instrument No. 2003-565322, of Official Records

An agreement to modify the terms and provisions of said deed of trust as therein provided

Executed by:	CLK, Inc. a California corporation
Recorded:	May 9, 2001, Instrument No. 2001-202956, of Official Records

11. **Matters** contained in that certain document entitled "Reciprocal Easement Agreement", executed by and between Wessman Holdings, LLC, a California limited liability company and Palm Springs Oil Company recorded September 22, 2006, Instrument No. 2006-0705447, of Official Records.

Reference is hereby made to said document for full particulars.

CONDITIONS, DISCLAIMERS AND EXCLUSIONS

This Tax Certificate/Tax Order Report does not constitute a report on or certification of: (1) mineral (productive and/or non-productive) taxes or leases; (2) personal property taxes; or (3) other non ad valorem taxes (such as paving liens, stand-by charges or maintenance assessments).

Data Trace Information Services LLC ("Data Trace") may have warranted the accuracy of this Tax Certificate/Tax Order Report to its customer (the "Data Trace Customer") pursuant to the terms and conditions of a written tax service agreement between Data Trace and said Data Trace Customer (the "Tax Service Agreement"). Any such warranty (hereinafter, "Data Trace Customer Warranty") does not: (a) extend to a third party bearer of this Tax Certificate/Tax Order Report; (b) cover any changes made to the records of the taxing authority after the "payments as of," "paid," or "payment" dates delineated above; and (c) cover any invalid tax information shown on the records of the taxing authority or resulting from an error by the Data Trace Customer (including, without limitation, submission of incorrect property information by said Data Trace Customer). DATA TRACE MAKES NO WARRANTIES (EXPRESS OR IMPLIED) WITH RESPECT TO THIS TAX CERTIFICATE/TAX ORDER REPORT OTHER THAN (WHERE APPLICABLE) THE DATA TRACE CUSTOMER WARRANTY. Any and all claims under a Data Trace Customer Warranty must be submitted to Data Trace by the corresponding Data Trace Customer and are subject to the terms and conditions set forth in the pertinent Tax Service Agreement (including, without limitation, the filing deadlines applicable to such claims). In some jurisdictions Data Trace's validation of a Tax Certificate/Tax Order Report is required to activate a Data Trace Customer Warranty.

OWNER / BUILDER DECLARATION

I hereby affirm under penalty of perjury that I am exempt from the Contractor's License Law for the following reason (Section 70 31.5, Business and Professions Code: Any city or county which requires a permit to construct, alter, improve, demolish, or repair any Structure prior to its issuance, also requires the applicant for such permit to file a signed statement that he or she is licensed pursuant to the provisions of the Contractor's License Law (Chapter 9 commencing with Sec. 7000 of Division 3 of the Business and Professions Code) or that he or she is exempt therefrom and the basis for the alleged exemption. Any violation of Section 7031.5 by any applicant for a permit subjects the applicant to a civil penalty of not more than five hundred dollars ($500).) **Please check one of the following:**

☐ I, as owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale (Sec. 7044 of the Business and Profession Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who does such work himself or herself or through his or her own employees, provided that such improvements are not intended or offered for sale. If, however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he or she did not build or improve for the purpose of sale.)

☐ I, as owner of the property, am exclusively contracting with licensed contractors to construct the project (Sec. 7044 of the Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who contracts for such projects with a contractor(s) licensed pursuant to the Contractor's License Law.)

☐ I am exempt under Sec. _____ of the Business and Professions Code for this reason:

_____

Owner Signature: _____ Date: _____

LICENSED CONTRACTORS DECLARATION

I hereby affirm under penalty of perjury that I am licensed under the provisions of Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code, and my license is in full force and effect. The following applies to B contractors only: I understand the limitations of Section 7057 related to my ability to take prime contracts or subcontracts involving specialty trades.

License Class: B State Lic. No.: 213720 City Bus. Lic. No. 00005276

Print Name on License: JOHN R WESSMAN Phone: 760-325-3050

Address: 555 S SUNRISE WAY STE 200 PALM SPRINGS CA 92264

Every county or city which requires the issuance of a permit as a condition precedent to the construction, alteration, improvement, demolition or repair of any building or structure shall require that each applicant for the permit sign a declaration under penalty of perjury verifying workers' compensation coverage or exemption from coverage as required by Section 19825 of the Health and Safety Code. I, hereby affirm under penalty of perjury one of the following declarations:

☐ I HAVE AND WILL MAINTAIN A CERTIFICATE TO SELF INSURE for worker's compensation as provided for by Section 3700 of the Labor Code, for the performance of the work for which this permit is issued.

☐ I HAVE AND WILL MAINTAIN WORKERS' COMPENSATION INSURANCE, as required by Section 3700 of the Labor Code, for the performance of the work for which this permit is issued. My workers' compensation insurance carrier and policy number are:

Carrier: Republic Indemnity Ins. Policy No. ATWC01806

☐ I CERTIFY that in the performance of work for which this permit is issued, I SHALL NOT EMPLOY ANY PERSON, in any manner so as to become subject to the worker's compensation laws of California, and agree that if I should become subject to the worker's compensation provisions of Section 3700 of the Labor Code, I shall for with comply with those provisions.

WESSMAN
HOLDINGS / DEVELOPMENT COMPANY

May 14, 2014

Mr. Jim Zicaro
City of Palm Springs
3200 E. Tahquitz Canyon Way
Palm Springs, CA 92262

Re: Dakota Plan Check Submittal 2013
Time Extension for 2013 Plan Check Code Requirements

Dear Mr. Zicaro:

We are requesting a 180 day time extension for Plan Check under the 2013 code requirements for our 39 single family home development referred to as Dakota. In October of 2013 we submitted a Preliminary and Final PDD application which was approved by the City on February 19, 2014. In the beginning of March we were notified that a lawsuit would be filed against the City for violating the California Environmental Quality Act and Planning Zoning Laws in connection with the environmental review of our project. This complaint was filed on March 21, 2014 and we are currently in negotiations. Although the complaint was filed we submitted construction drawings in March at our own risk since we feel this complaint will be settled and would like to move forward with the project as soon as it is resolved.

Therefore we respectfully request an additional 180 day time extension to pull our building permit on this project. Please do not hesitate to contact me with any questions.

Sincerely,

John Wessman - Manager
Wessman Development LLC

☐ The plans transmitted herewith have been corrected where necessary and substantially comply with the jurisdiction's codes.

☐ The plans transmitted herewith will substantially comply with the jurisdiction's codes when minor deficiencies identified below are resolved and checked by building department staff.

☐ The plans transmitted herewith have significant deficiencies identified on the enclosed check list and should be corrected and resubmitted for a complete recheck.

☒ The check list transmitted herewith is for your information. The plans are being held at Esgil Corporation until corrected plans are submitted for recheck.

☐ The applicant's copy of the check list is enclosed for the jurisdiction to forward to the applicant contact person.

☒ The applicant's copy of the check list has been sent to:
MICHAEL BRAUN 555 S. SUNRISE WAY, #2000,

☐ EsGil Corporation staff **did not** advise the applicant that the plan check has been completed.

☒ EsGil Corporation staff **did** advise the applicant that the plan check has been completed.

PLAN REVIEW CORRECTION LIST
SINGLE FAMILY DWELLINGS AND DUPLEXES

PLAN CHECK NO.: **2013-1417**	JURISDICTION: **PALM SPRINGS**
PROJECT ADDRESS: **1501 S. BELARDO**	
FLOOR AREA: UNIT #1: LIVING = 1,530; GARAGE = 475	STORIES: TWO
UNIT #2: LIVING = 1,772; GARAGE = 483	HEIGHT: 23'
REMARKS:	
DATE PLANS RECEIVED BY JURISDICTION: 5/20	DATE PLANS RECEIVED BY ESGIL CORPORATION: 5/21
DATE INITIAL PLAN REVIEW COMPLETED: **MAY 29, 2013**	PLAN REVIEWER: **ALI SADRE, S.E.**

FOREWORD (PLEASE READ):

This plan review is limited to the technical requirements contained in the California version of the International Residential Code, International Building Code, Uniform Plumbing Code, Uniform Mechanical Code, National Electrical Code and state laws regulating energy conservation, noise attenuation and access for the disabled. This plan review is based on regulations enforced by the Building Department. You may have other corrections based on laws and ordinance by the Planning Department, Engineering Department, Fire Department or other departments. Clearance from those departments may be required prior to the issuance of a building permit.

Present California law mandates that construction comply with the 2010 edition of the California Code of Regulations (Title 24), which adopts the following model codes: 2009 IRC, 2009 IBC, 2009 UPC, 2009 UMC and 2008 NEC.

The above regulations apply, regardless of the code editions adopted by ordinance.

The following items listed need clarification, modification or change. All items must be satisfied before the plans will be in conformance with the cited codes and regulations. Per Sec. 105.4 of the 2009 International Building Code, the approval of the plans does not permit the violation of any state, county or city law.

To speed up the recheck process, please note on this list (or a copy) where each correction item has been addressed, i.e., plan sheet number, specification section, etc. Be sure to enclose the marked up list when you submit the revised plans.

PALM SPRINGS 2013-1417
MAY 29, 2013

- **PLANS**

1. Please submit two revised, stamped & signed sets of plans to: EsGil Corp., 9320 Chesapeake Drive, Suite 208, San Diego, California 92123, (858) 560-1468.

2. Clearly dimension building setbacks from property lines on ***all sides***, street centerlines, and from any adjacent buildings on site plans. Section R106.2. *As submitted, the distance to PL's are not dimensioned on all sides*.

3. Any portion of the project shown on the site plan that is not included with the building permit application filed should be clearly identified as "not included." Section R106.2. *I.e., gates, walls, fences, etc. What is shown on LW2.1 & LW2.2 is not adequate. Show complete structural details, references & calc's, for review & approval*. This applies to all items under this permit.

4. On the cover sheet of plans, specify any items that will have a deferred submittal (trusses, fire sprinklers/alarms, etc.). Additionally, provide the following note on plans: "Submittal documents for deferred submittal items shall be submitted to the registered design professional in responsible charge, who shall review them and forward them to the building official with a notation indicating that the deferred documents have been reviewed and that they have been found to be in general conformance with the design of the building. The deferred items shall NOT be installed until their design and documents have been approved by the building official."

- **FIRE PROTECTION**

5. **An automatic residential fire sprinkler system shall be installed** in one- and two-family dwellings. *Please clearly note this on the plans*. Section R313.2.

6. Exterior walls and projections shall comply with the following table. Sec. R302.1.

*Use this table if the building **DOES** have an automatic fire sprinkler system. Show construction details & references on plans for all applicable conditions:*

Exterior Wall Element		Min. Fire Rating	Min. Fire Separation Distance
Walls	(Fire-Resistance Rating)	1-hour, with exposure from both sides	< 3 feet
	(Not Fire Rated)	0 hours	**≥ 3 feet**
Projections	(Fire-Resistance Rating)	1-hour on the underside	≥ 2 feet to 3 feet
	(Not Fire Rated)	0 hours	3 feet
Wall Openings	Not Allowed	N/A	< 3 feet
	Unlimited	0 hours	3 feet
Penetrations	All	See Sec. R302.4	< 3 feet
		None required	3 feet

7. Projections, including eaves, must be at least 24" from a property line. Table R302.1. *Show this on site plans* for each & every unit under this permit.

8. The Fire Department has determined that this project is in Wild-Fire Exposure. Please show step-by-step how you comply with all the relevant provisions of CRC, Section R327. *Please obtain their approval with respect to these items*.

• GENERAL REQUIREMENTS

9. Glazing in the following locations should be shown on plans as safety glazing as per Section R308.4:

   a) Glazing in doors.
   b) Glazing adjacent to a door where the nearest exposed edge of the glazing is within a 24" arc of either vertical edge of the door in a closed position and where the bottom exposed edge of the glazing is less than 60" above the walking surface. Exceptions:
      i) Glazing in walls on the latch side of and perpendicular to the plane of the door in a closed position.
      ii) Glazing that is adjacent to the fixed panel of patio doors.
   c) Glazing in individual fixed or operable panels that meet all of the following conditions:
      i) Exposed area of an individual pane is greater than 9 sq ft, and:
      ii) Exposed bottom edge is less than 18" above the floor, and:
      iii) Exposed top edge is greater than 36" above the floor, and:
      iv) One or more walking surfaces are within 36" horizontally of the plane of the glazing.
   d) Glazing in walls enclosing stairway landings or within 60" horizontally of the bottom tread of stairways where the bottom edge of the glass is less than 60" above the nose of the tread.
   e) Glazing adjacent to stairways, landings and ramps within 36" horizontally of a walking surface when the exposed surface of the glass is less than 60" above the plane of adjacent walking surface.

• STAIRWAYS/ RAILINGS

10. Guards (Section R312):

   a) Shall have a height of 42" (may be 34" along the sides of stairs).
   b) Openings between railings shall be less than 4".
   c) Shall be detailed to show capability to resist a concentrated load of 200 pounds in any direction along the top rail. Table R301.5.

11. Open risers are only permitted if the opening between treads does not permit the passage of a 4" diameter sphere. Section R311.7.4.3.

12. The walls and soffits of the enclosed usable space under stairs shall be protected on the enclosed side with ½" gypsum board. Section R302.7.

13. A nosing (between ¾" and 1-¼") shall be provided on stairways with solid risers. Exception: No nosing is required if the tread depth is at least 11". Section R311.7.4.3.

• GARAGE

14. Show a self-closing door, either 1-3/8" solid core or a listed 20 minute assembly, for openings between garage and dwelling. Section R302.5.1.

15. The garage shall be separated from the residence and its attic area by not less than ½" gypsum board applied to the garage side (at walls). Garages beneath habitable rooms shall be separated by not less than 5/8" Type X gypsum board. Section R302.6.

- **STRUCTURAL**

16. Provide a copy of the project soil report as per notes on Sheet SN-1. Section R401.4.

17. Note on the foundation plan that "Prior to the contractor requesting a Building Department foundation inspection, the soils engineer shall advise the building official in writing that:

    a) The building pad was prepared in accordance with the soils report,
    b) The utility trenches have been properly backfilled and compacted, and
    c) The foundation excavations, the soils expansive characteristics and bearing capacity conform to the soils report."

18. Provide a letter from the soils engineer confirming that the foundation plan, grading plan and specifications have been reviewed and that it has been determined that the recommendations in the soils report are properly incorporated into the construction documents.

19. Note on plans that surface water will drain away from building. The grade shall fall a minimum of 6" within the first 10'. Section R401.3.

20. Provide truss details and truss calculations for this project. Specify truss identification numbers on the plans. *The truss design drawings must contain all the information listed in Section R802.10.*

21. Please provide evidence that the engineer-of-record (or architect) has reviewed the truss calculation package prepared by others (i.e., a "review" stamp on the truss calculations or a letter). CBC Section 107.3.4.2.

22. Where is Sheet SD-3, as referenced on keynote #15, on Sheets S-1.2 & S-2.2?

23. On Sheet S-2.2, show a header over window H, on gridline 5, of the roof framing plans, as per floor plans?

24. The built-up wall, near grid point D-1 (on Sheets S-2.1 & S-2.2), do not match the floor plans.

25. Please provide a shear wall schedule on plans.

26. Please add staggered nailing for the keynote #2, on foundation plans, as stated on Sheets S-1.1 & S-2.1 (under foundation notes).

27. On 2nd floor framing plans, Sheet S-1.2, call out the header size over the window by the stairs on gridline D.

28. On Sheet S-1.2, show the beam size over window F, on gridline 3, between lines B & C.

29. Please provide revised vertical structural calculations to match the structural plans as submitted. [What is currently provided does not correspond to the submitted plans].

- **MECHANICAL**

30. Show dryer vent to the outside. CMC Section 504.3.

31. The roof installed mechanical equipment must be accessible per 904.10 in the CMC.

32. The energy design is required to be "registered". Please register before the next submittal. (HERS verification required).

- **ELECTRICAL**

33. Add the following to the end of Subsection 310-2(b): City Policy:

    a) No aluminum wiring shall be used. EXCEPTION: Aluminum wiring 1/0 and larger may be used for main feed to subpanels only and shall be enclosed in a raceway.

34. Add the following to the end of Subsection 90-8(a): City Policy:

    a) SERVICE LOAD. The main switch and/or distribution panel of a single-family dwelling or condominium occupancy shall have an adequate capacity and space to carry the calculated load, plus an 8 KW future with four (4) spare spaces at the time of final inspection. The 8 KW load is not to be reduced by any demand factor.

35. Include the following notes on plans:

    a) Tamper resistant receptacles for all locations. NEC, Art. 210.52.
    b) Weather resistant type for receptacles installed in damp or wet locations (outside).
    c) Arc-fault protection for all outlets (not just receptacles) located in rooms described in NEC 210.12(B): Family, living, bedrooms, dining, halls, etc.
    d) GFCI protected outlets for locations described in NEC 210.8: Kitchens, garages, bathrooms, outdoors, within 6' of a sink, etc.

36. Note on plans that receptacle outlet locations comply with CEC Article 210.52(A).

37. The subpanels are located in the modified fire wall betixt the garage and dwelling. Provide a design that maintains this rating.

38. For a single-family dwelling unit, show that at least one receptacle outlet accessible at grade level will be installed outdoors at the front and back of the dwelling. CEC Article 210.52(E). This receptacle must be GFCI protected.

39. Both the kitchen receptacle circuit and the bathroom receptacle circuits are required to be 20 amperes, 15 amperes shown on the panel schedule.

40. Per CEC Article 210.11(C)3, note on the plans that bathroom circuiting shall be either:

    a) A 20 ampere circuit dedicated to each bathroom, *or*
    b) At least one 20 ampere circuit supplying only bathroom receptacle outlets.

• PLUMBING

41. Note on the plans that "combustion air for fuel burning water heaters will be provided in accordance with the Plumbing Code".

42. Provide a note on the plans: The control valves in bathtubs, whirlpool bathtubs, showers and tub-shower combinations must be pressure balanced or thermostatic mixing valves. CPC Section 414.5 and 418.0.

43. Dimension on the plans the 30" clear width required for the water closet compartment. CPC 407.5.

44. Gas line and water line sizing calculations may be required for each project.

45. Plumbing isometrics are required for all projects.

46. Specify on plans: Water conserving fixtures: New water closets shall use no more than 1.28 gallons of water per flush, lavatories and kitchen faucets may not exceed 2.2 GPM, and showers may not exceed 2.5 GPM of flow. CPC Section 402.0.

• GREEN BUILDING STANDARDS

The California Building Standards Commission (BSC) has adopted the Green Building Standards Code which became effective January 1, 2011 and must be enforced by the local building official. The following mandatory requirements for residential construction must be included on your plans. The Green Building Standards apply only to **newly constructed** buildings throughout California. CGC 101.3

47. Note on the site plan that the site shall be planned and developed to keep surface water away from buildings. Plans shall be provided and approved by the City Engineer that show site grading and provide for storm water retention and drainage during construction. BMP's that are currently enforced by the city engineer must be implemented prior to initial inspection by the building department. CGC 4.106.3.

48. Note on the plans that a minimum of 50% of construction waste is to be recycled. CGC 4.408.1.

49. Note on the plans that the builder is to provide an operation manual (containing information for maintaining appliances, etc.) for the owner at the time of final inspection. CGC 4.410.1.

50. Note on the plans that during construction, ends of duct openings are to be sealed, and mechanical equipment is to be covered. CGC 4.504.1.

51. Note on the plans that VOC's must comply with the limitations listed in Section 4.504.3 and Tables 4.504.1, 4.504.2, 4.504.3 and 4.504.5 for: Adhesives, Paints and Coatings, Carpet and Composition Wood Products. CGC 4.504.2.

52. Note on the plans that the moisture content of wood shall not exceed 19% before it is enclosed in construction. The moisture content needs to be certified by one of 3 methods specified. Building materials with visible signs of water damage should not be used in construction. The moisture content must be determined by the contractor by one of the methods listed in CGC Section 4.505.3.

53. Note on the plans that bathroom fans shall be Energy Star rated, vented directly to the outside and controlled by a humidistat. CGC 4.506.1.

54. Note on the plans that if provided, whole house exhaust fans shall have insulated covers or louvers which close when the fan is off. The covers or louvers shall have minimum R4.2 insulation. CGC 5.507.1.

55. Note on the plans that heating and AC shall be sized and selected by ACCA Manual J or ASHRAE handbook or equivalent. The duct sizing shall be sized in accordance with one of the ACCA methods listed in CGC Section 4.507.2.

56. Note on the plans that prior to final approval of the building the licensed contractor, architect or engineer in responsible charge of the overall construction must complete and sign the Green Building Standards Certification form and given to the building department official to be filed with the approved plans.

57. Provide calculations prepared by a licensed engineer that will show water consumption reduction of 20% below the baseline water consumption listed in Table 4.303.1. In lieu of providing the calculations, imprint on the plans the attached Table 4.303.2 listing fixtures that meet the 20% reduction. CGC 4.303.1.

TABLE 4.303.2 FIXTURE FLOW RATES

FIXTURE TYPE	MAXIMUM FLOW RATE AT ≥ 20 % REDUCTION
Showerheads	2 gpm @ 80 psi
Lavatory faucets, residential	1.5 gpm @ 60 psi[2]
Kitchen faucets	1.8 gpm @ 60 psi
Water closets	1.28 gallons/flush[1]

1. Includes single and dual flush water closets with an effective flush of 1.28 gallons or less.

   Single flush toilets—The effective flush volume shall not exceed 1.28 gallons (4.8 liters). The effective flush volume is the average flush volume when tested in accordance with ASME A112.19.233.2.

   Dual flush toilets—The effective flush volume shall not exceed 1.28 gallons (4.8 liters). The effective flush volume is defined as the composite, average flush volume of two reduced flushes and one full flush. Flush volumes will be tested in accordance with ASME A112.19.2 and ASME A112.19.14.

2. Lavatory faucets shall not have a flow rate less than 0.8 gpm at 20 psi.

58. Note on the plans that when a shower is provided with multiple shower heads, the sum of flow to all the heads shall not exceed the 20% reduced limit, or the shower shall be designed so that only one head is on at a time. CGC 4.303.2.

59. Note on the plans that landscape Irrigation water use shall have weather based controllers. CGC 4.304.1.

• MISCELLANEOUS

60. To speed up the review process, note on this list (or a copy) where each correction item has been addressed, i.e., plan sheet, note or detail number, calculation page, etc.

61. Please indicate here if any changes have been made to the plans that are not a result of corrections from this list. If there are other changes, please briefly describe them and where they are located in the plans. Have changes been made to the plans not resulting from this correction list? Indicate: Yes ❑ No ❑

62. The jurisdiction has contracted with EsGil Corporation located at 9320 Chesapeake Drive, Suite 208, San Diego, California 92123; telephone number of 858/560-1468, to perform the plan review for your project. If you have any questions regarding these plan review items, please contact **ALI SADRE, S.E.** at EsGil Corporation. Thank you.

WESSMAN
HOLDINGS / DEVELOPMENT COMPANY

May 14, 2014

Mr. Jim Zicaro
City of Palm Springs
3200 E. Tahquitz Canyon Way
Palm Springs, CA 92262

Re: Dakota Plan Check Submittal 2013
Time Extension for 2013 Plan Check Code Requirements

Dear Mr. Zicaro:

We are requesting a 180 day time extension for Plan Check under the 2013 code requirements for our 39 single family home development referred to as Dakota. In October of 2013 we submitted a Preliminary and Final PDD application which was approved by the City on February 19, 2014. In the beginning of March we were notified that a lawsuit would be filed against the City for violating the California Environmental Quality Act and Planning Zoning Laws in connection with the environmental review of our project. This complaint was filed on March 21, 2014 and we are currently in negotiations. Although the complaint was filed we submitted construction drawings in March at our own risk since we feel this complaint will be settled and would like to move forward with the project as soon as it is resolved.

Therefore we respectfully request an additional 180 day time extension to pull our building permit on this project. Please do not hesitate to contact me with any questions.

Sincerely,

John Wessman - Manager
Wessman Development LLC

Subject: RE: Final Route for 1501 South Belardo Road (Building Plan Check Number 2013-1417)

John,

This project is known as The Dakota project. It has been withdrawn in the Engineering Dept. because of a lawsuit. David Newell has a revised Dakota project that he will be routing to me soon. I will be perusing my current Dakota Conditions of Approval to make sure that they are correct and applicable, and will likely submit a new revised set of Conditions of Approval to David. Until I have done that, I do not want to answer the Final Route email in case there are some changes in the upcoming set of Conditions. Is that okay with you?

Please advise.

Thanks,

Carol Templeton, Engineering Associate
City of Palm Springs Engineering Division

Regarding: Plan Check Number: 2013-1417
Project Address: 1501 South Belardo Road
Project Description: Tract (Single Family Dwellings)

This letter is to inform you that the above captioned project may be subject to review by various City Departments and, at times, outside agencies.

Please be aware that it will be the responsibility of the applicant to address any and all of the comments from each Department and to resubmit plans directly to the Departments. Once the comments have been addressed to each Department's satisfaction, they will notify the Building Department that the plans are approvable. Building permits shall not be issued until such a time as all of the Departments have been satisfied.

Please secure the approvals of all applicable Departments in a timely manner so as not to delay the issuance of your permits at the conclusion of the plan check process.

Thank you in advance for your attention to this matter.

Respectfully.

PLAN CHECK CORRECTION LIST

PLAN CHECK DATA:	Plan Check Number:	2013-1417
	Date of Submittal:	20 May 2013
	Today's Date:	12 December 2013
PROJECT DATA:	Project Address:	1501 South Belardo Road
	Project Description:	Tract (Single Family Dwellings)

COMMENTS OR CORRECTIONS:

1. The plans have been returned to the City by EsGil Corporation. While EsGil is recommending the approval of the plans, permits will not be issued until the Building Department has received recommendation for approval from certain other departments. Where the department is a part of the City of Palm Springs, the plans have been routed to them for their review and approval. The Health Department, however, is a part of the County of Riverside, and you must deal with them directly. In the following list, the departments adjacent to the checked boxes have not given their approvals. (Phone numbers are provided for your convenience.) Please deal directly with the checked departments to obtain their approvals.

☒ Planning Department (760-323-8245) ☒ Fire Department (760-323-8184)
☒ Engineering Department (760-323-8253) ☐ Health Department (760-320-1048)

PALM SPRINGS 2013-1417
JULY 18, 2013

• PLANS

1. Please submit two revised, stamped & signed sets of plans to: EsGil Corp., 9320 Chesapeake Drive, Suite 208, San Diego, California 92123, (858) 560-1468.

• GENERAL REQUIREMENTS

2. Glazing in the following locations should be shown on plans as safety glazing as per Section R308.4: ***At these locations both panes of glass need to be tempered not just the exterior pane, as is per WUI provisions***.

   a) Glazing in doors.
   b) Glazing adjacent to a door where the nearest exposed edge of the glazing is within a 24" arc of either vertical edge of the door in a closed position and where the bottom exposed edge of the glazing is less than 60" above the walking surface. Exceptions:
      i) Glazing in walls on the latch side of and perpendicular to the plane of the door in a closed position.
      ii) Glazing that is adjacent to the fixed panel of patio doors.
   c) Glazing in individual fixed or operable panels that meet all of the following conditions:
      i) Exposed area of an individual pane is greater than 9 sq ft, and:
      ii) Exposed bottom edge is less than 18" above the floor, and:
      iii) Exposed top edge is greater than 36" above the floor, and:
      iv) One or more walking surfaces are within 36" horizontally of the plane of the glazing.
   d) Glazing in walls enclosing stairway landings or within 60" horizontally of the bottom tread of stairways where the bottom edge of the glass is less than 60" above the nose of the tread.
   e) Glazing adjacent to stairways, landings and ramps within 36" horizontally of a walking surface when the exposed surface of the glass is less than 60" above the plane of adjacent walking surface.

• STAIRWAYS/ RAILINGS

3. Guards (Section R312):

   a) Shall have a height of 42" (may be 34" along the sides of stairs).
   b) Openings between railings shall be less than 4".
   c) Shall be detailed to show capability to resist a concentrated load of 200 pounds in any direction along the top rail. Table R301.5.

• GARAGE

4. Show a **self-closing** door, either 1-3/8" **solid core**, or a listed 20 minute assembly, for openings between garage and dwelling. Section R302.5.1.

5. Garages beneath habitable rooms shall be separated by not less than 5/8" Type X gyp board. Sec. R302.6.

• STRUCTURAL

6. Note on the foundation plan that "Prior to the contractor requesting a Building Department foundation inspection, the soils engineer shall advise the building official in writing that:

   a) The building pad was prepared in accordance with the soils report,
   b) The utility trenches have been properly backfilled and compacted, and
   c) The foundation excavations, the soils expansive characteristics and bearing capacity conform to the soils report."

7. Provide a copy of the project soil report as per notes on Sheet SN-1. Section R401.4.

8. Provide a letter from the soils engineer confirming that the foundation plan, grading plan and specifications have been reviewed and that it has been determined that the recommendations in the soils report are properly incorporated into the construction documents.

9. Note on plans that surface water will drain away from building. The grade shall fall a minimum of 6" within the first 10'. Section R401.3.

10. Provide truss details and truss calculations for this project. Specify truss identification numbers on the plans. *The truss design drawings must contain all the information listed in Section R802.10.*

11. Please provide evidence that the engineer-of-record (or architect) has reviewed the truss calculation package prepared by others (i.e., a "review" stamp on the truss calculations or a letter). CBC Section 107.3.4.2.

12. Where is Sheet SD-3, as referenced on keynote #15, on Sheets S-1.2 & S-2.2?

13. On Sheet S-2.2, show a header over window H, on gridline 5, of the roof framing plans, as per floor plans?

14. The built-up wall, near grid point D-1 (on Sheets S-2.1 & S-2.2), do not match the floor plans.

15. Please provide a shear wall schedule on plans.

16. Please add staggered nailing for the keynote #2, on foundation plans, as stated on Sheets S-1.1 & S-2.1 (under foundation notes).

17. On 2nd floor framing plans, Sheet S-1.2, call out the header size over the window by the stairs on gridline D.

18. Please provide revised vertical structural calculations to match the structural plans as submitted. [What is currently provided does not match the plans].

19. On Sht. S-1.2, show the beam size over window F, on line 3, between lines B & C.

- **MECHANICAL**

20. Show dryer vent to the outside. CMC Section 504.3.

21. The energy design is required to be "registered". Please register before the next submittal. (HERS verification required).

22. The roof installed mechanical equipment must be accessible per 904.10 in CMC.

• ELECTRICAL

23. Add the following to the end of Subsection 310-2(b): City Policy:

    a) No aluminum wiring shall be used. EXCEPTION: Aluminum wiring 1/0 and larger may be used for main feed to subpanels only and shall be enclosed in a raceway.

24. Add the following to the end of Subsection 90-8(a): City Policy:

    a) SERVICE LOAD. The main switch and/or distribution panel of a single-family dwelling or condominium occupancy shall have an adequate capacity and space to carry the calculated load, plus an 8 KW future with four (4) spare spaces at the time of final inspection. The 8 KW load is not to be reduced by any demand factor.

25. Include the following notes on plans:

    a) Tamper resistant receptacles for all locations. NEC, Art. 210.52.
    b) Weather resistant type for receptacles installed in damp or wet locations (outside).
    c) Arc-fault protection for all outlets (not just receptacles) located in rooms described in NEC 210.12(B): Family, living, bedrooms, dining, halls, etc.
    d) GFCI protected outlets for locations described in NEC 210.8: Kitchens, garages, bathrooms, outdoors, within 6' of a sink, etc.

26. Note on plans that receptacle outlet locations comply with CEC Article 210.52(A).

27. The subpanels are located in the modified fire wall betixt the garage and dwelling. Provide a design that maintains this rating.

28. For a single-family dwelling unit, show that at least one receptacle outlet accessible at grade level will be installed outdoors at the front and back of the dwelling. CEC Article 210.52(E). This receptacle must be GFCI protected.

29. Both the kitchen receptacle circuit and the bathroom receptacle circuits are required to be 20 amperes, 15 amperes shown on the panel schedule.

30. Per CEC Art. 210.11(C)3, note on plans that bathroom circuiting shall be either:

    a) A 20 ampere circuit dedicated to each bathroom, *or*
    b) At least one 20 ampere circuit supplying only bathroom receptacle outlets.

• PLUMBING

31. Note on the plans that "combustion air for fuel burning water heaters will be provided in accordance with the Plumbing Code".

32. Provide a note on the plans: The control valves in bathtubs, whirlpool bathtubs, showers and tub-shower combinations must be pressure balanced or thermostatic mixing valves. CPC Section 414.5 and 418.0.

33. Dimension on the plans the 30" clear width required for the water closet compartment. CPC 407.5.

34. Gas line and water line sizing calculations may be required for each project.

35. Plumbing isometrics are required for all projects.

36. Specify on plans: Water conserving fixtures: New water closets shall use no more than 1.28 gallons of water per flush, lavatories and kitchen faucets may not exceed 2.2 GPM, and showers may not exceed 2.5 GPM of flow. CPC Section 402.0.

• GREEN BUILDING STANDARDS

The California Building Standards Commission (BSC) has adopted the Green Building Standards Code which became effective January 1, 2011 and must be enforced by the local building official. The following mandatory requirements for residential construction must be included on your plans. The Green Building Standards apply only to **newly constructed** buildings throughout California. CGC 101.3

37. Note on plans that the builder is to provide an operation manual (containing information for maintaining appliances, etc.) for the owner at the time of final inspection. CGC 4.410.1.

38. Note on plans that during construction, ends of duct openings are to be sealed, and mechanical equipment is to be covered. CGC 4.504.1.

39. Note on plans that bathroom fans shall be Energy Star rated, vented directly to the outside and controlled by a humidistat. CGC 4.506.1.

40. Note on plans that if provided, whole house exhaust fans shall have insulated covers or louvers which close when the fan is off. The covers/ louvers shall have min R4.2 insulation. CGC 5.507.1.

41. Note on plans that heating and AC shall be sized and selected by ACCA Manual J or ASHRAE handbook or equivalent. The duct sizing shall be sized in accordance with one of the ACCA methods listed in CGC Section 4.507.2.

42. Provide calculations prepared by a licensed engineer that will show water consumption reduction of 20% below the baseline water consumption listed in Table 4.303.1. In lieu of providing the calculations, imprint on the plans the attached Table 4.303.2 listing fixtures that meet the 20% reduction. CGC 4.303.1.

TABLE 4.303.2 FIXTURE FLOW RATES

FIXTURE TYPE	MAXIMUM FLOW RATE AT ≥ 20 % REDUCTION
Showerheads	2 gpm @ 80 psi
Lavatory faucets, residential	1.5 gpm @ 60 psi[2]
Kitchen faucets	1.8 gpm @ 60 psi
Water closets	1.28 gallons/flush[1]

1. Includes single and dual flush water closets with an effective flush of 1.28 gallons or less.

   Single flush toilets—The effective flush volume shall not exceed 1.28 gallons (4.8 liters). The effective flush volume is the average flush volume when tested in accordance with ASME A112.19.233.2.

   Dual flush toilets—The effective flush volume shall not exceed 1.28 gallons (4.8 liters). The effective flush volume is defined as the composite, average flush volume of two reduced flushes and one full flush. Flush volumes will be tested in accordance with ASME A112.19.2 and ASME A112.19.14.

2. Lavatory faucets shall not have a flow rate less than 0.8 gpm at 20 psi.

43. Note on the plans that when a shower is provided with multiple shower heads, the sum of flow to all the heads shall not exceed the 20% reduced limit, or the shower shall be designed so that only one head is on at a time. CGC 4.303.2.

44. Note on the plans that landscape Irrigation water use shall have weather based controllers. CGC 4.304.1.

- **MISCELLANEOUS**

45. To speed up the review process, note on this list (or a copy) where each correction item has been addressed, i.e., plan sheet, note or detail number, calculation page, etc.

46. The jurisdiction has contracted with EsGil Corporation located at 9320 Chesapeake Drive, Suite 208, San Diego, California 92123; telephone number of 858/560-1468, to perform the plan review for your project. If you have any questions regarding these plan review items, please contact **ALI SADRE, S.E.** at EsGil Corporation. Thank you.

INSPECTION INFORMATION

No work shall be concealed without a signature by the inspector.

The approved plans and this card must always be available to the inspector. Preserve this record.

A permit shall expire and become null and void if substanial work is not commenced within 180 days, or if the work is suspended or abandoned for a period of 180 days. If the work is progressing but approaching the end of the 180 day period from the last recorded day of a passed inspection, a progress inspection must be obtained to keep an active permit.

CONSTRUCTION HOURS

Weekdays	7am to 7pm
Saturdays	8am to 5pm
Sundays & Holidays	**Not Permitted**

BUILDING PERMIT

Building Address: 1501 S Belardo Rd

Date Submitted **10/30/2014** | Case No. | Permit Technician **Alberto Gradilla**

Owner **Cresendo, LLC** | Address **555 S Sunrise Way Palm Springs CA** | Phone **760 325 3050**

Contractor **Dakota** | Address **555 S Sunrise Way Palm Springs CA** | Phone **760 325 3050** | Lic. Number **213720**

Architect | Address | Phone

Engineer | Address | Phone

Lot # | Block # | Tract **Dakota** | Parcel Number **513-300-057**

Lot Size | Zone | Occupancy

Building Sq. Ft. | Garage/Carport | Roofed Patio/Porch | Remodeled Area

Use of building **Site** | Permit Type **Walls/Fences** | Const. Type | Fixture Units

Fire Sprinkler | Units | Valuation **250000.00** | Permit Fees Paid **2154.77**

Describe work in detail:

Permit to construct 6,748' of garden and retaining walls per approved grading plans and ORCO details.

Special Conditions:

NOTICE: Wall and fence heights are to be measured thusly: in front yards or side yards that abut streets from crown of street or top of curb, whichever is higher. Side or rear yards not abutting streets from surrounding grade Adjacent properties with elevation differentials - from the average midpoint of the elevation difference at the property line. No exceptions unless prior approval is obtained from the Planning Dept.

DO NOT CONCEAL OR COVER ANY CONSTRUCTION UNTIL THE WORK IS INSPECTED

IMPORTANT

The issuance of this permit shall not be held to be an approval of the violation of any provisions of any city or county ordinance or state law.
Inspections of work are subject to an approved set of plans being on the job. Changes to plans are not to be made without permission of the Building and Safety Divisions.
The owner and/or contractor is responsible for establishing all property lines. All utilities must be underground.
This permit will expire if work is not started in 180 days or if more than 180 days elapses between inspections.
I certify that I am familiar with all requirements of the City of Palm Springs as they apply to this permit and understand that these requirements must be completed prior to final inspection and that no certification of occupancy will be issued until such time as these requirements are met. I certify that I have read this application and state that the information is true and correct.

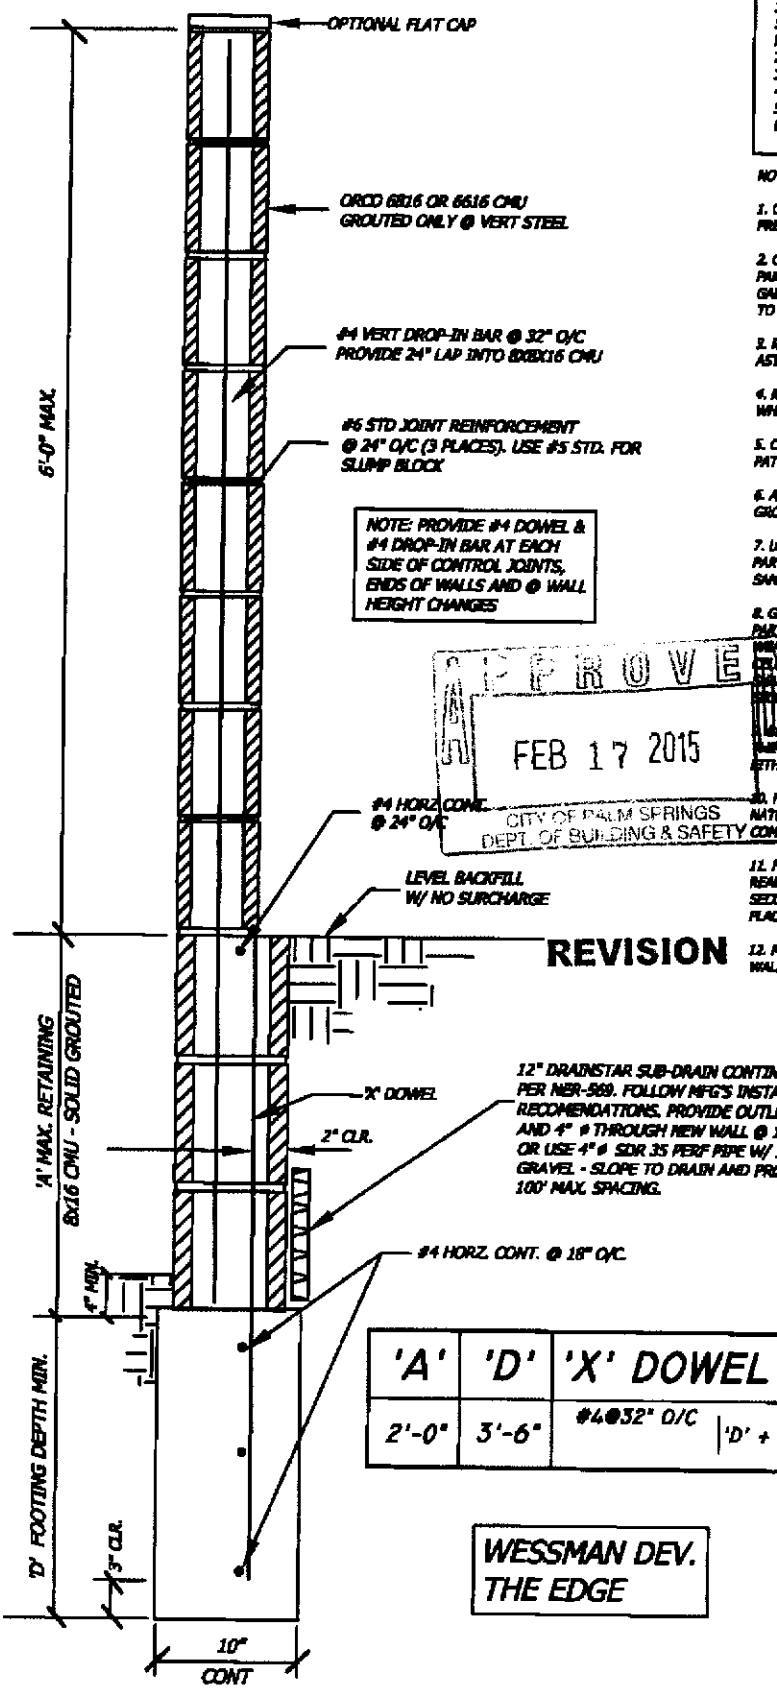
ORCO 6' HIGH WALL W/ 2' RETAINING

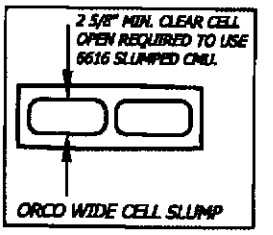
FOR 129/100 MPH WIND 3 SEC. GUST @ EXP C



APPROVED
FEB 17 2015
CITY OF PALM SPRINGS
DEPT. OF BUILDING & SAFETY

REVISION

'A'	'D'	'X' DOWEL
2'-0"	3'-6"	#4@32" O/C 'D' + 1'-9"



DESIGN CRITERIA: PER 2013 CBC

1. SOIL BEARING PRESSURE = 1500 PSF + 1/3 INCR. FOR WIND OR SEISMIC. EQUIVALENT FLUID PRESSURE = 45 PSF PER SOILS REPORT
2. ALLOWABLE LATERAL PASSIVE PRESSURE = 150 PSF.
3. GROUT STRENGTH = 3000 PSI @ 28 DAYS.
4. REINFORCING STEEL : GRADE 60.
5. SEISMIC - 1 SEC. ACCELERATION = 100%.
6. 1500 PSI MASONRY COMPRESSION STRENGTH.

NOTES:

1. CONCRETE BLOCK SHALL CONFORM TO ASTM C 90. ORCO STD. PRECISION BLOCK MAY BE USED.
2. CONCRETE FOR FOOTING SHALL BE 1 PART CEMENT TO 2-1/2 PARTS SAND TO 3-1/2 PARTS GRAVEL WITH A MAXIMUM OF 5-1/2 GALLONS OF WATER PER SACK. PORTLAND CEMENT SHALL CONFORM TO ASTM C 150 TYPE II/V. f'_c = 2500 PSI
3. REINFORCING STEEL SHALL BE DEFORMED AND CONFORM TO ASTM A 615 GRADE 60. PROVIDE 48 BAR DIAMETER LAP.
4. REBAR SHALL BE CENTERED IN THE CONCRETE BLOCK CELL IN WHICH IT IS LOCATED.
5. CONCRETE BLOCK SHALL BE LAYED IN A RUNNING BOND PATTERN WITH VERTICAL CONTINUITY OF THE CELLS UNO.
6. ALL BLOCK CELLS CONTAINING VERTICAL REBAR SHALL BE SOLID GROUTED.
7. USE ORP TYPE S MORTAR PROPORTIONED USING ASTM C 270. 1 PART CEMENT TO 1/2 PART LIME TO 4-1/2 PARTS DAMP, LOOSE SAND.
8. GROUT FOR CONCRETE BLOCK TO BE 1 PART CEMENT TO 3 PARTS SAND (GROUT MAY CONTAIN 2 PARTS 3/8" PEA GRAVEL IF WEATHER CONDITIONS ARE FAVORABLE AND BLOCK UNOBSTRUCTED CELL SIZE IS SUFFICIENT TO ALLOW GOOD GROUT FLOW). WATER SHALL BE ADDED TO PRODUCE GOOD GROUT FLOW WITHOUT SEGREGATION OF THE CONSTITUENTS PER ASTM 476.
9. BLOCK STEM MAY BE WET-SET 1-1/2" INTO THE FOOTING WHILE THE CONCRETE IS PLASTIC. BLOCK STEM MAY BE PLACED TO EITHER EDGE OF THE TRENCH TYPE FOOTING.
10. FOOTING MUST BE POURED ON OR INTO UNDISTURBED NATURAL SOIL OR ON COMPACTED FILL WITH A MINIMUM COMPACTION OF 90%.
11. FIRST INSPECTION TO BE AFTER FOOTING TRENCHES ARE READY FOR CONCRETE AND ALL REQUIRED STEEL IS TIED IN PLACE. SECOND INSPECTION TO BE WHEN THE REQUIRED VERTICAL IS IN PLACE AND THE BLOCK WALL IS READY TO GROUT.
12. MAXIMUM CONTROL JOINT SPACING: 40' O/C OR 20' O/C IF THE WALL IS TO BE STUCCO COATED.

- ❑ PLAN REVIEWER
- ❑ FILE

☐ The plans transmitted herewith have been corrected where necessary and substantially comply with the jurisdiction's building codes.

☒ The plans transmitted herewith will substantially comply with the jurisdiction's building codes when minor deficiencies identified below are resolved and checked by building department staff.

☐ The plans transmitted herewith have significant deficiencies identified on the enclosed check list and should be corrected and resubmitted for a complete recheck.

☐ The check list transmitted herewith is for your information. The plans are being held at Esgil Corporation until corrected plans are submitted for recheck.

☐ The applicant's copy of the check list is enclosed for the jurisdiction to forward to the applicant contact person.

☐ The applicant's copy of the check list has been sent to:

☐ EsGil Corporation staff **did not** advise the applicant that the plan check has been completed.

☒ EsGil Corporation staff **did** advise the applicant that the plan check has been completed.

DAKOTA

1501 S. BELARDO ROAD
PALM SPRINGS, CA 92262
TRACT MAP 36548 – CASE 5.1297 PDD 364

SITE NOTES:

REFER TO CIVIL DRAWINGS FOR SITE INFORMATION

ALL PROPERTY LINES, EASEMENTS, AND BUILDINGS BOTH EXISTING AND PROPOSED ARE SHOWN ON THIS PLAN. ALL PROPERTY LINES ARE REAL.

THIS PROJECT IS NOT WITHIN A NOISE CRITICAL AREA (CNEL CONTOURS OF 60 DB) AS SHOWN ON THE CITY OF PALM SPRINGS OFFICIAL ZONING MAP.

EXTERIOR DECKS SHALL HAVE A MIN. SLOPE OF 1/4" 12", AND SLOPE AWAY FROM BUILDING.

EXTERIOR FLATWORK SHALL HAVE A MIN. SLOPE 1/8" 12" AND SLOPE AWAY FROM BUILDING (EXCEPTION DRIVEWAY SHALL HAVE A MIN. SLOPE OF 1/4" 12")

SEE LANDSCAPE PLAN FOR NEW PLANTINGS AND LANDSCAPE LIGHTING LOCATIONS.

SEE LANDSCAPE PLANS FOR NEW HARDSCAPE INFORMATION.

SEE LANDSCAPE FOR POOL FINISHES.

ALL SITE DRAINAGE TO APPROVED STORM DRAINAGE VIA NON-CORROSIVE DEVICES. REFER TO CIVIL SHEETS FOR ADDITIONAL SPECIFICATIONS AND DRAINAGE INFORMATION.

PROVIDE AN ALARM FOR ALL DOORS TO THE DWELLING THAT FORM PART OF THE POOL ENCLOSURE. THE ALARM SHALL SOUND CONTINUOUSLY FOR A MINIMUM OF 30 SECONDS WHEN THE DOOR IS OPENED. IT SHALL AUTOMATICALLY RESET AND EQUIPPED WITH A MANUAL MEANS TO DEACTIVATE (FOR 15 SECONDS MAX.) FOR A SINGLE OPENING. THE DEACTIVATION SWITCH SHALL BE AT LEAST 54" ABOVE THE FLOOR.

THE CONSTRUCTION SHALL NOT RESTRICT A FIVE-FOOT CLEAR AND UNOBSTRUCTED ACCESS TO ANY WATER OR POWER DISTRIBUTION FACILITIES (POWER POLES, PULL-BOXES, TRANSFORMERS, VAULTS, PUMPS, VALVES, METERS, APPURTENANCES, ETC.) OR TO THE LOCATION OF THE HOOK-UP. THE CONSTRUCTION SHALL NOT BE WITHIN TEN FEET OF ANY POWER LINES WHETHER OR NOT THE LINES ARE LOCATED ON THE PROPERTY. FAILURE TO COMPLY MAY CAUSE CONSTRUCTION DELAYS AND/OR ADDITIONAL EXPENSES.

AN APPROVED SEISMIC GAS SHUT-OFF VALVE WILL BE INSTALLED ON THE FUEL GAS LINE ON THE DOWN STREAM SIDE OF THE UTILITY METER AND BE RIGIDLY CONNECTED TO THE EXTERIOR OF THE BUILDING OR STRUCTURE CONTAINING THE FUEL GAS PIPING. (PER ORDINANCE 170.1(M) (INCLUDES COMMERCIAL ADDITIONS AND TI WORK OVER $10,000). SEPARATE PLUMBING PERMITS REQUIRED.

SECURED AUTOMATED VEHICLE GATES OR ENTRIES SHALL UTILIZE APPROVED KNOX ACCESS SWITCHES AS REQUIRED BY THE FIRE CODE OFFICIAL. SECURED NON-AUTOMATED VEHICLE GATES OR ENTRIES SHALL UTILIZE AN APPROVED PADLOCK OR CHAIN WHEN REQUIRED BY THE FIRE CODE OFFICIAL.

RESIDENTIAL COMPLEXES USING SECURED AUTOMATED VEHICLE ENTRY GATES SHALL UTILIZE A COMBINATION TOMAR STROBE-ACTIVATED SWITCH AND AN APPROVE KNOX KEY (ELECTRIC SWITCH). IN THE EVENT OF A POWER FAILURE, THE GATES SHALL BE DEFAULTED OR AUTOMATICALLY TRANSFERRED TO A FAIL SAFE MODE ALLOWING THE GATE TO PUSH OPEN WITHOUT THE USE OF SPECIAL KNOWLEDGE OR ANY EQUIPMENT. IF A TWO-GATE SYSTEM IS USED, THE OVERRIDE SWITCH MUST OPEN BOTH GATES.

BUILDINGS SHALL HAVE APPROVED ADDRESS NUMBERS, BUILDING NUMBERS OR APPROVED BUILDING IDENTIFICATION PLACED IN A POSITION THAT IS PLAINLY VISIBLE FROM THE STREET OR ROAD FRONTING THE PROPERTY. THESE NUMBERS SHALL CONTRAST WITH THE BACKGROUND. ADDRESS NUMBERS SHALL BE A MINIMUM OF 4" HIGH AND MAXIMUM HEIGHT OF 8" (SCH 13) WITH A MINIMUM STROKE WIDTH OF 0.5".

A COPY OF THE APPROVED SOILS REPORT SHALL BE KEPT ON SITE.

BUILDING DEPARTMENT NOTES:

ALL SITE WALLS, FENCING, AND RETAINING WALLS SHALL BE FILED UNDER A SEPARATE PERMIT.

GREEN BUILDING STANDARDS:

THE SITE SHALL BE PLANNED AND DEVELOPED TO KEEP SURFACE WATER AWAY FROM BUILDINGS. PLANS SHALL BE PROVIDED AND APPROVED BY THE CITY ENGINEER THAT SHOW SITE GRADING AND PROVIDE FOR STORM WATER RETENTION AND DRAINAGE DURING CONSTRUCTION. BMPs THAT ARE CURRENTLY ENFORCED BY THE CITY ENGINEER MUST BE IMPLEMENTED PRIOR TO INITIAL INSPECTION BY THE BUILDING DEPARTMENT. CGC 4.106.3.

A MINIMUM OF 50% OF CONSTRUCTION WASTE IS TO BE RECYCLED. CGC 4.408.1

ORCO WALL SYSTEM FORCES PER 2013 CBC CHAPTER 16

CITY OF PALM SPRINGS, CALIFORNIA

WIND FORCES TO WALLS PER ASCE 7-10 SECTION 29.4

CHECK WIND FORCE CALCULATION FOR BASIC 85 MPH & 95 MPH 3 SECOND GUST SPEED EXPOSURE C CONDITION

USING ASCE 7-10 CHAPTER 29 WIND LOADS:
USING SECTION 29.3.2 TO FIND THE 3 SEC. VELOCITY PRESSURE Q_z.
$Q_H = 0.00256\ K_z\ K_{zt}\ K_d\ V^2\ I$ (29.3-1), WHERE: K_z = 0.57 FOR EXP B AND K_z =0 .85 FOR EXP C

FROM TABLE 29.3-1:
K_{zt} = 1.0 DEFAULT PER SECTION 26.8-1
K_d = 0.85 FROM SECTION 26.6-1

THEREFORE, FOR 85 MPH & 95 MPH 3 SEC. WIND GUST SPEED:
$Q_H = (0.00256)(0.85)(1.0)(0.85)(85)^2\ (1)$ = 13.4 PSF & $Q_H = (0.00256)(0.85)(1.0)(0.85)(95)^2\ (1)$ = 16.7 PSF

NOW USING SECTION 29.4.1 FOR SOLID FREESTANDING WALLS:
$F_H = Q_H\ G\ C_f\ A_s$ (29.4-1) WHERE: G= 0.85 FROM SECTION 26.9.1

C_f = 1.66 PER FIGURE 29.4-1 USING AVERAGE ASPECT RATIO (WALL LENGTH TO HIGTH) OF 2.
NOTE: C_f RANGES FROM 1.48 FOR A 5' WIDE RETURN WALL TO 1.3 FOR A 60' PANEL.

THEREFORE: FOR 85 MPH = (13.4 PSF)(0.85)(1.4) A_s = 16.0 PSF. & FOR 95 MPH = (16.7 PSF)(0.85)(1.4) A_s = 19.9 PSF.

WIND FORCE FOR EXPOSURE C CONDITIONS							
V_{ULT} IN MPH	110	116	122	129	136	142	155
V_{ASD} IN MPH= $(V_{ULT})(0.6^{1/2})$	85	90	95	100	105	110	120
$Q_H = .00256\ K_z\ K_{zt}\ K_d\ V^2\ I$ WHERE K_z=0.85, K_{zt}=1.0, K_d= 0.85	13.6 PSF	16.0 PSF	16.7 PSF	19.6 PSF	20.4 PSF	22.4 PSF	26.3 PSF
F_H = WIND FORCE PER SQ. FT. $F_H = Q_H G\ C_f\ A_s$ PER SECTION 29.4-1 WHERE G=0.85 AND C_f= 1.4 AVE.	16.0 PSF	17.9 PSF	19.9 PSF	22.0 PSF	24.3 PSF	26.7 PSF	31.9 PSF

PROJECT SITE WIND ZONE: V_{ASD} = 100 MPH EXPOSURE C
THEREFORE WIND FORCE = 22.0 PSF

SEISMIC FORCES PER 2013 CBC (ASCE 7-10 SECTION 15.4.1 B) FOR NONBUILDING STRUCTURES

- FREE STANDING WALLS AND PILASTERS
- PROJECT SITE CLASS D
- FUNDAMENTAL PERIOD T GREATER THAN 0.06 SEC CALCULATED USING SECTION 12.8-7 AND TABLE 12.8-2

PER EQN. 15.4-2, SEISMIC BASE SHEAR FOR FLEXIBLE NONBUILDING STRUCTURES NOT SIMILAR TO BUILDINGS:
$V = [(0.80)(S_1)/(R/I)]\ W$, WHERE I = 1.0 & FA = 1.1 FROM TABLE 11.4-1 & R = 3.0 FROM TABLE 15.4.2

SEISMIC FORCE FOR 1 SEC. PERIOD CONDITIONS						
S_1 FROM FIG.22-2	60	70	80	90	100	110
$V = [(0.80)(S_1)/(R/I)]\ W$	0.22W	0.24W	0.25W	0.27W	0.30W	0.32W

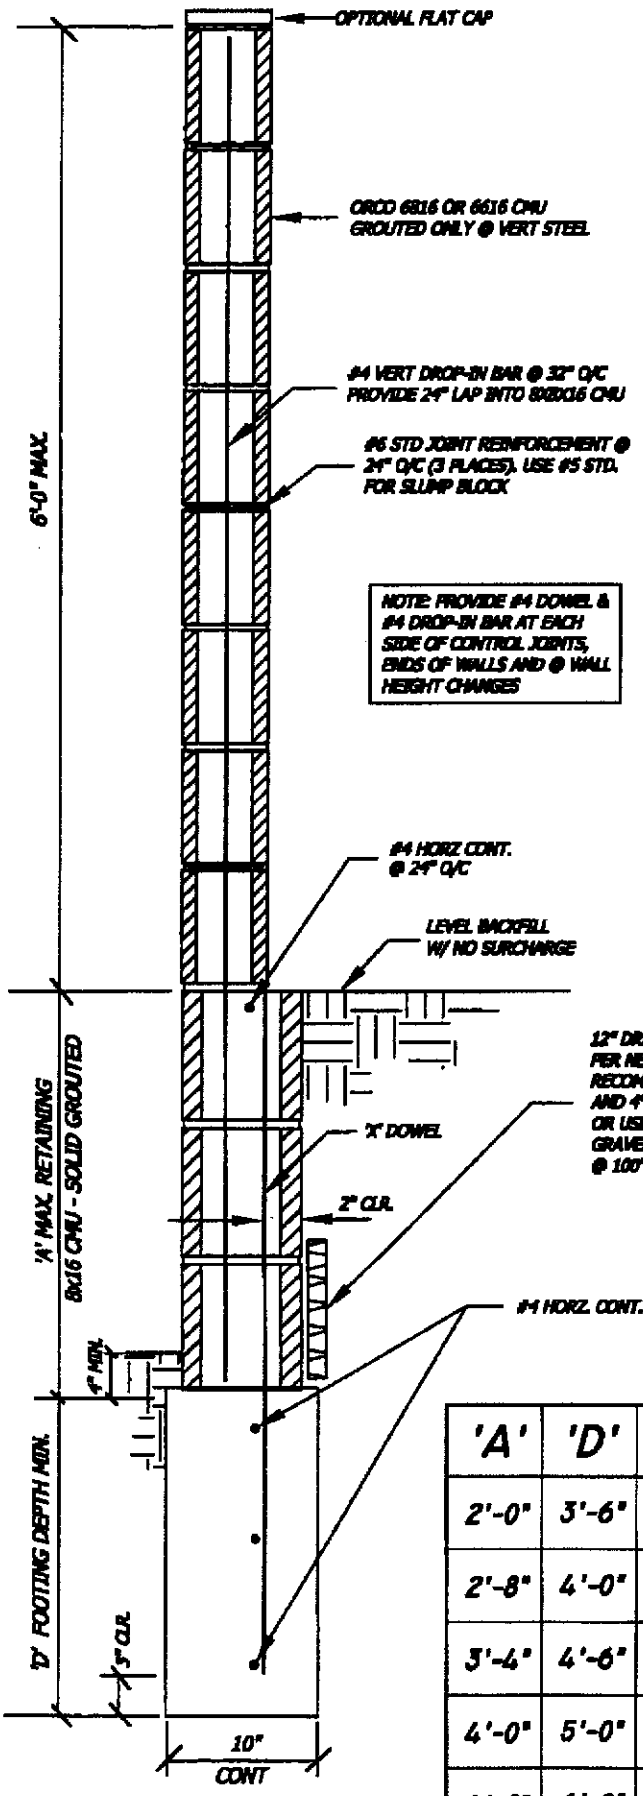
PROJECT SITE SEISMIC INFORMATION: S_1 = 1.00 & V = 0.30W

CMU WALL WEIGHTS PER SQ. FT.										
BLOCK TYPE	6" CMU W/ JOINT REINFORCEMENT					8" CMU				16X16 PILASTER
GROUTED @ O/C	48"O/C	40"O/C	32"O/C	24"O/C	16"O/C	32"O/C	24"O/C	16"O/C	SOLID	SOLID
WT. PER SQ. FT.	34 PSF	35 PSF	37 PSF	39 PSF	45 PSF	48 PSF	52 PSF	60 PSF	80 PSF	160 PSF

THEREFORE SEISMIC FORCE IS: $V_{6"\text{-}CMU} = (0.30)(48\ PSF) = 14.4\ PSF$
$V_{8"\text{-}CMU} = (0.30)(68\ PSF) = 20.4\ PSF$

ORCO 6' HIGH WALL W/ 2'-0" TO 4'-8" RETAINING

FOR 129/100 MPH WIND 3 SEC. GUST @ EXP C



DESIGN CRITERIA PER 2013 CBC:

1. SOIL BEARING PRESSURE = 1500 PSF + 1/3 INCR. FOR WIND OR SEISMIC.
2. EQUIVALENT FLUID PRESSURE = 45 PSF PER SOILS REPORT.
3. ALLOWABLE LATERAL PASSIVE PRESSURE = 150 PSF.
4. GROUT STRENGTH = 2000 PSI @ 28 DAYS.
5. REINFORCING STEEL : GRADE 60.
6. SEISMIC - 1 SEC. ACCELERATION = 109%.
7. 1500 PSI MASONRY COMPRESSION STRENGTH.

NOTES:

1. CONCRETE BLOCK SHALL CONFORM TO ASTM C 90. ORCO STD. PRECISION BLOCK MAY BE USED.

2. CONCRETE FOR FOOTING SHALL BE 1 PART CEMENT TO 3-1/2 PARTS SAND TO 3-1/2 PARTS GRAVEL WITH A MAXIMUM OF 1-1/2 GALLONS OF WATER PER SACK. PORTLAND CEMENT SHALL CONFORM TO ASTM C 150 TYPE II/V. Pc = 2500 PSI

3. REINFORCING STEEL SHALL BE DEFORMED AND CONFORM TO ASTM A 615 GRADE 60. PROVIDE 40 BAR DIAMETER LAP.

4. REBAR SHALL BE CENTERED IN THE CONCRETE BLOCK CELL IN WHICH IT IS LOCATED.

5. CONCRETE BLOCK SHALL BE LAYED IN A RUNNING BOND PATTERN WITH VERTICAL CONTINUITY OF THE CELLS MAINTAINED.

6. ALL BLOCK CELLS CONTAINING VERTICAL REBAR SHALL BE SOLID GROUTED.

7. USE CMP TYPE S MORTAR PROPORTIONED USING ASTM C 270. 1 PART CEMENT TO 1/2 PART LIME TO 4-1/2 PARTS DAMP, LOOSE SAND.

8. GROUT FOR CONCRETE BLOCK TO BE 1 PART CEMENT TO 3 PARTS SAND (GROUT MAY CONTAIN 2 PARTS 3/8" PEA GRAVEL IF WEATHER CONDITIONS ARE FAVORABLE AND BLOCK UNOBSTRUCTED CELL SIZE IS SUFFICIENT TO ALLOW GOOD GROUT FLOW). WATER SHALL BE ADDED TO PRODUCE GOOD GROUT FLOW WITHOUT SEGREGATION OF THE CONSTITUENTS PER ASTM 476.

9. BLOCK STEM MAY BE WET-SET 1-1/2" INTO THE FOOTING WHILE THE CONCRETE IS PLASTIC. BLOCK STEM MAY BE PLACED TO EITHER SIDE OF THE TRENCH TYPE FOOTING.

10. FOOTING MUST BE POURED ON OR INTO UNDISTURBED NATURAL SOIL OR ON COMPACTED FILL WITH A MINIMUM COMPACTION OF 90%.

11. FIRST INSPECTION TO BE AFTER FOOTING TRENCHES ARE READY FOR CONCRETE AND ALL REQUIRED STEEL IS TIED IN PLACE. SECOND INSPECTION TO BE WHEN THE REQUIRED VERTICAL IS IN PLACE AND THE BLOCK WALL IS READY TO GROUT.

12. MAXIMUM CONTROL JOINT SPACING: 40' O/C OR 20' O/C IF THE WALL IS TO BE STUCCO COATED.

Summary of Overturning & Resisting Forces & Moments

Item		.....OVERTURNING..... Force lbs	Distance ft	Moment ft-#		.....RESISTING..... Force lbs	Distance ft	Moment ft-#
Heel Active Pressure	=	202.5	1.00	202.5	Soil Over Heel	= 536.7	1.83	983.9
Surcharge over Heel	=				Sloped Soil Over Heel	=		
Surcharge Over Toe	=				Surcharge Over Heel	=		
Adjacent Footing Load	=				Adjacent Footing Load	=		
Added Lateral Load	=				Axial Dead Load on Stem	=		
Load @ Stem Above Soil	=	132.0	6.00	792.0	* Axial Live Load on Stem	=		
	=				Soil Over Toe	=		
					Surcharge Over Toe	=		
Total		334.5	O.T.M.	994.5	Stem Weight(s)	= 450.0	0.28	126.5
	=		=		Earth @ Stem Transitions	=		
					Footing Weight	= 450.0	1.50	675.0
					Key Weight	=		
					Vert. Component	=		
					Total	= 1,436.7 lbs	R.M.=	1,785.4

Resisting/Overturning Ratio = 1.80
Vertical Loads used for Soil Pressure = 1,436.7 lbs

* Axial live load NOT included in total displayed, or used for overturning resistance, but is included for soil pressure calculation.

Vertical component of active lateral soil pressure IS NOT considered in the calculation of Sliding Resistance.

Vertical component of active lateral soil pressure IS NOT considered in the calculation of Overturning Resistance.

Tilt

Horizontal Deflection at Top of Wall due to settlement of soil

(Deflection due to wall bending not considered)

Soil Spring Reaction Modulus	250.0	pci
Horizontal Defl @ Top of Wall (approximate only)	0.129	in

The above calculation is not valid if the heel soil bearing pressure exceeds that of the toe, because the wall would then tend to rotate into the retained soil.

Cantilevered Retaining Wall Design

Code: CBC 2013,ACI 318-11,ACI 530-11

Footing Dimensions & Strengths

Toe Width	=	0.00 ft
Heel Width	=	3.25
Total Footing Width	=	3.25
Footing Thickness	=	12.00 in
Key Width	=	12.00 in
Key Depth	=	4.00 in
Key Distance from Toe	=	2.25 ft

f'c = 2,500 psi Fy = 60,000 psi
Footing Concrete Density = 150.00 pcf
Min. As % = 0.0018
Cover @ Top 2.00 @ Btm.= 3.00 in

Footing Design Results

		Toe	Heel
Factored Pressure	=	1,960	0 psf
Mu' : Upward	=	0	576 ft-#
Mu' : Downward	=	0	2,066 ft-#
Mu: Design	=	0	1,491 ft-#
Actual 1-Way Shear	=	0.00	2.86 psi
Allow 1-Way Shear	=	0.00	75.00 psi

Toe Reinforcing = None Spec'd
Heel Reinforcing = None Spec'd
Key Reinforcing = None Spec'd

Other Acceptable Sizes & Spacings

Toe: Not req'd: Mu < phi*5*lambda*sqrt(f'c)*Sm
Heel: Not req'd: Mu < phi*5*lambda*sqrt(f'c)*Sm
Key: Not req'd: Mu < phi*5*lambda*sqrt(f'c)*Sm

Summary of Overturning & Resisting Forces & Moments

Item		.....OVERTURNING..... Force lbs	Distance ft	Moment ft-#		.....RESISTING..... Force lbs	Distance ft	Moment ft-#
Heel Active Pressure	=	303.1	1.22	370.7	Soil Over Heel	= 793.2	1.96	1,553.4
Surcharge over Heel	=				Sloped Soil Over Heel	=		
Surcharge Over Toe	=				Surcharge Over Heel	=		
Adjacent Footing Load	=				Adjacent Footing Load	=		
Added Lateral Load	=				Axial Dead Load on Stem	=		
Load @ Stem Above Soil	=	132.0	6.67	880.4	* Axial Live Load on Stem	=		
	=				Soil Over Toe	=		
					Surcharge Over Toe	=		
Total		435.1 O.T.M.		1,251.2	Stem Weight(s)	= 506.3	0.29	145.3
	=		=		Earth @ Stem Transitions	=		
					Footing Weight	= 487.5	1.63	792.2
					Key Weight	= 50.0	2.75	137.5
					Vert. Component	=		
					Total =	1,837.0 lbs	R.M.=	2,628.3

Resisting/Overturning Ratio = 2.10
Vertical Loads used for Soil Pressure = 1,837.0 lbs

* Axial live load NOT included in total displayed, or used for overturning resistance, but is included for soil pressure calculation.

Vertical component of active lateral soil pressure IS NOT considered in the calculation of Sliding Resistance.

Vertical component of active lateral soil pressure IS NOT considered in the calculation of Overturning Resistance.

Tilt

Horizontal Deflection at Top of Wall due to settlement of soil

(Deflection due to wall bending not considered)

Soil Spring Reaction Modulus	250.0	pci
Horizontal Defl @ Top of Wall (approximate only)	0.121	in

The above calculation is not valid if the heel soil bearing pressure exceeds that of the toe, because the wall would then tend to rotate into the retained soil.

INSPECTION INFORMATION

No work shall be concealed without a signature by the inspector.

The approved plans and this card must always be available to the inspector. Preserve this record.

A permit shall expire and become null and void if substanial work is not commenced within 180 days, or if the work is suspended or abandoned for a period of 180 days. If the work is progressing but approaching the end of the 180 day period from the last recorded day of a passed inspection, a progress inspection must be obtained to keep an active permit.

JOB NOTES:

CALL FOR THE FOLLOWING INSPECTIONS

GROUND PLUMBING

After the site is graded and forms in place, an elevation and location certification (Pad Cert) shall be submitted to the building inspector prior to requesting ground plumbing inspection

FOUNDATION

Before pouring concrete, once all reinforced steel, hardware, footings are dug and UFER ground is in place.

ROOF NAIL / OUTSIDE WRAP

After roof sheathing installed and nailed, doors, windows and all exterior penetrations flashed, shear panels installed and nailed prior to covering the building.

COMBINATION / ROUGH FRAME

After building is covered, roof loaded and weather tight and all rough electrical, mechanical/HVAC, plumbing and fire - suppression system ready to test.

INSULATION

When installed and exterior walls and top plates sealed.

LATH & DRYWALL

When nailed and all metal trim in place, but before wallboard is taped.

FINAL

All other departments are signed off (i.e. Planning, Engineering, Fire and Health), all electrical, plumbing, HVAC completed. CO/smoke alarms installed, Title 24 energy requirements and energy compliance certificate completed.

Describe work in detail:

Plan AR Permit to construct 2 story - 2 bedroom 2 bath single family dwelling with great room, powder room and 2 car garage. All per approved master plans.

(PARK FEES WAIVED: No release of utilities until requirements of covenant have been satisfied).

Special Conditions:

Block walls, pool and spa on seperate permit.

BUILDING PERMIT FEES BASED ON DEPOSIT SYSTEM. ADDITIONAL FEES MAY BE DUE PRIOR TO RELEASE OF UTILITIES AND FINAL INSPECTION.

DO NOT CONCEAL OR COVER ANY CONSTRUCTION UNTIL THE WORK IS INSPECTED

IMPORTANT

The issuance of this permit shall not be held to be an approval of the violation of any provisions of any city or county ordinance or state law.
Inspections of work are subject to an approved set of plans being on the job. Changes to plans are not to be made without permission of the Building and Safety Divisions.
The owner and/or contractor is responsible for establishing all property lines. All utilities must be underground.
This permit will expire if work is not started in 180 days or if more than 180 days elapses between inspections.
I certify that I am familiar with all requirements of the City of Palm Springs as they apply to this permit and understand that these requirements must be completed prior to final inspection and that no certification of occupancy will be issued until such time as these requirements are met. I certify that I have read this application and state that the information is true and correct.

Work Done Observed and probed bldg footings

(Lots 21-23 and 11-13)

Test Summary / Footings Inspected

Test No.	Location	Elev.	Dry Density	Moist %	% Relative Compaction	Ref. Max pcf	Moist %

Comments:

Observed and probed bldg footings for lots 21-23 and Lots 11-13. Material found to be firm and unyielding with good moisture. Footings should be kept free of any loose material and or debris

INSPECTION INFORMATION

No work shall be concealed without a signature by the inspector.

The approved plans and this card must always be available to the inspector. Preserve this record.

A permit shall expire and become null and void if substanial work is not commenced within 180 days, or if the work is suspended or abandoned for a period of 180 days. If the work is progressing but approaching the end of the 180 day period from the last recorded day of a passed inspection, a progress inspection must be obtained to keep an active permit.

CONSTRUCTION HOURS

Weekdays	7am to 7pm
Saturdays	8am to 5pm
Sundays & Holidays	**Not Permitted**

JOB NOTES:

(PARK FEES WAIVED: No release of utilities until requirements of covenant have been satisfied).

JOB NOTES:

CALL FOR THE FOLLOWING INSPECTIONS

GROUND PLUMBING
After the site is graded and forms in place, an elevation and location certification (Pad Cert) shall be submitted to the building inspector prior to requesting ground plumbing inspection

FOUNDATION
Before pouring concrete, once all reinforced steel, hardware, footings are dug and UFER ground is in place.

ROOF NAIL / OUTSIDE WRAP
After roof sheathing installed and nailed, doors, windows and all exterior penetrations flashed, shear panels installed and nailed prior to covering the building.

COMBINATION / ROUGH FRAME
After building is covered, roof loaded and weather tight and all rough electrical, mechanical/HVAC, plumbing and fire - suppression system ready to test.

INSULATION
When installed and exterior walls and top plates sealed.

LATH & DRYWALL
When nailed and all metal trim in place, but before wallboard is taped.

FINAL
All other departments are signed off (i.e. Planning, Engineering, Fire and Health), all electrical, plumbing, HVAC completed. CO/smoke alarms installed, Title 24 energy requirements and energy compliance certificate completed.

Describe work in detail:

Plan B Permit to construct 2 story - 2 bedroom 2 bath single family dwelling with great room, powder room, sitting area and 2 car garage. All per approved master plans.

(PARK FEES WAIVED: No release of utilities until requirements of covenant have been satisfied).

Special Conditions:

Block walls, pool and spa to be on seperate permit.

BUILDING PERMIT FEES BASED ON DEPOSIT SYSTEM. ADDITIONAL FEES MAY BE DUE PRIOR TO RELEASE OF UTILITIES AND FINAL INSPECTION.

DO NOT CONCEAL OR COVER ANY CONSTRUCTION UNTIL THE WORK IS INSPECTED

IMPORTANT

The issuance of this permit shall not be held to be an approval of the violation of any provisions of any city or county ordinance or state law. Inspections of work are subject to an approved set of plans being on the job. Changes to plans are not to be made without permission of the Building and Safety Divisions.
The owner and/or contractor is responsible for establishing all property lines. All utilities must be underground.
This permit will expire if work is not started in 180 days or if more than 180 days elapses between inspections.
I certify that I am familiar with all requirements of the City of Palm Springs as they apply to this permit and understand that these requirements must be completed prior to final inspection and that no certification of occupancy will be issued until such time as these requirements are met. I certify that I have read this application and state that the information is true and correct.

INSPECTION INFORMATION

No work shall be concealed without a signature by the inspector.

The approved plans and this card must always be available to the inspector. Preserve this record.

A permit shall expire and become null and void if substanial work is not commenced within 180 days, or if the work is suspended or abandoned for a period of 180 days. If the work is progressing but approaching the end of the 180 day period from the last recorded day of a passed inspection, a progress inspection must be obtained to keep an active permit.

CONSTRUCTION HOURS

Weekdays	7am to 7pm
Saturdays	8am to 5pm
Sundays & Holidays	**Not Permitted**

JOB NOTES:

Top out plumbing OK 3-19-15 G Ford

(PARK FEES WAIVED: No release of utilities until requirements of covenant have been satisfied).

Describe work in detail:

Plan BR Permit to construct 2 story - 2 bedroom 2 bath single family dwelling with great room, powder room, sitting area and 2 car garage. All per approved master plans.

(PARK FEES WAIVED: No release of utilities until requirements of covenant have been satisfied).

Special Conditions:

BUILDING PERMIT FEES BASED ON DEPOSIT SYSTEM. ADDITIONAL FEES MAY BE DUE PRIOR TO RELEASE OF UTILITIES AND FINAL INSPECTION.

DO NOT CONCEAL OR COVER ANY CONSTRUCTION UNTIL THE WORK IS INSPECTED

IMPORTANT

The issuance of this permit shall not be held to be an approval of the violation of any provisions of any city or county ordinance or state law.
Inspections of work are subject to an approved set of plans being on the job. Changes to plans are not to be made without permission of the Building and Safety Divisions.
The owner and/or contractor is responsible for establishing all property lines. All utilities must be underground.
This permit will expire if work is not started in 180 days or if more than 180 days elapses between inspections.
I certify that I am familiar with all requirements of the City of Palm Springs as they apply to this permit and understand that these requirements must be completed prior to final inspection and that no certification of occupancy will be issued until such time as these requirements are met. I certify that I have read this application and state that the information is true and correct.

Describe work in detail:

Plan B Permit to construct 2 story - 2 bedroom 2 bath single family dwelling with great room, powder room, sitting area and 2 car garage. All per approved master plans.

(PARK FEES WAIVED: No release of utilities until requirements of covenant have been satisfied).

Special Conditions:

Block walls, pool and spa to be on seperate permit.

BUILDING PERMIT FEES BASED ON DEPOSIT SYSTEM. ADDITIONAL FEES MAY BE DUE PRIOR TO RELEASE OF UTILITIES AND FINAL INSPECTION.

DO NOT CONCEAL OR COVER ANY CONSTRUCTION UNTIL THE WORK IS INSPECTED

IMPORTANT

The issuance of this permit shall not be held to be an approval of the violation of any provisions of any city or county ordinance or state law.
Inspections of work are subject to an approved set of plans being on the job. Changes to plans are not to be made without permission of the Building and Safety Divisions.
The owner and/or contractor is responsible for establishing all property lines. All utilities must be underground.
This permit will expire if work is not started in 180 days or if more than 180 days elapses between inspections.
I certify that I am familiar with all requirements of the City of Palm Springs as they apply to this permit and understand that these requirements must be completed prior to final inspection and that no certification of occupancy will be issued until such time as these requirements are met. I certify that I have read this application and state that the information is true and correct.

Describe work in detail:

Plan A Permit to construct 2 story - 2 bedroom 2 bath single family dwelling with great room, powder room and 2 car garage. All per approved master plans.

(PARK FEES WAIVED: No release of utilities until requirements of covenant have been satisfied).

Special Conditions:

Block walls, pool and spa on seperate permit.

BUILDING PERMIT FEES BASED ON DEPOSIT SYSTEM. ADDITIONAL FEES MAY BE DUE PRIOR TO RELEASE OF UTILITIES AND FINAL INSPECTION.

DO NOT CONCEAL OR COVER ANY CONSTRUCTION UNTIL THE WORK IS INSPECTED

IMPORTANT

The issuance of this permit shall not be held to be an approval of the violation of any provisions of any city or county ordinance or state law.
Inspections of work are subject to an approved set of plans being on the job. Changes to plans are not to be made without permission of the Building and Safety Divisions.
The owner and/or contractor is responsible for establishing all property lines. All utilities must be underground.
This permit will expire if work is not started in 180 days or if more than 180 days elapses between inspections.
I certify that I am familiar with all requirements of the City of Palm Springs as they apply to this permit and understand that these requirements must be completed prior to final inspection and that no certification of occupancy will be issued until such time as these requirements are met. I certify that I have read this application and state that the information is true and correct.

Describe work in detail:

Plan BR Permit to construct 2 story - 2 bedroom 2 bath single family dwelling with great room, powder room, sitting area and 2 car garage. All per approved master plans.

(PARK FEES WAIVED: No release of utilities until requirements of covenant have been satisfied).

Special Conditions:

Block walls, pool and spa to be on seperate permit.

BUILDING PERMIT FEES BASED ON DEPOSIT SYSTEM. ADDITIONAL FEES MAY BE DUE PRIOR TO RELEASE OF UTILITIES AND FINAL INSPECTION.

DO NOT CONCEAL OR COVER ANY CONSTRUCTION UNTIL THE WORK IS INSPECTED

IMPORTANT

The issuance of this permit shall not be held to be an approval of the violation of any provisions of any city or county ordinance or state law.
Inspections of work are subject to an approved set of plans being on the job. Changes to plans are not to be made without permission of the Building and Safety Divisions.
The owner and/or contractor is responsible for establishing all property lines. All utilities must be underground.
This permit will expire if work is not started in 180 days or if more than 180 days elapses between inspections.
I certify that I am familiar with all requirements of the City of Palm Springs as they apply to this permit and understand that these requirements must be completed prior to final inspection and that no certification of occupancy will be issued until such time as these requirements are met. I certify that I have read this application and state that the information is true and correct.

JOB NOTES:

CALL FOR THE FOLLOWING INSPECTIONS

GROUND PLUMBING

After the site is graded and forms in place, an elevation a location certification (Pad Cert) shall be submitted to the building inspector prior to requesting ground plumbing inspection

FOUNDATION

Before pouring concrete, once all reinforced steel, hardware, footings are dug and UFER ground is in place.

ROOF NAIL / OUTSIDE WRAP

After roof sheathing installed and nailed, doors, windows and all exterior penetrations flashed, shear panels installe and nailed prior to covering the building.

COMBINATION / ROUGH FRAME

After building is covered, roof loaded and weather tight a all rough electrical, mechanical/HVAC, plumbing and fir suppression system ready to test.

INSULATION

When installed and exterior walls and top plates sealed.

LATH & DRYWALL

When nailed and all metal trim in place, but before wallboard is taped.

FINAL

All other departments are signed off (i.e. Planning, Engineering, Fire and Health), all electrical, plumbing, HVAC completed. CO/smoke alarms installed, Title 24 energy requirements and energy compliance certificate completed.

Describe work in detail:

Plan BR Permit to construct 2 story - 2 bedroom 2 bath single family dwelling with great room, powder room, sitting area and 2 car garage. All per approved master plans.

(PARK FEES WAIVED: No release of utilities until requirements of covenant have been satisfied).

Special Conditions:

Block walls, pool and spa to be on seperate permit.

BUILDING PERMIT FEES BASED ON DEPOSIT SYSTEM. ADDITIONAL FEES MAY BE DUE PRIOR TO RELEASE OF UTILITIES AND FINAL INSPECTION.

DO NOT CONCEAL OR COVER ANY CONSTRUCTION UNTIL THE WORK IS INSPECTED

IMPORTANT

The issuance of this permit shall not be held to be an approval of the violation of any provisions of any city or county ordinance or state law.
Inspections of work are subject to an approved set of plans being on the job. Changes to plans are not to be made without permission of the Building and Safety Divisions.
The owner and/or contractor is responsible for establishing all property lines. All utilities must be underground.
This permit will expire if work is not started in 180 days or if more than 180 days elapses between inspections.
I certify that I am familiar with all requirements of the City of Palm Springs as they apply to this permit and understand that these requirements must be completed prior to final inspection and that no certification of occupancy will be issued until such time as these requirements are met. I certify that I have read this application and state that the information is true and correct.

Describe work in detail:

Plan AR Permit to construct 2 story - 2 bedroom 2 bath single family dwelling with great room, powder room and 2 car garage. All per approved master plans.

(PARK FEES WAIVED: No release of utilities until requirements of covenant have been satisfied).

Special Conditions:

BUILDING PERMIT FEES BASED ON DEPOSIT SYSTEM. ADDITIONAL FEES MAY BE DUE PRIOR TO RELEASE OF UTILITIES AND FINAL INSPECTION.

DO NOT CONCEAL OR COVER ANY CONSTRUCTION UNTIL THE WORK IS INSPECTED

IMPORTANT

The issuance of this permit shall not be held to be an approval of the violation of any provisions of any city or county ordinance or state law. Inspections of work are subject to an approved set of plans being on the job. Changes to plans are not to be made without permission of the Building and Safety Divisions.
The owner and/or contractor is responsible for establishing all property lines. All utilities must be underground.
This permit will expire if work is not started in 180 days or if more than 180 days elapses between inspections.
I certify that I am familiar with all requirements of the City of Palm Springs as they apply to this permit and understand that these requirements must be completed prior to final inspection and that no certification of occupancy will be issued until such time as these requirements are met. I certify that I have read this application and state that the information is true and correct.

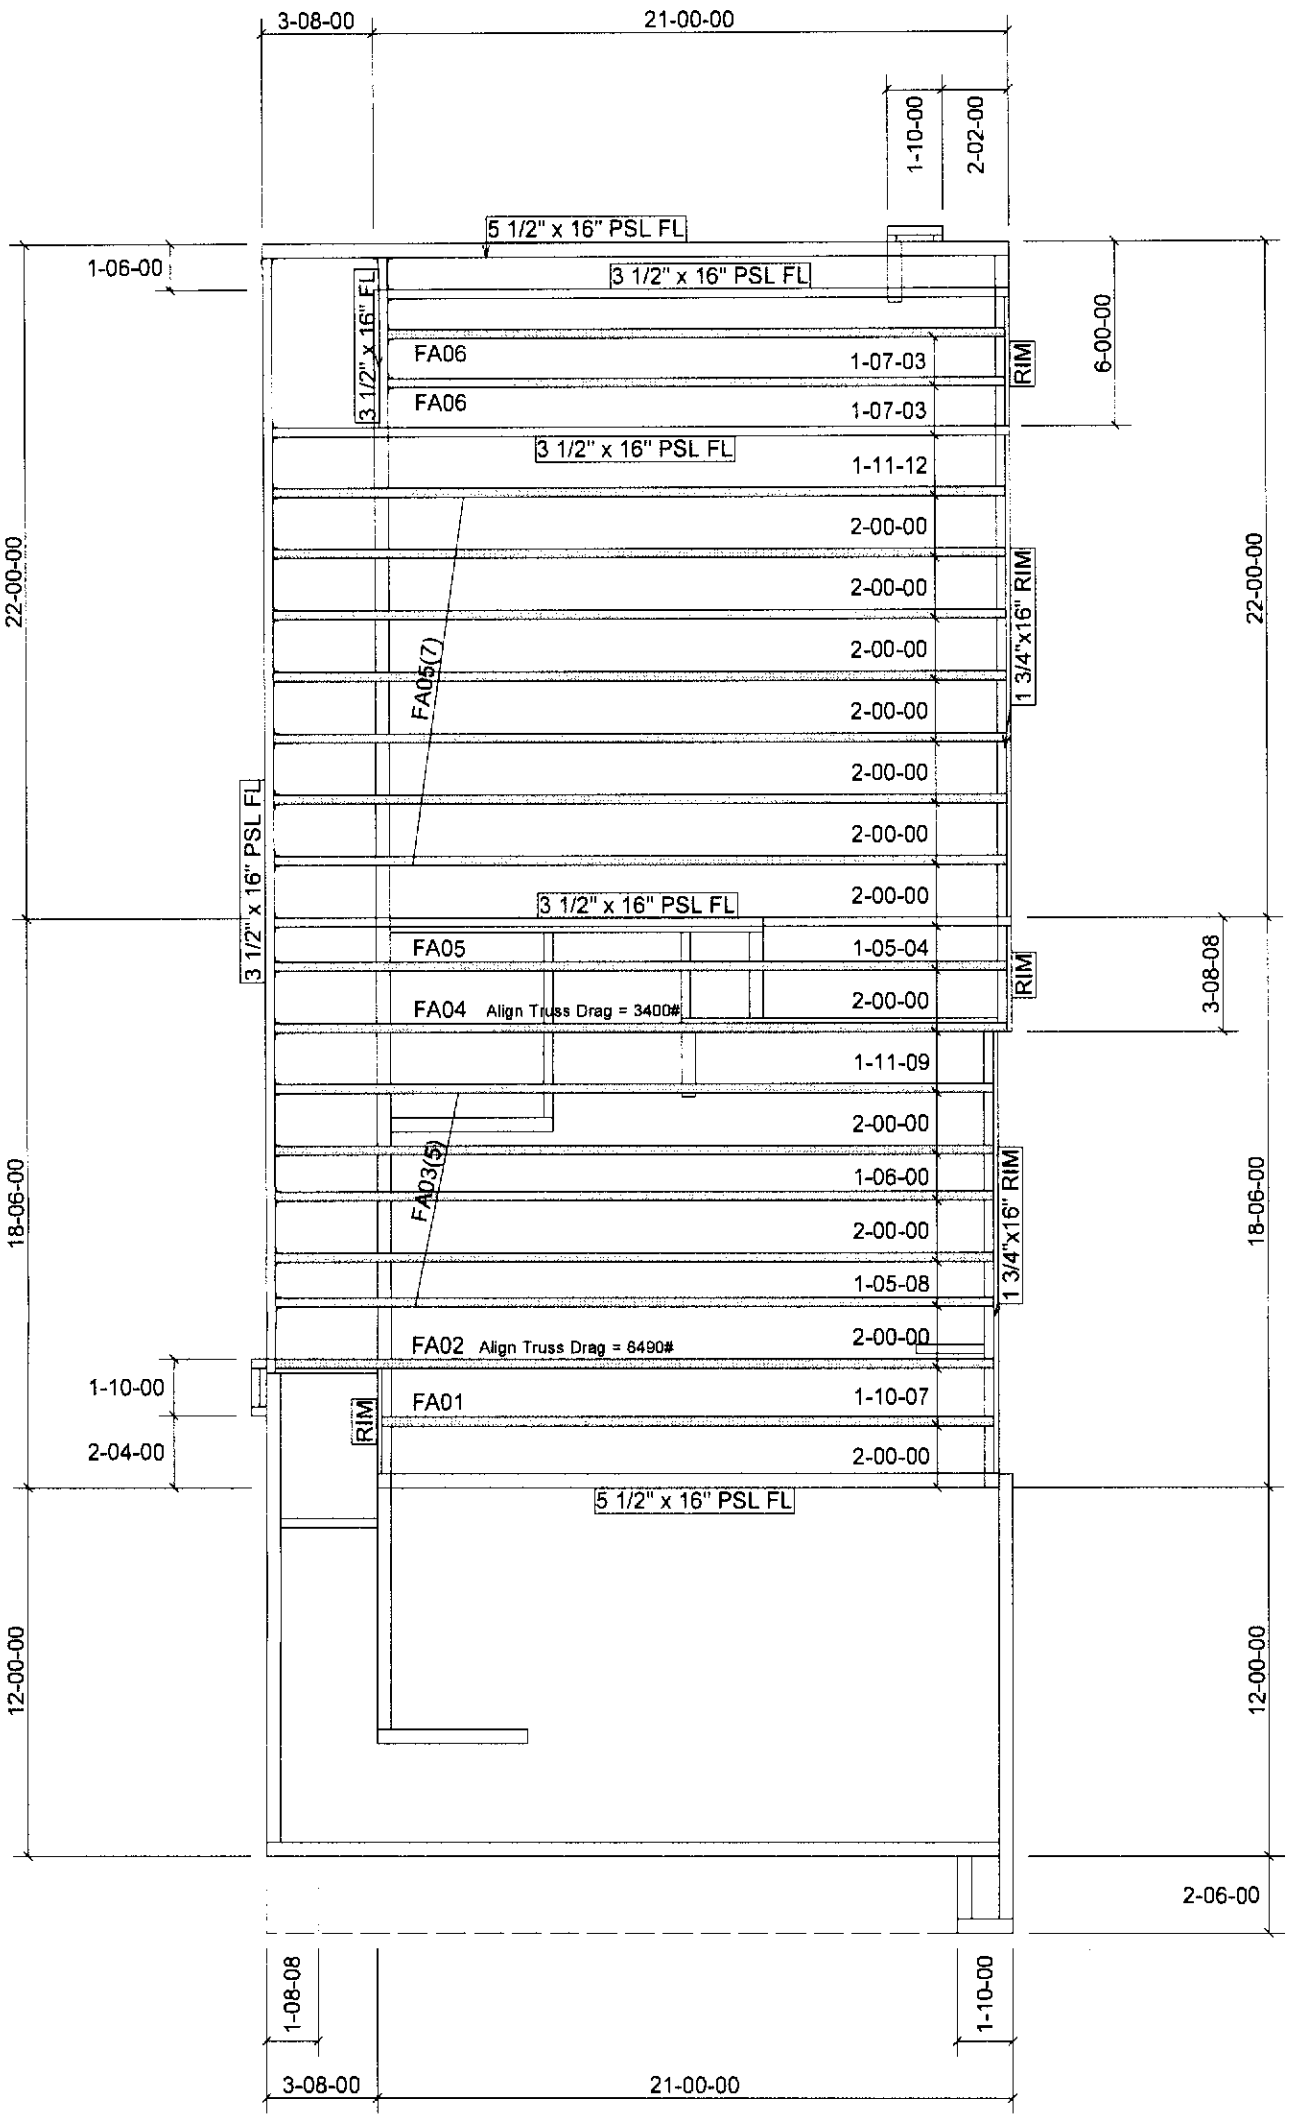
REVISIONS

PSI 2014-345

BMC

DAKOTA

10/02/2014



REVIEWED
REJECTED
REVISE AND RESUBMIT
AS CORRECTED

Corrections or comments made on the drawings during this review do not relieve the contractor from compliance with requirements of the drawings and specifications. The review is general and conformance with the design concept of the project and general compliance with the information given in the contract documents. The contractor is responsible for: confirming and correlating all quantities and dimensions; selecting fabrication processes and techniques of construction; coordinating his work with that of all other trades and performing his work in a safe and satisfactory manner.

This review shall not be construed to be:
1. That approval of any specific item shall not indicate approval of an assembly of which the item is a component.
2. That approval of any specific dimension or quantity.
3. That approval of any specific fabrication process or piece.

Note: All bracing shown is the responsibility of the erector. Additional temporary and permanent bracing of the system is the responsibility of the erector. For general erection bracing, refer to the latest edition of HIB-91 available from the Truss Plate Institute, 583 D'Onofrio Drive; Madison, WI 53719.

Truss Engineering is the responsibility of the truss manufacturer. Review of the general method of construction is only for the effect on the trusses designed by this engineer. Approval of the trusses including the layout.

Signature of this engineer on the shop drawings indicates that he has prepared or approved the Gouvis Engineering scope of work shown on these drawings and that he is the engineer of record for the trusses and only as noted on the shop drawings.

Re: Dakota_Floors

The truss drawing(s) referenced below have been prepared by MiTek Industries, Inc. under my direct supervision based on the parameters provided by BMC-Indio, CA.

Pages or sheets covered by this seal: R42958421 thru R42958442

My license renewal date for the state of California is December 31, 2015.

Lumber design values are in accordance with ANSI/TPI 1 section 6.3
These truss designs rely on lumber values established by others.

October 7,2014

Ong, Choo Soon

The seal on these drawings indicate acceptance of professional engineering responsibility solely for the truss components shown. The suitability and use of this component for any particular building is the responsibility of the building designer, per ANSI/TPI 1.

NOTES
1) A plate rating reduction of 20% has been applied for the green lumber members.
2) Recommend 2x6 strongbacks, on edge, spaced at 10-0-0 oc and fastened to each truss with 3-10d (0.131" X 3") nails. Strongbacks to be attached to walls at their outer ends or restrained by other means.

LOAD CASE(S) Standard

October 7,2014

⚠ WARNING - Verify design parameters and READ NOTES ON THIS AND INCLUDED MITEK REFERENCE PAGE MII-7473 rev. 1/25/2013 BEFORE USE
Design valid for use only with MiTek connectors. This design is based only upon parameters shown, and is for an individual building component. Applicability of design parameters and proper incorporation of component is responsibility of building designer - not truss designer. Bracing shown is for lateral support of individual web members only. Additional temporary bracing to insure stability during construction is the responsibility of the erector. Additional permanent bracing of the overall structure is the responsibility of the building designer. For general guidance regarding fabrication, quality control, storage, delivery, erection and bracing, consult **ANSI/TPI1 Quality Criteria, DSB-89 and BCSI Building Component Safety Information** available from Truss Plate Institute, 781 N. Lee Street, Suite 312, Alexandria, VA 22314.
If Southern Pine (SP) lumber is specified, the design values are those effective 06/01/2013 by ALSC.

NOTES
1) Unbalanced floor live loads have been considered for this design.
2) All plates are MT20 plates unless otherwise indicated.
3) A plate rating reduction of 20% has been applied for the green lumber members.
4) Provide mechanical connection (by others) of truss to bearing plate capable of withstanding 161 lb uplift at joint 13.
5) This truss has been designed for a total drag load of 6490 lb. Lumber DOL=(1.33) Plate grip DOL=(1.33) Connect truss to resist drag loads along bottom chord from 0-0-0 to 3-10-0 for 1693.2 plf.
6) Recommend 2x6 strongbacks, on edge, spaced at 10-0-0 oc and fastened to each truss with 3-10d (0.131" X 3") nails. Strongbacks to be attached to walls at their outer ends or restrained by other means.

WARNING - Verify design parameters and READ NOTES ON THIS AND INCLUDED MITEK REFERENCE PAGE MII-7473 rev. 1/25/2014 BEFORE USE
Design valid for use only with MiTek connectors. This design is based only upon parameters shown, and is for an individual building component. Applicability of design parameters and proper incorporation of component is responsibility of building designer - not truss designer. Bracing shown is for lateral support of individual web members only. Additional temporary bracing to insure stability during construction is the responsibility of the erector. Additional permanent bracing of the overall structure is the responsibility of the building designer. For general guidance regarding fabrication, quality control, storage, delivery, erection and bracing, consult ANSI/TPI1 Quality Criteria, DSB-89 and BCSI Building Component Safety Information available from Truss Plate Institute, 781 N. Lee Street, Suite 312, Alexandria, VA 22314.
If Southern Pine (SP) lumber is specified, the design values are those effective 06/01/2013 by ALSC

WARNING - Verify design parameters and READ NOTES ON THIS AND INCLUDED MITEK REFERENCE PAGE MII-7473 rev. 1/29/2014 BEFORE USE
Design valid for use only with MiTek connectors. This design is based only upon parameters shown, and is for an individual building component. Applicability of design parameters and proper incorporation of component is responsibility of building designer - not truss designer. Bracing shown is for lateral support of individual web members only. Additional temporary bracing to insure stability during construction is the responsibility of the erector. Additional permanent bracing of the overall structure is the responsibility of the building designer. For general guidance regarding fabrication, quality control, storage, delivery, erection and bracing, consult **ANSI/TPI1 Quality Criteria, DSB-89 and BCSI Building Component Safety Information** available from Truss Plate Institute, 781 N. Lee Street, Suite 312, Alexandria, VA 22314.
If Southern Pine (SP) lumber is specified, the design values are those effective 06/01/2013 by ALSC.

WARNING - Verify design parameters and READ NOTES ON THIS AND INCLUDED MITEK REFERENCE PAGE MII-7473 rev. 1/29/2014 BEFORE USE
Design valid for use only with MiTek connectors. This design is based only upon parameters shown, and is for an individual building component. Applicability of design parameters and proper incorporation of component is responsibility of building designer - not truss designer. Bracing shown is for lateral support of individual web members only. Additional temporary bracing to insure stability during construction is the responsibility of the erector. Additional permanent bracing of the overall structure is the responsibility of the building designer. For general guidance regarding fabrication, quality control, storage, delivery, erection and bracing, consult **ANSI/TPI1 Quality Criteria, DSB-89 and BCSI Building Component Safety Information** available from Truss Plate Institute, 781 N. Lee Street, Suite 312, Alexandria, VA 22314.
If Southern Pine (SP) lumber is specified, the design values are those effective 06/01/2013 by ALSC.

1) Unbalanced floor live loads have been considered for this design.
2) A plate rating reduction of 20% has been applied for the green lumber members.
3) Recommend 2x6 strongbacks, on edge, spaced at 10-0-0 oc and fastened to each truss with 3-10d (0.131" X 3") nails. Strongbacks to be attached to walls at their outer ends or restrained by other means.
4) CAUTION, Do not erect truss backwards.

LOAD CASE(S) Standard
1) Dead + Floor Live (balanced): Lumber Increase=1.00, Plate Increase=1.00
Uniform Loads (plf)
Vert: 14-24=-8, 1-2=-97, 2-13=-77
Concentrated Loads (lb)
Vert: 13=-1400 2=-1400

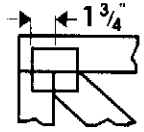
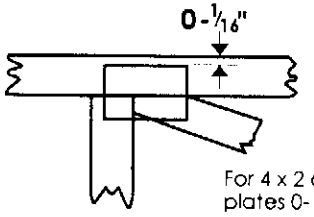
Symbols

PLATE LOCATION AND ORIENTATION



Center plate on joint unless x, y offsets are indicated. Dimensions are in ft-in-sixteenths. Apply plates to both sides of truss and fully embed teeth.



For 4 x 2 orientation, locate plates 0-1/16" from outside edge of truss.

This symbol indicates the required direction of slots in connector plates.

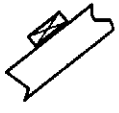
*** Plate location details available in MiTek 20/20 software or upon request.**

PLATE SIZE

4 x 4

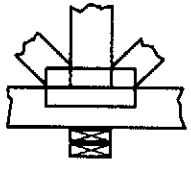
The first dimension is the plate width measured perpendicular to slots. Second dimension is the length parallel to slots.

LATERAL BRACING LOCATION



Indicated by symbol shown and/or by text in the bracing section of the output. Use T or I bracing if indicated.

BEARING

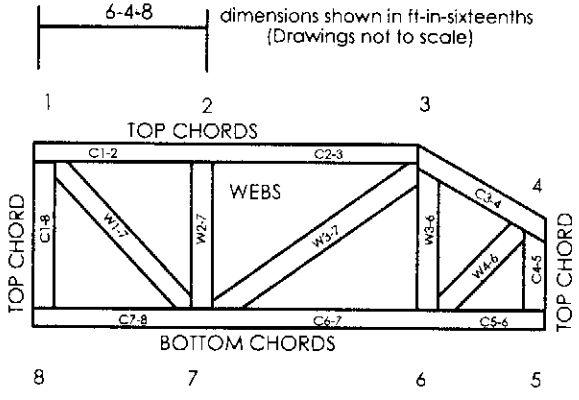


Indicates location where bearings (supports) occur. Icons vary but reaction section indicates joint number where bearings occur. Min size shown is for crushing only.

Industry Standards:

ANSI/TPI1: National Design Specification for Metol Plate Connected Wood Truss Construction.
DSB-89: Design Standard for Bracing.
BCSI: Building Component Safety Information, Guide to Good Practice for Handling, Installing & Bracing of Metal Plate Connected Wood Trusses.

Numbering System



JOINTS ARE GENERALLY NUMBERED/LETTERED CLOCKWISE AROUND THE TRUSS STARTING AT THE JOINT FARTHEST TO THE LEFT.

CHORDS AND WEBS ARE IDENTIFIED BY END JOINT NUMBERS/LETTERS.

PRODUCT CODE APPROVALS

ICC-ES Reports:

ESR-1311, ESR-1352, ESR1988
ER-3907, ESR-2362, ESR-1397, ESR-3282

Southern Pine lumber designations are as follows:

SYP represents values as published by AWC in the 2005/2012 NDS
SP represents ALSC approved/new values with effective date of June 1, 2013

MiTek®

⚠ General Safety Notes

Failure to Follow Could Cause Property Damage or Personal Injury

1. Additional stability bracing for truss system, e.g. diagonal or X-bracing, is always required. See BCSI.
2. Truss bracing must be designed by an engineer. For wide truss spacing, individual lateral braces themselves may require bracing, or alternative Tor I bracing should be considered.
3. Never exceed the design loading shown and never stack materials on inadequately braced trusses.
4. Provide copies of this truss design to the building designer, erection supervisor, property owner and all other interested parties.
5. Cut members to bear tightly against each other.
6. Place plates on each face of truss at each joint and embed fully. Knots and wane at joint locations are regulated by ANSI/TPI 1.
7. Design assumes trusses will be suitably protected from the environment in accord with ANSI/TPI 1.
8. Unless otherwise noted, moisture content of lumber shall not exceed 19% at time of fabrication.
9. Unless expressly noted, this design is not applicable for use with fire retardant, preservative treated, or green lumber.
10. Camber is a non-structural consideration and is the responsibility of truss fabricator. General practice is to camber for dead load deflection.
11. Plate type, size, orientation and location dimensions indicated are minimum plating requirements.
12. Lumber used shall be of the species and size, and in all respects, equal to or better than that specified.
13. Top chords must be sheathed or purlins provided at spacing indicated on design.
14. Bottom chords require lateral bracing at 10 ft. spacing, or less, if no ceiling is installed, unless otherwise noted.
15. Connections not shown are the responsibility of others.
16. Do not cut or alter truss member or plate without prior approval of an engineer.
17. Install and load vertically unless indicated otherwise.
18. Use of green or treated lumber may pose unacceptable environmental, health or performance risks. Consult with project engineer before use.
19. Review all portions of this design (front, back, words and pictures) before use. Reviewing pictures alone is not sufficient.
20. Design assumes manufacture in accordance with ANSI/TPI 1 Quality Criteria.

TIMBER PRODUCTS INSPECTION

September 11, 2012

To Whom It May Concern:

This is to verify that BMC of Indio, CA is a Subscriber in the Timber Products Inspection (TP) and General Testing and Inspection (GTI) Truss Quality Auditing Program. The TP and GTI Truss Quality Auditing Programs are recognized by the International Accreditation Service (IAS) with the assigned number of AA-664.

TP and the GTI quality assurance marks have been recognized in the West by the truss industry and code jurisdictions since 1969. TP currently audits truss manufacturing facilities nationwide.

TP is conducting unannounced, third party audits at BMC of Indio, CA. This facility is currently in good standing in the TP Truss Quality Auditing Program. BMC's personnel are authorized to apply the GTI quality mark to trusses that are manufactured in accordance with the latest revision of the ANSI/TPI Standards. All stamping takes place at the truss manufacturing facility, under supervision of qualified plant personnel.

If you have questions regarding the status of any plant in the TP/GTI Program, please contact me on my cell 208.818.7869.

Sincerely,

TIMBER PRODUCTS INSPECTION

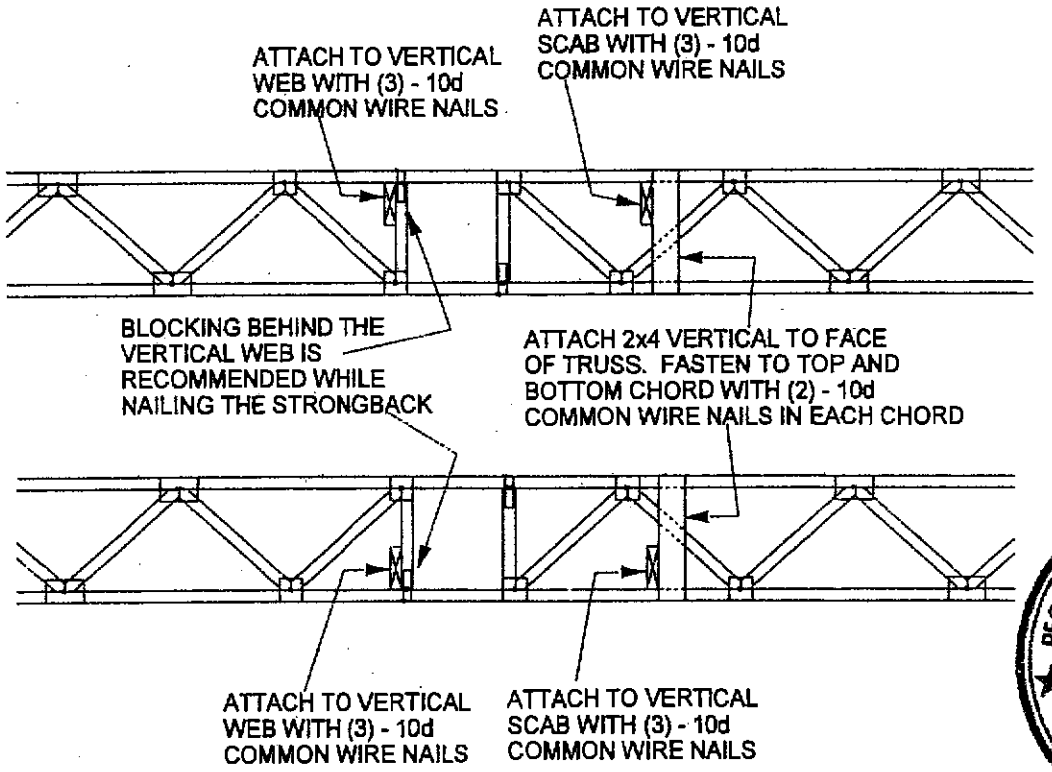
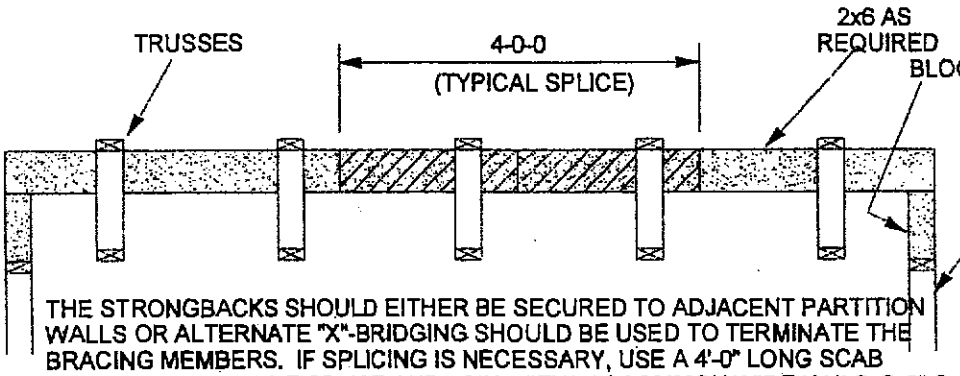
FLOOR TRUSS LATERAL BRACING RECOMMENDATIONS	MII/SAC - 17	4/4/2004	PAGE 1

MiTek Industries, Inc.
Western Division

TO MINIMIZE VIBRATION COMMON TO ALL SHALLOW FRAMING SYSTEMS, 2x6 "STRONGBACK" LATERAL SUPPORTS SHOULD BE LOCATED EVERY 8 TO 10 FEET ALONG A FLOOR TRUSS.

✳ STRONGBACK MAY BE POSITIONED DIRECTLY UNDER THE TOP CHORD OR DIRECTLY ABOVE THE BOTTOM CHORD. SECURELY FASTEN TO THE TRUSS USING ANY OF THE METHODS ILLUSTRATED BELOW.





APR 09 2013

THE STRONGBACKS SHOULD EITHER BE SECURED TO ADJACENT PARTITION WALLS OR ALTERNATE "X"-BRIDGING SHOULD BE USED TO TERMINATE THE BRACING MEMBERS. IF SPLICING IS NECESSARY, USE A 4'-0" LONG SCAB CENTERED OVER THE SPLICE AND JOIN WITH/10d COMMON WIRE NAILS @ 6" O.C. 2 ROWS.

ALTERNATE METHOD OF SPLICING:
OVERLAP STRONGBACK MEMBERS A MINIMUM OF 4'-0" AND FASTEN WITH (12) - 10d COMMON WIRE NAILS @ 6" O.C. 2 ROWS.
(TO BE USED ONLY WHEN STRONGBACK IS NOT ALIGNED WITH A VERTICAL)

✳ STRONGBACK BRACING ALSO SATISFIES THE LATERAL BRACING REQUIREMENTS FOR THE BOTTOM CHORD OF THE TRUSS.

⚠ *WARNING - Verify design parameters and READ NOTES ON THIS AND INCLUDED MITEK REFERENCE PAGE MII-7473 BEFORE USE.*

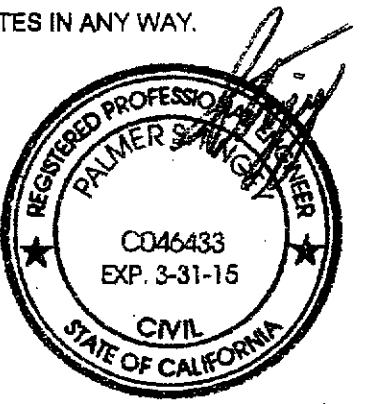
REFER TO INDIVIDUAL TRUSS DESIGN FOR PLATE SIZES AND LUMBER GRADES

APPLY 2X4X42" SPF NO.2 (OR BETTER) SCAB TO ONE FACE OF TRUSS WITH 1 ROW OF 10d (3" X 0.131") NAILS SPACED 3" O.C.

1. THIS IS A SPECIFIC REPAIR DETAIL TO BE USED ONLY FOR ITS ORIGINAL INTENTION. THIS REPAIR DOES NOT IMPLY THAT THE REMAINING PORTION OF THE TRUSS IS UNDAMAGED. THE ENTIRE TRUSS SHALL BE INSPECTED TO VERIFY THAT NO FURTHER REPAIRS ARE REQUIRED. WHEN THE REQUIRED REPAIRS ARE PROPERLY APPLIED, THE TRUSS WILL BE CAPABLE OF SUPPORTING THE LOADS INDICATED.
2. ALL MEMBERS MUST BE RETURNED TO THEIR ORIGINAL POSITIONS BEFORE APPLYING REPAIR AND HELD IN PLACE DURING APPLICATION OF REPAIR.
3. THE END DISTANCE, EDGE DISTANCE, AND SPACING OF NAILS SHALL BE SUCH AS TO AVOID SPLITTING OF THE WOOD.
4. LUMBER MUST BE CUT CLEANLY AND ACCURATELY AND THE REMAINING WOOD MUST BE UNDAMAGED.
5. **THIS REPAIR IS TO BE USED FOR SINGLE PLY TRUSSES WITH 40-10-0-5 LOADING IN THE 3X_ OR 4X_ ORIENTATION ONLY.**
6. CUTTING IS PERMITTED WITHIN 1/2" OF CONNECTOR PLATES, AND MUST NOT AFFECT PLATES IN ANY WAY.



APR 0 9 2013

⚠ WARNING - Verify design parameters and READ NOTES ON THIS AND INCLUDED MITEK REFERENCE PAGE MII-7473 BEFORE USE.
Design valid for use only with MiTek connectors. This design is based only upon parameters shown, and is for an individual building component. Applicability of design parameters and proper incorporation of component is responsibility of building designer - not truss designer. Bracing shown is for lateral support of individual web members only. Additional temporary bracing to insure stability during construction is the responsibility of the erector. Additional permanent bracing of the overall structure is the responsibility of the building designer. For general guidance regarding fabrication, quality control, storage, delivery, erection and bracing, consult ANSI/TPI1 Quality Criteria, DSB-89 and BCSI1 Building Component Safety Information available from Truss Plate Institute, 583 D'Onofrio Drive, Madison, WI 53719.

2.0 PURPOSE OF THIS SUPPLEMENT

This supplement is issued to indicate that the MiTek® truss connector plates M-16, MII 16, M-20, MII 20, M-20 HS, MII 20 HS, and MT20HS™, described in master report ESR-1311, comply with CBC Chapters 16, 16A, 17, 17A, and 23, when design and installation are in accordance with the *International Building Code®* provisions described in the master evaluation report and with Chapters 16, 16A, 17, 17A, and 23 of the CBC.

This supplement expires concurrently with the master evaluation report reissued June 1, 2011.

ICC-ES Evaluation Reports are not to be construed as representing aesthetics or any other attributes not specifically addressed, nor are they to be construed as an endorsement of the subject of the report or a recommendation for its use. 2.0 USES

MiTek® metal truss connector plates are used as joint connector components of light wood frame trusses.

3.0 DESCRIPTION

3.1 MiTek® M-16 and MII 16:

Model M-16 and Model MII 16 metal truss connector plates are manufactured from minimum No. 16 gage [0.0575 inch total thickness (1.46 mm)], ASTM A 653 SS, Grade 40 steel, with a G60 galvanization coating [0.0005 inch thickness on each side (0.013 mm)] and having a base-metal thickness of 0.0565 inch (1.44 mm). Slots 0.54 inch (13.7 mm) in length are punched along the perpendicular axis of the plates. The metal displaced by the slot is lanced and formed into two opposing teeth, protruding at right angles from the flat plate. Each tooth is diagonally cut, thereby forming a sharp point. The teeth are additionally shaped into a twisted concave form, facing the slot cutout area. Teeth are 0.16 inch (4.1 mm) wide and 0.37 inch (9.4 mm) long, and there are 4.8 teeth per square inch (0.0074 teeth per square millimeter) of plate area. Plates are available in 1-inch (25.4 mm) width increments, up to 12 inches (305 mm), and lengthwise in 1 1/4-inch (31.7 mm) multiples. See Figure 1 of this report for details.

3.2 MiTek® M-20 and MII 20:

Model M-20 and Model MII 20 metal truss connector plates are manufactured from minimum No. 20 gage [0.0356 inch total thickness (0.9 mm)], ASTM A 653 SS, Grade 40 steel, with a G60 galvanization coating [0.0005 inch thickness on each side (0.013 mm)] and having a base-metal thickness of 0.0346 inch (0.88 mm). The plates have repeating 1-inch-square (25 mm) modules of teeth stamped out and formed at right angles to the face of the parent metal. Each module has four slots, 0.45 inch (11.4 mm) long and 0.125 inch (3.2 mm) wide, fabricated by punching two teeth out of each slot and resulting in each module having eight teeth. The transverse centerlines of adjacent slots are staggered 0.15 inch (3.8 mm) in a longitudinal direction. Longitudinal centerlines of slots are spaced 0.25 inch (6.4 mm). Each slot has a 0.33-inch-long (8.4 mm) tooth at each end. Each tooth is formed with a symmetrical V-shaped cross section at its base, and twists approximately 22 degrees to its point. See Figure 1 of this report for details.

3.3 MiTek® M-20 HS, MII 20 HS, and MT20HS™:

Models M-20 HS, MII 20 HS, and MT20HS™ metal truss connector plates are manufactured from minimum No. 20 gage [0.0356 inch total thickness (0.9 mm)], ASTM A 653 Grade 80, high-strength, low-alloy steel with improved formability (HSLAS-F), with a G60 galvanization coating [0.0005 inch thickness on each side (0.013 mm)] and having a base-metal thickness of 0.0346 inch (0.88 mm). Repeating 3/4-inch-by-1-inch (19 mm by 25.4 mm) modules of teeth are stamped out and formed at right angles to the face of the parent metal. Each module has three slots, 0.45 inch (11.4 mm) long and 0.125 inch (3.2 mm) wide, fabricated by punching two teeth out of each slot area, and resulting in each module having six teeth. Each module is separated by a 0.25-inch-wide (6.4 mm) strip of unpunched steel. The transverse centerlines of adjacent slots are staggered 0.15 inch (3.8 mm) in the longitudinal direction. Longitudinal centerlines of slots are spaced 0.25 inch (6.4 mm). Each slot has a 0.33-inch-long (8.4 mm) tooth at each end. Each tooth is additionally shaped, twisting an approximate 22 degrees to its point. See Figure 1 of this report for details.

4.0 DESIGN AND INSTALLATION

4.1 General:

All truss plates are pressed into the wood for the full depth of their teeth by hydraulic-platen embedment presses, multiple roller presses that use partial embedment followed by full-embedment rollers, or combinations of partial embedment roller presses and hydraulic-platen presses

*Revised November 2011

ICC-ES Evaluation Reports are not to be construed as representing aesthetics or any other attributes not specifically addressed, nor are they to be construed as an endorsement of the subject of the report or a recommendation for its use. that feed trusses into a stationary finish roller press. Trusses must be assembled within the tolerances specified in ANSI/TPI 1, Chapter 3, Quality Criteria for the Manufacture of Metal-Plate-Connected Wood Trusses.

4.2 Allowable Design Values:

Allowable design values for MiTek® metal truss connector plates to be used in the design of metal plate connected wood roof and floor trusses are shown in Tables 1 and 2 of this report. Allowable design values are applicable when the connection is made with identical plates on opposite sides of the joint. This evaluation report is limited to the evaluation of connection capacity of the MiTek® metal truss connector plates listed in this report. The design, manufacture, and installation of trusses employing the truss plates have not been evaluated.

Allowable values shown in Table 1 have not been adjusted for metal connector plates embedded in fire-retardant-treated or preservative-treated lumber. Proper adjustments must be made in accordance with the requirements indicated in a current ICC-ES evaluation report issued to the chemical treatment manufacturer. If the evaluation report does not contain information on the adjustments, the chemical manufacturer must be contacted for this information. Compliance with Section 2304.9.5 of the IBC and Section R317.3 of the IRC (Section R319.3 of the 2006 IRC) is also required.

5.0 CONDITIONS OF USE

The MiTek® industries metal truss connector plates described in this report comply with, or are suitable alternatives to what is specified in, those codes listed in Section 1.0 of this report, subject to the following conditions:

5.1 This evaluation report and the manufacturer's published installation instructions, when required by the code official, must be submitted at the time of permit application. In the event of a conflict between the manufacturer's published installation instructions and this document, the instructions in this document govern.

5.2 Each application for a building permit, using these metal truss connector plates, must be accompanied by documentation showing that the design, manufacture, and proposed installation conforms with the requirements of the applicable code.

5.3 This report establishes plate design values only. For items not covered by this report, such as truss design, fabrication, quality assurance and special inspection, refer to the applicable version of ANSI/TPI 1, engineering drawings and the applicable code.

5.4 The design values (allowable lateral resistance values and effective tension and shear resistance allowable design values) used in the design of trusses, using MiTek® industries metal truss connector plates, must not exceed those listed in Tables 1 and 2 of this report. Load combination reductions must be in accordance with the applicable code.

5.5 All lumber used in the fabrication of trusses using MiTek® industries metal truss connector plates must be graded in compliance with the applicable building code and must have a moisture content not exceeding 19 percent at the time of assembly. Wet service factors from ANSI/TPI 1 Section 6.4 must be applied to the table values when the lumber moisture content exceeds 19 percent. Allowable values shown in the tables of this report are not applicable to metal connector plates embedded in either fire-retardant-treated lumber or preservative-treated lumber.

5.6 Metal truss connector plates must be installed in pairs, on opposite faces of truss members.

5.7 Galvanized G60 metal truss plate connectors subject to corrosive environments must be protected in accordance with Section 6.5 of ANSI/TPI 1.

5.8 MiTek® metal truss connector plates are manufactured in Saint Charles, Missouri; Phoenix, Arizona; Tampa, Florida; Edenton, North Carolina; and Bradford, Ontario, Canada.

6.0 EVIDENCE SUBMITTED

6.1 Data in accordance with the National Design Standard for Metal Plate Connected Wood Truss Construction, ANSI/TPI 1.

6.2 Manufacturer's descriptive literature.

6.3 A quality control manual.

7.0 IDENTIFICATION

The MiTek® connectors are identified by an imprint of the plate name embossed into the surface of the plate (for example, the M-16 plate is embossed "M-16"). Additionally, boxes containing the connector plates must be labeled with the MiTek® industries name, the metal connector plate model, and the evaluation report number (ESR-1311).

TABLE 1—ALLOWABLE LATERAL RESISTANCE VALUES, HYDRAULIC-PLATEN EMBEDMENT[3] (lb/in²/PLATE)

LUMBER SPECIES	SG	AA	EA	AE	EE
M–16 AND MII 16					
Douglas fir–larch	0.5	178	121	137	126
Hem-fir	0.43	119	84	102	98
Spruce-pine-fir	0.42	127	82	75	107
Southern pine	0.55	174	128	147	122
M–20 and MII 20					
Douglas fir–larch	0.5	220	195	180	190
Hem-fir	0.43	185	148	129	145
Spruce-pine-fir	0.42	197	144	143	137
Southern pine	0.55	249	190	184	200
M–20 HS, MII 20 HS and MT20HS					
Douglas fir–larch	0.5	185	146	135	143
Hem-fir	0.43	139	111	97	109
Spruce-pine-fir	0.42	148	108	107	103
Southern pine	0.55	187	143	138	150

For SI: 1lb/in² = 6.9 kPa.

NOTES:
[1]Tooth holding units = psi for a single plate (double for plates on both faces when applying to area on only one face). To achieve values, plates must be installed on opposite sides of joint.
[2]AA = Plate parallel to load, wood grain parallel to load
EA = Plate perpendicular to load, wood grain parallel to load
AE = Plate parallel to load, wood grain perpendicular to load
EE = Plate perpendicular to load, wood grain perpendicular to load
[3]All truss plates are pressed into the wood for the full depth of their teeth by hydraulic-platen embedment presses, multiple roller presses that use partial embedment followed by full-embedment rollers, or combinations of partial embedment roller presses and hydraulic-platen presses that feed trusses into a stationary finish roller press.

TABLE 2—EFFECTIVE TENSION AND SHEAR RESISTANCE ALLOWABLE DESIGN VALUES

PROPERTY FORCE DIRECTION	M–16 AND MII 16		M–20 AND MII 20		M–20 HS, MII 20HS AND MT20HS	
	Efficiency	Pounds/inch/Pair of Connector Plates	Efficiency	Pounds/inch/Pair of Connector Plates	Efficiency	Pounds/inch/Pair of Connector Plates
Tension Values in Accordance with Section 5.4.4.2 of TPI-1 (Minimum Net Section over the Joint)[1]						
Tension @ 0°	0.70	2012	0.50	880	0.59	1505
Tension @ 90°	0.36	1013	0.47	820	0.48	1219
Tension Values in Accordance with TPI-1 with a Deviation [see Section 5.4.9 (e)] Maximum Net Section Occurs over the Joint[2]						
Tension @ 0°	0.68	1945	0.62	1091	0.67	1716
Tension @ 90°	0.30	849	0.48	841	0.52	1321
Shear Values						
Shear @ 0°	0.54	1041	0.49	674	0.43	761
Shear @ 30°	0.61	1173	0.63	738	0.61	1085
Shear @ 60°	0.73	1402	0.79	936	0.67	1184
Shear @ 90°	0.55	1055	0.55	645	0.45	792
Shear @ 120°	0.48	914	0.42	490	0.34	608
Shear @ 150°	0.35	672	0.46	544	0.3	537

For SI: 1 lb/inch = 0.175 N/mm, 1inch = 25.4 mm.

NOTES:
[1]Minimum Net Section – A line through the plate's tooth pattern with the minimum amount of steel for a specified orientation. For these plates, this line passes through a line of holes.
[2]Maximum Net Section – A line through the plate's tooth pattern with the maximum amount of steel for a specified orientation. For these plates, this line passes through a section of the plate with no holes.

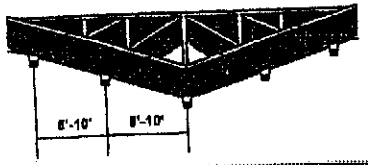
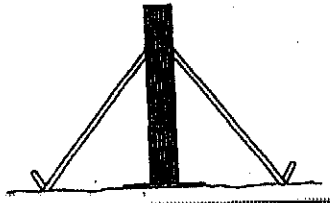
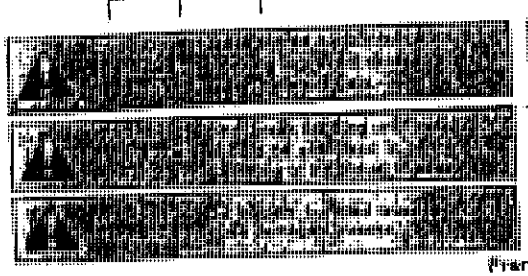
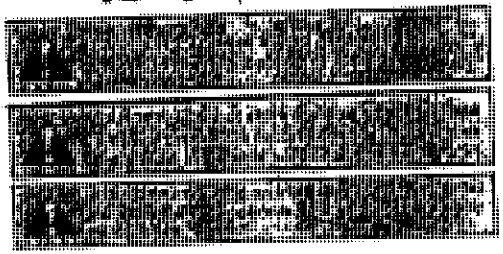
TRUSS STORAGE

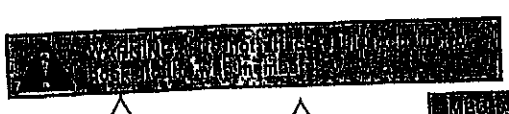


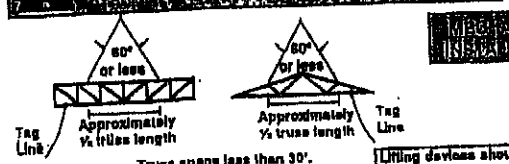




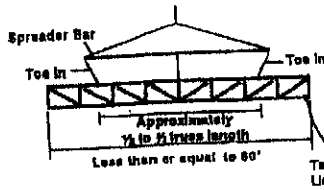


Frame 1





Truss spans less than 30'.



Lifting devices should be connected to the truss top chord with a closed-loop attachment utilizing materials such as slings, chains, cables, nylon strapping, etc. of sufficient strength to carry the weight of the truss. Each truss should be set in proper position per the building designer's framing plan and held with the lifting device until the ends of the truss are securely fastened and temporary bracing is installed.

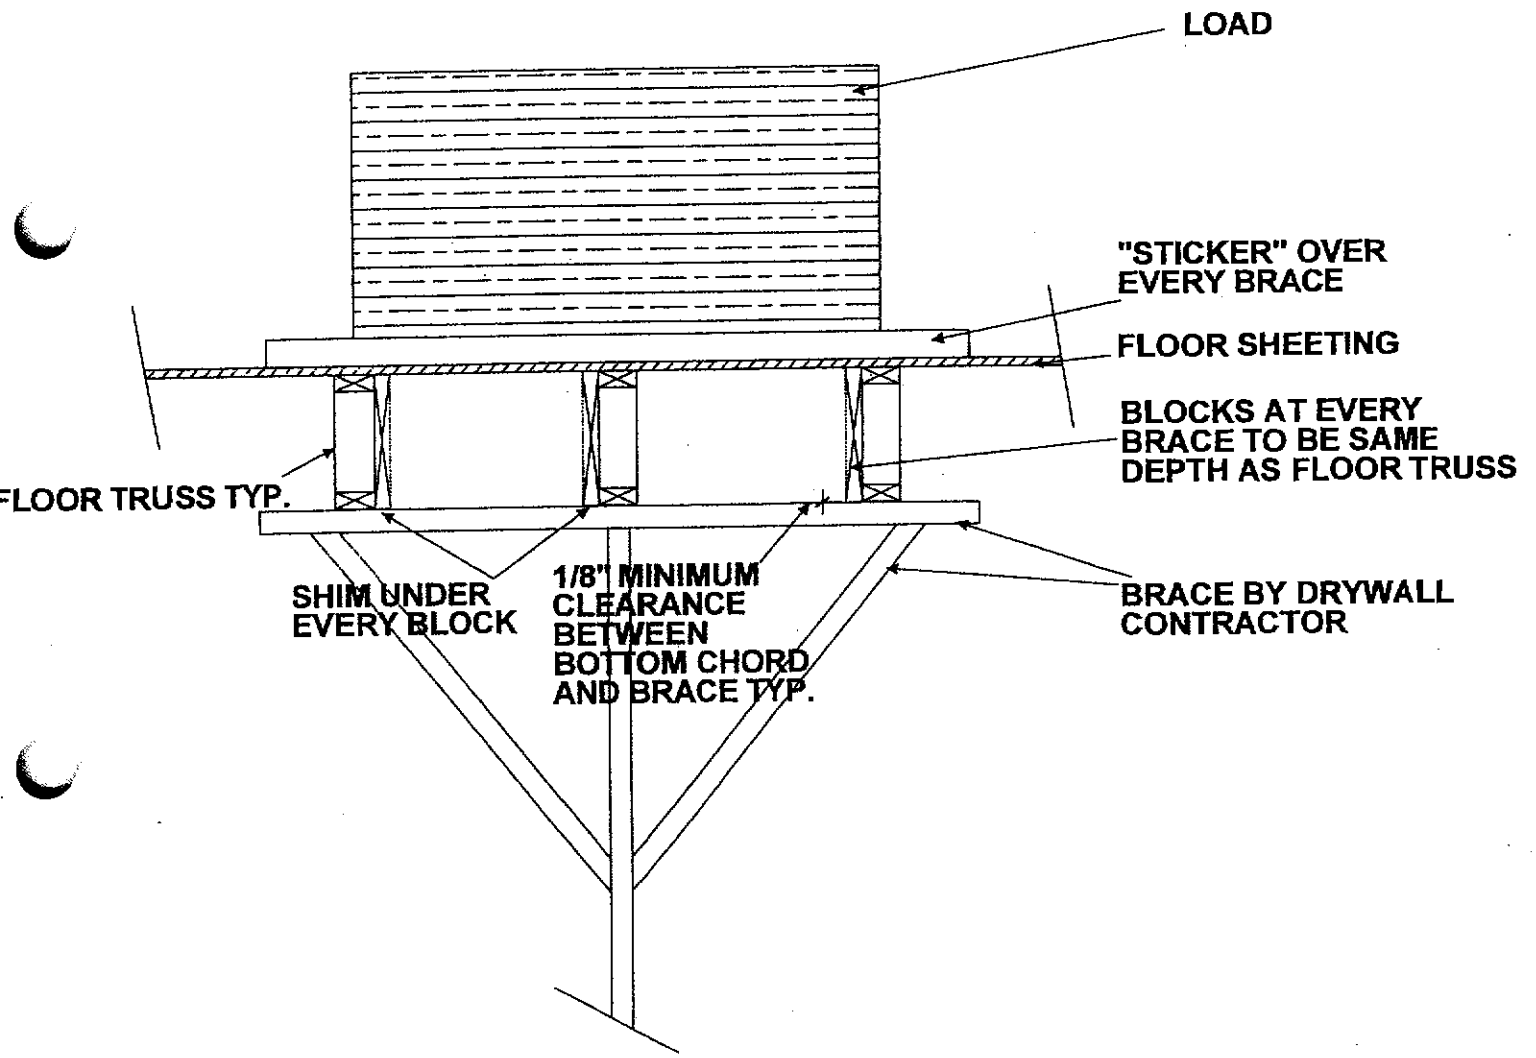
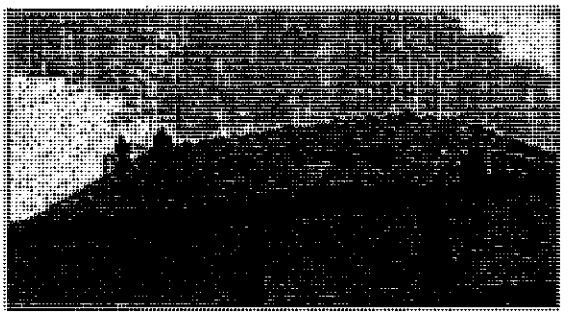
HOME BUILDING COMPONENTS

FLOOR TRUSS DRYWALL BRACING DETAIL



CREATED 07/11/05

BCSI-B4 Construction Loading
Cargas de Construcción



Construction loads are those loads imposed on the unfinished building as a result of the construction process. Typical construction loads include the weight of the workers, equipment, and building materials, to name a few. For example, a bundle of plywood sheathing or gypsum board stacked on trusses temporarily creates construction loads.

Cargas de construcción son las cargas que están impuestas a los edificios incompletos como resultado del proceso de construcción. Cargas de construcción típicas incluyen el peso de los trabajadores, el equipo y los materiales de construcción, etcétera. Por ejemplo, un paquete de entablado contrachapado o tabla de yeso apilados temporalmente sobre los trusses crean cargas de construcción.

☑ Make sure that the truss assembly is properly restrained and braced according to the guidelines in **BCSI-B1**™ and **BCSI-B2**™ before placing any construction loads on them. Construction loads shall only be placed on fully restrained and braced structures.

*Asegúrese que el montaje del truss está adecuadamente restringido y arriostrado según las pautas en **BCSI-B1**™ y **BCSI-B2**™ antes de colocar alguna carga de construcción en la estructura. Solamente coloquen cargas de construcción arriba de estructuras cuales son restringidos y arriostrados completamente.*

⚠ **WARNING!** Stacking excessive amounts of construction materials on floor or roof trusses is an unsafe practice. Property damage, personal injury and/or death are possible if this warning is not heeded.

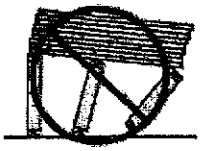
¡ADVERTENCIA! Apilando cantidades excesivas de cargas de construcción sobre trusses de piso u techo es una práctica peligrosa. Daño a la propiedad, herida personal y/o muerte son posibles si no sigue esta advertencia.

NOTICE Trusses that have been over-stressed due to excessive construction loading will usually show excessive sagging (deflection) and at least a portion of this deflection will remain even after the load has been removed. In more severe cases, broken truss members and/or failed truss joints may result.

Los trusses que han sidos demasiado estresados debido a cargas de construcción excesivas usualmente demuestran una desviación excesiva, y por lo menos una parte de este desviación se quedarán aún después de que la carga se haya quitada. En casos más severos, miembros quebrados del truss y/o junturas falladas pueden resultar.

CONSTRUCTION LOADING DO'S AND DON'TS
QUE HACER Y NO HACER CON LAS CARGAS DE CONSTRUCCIÓN

⊘ **DON'T** stack materials on unbraced trusses.
NO amontone materiales sobre trusses que no esten arriostrados.

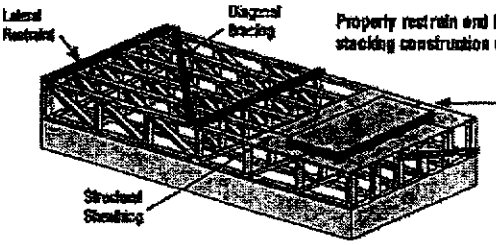


⊘ **DON'T** overload the trusses.
NO sobrecargue los trusses.

⊘ **DON'T** exceed stack heights listed in the table.
NO exceda la altura de montón indicada en la tabla que sigue.

Maximum Stack Height for Material on Trusses *Maxima Altura de Montón para Material encima de los Trusses*	
Material – *Material*	Height – Altura
Gypsum Board – *Tabla de Yeso*	12" – *12 pulgadas*
Plywood or OSB – *Madera Contrachapada u OSB*	16" – *16 pulgadas*
Asphalt Shingles – *Teja de Asfalto*	2 bundles – *2 paquetes*
Concrete Block – *Bloque de Hormingón*	8" – *8 pulgadas*
Clay Tile – *Teja de Arcilla*	3-4 tiles – *3-4 azulejos*

Note: Limit stacking periods to approximately one week, unless alternative information is provided by the Building Designer, Truss Designer or Truss Manufacturer.



Properly restrain and brace trusses before stacking construction materials on them.

#BCSIConstLoad 090520

BCSI-B4 SUMMARY SHEET **RESUMEN BCSI-B4**

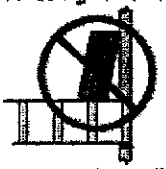
CONSTRUCTION LOADING

☑ **DO** distribute loads over as many trusses as possible. Position stacks of materials flat with the longest dimension perpendicular to the trusses, as shown.

SÍ distribuye cargas sobre el mayor numero de trusses que sea posible. Posicione perpendicular a los trusses los montones de materiales llanas con la dimensión más larga como se indica el dibujo.

⊘ **DON'T** allow the stack to lean against walls, or stack materials so they overload single or small groups of trusses.

NO permite que el montón se incline contra ninguna pared, o aplle materiales para sobrecarguen uno u grupos pequeños de trusses.



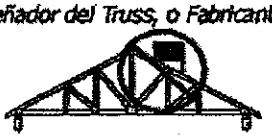
☑ **DO** stack materials along exterior supports or directly over interior supports of properly restrained and braced structures.

SÍ amontone materiales al lado de los soportes exteriores o directamente sobre los soportes interiores de estructuras que están restringidos y arriostradas apropiadamente.

Note: Truss bracing not shown for clarity.

⊘ **DON'T** overstack trusses with materials midway between supports. Never exceed stack heights provided in the table (see page 1) unless alternative information is provided by the Building Designer, Truss Designer or Truss Manufacturer.

NO sobrecargue los trusses con materiales a mitad de los soportes. Nunca sobrepase las alturas de montón indicada en la tabla en la página anterior aunque información alternativa está provista por el Diseñador del Edificio, Diseñador del Truss, o Fabricante del Truss.

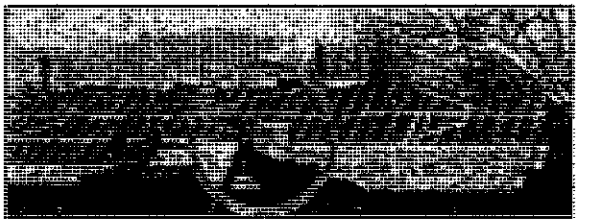


⊘ **DON'T** drop loads on trusses. The impact can damage the trusses even if the load is small.

NO deje caer cargas arriba de los trusses. El impacto puedo dañar los trusses aunque si sea pequeña la carga.

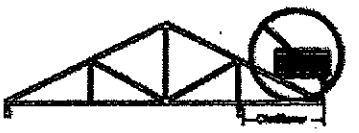
☑ **DO** leave construction materials on lifting equipment until installation, if possible.

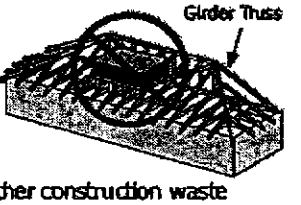
SÍ deje materiales de construcción arriba del equipo de levantar hasta la instalación, si es posible.



⊘ **DON'T** stack materials at locations that will produce instability, such as on cantilevers or near truss-to-girder connections.

NO amontone materiales en un lugar que puede producir inestabilidad como en voladiza o cerca de las conecciones de trusses-a-travesaño.





⊘ **DON'T** pile cut-off tile and/or other construction waste on trusses.

NO aplle tile de sobra y/o otros residuos de construcción sobre los trusses.

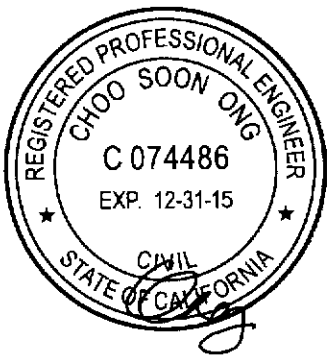
Re: Dakota_Roof

The truss drawing(s) referenced below have been prepared by MiTek Industries, Inc. under my direct supervision based on the parameters provided by BMC-Indio, CA.

Pages or sheets covered by this seal: R42958444 thru R42958479

My license renewal date for the state of California is December 31, 2015.

Lumber design values are in accordance with ANSI/TPI 1 section 6.3
These truss designs rely on lumber values established by others.



October 6,2014

Ong, Choo Soon

The seal on these drawings indicate acceptance of professional engineering responsibility solely for the truss components shown. The suitability and use of this component for any particular building is the responsibility of the building designer, per ANSI/TPI 1.

NOTES

1) 2-ply truss to be connected together with 10d (0.131"x3") nails as follows:
Top chords connected as follows: 2x6 - 2 rows staggered at 0-9-0 oc, 2x4 - 1 row at 0-9-0 oc, 2x8 - 2 rows staggered at 0-9-0 oc.
Bottom chords connected as follows: 2x4 - 1 row at 0-9-0 oc.
Webs connected as follows: 2x4 - 1 row at 0-9-0 oc.
2) All loads are considered equally applied to all plies, except if noted as front (F) or back (B) face in the LOAD CASE(S) section. Ply to ply connections have been provided to distribute only loads noted as (F) or (B), unless otherwise indicated.
3) Unbalanced roof live loads have been considered for this design.
4) Wind: ASCE 7-05; 95mph; TCDL=6.0psf; BCDL=6.0psf; h=25ft; Cat. II; Exp C; enclosed; MWFRS (low-rise); cantilever left and right exposed ; end vertical left and right exposed; Lumber DOL=1.00 plate grip DOL=1.00
5) Truss designed for wind loads in the plane of the truss only. For studs exposed to wind (normal to the face), see Standard Industry Gable End Details as applicable, or consult qualified building designer as per ANSI/TPI 1.
6) Provide adequate drainage to prevent water ponding.
7) All plates are MT20 plates unless otherwise indicated.
8) All plates are 1.5x4 MT20 unless otherwise indicated.
9) Gable studs spaced at 1-4-0 oc.
10) This truss has been designed for a 10.0 psf bottom chord live load nonconcurrent with any other live loads.
11) * This truss has been designed for a live load of 20.0psf on the bottom chord in all areas where a rectangle 3-6-0 tall by 1-0-0 wide will fit between the bottom chord and any other members.
12) A plate rating reduction of 20% has been applied for the green lumber members.
13) Bearing at joint(s) 32, 33 considers parallel to grain value using ANSI/TPI 1 angle to grain formula. Building designer should verify capacity of bearing surface.

NOTES
1) Unbalanced roof live loads have been considered for this design.
2) Wind: ASCE 7-05; 95mph; TCDL=6.0psf; BCDL=6.0psf; h=25ft; Cat. II; Exp C; enclosed; MWFRS (low-rise): cantilever left and right exposed ; end vertical left and right exposed; Lumber DOL=1.00 plate grip DOL=1.00
3) Provide adequate drainage to prevent water ponding.
4) All plates are MT20 plates unless otherwise indicated.
5) This truss has been designed for a 10.0 psf bottom chord live load nonconcurrent with any other live loads.
6) * This truss has been designed for a live load of 20.0psf on the bottom chord in all areas where a rectangle 3-6-0 tall by 1-0-0 wide will fit between the bottom chord and any other members.
7) A plate rating reduction of 20% has been applied for the green lumber members.
8) Bearing at joint(s) 21, 22 considers parallel to grain value using ANSI/TPI 1 angle to grain formula. Building designer should verify capacity of bearing surface.
9) Provide mechanical connection (by others) of truss to bearing plate capable of withstanding 100 lb uplift at joint(s) except (jt=lb) 21=526, 22=407.
10) This truss has been designed for a total drag load of 200 plf. Lumber DOL=(1.33) Plate grip DOL=(1.33) Connect truss to resist drag loads along bottom chord from 1-0-0 to 24-0-0 for 229.0 plf.

⚠ WARNING - Verify design parameters and READ NOTES ON THIS AND INCLUDED MITEK REFERENCE PAGE MII-7473 rev. 1/25/2014 BEFORE USE
Design valid for use only with MiTek connectors. This design is based only upon parameters shown, and is for an individual building component. Applicability of design parameters and proper incorporation of component is responsibility of building designer - not truss designer. Bracing shown is for lateral support of individual web members only. Additional temporary bracing to insure stability during construction is the responsibility of the erector. Additional permanent bracing of the overall structure is the responsibility of the building designer. For general guidance regarding fabrication, quality control, storage, delivery, erection and bracing, consult **ANSI/TPI1 Quality Criteria, DSB-89 and BCSI Building Component Safety Information** available from Truss Plate Institute, 781 N. Lee Street, Suite 312, Alexandria, VA 22314.
If Southern Pine (SP) lumber is specified, the design values are those effective 06/01/2013 by ALSC.

NOTES

1) 2-ply truss to be connected together with 10d (0.131"x3") nails as follows:
Top chords connected as follows: 2x6 - 2 rows staggered at 0-9-0 oc, 2x4 - 1 row at 0-9-0 oc, 2x8 - 2 rows staggered at 0-9-0 oc.
Bottom chords connected as follows: 2x4 - 1 row at 0-9-0 oc.
Webs connected as follows: 2x4 - 1 row at 0-9-0 oc, 2x6 - 2 rows staggered at 0-8-0 oc, Except member 15-5 2x6 - 2 rows staggered at 0-5-0 oc.
2) All loads are considered equally applied to all plies, except if noted as front (F) or back (B) face in the LOAD CASE(S) section. Ply to ply connections have been provided to distribute only loads noted as (F) or (B), unless otherwise indicated.
3) Unbalanced roof live loads have been considered for this design.
4) Wind: ASCE 7-05; 95mph; TCDL=6.0psf; BCDL=6.0psf; h=25ft; Cat. II; Exp C; enclosed; MWFRS (low-rise); cantilever left and right exposed ; end vertical left and right exposed; Lumber DOL=1.00 plate grip DOL=1.00
5) Provide adequate drainage to prevent water ponding.
6) This truss has been designed for a 10.0 psf bottom chord live load nonconcurrent with any other live loads.
7) * This truss has been designed for a live load of 20.0psf on the bottom chord in all areas where a rectangle 3-6-0 tall by 1-0-0 wide will fit between the bottom chord and any other members.
8) A plate rating reduction of 20% has been applied for the green lumber members.
9) Bearing at joint(s) 22 considers parallel to grain value using ANSI/TPI 1 angle to grain formula. Building designer should verify capacity of bearing surface.
10) Provide mechanical connection (by others) of truss to bearing plate capable of withstanding 100 lb uplift at joint(s) except (jt=lb) 18=302, 13=852, 22=1665.
11) This truss has large uplift reaction(s) from gravity load case(s). Proper connection is required to secure truss against upward movement at the bearings. Building designer must provide for uplift reactions indicated.
12) Use USP JL24 (With 10d nails into Girder & NA9D nails into Truss) or equivalent at 7-6-4 from the left end to connect truss(es) to front face of bottom chord.

October 6,2014

⚠ WARNING - Verify design parameters and READ NOTES ON THIS AND INCLUDED MITEK REFERENCE PAGE MII-7473 rev. 1/29/2014 BEFORE USE.
Design valid for use only with MiTek connectors. This design is based only upon parameters shown, and is for an individual building component. Applicability of design parameters and proper incorporation of component is responsibility of building designer - not truss designer. Bracing shown is for lateral support of individual web members only. Additional temporary bracing to insure stability during construction is the responsibility of the erector. Additional permanent bracing of the overall structure is the responsibility of the building designer. For general guidance regarding fabrication, quality control, storage, delivery, erection and bracing, consult **ANSI/TPI1 Quality Criteria, DSB-89 and BCSI Building Component Safety Information** available from Truss Plate Institute, 781 N. Lee Street, Suite 312, Alexandria, VA 22314.
If Southern Pine (SP) lumber is specified, the design values are those effective 06/01/2013 by ALSC.

MiTek
7777 Greenback Lane, Suite 109
Citrus Heights, CA. 95610

NOTES

13) Use USP JUS24 (With 10d nails into Girder & 10d nails into Truss) or equivalent at 11-7-12 from the left end to connect truss(es) to front face of bottom chord.
14) Fill all nail holes where hanger is in contact with lumber.

NOTES
1) 2-ply truss to be connected together with 10d (0.131"x3") nails as follows:
Top chords connected as follows: 2x6 - 2 rows staggered at 0-9-0 oc, 2x4 - 1 row at 0-9-0 oc.
Bottom chords connected as follows: 2x4 - 1 row at 0-9-0 oc.
Webs connected as follows: 2x4 - 1 row at 0-9-0 oc, 2x6 - 2 rows staggered at 0-9-0 oc.
2) All loads are considered equally applied to all plies, except if noted as front (F) or back (B) face in the LOAD CASE(S) section. Ply to ply connections have been provided to distribute only loads noted as (F) or (B), unless otherwise indicated.
3) Unbalanced roof live loads have been considered for this design.
4) Wind: ASCE 7-05; 95mph; TCDL=6.0psf; BCDL=6.0psf; h=25ft; Cat. II; Exp C; enclosed; MWFRS (low-rise); cantilever left and right exposed ; end vertical left and right exposed; Lumber DOL=1.00 plate grip DOL=1.00
5) Provide adequate drainage to prevent water ponding.
6) This truss has been designed for a 10.0 psf bottom chord live load nonconcurrent with any other live loads.
7) * This truss has been designed for a live load of 20.0psf on the bottom chord in all areas where a rectangle 3-6-0 tall by 1-0-0 wide will fit between the bottom chord and any other members.
8) A plate rating reduction of 20% has been applied for the green lumber members.
9) Provide mechanical connection (by others) of truss to bearing plate capable of withstanding 100 lb uplift at joint(s) except (jt=lb) 8=208, 13=297.
10) Use USP JL24 (With 10d nails into Girder & NA9D nails into Truss) or equivalent spaced at 4-1-8 oc max. starting at 7-6-4 from the left end to 11-7-12 to connect truss(es) to back face of bottom chord.
11) Fill all nail holes where hanger is in contact with lumber.

NOTES

1) Unbalanced roof live loads have been considered for this design.
2) Wind: ASCE 7-05; 95mph; TCDL=6.0psf; BCDL=6.0psf; h=25ft; Cat. II; Exp C; enclosed; MWFRS (low-rise); cantilever left and right exposed ; end vertical left and right exposed; Lumber DOL=1.00 plate grip DOL=1.00
3) Provide adequate drainage to prevent water ponding.
4) All plates are MT20 plates unless otherwise indicated.
5) This truss has been designed for a 10.0 psf bottom chord live load nonconcurrent with any other live loads.
6) * This truss has been designed for a live load of 20.0psf on the bottom chord in all areas where a rectangle 3-6-0 tall by 1-0-0 wide will fit between the bottom chord and any other members.
7) A plate rating reduction of 20% has been applied for the green lumber members.
8) Provide mechanical connection (by others) of truss to bearing plate capable of withstanding 415 lb uplift at joint 14 and 310 lb uplift at joint 8.
9) This truss has been designed for a total drag load of 200 plf. Lumber DOL=(1.33) Plate grip DOL=(1.33) Connect truss to resist drag loads along bottom chord from 14-9-0 to 19-9-0 for 986.7 plf.

WARNING - Verify design parameters and READ NOTES ON THIS AND INCLUDED MITEK REFERENCE PAGE MII-7473 rev. 1/29/2014 BEFORE USE
Design valid for use only with MiTek connectors. This design is based only upon parameters shown, and is for an individual building component. Applicability of design parameters and proper incorporation of component is responsibility of building designer - not truss designer. Bracing shown is for lateral support of individual web members only. Additional temporary bracing to insure stability during construction is the responsibility of the erector. Additional permanent bracing of the overall structure is the responsibility of the building designer. For general guidance regarding fabrication, quality control, storage, delivery, erection and bracing, consult **ANSI/TPI1 Quality Criteria, DSB-89 and BCSI Building Component Safety Information** available from Truss Plate Institute, 781 N. Lee Street, Suite 312, Alexandria, VA 22314.
If Southern Pine (SP) lumber is specified, the design values are those effective 06/01/2013 by ALSC.

NOTES

1) Unbalanced roof live loads have been considered for this design.
2) Wind: ASCE 7-05; 95mph; TCDL=6.0psf; BCDL=6.0psf; h=25ft; Cat. II; Exp C; enclosed; MWFRS (low-rise); cantilever left and right exposed ; end vertical left and right exposed; Lumber DOL=1.00 plate grip DOL=1.00
3) Provide adequate drainage to prevent water ponding.
4) All plates are MT20 plates unless otherwise indicated.
5) This truss has been designed for a 10.0 psf bottom chord live load nonconcurrent with any other live loads.
6) * This truss has been designed for a live load of 20.0psf on the bottom chord in all areas where a rectangle 3-6-0 tall by 1-0-0 wide will fit between the bottom chord and any other members.
7) A plate rating reduction of 20% has been applied for the green lumber members.
8) Provide mechanical connection (by others) of truss to bearing plate capable of withstanding 106 lb uplift at joint 16 and 102 lb uplift at joint 9.

LOAD CASE(S) Standard

⚠ WARNING - Verify design parameters and READ NOTES ON THIS AND INCLUDED MITEK REFERENCE PAGE MII-7473 rev. 1/29/2014 BEFORE USE

Design valid for use only with MiTek connectors. This design is based only upon parameters shown, and is for an individual building component. Applicability of design parameters and proper incorporation of component is responsibility of building designer - not truss designer. Bracing shown is for lateral support of individual web members only. Additional temporary bracing to insure stability during construction is the responsibility of the erector. Additional permanent bracing of the overall structure is the responsibility of the building designer. For general guidance regarding fabrication, quality control, storage, delivery, erection and bracing, consult **ANSI/TPI1 Quality Criteria, DSB-89 and BCSI Building Component Safety Information** available from Truss Plate Institute, 781 N. Lee Street, Suite 312, Alexandria, VA 22314.
If Southern Pine (SP) lumber is specified, the design values are those effective 06/01/2013 by ALSC.

⚠ WARNING - Verify design parameters and READ NOTES ON THIS AND INCLUDED MITEK REFERENCE PAGE MII-7473 rev. 1/25/2014 BEFORE USE
Design valid for use only with MiTek connectors. This design is based only upon parameters shown, and is for an individual building component. Applicability of design parameters and proper incorporation of component is responsibility of building designer - not truss designer. Bracing shown is for lateral support of individual web members only. Additional temporary bracing to insure stability during construction is the responsibility of the erector. Additional permanent bracing of the overall structure is the responsibility of the building designer. For general guidance regarding fabrication, quality control, storage, delivery, erection and bracing, consult **ANSI/TPI1 Quality Criteria, DSB-89 and BCSI Building Component Safety Information** available from Truss Plate Institute, 781 N. Lee Street, Suite 312, Alexandria, VA 22314.
If Southern Pine (SP) lumber is specified, the design values are those effective 06/01/2013 by ALSC.

MiTek
7777 Greenback Lane, Suite 109
Citrus Heights, CA, 95610

NOTES

12) Use USP JUS24 (With 10d nails into Girder & 10d nails into Truss) or equivalent at 10-3-3 from the left end to connect truss(es) to front face of bottom chord, skewed 0.0 deg.to the right, sloping 0.0 deg. down.

13) Fill all nail holes where hanger is in contact with lumber.

LOAD CASE(S) Standard

NOTES

1) 2-ply truss to be connected together with 10d (0.131"x3") nails as follows:
Top chords connected as follows: 2x6 - 2 rows staggered at 0-9-0 oc, 2x4 - 1 row at 0-7-0 oc.
Bottom chords connected as follows: 2x4 - 1 row at 0-9-0 oc.
Webs connected as follows: 2x4 - 1 row at 0-9-0 oc, 2x6 - 2 rows staggered at 0-9-0 oc.
2) All loads are considered equally applied to all plies, except if noted as front (F) or back (B) face in the LOAD CASE(S) section. Ply to ply connections have been provided to distribute only loads noted as (F) or (B), unless otherwise indicated.
3) Wind: ASCE 7-05; 95mph; TCDL=6.0psf; BCDL=6.0psf; h=25ft; Cat. II; Exp C; enclosed; MWFRS (low-rise); cantilever left and right exposed ; end vertical left and right exposed; Lumber DOL=1.00 plate grip DOL=1.00
4) Provide adequate drainage to prevent water ponding.
5) All plates are MT20 plates unless otherwise indicated.
6) This truss has been designed for a 10.0 psf bottom chord live load nonconcurrent with any other live loads.
7) * This truss has been designed for a live load of 20.0psf on the bottom chord in all areas where a rectangle 3-6-0 tall by 1-0-0 wide will fit between the bottom chord and any other members.
8) A plate rating reduction of 20% has been applied for the green lumber members.
9) Provide mechanical connection (by others) of truss to bearing plate capable of withstanding 247 lb uplift at joint 16 and 196 lb uplift at joint 10.
10) Use USP JL24 (With 10d nails into Girder & NA9D nails into Truss) or equivalent at 6-1-12 from the left end to connect truss(es) to back face of bottom chord, skewed 0.0 deg.to the right, sloping 0.0 deg. down.
11) Use USP JL24 (With 16d nails into Girder & NA9D nails into Truss) or equivalent at 10-3-4 from the left end to connect truss(es) to back face of bottom chord, skewed 0.0 deg.to the right, sloping 0.0 deg. down.
12) Fill all nail holes where hanger is in contact with lumber.

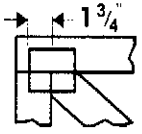
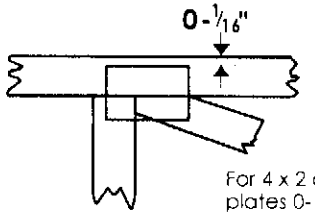
Symbols

PLATE LOCATION AND ORIENTATION



Center plate on joint unless x, y offsets are indicated. Dimensions are in ft-in-sixteenths. Apply plates to both sides of truss and fully embed teeth.



For 4 x 2 orientation, locate plates 0-1/16" from outside edge of truss.

This symbol indicates the required direction of slots in connector plates.

*** Plate location details available in MiTek 20/20 software or upon request.**

PLATE SIZE

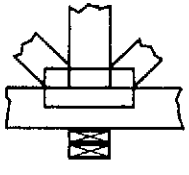
4 X 4

The first dimension is the plate width measured perpendicular to slots. Second dimension is the length parallel to slots.

LATERAL BRACING LOCATION

Indicated by symbol shown and/or by text in the bracing section of the output. Use T or I bracing if indicated.

BEARING

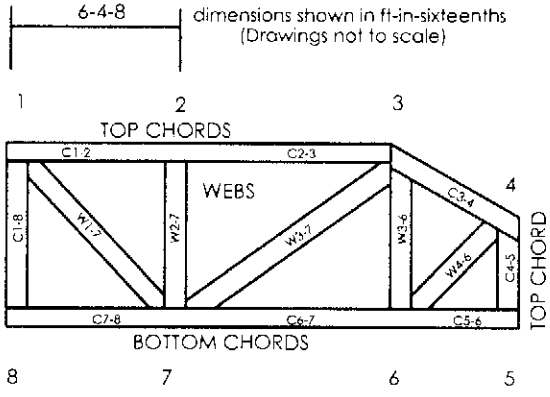


Indicates location where bearings (supports) occur. Icons vary but reaction section indicates joint number where bearings occur. Min size shown is for crushing only.

Industry Standards:

ANSI/TPI1: National Design Specification for Metal Plate Connected Wood Truss Construction.
DSB-89: Design Standard for Bracing.
BCSI: Building Component Safety Information, Guide to Good Practice for Handling, Installing & Bracing of Metal Plate Connected Wood Trusses.

Numbering System



JOINTS ARE GENERALLY NUMBERED/LETTERED CLOCKWISE AROUND THE TRUSS STARTING AT THE JOINT FARTHEST TO THE LEFT.

CHORDS AND WEBS ARE IDENTIFIED BY END JOINT NUMBERS/LETTERS.

PRODUCT CODE APPROVALS

ICC-ES Reports:

ESR-1311, ESR-1352, ESR1988
ER-3907, ESR-2362, ESR-1397, ESR-3282

Southern Pine lumber designations are as follows:
SYP represents values as published by AWC in the 2005/2012 NDS
SP represents ALSC approved/new values with effective date of June 1, 2013

© 2012 MiTek® All Rights Reserved

MiTek®

General Safety Notes

Failure to Follow Could Cause Property Damage or Personal Injury

1. Additional stability bracing for truss system, e.g. diagonal or X-bracing, is always required. See BCSI.
2. Truss bracing must be designed by an engineer. For wide truss spacing, individual lateral braces themselves may require bracing, or alternative T or I bracing should be considered.
3. Never exceed the design loading shown and never stack materials on inadequately braced trusses.
4. Provide copies of this truss design to the building designer, erection supervisor, property owner and all other interested parties.
5. Cut members to bear tightly against each other.
6. Place plates on each face of truss at each joint and embed fully. Knots and wane at joint locations are regulated by ANSI/TPI 1.
7. Design assumes trusses will be suitably protected from the environment in accord with ANSI/TPI 1.
8. Unless otherwise noted, moisture content of lumber shall not exceed 19% at time of fabrication.
9. Unless expressly noted, this design is not applicable for use with fire retardant, preservative treated, or green lumber.
10. Camber is a non-structural consideration and is the responsibility of truss fabricator. General practice is to camber for dead load deflection.
11. Plate type, size, orientation and location dimensions indicated are minimum plating requirements.
12. Lumber used shall be of the species and size, and in all respects, equal to or better than that specified.
13. Top chords must be sheathed or purlins provided at spacing indicated on design.
14. Bottom chords require lateral bracing at 10 ft. spacing, or less, if no ceiling is installed, unless otherwise noted.
15. Connections not shown are the responsibility of others.
16. Do not cut or alter truss member or plate without prior approval of an engineer.
17. Install and load vertically unless indicated otherwise.
18. Use of green or treated lumber may pose unacceptable environmental, health or performance risks. Consult with project engineer before use.
19. Review all portions of this design (front, back, words and pictures) before use. Reviewing pictures alone is not sufficient.
20. Design assumes manufacture in accordance with ANSI/TPI 1 Quality Criteria.

TIMBER PRODUCTS INSPECTION

September 11, 2012

To Whom It May Concern:

This is to verify that BMC of Indio, CA is a Subscriber in the Timber Products Inspection (TP) and General Testing and Inspection (GTI) Truss Quality Auditing Program. The TP and GTI Truss Quality Auditing Programs are recognized by the International Accreditation Service (IAS) with the assigned number of AA-664.

TP and the GTI quality assurance marks have been recognized in the West by the truss industry and code jurisdictions since 1969. TP currently audits truss manufacturing facilities nationwide.

TP is conducting unannounced, third party audits at BMC of Indio, CA. This facility is currently in good standing in the TP Truss Quality Auditing Program. BMC's personnel are authorized to apply the GTI quality mark to trusses that are manufactured in accordance with the latest revision of the ANSI/TPI Standards. All stamping takes place at the truss manufacturing facility, under supervision of qualified plant personnel.

If you have questions regarding the status of any plant in the TP/GTI Program, please contact me on my cell 208.818.7869.

Sincerely,

TIMBER PRODUCTS INSPECTION

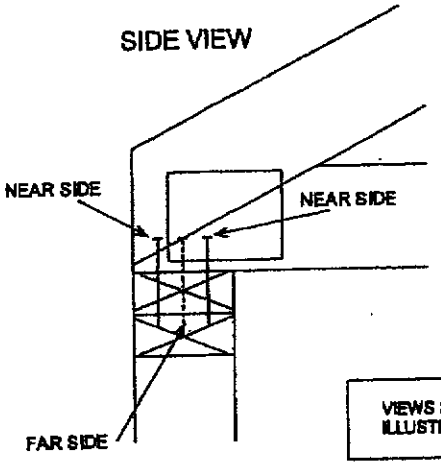
UPLIFT TOE-NAIL DETAIL	MII/SAC - 24	11/18/2004	PAGE 1

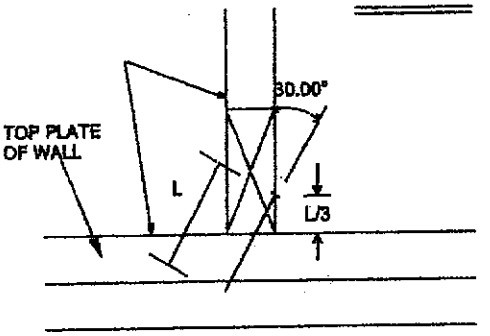
MiTek Industries, Inc.
Western Division

NOTES:
1. TOE-NAILS SHALL BE DRIVEN AT AN ANGLE OF 30 DEGREES WITH THE MEMBER AND STARTED 1/3 THE LENGTH OF THE NAIL FROM THE MEMBER END AS SHOWN.
2. THE END DISTANCE, EDGE DISTANCE, AND SPACING OF NAILS SHALL BE SUCH AS TO AVOID UNUSUAL SPLITTING OF THE WOOD.
3. ALLOWABLE VALUE SHALL BE THE LESSER VALUE OF THE BOTTOM CHORD SPECIES OR TOP PLATE SPECIES FOR MEMBERS OF DIFFERENT SPECIES.

SIDE VIEW



END VIEW



VIEWS SHOWN ARE FOR ILLUSTRATION PURPOSES ONLY

TOE-NAIL WITHDRAWAL VALUES PER NDS 2001 (lb/nail)

	DIAM.	SYP	DF	HF	SPF	SPF-S
3.5" LONG	.131	56.5	46.1	31.6	29.8	20.3
	.135	60.3	47.5	32.6	30.7	20.9
	.162	72.3	57.0	39.1	36.8	25.1
3.25" LONG	.128	53.1	41.8	28.7	27.0	18.4
	.131	54.3	42.8	29.3	27.7	18.8
	.148	61.4	48.3	33.2	31.3	21.3
3.0" LONG	.120	45.9	36.2	24.8	23.4	15.9
	.128	49.0	38.6	26.5	25.0	17.0
	.131	50.1	39.5	27.1	25.6	17.4
	.148	56.6	44.6	30.6	28.9	19.6

VALUES SHOWN ARE CAPACITY PER TOE-NAIL.
APPLICABLE DURATION OF LOAD INCREASES MAY BE APPLIED.

EXAMPLE:
(3) - 16d NAILS (.162" diam. x 3.5") WITH SPF SPECIES TOP PLATE

For Wind DOL of 1.33:
3 (nails) X 36.8 (lb/nail) X 1.33 (DOL for wind) = 146.8lb Maximum Allowable Uplift Reaction Due To Wind
For Wind DOL of 1.60:
3 (nails) X 36.8 (lb/nail) X 1.60 (DOL for wind) = 176.6lb Maximum Allowable Uplift Reaction Due To Wind

If the uplift reaction specified on the Truss Design Drawing is more than 146.8 lbs (176.6 lbs) another mechanical uplift connection must be used.

*** USE (3) TOE-NAILS ON 2x4 BEARING WALL

20'-0"	805	943	943	1414		1886	1886	2829		

*Bay size shall be measured in between the centers of pairs of diagonals.

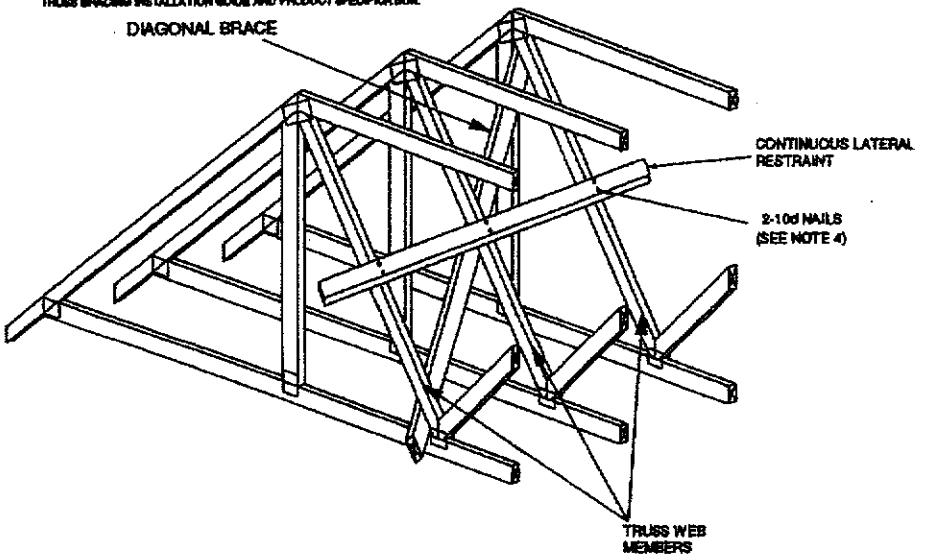
TYPE	BRACING MATERIALS
A	1 X 4 IND. 45 SYP -OR- 1 X 4 #2 SRB (DF, HF, SPF)
B	2 X 3 #3, STD, CONST (SPF, DF, HF, OR SYP)
C	2 X 4 #3, STD, CONST (SPF, DF, HF, OR SYP)
D	2 X 8 #2 OR BETTER (SPF, DF, HF, OR SYP)

GENERAL NOTES

1. DIAGONAL BRACING IS REQUIRED TO TRANSFER THE CUMULATIVE LATERAL BRACE FORCE INTO THE ROOF AND/OR CEILING DIAPHRAGM. THE DIAPHRAGM IS TO BE DESIGNED BY A QUALIFIED PROFESSIONAL.
2. THESE CALCULATIONS ARE BASED ON LATERAL BRACE CARRYING 2% OF THE WEB FORCE.
3. DIAGONAL BRACING MATERIAL MUST BE SAME SIZE AND GRADE OR BETTER, AS THE LATERAL BRACE MATERIAL, AND SHALL BE INSTALLED IN SUCH A MANNER THAT IT INTERSECTS WEB MEMBERS AT APPROX. 45 DEGREES AND SHALL BE NAILED AT EACH END AND EACH INTERMEDIATE TRUSS WITH 2-6d (0.131"x2.5") FOR 1x4 BRACES, 2-10d (0.131"x 3") FOR 2x3 and 2x4 BRACES, AND 3-10d (0.131"x3") FOR 2x6 BRACES.
4. CONNECT LATERAL BRACE TO EACH TRUSS WITH 2-8d (0.131"x2.5") NAILS FOR 1x4 LATERAL BRACES, 2-10d (0.131"x3") NAILS FOR 2x3 and 2x4 LATERAL BRACES, AND 3-10d (0.131"x3") FOR 2x6 LATERAL BRACES.
5. LATERAL BRACE SHOULD BE CONTINUOUS AND SHOULD OVERLAP AT LEAST ONE TRUSS SPACE FOR CONTINUITY.
6. FOR ADDITIONAL GUIDANCE REGARDING DESIGN AND INSTALLATION OF BRACING, CONSULT DSB-89 TEMPORARY BRACING OF METAL PLATE CONNECTED WOOD TRUSSES AND BCSI 1 GUIDE TO GOOD PRACTICE FOR HANDLING, INSTALLING & BRACING OF METAL PLATE CONNECTED WOOD TRUSSES, JOINTLY PRODUCED BY WOOD TRUSS COUNCIL OF AMERICA and TRUSS PLATE INSTITUTE. www.sbcindustry.com and www.tpinst.org
7. REFER TO SPECIFIC TRUSS DESIGN DRAWING FOR WEB MEMBER FORCE.
8. TABULATED VALUES ARE BASED ON A DOL. = 1.15

FOR STABILIZERS:

FOR A SPACING OF 24" O.C. ONLY, MITEK "STABILIZER" TRUSS BRACING SYSTEMS CAN BE SUBSTITUTED FOR TYPE A, B, C AND D BRACING MATERIAL. DIAGONAL BRACING FOR STABILIZERS ARE TO BE PROVIDED AT BAY SIZE INDICATED ABOVE. WHERE DIAPHRAGM BRACING IS REQUIRED AT PITCH BREAKS, STABILIZERS MAY BE REPLACED WITH WOOD BLOCKING. SEE "STABILIZER" TRUSS BRACING INSTALLATION GUIDE AND PRODUCT SPECIFICATION.



This information is provided as a recommendation to assist in the requirement for permanent bracing of the individual truss web members. Additional bracing may still be required for the stability of the overall roof system. The method shown here is just one method that can be used to provide stability against web buckling.

1. SPAN OF VALLEY TRUSS SHALL BE LIMITED TO 30'-0" MAX AND PITCH BETWEEN 2~6/12.
2. PROVIDE LATERAL SUPPORT FOR TOP CHORD OF BASE TRUSS WITH SHEATHING (BY OTHERS)
3. MAX WEB LENGTH WITHOUT BRACE (6'-3") WITH BRACE (12'-6")
4. IF TOP CHORD LATERAL BRACING REQUIRED IS LESS THAN SPACING OF VALLEY TRUSSES (24" O.C.) THAN ADDITIONAL 2X4 BRACING IS REQUIRED.
5. LATERAL BRACING SHALL BE NAILED W/MIN 2 10d NAILS.

⚠ WARNING - Verify design parameters and READ NOTES ON THIS AND INCLUDED MITEK REFERENCE PAGE MII-7473 BEFORE USE.
Design valid for use only with MiTek connectors. This design is based only upon parameters shown, and is for an individual building component. Applicability of design parameters and proper incorporation of component is responsibility of building designer - not truss designer. Bracing shown is for lateral support of individual web members only. Additional temporary bracing to insure stability during construction is the responsibility of the erector. Additional permanent bracing of the overall structure is the responsibility of the building designer. For general guidance regarding fabrication, quality control, storage, delivery, erection and bracing, consult ANSI/TPI1 Quality Criteria, DSB-89 and BCSI1 Building Component Safety Information available from Truss Plate Institute, 583 D'Onofrio Drive; Madison, WI 53719.

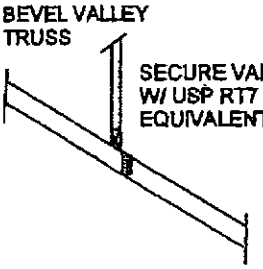
(NO SHEATHING)



DETAIL E
(NO SHEATHING)

NOTES:

FOR CONNECTION OF VALLEY TRUSSES TO BASE TRUSS
USING DETAIL D OR DETAIL E.

1. SPACING OF LATERAL BRACING REQUIRED ON TOP CHORD OF BASE TRUSS SHALL BE LARGER THAN THE SPACING OF VALLEY TRUSSES (24" O.C. MAX) OTHERWISE, ADDITIONAL BRACING SHALL BE PROVIDED FOR TOP CHORD OF BASE TRUSS.
2. LATERAL FORCE SYSTEM SHALL BE CHECKED BY PROJECT ENGINEER TO VERIFY THE PROPER TRANSFER OF ALL THE VERTICAL AND LATERAL FORCE.

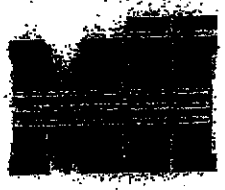
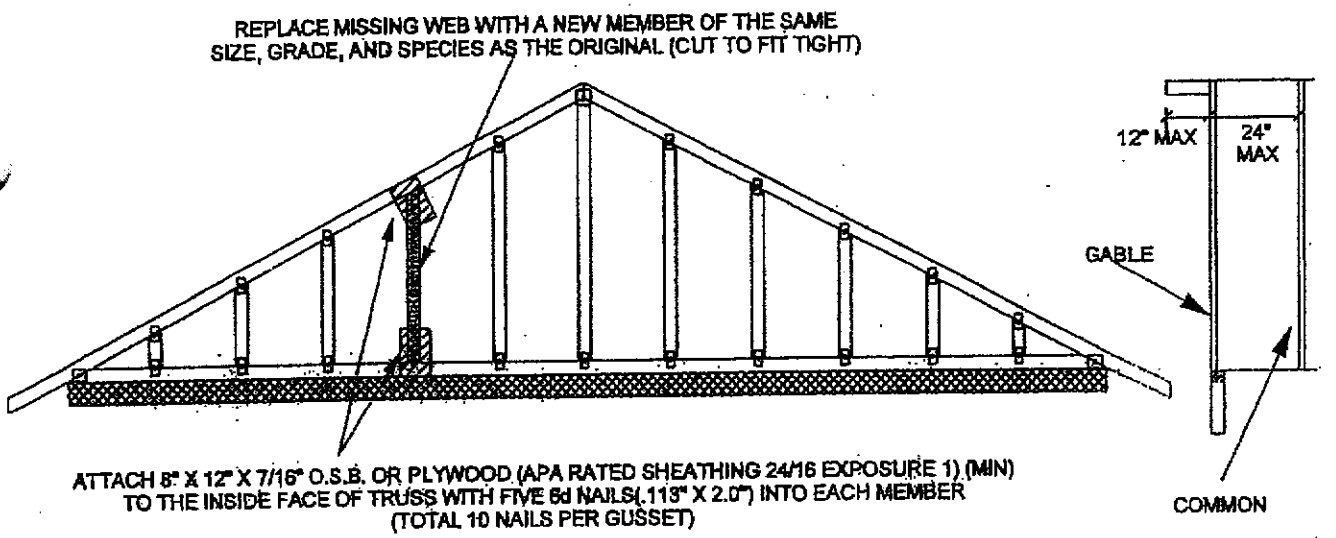
REPLACE A MISSING STUD ON A GABLE TRUSS	MII/SAC - 27	11/18/2004	PAGE 1

MiTek Industries, Inc.
Western Division



1. THIS IS A SPECIFIC REPAIR DETAIL TO BE USED ONLY FOR ITS ORIGINAL INTENTION. THIS REPAIR DOES NOT IMPLY THAT THE REMAINING PORTION OF THE TRUSS IS UNDAMAGED. THE ENTIRE TRUSS SHALL BE INSPECTED TO VERIFY THAT NO FURTHER REPAIRS ARE REQUIRED. WHEN THE REQUIRED REPAIRS ARE PROPERLY APPLIED, THE TRUSS WILL BE CAPABLE OF SUPPORTING THE LOADS INDICATED.
2. ALL MEMBERS MUST BE RETURNED TO THEIR ORIGINAL POSITIONS BEFORE APPLYING REPAIR AND HELD IN PLACE DURING APPLICATION OF REPAIR.
3. THE END DISTANCE, EDGE DISTANCE, AND SPACING OF NAILS SHALL BE SUCH AS TO AVOID SPLITTING OF THE WOOD.
4. WHEN NAILING SCABS OR GUSSETS, THE USE OF A BACKUP WEIGHT IS RECOMMENDED TO AVOID LOOSENING OF THE CONNECTOR PLATES AT THE JOINTS OR SPLICES.
5. THIS REPAIR IS TO BE USED FOR SINGLE PLY TRUSSES IN THE 2X_ ORIENTATION ONLY.



THE OUTSIDE FACE OF THE GABLE MUST BE SHEATHED WITH (MIN) 7/16" O.S.B OR PLYWOOD. SEE MITEK STANDARD GABLE END DETAILS FOR WIND BRACING REQUIREMENTS.

TRUSS CRITERIA

LOADING : 40-10-0-10 (MAX)
LOAD DURATION FACTOR : 1.15
SPACING : 24" O.C. (MAX)
TOP CHORD : 2X 4 OR 2X 6 (NO 2 MIN)
PITCH : 3/12 - 12/12
BEARING : CONTINUOUS
STUD SPACING 24" O.C. (MAX)

Page # 27

THE LOCATION OF THE BREAK MUST BE GREATER THAN OR EQUAL TO THE REQUIRED X DIMENSION FROM ANY PERIMETER BREAK OR HEEL JOINT AND A MINIMUM OF 6" FROM ANY INTERIOR JOINT (SEE SKETCH ABOVE)

DO NOT USE REPAIR FOR JOINT SPLICES

NOTES:
1. THIS REPAIR DETAIL IS TO BE USED ONLY FOR THE APPLICATION SHOWN. THIS REPAIR DOES NOT IMPLY THAT THE REMAINING PORTION OF THE TRUSS IS UNDAMAGED. THE ENTIRE TRUSS SHALL BE INSPECTED TO VERIFY THAT NO FURTHER REPAIRS ARE REQUIRED. WHEN THE REQUIRED REPAIRS ARE PROPERLY APPLIED, THE TRUSS WILL BE CAPABLE OF SUPPORTING THE LOADS INDICATED.
2. ALL MEMBERS MUST BE RETURNED TO THEIR ORIGINAL POSITIONS BEFORE APPLING REPAIR AND HELD IN PLACE DURING APPLICATION OF REPAIR.
3. THE END DISTANCE, EDGE DISTANCE AND SPACING OF NAILS SHALL BE SUCH AS TO AVOID UNUSUAL SPLITTING OF THE WOOD.
4. WHEN NAILING THE SCABS, THE USE OF A BACKUP WEIGHT IS RECOMMENDED TO AVOID LOOSENING OF THE CONNECTOR PLATES AT THE JOINTS OR SPLICES.
5. THIS REPAIR IS TO BE USED FOR SINGLE PLY TRUSSES IN THE 2x_ ORIENTATION ONLY.
6. THIS REPAIR IS LIMITED TO TRUSSES WITH NO MORE THAN THREE BROKEN MEMBERS.

⚠ WARNING - Verify design parameters and READ NOTES ON THIS AND INCLUDED MITEK REFERENCE PAGE MII-7473 BEFORE USE.
Design valid for use only with MiTek connectors. This design is based only upon parameters shown, and is for an individual building component. Applicability of design parameters and proper incorporation of component is responsibility of building designer - not truss designer. Bracing shown is for lateral support of individual web members only. Additional temporary bracing to insure stability during construction is the responsibility of the erector. Additional permanent bracing of the overall structure is the responsibility of the building designer. For general guidance regarding fabrication, quality control, storage, delivery, erection and bracing, consult ANSI/TPI1 Quality Criteria, DSB-89 and BCSI Building Component Safety Information available from Truss Plate Institute, 583 D'Onofrio Drive; Madison, WI 53719.

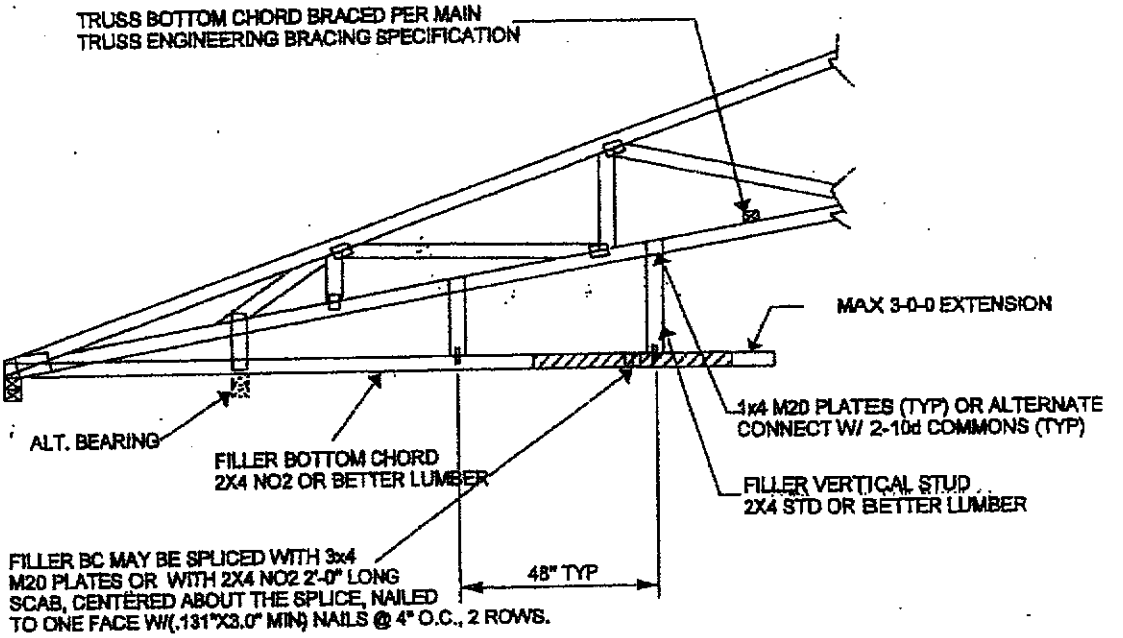
FALSE BOTTOM CHORD FILLER DETAIL	MII/SAC - 1	3/10/2004	PAGE 1

MiTek Industries, Inc.
Western Division



NOTES:

1) FOR LUMBER SIZE AND GRADE, AND FOR PLATES TYPE AND SIZE AT EACH JOINT REFER TO MAIN TRUSS ENGINEERING DESIGN.

2) LOADING: FOR TOP CHORD SEE MAIN TRUSS ENGINEERING DESIGN.
BOTTOM CHORD LOADS: LIVE = 0 PSF; DEAD; = 10 PSF

3) TRUSS SPACING = 24" O.C. MAX

4) MAX BOTTOM CHORD PITCH = 4/12

5) FILLER MEMBERS ARE NON STRUCTURAL PART OF THE MAIN TRUSS; THEREFORE THEY MAY BE FIELD ADJUSTED TO FIT EXISTING CONDITIONS, PROVIDED THAT STUD SPACING, CONNECTION AND EXTENSION REQUIREMENTS ARE AS SPECIFIED. ADJUSTMENTS MAY INCLUDE ADDITION OR REMOVAL OF FILLER MEMBERS.

OVERHANG REMOVAL DETAIL	MII/SAC - 5C	12/6/2005	PAGE 1

MiTek Industries, Inc.
Western Division

TRUSS CRITERIA:
LOADING: 25-18-0-10 (MAX)
DURATION FACTOR: 1.15/ 1.25
SPACING: 24" O.C.
TOP CHORD: 2x4 OR 2x6
HEEL HEIGHT: STANDARD HEEL UP TO 12" ENERGY HEEL
END BEARING CONDITION
Trusses not fitting these criteria should be examined individually.

NOTES:
1. THIS DETAIL IS FOR REMOVING OVERHANG. THIS DETAIL IS NOT TO BE USED WHEN OVERHANG HAS BEEN BROKEN OFF.
2. NO LUMBER DAMAGE OR DEFECTS SHALL GO BEYOND REMOVAL LINE. NO CONNECTOR PLATE DAMAGE ALLOWED

MiTek Industries, Inc.

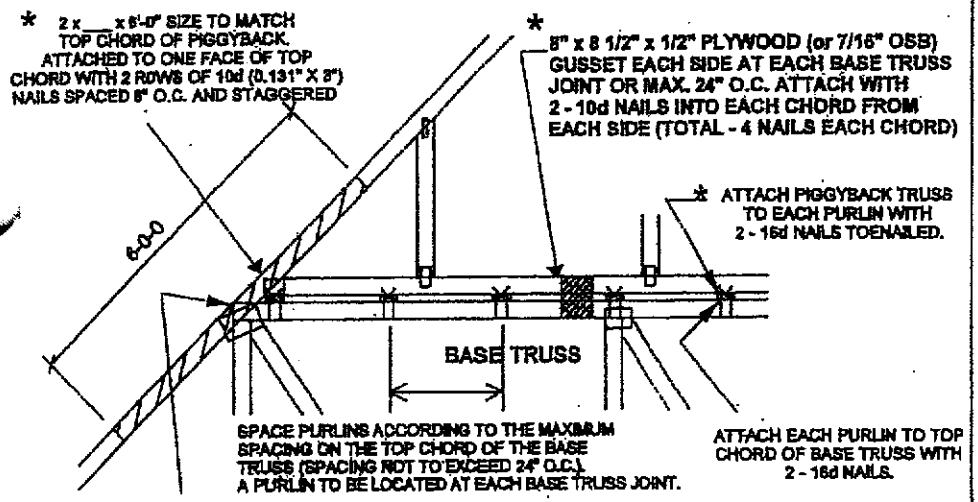
TYPICAL PIGGYBACK TRUSS CONNECTION (MAY BE USED FOR DRAG TRUSSES)



* FOR PIGGY BACK TRUSSES WITH SPANS < 12' SCAB MAY BE OMMITED PROVIDED THAT: ROOF SHEATHING TO BE CONTINUOUS OVER JOINT (SHEATHING TO OVERLAP MINIMUM 12" OVER JOINT)

* CAP CONNECTION IS MADE TO RESIST UPLIFT. SEE MAXIMUM CONNECTION CAPACITIES AND COMPARE WITH ENGINEERING DRAWING CONNECTION CAPACITIES FOR SCABS, PURLINS, AND SHEATHING MAY BE COMBINED WHEN DETERMINING OVERALL UPLIFT CAPACITY.

MAXIMUM UPLIFT SCAB CAPACITY USING (10) 10d (0.131" X 3") NAILS:

SYP =	1060 LBS
SPF =	820 LBS
DF =	970 LBS
HF =	840 LBS
SPF-S =	720 LBS

MAXIMUM UPLIFT PURLIN CAPACITY USING (2) 16d (0.131" X 3.5") NAILS:

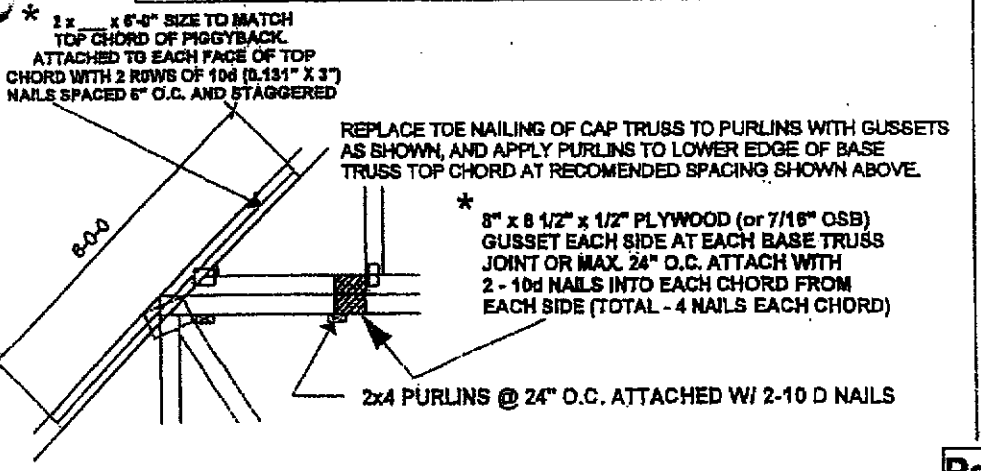
SYP =	117 LBS
SPF =	60 LBS
DF =	92 LBS
HF =	63 LBS
SPF-S =	41 LBS

MAXIMUM UPLIFT SHEATHING CAPACITY USING 1/2" SHEATHING AND (2) 8d (0.131" X 2.5") NAILS:

SYP =	82 LBS
SPF =	42 LBS
DF =	64 LBS
HF =	44 LBS
SPF-S =	28 LBS

VALUES SHOWN ARE BASED ON LOAD DURATION OF 1.00

IF NO GAP EXISTS BETWEEN CAP TRUSS AND BASE TRUSS (MAY BE USED FOR DRAG TRUSSES)



MAXIMUM UPLIFT GUSSET CAPACITY USING 7/16" GUSSETS AND (4) 10d (0.131" X 3") NAILS:

SYP =	300 LBS
SPF =	276 LBS
DF =	294 LBS
HF =	276 LBS
SPF-S =	258 LBS

VALUES SHOWN ARE BASED ON LOAD DURATION OF 1.00

SITE REFERENCE DRAWING (BY OTHERS) - N.T.S.

PALM SPRINGS FIRE DEPARTMENT NOTES

1. THE INSTALLATION OF THE FIRE SPRINKLER SYSTEMS OR MODIFICATIONS TO EXISTING FIRE SPRINKLER SYSTEMS SHALL COMPLY WITH:

   NFPA 13D
   CALIFORNIA RESIDENTIAL CODE (2013 EDITION)
   CALIFORNIA FIRE CODE (2013 EDITION)
   THE CITY OF PALM SPRINGS MUNICIPAL CODE CHAPTER 11.02 OF TITLE 11.
   PALM SPRINGS FIRE DEPARTMENT DEVELOPMENT GUIDELINES

2. THE FIRE PREVENTION BUREAU WILL REQUIRE THE FOLLOWING INSPECTIONS AND TEST AS A MINIMUM:

   OVERHEAD INSTALLATION AND HYDROSTATIC TEST - 200 PSI FOR TWO HOURS. FINAL FIRE SPRINKLER AND UNDERGROUND INSPECTIONS.

   TO SCHEDULE INSPECTIONS, CALL THE BUILDING DEPARTMENT ON THE MORNING OF THE INSPECTION BETWEEN 7:00 A.M. AND 7:30 A.M. (760) 323-8242 EXTENSION "0".

3. WATER FLOW SWITCH AND ALARM. A WATER FLOW SWITCH SHALL BE INSTALLED IN EVERY DWELLING UNTIL FIRE SPRINKLER SYSTEM. THE SYSTEM SHALL INCLUDE:

   AN APPROVED AUDIBLE SPRINKLER FLOW ALARM (WHEELOCK HORN/STROBE # MT4-115-WH-VFR WITH WBB BACK BOX OR EQUAL) SHALL BE PROVIDED ON THE EXTERIOR OF THE BUILDING IN AN APPROVED LOCATION. THE HORN/STROBE SHALL BE OUTDOOR-RATED.

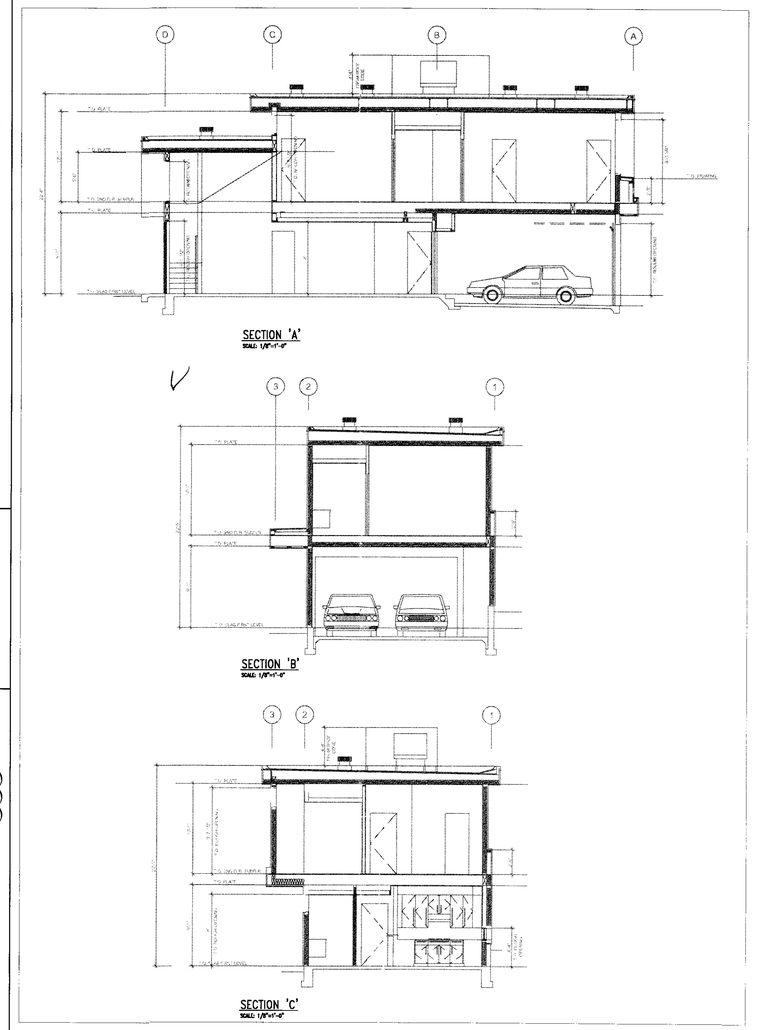
   RESIDENTIAL SMOKE ALARMS (KIDDE SM120X RELAY / POWER SUPPLY MODULE CONNECTED TO MULTI-STATION KIDDE SMOKE ALARMS OR EQUAL AND FIRE SPRINKLER FLOW SWITCH) SHALL BE INTERCONNECTED SO THAT OPERATION OF ANY SMOKE ALARM OR FIRE SPRINKLER FLOW SWITCH CAUSES ALL SMOKE ALARMS WITHIN THE DWELLING TO SOUND AND ACTIVATE THE EXTERIOR HORN/STROBE. THE WIRTING OF THIS SYSTEM SHALL IN ACCORDANCE WITH KIDDE SM 120X RELAY / POWER SUPPLY MODULE MANUAL AND FIGURE 2 (SEE ATTACHED). THE "120 VOLT DEVICE WI RED TO TURN ON WHEN ALARM SOUNDS" IS THE EXTERIOR HORN/STROBE. THE "PULL FOR FIRE" DEVICE IS THE FIRE SPRINKLER FLOW SWITCH.

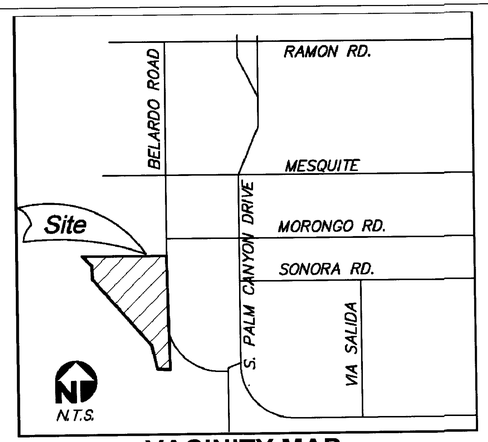
SCOPE OF WORK

1. INSTALL NEW FIRE PROTECTION SYSTEM IN NEW HOME.
2. ALL PIPE TO BE NEW AND U.L. LISTED FOR USE IN FIRE PROTECTION SYSTEMS.
3. NO PENETRATIONS THROUGH RATED WALLS.
4. FITTING CLASS AND TYPE SHALL MEET OR EXCEED NFPA 13D (2013) AND COUNTY. APPROVAL AND LISTED FOR USE IN FIRE PROTECTION.

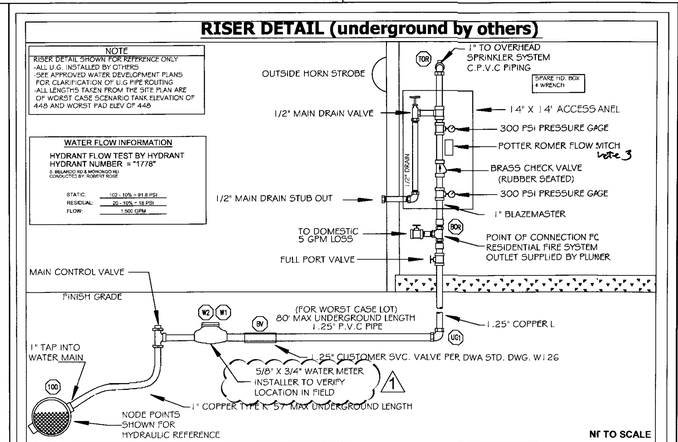
MATERIAL NOTES

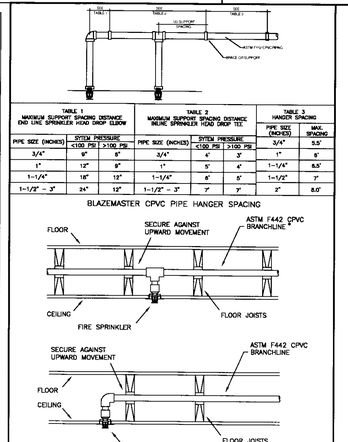
1. ALL PIPE TO BE BLAZEMASTER CPVC PIPE AND CONCEALED.
2. HEADS IN RESIDENTIAL AREAS TO BE VIKING VK488 3.0 K MODELS AND SPACED AT 12' X 12'. UNLESS OTHERWISESTATED.
3. HEADS IN GARAGE AREA ARE VIKING VK 461 2.8 K. AND SPACED AT 130 SQFT.
4. RISER TO BE 1" BLAZEMASTER CPVC AND CONCEALED IN WALL WITH ACCESS PANEL.
5. ALL PIPE SUPPORTS ARE TO BE IER NFPA #13D, 2013 ED. REQUIREMENTS. HANGERS TO BE PLACED NO MOIE THAN 6'-0" O.C.
6. ALL MATERIALS ARE TO BE UL LISTED. ALL WORK IS TO BE DONE IN ACCORDANCE WITH NFPA STANDARDS.
7. ALL HEAD DROPS TO BE 1".
8. A SPRINKLER BOX CONTAINING ONE OF EACH SPRINKLER HEAD TYPE INSTALLED IN THE BUILDING SHOULD BE LOCATED ADJACENT TO THE RISER, THE BOX SHOULD INCLUDE THE INSTALLEI'S NAME AND TELEPHONE NUMBER

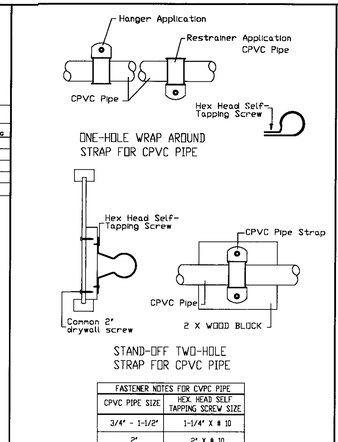


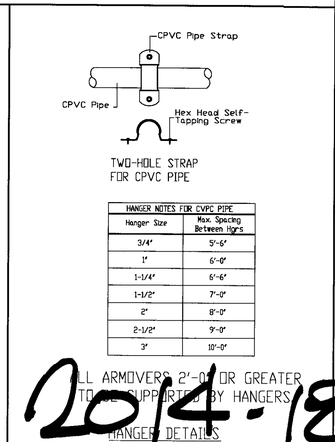


VACINITY MAP









THE RECIPIENT OF THESE PLANS HEREBY ACKNOWLEDGES THAT ALL PLANS, DETAILS, SPECIFICATIONS OR METHODS OF INSTALLATION CONTAINED WITHIN THIS SET OF PLANS IS THE SOLE PROPERTY OF KPS FIRE SPRINKLER INC. AND THAT ANY USE OF THIS SET OF PLANS IS PROHIBITED WITHOUT RECEIVING PERMISSION FROM KPS FIRE SPRINKLER INC.

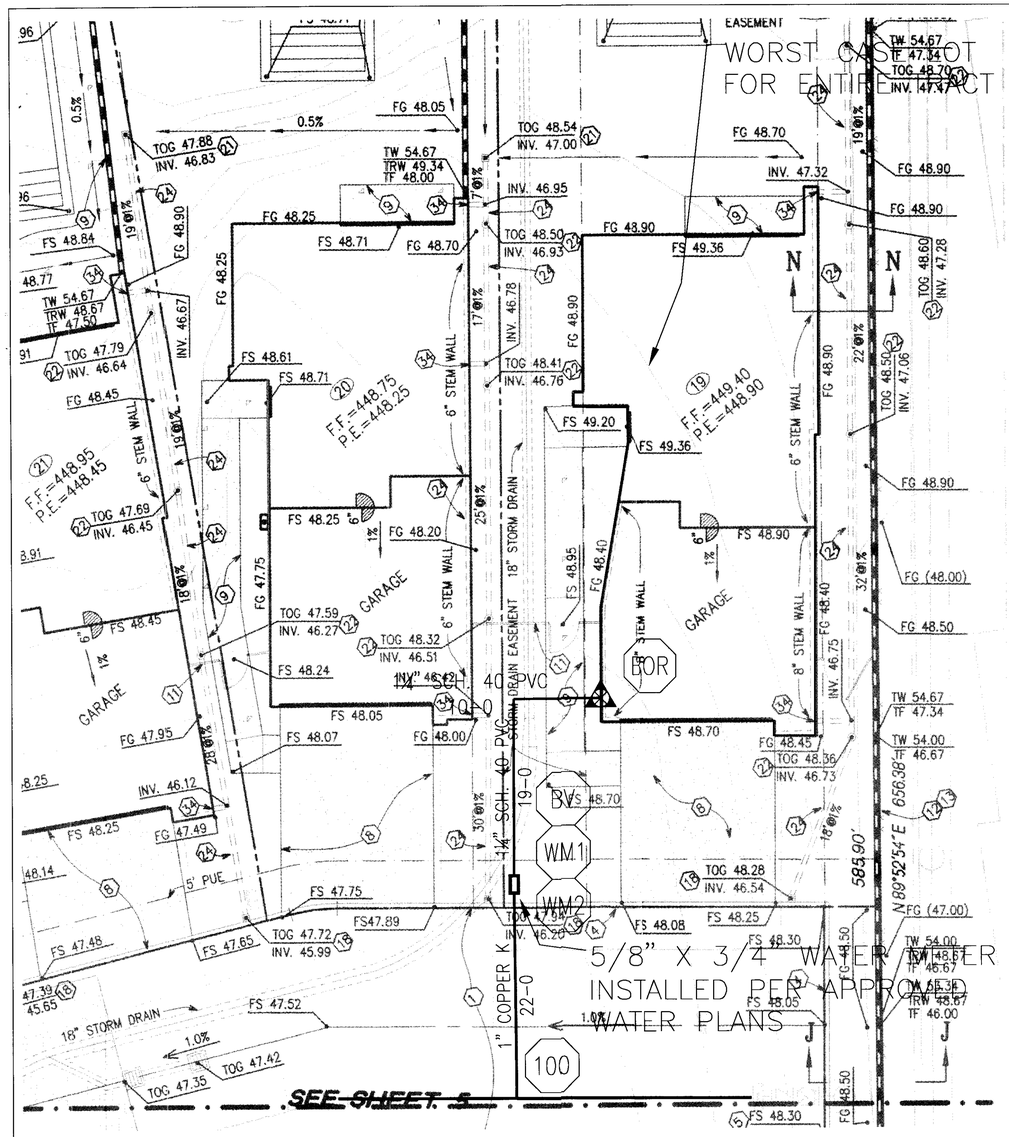
THE RECIPIENT OF THESE PLANS HEREBY ACKNOWLEDGES THAT ALL PLANS, DETAILS, SPECIFICATIONS OR METHODS OF INSTALLATION CONTAINED WITHIN THIS SET OF PLANS IS THE SOLE PROPERTY OF KPS FIRE SPRINKLER INC. AND THAT ANY USE OF THIS SET OF PLANS IS PROHIBITED WITHOUT RECEIVING PERMISSION FROM KPS FIRE SPRINKLER INC.



SITE REFERENCE DRAWING (BY OTHERS) - N.T.S.

PALM SPRINGS FIRE DEPARTMENT NOTES

1. THE INSTALLATION OF THE FIRE SPRINKLER SYSTEMS OR MODIFICATIONS TO EXISTING FIRE SPRINKLER SYSTEMS SHALL COMPLY WITH:

   NFPA 13D
   CALIFORNIA RESIDENTIAL CODE (2013 EDITION)
   CALIFORNIA FIRE CODE (2013 EDITION)
   THE CITY OF PALM SPRINGS MUNICIPAL CODE CHAPTER 11.02 OF TITLE 11.
   PALM SPRINGS FIRE DEPARTMENT DEVELOPMENT GUIDELINES

2. THE FIRE PREVENTION BUREAU WILL REQUIRE THE FOLLOWING INSPECTIONS AND TEST AS A MINIMUM:

   OVERHEAD INSTALLATION AND HYDROSTATIC TEST - 200 PSI FOR TWO HOURS. FINAL FIRE SPRINKLER AND UNDERGROUND INSPECTIONS.

   TO SCHEDULE INSPECTIONS, CALL THE BUILDING DEPARTMENT ON THE MORNING OF THE INSPECTION BETWEEN 7:00 A.M. AND 7:30 A.M. (760) 323-8242 EXTENSION "0".

3. WATER FLOW SWITCH AND ALARM. A WATER FLOW SWITCH SHALL BE INSTALLED IN EVERY DWELLING UNTIL FIRE SPRINKLER SYSTEM. THE SYSTEM SHALL INCLUDE:

   AN APPROVED AUDIBLE SPRINKLER FLOW ALARM (WHEELOCK HORN/STROBE # MT4-115-WH-VFR WITH WBB BACK BOX OR EQUAL) SHALL BE PROVIDED ON THE EXTERIOR OF THE BUILDING IN AN APPROVED LOCATION. THE HORN/STROBE SHALL BE OUTDOOR-RATED.

★ RESIDENTIAL SMOKE ALARMS (KIDDE SM120X RELAY / POWER SUPPLY MODULE CONNECTED TO MULTI-STATION KIDDE SMOKE ALARMS OR EQUAL AND FIRE SPRINKLER FLOW SWITCH) SHALL BE INTERCONNECTED SO THAT OPERATION OF ANY SMOKE ALARM OR FIRE SPRINKLER FLOW SWITCH CAUSES ALL SMOKE ALARMS WITHIN THE DWELLING TO SOUND AND ACTIVATE THE EXTERIOR HORN/STROBE. THE WIRTING OF THIS SYSTEM SHALL IN ACCORDANCE WITH KIDDE SM 120X RELAY / POWER SUPPLY MODULE MANUAL AND FIGURE 2 (SEE ATTACHED). THE "120 VOLT DEVICE WI RED TO TURN ON WHEN ALARM SOUNDS" IS THE EXTERIOR HORN/STROBE. THE "PULL FOR FIRE" DEVICE IS THE FIRE SPRINKLER FLOW SWITCH.

SCOPE OF WORK

1. INSTALL NEW FIRE PROTECTION SYSTEM IN NEW HOME.
2. ALL PIPE TO BE NEW AND U.L. LISTED FOR USE IN FIRE PROTECTION SYSTEMS.
3. NO PENETRATIONS THROUGH RATED WALLS.
4. FITTING CLASS AND TYPE SHALL MEET OR EXCEED NFPA 13D (2013) AND COUNTY. APPROVAL AND LISTEDFOR USE IN FIRE PROTECTION.

MATERIAL NOTES

1. ALL PIPE TO BE BLAZEMASTER CPVC PIPE AND CONCEALED.
2. HEADS IN RESIDENTIAL AREAS TO BE VIKING VK488 3.0 K MODELS AND SPACED AT 12' X 12'. UNLESS OTHERWISE STATED.
3. HEADS IN GARAGE AREA ARE VIKNG VK 461 2.8 K. AND SPACED AT 130 SQFT.
4. RISER TO BE 1" BLAZEMASTER CPVC AND CONCEALED IN WALL WITH ACCESS PANEL.
5. ALL PIPE SUPPORTS ARE TO BE PER NFPA #13D, 2013 ED. REQUIREMENTS. HANGERS TO BE PLACED NO MORE THAN 6'-0" O.C.
6. ALL MATERIALS ARE TO BE UL LISTED. ALL WORK IS TO BE DONE IN ACCORDANCE WITH NFPA STANDARDS.
7. ALL HEAD DROPS TO BE 1".
8. A SPRINKLER BOX CONTAINING ONE OF EACH SPRINKLER HEAD TYPE INSTALLED IN THE BUILDING SHOULD BE LOCATED ADJACENT TO THE RISER, THE BOX SHOULD INCLUDE THE INSTALLERS NAME AND TELEPHONE NUMBER

Units Summary

Diameter Units	Inches
Length Units	Feet
Flow Units	US Gallons per Minute
Pressure Units	Pounds per Square Inch

Note: Fitting Legend provides equivalent pipe lengths for fittings types of various diameters. Equivalent lengths shown are standard for actual diameters of Sched 40 pipe and CFactors of 120 except as noted with *. The fittings marked with a * show equivalent lengths values supplied by manufacturers based on specific pipe diameters and CFactors and they require no adjustment. All values for fittings not marked with a * will be adjusted in the calculation for CFactors of other than 120 and diameters other than Sched 40 per NFPA.

Units Summary

Diameter Units	Inches
Length Units	Feet
Flow Units	US Gallons per Minute
Pressure Units	Pounds per Square Inch

Note: Fitting Legend provides equivalent pipe lengths for fittings types of various diameters. Equivalent lengths shown are standard for actual diameters of Sched 40 pipe and CFactors of 120 except as noted with *. The fittings marked with a * show equivalent lengths values supplied by manufacturers based on specific pipe diameters and CFactors and they require no adjustment. All values for fittings not marked with a * will be adjusted in the calculation for CFactors of other than 120 and diameters other than Sched 40 per NFPA.

Series 007

Double Check Valve Assemblies

Sizes: ½" – 3" (15 – 80mm)

Series 007 Double Check Valve Assemblies shall be installed at referenced cross-connections to prevent the backflow of polluted water into the potable water supply. Only those cross-connections identified by local inspection authorities as non-health hazard shall be allowed the use of an approved double check valve assembly.

Check with local authority having jurisdiction regarding vertical orientation, frequency of testing or other installation requirements.

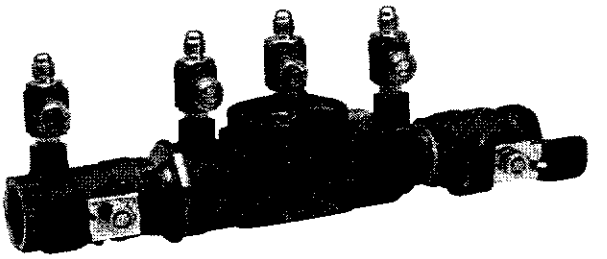
The valve shall meet the requirements of ASSE Std. 1015 and AWWA Std. C510. Approved by the Foundation for Cross-Connection Control and Hydraulic Research at the University of Southern California.

Features

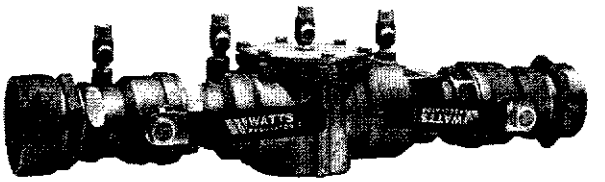
- Ease of maintenance — only one cover
- Top entry
- Replaceable seats and seat discs
- Modular construction
- Compact design
- Cast bronze body construction — ½" – 2" (15 – 50mm)
- Fused epoxy coated cast iron body — 2½" – 3" (65 – 80mm)
- Top mounted ball valve test cocks
- Low pressure drop
- No special tools required for servicing
- ½" – 1" (15 – 25mm) have tee handles

Specifications

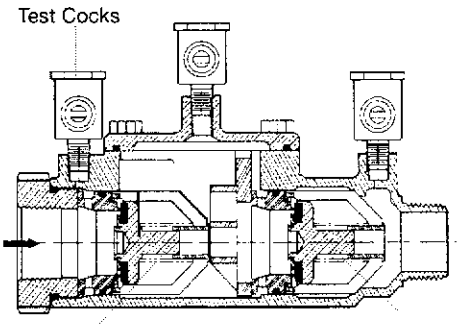
A Double Check Valve Assembly shall be installed at each noted location. The assembly shall consist of two positive seating check modules with captured springs and rubber seat discs. The check module seats and seat discs shall be replaceable. Service of all internal components shall be through a single bronze or stainless steel access cover secured with stainless steel bolts. The assembly shall also include two resilient seated isolation valves; four top mounted, resilient seated test cocks. The assembly shall meet the requirements of ASSE Std. 1015 and AWWA Std. C510. Approved by the Foundation for Cross-Connection Control and Hydraulic Research at the University of Southern California. Assembly shall be a Watts Series 007.



¾" (20mm) 007M3QT



2" (50mm) 007M1QT HC



The 007 Series features a modular design concept which facilitates complete maintenance and assembly by retaining the spring load.

Now Available
WattsBox Insulated Enclosures.
For more information, send for literature ES-WB.

***IMPORTANT:** INQUIRE WITH GOVERNING AUTHORITIES FOR LOCAL INSTALLATION REQUIREMENTS*

Watts product specifications in U.S. customary units and metric are approximate and are provided for reference only. For precise measurements, please contact Watts Technical Service. Watts reserves the right to change or modify product design, construction, specifications, or materials without prior notice and without incurring any obligation to make such changes and modifications on Watts products previously or subsequently sold.

WATTS®

Pressure — Temperature

½" – 2" (15 – 50mm)

Temperature Range: 33°F – 180°F (0.5°C – 82°C).

Maximum Working Pressure: 175psi (12.1 bar).

2½" – 3" (65 – 80mm)

Temperature Range: 33°F – 110°F (0.5°C – 43°C) continuous, 140°F (60°C) intermittent.

Maximum Working Pressure: 175psi (12.1 bar).

Standards

ASSE Std. 1015, AWWA Std. C510

IAPMO PS31, CSA B64.5

Approvals

† ASSE, AWWA, IAPMO, CSA, UPC

▲ Approved by the Foundation for Cross-Connection Control and Hydraulic Research at the University of Southern California.

• Models LF and S are not listed.

◆ UL Classified (LF models only) ¾" – 2" (20 – 50mm) (except 007M3LF)

◆ UL Classified with OSY gate valves (2½" and 3" horizontal only.)

* Horizontal and vertical "flow up" approval on all sizes

Suffix:

S - bronze strainer

LF - without shutoff valves

LH - locking handle ball valves (open position)

SH - stainless steel ball valve handles

HC - 2½" inlet/outlet fire hydrant fittings (2" valve)

Prefix:

U - Union connections

2½" – 3" (65 – 80mm)

Suffix:

NRS - non-rising stem resilient seated gate valves

OSY - UL/FM outside stem and yoke resilient seated gate valves

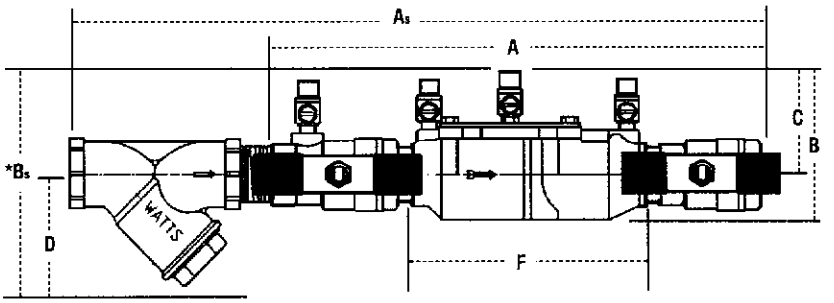
LF - without shutoff valves

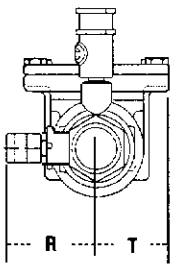
QT-FDA - FDA epoxy coated quarter-turn ball valves

Dimensions – Weights

Models

Sizes: ½" – 2" (15 – 50mm)





***Subscript 'S' = strainer model**

Suffix HC — Fire Hydrant Fittings dimension "A" = 23½" (594mm)

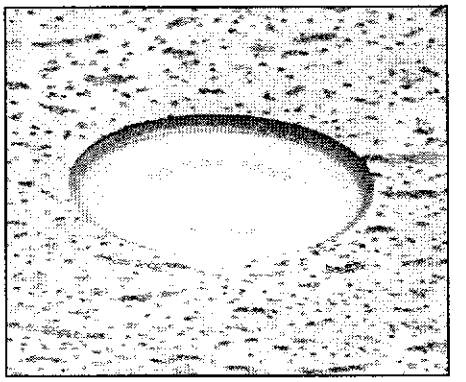
FREEDOM® RESIDENTIAL CONCEALED PENDENT SPRINKLER VK488 (K3.0)

The Viking Corporation, 210 N Industrial Park Drive, Hastings MI 49058
Telephone: 269-945-9501 Technical Services: 877-384-5464 Fax: 269-818-1680 Email: techsvcs@vikingcorp.com

1. DESCRIPTION



Viking Freedom® Residential Concealed Pendent Sprinkler VK488 is a small high-sensitivity solder link and lever residential sprinkler designed for installation on concealed pipe systems where the appearance of a smooth ceiling is desired. The orifice design, with a K-Factor of 3.0 (43.2 metric*), allows the sprinkler's efficient use of available water supplies for the hydraulically designed fire-protection system. The operating element and special deflector characteristics meet the challenges of residential sprinkler standards.

The sprinkler is pre-assembled with a threaded adapter for installation with a low-profile small-diameter cover assembly installed flush to the ceiling. The two-piece design allows installation and testing of the sprinkler prior to installation of the cover plate. The "push-on", "thread-off" design of the concealed cover plate assembly allows easy installation of the cover plate after the system has been tested and the ceiling finish has been applied, while also providing up to ½" (12.7 mm) of vertical adjustment. The cover assembly can be removed and reinstalled, allowing temporary removal of ceiling panels without taking the sprinkler system out of service or removing the sprinkler.

2. LISTINGS AND APPROVALS

c(UL)us **cULus Listed:** Category VKKW
Refer to the Approval Chart on page 157c and Design Criteria on page 157d for cULus Listing requirements that must be followed.

3. TECHNICAL DATA

Specifications:
Available since 2013.
Minimum Operating Pressure: Refer to the Approval Chart.
Maximum Working Pressure: 175 psi (12 bar). Factory tested hydrostatically to 500 psi (34.5 bar).
Thread size: 1/2" (15 mm) NPT
Nominal K-Factor: 3.0 U.S. (43.2 metric*)

* Metric K-factor measurement shown is in Bar. When pressure is measured in kPa, divide the metric K-factor shown by 10.0.

Material Standards:
Sprinkler Body: Brass UNS-C84400 or QM Brass
Deflector: Phosphor Bronze UNS-C51000
Deflector Pins: Stainless Steel UNS-S30200
Button: Brass UNS-C36000
Seat Assembly: Brass UNS-C31600
Compression Screw: Brass UNS-C36000
Fusible Element Assembly: Beryllium Nickel, coated with black acrylic paint
Levers: Stainless Steel UNS-S31600
Lever Bar: Copper Alloy UNS-C72500
Belleville Spring Sealing Assembly: Nickel Alloy, coated on both sides with PTFE Tape
Cover Adapter: Cold Rolled Steel UNS-G10080, Finish: Clear Chromate over Zinc Plating
Shipping Cap: Polyethylene

Viking Technical Data may be found on The Viking Corporation's Web site at http://www.vikinggroupinc.com. The Web site may include a more recent edition of this Technical Data Page.

Cover Plate Materials:
Cover Plate Assembly: Copper UNS-C11000 and Brass UNS-C26800
Spring: Beryllium Nickel
Solder: Eutectic

Ordering Information: (Also refer to the current Viking price list.)
Viking Freedom® Residential Concealed Pendent Sprinkler VK488 and Cover Plate Assembly must be ordered separately:

Replaces page 157a-e, dated August 2, 2012.
(Added square cover plate 15394)

VIKING®

TECHNICAL DATA

FREEDOM® RESIDENTIAL CONCEALED PENDENT SPRINKLER VK488 (K3.0)

The Viking Corporation, 210 N Industrial Park Drive, Hastings MI 49058
Telephone: 269-945-9501 Technical Services: 877-384-5464 Fax: 269-818-1680 Email: techsvcs@vikingcorp.com

Sprinkler: Part No. 18325 (includes a 165°F (74°C) rated sprinkler with a protective plastic cap covering the unit).

Cover Plate Assembly: Base Part No. 13504 (2-3/4" diameter), Base Part No. 13642 (3-5/16" diameter), No. 15394 (square cover plate, 3-5/16" diameter)

Specify finish and temperature rating of the cover plate assembly by adding the appropriate suffixes for the finish and the cover temperature rating to the base part number:

Finish Suffix: Polished Chrome = F, Brushed Chrome = F-/B, Bright Brass = B, Antique Brass = B-/A, Brushed Brass = B-/B, Brushed Copper = E-/B, Painted White = M-/W, Painted Ivory = M-/I, Painted Black = M-/B

Temperature Suffix: 135 °F (57 °C) = A

For example, cover 13504 with a Polished Chrome finish and a 135 °F (57 °C) temperature rating = 13504FA.

Available Finishes And Temperature Ratings: Refer to Table 1.

Accessories: (Also refer to the "Sprinkler Accessories" section of the Viking data book.)

Sprinkler Wrenches:**

A. Heavy Duty Part No. 13623W/B (available since 2006), or
B. Head Cabinet Wrench Part No. 13619*** (available since 2006)
C. Optional Concealed Cover Plate Installer Tool Part No. 14412 (available since 2007)
D. Optional Large Concealed Cover Plate Installer Tool Part No. 14867 (available since 2007)

**Requires a ½" ratchet (not available from Viking). ***Also optional for removal of the protective cap. Ideal for sprinkler cabinets.

Sprinkler Cabinet: Part No. 01731A (available since 1971)

4. INSTALLATION

Refer to appropriate NFPA Installation Standards.

5. OPERATION

During fire conditions, when the temperature around the sprinkler approaches its operating temperature, the cover plate detaches, releasing the deflector. Continued heating of the exposed sprinkler causes the fusible element to disengage releasing the sealing assembly. Water flowing through the sprinkler orifice strikes the deflector, forming a uniform spray pattern over a specific area of coverage determined by the water supply pressure at the sprinkler to extinguish or control the fire.

6. INSPECTIONS, TESTS AND MAINTENANCE

Refer to NFPA 25 for Inspection, Testing and Maintenance requirements.

7. AVAILABILITY

Viking Sprinkler Model VK488 is available through a network of domestic and international distributors. See The Viking Corporation web site for the closest distributor or contact The Viking Corporation.

8. GUARANTEE

For details of warranty, refer to Viking's current list price schedule or contact Viking directly.

TABLE 1: AVAILABLE SPRINKLER TEMPERATURE RATINGS AND FINISHES

Ordinary	165 °F (74 °C)	100 °F (38 °C)	135 °F (57 °C)	13504	13642	15394

Cover Plate Finishes: Polished Chrome, Brushed Chrome, Bright Brass, Antique Brass, Brushed Brass, Brushed Copper, Painted White, Painted Ivory, or Painted Black

Footnotes

[1] The sprinkler temperature rating is stamped on the deflector.

[2] Based on NFPA-13, NFPA 13R, and NFPA 13D. Other limits may apply, depending on fire loading, sprinkler location, and other requirements of the Authority Having Jurisdiction. Refer to specific installation standards.

[3] Part number shown is the base part number. For complete part number, refer to current Viking price list schedule.

TECHNICAL DATA

FREEDOM® RESIDENTIAL CONCEALED PENDENT SPRINKLER VK488 (K3.0)

The Viking Corporation, 210 N Industrial Park Drive, Hastings MI 49058
Telephone: 269-945-9501 Technical Services: 877-384-5464 Fax: 269-818-1680 Email: techsvcs@vikingcorp.com

cULus Listing Requirements:

When using Viking Residential Concealed Pendent Sprinkler VK488 for systems designed to NFPA 13D or NFPA 13R, apply the listed areas of coverage and minimum water supply requirements shown in the Approval Chart on page 157c.

For systems designed to NFPA 13: The number of design sprinklers is to be the four contiguous most hydraulically demanding sprinklers. The minimum required discharge from each of the four sprinklers is to be the greater of the following:

- The flow rates given in the Approval Chart on data page 157c for NFPA 13D and NFPA 13R applications for each listed area of coverage, or
- Calculated based on a minimum discharge of 0.1 gpm/sq. ft. over the "design area" in accordance with sections 8.5.2.1 or 8.6.2.1.2 of NFPA 13.
- Minimum distance between residential sprinklers: 8 ft. (2.4 m).

NOTICE **Concealed sprinklers must be installed in neutral or negative pressure plenums only.**

IMPORTANT: Always refer to Bulletin Form No. F_091699 - Care and Handling of Sprinklers. Also refer to pages RES1-17 for general care, installation, and maintenance information. Viking sprinklers are to be installed in accordance with the latest edition of Viking technical data, the appropriate standards of NFPA and any other similar Authorities Having Jurisdiction, and also with the provisions of governmental codes, ordinances, and standards, whenever applicable. Final approval and acceptance of all residential sprinkler installations must be obtained from the Authorities Having Jurisdiction.

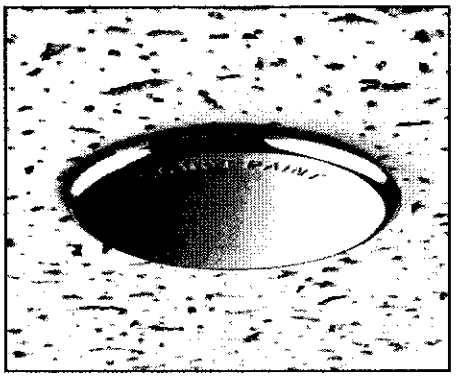
1. DESCRIPTION

Viking Mirage® Standard and Quick Response Concealed Pendent Sprinkler VK461 is a thermosensitive glass-bulb spray sprinkler designed for installation on concealed pipe systems where the appearance of a smooth ceiling is desired.

The sprinkler is pre-assembled with a threaded adapter for installation with a low-profile cover assembly that provides up to ½" (12.7 mm) of vertical adjustment. The two-piece design allows installation and testing of the sprinkler prior to installation of the cover plate. The "push-on", "thread-off" design of the concealed cover plate assembly allows easy installation of the cover plate after the system has been tested and the ceiling finish has been applied. The cover assembly can be removed and reinstalled, allowing temporary removal of ceiling panels without taking the sprinkler system out of service or removing the sprinkler.



For Light Hazard Occupancies Only

2. LISTINGS AND APPROVALS

cULus Listed: Category VNIV
FM Approved: Class 2015
NYC Approved: MEA 89-92-E, Volume 38

Refer to Approval Chart 1 and Design Criteria on page 54j for cULus Listing requirements, and refer to Approval Chart 2 and Design Criteria on page 54k for FM Approval requirements that must be followed.

3. TECHNICAL DATA

Specifications:

Available since 2006.
Minimum Operating Pressure: 7 psi (0.5 bar).
Maximum Working Pressure: 175 psi (12 bar). Factory tested hydrostatically to 500 psi (34.5 bar).
Testing: U.S.A. Patent No. 4,831,870
Thread size: 1/2" (15 mm) NPT
Nominal K-Factor: 2.8 U.S. (40.3 metric*)

*Metric K-factor measurement is shown in bar. When pressure is measured in kPa, divide the metric K-factor shown by 10.0.

Glass-bulb fluid temperature rated to -65°F (-55°C)
Patents Pending

Viking Technical Data may be found on The Viking Corporation's Web site at http://www.vikinggroupinc.com. The Web site may include a more recent edition of this Technical Data Page.

Material Standards:

Sprinkler Body: Brass UNS-C84400
Deflector: Copper UNS-C19500
Deflector Pins: Stainless Steel UNS-S30300
Bushing: Brass UNS-C36000
Bulb: Glass, nominal 3 mm diameter
Pip Cap and Insert Assembly: Copper UNS-C11000 and Stainless Steel UNS-S30400
Button: Brass UNS-C36000
Screws: 18-8 Stainless Steel
Belleville Spring Sealing Assembly: Nickel Alloy, coated on both sides with Teflon Tape
Yoke: Phosphor Bronze UNS-C51000
Cover Adapter: Cold Rolled Steel UNS-G10080, Finish: Clear Chromate over Zinc Plating

Cover Assembly Materials:

Cover: Copper UNS-C11000
Base: Brass UNS-C26000 or UNS-C26800
Springs: Nickel Alloy
Solder: Eutectic

Ordering Information: (Also refer to the current Viking price list.)

Viking Mirage® Concealed Pendent Sprinkler VK461 and Cover Plate Assembly must be ordered separately:
Sprinkler: Base Part No. 13831A
Specify sprinkler temperature rating by adding the appropriate suffix for the temperature rating to the base part number:

Replaces page 54h-m, dated May 14, 2010. (Revised finish suffixes for white, black, and ivory painted cover finishes.)

VIKING | TECHNICAL DATA | MIRAGE® STANDARD AND QUICK RESPONSE CONCEALED PENDENT SPRINKLER VK461 (K2.8)

The Viking Corporation, 210 N Industrial Park Drive, Hastings MI 49058
Telephone: 269-945-9501 Technical Services: 877-384-5464 Fax: 269-818-1680 Email: techsvcs@vikingcorp.com

Temperature Suffix (°F/°C): 155°/68° = B, 175°/79° = D, 200°/93° = E
For example, sprinkler VK461 with a 155°F/68°C temperature rating = 13831AB.

Cover Plate Assembly: Base Part No. 13504 (2-3/4" diameter), Base Part No. 13642 (3-5/16" diameter), or Base Part No. 15394 (square cover plate, 3-5/16" diameter)
Specify finish and temperature rating of the cover plate assembly by adding the appropriate suffixes for the finish and the cover temperature rating to the base part number:
Finish Suffix: Polished Chrome = F, Brushed Chrome = F-/B, Bright Brass = B, Antique Brass = B-/A, Brushed Brass = B-/B, Brushed Copper = E-/B, Painted White = M-/W, Painted Ivory = M-/I, Painted Black = M-/B
Temperature Suffix (°F/°C): 135°/57° UL (139°/59° FM) = A , 165°/74° = C
For example, cover 13504 with a Polished Chrome finish and a 165°F/74°C temperature rating = 13504FC.

Note: Square cover plate 15394 cULus Listing is for the 135°F (57°C) temperature rated cover plate only. Refer to the Approval Charts.

Available Finishes And Temperature Ratings: Refer to Table 1.

Accessories: (Also refer to the "Sprinkler Accessories" section of the Viking data book.)
Sprinkler Wrenches:**
A. Heavy Duty Wrench Part No. 14047W/B (available since 2006), or
B. Head Cabinet Wrench Part No. 14031*** (available since 2006)
C. Optional Concealed Cover Plate Installer Tool Part No. 14412 for cover 13504, or Part No. 14867 for the large diameter cover (available since 2007)

**Requires a ½" ratchet (not available from Viking). ***Also optional for removal of the protective cap. Ideal for sprinkler cabinets.

Sprinkler Cabinet: Part No. 01731A (available since 1971)

4. INSTALLATION
Refer to appropriate NFPA Installation Standards.

5. OPERATION
During fire conditions, when the temperature around the sprinkler approaches its operating temperature, the cover plate detaches. Continued heating of the exposed sprinkler causes the heat-sensitive liquid in the glass bulb to expand and the bulb to shatter, releasing the yoke, pip-cap and sealing spring assembly. Water flowing through the sprinkler orifice strikes the sprinkler deflector, forming a uniform spray pattern to extinguish or control the fire.

6. INSPECTIONS, TESTS AND MAINTENANCE
Refer to NFPA 25 for Inspection, Testing and Maintenance requirements.

7. AVAILABILITY
Viking Mirage® Concealed Pendent Sprinkler VK461 is available through a network of domestic and international distributors. See The Viking Corporation web site for the closest distributor or contact The Viking Corporation.

8. GUARANTEE
For details of warranty, refer to Viking's current list price schedule or contact Viking directly.

[5] Accepted for use, City of New York Department of Buildings, MEA Number 89-92-E, Vol. 38.

[6] The 135/139°F cover has an orange label. The 165°F cover has a white label.

[7] Standard painted finishes consist of Polyester Baked Enamel. Other paint colors are available on request with the same listings as the standard paint colors. Listings and approvals apply for any paint manufacturer. Contact Viking for additional information.

NOTE: Custom colors are indicated on a label inside the cover assembly. Refer to Figure 1.

Design Criteria - UL

cULus Listing Requirements: Mirage® Concealed Pendent Sprinkler VK461 is cULus Listed as a quick response sprinkler for installation in accordance with the latest edition of NFPA 13 for standard coverage pendent spray sprinklers as indicated below:

- Limited to Light Hazard Occupancies where allowed by the installation standards being applied, with hydraulically calculated wet systems only.
- Maximum spacing allowed is 15 ft. (4.6 m).
- Minimum spacing allowed is 6 ft. (1.8 m) unless baffles are installed in accordance with NFPA 13.
- Minimum distance from walls is 4 in. (102 mm).
- Maximum distance from walls shall be no more than one-half of the allowable distance between sprinklers. The distance shall be measured perpendicular to the wall.
- The sprinkler obstruction rules contained in NFPA 13 for standard coverage pendent spray sprinklers must be followed.

NOTE: Concealed sprinklers must be installed in neutral or negative pressure plenums only.

IMPORTANT: Always refer to Bulletin Form No. F_091699 - Care and Handling of Sprinklers. Also refer to page SR1-3 or QR1-3 for general care, installation, and maintenance information. Viking sprinklers are to be installed in accordance with the latest edition of Viking technical data, the appropriate standards of NFPA, LPCB, Assemblee Pleniere, VdS or other similar organizations, and also with the provisions of governmental codes, ordinances, and standards, whenever applicable.

Design Criteria

FM Approval Requirements:

Viking Concealed Pendent Sprinkler VK461 is FM Approved as a standard response **Non-Storage** concealed pendent sprinkler as indicated in the FM Approval Guide. For specific application and installation requirements, reference the latest applicable FM Loss Prevention Data Sheets (including Data Sheet 2-0). FM Global Loss Prevention Data Sheets contain guidelines relating to, but not limited to: minimum water supply requirements, hydraulic design, ceiling slope and obstructions, minimum and maximum allowable spacing, and deflector distance below the ceiling.

NOTE: The FM installation guidelines may differ from cULus and/or NFPA criteria.

IMPORTANT: Always refer to Bulletin Form No. F_091699 - Care and Handling of Sprinklers. Also refer to page SR1-3 for general care, installation, and maintenance information. Viking sprinklers are to be installed in accordance with the latest edition of Viking technical data, the appropriate standards of NFPA, FM Global, LPCB, Assemblee Pleniere, VdS or other similar organizations, and also with the provisions of governmental codes, ordinances, and standards, whenever applicable.

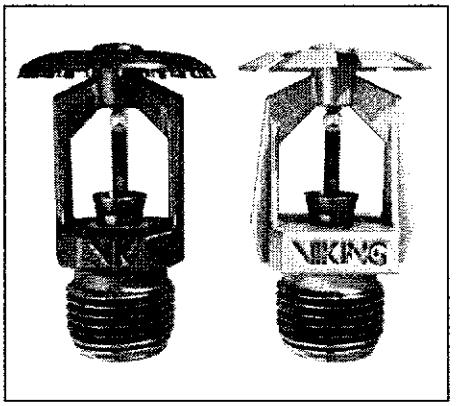
MICROFAST® AND MicrofastHP® QUICK RESPONSE UPRIGHT AND CONVENTIONAL SPRINKLERS

The Viking Corporation, 210 N Industrial Park Drive, Hastings MI 49058
Telephone: 269-945-9501 Technical Services: 877-384-5464 Fax: 269-818-1680 Email: techsvcs@vikingcorp.com

1. DESCRIPTION



Viking Microfast® and MicrofastHP® Quick Response Upright and Conventional (Old Style) Sprinklers are small, thermosensitive, glass-bulb spray sprinklers available in several different finishes, temperature ratings, and K-Factors to meet design requirements. The special Polyester, Polytetrafluoroethylene (PTFE), and Electroless Nickel PTFE (ENT) coatings can be used in decorative applications where colors are desired. In addition, these coatings have been investigated for installation in corrosive atmospheres and are listed/approved as corrosion resistant as indicated in the Approval Charts. (Note: **FM Global approves the ENT coating as corrosion resistant.** FM Global has no approval classification for PTFE and Polyester coatings as corrosion resistant.)

2. LISTINGS AND APPROVALS

cULus Listed: Category VNIV

FM Approved: Classes 2002 and 2020

NYC Approved: Calendar Number 219-76-SA and MEA 89-92-E, Volume 16

ABS Certified: Certificate 04-HS407984B-PDA

VdS Approved: Certificates G4060054, G4060056, G4880046, G4930039, and G4980020

LPC Approved: Ref. No. 096e/03, TE30401, and TE30872

CE Certified: Standard EN 12259-1, EC-certificate of conformity 0832-CPD-2001, 0832-CPD-2003, 0786-CPD-40131, 0786-CPD-40171, and 0786-CPD-40278

MED Certified: Standard EN 12259-1, EC-certificate of conformity 0832-MED-1003 and 0832-MED-1008

NOTE: Other International approval certificates are available upon request.

Refer to Approval Chart 1 and Design Criteria on pages 51c-d for cULus Listing requirements, and refer to Approval Chart 2 and Design Criteria on page 51e for FM Approval requirements that must be followed.

3. TECHNICAL DATA

Viking Technical Data may be found on The Viking Corporation's Web site at http://www.vikinggroupinc.com. The Web site may include a more recent edition of this Technical Data Page.

Specifications:

Available since 1987.

Minimum Operating Pressure: 7 psi (0.5 bar)*

Maximum Working Pressure: Sprinklers VK315 and VK340 are rated for use with water working pressures ranging from the minimum 7 psi (0.5 bar) up to 250 psi (17 bar) for high-pressure systems. High-pressure (HP) sprinklers can be identified by locating "250" stamped on the deflector. All other Part Nos. not mentioned above are rated to a maximum 175 psi (12 bar) wwp.

Factory tested hydrostatically to 500 psi (34.5 bar)

Testing: U.S.A. Patent No. 4,831,870

Thread size: Refer to the Approval Charts

Nominal K-Factor: Refer to the Approval Charts

Glass-bulb fluid temperature rated to -65 °F (-55 °C)

Overall Length: Refer to the Approval Charts

*cULus Listing, FM Approval, and NFPA 13 installs require a minimum of 7 psi (0.5 bar). The minimum operating pressure for LPCB and CE Approvals ONLY is 5 psi (0.35 bar).

Material Standards:

Frame Casting: Brass UNS-C84400 or QM Brass for Sprinklers 12978, 06766B, 07060, and 12281. Brass UNS-C84400 for all other sprinklers.

Deflector: Brass UNS-C23000 or Copper UNS-C19500 for Sprinklers 12978, 06764B, and 12281. Copper UNS-C19500 for Sprinklers 06665B, 07060, and 14817. Brass UNS-C26000 for all other Sprinklers.

Bushing (for Sprinklers 06719B, 06717B, and 12286): Brass UNS-C36000

Bulb: Glass, nominal 3 mm diameter

VIKING®

TECHNICAL DATA

MICROFAST® AND MicrofastHP® QUICK RESPONSE UPRIGHT AND CONVENTIONAL SPRINKLERS

The Viking Corporation, 210 N Industrial Park Drive, Hastings MI 49058
Telephone: 269-945-9501 Technical Services: 877-384-5464 Fax: 269-818-1680 Email: techsvcs@vikingcorp.com

Belleville Spring Sealing Assembly: Nickel Alloy, coated on both sides with PTFE Tape
Screw: Brass UNS-C36000
Pip Cap and Insert Assembly: Copper UNS-C11000 and Stainless Steel UNS-S30400
For PTFE Coated Sprinklers: Belleville Spring-Exposed, Screw-Nickel Plated, Pip Cap-PTFE Coated
For Polyester Coated Sprinklers: Belleville Spring-Exposed
For ENT Coated Sprinklers: Belleville Spring-Exposed, Screw and Pipcap - ENT plated.

Ordering Information: (Also refer to the current Viking price list.)
Order Microfast® and MicrofastHP® Quick Response Upright and Conventional Sprinklers by first adding the appropriate suffix for the sprinkler finish and then the appropriate suffix for the temperature rating to the sprinkler base part number.
Finish Suffix: Brass = A, Chrome = F, White Polyester = M-/W, Black Polyester = M-/B, and Black PTFE = N, ENT = JN
Temperature Suffix (°F/°C): 135°/57° = A, 155°/68° = B, 175°/79° = D, 200°/93° = E, and 286°/141° = G
For example, sprinkler VK300 with a 1/2" thread, Brass finish and a 155 °F/68 °C temperature rating = Part No. 12978AB

Available Finishes And Temperature Ratings: Refer to Table 1.

Accessories: (Also refer to the "Sprinkler Accessories" section of the Viking data book.)

Sprinkler Wrench: Standard Wrench: Part No. 10896W/B (available since 2000)

Sprinkler Cabinets:
A. Six-head capacity: Part No. 01724A (available since 1971)
B. Twelve-head capacity: Part No. 01725A (available since 1971)

4. INSTALLATION
Refer to appropriate NFPA Installation Standards.

5. OPERATION
During fire conditions, the heat-sensitive liquid in the glass bulb expands, causing the glass to shatter, releasing the pip cap and sealing spring assembly. Water flowing through the sprinkler orifice strikes the sprinkler deflector, forming a uniform spray pattern to extinguish or control the fire.

6. INSPECTIONS, TESTS AND MAINTENANCE
Refer to NFPA 25 for Inspection, Testing and Maintenance requirements.

7. AVAILABILITY
The Viking Microfast® and MicrofastHP® Quick Response Upright and Conventional Sprinklers are available through a network of domestic and international distributors. See The Viking Corporation web site for the closest distributor or contact The Viking Corporation.

8. GUARANTEE
For details of warranty, refer to Viking's current list price schedule or contact Viking directly.

TABLE 1: AVAILABLE SPRINKLER TEMPERATURE RATINGS AND FINISHES

Ordinary	135 °F (57 °C)	100 °F (38 °C)	Orange
Ordinary	155 °F (68 °C)	100 °F (38 °C)	Red
Intermediate	175 °F (79 °C)	150 °F (65 °C)	Yellow
Intermediate	200 °F (93 °C)	150 °F (65 °C)	Green
High	286 °F (141 °C)	225 °F (107 °C)	Blue

Sprinkler Finishes: Brass, Chrome, White Polyester, Black Polyester, Black PTFE, and ENT
Corrosion-Resistant Coatings[3]: White Polyester, Black Polyester, and Black PTFE. ENT in all temperature ratings except 135 °F (57 °C)

Footnotes

[1] The sprinkler temperature rating is stamped on the deflector.
[2] Based on NFPA-13. Other limits may apply, depending on fire loading, sprinkler location, and other requirements of the Authority Having Jurisdiction. Refer to specific installation standards.
[3] The corrosion-resistant coatings have passed the standard corrosion test required by the approving agencies indicated on pages 51c-e. These tests cannot and do not represent all possible corrosive environments. Prior to installation, verify through the end-user that the coatings are compatible with or suitable for the proposed environment. For automatic sprinklers, the coatings indicated are applied to the exposed exterior surfaces only. Note that the spring is exposed on sprinklers with Polyester, ENT, and PTFE coatings. For ENT coated automatic sprinklers, the waterway is coated.

DESIGN CRITERIA cULus

(See Note 1 Approval Chart 1 on page QR1-2)

cULus Listing Requirements:

Microfast® and MicrofastHP® Quick Response Upright and Conventional Sprinklers are cULus Listed as indicated in Approval Chart 1 for installation in accordance with the latest edition of NFPA 13 for standard spray sprinklers, or old style (conventional) sprinklers.

- Designed for use in Light and Ordinary Hazard occupancies *(exception: small orifice sprinklers are limited to Light Hazard where allowed by the installation standards being applied, with hydraulically calculated wet systems only).*
- The sprinkler installation rules contained in NFPA 13 for standard spray upright sprinklers must be followed. For conventional sprinklers, refer to the installation guidelines for old style (conventional) sprinklers.

IMPORTANT: Always refer to Bulletin Form No. F_091699 - Care and Handling of Sprinklers. Also refer to page QR1-3 for general care, installation, and maintenance information. Viking sprinklers are to be installed in accordance with the latest edition of Viking technical data, the appropriate standards of NFPA, LPCB, APSAD, VdS or other similar organizations, and also with the provisions of governmental codes, ordinances, and standards, whenever applicable.

[2] Metric K-factor measurement shown is when pressure is measured in Bar. When pressure is measured in kPa, divide the metric K-factor shown by 10.0.

[3] This table shows the FM Approvals available at the time of printing. Check with the manufacturer for any additional approvals.

[4] FM Approved as quick response **Non-Storage** pendent sprinklers. For specific application and installation requirements, reference the latest applicable FM Loss Prevention Data Sheets (including Data Sheet 2-0).

[5] Other colors are available on request with the same Approvals as the standard colors.

[6] The sprinkler orifice is bushed.

[7] The 1/2" NPT Large Orifice Sprinkler is Listed and Approved for retrofit only

[8] FM approved as corrosion resistant.

Design Criteria - FM

FM Approval Requirements:

The sprinklers indicated in Approval Chart 2 are FM Approved as quick response **Non-Storage** upright sprinklers as indicated in the FM Approval Guide. For specific application and installation requirements, reference the latest applicable FM Loss Prevention Data Sheets (including Data Sheet 2-0). FM Global Loss Prevention Data Sheets contain guidelines relating to, but not limited to: minimum water supply requirements, hydraulic design, ceiling slope and obstructions, minimum and maximum allowable spacing, and deflector distance below the ceiling.

NOTE: The FM installation guidelines may differ from cULus and/or NFPA criteria.

IMPORTANT: Always refer to Bulletin Form No. F_091699 - Care and Handling of Sprinklers. Also refer to page QR1-3 for general care, installation, and maintenance information. Viking sprinklers are to be installed in accordance with the latest edition of Viking technical data, the appropriate standards of NFPA, FM Global, LPCB, APSAD, VdS or other similar organizations, and also with the provisions of governmental codes, ordinances, and standards, whenever applicable.

Viking Plastics

BlazeMaster® CPVC Pipe

Features

- **Sizes Available (Nominal):** 3/4" (DN20) through 3" (DN80) pipe diameters, with a Standard Dimension Ratio (SDR) of 13.5 as specified in ASTM F442.
- **Environmental Specifications:** Indoor use only. Maximum Ambient Temperature: 150°F (65°C)
- **Hazen-Williams C Value:** 150
- **Pressure Data: Working Pressure:** 175 PSI (12.1 bar) at 150°F (65°C)
- **Specifications:**
  - Meets NFPA 13R and 13D standards for residential occupancies as well as NFPA 13 standards for light hazard occupancies.
  - Pipe meets or exceeds ASTM F442.
  - Certified by NSF International for potable water services.
  - CPVC pipe from Viking Plastics use compound cell class 23547 (demonstrated highest structural properties).
  - cULus Listed, FM Approved, New York City (MEA) Approved, LPCB Approved.

VIKING®

CPVC Pipe Product Specifications

Corrosion resistant CPVC fire sprinkler pipe, when installed in strict accordance with the manufacturer's design and installation instructions, is UL and c-UL Listed by Underwriters Laboratories for use in the following:

- Meets NFPA 13R and 13D standards for residential occupancies as well as NFPA 13 standards for light hazard occupancies.
- Residential occupancies up to and including four stories in height as defined by NFPA 13R.
- Residential occupancies as defined in the Standard for Sprinkler Systems in One and Two Family Dwellings, NFPA 13D.
- Installation of private fire service mains and their appurtenances, NFPA 24.

CPVC fire sprinkler pipe from Viking Plastics shall be employed in wet pipe systems only and are not listed for outdoor use. CPVC pipe must never be used in a system using compressed air or other gases.

CPVC pipe from Viking Plastics also carries the following enhanced listings and approvals:

- According to UL Listing
  - Can be flush at return air plenums
  - Exposed system risers NFPA 13D, 13R
  - Exposed basement NFPA 13D (solid wood joist)
  - Extended coverage (exposed)
    - 20' spacing on pendent in lieu of 15'
    - 18' spacing on sidewall in lieu of 14'
  - Use with combustible concealed sprinklers
  - Tyco attic sprinkler head (to protect the floor below)
  - Tyco attic sprinkler head with wet system piping (feed main and ridge installation)
  - Exposed sidewall sprinkler listing for exposed pipe & fittings
    - 24' extended coverage sidewall sprinkler, 12" drop, 155°F sprinkler head
    - 18' extended coverage sidewall sprinkler, 12" drop, 165°F sprinkler head
    - 16' extended coverage sidewall sprinkler, 12" drop, 175°F sprinkler head
    - 14' standard coverage sidewall sprinkler, 12" drop, 200°F sprinkler head
- Factory Mutual Approved*
  - Factory Mutual Approval exposed
  - Factory Mutual Approval above drop-in ceilings
  - Factory Mutual Approval exposed w/Soffi-Steel soffiting covering system

New and enhanced listings and approvals are being pursued. Always check with the appropriate Listing and Approval agency for details on current listing parameters.

CPVC pipe meets all applicable standards for pressure rated application as required in ANSI-NSF Standard 14 and complies with ANSI-NSF Standard 61 for health effects and are marked with the NSF-pw end use marking.

All CPVC fire sprinkler pipe shall be Listed by Underwriters Laboratories for wet pipe systems, and shall carry a rated working pressure of 175 psi @ 150°F (12 bar @ 65.5°C). *The FM Approval is limited to use in wet pipe fire protection sprinkler systems for light hazard occupancies in both concealed and exposed applications with certain restrictions.

Piping must always be installed in strict accordance to the manufacturer's DESIGN AND INSTALLATION GUIDE, including product storage and handling, joining methods, supporting and bracing, expansion and contraction allowance and testing, etc. National Fire Protection Association (NFPA) Standards 13, 13D, and 13R must be referenced for design and installation requirements in conjunction with the installation instructions.

All CPVC fire sprinkler pipe from Viking Plastics is manufactured in the USA. All CPVC pipe shall be packaged immediately after its manufacture to prevent damage and shall be stored indoors after production, at the manufacturing site, until shipped from the factory. The pipe shall bear the logo of the listing agencies, and shall carry the National Sanitation Foundation (NSF) seal of approval for potable water applications.

CPVC products are intended for use in areas where the maximum ambient temperature does not exceed 150°F (65.5°C). If the ambient temperature is expected to exceed this limitation, refer to the manufacturer's DESIGN AND INSTALLATION GUIDE for additional information on methods to reduce the pipe exposure temperatures. CPVC pipe is not intended to be installed in outdoor applications. CPVC pipe is intended to be used in wet pipe systems only and have not been investigated for use in dry pipe systems. Special installation and design criteria relative to pipe hanger spacings, piping and sprinkler restraint, sprinkler temperature rating, piping locations, testing procedures and friction loss characteristics are specified in the manufacturer's installation instructions provided with the pipe. The manufacturer's installation instructions should be reviewed and the Authority Having Jurisdiction consulted before installation.

C. HANGERS AND STRAPS

Fig. 29 - Double Offset Hanger & Restrainer for CPVC Plastic Pipe

c UL us LISTED

Size Range — Available in 3/4" and 1" pipe sizes

Material — Pre-Galvanized Steel

Function — Intended to perform as a hanger and restrainer for CPVC, plastic fire sprinkler pipe. Provides double offset 1 ½" x 1 ½" from mounting surface. This design will ease installation by eliminating the need for wood block extension and allow retro-fit attachment of hanger to sprinkler pipe.

Features —

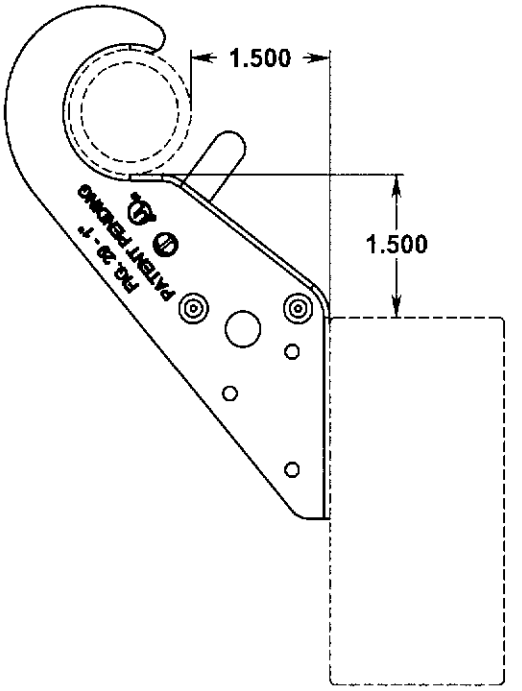
- Thumb tab provides protection to restrain pipe in rough job site conditions. Tab is not required to be bent for listed installation.
- Offset edge eliminates abrasion.
- Attaches easily to wood structure with two special #10 x 1 hex head self-threading screws furnished with product.
- Can be used as a single offset hanger by aligning "dimples" with top of mounting surface and utilizing two fasteners in two of the three holes provided.

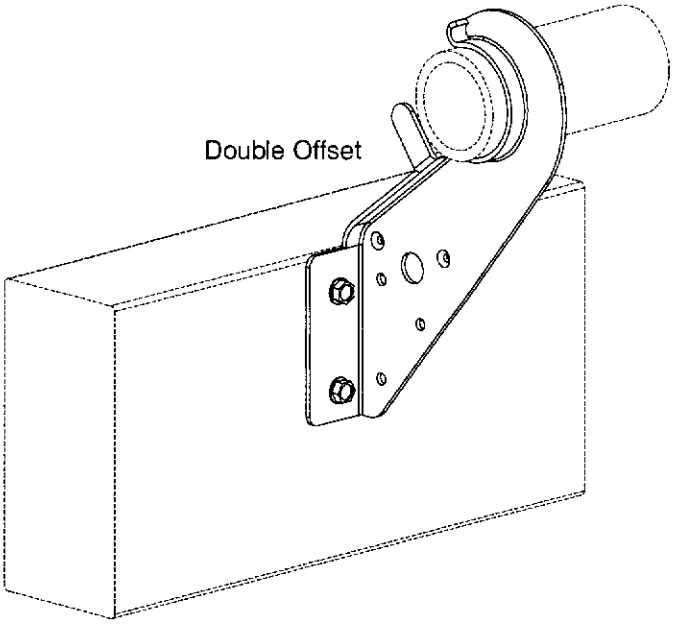
Approvals — Underwriters' Laboratories Listed in the USA **(UL)** and Canada **(cUL)** as a hanger and restrainer to support fire sprinkler systems. Meets and exceeds requirements of NFPA 13, 13R and 13D.

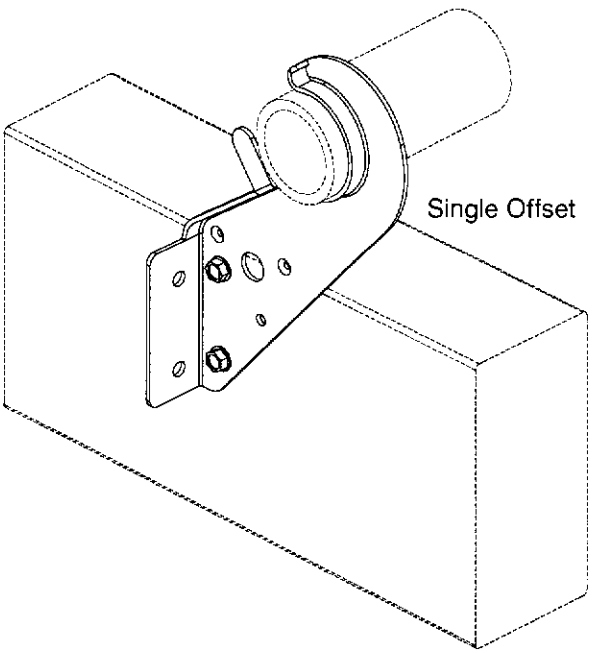
Finish — Pre-Galvanized

Order By — Figure number and pipe size.

PATENT PENDING



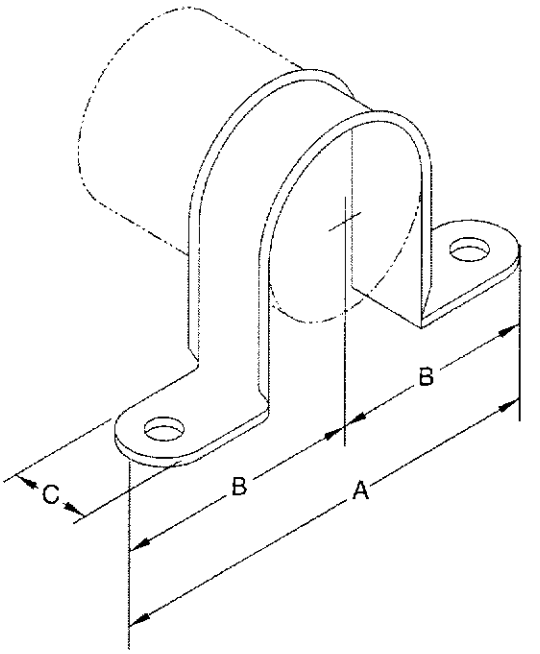




Install using a rechargeable electric drill fitted with a 5/16" socket attachment with the special hex head self-tapping screws provided. Install screws until they bottom out. Pipe can be "snapped" into hanger before or after installation of the screws to the mounting surface. "Thumb tab" may be bent up to provide additional protection to the pipe, but is not required for performance of the hanger / restrainer function.

Fig. 23 - Hanger for CPVC Plastic Pipe Double Fastener Strap Type

c UL US LISTED



Size Range — 3/4" thru 3" CPVC pipe

Material — Pre-Galvanized Steel

Function — Intended to perform as a hanger/restrainer to support CPVC piping used in automatic fire sprinkler systems. Fig. 23 can be installed on the top, bottom or side of a beam. The Fig. 23 also functions as a restrainer to prevent the upward movement of the sprinkler head during activation.

Approvals — Underwriters' Laboratories Listed in the USA **(UL)** and Canada **(cUL)** sizes 3/4" thru 2" to support fire sprinkler piping. May be installed in wood using fasteners supplied with product, or into minimum 20 gauge steel using (2) 1/4" x 1" tek type screw. Meets and exceeds the requirements of NFPA 13, 13R and 13D.

Features — Fig. 23 incorporates features which protect the pipe and ease installation. The flared edge design protects the CPVC pipe from any rough surface. It also incorporates snap restrainers allowing easier and faster installation. Easily attaches to the building structure using the two UL Listed hex head self threading screws* furnished with the product. It is recommended that rechargeable electric drills fitted with a hex socket attachment be used as installation tools. No impact tools (such as a hammer) are allowed. Damage has been known to result from installations using impact type tools. No pre-drilling of a pilot hole in wood is required.

Finish — Pre-Galvanized

Order By — Figure number and pipe size

*** Hardened hex head self threading screw is furnished with the product and is the minimum fastener size acceptable.**

Fig. 20 - Standard Pipe Strap
Fig. 20S - Flush Mount Pipe Strap

Size Range — 1/2" thru 8" pipe

Material — Carbon Steel

Function — Recommended for supporting pipe with fittings vertically or horizontally to walls or ceiling. Fig. 20S will support pipe flush with mounting surface.

Approvals — Conforms to Federal Specification WW-H-171E, Type 26 and Manufacturers Standardization Society SP-69, Type 26.

Finish — Plain

Note — Available in Electro-Galvanized and HDG finish or Stainless Steel materials.

Order By — Figure number, pipe size, material and finish

D. VALVES AND DEVICES

For Non-Health Hazard Applications

Job Name _____ Contractor _____

Job Location _____ Approval _____

Engineer _____ Contractor's P.O. No. _____

Approval _____ Representative _____

Series 007

Double Check Valve Assemblies

Sizes: ½" – 3" (15 – 80mm)

Series 007 Double Check Valve Assemblies shall be installed at referenced cross-connections to prevent the backflow of polluted water into the potable water supply. Only those cross-connections identified by local inspection authorities as non-health hazard shall be allowed the use of an approved double check valve assembly.

Check with local authority having jurisdiction regarding vertical orientation, frequency of testing or other installation requirements.

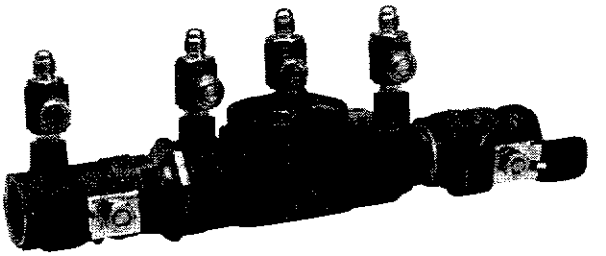
The valve shall meet the requirements of ASSE Std. 1015 and AWWA Std. C510. Approved by the Foundation for Cross-Connection Control and Hydraulic Research at the University of Southern California.

Features

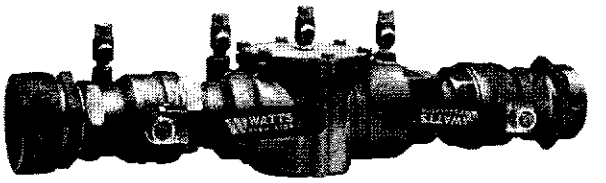
- Ease of maintenance — only one cover
- Top entry
- Replaceable seats and seat discs
- Modular construction
- Compact design
- Cast bronze body construction — ½" – 2" (15 – 50mm)
- Fused epoxy coated cast iron body — 2½" – 3" (65 – 80mm)
- Top mounted ball valve test cocks
- Low pressure drop
- No special tools required for servicing
- ½" – 1" (15 – 25mm) have tee handles

Specifications

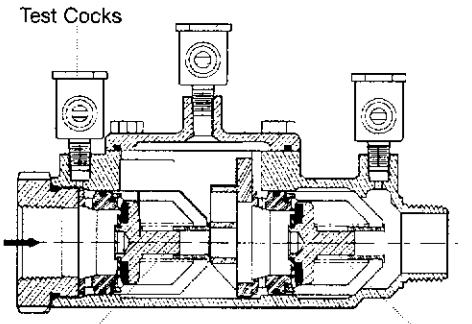
A Double Check Valve Assembly shall be installed at each noted location. The assembly shall consist of two positive seating check modules with captured springs and rubber seat discs. The check module seats and seat discs shall be replaceable. Service of all internal components shall be through a single bronze or stainless steel access cover secured with stainless steel bolts. The assembly shall also include two resilient seated isolation valves; four top mounted, resilient seated test cocks. The assembly shall meet the requirements of ASSE Std. 1015 and AWWA Std. C510. Approved by the Foundation for Cross-Connection Control and Hydraulic Research at the University of Southern California. Assembly shall be a Watts Series 007.



¾" (20mm) 007M3QT



2" (50mm) 007M1QT HC



The 007 Series features a modular design concept which facilitates complete maintenance and assembly by retaining the spring load.

Now Available
WattsBox Insulated Enclosures.
For more information, send for literature ES-WB.

***IMPORTANT:** INQUIRE WITH GOVERNING AUTHORITIES FOR LOCAL INSTALLATION REQUIREMENTS*

Watts product specifications in U.S. customary units and metric are approximate and are provided for reference only. For precise measurements, please contact Watts Technical Service. Watts reserves the right to change or modify product design, construction, specifications, or materials without prior notice and without incurring any obligation to make such changes and modifications on Watts products previously or subsequently sold.

VIKING® TECHNICAL DATA

SPRING LOADED IN-LINE CHECK VALVE
1-1/2" & 2" MODELS K-1 & L-1

The Viking Corporation, 210 N Industrial Park Drive, Hastings MI 49058
Telephone: 269-945-9501 Technical Services 877-384-5464 Fax: 269-945-4495 Email: techsvcs@vikingcorp.com

1. DESCRIPTION

The Viking Spring Loaded In-Line Check Valve is a general purpose rubber-faced check valve approved for use in fire-service systems.
The Spring Loaded In-Line Check Valve is manufactured with a brass body, brass seat, and a rubber-faced clapper assembly.
The valve may be installed vertically or horizontally. For availability of threaded and grooved-grooved options, refer to Table 1. A tapped opening (with plug) is provided on the outlet chamber of the valve for system drain. The 1-1/2" and 2" check valves should be installed on the outlet riser of the 1-1/2" and 2" deluge valve when installing a listed and approved preaction system. Refer to preaction data pages for current riser schematic.

FEATURES

1. Low friction loss.
2. Rated to 250 psi (17.2 bar) water working pressure.
3. Can be installed vertically or horizontally.
4. ¾" NPT drain connection above the clapper.
5. 1 PSI cracking pressure

2. LISTINGS AND APPROVALS

Refer to Table 1

3. TECHNICAL DATA

Specifications

Pressure Rating - 250 psi (17.2 bar) water working pressure
Factory tested - Hydrostatically to 500 psi (34.5 bar).
Standard threaded connections - NPT
Standard grooved connections - ANSI/AWWA C606-87
Tapped Bosses - One 3/4" (19 mm) NPT:

Viking Technical Data may be found on The Viking Corporation's Web site at http://www.vikingcorp.com. The Web site may include a more recent edition of this Technical Data Page.

Material Standards

Refer to Figure 1

Ordering Information

Refer to Table 1
Manufactured 2002 -

For piping with grooved connections, the grooved-inlet/grooved-outlet style Spring Loaded In-Line Check Valve may be installed with listed grooved couplings of the appropriate pressure rating.

4. INSTALLATION

The Spring Loaded In-Line Check Valve must be installed in an area not subject to physical damage. When corrosive atmospheres and/or contaminated water supplies are present, it is the owner's responsibility to verify compatibility with the Check Valve and associated equipment.
Prior to installing the valve, thoroughly flush the water supply piping to verify that no foreign matter is present.
The Check Valve may be installed in the vertical or horizontal position in line with the directional flow arrow.

Table 1

VIKING® **TECHNICAL DATA**

SPRING LOADED IN-LINE CHECK VALVE
1-1/2" & 2" MODELS K-1 & L-1

The Viking Corporation, 210 N Industrial Park Drive, Hastings MI 49058
Telephone: 269-945-9501 Technical Services 877-384-5464 Fax: 269-945-4495 Email: techsvcs@vikingcorp.com

Hydrostatic Test:

The Check Valve is manufactured and listed for use at a maximum water working pressure of 250 psi (17.2 bar). The valve is factory tested at 500 psi (34.5 bar). Check Valves may be hydrostatically tested at 300 psi (20.7 bar) and/or 50 psi (3.4 bar) above the normal water working pressure, for limited periods of time (two hours), for the purpose of acceptance by the Authority Having Jurisdiction. If air testing is required, do not exceed 60 psi (4.1 bar) air pressure.

5. OPERATION (Refer to Figure 1 or Figure 2)

Flow through the Viking Spring Loaded In-Line Check Valve lifts the rubber-gasketed clapper (4 and 5) off the seat (7) to enter the sprinkler piping. When flow through the valve stops, the spring loaded clapper (4) closes quickly. The rubber gasket (5) forms a tight seal against the brass water seat (7), trapping pressure above the clapper and preventing reverse flow from sprinkler piping.

6. INSPECTIONS, TESTS AND MAINTENANCE

NOTICE: THE OWNER IS RESPONSIBLE FOR MAINTAINING THE FIRE-PROTECTION SYSTEM AND DEVICES IN PROPER OPERATING CONDITION.

The Viking Spring Loaded In-Line Check Valve must be kept free of foreign matter, freezing conditions (when used on wet systems), corrosive atmospheres, contaminated water supplies, and any condition that could impair its operation or damage the device.
It is imperative that the system be inspected and tested on a regular basis. The frequency of the inspections may vary due to contaminated water supplies, corrosive water supplies, and corrosive atmospheres. For minimum maintenance and inspection requirements, refer to NFPA 25. In addition, the Authority Having Jurisdiction may have additional maintenance, testing, and inspection requirements which must be followed.

WARNING: ANY SYSTEM MAINTENANCE WHICH INVOLVES PLACING A CONTROL VALVE OR DETECTION SYSTEM OUT OF SERVICE MAY ELIMINATE THE FIRE-PROTECTION CAPABILITIES OF THAT SYSTEM. PRIOR TO PROCEEDING, NOTIFY ALL THE AUTHORITY HAVING JURISDICTION. CONSIDERATION SHOULD BE GIVEN TO EMPLOYMENT OF A FIRE PATROL IN THE AFFECTED AREAS.

A. Five-Year Internal Inspection (Refer to Figure 1 or 2)

Internal inspection of Check Valves is recommended every five years unless inspections and tests indicate more frequent inspections are required.

1. Notify the Authority Having Jurisdiction, remote station alarm monitors, and those in the area affected that the system will be taken out of service. Consideration should be given to employment of a fire patrol in the affected areas.
2. Close the water supply Main Control Valve, placing the system out of service.
3. Open the main drain. If necessary, open the system test valve to vent and completely drain the system.
4. Remove necessary fittings and/or piping to allow visual inspection.
5. Inspect the water seat (7). Wipe away all contaminants, dirt, and mineral deposits. Do not use solvents or abrasives.
6. Inspect the clapper for debris. Test the clapper (4) for freedom of movement.

CAUTION: NEVER APPLY ANY LUBRICANT TO SEATS, GASKETS, OR ANY INTERNAL OPERATING PARTS OF THE VALVE. PETROLEUM-BASED GREASE OR OIL WILL DAMAGE RUBBER COMPONENTS AND MAY PREVENT PROPER OPERATION.

B. Valve Maintenance (Refer to Figure 1 or 2)

1. Perform steps 1 through 5 of paragraph 10-A FIVE-YEAR INTERNAL INSPECTION.
2. To remove clapper rubber (5):
   a. Use proper wrench and disassemble valve from system piping.
   b. Inspect the clapper and rubber from inlet end. If the clapper rubber shows signs of wear, such as cracking, cuts, or excessively deep grooves where the rubber contacts the water seat, replace the valve.

7. AVAILABILITY

The Viking Check Valve and Accessories are available through a network of domestic and international distributors. See the Viking Corp. Web site for closest distributor or contact The Viking Corporation.

8. GUARANTEES

For details of warranty, refer to Viking's current list price schedule or contact Viking directly.

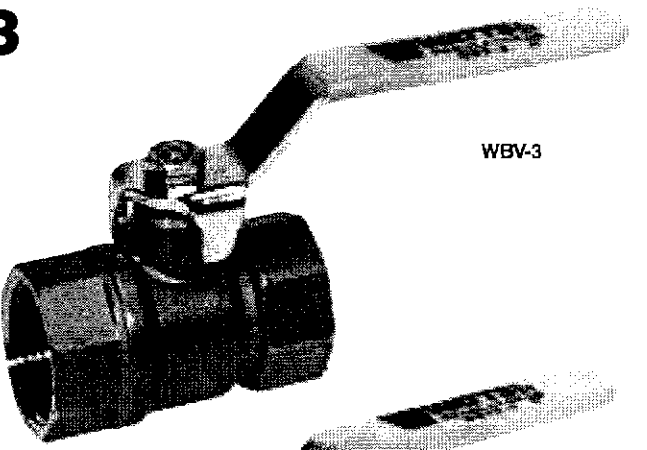
Series WBV-3, WBVS-3

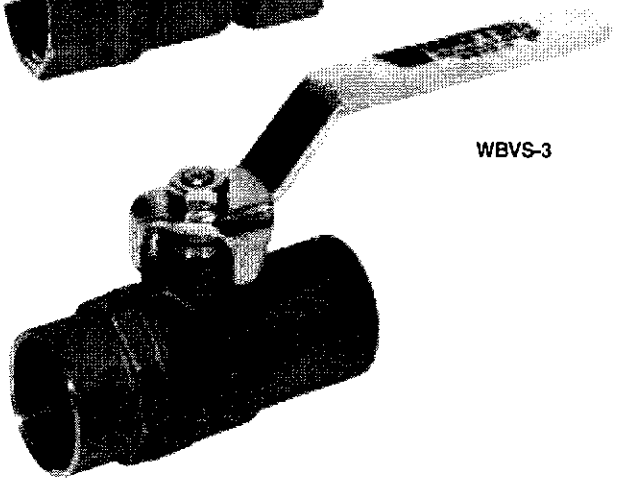
2-Piece, Standard Port, Brass Ball Valves

Sizes: ⅛" – 4" (3 – 100mm)

Series WBV-3, WBVS-3 2-Piece, Standard Port, Brass Ball Valves feature a bottom loaded blow-out proof stem, virgin PTFE seats & stem packing and an adjustable stem packing nut.



WBV-3



WBVS-3

Features

- Suitable for a full range of liquids and gases
- Bottom loaded blow-out proof stem
- Virgin PTFE stem packing seal
- Adjustable stem packing gland
- Vinyl insulator on heavy duty zinc plated carbon steel handles
- Quarter-turn open or close operation
- Low operating torque
- 400psi (28 bars) WOG non-shock

Models

WBV-3 ⅛" – 4" (3 – 100mm) threaded FIP end connections

WBVS-3 ⅜" – 3" (10 – 80mm) solder end connections*

Options

ITHK Tee handle kit

IOHK Oval handle kit

SXI-HK Stem Extension Kit

MSI-HK Memory Stop Kit

Pressure – Temperature

Temperature Range: -20°F – 302°F (-29°C – 150°C) at 50psi (3.4 bars)

Maximum Working Pressure: 400psi (28 bars) WOG non-shock

Specifications

A 2-piece standard port bronze ball valve to be installed as indicated on the plans. The valve must have a bottom loaded blowout proof stem, adjustable packing nut, and chrome plated brass ball and stem. Valves with top loaded stems
or without adjustable packing nuts are not acceptable. Valve must be rated to a minimum of 400psi (28 bars) WOG non-shock and will be a Watts Regulator Company Series WBV-3 (threaded) or WBVS (solder).

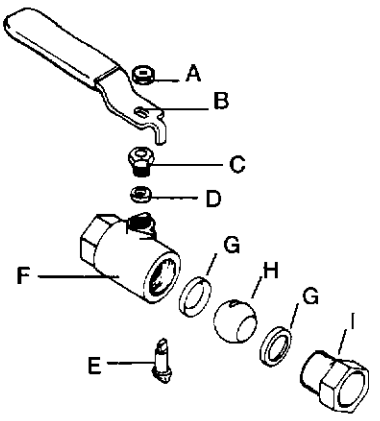
*This valve is designed to be soft soldered into lines without disassembly, using a low temperature solder 420°F (216°C). Other solders such as 95/5 tin antimony 460°F (238°C) or 96/4 tin silver 430°F (221°C) can be used. However, extreme caution must be used to prevent seat damage. Higher temperature solders will damage the seat material. ANSI B16.18 states that the maximum operating pressure of 50-50 solder connections is 200psi (13.78 bars) for ¼" – 1" (8 – 25mm) sizes, 175psi (12.06 bars) for 1¼" – 2" (32 – 50mm) sizes and 150psi (10.34 bars) for 2½" – 4" (65 – 100mm) sizes at 100°F (38°C), and decreases with higher temperatures.

Apply heat with the flame directed **AWAY** from the center of the valve body. Excessive heat can harm the seats. After soldering, the packing nut may have to be tightened.

WATTS® REGULATOR

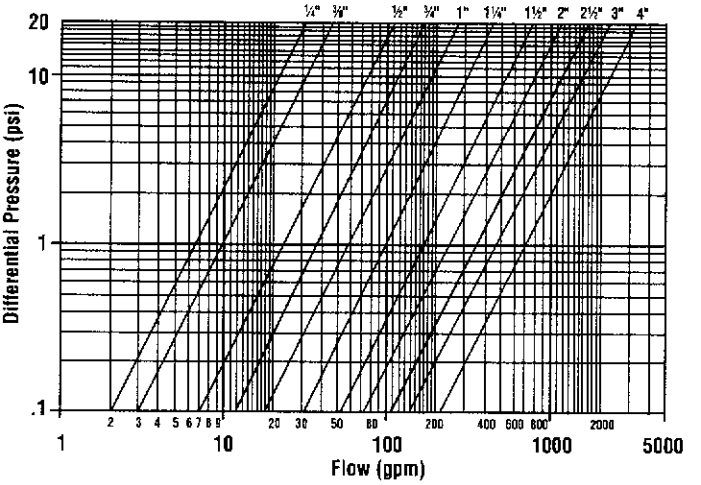
Watts product specifications in U.S. customary units and metric are approximate and are provided for reference only. For precise measurements, please contact Watts Technical Service. Watts reserves the right to change or modify product design, construction, specifications, or materials without prior notice and without incurring any obligation to make such changes and modifications on Watts products previously or subsequently sold.

Materials

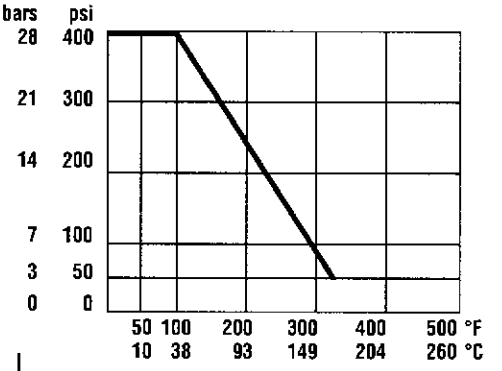


A.	**Handle Nut**	Zinc plated steel
B.	**Handle**	Zinc plated carbon steel with vinyl insulator
C.	**Packing Nut**	Brass
D.	**Stem Packing**	PTFE
E.	**Stem**	Brass
F.	**Body**	Forged brass
G.	**Seats**	PTFE
H.	**Ball**	Chrome plated brass
I.	**Adapter**	Forged brass

Flow Curves



Valve Seat Rating



*See applicable note on reverse side for solder end valves with regards to pressure/temperature rating.

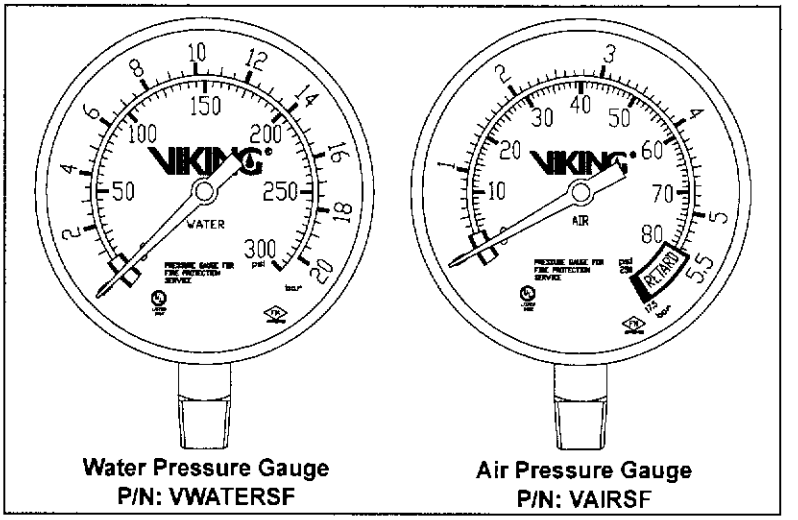
VIKING® TECHNICAL DATA

WATER AND AIR PRESSURE GAUGES

The Viking Corporation, 210 N Industrial Park Drive, Hastings MI 49058
Telephone: 269-945-9501 Technical Services: 877-384-5464 Fax: 269-818-1680 Email: techsvcs@vikingcorp.com

1. DESCRIPTION

Viking Pressure Gauges give visual indication of the water or air pressure available to the fire protection system.



Water Pressure Gauge
P/N: VWATERSF

Air Pressure Gauge
P/N: VAIRSF

2. LISTINGS AND APPROVALS

UL Listed - VEVX
ULc Listed - VEVXC
FM Approved - Pressure Gauges

3. TECHNICAL DATA

Connection: 1/4" NPT
Working Pressure:

- Water Gauge: 300 psi (20.7 bar)
- Air Gauge: 80 PSI (5.5 bar)

Maximum Pressure:

- Water Gauge: 300 psi (20.7 bar)
- Air Gauge: 250 PSI (17.2 bar) (Air gauge includes a "Retard Zone" between 80 and 250 PSI)

Material Standards

Case: ABS (Acrylonitrile Butadiene Styrene)
Window: Polycarbonate
Dial: Black Figures on White Background
Pointer: Black, Aluminum
Movement: Suspended Spring with Polyester Segment
Bourdon Tube: Bronze
Socket: Brass, Soft Soldered

Ordering Information

Available since 1977.
Water Pressure Gauge - VWATERSF
Air Pressure Gauge - VAIRSF

Viking Technical Data may be found on The Viking Corporation's Web site at http://www.vikinggroupinc.com. The Web site may include a more recent edition of this Technical Data Page.

4. INSTALLATION

1. Gauges are to be installed in accordance with the latest published standards of the National Fire Protection Association or other similar organizations, and also with the provisions of governmental codes, ordinances, and standards whenever applicable.
2. Gauges must be handled with care. They must be stored in a cool, dry place in their original shipping container. Never install gauges that have been dropped or damaged in any way. Such gauges should be destroyed immediately.
3. Adequate heat must be provided where gauges are installed.
4. The gauges must be protected from mechanical damage. Install the gauges according to the following steps:
   a. Apply a small amount of pipe-joint compound or tape to the external threads of the gauge only. Take care that no joint compound is allowed into the orifice of the gauge.
   b. Turn the unit clockwise to thread the gauge into the ½" (15 mm) NPT outlet of the coupling. DO NOT over-tighten the gauge.

7. AVAILABILITY

The water and air gauges are available through a network of domestic and international distributors. See The Viking Corporation web site for the closest distributor or contact The Viking Corporation.

8. GUARANTEES

For details of warranty, refer to Viking's current list price schedule or contact Viking directly.
